U. S. Congress

CONGRESSIONAL RECORD:

CONTAINING

THE PROCEEDINGS AND DEBATES

OF THE

SIXTY-THIRD CONGRESS, SECOND SESSION.

VOLUME LI.

WASHINGTON
1914

VOLUME LI, PART VIII.

CONGRESSIONAL RECORD,

SIXTY-THIRD CONGRESS, SECOND SESSION.

SENATE.

MONDAY, *April 27, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we seek an especial measure of Thy grace and blessing for the discharge of the duties of this day. Thou hast forced us out of all narrow individualism into the great world community, with world relations, with world responsibilities. We pray that we may be subject to the Divine guidance; that we may be enabled to stand for the highest ideals amidst the great brotherhood of nations. Especially do Thou give us influence with the circle of nations nearest to us, that we may yet, through our power and influence, write the highest, divinest chapter in the history of Christian civilization. Give to our statesmen a far-seeing vision, a will subject to the Divine will, and hearts responsive to human needs. May they be guided by the great God of nations, that they may perform well and faithfully the duties committed to them in Thy providence. For Christ's sake. Amen.

The VICE PRESIDENT resumed the chair.

The Journal of the proceedings of Saturday last was read and approved.

NEW YORK CENTRAL & HUDSON RIVER RAILROAD.

The VICE PRESIDENT laid before the Senate a communication from the Interstate Commerce Commission, transmitting, in response to a resolution of July 10, 1913, the report of the commission in the matter of a proposed bond issue by the New York Central & Hudson River Railroad Co., which, with the accompanying paper, was referred to the Committee on Interstate Commerce.

PENSIONS AND INCREASE OF PENSIONS.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 4353) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War and to certain widows and dependent relatives of such soldiers and sailors.

Mr. SMOOT. I move that the Senate disagree to the amendment of the House and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. SMOOT conferees on the part of the Senate.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 4167) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War and to certain widows and dependent relatives of such soldiers and sailors.

Mr. SMOOT. I move that the Senate disagree to the amendments of the House, request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. SMOOT conferees on the part of the Senate.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of sundry citizens of Mount Vernon and Kokomo, in the State of Indiana; of sundry citizens of Sault Ste. Marie and Saginaw, in the State of Michigan; of sundry citizens of Conshohocken, Pa.; Defiance, Ohio; St. Paul, Minn.; Maquoketa, Iowa; Junction City, Kans.; Old Town, Me.; and McKinney, Tex., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented resolutions adopted by the National Association of Vicksburg Veterans at Chicago, Ill., favoring recognition and assistance in carrying out the purposes of commemorating the semicentennial of the ending of the Civil War, which were referred to the Committee on Military Affairs.

He also presented a petition of the Democratic Club, of Haines, Alaska, praying that Congress allow the people of Alaska to settle by direct vote the question whether intoxicating beverages shall be manufactured and sold in that Territory, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Local Northeast Washington Socialist Party of the District of Columbia, remonstrating against sending American troops into Mexico, which was referred to the Committee on Foreign Relations.

He also presented petitions of the Volkszeitungs Conference of Brooklyn, N. Y.; of the Local Socialist Party of Philadelphia, Pa.; and of the Local Northeast Washington Socialist Party of the District of Columbia, praying for Federal protection in the mining district of Colorado, which were referred to the Committee on Education and Labor.

He also presented a memorial of Crocker Post, No. 12, Grand Army of the Republic, Department of Iowa, of Des Moines, Iowa, remonstrating against any change in the United States flag; also against granting pensions to the soldiers or widows or orphans of soldiers of the Confederacy; and, further, against placing in the Capitol any picture, statue, or bust of a Confederate soldier, which was referred to the Committee on the Judiciary.

Mr. LEA of Tennessee presented petitions of sundry church organizations of the State of Tennessee, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. JOHNSON presented petitions of sundry citizens of Pittsfield, Leeds, Mechanics Falls, Sabattus, Auburn, Biddeford, Freedom, Machias, Rockland, Topham, and Jonesboro, all in the State of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Bangor and Bar Harbor, in the State of Maine, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Business Men's Association of Wiscasset, Me., praying for the enactment of legislation to prevent discrimination in prices and to provide for publicity of prices to dealers and the public, which was referred to the Committee on Manufactures.

He also presented a petition of Local Union No. 69, Stationary Firemen, of Millinocket, Me., praying for the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of St. Croix Valley Lodge, No. 739, Brotherhood of Railroad Trainmen, of Calais, Me., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. KERN presented memorials of sundry citizens of South Bend, Ind., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRANDEGEE. I present resolutions in the nature of a memorial adopted by Richard E. Holcomb Camp, No. 38, Sons of Veterans, of New Canaan, Conn., remonstrating against any change being made in the American flag. I move that the resolutions be referred to the Committee on the Judiciary.

The motion was agreed to.

Mr. CATRON presented a petition of the congregation of the Methodist Episcopal Church South of Farmington, N. Mex., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. NORRIS presented a petition of the Socialist Party of Omaha, Nebr., praying for Federal protection of miners and their families in the mining districts of Colorado, which was referred to the Committee on Education and Labor.

Mr. SHIVELY presented memorials of sundry citizens of South Bend, Ind., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. PERKINS presented a petition of sundry citizens of Napa County, Cal., praying for the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Napa County, Cal., praying for the enactment of legislation to provide compensatory time for Sunday service performed by employees of the Post Office Department, which was referred to the Committee on Post Offices and Post Roads.

Mr. WARREN presented a petition of Local Union No. 2702, United Mine Workers of America, of Gunn, Wyo., and a petition

271317

of the National Executive Board, Workmen's Sick and Death Benefit Fund, of New York City, N. Y., praying for Federal protection in the mining district of Colorado, which were referred to the Committee on Education and Labor.

Mr. PAGE presented a petition of the congregation of the First Baptist Church of Bellows Falls, Vt., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented a petition of sundry citizens of Spring Arbor, Mich., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Corunna, Flint, and Owosso, all in the State of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of Detroit Post, No. 384, Department of Michigan, Grand Army of the Republic, of Detroit, Mich., praying for an appropriation for the purchase of the battlefield of Franklin, Tenn., to be used as a national park, which was referred to the Committee on Military Affairs.

LAND IN NOXUBEE COUNTY, MISS.

Mr. THOMAS, from the Committee on Public Lands, to which was referred the bill (H. R. 6831) to quiet title to lot 5, section 33, township 14, range 18 east, Noxubee County, Miss., reported it without amendment and submitted a report (No. 454) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON:

A bill (S. 5410) granting a pension to Annie Stober; to the Committee on Pensions.

By Mr. CUMMINS:

A bill (S. 5411) granting a pension to Jennie Moul (with accompanying papers); to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 5412) to provide for the erection of a public building at Astoria, Oreg. (with accompanying paper); to the Committee on Public Buildings and Grounds.

By Mr. WORKS:

A bill (S. 5413) for the relief of Isabel E. Rockwell (with accompanying papers); to the Committee on Claims.

By Mr. BANKHEAD:

A bill (S. 5414) granting a pension to Sarah B. Scott; to the Committee on Pensions.

By Mr. SMITH of Arizona:

A bill (S. 5415) for the relief of J. M. Zepeda; to the Committee on Claims.

By Mr. CRAWFORD:

A bill (S. 5416) granting an increase of pension to Isaac E. Hunt (with accompanying paper); to the Committee on Pensions.

By Mr. PAGE:

A bill (S. 5417) granting an increase of pension to Austin Peck (with accompanying paper); to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $47,000 for the establishment of a new site of a life-saving station at Coos Bay, Oreg., on the south side of the entrance thereof, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

Mr. CLARKE of Arkansas submitted an amendment proposing to appropriate $237,840 for labor and material required in the installation of a drainage system in the city of Hot Springs, Ark., to care for storm waters from the mountains of the Hot Springs Reservation, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. MARTINE of New Jersey submitted an amendment proposing to increase the appropriation for investigations in bee culture from $15,000 to $21,500, etc., intended to be proposed by him to the Agricultural appropriation bill, which was ordered to be printed and, with the accompanying papers, referred to the Committee on Agriculture and Forestry.

WARNING SIGNALS FOR VESSELS WORKING ON WRECKS.

The VICE PRESIDENT. The morning business is closed, and the calendar——

Mr. MARTINE of New Jersey. I ask unanimous consent for the consideration of the bill (S. 5289) to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That section 2 of the act approved June 7, 1897, entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States," be amended to read as follows:

"SEC. 2. That the supervising inspectors of steam vessels and the Supervising Inspector General shall establish such rules to be observed by steam vessels in passing each other and as to the lights to be carried by ferryboats and by barges and canal boats when in tow of steam vessels, and as to the lights and day signals to be carried by vessels marking a wreck or other obstruction to navigation or moored for submarine operations, or made fast to a sunken object which may drift with the tide or be towed, not inconsistent with the provisions of this act, as they from time to time may deem necessary for safety, which rules when approved by the Secretary of Commerce are hereby declared special rules duly made by local authority, as provided for in article 30 of chapter 802 of the laws of 1890. Two printed copies of such rules shall be furnished to such ferryboats and steam vessels, which rules shall be kept posted up in conspicuous places in such vessels."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MARTINE of New Jersey. I ask that the report of the committee be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

Mr. PERKINS, from the Committee on Commerce, submitted the following report, to accompany S. 5289:

The Committee on Commerce, to whom was referred the bill (S. 5289) to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work, having considered the same, report thereon with a recommendation that S. 5289 pass without amendment.

The bill has the approval of the Department of Commerce, and was prepared by that department, as will appear by the following letter, which is made a part of this report:

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, April 10, 1914.

MY DEAR SENATOR: On the 6th instant, at the request of the Senate Committee on Commerce, this department wrote the chairman of that committee a letter in which it was suggested that Senate bill 2798, entitled "A bill to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work," should be recast so as to read as follows:

"*Be it enacted, etc.*, That section 2 of the act approved June 7, 1897, entitled 'An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States, be amended to read as follows:

"'SEC. 2. That the supervising inspectors of steam vessels and the Supervising Inspector General shall establish such rules to be observed by steam vessels in passing each other and as to the lights to be carried by ferryboats and by barges and canal boats when in tow of steam vessels, and as to the lights and day signals to be carried by vessels marking a wreck or other obstruction to navigation or moored for submarine operations or made fast to a sunken object which may drift with the tide or be towed, not inconsistent with the provisions of this act, as they from time to time may deem necessary for safety, which rules, when approved by the Secretary of Commerce, are hereby declared special rules duly made by local authority, as provided for in article 30 of chapter 802 of the laws of 1890. Two printed copies of such rules shall be furnished to such ferryboats and steam vessels, which rules shall be kept posted up in conspicuous places in such vessels.'"

It was at that time further suggested that the matter of international signals for this purpose might be arranged, but that the passage of the bill as above would not prevent such a later arrangement. It has now been brought to the attention of this department that an emergency exists in this connection in the form of a contract which requires the laying across the Narrows at the mouth of New York Harbor of a large aqueduct from Long Island on the east to Staten Island on the west. This work will involve the continuance for a year or more of vessels engaged in the carrying out of this contract in the very path of navigation in our most crowded port. No law exists now indicating what the marks upon the vessels engaged in that work should be. It is important that this gap in the law should be closed with the least possible delay, and the department therefore, after considering the matter carefully with the Commissioner of Navigation, the Supervising Inspector General of the Steamboat-Inspection Service, and the Commissioner of Lighthouses, together with the solicitor of the department and myself, strongly urges that a special effort be made to enact the above bill into law as speedily as possible.

The interests of the United States, those of the city of New York, and of the contractor, as well as the commerce centering in our greatest port, are alike involved in an early settlement of this question.

Yours, very truly,

WILLIAM C. REDFIELD, *Secretary.*

Hon. J. P. CLARKE,
Chairman Committee on Commerce,
United States Senate, Washington, D. C.

SITE OF RED CROSS BUILDING IN CITY OF WASHINGTON.

Mr. LEA of Tennessee. I ask unanimous consent for the present consideration of the bill (S. 5031) quieting the title to lot 44 in square 172 in the city of Washington.

Mr. SMOOT. I ask for the regular order.

Mr. LEA of Tennessee. If the Senator will allow me a moment, I hope he will not interpose an objection. This is a bill to quiet title to a lot of ground purchased by the Red Cross Society on which to erect a building in this city. Its consideration will take only a moment. It is routine matter. There is some urgency that it should be passed now.

Mr. SMOOT. I shall not object to this bill, but the proper course is to proceed with the calendar in regular order.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That for the purpose of removing a cloud from the title to lot 44 in John Rothert's subdivision in square 172 in the city of Washington, D. C., whatsoever right, title, or interest the United States may have in and to said lot by reason of escheat or otherwise, be, and the same is hereby, quitclaimed unto Delia C. Condron, owner of the record title.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LANDS IN IMPERIAL COUNTY, CAL.

Mr. WORKS. I ask unanimous consent for the present consideration of the bill (H. R. 122) authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the State of California or its grantees may, with the approval of the Secretary of the Interior, reconvey to the United States any of the lands heretofore granted to said State in the townships authorized to be resurveyed by the act of July 1, 1902 (32 Stat. L., p. 728), and select in lieu thereof an equal amount of vacant, unappropriated, surveyed, unreserved, nonmineral public lands within said State: *Provided*, That any application to select land under this act must be presented within three years from the date of its passage: *Provided further*, That the Secretary of the Interior be, and he is hereby, authorized and directed to issue a patent conveying to Victor E. Shaw, of Los Angeles, Cal., the south half of section 20, in T. 11 S., R. 13 E., San Bernardino base and meridian, containing 320 acres, in Imperial County, Cal., upon the express and prior condition that said Victor E. Shaw shall execute and deliver to the Secretary of the Interior a grant and deed satisfactory to the Secretary of the Interior relinquishing and conveying to the Government of the United States all his right, title, and interest in and to the north half of section 36, in T. 16 S., R. 13 E., San Bernardino base and meridian, Imperial County, Cal., according to the original survey, containing 320 acres, now known as part of tract 37, in T. 16 S., Rs. 13 and 14 E., San Bernardino base and meridian, according to the resurvey.

SEC. 2. That the Secretary of the Interior may make proper rules and regulations for carrying this act into effect.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE CALENDAR.

Mr. SMOOT. The regular order.

The VICE PRESIDENT. There is a request for the regular order, and the Secretary will state the first bill on the calendar.

The bill (S. 1240) to establish the legislative reference bureau of the Library of Congress was announced as first in order on the calendar.

The VICE PRESIDENT. The bill has been read in full.

Mr. CLARK of Wyoming. Let the bill go over.

The VICE PRESIDENT. It will go over.

The bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement was announced as next in order.

Mr. SMOOT. Let the bill go over.

The VICE PRESIDENT. The bill will go over.

The joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation, was announced as the next business on the calendar.

The VICE PRESIDENT. The vote by which the joint resolution was passed has been reconsidered, and the question is on its passage.

Mr. CLARK of Wyoming. I observe that neither of the Senators from Montana is in the Chamber. I think the joint resolution ought not to be acted upon in their absence.

The VICE PRESIDENT. The joint resolution will go over.

The bill (S. 2242) making it unlawful for any Member of Congress to serve on or solicit funds for any political committee, club, or organization was announced as next in order.

Mr. BURTON. Let that go over.

The VICE PRESIDENT. The bill will go over.

The bill (S. 3112) to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex., was announced as next in order, and the Secretary read the bill.

Mr. SHEPPARD. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 2651) providing for the purchase and disposal of certain lands containing kaolin, kaolinite, fuller's earth, and other minerals within portions of Indian reservations heretofore opened to settlement and entry, was announced as next in order.

Mr. KERN. Let that go over.

The VICE PRESIDENT. The bill goes over.

The resolution (S. Res. 156) limiting expenditures for telegrams sent or received by Senators was announced as next in order.

Mr. KERN. Let that go over.

The VICE PRESIDENT. The resolution goes over.

The resolution (S. Res. 84) providing that any Senator upon his own request may be recorded and counted as present in order to constitute a quorum was announced as next in order.

Mr. CLARK of Wyoming. Let that go over.

The VICE PRESIDENT. The resolution goes over.

The resolution (S. Res. 218) proposing an amendment to the standing rules of the Senate was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The resolution goes over.

The joint resolution (S. J. Res. 26) proposing an amendment to the Constitution of the United States was announced as next in order.

Mr. SUTHERLAND. Let that go over.

The VICE PRESIDENT. The joint resolution goes over.

The bill (S. 3023) relating to the duties of registers of United States land offices and the publication in newspapers of official land-office notices was announced as next in order.

Mr. BURTON. I ask that the bill may go over. There is an amendment which I desire to offer to it, and the Senator from Montana [Mr. MYERS], who has charge of the bill, is absent. He will no doubt desire to be present when I shall propose the amendment.

The VICE PRESIDENT. Being objected, the bill goes over.

The joint resolution (S. J. Res. 94) to authorize the Secretary of Commerce to investigate the condition of trade in China, for the purpose of determining the desirability of establishing there a permanent exposition of the products of the United States of America, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The joint resolution goes over.

The bill (S. 2425) to authorize the Roanoke River Development Co. to construct and maintain a dam across the Roanoke River in Mecklenburg County, in the State of Virginia, approximately 20 miles below the town of Clarksville, in said State, was announced as next in order.

Mr. PITTMAN. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 3971) to provide for a permanent exhibit of the resources of the States of the Union in or near Washington, D. C., was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill goes over.

The joint resolution (S. J. Res. 10) proposing an amendment to the Constitution of the United States, fixing the time for the convening of Congress and commencement of the terms of the President, Vice President, Senators, and Representatives, was announced as next in order.

Mr. OVERMAN. Let that go over.

The VICE PRESIDENT. The joint resolution goes over.

The bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 1986) to remove the charge of desertion from the military record of Henry Fuller was announced as next in order.

Mr. SMITH of Michigan. I ask that the bill may be passed over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 3594) to correct the military record of Peter Duchane was announced as next in order.

Mr. SMITH of Michigan. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 1990) to correct the military record of Samuel J. Kerns was announced as next in order.

Mr. SMITH of Michigan. I ask that the bill go over.

The VICE PRESIDENT. The bill goes over.

The resolution (S. Res. 254) to create a special committee of five Senators to assist the Interstate Commerce Commission in investigating certain facts regarding the methods and practices of the Louisville & Nashville Railroad, and for other purposes, was announced as next in order.

Mr. LEA of Tennessee. I ask that that go over.

The VICE PRESIDENT. The resolution goes over.

The bill (S. 392) to create in the War Department and Navy Department, respectively, a roll designated as "the Civil War volunteer officers' retired list," to arthorize placing thereon

with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 121) to provide that petty officers, noncommissioned officers, and enlisted men of the United States Navy and Marine Corps on the retired list who had creditable Civil War service shall receive the rank or rating and the pay of the next higher enlisted grade was announced as next in order.

Mr. OVERMAN. I ask that the bill go over.

The VICE PRESIDENT. The bill goes over.

The bill (H. R. 6282) to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or coca leaves, their salts, derivatives, or preparations, and for other purposes, was announced as next in order.

Mr. THOMAS. Mr. President, since this bill was up at the last calling of the calendar I have received a communication from the Treasury Department concerning some needed amendments, which I have not had an opportunity up to this time to carefully examine. I shall, therefore, be compelled to ask that the bill go over.

Mr. BURTON. Mr. President, I should like to ask the Senator from Colorado whether the communication which he has received from the Treasury Department has been printed and is available for the use of Members of the Senate, or was it simply presented to the Committee on Finance?

Mr. THOMAS. It is not available, I will say to the Senator from Ohio; I only received it a day or two ago, but I shall be very glad to have it printed for the use of Senators, if that is desired.

Mr. BURTON. May I suggest to the Senator from Colorado that it be printed and so be made available?

Mr. SMOOT. I suggest to the Senator from Colorado that he ask that the communication be printed for the use of the Senate.

Mr. THOMAS. I make that request.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the communication referred to will be printed for the use of the Senate. (S. Doc. No. 473.)

The bill (H. R. 6827) to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," approved August 14, 1912, was announced as next in order.

Mr. OVERMAN. I ask that the bill go over.

The VICE PRESIDENT. The bill goes over.

PENSIONS AND INCREASE OF PENSIONS.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 4552) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors. It proposes to pension the following-named persons at the rates stated:

Agnes Hallsworth, widow of James Hallsworth, late of Company H, Seventeenth Regiment Massachusetts Volunteer Infantry, and Company G, One hundred and ninety-eighth Regiment Ohio Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Jennie C. Marks, widow of Eugene P. Marks, late of Company H, First Regiment Connecticut Volunteer Heavy Artillery, $20 per month in lieu of that she is now receiving.

Sophronia E. Sawyer, widow of Elmer E. Sawyer, late first lieutenant Company A, Ninety-seventh Regiment New York Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Abbie A. Upson, widow of Henry Upson, late chaplain, Thirteenth Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Ellen M. Banning, widow of Elbert J. Banning, late of Company E, Twenty-fifth Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Catherine A. French, widow of Francis L. French, late of Company H, Second Regiment Connecticut Volunteer Heavy Artillery, $20 per month in lieu of that she is now receiving.

Ellis R. Douglass, dependent mother of Dudley M. Douglass, late of Company K, Twenty-third Regiment Wisconsin Volunteer Infantry, $20 per month in lieu of that she is now receiving.

James E. Stalker, late of Company D, One hundred and fourteenth Regiment New York Volunteer Infantry, $50 per month in lieu of that he is now receiving.

John McMillin, late of Company C, Eighteenth Regiment Indiana Volunteer Infantry, $36 per month in lieu of that he is now receiving.

William S. Patterson, late of Company E, Seventh Regiment Indiana Volunteer Infantry, $40 per month in lieu of that he is now receiving.

William Redding, late of U. S. S. *Great Western* and *Collier*, United States Navy, $30 per month in lieu of that he is now receiving.

Clinton Neligh, late of Company I, Sixty-seventh Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Sarah Childress, widow of Henry J. Childress, late of Company H, Twenty-eighth Regiment Iowa Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Mary E. Hurlburt, widow of Benjamin F. Hurlburt, late of Company M, Third Regiment New York Volunteer Light Artillery, $20 per month in lieu of that she is now receiving.

William L. Sapp, late of Company B, Sixth Regiment West Virginia Volunteer Cavalry, $50 per month in lieu of that he is now receiving.

James F. McGrew, late of Company A, Forty-third Regiment Ohio Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Jacob Everson, late of Company E, Fifteenth Regiment, and Company B, One hundred and twentieth Regiment, Indiana Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Annie Shannon, widow of John Shannon, late of Company H, Second Regiment Illinois Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Pauline G. Murphy, widow of Monroe M. Murphy, late assistant engineer, United States Navy, $20 per month in lieu of that she is now receiving.

John W. Wareham, late of Company A, Forty-ninth Regiment Ohio Volunteer Infantry, $30 per month in lieu of that he is now receiving.

William Willis, late of Company K, Ninth Regiment Indiana Volunteer Infantry, $36 per month in lieu of that he is now receiving.

William H. H. Morris, late of Company I, One hundred and fifty-fourth Regiment New York Volunteer Infantry, and One hundred and fifty-first Company, Second Battalion, Veteran Reserve Corps, $30 per month in lieu of that he is now receiving.

Franklin R. Simmons, late of Company A, Fifth Regiment, and Company C, First Regiment, Michigan Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Matilda M. White, widow of Joseph P. White, late of Company K, Eighty-second Regiment New York Volunteer Infantry, $12 per month.

Samuel Baughman, late of Company E, Thirteenth Regiment Pennsylvania Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

John Marsh, late of Company B, Ninth Indiana Legion, $30 per month in lieu of that he is now receiving.

Kate G. Caton, widow of Henry T. Caton, late of Companies G and E, One hundred and twenty-sixth Regiment New York Volunteer Infantry, $12 per month.

William A. Owens, late of Company I, Second Regiment Wisconsin Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Cornelia Kenyon, widow of Robert Kenyon, late of Company C, Twenty-second Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Milo E. Cook, late of Company F, Forty-sixth Regiment Massachusetts Militia Infantry, $24 per month in lieu of that he is now receiving.

Levin A. Harvey, late first lieutenant Company H, Twelfth Regiment Ohio Volunteer Cavalry, $50 per month in lieu of that he is now receiving.

Oliver B. Bond, late of Company K, One hundredth Regiment New York Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Cyrus Hicks, late of Company H, Seventh Regiment Michigan Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Jacob Hilfinger, late of Company B, Sixth Regiment Pennsylvania Volunteer Heavy Artillery, and Company K, One hundred and thirty-fourth Regiment Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Austin B. Wells, late of Company D, Eleventh Regiment West Virginia Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Sallie E. Masmar, widow of John Masmar, late of Company D, Fourth Regiment Indiana Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Judson Bayne, late first lieutenant Company F, Fifteenth Regiment Kentucky Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Van Buren Fisher, late of Company H, Forty-fourth Regiment Indiana Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Edgar T. Limes, late of Company I, Thirty-third Regiment, and Company I, Thirty-fourth Regiment, Iowa Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Daniel Sullivan, late of Company K, One hundred and fifty-second Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Daniel M. Freeman, late of Company K, Second Regiment Michigan Volunteer Infantry, $36 per month in lieu of that he is now receiving.

David E. Bird, late of Company D, First Regiment Maine Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Mary V. Canaday, widow of Henry D. Canaday, late of Company D, One hundred and twenty-fifth Regiment Illinois Volunteer Infantry, and former widow of Con Hendrickson, late of Company D, Tenth Regiment Indiana Volunteer Cavalry, $12 per month.

Hamilton M. Steele, late of Company F, First Regiment Indiana Volunteer Heavy Artillery, $40 per month in lieu of that he is now receiving.

Sidney Williams, late of Company H, Eighth Regiment Connecticut Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Willet Van Winkle, late of Company I, Thirty-ninth Regiment Illinois Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Alfred L. Cain, late of Company F, Twentieth Regiment Ohio Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Jackson Stout, late of Companies E and C, Twenty-eighth Regiment Illinois Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Cornelius Curran, late of Company B, Second Regiment Massachusetts Volunteer Heavy Artillery, $30 per month in lieu of that he is now receiving.

George H. Partridge, late of Company I, Fifteenth Regiment Maine Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Josiah F. Gifford, late of Company C, Sixth Regiment Michigan Volunteer Heavy Artillery, $24 per month in lieu of that he is now receiving.

Peter Prock, late of Company B, First Battalion Maine Volunteer Sharpshooters, $36 per month in lieu of that he is now receiving.

Winfield S. Brooks, late of Company C, Second Regiment, and Company K, Third Regiment, Maryland Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Andrew T. Machesney, late of Company K, Fifty-third Regiment Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Celina Little, widow of William Little, late of Company D, One hundred and seventy-fifth Regiment Ohio Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Ira Felt, jr., late of Company I, Sixty-second Regiment Pennsylvania Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Adelaide W. Wheeler, widow of Frank M. Wheeler, late of Company A, One hundred and forty-first Regiment New York Volunteer Infantry, $12 per month.

Rachel C. Smith, widow of Barnett Smith, late of Company H, One hundred and third Regiment Illinois Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Olive H. Bowen, widow of Ira W. Bowen, late of Company H, Thirty-second Regiment Wisconsin Volunteer Infantry, $20 per month in lieu of that she is now receiving.

John Wright, late of Company C, One hundred and seventy-third Regiment Ohio Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Mary Thomas, widow of Pierre W. Thomas, late captain Company A, Thirty-fifth Regiment Illinois Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Sarah E. Frazier, widow of Jasper N. Frazier, late of U. S. S. *Clara Dolsen* and *Great Western*, United States Navy, $20 per month in lieu of that she is now receiving.

Nettie Randolph, widow of Thomas J. Randolph, late captain Company B, Twenty-eighth Regiment Kentucky Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Oden Gibson, late of Company I, Ninth Regiment, and Company I, Eleventh Regiment, Tennessee Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

Alfred G. Hawkins, helpless and dependent son of Lewis G. Hawkins, late of Company E, Thirty-fifth Regiment Kentucky Volunteer Infantry, $12 per month.

Ada S. Goodrell, widow of William H. Goodrell, late of Company B, First Regiment, and captain Company B, Fifteenth Regiment, Iowa Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Mary A. Burdick, widow of Asher Burdick, late of Company K, Eighteenth Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Thomas F. Edwards, late of Company D, Eighth Regiment, and Company F, Eighteenth Regiment, Connecticut Volunteer Infantry, $40 per month in lieu of that he is now receiving.

William R. Holmer, alias Charles Hoxie, late of Company D, Fourteenth Regiment Connecticut Volunteer Infantry, and Company B, Second Regiment Connecticut Volunteer Heavy Artillery, $30 per month in lieu of that he is now receiving.

Charles E. Mulkin, late of Company D, Eighth Regiment Connecticut Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Robert W. McClaughry, late major, One hundred and eighteenth Regiment Illinois Volunteer Infantry, and major and additional paymaster United States Volunteers, $50 per month in lieu of that he is now receiving.

John Gowland, late of Company G, Eighth Regiment, and Company M, Sixteenth Regiment, Pennsylvania Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

Ebenezer A. Whitney, late of Company H, Ninety-ninth Regiment Pennsylvania Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Adda A. Benson, widow of Peter Benson, late of Company K, Sixteenth Regiment Wisconsin Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Henry C. Smith, late first lieutenant Company A, Thirty-sixth Regiment Indiana Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Austin Groninger, late of Company H, One hundred and fiftieth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Edgar A. Hamilton, late captain Company C, and major, First Regiment New York Volunteer Mounted Rifles, $36 per month in lieu of that he is now receiving.

Waddy Hoover, late of Company F, Seventieth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Corydon M. Turnbull, late of Company B, Sixtieth Regiment New York Volunteer Infantry, and Company L, Fourteenth Regiment New York Volunteer Heavy Artillery, $30 per month in lieu of that he is now receiving.

John H. Williamson, late of Company K, Third Regiment Ohio Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Henry C. Doll, late of Company F, Twenty-fifth Regiment Pennsylvania Volunteer Infantry, $12 per month.

Frank Laplante, late of Company F, Thirty-second Regiment Wisconsin Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Cornelius T. Ham, late of Seventh Company, unassigned, Maine Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Alphonso Maddocks, late of Company A, Twenty-sixth Regiment Maine Volunteer Infantry, and Company I, Ninth Regiment Maine Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Adam Daum, late of Company C, First Battalion, Pennsylvania Volunteer Light Artillery, and Company I, Seventy-eighth Regiment Pennsylvania Volunteer Infantry, $24 per month in lieu of that he is now receiving.

John H. McCreary, late of Company B, Two hundredth Regiment Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Carey G. Colburn, late of Company E, One hundred and twelfth Regiment Illinois Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Joel R. Smith, late of Company C, United States Voltigeurs, War with Mexico, and Company F, Second Regiment Pennsylvania Volunteer Cavalry, $50 per month in lieu of that he is now receiving.

Gashem Norris, late of Company H, Fifteenth Regiment Kentucky Volunteer Infantry, $50 per month in lieu of that he is now receiving.

George R. Hall, late of Company F, One hundred and fifth Regiment Pennsylvania Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Van R. Eels, late of Company A, Twenty-sixth Regiment, and Company G, Twenty-ninth Regiment, Maine Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Hanson B. Simmons, late of Company B, Fourth Regiment Maine Volunteer Infantry, and Company F, Twentieth Regiment Veteran Reserve Corps, $36 per month in lieu of that he is now receiving.

George W. Plaisted, late of Company E, Thirty-second Regiment, and Company E, Thirty-first Regiment, Maine Volunteer Infantry, $30 per month in lieu of that he is now receiving.

John Johnson, No. 2, late of the U. S. S. *Saranac*, United States Navy, $12 per month.

Sarah Jane Palmer, widow of Lewis H. Palmer, late of Company A, Tenth Regiment Iowa Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Margaret Delashmutt, former widow of John J. Gately, late of Company E, Thirty-seventh Regiment Iowa Volunteer Infantry, $12 per month.

Nancy A. Albert, widow of Amos M. Albert, late of Company K, One hundred and sixty-ninth Regiment Ohio Volunteer Infantry, $12 per month.

Charles N. Points, late of Company E, Thirteenth Regiment Kansas Volunteer Infantry, and Company B, First Battalion Kansas Veteran Volunteer Mounted Infantry, $30 per month in lieu of that he is now receiving.

Maggie Carter, widow of Henry Carter, alias Henry Wilkinson, late of Company C, Fifty-first Regiment United States Colored Volunteer Infantry, $12 per month.

Elisha J. Melton, late of Company D, Stone County Battalion Missouri Home Guards, $24 per month in lieu of that he is now receiving.

William W. Green, late of Company F, Osage County Regiment Missouri Home Guards, $36 per month in lieu of that he is now receiving.

Mary L. Tarbox, widow of William W. Tarbox, late of Company G, Tenth Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

George W. Berry, late of Company H, One hundred and sixtieth Regiment Ohio Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Mr. SMOOT. I move, on page 13, that lines 4, 5, 6, and 7, be stricken out, as the beneficiary therein named is now dead.

The VICE PRESIDENT. The amendment proposed by the Senator from Utah will be stated.

The SECRETARY. On page 13, after line 3, it is proposed to strike out:

The name of Mary A. Burdick, widow of Asher Burdick, late of Company K, Eighteenth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

Mr. BRYAN. I move to strike from the bill the name of John Johnson. I have not a copy of the bill before me, but the statement in reference to his case occurs in the report on page 50. It appears by the report that he enlisted August 21, 1865, in the United States Navy. There was no proof of disability furnished, and the enlistment was after the war was over.

The VICE PRESIDENT. The item to which the Senator from Florida refers will be stated.

The SECRETARY. On page 17, after line 22, it is proposed to strike out:

The name of John Johnson, No. 2, late of the U. S. S. *Saranac*, United States Navy, and pay him a pension at the rate of $12 per month.

Mr. SMOOT. Mr. President, I desire to call the attention of the Senator from Florida to the fact that the report states:

Claimant was examined January 3, 1900, by a board of Pension Bureau surgeons, who found rheumatism, deafness, and disease of eyes, and it is conceded by the medical authorities of the bureau that a ratable degree of disability from those complaints is shown to exist. Two neighbors testify to have known of sailor's suffering from rheumatism from 1880, and that at times he was not able to work.

Claimant is now 75 years old and, as the evidence shows, no longer able to work and in destitute circumstances. He suffers from deafness, eye trouble, heart disease, and other physical infirmities, and is without property or means of any kind.

Mr. President, upon this report from the Pension Bureau surgeons the Committee on Pensions thought that it was very proper, indeed, that this man should be granted a pension. It is true that he did not enlist until the date named by the Senator from Florida.

Mr. BRYAN and Mr. SMITH of Georgia. After the war was over.

Mr. SMOOT. But he served after the war, and these disabilities came upon him while in the service. I am perfectly aware that the claimant did not serve in the Civil War, because at the time of his enlistment the war had closed; but any soldier or sailor serving in the Army or the Navy and incurring disabilities in the service is entitled to a pension under the general law. That is the reason why the name of this sailor appears in this bill.

Mr. SMITH of Georgia. Does it appear that his troubles were of service origin?

Mr. SMOOT. No. The ruling of the Pension Department was against him, and that was the reason why he appealed to Congress.

Mr. SMITH of Georgia. So that he was not in the Civil War and he received no injuries of service origin?

Mr. SMOOT. He was not in the Civil War, but he was in the Regular Navy.

Mr. SMITH of Georgia. But he was not in the Civil War?

Mr. SMOOT. That is true.

Mr. SMITH of Georgia. He was merely a sailor.

Mr. SMOOT. That is true.

Mr. SMITH of Georgia. Who retired without any injuries of service origin?

Mr. SMOOT. That is where the dispute arises. The testimony shows that he did contract the diseases spoken of while he was in the service, but the Pension Bureau held that he did not.

Mr. SMITH of Georgia. The finding of the court which we have established to pass on such cases was that the disabilities were not of service origin. Furthermore, he was not in the war.

Mr. SMOOT. Yes; but the pension surgeons did find that those disabilities exist, and they so report.

Mr. BRYAN. Mr. President, the Bureau of Pensions found that it could not grant relief on the application for pension, because the applicant served less than 90 days in the Civil War. He did not enlist until after the war was over in fact, although the war was not officially declared over until 1866. Further, the bureau rejected his application upon the ground that his ailments were not of service origin. Those are the facts of the case.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Florida.

The amendment was rejected.

Mr. BRYAN. On page 15, I move to strike out lines 16, 17, and 18, the item granting a pension to Henry C. Doll.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 15, after line 15, it is proposed to strike out:

The name of Henry C. Doll, late of Company F, Twenty-fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $12 per month.

Mr. BRYAN. Mr. President, the report of the committee, on page 44, shows that Mr. Doll served from May 2, 1861, to July 26, 1861, less than 90 days. He could not get a pension under the law, and he has no injury of service origin. He enlisted during the early part of the war, but served less than 90 days; and now, finding he can not get upon the pension roll under any of the many generous general pension laws, he comes here asking a special favor of Congress.

Mr. SMOOT. Mr. President, Henry C. Doll, of Denver, Colo., it is true, served but 86 days. It was not because of the fact that he had not enlisted for more than that length of time, but he was discharged at the end of that period, but even then his service was only 4 days less than 90 days.

I wish to say to the Senator that many such bills have passed both Houses of Congress. The claimant was honorably discharged. At present he is 75 years of age, in poor health, unable to labor, without a cent of means to live upon outside of such pension as we may give him here, and that he is living entirely upon charity. He would be entitled to a pension if he had been allowed to serve 4 more days.

Mr. BRYAN. I do not know who stopped him from serving four more days.

Mr. SMOOT. He was discharged, Mr. President, so the report says, four days before his 90-day service was over.

Mr. BRYAN. He enlisted for three months and was discharged a few days before the expiration of that term. He could have reenlisted. The Senator appeals for the applicant on the ground of charity. If we put it upon that basis, I have nothing further to say.

In a bill which I learn passed the Senate last week, but which I thought was still upon the calendar, I find that a soldier was granted an increase of pension who has, according to the House report, a home of the value of $3,000 and also $1,800 in bank. The increase was granted upon the ground

that to deny him an increase of pension would be what they call "to penalize thrift."

Mr. SMOOT. To what case does the Senator refer?

Mr. BRYAN. When a man can not come within any law, when he did not serve even 90 days in the war, this appeal is made for him on the ground of charity. The same appeal can be made for every man who is 75 years of age and penniless.

Mr. SMOOT. Mr. President, it is not only upon the ground of charity that I appeal to the Senate in this case, but it is on the ground that the applicant was a soldier, who served in the war for 86 days, and who would have served longer but for the fact that he was discharged. I can not tell the Senator why he was discharged at that particular time. There may have been no necessity for his service longer; but the Government honorably discharged the soldier.

In relation to the other case to which the Senator refers, what he has stated is information to me. I do not recall the case, and I should like to look it up, because I am quite positive it has not been the policy of the committee to increase pensions in such cases.

Mr. BRYAN. Mr. President, the committee has no policy. No member of the committee, I suppose, knew that such a case existed or that a pension was being asked for a man in those circumstances; but nevertheless the House put it on the bill, and in the way in which we pass pension bills nobody had an opportunity to find it out; so that there is no disagreement between the two Houses; and that individual will get a pension of $50 a month, although he has a home worth $3,000 and has a bank account of $1,800.

Mr. SMOOT. I will say to the Senator that the committee does have certain rules which it follows, and in a case of that kind the examiner certainly ought to have called the committee's attention to it. I want to say that he is very careful indeed in going over every bill from the House, and my experience has been that he has been exceedingly careful in calling attention to any case that did not fall within the rule.

Mr. BRYAN. The case to which I have just called the Senator's attention demonstrates this proposition. Under no law can this man, who was not injured in the service, get upon the pension roll except by the charity of Congress. I move to strike out the item.

The VICE PRESIDENT. The question is on the amendment of the Senator from Florida to strike out the item referred to by him.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

APPRAISERS' STORES BUILDING AT MILWAUKEE, WIS.

The bill (H. R. 5487) to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis., was considered as in Committee of the Whole. It provides that in addition to the sum of $75,000 heretofore authorized by act of Congress for the construction on a site at Milwaukee, Wis., already purchased by the Government for such purpose, of a suitable and commodious appraisers' stores building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and purpose of the United States Government appraising goods and merchandise imported from foreign countries and into Milwaukee, Wis., the additional sum of $40,000 is authorized, at a total cost, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $115,000, for which plans, specifications, and full estimates shall previously be made and approved according to law.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 2902) to reduce fees in the United States district courts, to fix the salaries of the clerks of such courts, to increase the mileage and per diem of witnesses and jurymen therein, and to repeal section 840 of the Revised Statutes and all other conflicting laws was announced as next in order.

Mr. CLARK of Wyoming. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 67) for the relief of Emory Scott Land was announced as next in order.

The VICE PRESIDENT. The bill has been reported adversely.

Mr. WARREN. A House bill on the same subject has been reported favorably. I ask that this bill may go over without prejudice.

The VICE PRESIDENT. The bill will be passed over.

CONSTRUCTION OF FOUR REVENUE CUTTERS.

The bill (S. 4377) to provide for the construction of four revenue cutters was considered as in Committee of the Whole. It authorizes the Secretary of the Treasury to construct one steam revenue cutter of the first class for service in the waters of southern California, at a cost not to exceed the sum of $350,000; one steam revenue cutter of the first class for service in the Gulf of Mexico, at a cost not to exceed the sum of $250,000; one steam revenue cutter of the second class for service on the coast of Maine, at a cost not to exceed the sum of $225,000; and one steam revenue cutter of the third class for service as anchorage patrol boat in New York Harbor, at a cost not to exceed the sum of $100,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (H. R. 12045) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war was announced as next in order.

Mr. BRYAN. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

REMOVAL OF SNOW AND ICE.

The bill (S. 3696) providing for the removal of snow and ice from the paved sidewalks of the District of Columbia was announced as next in order.

Mr. OVERMAN. Let that bill go over.

Mr. DILLINGHAM. Mr. President, I wish to suggest to the Senator who has made the objection that the bill has been passed through the Senate, after debate and without objection, and died in the House only for lack of consideration. It is a very much needed measure.

Mr. OVERMAN. Is it really needed. I did not understand that it was likely that there would be any snow or ice to be removed for some time to come. However, I will withdraw my objection.

The VICE PRESIDENT. Is there an objection?

Mr. OVERMAN. I withdraw my objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That it shall be the duty of every person, partnership, corporation, joint-stock company, or syndicate in charge or control of any building or lot of land within the fire limits of the District of Columbia, fronting or abutting on a paved sidewalk, whether as owner, tenant, occupant lessee, or otherwise, within the first four hours of daylight after the ceasing to fall of any snow or sleet, to remove and clear away, or cause to be removed and cleared away, such snow or sleet from so much of said sidewalk as is in front of or abuts on said building or lot of land.

SEC. 2. That it shall be the duty of the Commissioners of the District of Columbia, within the first four hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice on the paved sidewalks within the fire limits of the District of Columbia, in front of or adjacent to all public buildings, public squares, reservations, and open spaces in the said District owned or held by lease by said District, to cause such snow, sleet, and ice to be removed, and also to cause the same to be removed from all crosswalks of improved streets and places of intersection of alleys with paved sidewalks, and also from all paved sidewalks or cross walks used as public thoroughfares through all public squares, reservations, or open spaces within the fire limits of said District owned or held by lease by the District of Columbia; but in the event of inability to remove such accumulation of snow, sleet, and ice without injury to the sidewalk, by reason of the hardening thereof, it shall be their duty, within the first four hours of daylight after the hardening thereof, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, such paved sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean, or cause to be thoroughly cleaned, said sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks.

SEC. 3. That it shall be the duty of the Chief of Engineers of the United States Army, within the first four hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice upon the paved sidewalks within the fire limits of the District of Columbia, to remove or cause to be removed from such sidewalks as are in front of or adjacent to all buildings owned or leased by the United States, and from all paved sidewalks or crosswalks used as public thoroughfares in front of, around, or through all public squares, reservations, or open spaces within the fire limits of the District of Columbia, owned or leased by the United States, such snow, sleet, and ice; but in the event of inability to remove such accumulation of snow, sleet, and ice, by reason of the hardening thereof, without injury to the sidewalk, it shall be his duty, within the first four hours of daylight after the hardening of such snow, sleet, and ice, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, such paved sidewalks and crosswalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks and crosswalks.

SEC. 4. In case the snow, sleet, and ice can not be removed from so much of the paved sidewalks within the fire limits of the District of Columbia as front upon or abut such buildings or lots of land as are not owned or held by lease by the District of Columbia or the United States without injury to said sidewalks because of the hardening thereof,

the person, partnership, corporation, joint-stock company, or syndicate in charge or control of such buildings or lots of land, whether as owner, tenant, occupant, lessee, or otherwise, shall, within the first four hours of daylight after the same has formed, make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, said sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks.

SEC. 5. That in the event of the failure of any person, partnership, corporation, joint-stock company, or syndicate to remove or cause to be removed such snow or ice from the said sidewalk, or to make the same reasonably safe for travel, or cause the same to be made reasonably safe for travel, as hereinbefore provided, it shall be the duty of the Commissioners of the District of Columbia, as soon as practicable after the expiration of the time herein provided for the removal thereof, or for the making of the said sidewalks reasonably safe for travel, to cause the snow and ice in front of such building or lot of land to be removed or to cause the same to be made reasonably safe, as hereinbefore directed to be done by such person, partnership, corporation, joint-stock company, or syndicate in charge or control of such building or lot of land, and the amount of the expense of such removal or such work of making the said sidewalks reasonably safe for travel shall in each instance be ascertained and certified by the said commissioners to the corporation counsel of the District of Columbia.

SEC. 6. That the corporation counsel is hereby directed and authorized to sue for and recover from such person, partnership, corporation, joint-stock company, or syndicate the amount of such expense in the name of the District of Columbia, together with $3 penalty for each offense, with costs, and when so recovered the amount shall be deposited to the credit of the District of Columbia.

SEC. 7. That in order to enable the said commissioners and the Chief of Engineers of the United States Army to comply with their duties under this act and to carry it into effect there is hereby appropriated the sum of $10,000, one-half out of the general revenue fund of the District of Columbia and the other one-half out of any moneys in the Treasury not otherwise appropriated.

Mr. LANE. I should like to ask who introduced the bill—what member of what committee?

The VICE PRESIDENT. The bill was reported by the Senator from Vermont [Mr. DILLINGHAM].

Mr. DILLINGHAM. I had the honor to report the bill from the Committee on the District of Columbia.

Mr. LANE. I wish to say, for the Senator's information, that I do not think the passage of this bill will secure the desired result. Does the Senator know what city has adopted this method?

Mr. DILLINGHAM. Substantially all of the cities in all of the Northern States, wherever they have snow.

Mr. LANE. Has it succeeded?

Mr. DILLINGHAM. It has succeeded. It is done under the police power.

I will say to the Senator that Congress has already passed two separate acts intended to secure the object mentioned in this bill. Both of them have been held inoperative and illegal by the court of appeals of this District. Only one of them raised any constitutional question, and that was because the provisions of the bill were not just and equal and adequate for the purpose. In other words, it did not cover all classes of property.

This bill has been drawn to meet all of those objections. If the Senator will look at the report, he will see that the bill covers, first, United States property, including public buildings, public grounds, and open spaces; second, District of Columbia property, including public buildings, public grounds, and crosswalks; third, private property, including unimproved lots, improved lots, and apartment houses.

The bill has been drawn with great care, and I think it meets every objection that was considered by the Court of Appeals of the District of Columbia when the other cases were passed upon.

I will say to the Senator from Oregon that the necessity for this bill lies in the fact that unless snow is promptly removed it can not be removed at all. There are 550 miles of paved sidewalks in this city, and the street department say it would require an army of 12,000 men to remove any snowfall from the streets or from the sidewalks of this city within four hours after the storm ceased. It is a manifest impossibility for the city government to bring together an army of that kind to remove the snow within that time. On the other hand, if the duty is laid upon each householder or each custodian of property to remove the snow from the sidewalk abutting such property, we shall have clean streets, and shall not suffer what we suffered during the last storm in Washington.

Mr. LANE. It may be that this plan will work. I do not say that it will not, but I question it very much. All kinds of laws and ordinances on the subject have been introduced in cities of the United States, and the only plan that has ever worked out satisfactorily to the people, so far as I know, and has secured the desired result at the least cost and expeditiously, has been for the city to do the work itself and tax the cost on the property, making it a general property tax. When it is left to the property owner, he frequently is away, and you can not find his agent, and you can not serve notice upon him.

Mr. DILLINGHAM. You do not have to do that under this bill.

Mr. LANE. No; you hunt him up, or his heirs and assigns, and bring a suit against them, and the city must go to law to make the collection for a dollar or a dollar and a half's worth of work.

It has been found, I think, that the only successful method is the same method that you pursue in cleaning the streets. You do not compel each property owner to go out with a brush and a broom and sweep the streets in front of his premises. The municipality undertakes it and accomplishes the result. I think the same thing should be done in the case of snow.

I am not criticizing the bill. If the bill is all right, I want to help in securing its passage. I think it is a mistake, however, not to organize it on a scientific plan, and the only plan I have ever heard of that has worked successfully—and I have been watching this matter for a good many years—and that is to put it in the hands of the municipality and let them do it.

Mr. LODGE. Mr. President, referring to the statement that this plan may not work successfully, I will say that I have known all my life the results obtained in the city of Boston, and this is the plan that is followed there. Every householder is made responsible for removing the snow, and he is fined if he does not.

Mr. ROOT. I will ask the Senator if they have snow there.

Mr. LODGE. We occasionally have a snowstorm in Boston, and it is taken care of in that way. It would be absolutely impossible for the city to remove the snow promptly by any force it could get together. This system, at all events, has worked well in Boston, which is a city of 758,000 people.

Mr. LANE. If there is any city in which this plan has worked well, I am willing to try it in this city. I have not known of it, however.

Mr. DILLINGHAM. I think perhaps the Senator from Oregon is laboring under a misapprehension, as this bill relates only to the sidewalks of the city and not to the streets.

Mr. LANE. That is exactly what I refer to—the sidewalks.

Mr. BURTON. Mr. President, there is one question I should like to ask before voting for the bill. I think the plan of the bill altogether preferable to that suggested by the Senator from Oregon. That is to say, the duty ought to be imposed in the first instance on the abutting property owner or the tenant. Perhaps the property owner or tenant desires to clean off the snow himself and does not desire that a tax shall be imposed upon him for work which he would prefer to do. So this bill imposes a duty upon him in the first instance. Another reason is that the force of any city—Washington or any other—might be inadequate to look after the whole of the work.

Did the committee consider, however, the question of the relative advantages of making the cost of the work a tax or special assessment upon the property? According to this bill there is a civil remedy, with a penalty provided in case the person upon whom the duty is imposed fails to remove the snow or ice. I know in my own city it is not left to a civil action; but a lien for the cost is imposed upon the property, certified by the auditor, and collected along with other taxes and assessments.

Mr. DILLINGHAM. Section 5 of the bill provides for a report being made to the corporation counsel, who, in section 6, is instructed to collect the penalty.

Mr. BURTON. There seems, however, to be no provision except for a personal judgment; and if the owner or tenant were insolvent or irresponsible, the amount could not be collected.

Mr. DILLINGHAM. That is as far as the bill goes.

Mr. LANE. That is exactly the key to the situation. There is the weakness of the measure.

Another thing which you will all recognize is that when you have a heavy snowstorm there are always plenty of unemployed men who are glad to get the job of going out to work on the streets; and the city would have no difficulty in hiring them, through the superintendent of street cleaning. You can always secure plenty of men to do the work. You need not worry about that at all.

Under this bill you must chase around and hunt up the owner or tenant, and it throws on the department a duty with which they are not able to cope.

It should be thoroughly well defined in the bill that this is a necessity, the cost of which can be levied upon the property as a tax. If that is done, I am perfectly willing to vote for the bill. Otherwise, I merely prophesy that it will fail.

Mr. NORRIS. Mr. President, I have not had an opportunity to read the bill, and I am familiar with it only from having heard it read by the Secretary. I should like to ask the Senator from Vermont one or two questions in regard to it.

As I heard the bill read, it provides that in case the snow becomes hard, so that it is impossible to remove it without injuring the sidewalk, the property owner will comply with the law if he sprinkles ashes, sand, or some other material over it. Then, in another place, it provides that in case the owner or other person whose duty it is to remove the snow or ice does not remove it within four hours it becomes the duty of the commissioners to remove it, and to commence an action against the proper person to recover the amount expended for such removal, together with $3 penalty.

It seems to me, if there is not some other provision placed in the bill, there might be a possibility of a conflict arising in this way: In case the snow becomes hard and can not be removed without injury to the sidewalk, if the property owner complies with the law by sprinkling ashes or sand over it he is not relieved under the bill as I heard it read from an action on the part of the commissioners, and it would be the duty of the commissioners to remove the snow or ice no matter whether ashes or sand had been put over it or not.

Mr. DILLINGHAM. This bill was drawn for the purpose of meeting all the different conditions which may arise. We will assume, for instance, that we have had a storm during the nighttime and it ceased with dawn. It is the duty, then, of every householder and every custodian of property, whether private or governmental or owned by the District, to remove the snow within the time limited from the sidewalks abutting the property which the person or official represents; or if he fails, then the city government shall do the work, and it is charged up under another provision of the bill. Take another case, where a storm comes in the daytime, when traffic is heavy and snow comes down upon the sidewalk in such a way that it can not at that time be removed, then the obligation is laid upon the householder or custodian of property to sprinkle upon the surface of the trampled snow and ice some substance which will prevent, as far as may be, passers-by from slipping upon it.

Then when the weather moderates and conditions become such that the snow and ice can be removed, as in the case of a thaw, the work is to be done, and on the failure of the proper person to do it the city government may step in.

The chief requirement for this act lies in the fact that in the morning after a storm during the night the ice or snow is trodden and it is almost an impossibility for the city government to organize a gang of men sufficient in numbers to do this work in all parts of the city.

Mr. NORRIS. I understand that. I do not believe the Senator gets my point.

Mr. DILLINGHAM. The object of the bill is to so concentrate the responsibility on the owners of the property and those who represent it as to bring about the removal of snow and ice from the sidewalks.

Mr. NORRIS. I think the Senator did not understand my suggestion.

Mr. DILLINGHAM. Yes; I think I understood it.

Mr. NORRIS. Suppose in front of the residence the sidewalk becomes covered with ice, under the conditions the Senator has narrated, and the householder is unable to remove that ice and snow without injury to the sidewalk; as I understand the bill, he has fully complied with the law when he sprinkles sand or ashes over it——

Mr. DILLINGHAM. That is the case.

Mr. NORRIS. Commencing four hours after the storm. Let us take that case. The householder has complied with that requirement. There is no place in the bill where it is made the duty of the commissioners in any case where within four hours after a storm the person whose duty it is to remove the snow does not remove it to go on and remove it at his expense and let him assume it. If he has complied with the law by sprinkling ashes or sand on the ice, then it seems to me it is still the duty of the commissioners, under the law, to remove that ice.

Mr. DILLINGHAM. No; the Senator is mixing the two classes of cases.

Mr. NORRIS. Is provision made for that in the bill?

Mr. DILLINGHAM. There is provision for removing the snow after it becomes trodden. When he has sprinkled a substance upon it there is no duty upon him nor upon the commissioners to further act.

Mr. NORRIS. Then I misunderstood the reading of the bill.

Mr. DILLINGHAM. If the Senator will look at the latter part of section 2, it says that "as soon thereafter as the weather shall permit, thoroughly clean, or cause to be thoroughly cleaned."

Mr. NORRIS. I should like to have the Senator read that provision which makes it the duty of the commissioners to remove snow and ice when the period of four hours has expired.

Mr. DILLINGHAM. That is section 5, which provides:

That in the event of the failure of any person, partnership, corporation, joint-stock company, or syndicate to remove or cause to be removed such snow or ice from the said sidewalk, or to make the same reasonably safe for travel, or cause the same to be made reasonably safe for travel, as hereinbefore provided, it shall be the duty of the Commissioners of the District of Columbia, as soon as practicable after the expiration of the time herein provided for the removal thereof, or for the making of the said sidewalks reasonably safe for travel, to cause the snow and ice in front of such building or lot of land to be removed or to cause the same to be made reasonably safe, as hereinbefore directed to be done by such person, partnership, corporation, joint-stock company—

And so forth.

Mr. NORRIS. I did not understand that provision fully when the bill was read. I think that is a full explanation and meets the objection I have made.

I want to ask the Senator another question. Suppose some nonresident owns a vacant lot; are there any means provided for a recovery from him for the expenses involved?

Mr. DILLINGHAM. To meet such a case is one object of the bill. There are a great many such cases. I presume the Senator has noticed the vacant lot on Dupont Circle, where there is an old cellar, where the snow never is removed. The owner of that lot must provide somebody to look after it; otherwise the city government will look after it and charge the cost against him, and of course against the property.

Mr. NORRIS. But suppose the owner has no one to look after it. I judge, from the particular case the Senator refers to, it is absolutely true that there is not anybody to look after it.

Mr. LODGE. He must employ some one.

Mr. NORRIS. Suppose the owner does not employ some one; would the commissioners proceed and remove the snow and ice and have the owner of the property liable to pay for it?

Mr. DILLINGHAM. Under section 6 they are directed to do this work. The corporation counsel is directed to proceed against the person who is charged with that duty.

Mr. WEST. How would you get service in a case of that sort? He has no one here to represent him.

Mr. DILLINGHAM. I suppose he could make an attachment of the property.

Mr. LANE. That is the point I wanted to call attention to.

Mr. NORRIS. Does the bill provide for an attachment and sale?

Mr. DILLINGHAM. I think the code makes full provision for it.

Mr. LANE. It will cost 40 cents—not to exceed half a dollar—to take off the snow and ten times that amount to get judgment. That is exactly the point I wished to make. If you are to get service on him, it takes the time of an officer for hours, it may be for days, and then the corporation counsel has to begin proceedings in court. I think that is the weakness of this measure. It has been discovered, at least in some cities, that the best way is to allow the city to clean off the snow, as they do mud, as they sprinkle the streets, and then levy a tax for it. The trouble we have had is in searching and hunting for the absentee owners of vacant property. That is the point which causes trouble and damage in that respect, as well as many others.

Mr. McCUMBER. Mr. President, I wish to ask the Senator if instead of a judgment it would not be more appropriate, as is done in many places, to assess the cost against the property itself and collect it the same as any other tax?

Mr. DILLINGHAM. I have no objection to that.

Mr. McCUMBER. That would be much easier and less expensive.

Mr. DILLINGHAM. The bill was drafted with reference to the code now in operation in the District.

Mr. McCUMBER. I think there is a great deal in what the Senator from Oregon [Mr. LANE] has said about the most expensive way of removal proposed. In some instances you could not collect a judgment at all. In most cities I know anything about the cost is assessed against the property itself, a return is made, and when the taxes are collected that is collected with the other taxes. It is a very simple method, and I do not see any reason why it should not be adopted here.

Mr. WEST. I will ask the author of the bill, the Senator from Vermont, if it is possible here to assess a tax so as to penalize the man who owns the property and compel him to clean the snow and ice away from his door?

Mr. DILLINGHAM. I do not know that I understand the question which has been propounded, or if I did that I should be able to answer the legal proposition.

Mr. WEST. Suppose you assess this as a tax in the event the person or corporation owning property fails to remove the snow, and let it go as a tax instead of bringing a suit in

order to recover the amount. Could not that be done under the law here?

Mr. DILLINGHAM. I do not know whether it could be done or not. It was considered that this was the simplest way to reach the matter, because the property is here and, under the code, the suit would be instituted and a lien created.

Mr. LANE. I propose to amend the bill, if I may be allowed to do so, by providing that after a certain number of hours have expired the owner may assume that to be due notice, and the municipality—the District government—shall assess the cost against the householder the same as any other tax and make it a lien on his property the same as in the case of any other tax. Will the Senator allow that amendment to be made?

The VICE PRESIDENT. The Chair will be compelled to say to the Senator from Oregon that the Chair can not state the amendment, and he does not think the Secretary will be able to do it.

Mr. LANE. Such a provision has worked all right in many cities. If I could secure one of those laws I could soon frame the amendment. If the Senator would be willing to give me time to do it, I would be glad to undertake it. [After a pause.] The Senator says the bill will go into conference, and it can be fixed up there; and I will withdraw the objection.

The VICE PRESIDENT. If there be no amendment as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 4161) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict, pauper, or detained labor, or made in whole or in part from materials which have been made in whole or in part or in any manner manipulated by convict or prison labor, was announced as next in order.

Mr. SMITH of Georgia. Let that bill go over.

The VICE PRESIDENT. It will go over.

The bill (S. 387) relating to bills of lading was announced as next in order.

Mr. SUTHERLAND. Let that bill go over. It will lead to a good deal of debate, I think.

The VICE PRESIDENT. The bill will go over.

PAY CLERKS IN THE NAVY.

The bill (S. 3590) to make the appointment of pay clerks in the United States Navy permanent, and to create the grade of chief pay clerk, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with an amendment.

Mr. LODGE. I am instructed by the committee to withdraw the amendment which is printed in the bill, and to offer the amendment which I send to the desk as a substitute for it.

The VICE PRESIDENT. The amendment printed in text will be withdrawn, and the amendment of the committee submitted by the Senator from Massachusetts will be read.

The SECRETARY. At the end of section 4, after line 21, page 4, insert the following:

SEC. 5. That all officers of the Navy or Marine Corps shall be credited with the actual time they may have served as officers, enlisted men, paymasters' clerks, or clerks of commandants in the Regular or Volunteer Army or Navy or Marine Corps, or both, and shall receive all the benefits of such actual service in all respects in the same manner as if said service had been continuous and in the Regular Navy or Marine Corps: *Provided*, That nothing in this clause shall be so construed as to authorize any change in the dates of commission or in the relative rank of such officers: *Provided further*, That nothing herein contained shall be so construed as to give any additional pay to any such officer during the time of his service in the Volunteer Army or Navy, or Marine Corps.

SEC. 6. That sections 1386, 1387, and 1388 of the Revised Statutes, and all acts and parts of acts, so far as they are in conflict with the provisions of this act, be, and the same are hereby, repealed.

So as to make the bill read:

Be it enacted, etc., That the title of paymaster's clerk in the United States Navy is hereby changed to pay clerk, and hereafter all pay clerks shall be warranted from acting pay clerks who shall be appointed from enlisted men in the Navy holding acting or permanent appointments as chief petty officers who have served at least three years as enlisted men, at least two years of which service must have been on board a cruising vessel of the Navy. All appointments as acting pay clerk shall be made by the Secretary of the Navy, and all such appointees, in addition to the qualifications above set forth, must be citizens of the United States. All acting appointments herein provided for shall be made permanent under regulations established by the Secretary of the Navy: *Provided*, That paymasters' clerks now in the Navy whose total service as such is less than one year and who are citizens of the United States may, upon the passage of this act, be given appointments as acting pay clerks without previous service as enlisted men: *Provided further*, That paymasters' clerks now in the service and former paymasters' clerks whose appointments have been revoked within six months next preceding the passage of this act, who have had not less than one year's actual service as such, and who are citizens of the United States, may, upon the passage of this act, be warranted as pay clerks without previous service as enlisted men or as acting pay clerks: *And provided further*, That pay clerks and acting pay clerks shall have the same pay, allowances, and other benefits as are now or may hereafter be allowed other warrant officers and acting warrant officers, respectively.

SEC. 2. That all pay clerks shall, after six years' service as such, be commissioned chief pay clerks and shall on promotion have the rank, pay, and allowances of chief boatswain: *Provided*, That in computing the six years' service herein provided for credit shall be given for all service in the Navy as pay clerk, acting pay clerk, and paymaster's clerk: *Provided further*, That paymasters' clerks now in the Navy and former paymasters' clerks whose appointments have been revoked within six months next preceding the passage of this act, who have had not less than six years' actual service as such, and who are citizens of the United States, may, upon the passage of this act, be commissioned as chief pay clerks without previous service as enlisted men, acting pay clerks, or pay clerks.

SEC. 3. That the total number of chief pay clerks, pay clerks, and acting pay clerks allowed by this act shall not exceed one for each 250 enlisted men in the United States Navy now or hereafter allowed by law, and such chief pay clerks, pay clerks, and acting pay clerks shall be assigned to duty with pay officers under such rules as the Secretary of the Navy may prescribe: *Provided*, That no person shall be appointed a chief pay clerk, pay clerk, or acting pay clerk under any provisions contained in this act until his physical, mental, moral, and professional qualifications have been satisfactorily established by examination before a board of examining officers appointed by the Secretary of the Navy, from officers of the pay corps when practicable and according to such regulations as he may prescribe: *Provided further*, That no person shall be appointed a chief pay clerk, pay clerk, or acting pay clerk unless his accumulated previous service in the Army, Navy, and Marine Corps, together with his possible future service prior to attaining the age of 62 years, will amount to at least 30 years, except that this proviso shall not apply to such persons as were serving in the Navy as paymasters' clerks during the period from September 1, 1913, to October 31, 1913.

SEC. 4. That the limitation as to age contained in section 1379 of the Revised Statutes of the United States, relating to appointment of assistant paymasters in the United States Navy, shall not apply to chief pay clerks and pay clerks appointed under the provisions of this act, who must be between the ages of 21 and 35 years at the time of appointment as assistant paymasters in the United States Navy: *Provided*, That this shall not be construed as giving any preference in said appointment of assistant paymasters to said chief pay clerks and pay clerks except as to the limitation of age.

SEC. 5. That all officers of the Navy or Marine Corps shall be credited with the actual time they may have served as officers, enlisted men, paymasters' clerks, or clerks of commandants in the Regular or Volunteer Army or Navy or Marine Corps, etc.

Mr. SMOOT. May I ask the Senator from Massachusetts to explain in as few words as possible the purpose of the bill and what the effect of it will be if passed?

Mr. LODGE. The purpose of the bill is to put paymasters' clerks on a permanent footing and bring them within the ordinary rules which govern clerks. I think it will be a great improvement in the character of the service, because these clerks are often charged with large amounts of money. This is a department bill. It is desired to make secure the administration of funds, to give a permanent tenure; not to have them shifted with each paymaster, and to give them regular promotion through the grade of paymaster clerks instead of having them taken by the paymaster as he needs them and then perhaps dropped out of the service afterwards. It is to make them a permanent force, more responsible and more trustworthy.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. OVERMAN. I will ask the Senator whether the bill gives any increase of pay?

Mr. LODGE. I do not think there is any material increase or expense, except it gives them permanent service and the right of retirement. They may now have it or they may not.

Mr. OVERMAN. If they are retired, will it be on the usual pay that a regular officer of the same grade in the Navy receives?

Mr. LODGE. This relates only to clerks. Of course, it enables the clerks to go up through that grade into the regular grade of paymaster.

Mr. OVERMAN. Does it allow them to retire on three-quarters pay?

Mr. LODGE. Of course, if they are paymasters they have what the law gives paymasters. It does not add to that at all. It gives the opportunity to the paymaster's clerk to be promoted through the regular grades into the regular corps and to become a paymaster.

Mr. OVERMAN. And then at a certain age to go on the retired list?

Mr. LODGE. All paymasters go on the retired list now.

The bill was reported to the Senate as amended and the amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

POSTAL SAVINGS DEPOSITORIES.

The bill (H. R. 9318) to amend the act approved June 25, 1910, entitled "An act to establish postal savings depositories for depositing savings at interest with the security of the Government for repayment thereof, and for other purposes," was announced as next in order.

Mr. VARDAMAN. Mr. President, I am very anxious to have that bill acted upon; but I understand that the senior Senator from Kansas [Mr. BRISTOW] desires to be heard upon it. For that reason I ask that the bill go over.

The VICE PRESIDENT. The bill goes over.

POSTAL SAVINGS BANK FUNDS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7967) to amend the act approved June 25, 1910, authorizing a postal savings system.

The VICE PRESIDENT. The bill has been heretofore read and amended.

Mr. BURTON. Is not that bill open to the same objection as the other, which is that it raises the limit of the amount that may be deposited?

Mr. SMOOT. This is the bill to which the Senator refers.

The VICE PRESIDENT. There is an amendment pending to the amendment reported by the committee, which was submitted by the Senator from New Hampshire [Mr. GALLINGER].

Mr. SMOOT. Mr. President, the Senator from New Hampshire is absent from the city and the senior Senator from Kansas is absent from the Chamber. If the Senator from Florida desires to proceed with the consideration of the bill now, I shall simply ask for a quorum, so that I may at least secure the presence of the Senator from Kansas in the Chamber.

Mr. BRYAN. It is my purpose to ask the Senate to proceed with the consideration of the bill.

Mr. SMOOT. Then, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	Perkins	Smith, S. C.
Bankhead	Johnson	Pittman	Smoot
Brady	Kenyon	Poindexter	Sterling
Bryan	Kern	Ransdell	Stone
Burton	Lane	Robinson	Sutherland
Catron	Lee, Md.	Saulsbury	Thomas
Chamberlain	Lewis	Shafroth	Tillman
Chilton	Lodge	Sheppard	Vardaman
Clark, Wyo.	Martin, Va.	Sherman	Weeks
Dillingham	Martine, N. J.	Shields	West
Hitchcock	Norris	Smith, Ariz.	Works
Hollis	Overman	Smith, Ga.	
Hughes	Page	Smith, Md.	

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present. The question is on the amendment proposed by the Senator from New Hampshire [Mr. GALLINGER] to the amendment reported by the Committee on Post Offices and Post Roads.

Mr. SMOOT. Let the amendment be stated.

The SECRETARY. On page 1, line 9, in the committee amendment, the Senator from New Hampshire proposes to strike out "$2,000" and insert "$1,000."

Mr. WEEKS. Mr. President, when this bill was under consideration some days ago I was pointing out the fact that the purpose of the bill was entirely contrary to the original purposes of the postal savings bank legislation. It was intended originally that the postal savings system should provide a suitable depositary for those citizens of foreign birth who had been accustomed to deal with government banks in their own countries, and who, being used to that method, had sent to their former homes their savings for deposit. It was supposed that it would bring into active use more or less money which the owners were afraid to deposit in any bank, and that it would enable them to obtain some reasonable return on that money, as well as to make it of direct benefit to the community where it was deposited. The morning hour having expired, I did not have quite time enough in which to finish the remarks which I was making, and I wish now to add something to the comments which I then made.

The purpose of this bill is to try to make the postal savings banks profitable, or, rather, pay expenses. We provided in the original act that we should pay depositors 2 per cent, and that the Government should deposit that money in the local banks at a rate of interest high enough that the difference between the rate paid the depositor and the rate received from the banks would pay the expenses of the system. That policy has been followed. We have been charging 2½ per cent on the deposits in the local banks, but that has not been sufficient by at least 2 per cent to pay the expenses of running the postal savings banks. I have before me the actual returns of the postal savings banks during the last 30 months and the cost of running them, and it would have been necessary to have deposited the money in the local banks at 4½ per cent in order to have returns enough to pay the Government's expense for managing the business.

It costs eight times as much to run our postal savings banks, or it has done so up to this time, as it does to run the mutual savings banks in the States where mutual savings banks are in operation. Certainly that is true of the Massachusetts banks. I want particularly to call that fact to the attention of those Senators who have it in their minds that the Government can conduct business operations on a more economical basis than can corporations or individuals. The mutual savings banks of Massachusetts are conducted along exactly the same lines as is our Postal System.

Mr. HITCHCOCK. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. I should like to inquire whether statistics at the disposal of the Senator from Massachusetts indicate to what extent the postal savings banks are used in Massachusetts and other States where mutual savings banks are in existence? I ask this question because it was frankly stated and well understood at the time that the postal savings bank bill was passed that it was intended particularly to serve that great part of the country which has no mutual savings banks, and it might be that the operations of the postal savings banks are entirely satisfactory in those portions of the United States which are not served by mutual savings banks.

Mr. WEEKS. Mr. President, I have not before me the actual deposits in any State, but I can say to the Senator from Nebraska that there have been very considerable postal savings deposits in those States where mutual savings banks are in operation. I think I am justified in saying that in the city of Boston, for instance, where there are at least a dozen mutual savings banks, one of them with about $70,000,000 of deposits, the number of depositors in the postal savings bank compares favorably with the number of such depositors in communities where there are no mutual savings banks.

Now, we propose in this bill to increase the amount of deposits allowed in the postal savings banks to $2,000, $1,000 of which shall bear interest and the other thousand dollars shall not bear interest, so that the Government can make out of the second thousand dollars, presuming that it is deposited by some one, an amount sufficient to make up the loss now incurred in managing the system. The real way to make this system profitable, if the department wishes to do so, is to reduce the expense of managing it rather than to adopt a method of paying expenses which has never been undertaken anywhere else in the world.

It is inadvisable for other reasons to attempt any such method of conducting this system. For instance, in a rural community where there are no banks a man having a surplus amount of money on hand might drop into the post office and leave his money with the postmaster for safe-keeping. He would not care whether he received interest on that money or not, but the Government would be responsible for it; and he might draw it out again in two or three days should he wish to use it. In first and second class post offices safes are provided where we lease the offices, but safes are not provided in third and fourth class offices; so that there are very nearly 50,000 offices in the United States where in all probability no safes are provided; and you are opening the door for any citizen to deposit his money in a local post office, large or small, as it may be, for safe-keeping, he not caring anything about the interest. So you put the responsibility on the Government of keeping his money for him until he requires it. Almost inevitably that is going to mean large losses in small post offices where there are no facilities for the care of money.

If that is not going to be the method followed, then we are doing an injustice to our own citizens, because wherever there are mutual savings banks or stock savings banks depositors can obtain a return on their deposits amounting to substantially 4 per cent. In Massachusetts they receive 3.9 per cent on an average, and yet you are expecting them to deposit their money in postal banks, a thousand dollars of it at 2 per cent and no interest at all on the balance, which is an absolute injustice to the citizen and an encouragement to deposit in postal savings banks, which should not be held out to him under any circumstances.

By doing this we are taking a course directly contrary to that which has been followed in European countries. They do not allow any such large deposits in any of their postal savings banks. The average deposit in postal savings banks in European countries is less than the average deposit in the postal savings banks of the United States to-day. We have something like $102 per depositor in our postal savings banks. In Austria, according to the last returns I have before me, the average deposit in the postal savings bank or the savings department was $20.48; in Belgium it was $67.04; in Denmark it was $19.37; in France it was $55.08; in Hungary it was $28.73, and in Japan

it was $17.90. In fact, as I go through the list I only see one country where the average deposit in the postal savings banks per depositor is more than $100, and that is in the postal savings banks of our neighbors across the northern border.

We have 331,000 depositors in our postal savings banks, with an average of $102 per depositor; and it has cost us, with an average deposit of about $20,000,000 during the first 30 months of the operation of the system, $1,400,000 to operate the banks, and the net return to the system from the interest received from other banks has been but $538,000.

Mr. HITCHCOCK. Will the Senator state what amount has been paid in interest to depositors?

Mr. WEEKS. Those figures are found on page 80 of the hearings on the Post Office bill of this year in the testimony given by Mr. Charles H. Fullaway, who is the assistant director of postal savings banks. I do not at this moment see the amount of interest actually paid, but it is in that testimony.

Mr. HITCHCOCK. I am curious to know the proportion between the amount of interest paid to depositors and the cost of operating the postal savings department itself.

Mr. WEEKS. The cost of operating the system for 30 months has been $676,000 direct expense; extra expense to the department and service, $686,000; transportation of mail, $114,000; making a total expense of $1,486,000, while the net interest and profits have been $538,000.

Senators should remember when it is said that the expenses of managing this system are exorbitant that all the department does is to receive the deposit and turn it over to the bank in the locality where the deposit is made. In the mutual savings banks not only is the money received from depositors but it must be invested, and invested at a very considerable expense in time and detail. For instance, the Massachusetts savings banks hold 97,935 real estate loans. Of course those loans have to be looked up, the title to the property has to be examined, and all the details with which we are familiar in examining a real estate loan have to be undertaken by the bank, yet the expense of managing those banks is only about one-eighth of the expense of managing the postal savings-banks system. The number of depositors in the Massachusetts savings banks is 2,100,000, and during one year 284,000 deposits were opened and 224,000 were closed; in other words, substantially as much business as was done by the postal savings banks in 30 months was done by Massachusetts mutual savings banks in that one year in opening and closing accounts.

The total expense of managing the Massachusetts system is only 5.73 per cent of the income of the investments, and that includes the taxes which the Massachusetts banks pay to the State as well as all other expenses, while the management of the postal savings banks has cost nearly three times as much as the total income.

I submit to Senators that the only proper policy for us to follow in order to make these banks useful, as they are, and also profitable, as they should be, is to reduce the cost of operation and not undertake to put the Government into the banking business, as will inevitably be done if we allow deposits of $2,000 to be made by one individual. It is going to involve us not only in expense but in loss and in all the evils that come from governmental management. Even if this bill were passed and every deposit in the postal savings banks contained $1,000, drawing interest at 2 per cent, and $1,000 on which no interest were paid, I doubt very much if that would pay the expenses of managing the postal savings-bank system under the methods which are being followed to-day.

In my judgment the Postmaster General, instead of proposing this legislation, instead of urging Congress to adopt an unscientific bill like this, a bill which proposes to do something which I believe never has been done in banking operations before, should appoint a suitable and competent commission to investigate the methods which are being followed by the department in conducting its business and try to get it down to a business basis.

I protest against the enactment of a bill which is going to change fundamentally the whole purposes of the postal savings-bank system, which proposes to conduct it on a basis which has not been followed in any country in the world, which is unscientific in every particular, and which is going in some degree to upset banking operations in the localities where the postal savings banks are in operation.

I feel perfectly sure that if this is undertaken you will see men from time to time dropping into the country post office and depositing their money where the postmaster has no facilities for caring for it, having no safe or any other means of protecting deposits, simply for safe-keeping; not for the purpose of saving the money, not for the purpose of getting interest on it, but simply for the purpose of leaving it there for safe-keeping until it is wanted.

All of these reasons, or any one of them, I think is sufficient for our failure to give our approval to this legislation.

Mr. NORRIS. Mr. President, I should like to ask the Senator from Massachusetts a question before he takes his seat. As I understand, the immediate proposition before the Senate is an amendment offered by the Senator from New Hampshire [Mr. GALLINGER] to strike out "$2,000" and insert "$1,000."

Mr. WEEKS. That is the proposition. I was speaking against the bill. Of course, the amendment offered by the Senator from New Hampshire would make the bill better than it is now, because now we propose to permit deposits of $2,000, and the amendment would reduce it one-half.

Mr. NORRIS. That is the point upon which I wanted the Senator's judgment, relating particularly to this amendment. The amendment of the committee provides that the balance to the credit of any person, exclusive of interest, shall not exceed $2,000. That is the $2,000 which, as I understand, the Senator from New Hampshire by his amendment would strike out and insert $1,000.

Mr. WEEKS. Yes.

Mr. NORRIS. Further on the bill provides that no interest shall be paid on any part of such balance in excess of $1,000. I wish to ask the Senator whether, in his judgment, if we permitted deposits to the extent of $2,000 and paid interest only on $1,000, it would not have a tendency, if it did anything, to get on deposit a class of funds that would not be deposited anywhere if their owners were not allowed under the law to deposit them with the United States?

Mr. WEEKS. Mr. President, in my judgment, this bill would fail to accomplish the purpose which is desired. I do not believe that any considerable number of citizens of the United States are going deliberately to put their money into postal savings banks when $1,000 of it will receive only 2 per cent interest and the other thousand dollars will receive no interest. It is on those terms that the proposers of this legislation hope to get in the people's money to pay the expenses of operating the system.

I should like to ask the Senator from Nebraska if he knows any man, where there are banks or otherwise, who would be foolish enough to deposit $2,000 in a postal savings bank at an average of 1 per cent when he can put it in almost any bank, certainly any savings bank, and get 3 or 4 per cent on the entire $2,000, instead of only 2 per cent on one half of it and no interest on the other half, or an average of 1 per cent on the total deposit?

Mr. NORRIS. The Senator does not get the drift of my question. It pertains particularly to this amendment. I am conceding, for the sake of the argument, that the Senator's position is right; but it seems to me, regardless of what we may think as to the wisdom of passing this bill, that we ought at least to vote down the amendment of the Senator from New Hampshire, for the reason that if there is anything in the idea of the committee—and I confess I do not know whether there is or not—we ought to give an opportunity at least to carry it out by permitting people to deposit money upon which they will get no interest.

There certainly would be no harm, it seems to me, if we permit deposits up to a thousand dollars, in saying, "You can deposit more than a thousand dollars, $1,000 more, but we will not pay you any interest on it." If, as the Senator says, the object of the committee is to make enough money out of the law to pay the expense of its operation, there certainly ought to be no objection to that proposition.

Mr. WEEKS. I object even to that proposition, because it is going to put the Government into the banking business. It is going to say to every one of the 60,000 postmasters in the United States, "If any citizen comes into your office and offers you $2,000, you must take it on deposit," although there is not even a safe in more than 45,000 of the post offices of the United States. In other words, any citizen who happened to have that amount of money on hand, and who did not himself care to take the risk of carrying it over Sunday or over any temporary time, would give it to the postmaster, and the Government would be responsible for it.

Mr. NORRIS. I see the force of the Senator's objection, and I am not questioning the validity of it. I think there is a great deal in it. With all due respect to the Senator, however, it does not seem to me that that meets the proposition.

We could easily meet the objection the Senator sets out by limiting as we saw fit the amount that might be deposited in any month or week. If we do not like the limit that is in the law now, we can raise it. That has nothing to do with the proposition that seems to have been in the mind of the commit-

tee. It seems to me, whether we agree with them or not, we must give them credit for undertaking to get on deposit here some money that under existing circumstances will not be deposited anywhere. If that could be accomplished, I think we will all have to agree it would be a good thing. Whether it will be accomplished or not, of course, is a different proposition; but if we agree to the amendment of the Senator from New Hampshire [Mr. GALLINGER], we blot out any opportunity to attempt it.

Mr. WEEKS. Mr. President, the whole purpose of the postal savings bank law was to encourage people to save their money, and give them as much interest on their deposits as the Government could afford to pay. We decided that 2 per cent was the amount of interest that we should pay, and that we should charge the banks enough additional on the deposits we made in the banks that the difference in the two would pay the expenses. Are we going to encourage our citizens to deposit their money in banks at 1 per cent interest, which would be the average amount paid on the $2,000 which we are asking them to deposit, when they can go into any bank anywhere and get two or three times as much, and four times as much in any State where there is a mutual savings bank? It is bad policy from the standpoint of the Government, and it is unfair to the citizens of the country, to hold out to them such inducements.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. WEEKS. I yield.

Mr. SMOOT. I wish to say to the Senator from Nebraska that I believe there is one class of men that perhaps would use the right to deposit up to $2,000, notwithstanding the fact that they would not receive interest upon an amount exceeding $1,000. I have received a number of letters stating that there were people who used the postal savings banks, depositing their money in the post offices of the country, with the purpose of preventing the money from being garnisheed; that being deposited there it was impossible to reach it, and they felt perfectly safe about keeping it from their creditors.

It seems to me the only reason why that class of people would want to have the amount increased would be that they could cover up that much more of their money from being garnisheed in order that they may avoid paying their just debts.

I simply wanted to call the Senator's attention to the fact that there is that class of citizens who could use the post offices and postal savings banks for that purpose if we pass this bill.

Mr. SHERMAN. Mr. President, I wanted to ask the Senator from Massachusetts if he had considered the very point raised by the Senator from Utah. Exemption laws are created by the statutes of all the different States. The exemptions are of varying amounts for real and personal property—the real property in the form of homesteads, the personal property in the way of personal effects, household furniture, cash, or sometimes anything the debtor desires to choose. It is a general principle, applicable in both State and National Government, that no department of the Government, no one holding Government funds, from the village treasurer to the United States Treasurer, is subject to attachment, garnishment, creditor's bill, bill of discovery, or any legal process by which the property of the debtor, judgment or otherwise, may be reached.

It is proposed in this bill to raise the limit of deposits to $2,000. It is obvious that by the bill the exemption laws of the various States are enlarged by the amount of $2,000, and that a judgment debtor may deliberately avoid the process of his creditor for collection, not to encourage legitimate saving, but to deprive the creditor of his proper remedy, under present conditions.

I desire to know whether the Senator has considered that as a just criticism of the proposed amendment.

Mr. WEEKS. Mr. President, I should have referred to that in the brief statement which I made. The Senator from Utah is entirely right about it, and the supposition made by the Senator from Illinois is correct. It would remove from attachment $2,000 when under the present law $500 is the limit of deposit that can be put in a postal savings bank. In other words, you are protecting to the extent of $2,000 the dishonest man who wishes to avoid paying his debts, that being the amount he may put in the postal savings banks under these proposed conditions.

Mr. SHERMAN. Mr. President, I wish to say, further, that like the Senator from Utah [Mr. SMOOT] I have had many letters and complaints on this subject from a great variety of people, not collection agencies or lawyers engaged in the collection business, but from all varieties of trade; not only the jobbers, but the retail trade in mercantile lines.

A limit of $2,000 would include assets that might be covered into a postal savings bank so as seriously to impair a merchant's ability to pay his account. For instance, I know of no reason why, under this amendment, a local merchant might not sell a two or three thousand dollar stock of goods, deposit the money in a postal savings bank, and thereby permanently deprive his lawful creditors of any remedy whatever.

In some States the exemption by way of homestead is a given quantity of land—80 or 160 acres of land. In other States it is a limitation on value to $1,000. In some States the personal exemptions are very liberal; much more so in the Western States than in the Middle West and Eastern States, on this side of the Allegheny Mountains. In many instances the personal exemptions run from four hundred to a thousand dollars, with 160 acres of exempt homestead without any regard to the value, which puts the legitimate exemptions under the exemption laws of the State at a very considerable sum.

A merchant may have those exemptions. Any debtor may have those exemptions. He may turn around and sell his stock of merchandise for $2,000 cash under this amendment, deposit the $2,000 in the local postal savings bank, and he can absolutely defy his creditors, and have five or six thousand dollars' worth of property in my State, where the exemptions are not so liberal as they are in some of the Western States.

To be specific, we have a thousand dollars' homestead exemption under the laws of the State from which I come. We have what is practically $400 exemption in the way of personal property. It is nominally $400 worth of personal property. It is practically a thousand dollars' worth, because no jury or board of appraisers that goes on the request of the holder of an execution, or the officer holding a writ, to make an appraisement, ever appraises the property at its real value. It is appraised like the assessor assesses it, at about half of its real value in fact.

Mr. NORRIS. Mr. President, I should like to ask the Senator if the merchant would not be able to defeat his creditors, even if we did not have a law that gave him the right to deposit his funds with the postmaster, by simply putting the money in his pocket instead of depositing it anywhere?

Mr. SHERMAN. Yes; he may do so; but you have a fighting chance to get it under the laws of some States.

Mr. NORRIS. If there is any provision of law that will make him disclose his property, he could be just as well required to disclose the fact that he had deposited the money with the postmaster as though he had put it in his pocket.

Mr. SHERMAN. No, sir. If, for instance, he should take the limit of deposit in this bill, $2,000, and put it in his pocket, under the laws of many States—at least three States with which I am familiar—he could be reached almost instantly by process. For instance, if a merchant should sell a stock of goods and have $2,000 of cash in his pocket, he could be reached on creditor's process by way of creditor's bill, bill of discovery, or by summary process under the attachment act in many States.

Mr. NORRIS. When you found out that it was in his pocket, could you recover it?

Mr. SHERMAN. Yes, sir. I have seen cases under the jurisdictions I mentioned, one in particular, where the sheriff took the money out of his pocket—searched his clothes and removed it—and put it in the custody of the court until the suit was determined.

Mr. NORRIS. I have an idea that the sheriff was violating the law when he did that.

The point I want to get at is this: As I understand—I may be mistaken; I am speaking only from memory—the fact that a given amount is deposited in a postal savings bank gives the man who deposits it no additional exemption under the law, does it?

Mr. SHERMAN. Yes; it does, because the Post Office Department, unless the bill should be amended so as expressly to permit it, could not be reached by any known process of the State or Federal courts.

Mr. NORRIS. I understand that; but what I mean is this: If a man has $2,000 deposited with a postmaster, and that $2,000, together with other property he has, exceeds in value what the exemption law permits him to hold, why can not the creditor take the other property?

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. MCCUMBER. Mr. President, the Senator having in charge the bill which has been under discussion thinks that we can

dispose of it within an hour, and he has requested me to consent to lay the unfinished business temporarily aside for that purpose. I am somewhat doubtful whether that can be done; but I wish to say that there is at least one Senator who is ready now to go on and speak upon the unfinished business, and I would not wish to put it off unless it was agreeable to that Senator to yield at this moment. If it is entirely agreeable to the junior Senator from Massachusetts [Mr. WEEKS] that the unfinished business may be temporarily laid aside, with the hope that we may dispose of the postal savings bank bill in about an hour, it will be agreeable to me.

Mr. WEEKS. I make no objection to proceeding in that way if the Senator from Florida has any assurance that we can get action on the bill now.

Mr. BRYAN. It is difficult, of course, to say when any bill will be completed in the Senate, but debate has taken place on this bill several days, and I thought the debate was about over. I appreciate the offer of the Senator from North Dakota. We might do the best we could within the hour, and I believe we could dispose of the bill.

Mr. HITCHCOCK. Mr. President, I shall object to that if the purpose is to pass the bill after the short consideration suggested. I think it is a measure of considerable importance and it has not had proper consideration up to this time. I believe it would be a mistake to undertake to put it through within the hour.

Mr. BRYAN. Does the Senator from Nebraska know that the bill has been discussed on two days prior to this time?

Mr. HITCHCOCK. I realize that it has been discussed in a fragmentary way, but I think a bill of such vast importance should not be passed with such slight consideration as can be given in the time indicated. The objections which have just been raised here as to the possible exemption of $2,000 against creditors and the other possibility that it might be used for the purpose of escaping taxation, and the fact that it violates all the precedents in postal savings banks, other countries having limited the deposits to small amounts, lead me to have very serious question as to the advisability of the bill, and certainly I am opposed to rushing it through within the proposed hour.

Mr. BRYAN. I will say to the Senator that there are four or five countries in which there is no limit to the deposits, so far as that is concerned. The Senate will do as it pleases with the bill. It has been on the calendar for a long time. The Post Office Department are anxious to have it considered and acted upon, because their plans depend somewhat upon what the Senate does. I can see, I think, clearly from the debate which has taken place this morning that the Senate will soon be prepared to vote upon it. The provisions are not difficult to understand. It seems to me that we can dispose of it within an hour.

The bill which the Senator from North Dakota [Mr. MCCUMBER] has in charge has been the unfinished business for nearly two months, and if it were not in the way I could move to proceed to the consideration of this bill. It is not supposed that the bill of the Senator from North Dakota will be voted upon to-day. Therefore it seems to me it would be perfectly legitimate and would not interfere with any other business to proceed with the consideration of this bill.

With the consent of the Senator from North Dakota, inasmuch as the Senator from Nebraska indicates that he will object, I will move that the Senate proceed to the consideration of the bill, and I assure the Senator that whenever he asks me to lay it aside I will do so.

Mr. McCUMBER. I will make this countersuggestion. I understand the junior Senator from Massachusetts will not speak very long upon the unfinished business to-day. I assume that the senior Senator from Massachusetts will follow him, and he stated that he would not talk more than half an hour.

Then if the Senator from Missouri [Mr. REED] is not ready to go on to-day—and I have been informed that he prefers to wait until to-morrow—I will then consent to lay it aside by unanimous consent and let the Senator from Florida take up the balance of the afternoon with the postal savings bank bill. I think that course would be agreeable to all Senators here, and it would be the best one to pursue under the circumstances.

Mr. BRYAN. Very well, Mr. President.

Mr. McCUMBER. I ask the Senator to allow the unfinished business to be proceeded with. I believe by that course he will get more time for his bill to-day.

Mr. REED. Then, as I understand the Senator from North Dakota, the two Senators from Massachusetts will probably speak this afternoon upon the unfinished business, and the bill will then be laid over. I make the inquiry so that I may know I shall not be expected to speak on the bill to-day.

Mr. McCUMBER. If it can be done by unanimous consent after the two Senators have spoken, I will ask unanimous consent that the unfinished business be laid aside for the day. That course will be satisfactory to me.

Mr. CUMMINS. We have been considering the postal savings bill under Rule VIII, I understand, and if it comes again before the Senate to-day it would have to come up upon motion.

Mr. McCUMBER. No.

Mr. SMOOT. Or by unanimous consent.

Mr. CUMMINS. It can not, in other words, be taken up, unless the Senate determines that it shall be taken up on motion.

The VICE PRESIDENT. Either by unanimous consent or by motion.

Mr. CUMMINS. Either by unanimous consent or by motion. If it came before the Senate on motion, what would become of the present unfinished business?

The VICE PRESIDENT. The unfinished business would simply be displaced for the time being. If the Senator from Iowa is making a parliamentary inquiry——

Mr. CUMMINS. I am.

The VICE PRESIDENT. The Chair will state that if subsequent to the discussion of the unfinished business by the two Senators from Massachusetts a motion is made to take up the postal savings bill and it prevails it will displace the unfinished business.

Mr. McCUMBER. To make it certain, Mr. President, suppose that the unfinished business be laid aside by unanimous consent and that then the other bill is taken up on motion, what would be the effect as to displacing the unfinished business to-morrow at 2 o'clock?

The VICE PRESIDENT. A question of that kind has never arisen since the present occupant of the chair has been here. The unfinished business has always been laid temporarily aside for the consideration of some particular measure, and so it did not displace it. But if it is temporarily laid aside and then subsequently a motion is made to take up some other bill, the Chair thinks that that would displace the unfinished business.

Mr. WARREN. There is not any doubt about that.

Mr. McCUMBER. That being the case, Mr. President, if that ruling is going to be made, I should dislike to have the unfinished business displaced in that way. I am very willing and anxious to accommodate every Senator, but——

Mr. BRYAN. I would not undertake to take any advantage of the Senator, as far as I can control matters; but would the Senator be willing to allow the postal savings bank bill to be proceeded with for an hour or two at this time?

Mr. McCUMBER. I am perfectly willing to do that if I think it can be done without injuring the position of the unfinished business. I will state that that course would be satisfactory to me, but the Senator from Nebraska [Mr. HITCHCOCK], I understood, objected to it.

Mr. WEEKS. Mr. President, I have not any desire to delay the consideration of the bill which has been under discussion in the morning hour to-day. I am well aware that the Senator from Florida has been endeavoring to get consideration of it for a long time; but he should recall that the senior Senator from Kansas [Mr. BRISTOW] is very much interested in the bill, and he can not now be present, and that the amendment which is under consideration was offered by the senior Senator from New Hampshire [Mr. GALLINGER], who is out of the city to-day. I think under those circumstances the Senator from Florida should be willing to let the unfinished business take its course and take up his bill under the call of the calendar to-morrow.

Mr. BRYAN. The senior Senator from Kansas is absent and the senior Senator from New Hampshire is out of the city, but when here the Senator from New Hampshire did not ask to have the bill go over. The only amendment he had was the amendment now pending. The senior Senator from Kansas is not opposed to the bill. It is true both Senators are away to-day, but somebody will be away to-morrow, and somebody will be away every day.

Mr. REED. Let me ask the Senator from Florida if he insists upon forcing the bill to a vote, or simply wants to have it discussed? That might make a difference in the viewpoint of the Senator from Nebraska and others. If he simply wants to have the matter considered and discussed for a while this afternoon, I take it no one would object.

Mr. BRYAN. Mr. President, I am not as much interested in the discussion as I am in a vote on the bill. There has been a great deal of discussion upon it, and what I want to do is to pass the bill. I do not care much about the discussion.

Mr. McCUMBER. Let me ask the Senator from Florida and other Senators if it would be entirely satisfactory to them if I should secure unanimous consent to have the unfinished busi-

ness temporarily laid aside until half past 3. That would give an hour and a quarter for the consideration of the postal savings bank bill.

Mr. BRYAN. I would be very much obliged to the Senator.

Mr. McCUMBER. The unfinished business to be taken up at half past 3. With that understanding, if agreeable, I will ask unanimous consent that the unfinished business may be laid aside until that time.

Mr. BRISTOW. Mr. President, if the Senator from Florida will just give me his attention for a moment; I have been engaged all morning on committee work, being a member of a committee that has very important matters before it. That has kept me out of the Chamber. I am very anxious to have an amendment made to the bill, and I think the amendment is agreeable to the Senator from Florida. I regard the amendment as one of very great importance. I must leave the Chamber to attend the committee meeting at once.

Mr. BRYAN. The amendment to which the Senator from Kansas refers has been offered. It is not pending now, but it will be before the Senate. It is offered as a committee amendment. I will say to the Senator that I know of no opposition to it.

Mr. BRISTOW. I am very anxious that that amendment should be incorporated in the bill. I can not be here this afternoon, because it is impossible to be in two places at the same time. That is why I mention it now, if the bill is to be taken up.

Mr. BRYAN. I have not heard of any objection to the amendment which the Senator has proposed.

Mr. CUMMINS. Mr. President, I think it is only fair to say that there are some of us who are very much opposed to the adoption of a policy which will authorize the Post Office Department or the Government in any capacity to become a mere custodian of money. I would just as soon have the Government become the custodian of diamonds or jewelry, or any other valuable property, as the custodian of money on behalf of an individual. There will be some discussion along that line. I think whatever money the Government takes from the savings depositors it ought to pay interest upon. I doubt whether the argument can be concluded in an hour. Of that anyone can judge as well as I can.

Mr. REED. I understand the Senator from Iowa is going to make a speech on it.

Mr. CUMMINS. I have it in my mind to do that.

Mr. REED. Then, what is the matter with laying the unfinished business aside for an hour and a half and let the Senator make his speech?

Mr. CUMMINS. We have not reached that point yet. I have no doubt the Senator from Missouri will want to make a speech on it.

Mr. McCUMBER. I ask the Senator from Nebraska if he objects to the proposition to lay the unfinished business aside until half past 3, that the pending bill may be discussed in the interim?

Mr. HITCHCOCK. I dislike to make my personal arrangements interfere with the desire of the Senator from North Dakota and the Senator from Florida, but——

Mr. McCUMBER. It is my only desire to accommodate others.

Mr. HITCHCOCK. I consider that it is going to be impossible to come to a vote upon this bill after a discussion of an hour or an hour and a half. I think it is the most important measure that is before the Senate at the present time. It involves practically a perversion of the postal savings banks proposition. I speak of that with some feeling, because I was originally deeply interested in the savings bank system and had the honor of being the author of one of the first bills introduced in the House for its establishment. I dislike to see it taken up here in a fragmentary way. I think it is a measure worthy of careful discussion, and I shall object to anything that contemplates reaching a vote upon it within an hour or an hour and a half; and if it is not to be voted upon, I think it is unwise to displace the unfinished business.

Mr. McCUMBER. Then I withdraw the request for unanimous consent and ask that the unfinished business may be proceeded with.

The VICE PRESIDENT. The unfinished business will be proceeded with.

Mr. WEEKS. Mr. President——

Mr. NELSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Bryan	Chilton	Dillingham
Borah	Burton	Clark, Wyo.	du Pont
Brady	Catron	Clarke, Ark.	Gore
Bristow	Chamberlain	Cummins	Hitchcock
Hollis	Martine, N. J.	Root	Swanson
Hughes	Nelson	Sheppard	Thomas
James	Norris	Sherman	Thompson
Johnson	O'Gorman	Smith, Ga.	Townsend
Kenyon	Overman	Smith, Md.	Vardaman
Kern	Page	Smith, S. C.	Warren
La Follette	Perkins	Smoot	Weeks
Lane	Reed	Stone	West
McCumber	Robinson	Sutherland	

Mr. ROBINSON. I was requested to announce the unavoidable absence of the Senator from Arizona [Mr. ASHURST] on business of the Senate.

The PRESIDING OFFICER (Mr. SMITH of Georgia in the chair). Fifty-one Senators have answered to the roll. There is a quorum present.

Mr. STONE. It is desired to have a short executive session this afternoon, and I ask if it is agreeable to the Senator from North Dakota that we may dispose of it now, so that he will have a clear way for the rest of the afternoon?

Mr. WARREN. I ask if it is expected to resume the legislative session after the executive business?

Mr. STONE. Oh, certainly.

Mr. LA FOLLETTE. Will the Senator withhold the motion for a moment, that I may submit a resolution?

Mr. STONE. Certainly; I withhold the motion for that purpose.

REVENUES OF RAIL CARRIERS.

Mr. LA FOLLETTE. I offer a Senate resolution, which I send to the desk, and ask unanimous consent for its present consideration.

The PRESIDING OFFICER. Is there unanimous consent that the resolution may come up, offered out of order? The Chair hears no objection.

Mr. SMOOT. Let it be read.

The PRESIDING OFFICER. The resolution will be read.

The resolution (S. Res. 343) was read, as follows:

Resolved, That the Interstate Commerce Commission be, and it is hereby, requested to transmit to the Senate of the United States all anonymous letters and communications and all written or printed letters and communications received with signatures thereto, and all circulars, clippings, newspaper or magazine articles, marked or otherwise, received by said commission or member thereof, which were manifestly designed to influence the action of said commission in making or refraining from making any ruling, conclusion, finding, recommendation, report, or order in the determination of the case known as "Docket No. 5860," entitled "Revenues of rail carriers in official classification territory," and in the case known as "Investigation and suspension docket No. 333," entitled "Rate increases in official classification territory," now pending before said commission, excepting such letters, communications, briefs, records, and other matters as have been received by said commission or any member thereof, under the rules and regulations of the commission governing its proceedings in the orderly administration of the interstate-commerce law and the acts amendatory thereof, from the officials, employees, and attorneys of the railroads, parties to such proceedings, the attorneys, investigators, and employees of the commission engaged in investigating and preparing said cases and from the shippers and associations of shippers, individuals, and attorneys who appear in the proceedings as protestants.

Mr. LA FOLLETTE. I ask unanimous consent for the present consideration of the resolution.

Mr. ROBINSON. Inasmuch as this is a matter the Committee on Interstate Commerce has jurisdiction of, and as the chairman of that committee is not present, I ask that the resolution may go over.

The PRESIDING OFFICER. One objection carries it over. The resolution goes over until to-morrow.

EXECUTIVE SESSION.

Mr. STONE. I renew my motion to proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 25 minutes spent in executive session the doors were reopened.

CONFIRMATION OF WINTHROP MORE DANIELS.

Mr. THOMAS. On the 3d instant the Senate, by a yea-and-nay vote, confirmed the appointment of Hon. Winthrop More Daniels to be an Interstate Commerce Commissioner. The injunction of secrecy was removed from the vote, and it was ordered published in the RECORD. I notice on looking at the RECORD that I am simply recorded as having been paired with the senior Senator from New York [Mr. ROOT]. That is true, but I wish it to appear in the permanent RECORD that, being paired with the senior Senator from New York, if I had been at liberty to vote, I would have voted "nay." I ask that the permanent RECORD may be corrected.

The VICE PRESIDENT. Without objection, the permanent RECORD will be corrected.

FOREST PRODUCTS EXPOSITIONS AT CHICAGO AND NEW YORK.

Mr. RANSDELL. I ask unanimous consent for the present consideration of the joint resolution (H. J. Res. 204) authorizing the Secretary of Agriculture to make exhibits at Forest

Products Expositions to be held in Chicago, Ill., and New York, N. Y.

The reason why I ask for the present consideration of the joint resolution is that it provides for the appropriation of a small amount of money to make some forestry exhibits at a big exposition which is to begin at Chicago on April 30. Unless the joint resolution is acted on now, and the appropriation granted, it will do no good. So I ask unanimous consent for the consideration of the joint resolution at this time. It will take but a moment to act on it.

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Is there objection to the request of the Senator from Louisiana?

Mr. McCUMBER. I think, Mr. President, I will have to object to that. I think the joint resolution could go over one day.

Mr. RANSDELL. I hope the Senator will not object; it is a matter of very great importance to many people all over the country and involves only a small appropriation. It will take only a moment to pass the joint resolution. It was reported over a month ago. The exposition begins on April 30.

Mr. McCUMBER. With the understanding that the joint resolution will not lead to debate, I will not insist on the objection.

Mr. OVERMAN. Let us know what the joint resolution is before unanimous consent is given for its consideration.

Mr. RANSDELL. It is a joint resolution reported by the Committee on Agriculture and Forestry, which passed the other House unanimously and which appropriates $10,000 to make an exhibit of forestry products at a big exposition to be held at Chicago from the 30th of this month to the 9th of next month and in New York from May 21 to May 30.

Mr. OVERMAN. As I understand, this is a House joint resolution?

Mr. RANSDELL. This is a House joint resolution. It would be very beneficial, I think, to the forestry interests of the whole United States to have the joint resolution passed. There is a great deal of waste, I may say, in forestry; stumps are wasted; the tops of trees are wasted; and there is an immense amount of waste products which we might save, and which, if saved, the Forestry Bureau estimates would amount to a great many million dollars. As I have said, the joint resolution involves a very small sum—$10,000—and if we can not get it now it will not do any good.

Mr. SHAFROTH. Mr. President, if the Senator will allow me, I will state that I am a member of the Committee on Agriculture and Forestry. This appropriation of $10,000 seems very insignificant, but the Bureau of Forestry has already prepared the exhibit; it is right here in Washington; and all we have to do is to ship it. Inasmuch as we have many thousands of dollars already invested in the exhibits, it seems to me that it would be a wrong policy not to appropriate this sum of money, so that the people may learn what the exhibits are.

Mr. SMOOT. I desire to ask the Senator from Louisiana if the exhibits have not already been shipped and are not already in place in Chicago?

Mr. RANSDELL. I understand that some of them are and that others are not. The officials of the Forestry Bureau tell me that it is necessary to have this appropriation properly to make these exhibits. I talked to Mr. Graves in person about that.

Mr. SMOOT. I understand that the exhibits are already in place in Chicago. I am not going to object to the appropriation of the money, but it does seem to me that this joint resolution could come up in its regular order and be passed. I am told by men who seem to know that those exhibits are already in place in Chicago.

Mr. SHAFROTH. They have been probably shipped there in anticipation that this joint resolution would be passed, because it was reported unanimously by the Committee on Agriculture and Forestry. The joint resolution authorizes the appropriation of the amount of money named, or so much thereof as may be necessary; and if anybody else is paying for the shipment of the exhibits, it seems to me that we will save that expense.

Mr. SMOOT. I am perfectly aware of that; but I want the Senator to understand my position in regard to it. I do not believe there is any necessity for immediate action upon this joint resolution, or I would have allowed it to come to a vote before this, but, as I heretofore told the Senator, if bills are to be picked out of the calendar here and there and asked to be voted upon, there are a great many of them we will never reach. So I thought the proper thing to do was to have the joint resolution come up in its regular order.

Mr. RANSDELL. I will say to the Senator that I would not ask for immediate consideration in any ordinary case, but this exposition begins on the 30th of April. It is not a local matter, but one which will benefit the entire forestry products of the United States; and it does seem to me, when the amount involved is so small and when there is so much good that may possibly come by allowing the small expenditure of $10,000 to a great industry like the timber and forestry industry of this country, we ought to pass the joint resolution.

Mr. OVERMAN. Is this a private affair, or what is it?

Mr. RANSDELL. It is an exposition which the forestry people are having in Chicago. The timber interests of the country are holding an exposition in Chicago.

Mr. OVERMAN. Is the exposition to be conducted by the lumbermen themselves? Has the State appropriated any money?

Mr. RANSDELL. No, sir; the lumbermen themselves are having this exposition; and no salaries are to be paid out of this appropriation at all. It is simply to provide for making an exhibit of what we have, and to demonstrate at these bix expositions the methods which the Forestry Bureau has already worked out, showing what use could be made, for instance, of stumps, of tops of trees, and of odds and ends that are now wasted.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. SMOOT. Mr. President, I am rather in sympathy with the idea of making such an exhibit at Chicago. I have not any doubt, however, that the exhibit will be made whether we make this appropriation or not; I am positive that the lumbermen of this country would pay the bill. But, be that as it may, I want to ask a few questions in relation to this policy that we are now entering upon. I pick up the calendar here and look at page 5, where I notice a joint resolution, being Senate joint resolution 94, to authorize the Secretary of Commerce to investigate the condition of trade in China for the purpose of determining the desirability of establishing there a permanent exposition of the products of the United States of America; on the same page I notice Senate bill 3971, to provide for a permanent exhibit of the resources of the States of the Union in or near Washington, D. C.; and all through the calendar I find bills introduced for the purpose of making some exhibit somewhere. Not only that, but expenses are to be defrayed by the Government for certain congresses to be held in different parts of the United States.

Mr. President, I do not know where this is going to lead; I do not know what the expense will ultimately be. I will state, however, to the Senator that if there is one thing that needs an exhibit and needs information being given upon it to the American people, I believe that it is the question of the waste of our timber. I have spoken upon this floor upon that subject a number of times. I am in full sympathy with the preservation of our timber, our timberlands, and even of the lumber that belongs to private individuals and corporations of this country. I know what the effect of this exhibit will be, and I am not going to object to the present consideration of the joint resolution, though, it being out of order, I should object, as I have objected in similar cases in the past, and let the measure come up in its regular order.

Mr. RANSDELL. I thank the Senator for not objecting. It is a matter of great public interest.

Mr. STONE. The Senator from Utah says that he knows "what the effect of this exhibit will be." I should like to be advised as to what the effect will be.

Mr. SMOOT. The effect of the exhibit will be to show to a great many of the lumbermen of this country how to take care of the waste products from the sawmills, and also to show them what can be done with the waste products to bring revenue from them when prepared in conformity with the exhibits shown.

Mr. STONE. What is this exhibit?

Mr. SMOOT. It is an exhibit of the forest products of this country.

Mr. McCUMBER. Mr. President, I wish either that we would consent to take up the joint resolution and dispose of it or else that it would be laid aside.

Mr. RANSDELL. I hope there will be no further debate on it. It is a matter that ought to be acted upon quickly.

Mr. McCUMBER. I will not object that the unfinished business may be temporarily laid aside to dispose of the joint resolution, if it is not going to require any discussion.

Mr. RANSDELL. I do not think it will require any discussion.

Mr. OVERMAN. Mr. President, does it not require a motion to lay aside the unfinished business in order to take up this joint resolution?

Mr. McCUMBER. I did not understand the Senator.

Mr. OVERMAN. Will we not have to temporarily lay aside the unfinished business in order to take up this joint resolution?

Mr. SMOOT. The Senator from Louisiana asks unanimous consent for the present consideration of the joint resolution.

The PRESIDING OFFICER. The request of the Senator from Louisiana is for unanimous consent?

Mr. OVERMAN. I rise to a question of order. Will not that displace the grain-inspection bill? If we take up the joint resolution by unanimous consent, we take it up for consideration, and then, of course, it displaces the regular order.

The PRESIDING OFFICER. The Chair believes that that is not the effect of the request.

Mr. OVERMAN. If we lay aside the unfinished business temporarily, it will be all right.

Mr. RANSDELL. Then, I make the request that the unfinished business be laid aside temporarily. I do not want to displace the grain-inspection bill.

The PRESIDING OFFICER. The Chair has decided that that will not be the effect of it.

Mr. GORE. Mr. President, I simply want to join in the request of the Senator from Louisiana that the way shall be cleared for the immediate consideration of the joint resolution, and I hope it will be passed.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana for the consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. WEEKS. Mr. President, I am going to take very little time to discuss the bill which is the unfinished business, because it has been discussed for and against in a most comprehensive manner by Senators who come from grain-raising States.

The very fact that those who are directly interested in the production of grain and the inspection and shipment of grain are at cross-purposes on this legislation is one of the reasons why I am opposed to its favorable consideration. Massachusetts and the rest of New England are not grain-raising sections. Substantially speaking, with the exception of oats there is no grain raised in New England. We are purchasers of grain and furnish the ports through which grain is shipped to foreign countries.

Assuming that there are two sides to this important question, which have been so well pointed out by those who have spoken on it, I am particularly interested in the course of business, in preventing as far as possible throwing impediments in the way of the completion of business transactions like the shipment of grain, and in preventing delay in completing business operations under all circumstances.

I hardly think this bill can be put on all fours with the meat-inspection legislation or the pure-food legislation, because they both had to do with the public health. This is a proposition to put under the National Government the inspection of grain under all conditions. From the investigation I have been able to make it seems to me that the immediate local conditions under which grain is inspected would have a material effect on the classification of the grain itself. If it were inspected during a very dry season, the result would be quite different from the result if it were inspected during a rainy season. For that reason and the reason that the differential which would be allowed on the transportation of grain to the seaboard for export would depend materially on the amount of moisture in the grain, it strikes me that it is inadvisable to require a national inspection.

There is, however, another reason which is more important from my viewpoint, and to which I wish to direct the attention of Senators, and that is the expense which we are piling up all the time in the conduct of business. This bill proposes that there shall be 16 inspection centers. Two of those centers are to be in New England—one Portland, Me., and the other Boston, Mass. Neither of them is a distributing point for grain or any similar product. They are simply the shipping points from which grain is shipped which is sent abroad. The distributing points are entirely distinct from these two centers. The bill provides that there shall be inspectors stationed at the 16 cities named in the bill, and that the Secretary of Agriculture may appoint inspectors for other localities. How many inspectors, or for what localities, the bill does not determine in any way; and I suspect we shall build up a very large inspection force in connection with this service.

If I understand the bill correctly, if a carload of corn or wheat were shipped to Massachusetts, if it came by one route, the Harlem River route, it would come under a blind bill of lading to the Harlem River and then would be billed to the point where it was going to be used. There are more than 40 places in Massachusetts having a population of over 10,000, and all of them are consumers of grain that comes from the West. If that grain came by the Harlem River route it would be rebilled at that point. An inspection would have to take place at that point, it seems to me, under the proposed act, and certainly another inspection would have to take place at the city where the grain was finally shipped before it could be unloaded. If it came by the Grand Trunk or by any other Canadian railroad to Massachusetts, it would be reshipped at Richford, on the northern border of Vermont; or if it came over the Fitchburg line it would be reshipped at Williamstown, Mass., and, as I have said, would come under a blind bill of lading until it reached this point, and then would be billed to the point where it was going to be used.

Mr. McCUMBER. Mr. President, will the Senator allow me to correct that error, into which many people have fallen in regard to this bill?

Mr. WEEKS. Certainly.

Mr. McCUMBER. The bill provides in express terms that after the grain has been once inspected at any one of these great terminals it shall not be inspected again, no matter how many places it goes through, unless it is mixed with other grain, when, of course, it is not the same grain; that the same inspection will follow it through until it is in the hands, practically, of the ultimate consumer, except the bill provides that under certain conditions it may be inspected in accordance with our present laws as it is shipped out of the country.

Mr. REED. Mr. President——

The PRESIDING OFFICER (Mr. RANSDELL in the chair). Does the Senator from Massachusetts yield to the Senator from Missouri?

Mr. WEEKS. I yield to the Senator.

Mr. REED. If that be true, then the bill is utterly vicious. If you can inspect a carload of corn at San Francisco, put a brand upon it, and that brand remains with it and the sale must be had upon that brand, then if that car is shipped to Portland, Me., and in the process of shipping the corn becomes heated or damaged, it would have to be taken upon that inspection.

Now, it frequently happens that a carload of wheat or a carload of corn shipped a much shorter distance, the ordinary distance, is five or six weeks in transit. It frequently happens that a carload of corn or of wheat does become heated, and its entire quality affected and its value affected, during the process of shipment. Any bill which proposes to attach a tag to a car, and compel all people to buy upon the inspection which took place at the initial point of shipping or at the first inspection point, will inevitably involve all sorts of injustices, because the grain does change its character.

Mr. McCUMBER. Mr. President, will the Senator from Massachusetts allow me to answer the Senator from Missouri right there?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from North Dakota?

Mr. WEEKS. Yes.

Mr. McCUMBER. I am pretty thoroughly acquainted with the entire grain business in the United States. I know the system under which the operations are conducted. Under the present system, if a car of grain should be shipped from San Francisco to Portland, Me.—which, of course, would be an impossibility—the person purchasing that car of grain would purchase it on the certificate as it was graded at San Francisco, and no change whatever in the character of the grain en route could affect the first certification, on which it was purchased. All of the sales are made upon certificates, and purchasers are compelled to purchase under those certificates. Under this bill, however, if there has been a change in the quality, a reinspection may be had at these terminals—no other place—if either party so desires.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from Missouri?

Mr. WEEKS. Yes; I yield.

Mr. REED. I ask the Senator to yield so that we may thrash out this point.

The Senator says a reinspection may be had. I have not found it in the bill in terms broad enough to cover the case;

but if there could be a reinspection at a terminal point, what good would that do nine-tenths of the ordinary consumers?

Here are eight points selected in the United States for inspection. Others may be added. A man living at Bangor, Me., buys a carload of corn in Kansas City. There is no inspection at Bangor, but there is one provided for at Portland, Me. Unless he catches that car at Portland, Me., and has it inspected while it is really en route, he has no means of protection afforded him. That defect, or defects of a similar character, run throughout the bill.

Mr. McCUMBER. Mr. President, the Senator is considering the matter just as the custom is to-day. He would have no protection, as the Senator calls it, to-day. The grain would not be reinspected at all at this terminal to which it would be sent. If its quality changes in course of shipment by absorbing water, and it thereby becomes less valuable, he takes the loss, and if it becomes better because it has dried out in course of shipment, he gets the benefit. In one instance he has to stand the loss; in the other he receives the benefit.

No system could possibly guard against changes in transit. All we can ask for is certainty of grade at the great terminals where 95 per cent of our grain passes into the market.

Mr. REED. Why, under the present system——

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from Missouri?

Mr. WEEKS. Yes; I yield.

Mr. REED. Under the present system there is no law which compels a man to take the grain at the grade that was originally established in inspection. Unless he foolishly ties himself down by a contract which deprives him of the right to do so, he always has the right to dispute the quality of the grain when it arrives.

As a matter of fact, grain is reinspected; and the Senator himself has said upon this floor that there is nothing more common than to find a car of grain inspected in Minneapolis and given a certain grade, and, as he has stated and as his report states, it may be sent to Kansas City and given another grade and may be sent to New Orleans and given another grade.

That might result from either one of two causes. It might result from dishonest or incompetent inspectors or it might result from a change in the character of the grain in transit. To-day the purchaser does have the right and does have the opportunity to protect himself, but if you pass this bill he will not have.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from North Dakota?

Mr. WEEKS. I yield once more.

Mr. McCUMBER. The Senator shows that he is not acquainted with the grain business. If he were acquainted with it, he would know that there is no sale of grain that does not provide that the purchaser must absolutely accept the grade at which it is certified, without any appeal, unless he can show that fraud was purposely perpetrated upon him. That is what is provided in the contract in common use in every grain center in the United States.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from Missouri?

Mr. WEEKS. I do.

Mr. REED. Of course I am embarrassed by my ignorance, and am completely overwhelmed by the superior knowledge of the Senator from North Dakota; but when I come to address the Senate I think I shall be able to show that at least the gentleman who wrote the report that accompanies this bill was not possessed of all knowledge with reference to the grain business, nor gifted with the infallibility which ought always to accompany the positiveness of assertion that we hear this afternoon.

Mr. WEEKS. Mr. President, I can not claim great familiarity with the grain business or with the inspection of grain, but I have instanced the common course which much of the grain used in the New England States, and which is shipped abroad to foreign ports, takes when it reaches the New England borders.

It must be true that a considerable part of the grain sent into New England is sent directly from the point where it is raised to the point where it is going to be consumed, and billed to that point. For instance, if a carload of grain were coming from Indiana to Worcester, Mass., it would naturally come over the New York Central system, which includes the Boston & Albany Railroad, to Worcester, and would be billed directly to Worcester. Worcester is not one of the 16 distributing centers named in this bill, neither is it a distributing center for grain of any considerable moment at any time; but it is a city of 100,000 people. If, as must be the case, a considerable amount of grain is shipped there, it will be necessary to keep inspectors there, or to send them there, at travel expense in addition to their pay, whenever a carload of grain must be inspected, if it is inspected when it is discharged; and, as I understand this bill, no railroad can permit the unloading of a carload of grain without notifying a chief inspector somewhere and an inspection being made at that time.

Mr. McCUMBER. At the terminals where the chief inspectors are, and at no other terminals.

The PRESIDING OFFICER. The Senator from North Dakota must address the presiding officer.

Mr. McCUMBER. I beg the Chair's pardon.

Mr. WEEKS. I do not read the bill in that way; but if there are only 16 chief terminals, I want to call the Senator's attention to the fact that the Secretary of Agriculture may designate as many more terminals as he sees fit, and the inspectors must be located there or must be sent there at any time to inspect the grain which is passing through.

I am assuming that there may be arguments in favor of this proposition, and there certainly are arguments against it. All of this means additional Government equipment and additional governmental expense. We are already running riot in the expenses required to maintain our Government. I wish to read some figures here which will illustrate what I am now pointing out.

In 1894 the United States Government employed 247,000 persons. In 1914—20 years later—it employed 712,000 persons. That does not include municipal or State employees or those who are employed in connection with contract work which is being done for the Government or for the State or for the municipality. In 20 years, therefore, while the population of the United States has been increasing from 66,000,000 to 97,000,000, or 47 per cent, the number of persons directly employed by the Government has increased 186 per cent.

I submit, Mr. President, that that is one of the essential factors which go to make up the cost of living in this country. It is the cost of government which is being imposed on the people of this country. Very soon, if we have not in mind what we are doing, we are going to load onto the back of everyone who is producing something in this country a Government employee to be carried.

Where it can not be demonstrated beyond question that course should be taken, I am opposed to establishing in this country any system which is going to add to the number of governmental employees. In this case I certainly think the arguments are against the bill. I admit there may be arguments on both sides; but, feeling as I do about increasing governmental expenses, I must oppose legislation that is presented under such conditions.

Mr. McCUMBER. Mr. President, I desire to answer the Senator right here with the statement that under this bill not one penny would be added to the governmental expenses. Every dollar that the bill would cost would be charged right back against the grain itself, just exactly as it is done to-day. There is not one dollar of expense incurred by the boards of trade or other bodies that inspect grain except that which is paid right back to them, and a little more, in the fees that are charged to each carload of grain that is inspected.

Under the present system the charges run from 25 cents to 75 cents a carload. The Department of Agriculture has made its estimates, and it has stated that between 30 and 40 cents a carload will cover the entire expenses of the system; so there is no additional expense involved. Of course, we will have to provide in the first instance to pay these men that are now paid by the boards of trade; but the money will come back in the fees that are charged against the grain as it is inspected.

Now, I desire to answer another proposition of the Senator from Massachusetts.

Mr. WEEKS. Before the Senator goes on, will he permit me to say a word?

Mr. McCUMBER. Certainly.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Massachusetts?

Mr. McCUMBER. Certainly.

Mr. WEEKS. A little earlier this afternoon we were discussing the amendment of the law providing for postal savings banks; and I was interested to see in the recommendation for the enactment of that law, in the statement made by the Postmaster General, that the rate of interest paid depositors would be 2 per cent, and the rate of interest to be paid by the banks for the deposits would be 2½ per cent; that one-quarter of 1 per cent would be sufficient to pay the expenses of the system. Yet we find that it is costing 2½ per cent, or ten times as much as the Post Office Department estimated, to conduct that system. Even if the statement which the Senator from North Dakota makes is correct, somebody will have to pay these in-

spectors; and it is placing another burden on commerce to impose the charge which will be imposed in this case.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. McCUMBER. I do.

Mr. NELSON. I should like to reply to the Senator from Massachusetts. I will not take more than a minute.

I will say that if you establish a national system here, it will involve the establishment of an expensive bureau here, with a chief, an assistant chief, and a number of clerks; and we all know how much these additional bureaus cost when they are established. Those charges will come directly out of the Government, and these other charges will come out of the consumers. In many instances now they can ship and handle grain without any inspection at all.

Mr. McCUMBER. I will answer that in connection with the other statement. We have already a bureau that does this work in the department. That bureau has been making its investigation right along. It has adopted a system with reference to the inspection and grading of corn which has now been adopted by all of the exchanges; so that if the bill adds any employees it will not be more than one or two clerks at the most, which would add very little to the expense.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield.

Mr. REED. On that point, I wish to ask the Senator if it is not a fact that that very Government board or bureau, by whatsoever name it may be called, has recommended an entirely different bill from the one the Senator is now pressing?

Mr. McCUMBER. Mr. President, I have answered that question before. Whether they support another bill or whether they do not will not change my opinion. In the first place, the Senator will recall that a few years ago they reported in favor of this bill, too; not only the Secretary of Agriculture, but the same men who are now recommending the other bill. With those two statements I do not know why I, as a legislator, must conform my mind to the statement of either one of them.

I want to correct the Senator from Massachusetts again. I had that very subject up in a discussion with a number of New England buyers, in which they thought that perhaps they might have to send for an inspector to come out to some of these little places, and that a delay would be necessary in order to have their inspection made. I explained to them that there was no inspection whatever at those places; that if they bought grain at a place where it was not inspected, other than one of these great terminals, and it was shipped to another place where there was no inspector, there would be no inspection at all, just exactly the same as it is to-day.

Let me make that clear. If in New Hampshire a buyer for a mill there buys grain that is inspected in Minneapolis or Duluth or Buffalo, he buys it on the Minneapolis, Duluth, or Buffalo inspection; and if the consignment is to be delivered at that place, no further inspection at all takes place. There is no change whatever in the present system.

I want to explain to the Senator the fact that we do not change the system of inspection anywhere. We simply provide for different inspectors at the same places where the grain is inspected at the present time, either under board of trade rules or under the State law. There is not a single additional one provided in this bill. It does provide, however, that the Secretary of Agriculture may include other important grain centers if the business grows up in a certain territory so that it becomes an important center.

Every little New England town can not become an important grain center. There are the great grain centers of Minneapolis, Duluth, Chicago, and Buffalo and, when you get to the exporting places, Baltimore, New York, and Boston. They have become important exporting places. You have now a system of inspecting grain there. The grain is inspected there before it is shipped out, so that there is no change except in the personnel of the inspectors.

I have attempted to follow as closely as possible the Minnesota law, which I regard as a good law if it is complied with properly in the matter of inspection, in the handling, and in the grading of grain, but leaving the matter of changing the grades, and so forth, to the department itself.

Mr. WEEKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Massachusetts?

Mr. McCUMBER. I do.

Mr. WEEKS. I should like to put to the Senator a hypothetical case. Suppose a shipment of grain is made from his own State to Duluth and goes into an elevator there, where is it inspected?

Mr. McCUMBER. It is inspected before it goes into the elevator.

Mr. WEEKS. When it goes into the elevator, it having been mixed with other grain, and is then shipped in a barge to Buffalo, where would it be inspected?

Mr. McCUMBER. It would be inspected before it left for Buffalo as it would go out in the barge, because it is not the same grain, because there is a mixing of the grain. It is received at Duluth in carload lots. That is one lot of grain. When a whole shipload is shipped, either in separate bins or otherwise, it is inspected out under the present system. I do not propose to change the system at all. It is inspected in and it is inspected out under the present system.

Mr. WEEKS. Now, one more question. Suppose that grain is shipped from Buffalo to a town of 5,000 people in Massachusetts; where is the grain going to be inspected next time?

Mr. McCUMBER. If it is resold, and is the same grain——

Mr. WEEKS. It can not be the same grain, because it has been mixed.

Mr. McCUMBER. It is a different grain. It will be inspected in Buffalo as it is inspected in Buffalo now; and then if it is consigned to a little town, that is an end of the inspection.

Mr. WEEKS. Does the Senator mean to say that the grain would be inspected three times in transit now?

Mr. McCUMBER. If the grain is mixed three times, the inspection will be just the same as it is now. If it was inspected three times under the present system, it would. If you mix different kinds of grain—Nos. 1, 2, and 3—that makes a different grade, and it will be reinspected as it is inspected under the present system, in all the trade centers, but only at these given centers where it is now inspected. Under the bill, when the grain has been once inspected, no further inspection is required.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. I have been endeavoring for quite a length of time to-day to find an opportunity, without inconveniencing some Senator who had a matter he desired to press, to present a conference report upon the agricultural extension bill. I ask unanimous consent that the grain-inspection bill may be laid aside for just a few moments that I may submit the report?

The PRESIDING OFFICER. Is there objection? The Chair hears none.

AGRICULTURAL EXTENSION WORK.

Mr. SMITH of Georgia submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, 5, 11, 15, and 16.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 6, 7, 8, 12, and 14, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$500,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$4,100,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: After the word "contributions" in said amendment, insert the following: "from within the State"; and the Senate agree to the same.

HOKE SMITH,
JOE T. ROBINSON,
JAS. H. BRADY (all but No. 4),
Managers on the part of the Senate.

A. F. LEVER,
GORDON LEE,
G. N. HAUGEN,
Managers on the part of the House.

The report was agreed to.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. McCUMBER. Mr. President, the Senator from Massachusetts [Mr. WEEKS] made some suggestions to the effect that under the pending bill there would be a delay in shipping grain. The bill does not change in any respect the present method of making the inspections. As a matter of fact, although it is not enforced to any great extent, a provision has been carried for years in the Agricultural appropriation act requiring the Secretary of Agriculture to see that all grain in vessels exporting grain shall be certified and inspected. I do not know whether that inspection is being carried on or not, but we provided for it for a number of years, and I think it is still the law. But whether that is the case or not, there will be no change whatever.

I understood that the senior Senator from Massachusetts [Mr. LODGE] was to go on and follow his colleague, but I observe that he is not present.

Mr. NELSON. I wish to say to the Senator from North Dakota that the senior Senator from Massachusetts is necessarily detained in a committee meeting. Otherwise he would be here, but he can not be here this afternoon. I therefore suggest to the Senator that he allow the bill to go over until to-morrow and that the Senate adjourn.

Mr. McCUMBER. Let me ask the Senator from Missouri [Mr. REED] if he can possibly go on this afternoon?

Mr. REED. I prefer to go on to-morrow.

Mr. McCUMBER. Under the circumstances, I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, April 28, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate April 27, 1914.

PROMOTIONS IN THE ARMY.

MEDICAL CORPS.

Lieut. Col. Jefferson R. Kean, Medical Corps, to be colonel from April 23, 1914, vice Col. Daniel M. Appel, who died April 22, 1914.

Maj. Charles Lynch, Medical Corps, to be lieutenant colonel from April 23, 1914, vice Lieut. Col. Jefferson R. Kean, promoted.

Capt. John L. Shepard, Medical Corps, to be major from April 23, 1914, vice Maj. Charles Lynch, promoted.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Ensign Boyce K. Muir to be a lieutenant (junior grade) in the Navy from the 6th day of June, 1913.

Samuel L. Howard, a citizen of the District of Columbia, to be a second lieutenant in the Marine Corps from the 13th day of April, 1914.

The following-named assistant surgeons in the Medical Reserve Corps to be assistant surgeons in the Navy from the 10th day of April, 1914:

Carroll R. Baker.
Cliff C. Wilson.
George W. Calver.
Daniel Hunt.
Claude W. Carr.
Howard Priest.
Arthur E. Beddoe.
Robert L. Crawford.
Thomas A. Ratliff.
Louis Lehrfeld.
John F. Riordan.
Ovid C. Foote.
Martin B. Hiden.
Arthur E. Younie.
Louis H. Reddis
Frank H. Haigler.
Frederick Ceres.
Horace V. Cornett.
James D. Bobbitt.
William H. Massey.
Harvey R. McAllister.
Walter C. Espach.
Howard A. Tribou.
Thomas A. Fortesque.
William B. Hetfield.
Jesse B. Helm.
Walter L. Haworth.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 27, 1914.

CONSULS.

Samuel H. Wiley to be consul at Asuncion, Paraguay.
Herman L. Spahr to be consul at Montevideo, Uruguay.
Lawrence P. Briggs to be consul at Saigon, Cochin China.
Ross Hazeltine to be consul at Cartagena, Colombia.
Hernando de Soto to be consul at Warsaw, Russia.

CONSULS GENERAL.

George H. Murphy to be consul general at Cape Town, Cape of Good Hope.
Leo. J. Keena to be consul general at Buenos Aires, Argentina.

CONSUL GENERAL AT LARGE.

Ralph J. Totten to be consul general at large.

RECEIVERS OF PUBLIC MONEYS.

William U. Hews to be receiver of public moneys at Hailey, Idaho.

Charles E. Harris to be receiver of public moneys at Blackfoot, Idaho.

REGISTERS OF THE LAND OFFICE.

Joseph Winczewski to be register of the land office at Duluth, Minn.

Henry Heitfeld to be register of the land office at Lewistown, Idaho.

John E. Williams to be register of the land office at Hailey, Idaho.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Commander Philip Andrews to be a captain.
Surg. Norman G. Blackwood to be a medical inspector.
Chaplain George E. T. Stephenson to be a chaplain in the Navy.
Commander Archibald H. Scales to a captain.
Commander Victor Blue to be a captain.
Lieut. Commander George E. Gelm to be a commander.
Lieut. Walter N. Vernou to be a lieutenant commander.
Lieut. (Junior Grade) Guy E. Davis to be a lieutenant.
Ensign Sydney M. Kraus to be a lieutenant (junior grade).
Henry M. Stenhouse to be an assistant surgeon in the Medical Reserve Corps of the Navy.
William A. Stoops, a citizen of Michigan, to be an assistant surgeon in the Medical Reserve Corps of the Navy.

POSTMASTERS.

ALASKA.

T. H. Deal, Fairbanks.

ARKANSAS.

O. D. Bareing, Magnolia.
James F. Hurst, Clarendon.
Harry L. Kelley, Holly Grove.
Emmet H. McMurry, Marianna.
W. L. Newton, Camden.
James H. Stack, Brinkley.

CALIFORNIA.

J. H. Garner, Hollister.
Thomas E. Klipstein, Bakersfield.
W. M. Redman, Lancaster.
William T. Tschierschky, Tracy.

CONNECTICUT.

Simon C. Bradley, Fairfield.
Edward F. Daly, Portland.

FLORIDA.

Robert J. Dunnam, Fellsmere.
Thomas H. Milton, Trenton.

GEORGIA.

Johnnie B. Roddenbery, Thomasville.

IDAHO.

E. C. Davis, Milner.
J. A. Edlefsen, Driggs.

INDIANA.

C. E. Garriott, Scottsburg.
Oren A. Rawlings, Portland.

KANSAS.

George H. Goodholm, Lindsborg.
C. C. Holbrook, Waterville.
W. D. Sturgis, Kanopolis.

KENTUCKY.

Francis E. Bradley, Scottsville.
John O'Reilly, Hardinsburg.
James T. Wilhoit, Versailles.

LOUISIANA.

Albert Hanson, Berwick.
W. J. M. Tilley, Oil City.
Mary E. Vandegner, Many.

MAINE.

Frank E. DeCoster, Norway.
Wallace O. Estes, Brooks.
D. M. Murphy, Rockland.
Frank O. Wellcome, Yarmouth.

MISSOURI.

Thomas J. Board, Oronogo.
William R. Bowles, Greenfield.
William R. Jackson, Mexico.
John F. Kincannon, Anderson.
Uriah A. McBride, Warrensburg.
J. K. Saunders, Pierce City (late Peirce City).

MONTANA.

Mary E. Meinhardt, Bainville.
Exzelia J. Pepin, Havre.

NEW HAMPSHIRE.

George E. Fellows, Raymond.

NEW JERSEY.

Eugene S. Burke, Morristown.
Arthur J. Halladay, Kenilworth.
John F. Peniston, Cranford.
Isaiah C. Shinn, Woodstown.

NORTH CAROLINA.

O. C. Nicholson, Maxton.
Nathan R. Pool, Clayton.

OHIO.

Vallee Harold, Portsmouth.
Frank J. Sonderman, Fort Recovery.

OKLAHOMA.

H. A. Crawford, Temple.
James M. Keys, Pryor.
R. L. Lunsford, jr., Cleveland.
T. C. Shacklett, Yukon.

OREGON.

Henry D. Reed, Gold Hill.

PENNSYLVANIA.

John T. Brew, Erie.
Paul O. Brosius, Lock Haven.
Charles S. Duncan, Gettysburg.
John J. McAllister, Bryn Mawr.

PORTO RICO.

Rodulfo Blanco, Rio Piedras.

SOUTH DAKOTA.

John C. Borcherding, Presho.
Charles P. Dahlen, Oldham.
Harry Donovan, Heckla.
M. K. Nolan, Winner.
C. H. Peckham, Alexandria.

TEXAS.

R. C. Dial, Greenville.
J. N. Fallis, Clifton.
C. A. Lawler, Jacksonville.
A. J. Page, Como.
F. T. Roche, Georgetown.
L. V. Vanek, Lagrange.

UTAH.

Samuel W. Hendricks, Richmond.

WASHINGTON.

J. W. Shaw, Vancouver.

WEST VIRGINIA.

Walter A. Ervin, Petersburg.
W. S. Wray, Northfork.

HOUSE OF REPRESENTATIVES.

MONDAY, *April 27, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord, God of hosts, let Thy spirit come mightily upon us as a people, especially upon all those who are in authority, that the affairs of State may be wisely and amicably adjusted, that strife may cease, and the terrible effects which must follow in the wake of war be avoided.

Hear us when we pray for the families who have already been bereft of their dear ones and those who are in anxiety for the wounded and their sons who are at the front exposed to the dangers which threaten them. May the good offices of those who have intervened in behalf of peace be received in good faith by all concerned, that peace may once more reign supreme with us and all peoples. In the spirit of Christ, the Lord. Amen.

The Journal of the proceedings of Saturday was read and approved.

RANDOLPH SUMMERLIN.

Mr. WALKER. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes.

The SPEAKER. The gentleman from Georgia asks unanimous consent to address the House for 10 minutes. Is there objection?

Mr. MONDELL. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Georgia on what subject?

Mr. WALKER. I desire to pay a tribute to young Summerlin, who lived in my State and district and was killed at Vera Cruz last week.

Mr. MONDELL. I think there will be no objection on this side.

Mr. WALKER. Mr. Speaker, I desire to pay tribute to the bravery, valor, and heroism of Randolph Summerlin, of Willacoochee, Coffee County, Ga., who on Friday last gave up his promising young life in defense of his country and his country's cause.

Georgia mourns to-day the death of her brave and heroic son; but in her unswerving loyalty and consecrated devotion to our common flag she finds consolation in the reassuring thought that among the young American patriots who have so far given their lives in Mexico she has made a generous contribution in the defense of our country's flag and the national honor of our glorious Republic.

As a member of the Committee on Foreign Affairs I have favored and counseled peace. I had fervently wished and hoped that the heretofore peaceful and friendly relations which have so long existed between this Government and our sister Republic might be maintained and preserved.

I have at all times deeply sympathized and been in perfect accord with the policies of the President of the United States in treating with the many delicate situations that have arisen and confronted him from time to time in dealing with Mexico. The wisdom of his policies I yet approve. His able statesmanship, his sincere desire, his devoted and patriotic service as the President of this Republic, none can question. Mr. Speaker, I shall yet hope for peace in Mexico, although the war clouds, which they seem to invite, are gathering thick and fast about the heads of this unfortunate and unhappy people. Whether or not it may be possible to mediate our differences, as now proposed, with Mexico I shall not at this time undertake to discuss. That we have accepted, however, the generous offer of the three South American Republics to mediate our differences upon a friendly basis is at this time and under existing conditions more convincing proof before the nations of the world that our honest purpose and most sincere desire is for peace. I am for peace, so long as it may be honorable to ask for peace; but if the price of peace in the present crisis with the mad and distracted Huerta is to condone open, flagrant, and studied insult to our flag and uniform; if the assurance of peace is to be purchased at the cost of sacrificing our national honor, then, Mr. Speaker, I am no longer for peace [applause], but I shall then take my place among the countless number of American citizens and patriots in defense of our flag, our uniform, and our national honor, who are ready and willing, if needs be, to share the glory, the honor, and renown of the 17 young American heroes who lie dead at Vera Cruz. [Applause.]

Private Randolph Summerlin, of the battleship *Vermont*, whose people are my constituents and personal friends, was but a few hours ago in the vigor of splendid young manhood, buoyant and full of hope. His proud spirit rests to-day in the bosom of the

Master. He sleeps in the tranquil and quiet peace of heroic duty done. In the tender love and affection of his comrades his generous and beautiful sacrifice shall be cherished. His devotion to duty, his bravery, and his courage will inspire in the hearts of his countrymen a greater national zeal, a loftier and a more exalted patriotism, while his splendid heroism shall live and be perpetuated in the admiration and devotion of a liberty-loving and a patriotic people. [Applause.]

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. WATSON for four days, on account of important business.

PERE MARQUETTE RAILROAD.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to extend some remarks in the RECORD on House resolution 409, relating to the Pere Marquette Railroad.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

TAXATION OF REAL ESTATE IN THE DISTRICT OF COLUMBIA.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of business relating to the District of Columbia.

The SPEAKER. The gentleman from Kentucky moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of legislation pertaining to the District of Columbia.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. ADAIR in the chair.

Mr. JOHNSON of Kentucky. Mr. Chairman, when the District Committee last had the floor the bill H. R. 12873 was under consideration, and I now call it up.

The CHAIRMAN. The Clerk will read the title to the bill.

The Clerk read as follows:

A bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes.

Mr. JOHNSON of Kentucky. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispenced with.

The CHAIRMAN. The gentleman asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. JOHNSON of Kentucky. I reserve the balance of my time.

Mr. BORLAND. Mr. Chairman, I am glad to see that the discussion which has occupied the attention of this House at intervals for the last four or five years and with an increasing degree of interest on the part of Members, has finally crystallized into some definite form of legislation. My service on the District Committee in the Sixty-first Congress convinced me, as it has convinced a great many other men of both parties who have served on that committee, that the fiscal relations between the Federal Government and the District of Columbia are radically wrong; that there is in the District of Columbia an exemption of private property from taxation such as would not be tolerated from any other American community. The only object now to be attained is that those of us who believe that that condition of affairs exists in the District of Columbia agree upon some method of reform.

I had nothing to do with the preparation of this bill. I have no reason to doubt the reason and sagacity of the gentleman from New York [Mr. GEORGE], who prepared it, but I do know that unless this House agrees upon some reform in the fiscal relations of the District the existing tax abuses will continue, and the only result of the disagreement among the Members of this House on the subject of the remedy will be to perpetuate the continuation of the tax exemptions of special privileges and abuses which have been shown.

This subject has been thoroughly elucidated by the gentleman from Iowa [Mr. PROUTY], and from his map he has shown that the levy in the District of Columbia, which is a tax of 15 mills, is lower than that of the average levy in the cities of the United States of similar size. The District of Columbia is not overtaxed, so that even the small home owner in the District of Columbia has nothing to fear from the action of Congress. In my judgment, the small home owner of the District of Columbia, who pays 15 mills on two-thirds of the valuation of his property, and included in that 15 mills is all of the expense of the Government which he must bear, has no reason to complain as against the small home owner in other parts of the United States.

It is true that many of these men here are Government employees, civil-service employees, who have bought their own homes and, I assume, are paying for them at some hardship and self-sacrifice. But that identical situation is true in every city in the United States.

The civil-service employees of the District of Columbia represent but a small fraction of the civil-service employees of the Union. A large percentage of them—over 90 per cent of them, probably—are in other cities of the United States, cities like Boston, Chicago, Kansas City, Baltimore, Philadelphia, and San Francisco, all of them containing civil-service employees that are on the same basis as the civil-service employees in this city are.

Mr. MURRAY of Massachusetts. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. MURRAY of Massachusetts. Has the gentleman compiled any statistics in regard to the distribution of civil-service employees in the United States? I would like to have them incorporated in the RECORD, because I have frequent requests for them.

Mr. BORLAND. No; I have not; but I think it will be conceded that by far the greater number are in the larger cities of the United States.

Mr. MURRAY of Massachusetts. Oh, yes; but I wondered if the gentleman had any accurate information about it.

Mr. BORLAND. I have not. The point I want to make is that the civil-service employees in the larger cities of the United States who desire to do what the civil-service employees are said to be doing here—that is, to buy their own homes and pay for them on the installment plan out of their earnings—are confronted with higher rates of taxation. Why? Because they must support their local city, county, and State governments. The civil-service employee owes that duty to the Government as a citizen, and he performs it, and is willing to perform it. So the civil-service employee here is in no special class.

There is no reason why the fact, if it were true, that the majority of the home owners in the District of Columbia are civil-service employees should alter the situation at all. The question simply is to place those men upon a fairly equal and uniform basis with the civil-service employees in other cities of like size, so that the comparison still remains good, as made by the gentleman from Iowa [Mr. PROUTY]. If the average rate in the District of Columbia is lower, considering the rate of assessment and levy, than in other cities of like size, then it follows that the small home owner in this city has no reason to complain. No hardship has ever been visited upon him, nor will be visited upon him. But the evil is not there. We are not confronted with any complaints from the civil-service employees, nor are we confronted with any complaints from the small home owner in the District of Columbia. What we are confronted with is the fake, the sham opposition by the great landowners and the real estate speculators of the District of Columbia, by the bankers and the exploiters of the civil-service employees of the District of Columbia, who are sheltering their own tax abuses behind the name of the civil-service employees. This investigation by the George committee exposed that condition with relentless definiteness and publicity. It showed that the large home owners and the speculators who have owned vacant land, being improved and brought in for the purpose of being sold for small homes, are enjoying a lower rate of assessment than that of the small home owners. That is exactly where the difficulty comes in reforming the tax system of this city. It is the big fellow that makes the holler. It is the big fellow that brings the pressure to bear; it is the big fellow who holds the meetings. It is the big fellow who agitates through the press; it is the big fellow who will be made to walk up and pay his share if this bill becomes a law. That is the whole sum and substance of it.

Under the peculiar arrangement of the District of Columbia, where all of the public improvements are paid out of the general fund, it is possible, and, in my judgment, not only possible, but has been customary in the past, to so conduct those special improvements, such as paving, street lighting, curbing, sidewalks, trees, ornamental grounds, and so forth, as to gradually bring into the market large tracts of lands which were enjoying a comparatively low rate of assessment, because they were acreage property, unplatted, and as soon as by the contribution of the small home owners of the District of Columbia and the contribution of the Federal Treasury, public improvements have been carried out and around those tracts of land, they were immediately put on the market, and the price then went to a fancy residential price. Those improvements are made largely without cost or expense to the speculator. Out of that evil has grown most of the complaints of the management of the District of Columbia.

Not very long ago one of the commissioners of the District, Mr. Newman, showed me a statement, compiled during the last four years of the administration of the District, in which it appeared that in every case more than 50 and in some cases more than 60 per cent of the public improvements have gone into one section of the city, and in other sections they run down as low as 12 per cent of the total cost of public improvements. He showed me this in justification of his own change of administration, for the point he was making was that in his allotment of money for the year 1914 he had equalized it, and that the four districts—north, south, east, and west—were getting approximately equal expenditure of public funds under his administration.

Mr. MADDEN. Mr. Chairman, do the District Commissioners have anything to do with equalizing it? I thought Congress did that.

Mr. BORLAND. No; the commissioners do it.

Mr. MADDEN. The Committee on Appropriations does that. I served on that committee for four years, and we always decided just what the allotment would be and where it would be expended.

Mr. BORLAND. Did the gentleman ever figure out where those allotments went in the different portions of the district?

Mr. MADDEN. I did, and I went over every street in the district before I decided what I would vote for, and so did every other member of the committee.

Mr. BORLAND. And is it true that you put three-fourths of them in some cases in one particular part of the city?

Mr. MADDEN. Not at all. We put them wherever they were needed.

Mr. BORLAND. But the record shows that to be the fact.

Mr. MADDEN. They were placed wherever they were needed.

Mr. BORLAND. I assume that that was done upon the recommendation of the commissioners and not upon the recommendation of the committee? In other words, it was the adoption by the committee of the recommendations of the commissioners.

Mr. MADDEN. The commissioners would make suggestions and then the committee decided, after investigations, which of the suggestions would be adopted.

Mr. BORLAND. Certainly. That is the way we proceed.

Mr. MADDEN. If there is no improvement needed on A Street SE., there will be no money expended upon that, or if there was an improvement needed on A Street NW. the money would be expended there.

Mr. BORLAND. In other words, the gentleman would have no idea where the improvements ought to be initiated except the recommendation of the commissioners?

Mr. MADDEN. Of course they did that.

Mr. BORLAND. The gentleman has never added anything in the Southeast which the commissioners did not recommend?

Mr. MADDEN. Yes; I think we did.

Mr. BORLAND. Although he has sometimes taken away things in the Northwest which the commissioners did recommend?

Mr. MADDEN. I think we did in every case.

Mr. BORLAND. So that the basis of the allotment was the recommendation of the commissioners?

Mr. MADDEN. Of course, they had the data on which we acted.

Mr. BORLAND. Mr. Chairman, I want to say this: That the dissatisfaction among the small home owners in the District of Columbia has probably arisen out of that condition of affairs. It has not arisen out of the fact that they are paying more taxes than they believe their property ought to be assessed for; that is, that the rate or levy of 15 mills is too high. As a matter of fact, the levy of 15 mills in the District of Columbia is fairly moderate and economic.

In many cities of the United States of the same size the levy runs higher than that even where it includes special improvements; but in all cities of the United States the city levy does not include the State and many other expenses of the Government. Now, a few cities like St. Louis include the county government, but in most of the cities of the Union it does not even include the county government. In my city it does not include the school tax, the parks, or special assessments for sewers, sidewalks, and improvement of streets. Now, just one brief comparison on that proposition to show the city of Washington is not and never has been overassessed: Here in the city of Washington we raise $7,000,000 on approximately 350,000 people. Uncle Sam contributes $7,000,000, if we were to expend all the commissioners estimate for us to spend.

In my city of 250,000 people we raise $2,700,000—what we call the general fund. That is equivalent to the general fund of the District here. That costs us 12½ mills on the dollar. Then we raise $1,400,000 for school taxes that here are included in the District general fund. We raise $1,250,000 for special improvements, sewers, sidewalks, pavements, opening, grading, and widening streets, and so forth, and we raise nearly $600,000 more for parks and boulevard extensions and maintenance, and we raise our excise taxes in addition. We raise $6,000,000 for city purposes off of 250,000, but here they raise $7,000,000 off of 350,000 people. But the comparison does not stop there. We raise for county and State purposes $3,000,000 more; so we raise $9,000,000 off of 250,000 people, and they raise $7,000,000 off of 350,000 people. Now, that is a fair comparison. The reason I say that is a fair comparison is that the city of Kansas City is one where the tax rate is so low it is not even on this Prouty list. I have taken a city of lower rate of taxation than the average in the United States and have compared it with the District of Columbia. But the difficulty has been, gentlemen, not that the tax rate of the District of Columbia was too high, but it was not fairly distributed on the wealth of the District. There is ample taxable wealth in the District of Columbia, but it has escaped taxation. There are two classes of wealth that have escaped taxation, and both of them, I think, are caught by this particular legislation. One is the underassessment of the large holdings. That is an evil that we ought not to permit to exist in the District of Columbia. I am satisfied we would not permit to exist in our home cities the underassessment of men who hold handsome homes and the underassessment of men who are holding vacant property for speculation. Those two things, as developed in the report, are unjustifiable and indefensible, and they should not exist in the National Capital. The National Capital should levy the same rate of taxation, approximately, on private property that is levied in any other city of its size.

If it levies more it might be said to be an injustice, although in comparison with the greater benefit which property owners here enjoy the injustice might be more apparent than real. If it is less, it is certainly a very gross injustice to the people who are contributing to the support of the National Capital. Not only that, but it is demoralizing to the people of the District of Columbia. We ought not to permit private property to be underassessed in the District of Columbia, especially if it be held for speculative purposes.

Mr. MOORE. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. MOORE. One of the things I can not quite understand is why this property is underassessed. Does that rest with the assessor? Is it a matter of discretion with him?

Mr. BORLAND. That matter was very fully covered by Judge PROUTY in his opening speech on this matter, and I think it is also very fully covered in the George report. It was intimated here on the floor very strongly, and I can only give what was intimated, that certain individuals in the District here allied together, allied with these speculative enterprises engaged in exploiting the Government clerks by selling them homes on the installment plan, were enabled in some way or other to keep down their assessment, but that the assessment was not kept down on the individual who owned a $4,000 or a $5,000 home. He had no access to any source of information, and he just simply took what was handed him, and the other fellows busied themselves in seeing that their assesment was lowered.

Mr. MOORE. Would that not still be subject to the discretion of the assessor, or to the judgment of the board, no matter how you changed the law?

Mr. BORLAND. I do not see how we can avoid having that difficulty to contend with.

Mr. MOORE. I am very much interested in what the gentleman says, and I would like to know whether by law we can either regulate this unfair assessment or this so-called undervaluation unless we can get at the method of assessment. The existing law, apparently, does not control the discretion of the assessor, and I wondered whether the proposed law would prevent the unfair influences to which the gentleman referred.

Mr. BORLAND. Now, the purpose of this law is to make the assessment at the real value. The real value of property is generally disclosed when you come to sell it, and it is disclosed sometimes when you put it in condemnation proceeding. Here is an article that appeared in yesterday's paper, in which the statement is made about the sale of the property occupied by Engel's saloon, on E Street, what is practically Pennsylvania Avenue. It was sold for $100,000, subject to a seven-year lease of Mr. Engel. I assume the property is underimproved, as it is only a little bit of a building there, but it is a very valuable lot, only 23 feet wide. I assume that if the tenant did not have that seven-year lease it would have brought more than $100,000, because I think it is of great value to Mr. Engel to keep the saloon.

But it did bring $100,000. Now, the assessment on the property, which is only 23 feet wide, is $59,260. The ground is assessed at $15 a square foot, which is $55,260, and the building at $4,000, making a total of $59,260. The property sold for $100,000. That property is assessed at 59 per cent of its value. Another piece of business property sold last week for $100,000. I find it was assessed at $52,000, or 52 per cent of its value. Now, I presume the assessor, who is honest and capable, would be able to locate practically the value of these pieces.

Mr. MOORE. Just one more question. Suppose a railroad should come along in front of that property and the value of it should decrease while the present owner held it, would not the assessor still have a discretionary power to reduce the rate?

Mr. BORLAND. Oh, unquestionably.

Mr. MOORE. Suppose for some reason or other, after the value was fixed at $100,000, it would depreciate in value. How are we going to get at that?

Mr. BORLAND. This provides for a change like that.

Mr. MOORE. Would he have to appeal in the regular way and ask for a readjustment of the assessment? Some one may have purchased this property for $100,000, but in the course of a year something might come along that would depreciate the value of that property one-half. Would it be assessed continually at the rate of $100,000?

Mr. BORLAND. That is not so apt to happen, but I will tell you what is apt to happen: For this very piece of property, the paper says, the purchase price was $100,000. It was sold subject to a lease by Mr. Engel, which will expire in seven years. The property was owned by Julia Magee. An attempt was made to buy it five years ago, and Mrs. Magee placed a price of $35,000 on it, which was refused. To-day she has sold it for $100,000. Of course, we are going to readjust these values, I assure the gentleman from Pennsylvania——

Mr. MOORE. She started in at $35,000, and in five years it was sold for $100 000? Apparently it was worth $100,000 before it was sold. That value might have held for five years. There was still a discretion with the assessor, I submit, which the law does not cover.

Mr. BORLAND. Undoubtedly.

Mr. IGOE. Right in that connection I wish to say that both of the bills provide for annual assessment.

Mr. BORLAND. It provides for annual assessment instead of a triennial assessment, as I understood it was before. The sale of the Engel property ought to fix the assessment for a considerable area on E street.

Mr. LINTHICUM. I would like to ask the gentleman if he were an assessor assessing this property how would he get at the value of that property?

Mr. BORLAND. I would get at it in the same way as if you were selling real estate. If you and I owned the property next to Mr. Engel, of the same availability, we would hold it at the same price. We are business men and would not sell our property for less than $100,000.

Mr. MOORE. If the gentleman will permit, I presume Mr. Engel has a saloon and a license. It is a valuable piece of property. Suppose a man next door occupies a residence, or perhaps a blacksmith shop, out of which he makes very little or nothing. Are you going to levy taxes on that property at the same rate you assess against Mr. Engel?

Mr. BORLAND. The gentleman knows it is the potential value of property that fixes its value.

Mr. MOORE. The gentleman says if he owned the property next door he would value it at the same price. He would be unfair to himself.

Mr. BORLAND. The fact that a man does not produce its whole value——

Mr. MOORE. A hotel with a growing business, assessed at $100,000, might depreciate the value of the residence next door. It would not be fair to assess it at the same price.

Mr. BORLAND. The gentleman is radically wrong about that.

Mr. MOORE. I think, in practical experience, that if you owned the property next door you would find the saloon in the nature of a nuisance, and you would have difficulty in renting your property for residential purposes. It would be impossible for you to get the price which the man who owned the saloon could get for his.

Mr. BORLAND. The gentleman is wrong about that.

Mr. MOORE. You can apply it to a store or other business as well as to a hotel next door.

Mr. BORLAND. The saloon license does not run with the land, and therefore, if the land was worth $100,000, had a potential value of $100,000, the property next door would approximately have a value of $100,000, regardless of what you used it for.

Mr. MOORE. There is one way the gentleman could sell his property next door, and that would be in the event that a man wanted a large frontage on which to erect a building; in that case the gentleman might be able to hold out against a possible purchaser and get a large price for it, but it would be accidental.

Mr. BORLAND. The gentleman is radically wrong if he thinks the accidental use of property determines its value.

Mr. MOORE. I think this: I think you could find hundreds of cases in this community where corner property is held at a large price, and that the next door property is affected detrimentally by the nature of the business conducted in the corner property. Unless some one comes along and wants enough frontage to take in the next door property it is sometimes difficult to dispose of it. In that event you could hold out until you got a better price.

Mr. BORLAND. The difference between a corner and an inside lot is not involved in this case, because these are inside lots.

Mr. LINTHICUM. I want to say to the gentleman that I have in mind the case of a lot in Baltimore city which was not worth more than $50,000, but it was located right next to a hotel that wanted the lot, and the owner of it got about $140,000 for the property because it was in a location where the hotel had to have it. I have in mind another lot which was adjoining a department store, and the people paid much more than $100,000 for it when it would not have brought over $60,000 otherwise, because it was in a particular location where a department store had to have more room.

Mr. BORLAND. These cases frequently happen where a hotel or something of that kind wants a particular lot and is willing to pay a fancy price for it. And there are cases which happen where property, such as soap factories, has depreciated other property in the neighborhood. Those things have to be adjusted, and you can not make a law to fit individual cases, but as a general principle the sale value of the property adjoining is the potential value of the property.

Mr. CLINE. These isolated cases do not fix the value of the property.

Mr. BORLAND. No——

Mr. CLINE. I would like to ask the gentleman a question. Is there a board of review in the District of Columbia that reexamines and reassesses property in cases where people make complaint?

Mr. BORLAND. Yes. They send out a notice if any change is made in the assessment.

Mr. CLINE. Is that constituted of different persons from the persons composing the board of assessment; that is different persons make up the board of review?

Mr. BORLAND. It was different under the old law. I do not know whether it is under this law or not.

Mr. CLINE. I know that is the rule generally.

Mr. BORLAND. I will say to the gentleman that there is a board of equalization provided for here in section 8 and a board of appeals, too.

Mr. CLINE. How does that board get its existence? Who appoints it?

Mr. BORLAND. I will ask the gentleman from Missouri [Mr. IGOE] to answer that question.

Mr. MADDEN. They are the same men.

Mr. IGOE. It is composed of the two assessors who are not members of the board that actually assess the property.

Mr. CLINE. They are the same parties who originally fix the values?

Mr. IGOE. No; they are not. They are detailed especially for this work on the board of appeals.

Mr. CLINE. As I understand it, then, they are a sort of court en banc to readjust the values fixed by those who are detailed to go out and make the assessment?

Mr. IGOE. The assistant assessors go out and report the value, then that is passed upon by a board of equalization composed of a number of assistant assessors, and then there is an appeal to the board of appeals.

Mr. BROWNING. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from New Jersey?

Mr. BORLAND. I do.

Mr. BROWNING. I would like to know if the gentleman thinks that anyone else would have given $100,000 for that property which the gentleman mentions, except the man that bought it?

Mr. BORLAND. Yes; I think so. I realize that it was next to the holdings of the purchaser and that he might have had a special reason for buying; but as a matter of fact most people buy because they have a special reason or want to make a

speculation. But I think that property which the gentleman refers to is fairly worth $100,000.

Mr. BROWNING. I do not think anyone would have given $100,000 except the Munsey people, who wanted to increase the size of their building.

Mr. BORLAND. I think the land could be made to pay the full interest on the $100,000 by better improvements. I do not know what rent Mr. Engel paid, but he would not have to make a great deal of money in order to make it pay the interest on that investment. Five hundred dollars a month is not a great deal for a store in that vicinity, and I have no doubt he may pay somewhere in that neighborhood.

But that is not the main reasoning here. This underassessment that has been going on here has applied to large holdings and to speculative property, and has not applied to the same extent, in my judgment, to business property. I believe the business property in the District of Columbia has been assessed more nearly at the rate required—that is, two-thirds of the real value—than the speculative holdings or the handsome homes. I think that the chief beneficiaries under this system have been the speculative holdings. They always have the benefit of the doubt.

But there is another evil to be corrected by this law—an evil that the Congress of the United States should not tolerate in the National Capital—the evil of exemption from taxation, an exemption from taxation of property in the hands of those least entitled to an exemption, and that is the exemption of intangible personal property. That exemption is a plain violation of this half-and-half principle or organic law of 1878.

I want to call your attention to that. I want to emphasize it. What these gentlemen have so often contended as the inviolable, sacred act of 1878 has been violated for 30 years in the District of Columbia, and violated in the interest of a privileged class. If that law ever was a compact between the people of the United States and the people of the District of Columbia, it has been shamelessly violated for 30 years. But I deny that it was ever a compact. I deny that the District of Columbia, or any set of men in it, are a set of foreigners or a foreign nation; that we must make a treaty with them, and that we are bound by that treaty and can not violate it without mutual consent. That is the greatest legal absurdity that I have ever heard of—that this act of 1878, which was intended to put the District on its feet, when it was down in the dust, was a solemn compact between the two parties, a compact that could not be violated without the consent of both. That is a perfect legal absurdity.

But it has been violated. That is the point. When that law was passed it provided that a tax of 15 mills should be levied upon all property in the District of Columbia, all real property, and all personal property not taxable elsewhere. That is the express law of 1878—"all personal property not taxable elsewhere." But when Congress passed the law providing for the machinery for the collection of taxes on personal property, somebody slipped in the word "tangible," and made it read so that the assessors should collect evidence only of tangible personal property. That word "tangible" is not in the law of 1878. It is in the law of 1881, and that struck out of that law the words "not taxable elsewhere." The result is that the assessor can make only a list of tangible personal property.

Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BORLAND. Yes.

Mr. JOHNSON of Kentucky. I understood the gentleman to say that the word "intangible" was left out of the act of 1881. The word "intangible" was left out of the act of 1902, according to my recollection.

Mr. BORLAND. My recollection is that it was left out of the act in 1881. The gentleman says it was in the act of 1902. He is doubtless correct. Who did that I do not know. But I know what the effect of it was. The effect of it was simply this: That the little merchant in the District of Columbia pays on his stock of goods, because it is tangible property. The little home owner would pay on his furniture, if it were not under the exemption limit, because it is tangible property. The man with his team and wagon on the street pays on his team and wagon, because they are tangible. But the man with stocks and bonds does not pay a penny to the support of the District of Columbia or the Federal Government, because it is intangible property, and no machinery is provided for its collection.

Mr. MOORE. Why is it intangible?

Mr. BORLAND. Oh, I am like a gentleman down in my State; I can not give the gentleman a college education all in one morning. [Laughter.]

Mr. MOORE. A certificate of stock is tangible, is it not?

Mr. BORLAND. The paper is tangible, of course, but the right that it represents to collect some money is not tangible.

Mr. MOORE. Not being a lawyer and, perhaps, being at fault in my interpretation of the word, I would like to know from the gentleman whether any court here has ever ruled on that question.

Mr. BORLAND. There is a difference between a thing in possession and a chose in action. A thing in possession is the watch in my pocket, but a chose in action is the ticket by which I can get the watch from the pawnbroker. A piece of paper which gives you a right to something is intangible property.

Mr. MOORE. I have heard complaints that jewelry is nonassessable in the District of Columbia. Is that tangible property or intangible property?

Mr. BORLAND. It is tangible property if a man has it.

Mr. MOORE. If you have a watch in your pocket, that would be tangible property.

Mr. BORLAND. Oh, yes; the distinction is clear.

Mr. MOORE. I want to find out whether the assessor is at fault or whether it is the law.

Mr. BORLAND. It is not within the assessor's discretion. The law says that in sending out lists for return he shall ask for a return of tangible personal property.

Mr. MOORE. Take the illustration used the other day by the gentleman from Iowa, Judge PROUTY, of the lady who wears so many diamonds besparkling her hands and her bosom while abroad, and who, when she comes back to the United States, makes no return of them. Would that be tangible property which the assessor could find?

Mr. BORLAND. Yes.

Mr. MOORE. Why does he not find them?

Mr. BORLAND. I do not know.

Mr. MOORE. Is any more law necessary for that?

Mr. BORLAND. No; not if he can find them.

Mr. PROUTY. Will the gentleman from Missouri yield?

Mr. BORLAND. Yes.

Mr. PROUTY. I wish to call the attention of both gentlemen to the fact that the law of 1902, the law that exempted intangible property, expressly exempted jewelry and articles of personal adornment.

Mr. MOORE. Then it is no longer a matter of discretion. That answers the question.

Mr. PROUTY. But that law has been changed since, although the effect of it has not been changed, because they never have put a single item on the list.

Mr. IGOE. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. IGOE. I want to say that the illustration so vividly given by Judge PROUTY I think is not good, because the exemption of articles of personal adornment has been repealed.

Mr. BORLAND. That is a matter which, if it had not been expressly exempted by statute, would be within the classification of tangible personal property. The intangible personal property applies to rights, credits, and securities, paper founded on debt, which give you the right to collect money when you have not got the money. It is the basis of invested fortunes. This is the shape in which people intending to live on an accumulated income, when they want to leave the active business to others, put their property. They put it in the form of an investment in intangible property. When they want to do something by their own skill and activity they put their wealth in the form of tangible property, like farms, droves of live stock, stocks of goods, manufactories, all of which is tangible. There the man is an active agent and helps build up the community. But the minute he puts his property in intangible shape, so as to live off the earnings of investments, he is living exclusively off the activity of others.

Mr. COADY. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. COADY. Does not he contribute it to the building of railroads and other public improvements?

Mr. BORLAND. That is one of the deepest economic questions to be considered; I do not think that he does.

Mr. COADY. Where would they get the money from if it was not from these people?

Mr. BORLAND. The money never would be in that shape if somebody had not earned it and put it into that shape. It is the activity of the wage earner and the toiler, men active in business, with brain and brawn, that makes the wealth, and when it is put into intangible property the great mass of the people, the active workers, make it valuable, and all the man does who owns it is to clip the coupons.

Mr. COADY. Can the gentleman suggest any other way?

Mr. BORLAND. No; I am not here in this brief time to argue that great economic question, but I am here to say that that form of wealth ought to pay its share of taxation for the protection which it enjoys.

Mr. LINTHICUM. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. LINTHICUM. What would be the gentleman's idea of the share of taxation on stock and bonds?

Mr. BORLAND. The same share as anybody else pays.

Mr. LINTHICUM. Would the gentleman advocate paying 15 mills on a 4 per cent bond?

Mr. BORLAND. Certainly; the owner is not under any obligation to take a 4 per cent bond.

Mr. LINTHICUM. What is the difference between going into a partnership in a large business and dividing profits and going into a corporation and investing the money and receiving stock as evidence of the money invested? Why is not one as good as the other for the public?

Mr. BORLAND. What is valuable to the public is the fact that we put brain and muscle into the development of the business of the country and the production of wealth. If we do that, it does not make any difference in what form, whether it is a partnership or corporation or individual; what is valuable to the country is that we have added something to the national wealth. But if all the owner does is simply to clip his coupons and contribute nothing to the wealth, that is an entirely different matter.

Mr. LINTHICUM. To get back to the 4 per cent bond. Suppose I hold a 4 per cent bond in the United Railways of Baltimore. That money has gone into building the railroad, into building power houses, and so on, and these power houses and property are all taxed, and the railroad pays a franchise tax, a park tax, is not my money which is invested in that property taxed? Why should it pay another high tax at real estate rates which has not been and is not taxed more than once?

Mr. BORLAND. That is one of the widest questions that you can open up in the field of taxation, and for this reason: There are a lot of thinkers who contend that that is double taxation, that the men who own the railroad are paying a tax on its taxable property, and the man who owns the bond is paying a tax on the bond, and that therefore it is double taxation. Now you open up a field of discussion which sweeps the whole horizon of economics. But to get back to your question, I would say simply this, that the use which a man makes of his property is not the measure of his burdens for public purposes. If you make no use of your property, if you let your money lie in a safe-deposit vault, you ought to pay taxes on it. If you put it in a 2 per cent bond, if you put it in a 4 per cent bond, if you can get a 10 per cent bond for it, it is still the same, as far as the Government is concerned. The use that you make of your property is your business. The duty which you owe to the State that protects you in your ownership is a matter of law and not of judgment, and we can not make a law to fit what is your business judgment as to the return value of your property; that is, its earning value.

Mr. LINTHICUM. If you tax at the rate of 15 mills on the 4 per cent bonds, will one not refuse in future to buy any more 4 per cent bonds? Will not your company have to issue bonds bearing interest rate sufficient to cover that rate of taxation?

Mr. BORLAND. I have no doubt, if that condition of affairs came about, a great many street railway companies in Baltimore and in other places would not issue quite so many bonds. I have no doubt if every man who held one of these bonds was to pay the same rate of taxes that other people pay, there would be less watered stocks and bonds on the market.

Mr. LINTHICUM. As far as the street railways of my town are concerned, they are probably of more use to the public than any other street railways. The gentleman mentions a park tax. The street railways pay all the park tax, and we have some money left over; our people do not pay any park tax. The railway companies pay it from their earnings.

Mr. BORLAND. No; they do not pay any of the park tax. The man who rides on the street car pays every penny of it. The man who sends his little children to school, back and forth every day, pays your park taxes and pays the interest on your money invested in street railways. All earnings and taxes are paid by the strap holder and not by the bondholder.

Mr. COADY. Do I understand the gentleman to say that he favors taxation of all issues of stock in corporations at full city rates?

Mr. BORLAND. I think so.

Mr. COADY. He does not believe, then, in any classification?

Mr. BORLAND. No.

Mr. COADY. Is the gentleman, then, in favor of this Johnson-Prouty amendment, which makes some classification?

Mr. BORLAND. I would not say that no classification is possible. I am not clear in my own mind whether classification is possible or not; but I would be in favor prima facie of an equal rate of taxation. If I voted for any other proposition, my judgment would be overruled by the members of the committee.

Mr. COADY. Then, I take it from what the gentleman says, he is also favorable to the taxation of the savings-bank deposits of the poor, which yield them 3 per cent per annum. He is in favor of taxing them 1½ per cent. Is that the gentleman's position?

Mr. BORLAND. That is unquestionably the strongest point you have, but I do not see how we can discriminate in taxation. In fact, my State constitution says that taxation must be uniform, and I think that a great many State constitutions say that; and the fact that a savings-bank deposit is owned by a poor man and that the bond is owned by a rich man is no justification for discrimination. If a discrimination can be made upon the classification of property, whoever owns it, that may be a just discrimination; but your basis is that somebody who may be a poor man ought to be exempt is not a justification for that discrimination.

Mr. COADY. Does not the gentleman think the passage of this bill with this amendment would put the savings banks of Washington City and the District of Columbia out of business?

Mr. BORLAND. No; I do not think so.

Mr. COADY. Would it not drive the depositors here to take their money to Virginia and Maryland?

Mr. BORLAND. No; I do not think so.

Mr. COADY. You think, then, that the savings banks of this city and District could compete with the savings banks of Maryland and Virginia, whose rate of taxation is about one-third, and in the case of Virginia about one-seventh, what you propose to put on them here?

Mr. BORLAND. In the first place, I think the gentleman is wrong about his facts as to what the taxes are in these other places.

Mr. COADY. No; I beg the gentleman's pardon. I have the figures. I am sure about it.

Mr. BORLAND. And in the second place, I want to say that there is not any city in the United States, and I am not making an exception of New York City, that is so overbanked as the District of Columbia. I never saw so many banks for so few people in my life as in the District of Columbia. I have made an examination into that question in a cursory way in my brief career of five years here, and I have wondered how so many banks could exist in the District of Columbia. There is not here the manufacturing business or the shipment of live stock or grain, or the great shipping interests of a city like Baltimore; and there are no great mercantile interests.

The banks have not the business in the commercial paper of men who are engaged in business that other cities have, and yet this town is just literally dotted with banks. Now, if a few of these banks went out of existence, I can not conceive that the people of Washington would suffer materially, for they would still have all the banking facilities they need. I think that the presence of so many banks in the District of Columbia is just another evidence of this tax exemption. I think the fact that there are so many banks in the District, and such large and prosperous banks, and everybody here seemingly connected with banks, is simply another evidence that there is tax exemption going on here that does not exist in other cities.

Mr. COADY. In the gentleman's own State intangible property is taxed at the full rate, is it?

Mr. BORLAND. No; it is taxed at 50 per cent.

Mr. COADY. In the gentleman's own State?

Mr. BORLAND. Yes.

Mr. COADY. Then the gentleman is one of those who want to impose upon the people of this District a tax three or four times as large as that paid in his own State, like my friend from Iowa [Mr. PROUTY]?

Mr. BORLAND. No; I am not one of those gentleman. I think I made it clear at the beginning that I think the tax rate in the District of Columbia ought to fairly approximate the tax rate in other cities of like size.

Mr. COADY. Is not the tax rate here in the District now about one dollar and a half?

Mr. BORLAND. Yes.

Mr. COADY. If we include intangible personal property, will not that make the security holders pay a dollar and a half on their securities?

Mr. BORLAND. They ought to make the security holders pay a dollar and half on their securities.

Mr. COADY. Is not that three times the amount paid in the gentleman's own city?

Mr. BORLAND. No.

Mr. COADY. Did not the gentleman say that his own city charged 50 cents?

Mr. BORLAND. But our assessment is not limited to 15 mills. Our assessment runs nearer 30 mills.

Mr. COADY. But I am speaking if the rate?

Mr. BORLAND. The gentleman is making the same mistake that others make.

Mr. COADY. I think the gentleman must misunderstand me or I must misunderstand him. I am speaking about the rate of taxation. Is not the rate of taxation in the gentleman's city the same on all classes of property?

Mr. BORLAND. Yes.

Mr. COADY. In other words, there is no classification?

Mr. BORLAND. That is true. Our constitution requires that taxes be uniform.

Mr. COADY. Does the gentleman know under that system of taxation how much intangible personal property you have on the tax books in the State of Missouri?

Mr. BORLAND. No; but I know the rate in Kansas City is 12½ mills for city purposes. I know that for State, county, school, and special assessment it runs up close to 30 mills, and I know that the 50 per cent valuation in Kansas City would be the equivalent of 15 mills on the dollar here.

Mr. COADY. So the gentleman is unable to tell us how much intangible personal property there is on the tax books in the State of Missouri?

Mr. BORLAND. I can not.

Mr. COADY. Then the gentleman is not able to refute the statement that a large tax on securities drives securities out of the State?

Mr. BORLAND. No; but I am going to answer the gentleman more fully than he expects. Instead of driving securities out of the District, this tax exemption in the District of Columbia has brought securities here and has made the District of Columbia the great paradise for tax dodgers in the United States.

Mr. COADY. I agree with the gentleman that there are a great many people coming here, and I agree with the gentleman that we should tax them, but I do not agree with the gentleman that we should fix a rate that will drive them out of the District of Columbia.

Mr. BORLAND. The fixing of a rate is a matter of detail on which I think we could get together.

Mr. JOHNSON of Kentucky. Would the gentleman welcome them to his State of Maryland?

Mr. COADY. Yes.

Mr. JOHNSON of Kentucky. Why not let them go there?

Mr. SAUNDERS. Is the intangible personal property in Missouri assessed at its face value?

Mr. BORLAND. Fifty per cent of it; and as our levy runs nearly 30 mills for all purposes, it comes to about the same thing. I have no doubt that lots of personal property escapes taxation. That is one of the evils of taxation that we have never been able to remedy.

Mr. COADY. The gentleman recalls the figures I gave him for Maryland and Pennsylvania, showing the enormous increase in the taxable securities when the rate was reduced?

Mr. BORLAND. Mr. Chairman, I will ask the gentleman to put them in the RECORD. The District of Columbia has a uniform tax rate of 15 mills, and has had that for 30 years or more. That is a distinct advantage, and a very proper advantage. I wish all communities had a uniform rate of taxation, and that it never would be levied at any greater rate for special purposes. That will be of great advantage. The District of Columbia has had that advantage of a uniform levy of 15 mills. Other great cities have had a great many problems to solve that require the constant expenditure of more money. How would the District of Columbia solve such a problem? How does the city of Baltimore solve such a problem, the gentleman's own city?

That city has either to increase its bonded indebtedness to take care of great civic improvements by vote of the people, and possibly by vote of the legislature, or, if it has reached the limit of bonded indebtedness, then it must find some other way of financing these propositions. It must, perhaps, create special districts and levy an assessment on those special districts. I will give you an illustration of that in my own city. We have danger from two rivers in flood, the Kansas and the Missouri. We have created two special drainage districts, embracing the property liable to be affected by a flood. We have the power now to levy a special assessment on those districts to build levees and dykes. How would the District of Columbia solve that problem? I will tell you how they would solve it. They would solve it by making an overdraft on Uncle Sam, and that overdraft would be carried on the books of Uncle Sam year after year until the District got ready to pay it. There is not any country in the world that I know of where a municipality has the great privilege which the District of Columbia has of making practically an unlimited overdraft upon a boundless source of revenue and paying only interest upon its daily indebtedness. Yet the District of Columbia has done that for years—ever since I have been in Congress. When it had to move this depot down here—the Pennsylvania Station—and make all of those readjustments and tunnels, etc., it ran up a big floating indebtedness, and at that time one of the District Commissioners was strongly in favor of turning that debt into bonds—3.65 bonds. If he had, Uncle Sam would not only have had to pay back half of the debt but half of the interest as well. We would not let them do that. At that time there was a Republican of the most rigid honesty who was chairman of the subcommittee of the Appropriations Committee having in charge the District of Columbia—the gentleman from Michigan [Mr. Washington Gardner]—and he absolutely refused to permit the commissioners to turn the floating indebtedness into a bonded indebtedness, and he did a great service to the District and to the country when he refused to do that.

He refused to permit them to saddle about $7,000,000 upon Uncle Sam. Every great city has problems to meet, and they are great problems, heavy burdens upon its people, but they have to solve them alone. The District of Columbia alone can draw an overdraft on Uncle Sam and with that meet expenses. Even then we have difficulty in getting them to pay their overdraft. I think that is customary because people are always a little bit slow to pay overdrafts.

Mr. LINTHICUM. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. LINTHICUM. The gentleman speaks of the removal of the stations and construction of Union Station in this city. Now, if it had been the city of the gentleman or my city we could not have afforded to have that great station and its beautiful surroundings——

Mr. BORLAND. Yes; we have built one.

Mr. LINTHICUM. Yes; but the gentleman has not any such station in his city that compares with the one we have here in Washington. I have been to the gentleman's city and my recollection is it is an extremely poor one.

Mr. BORLAND. We are to open a new one this year.

Mr. LINTHICUM. I know that; but nothing like compared with this station here.

Mr. BORLAND. No; it is better than this.

Mr. LINTHICUM. Larger than this?

Mr. BORLAND. It is.

Mr. LINTHICUM. Well, it must be a new one, for a few years ago——

Mr. JOHNSON of Kentucky. I might add, if I may be permitted, that the Union Station just referred to in Kansas City had no Federal aid——

Mr. BORLAND. No.

Mr. JOHNSON of Kentucky (continuing). Whereas nearly $8,000,000 of the public money for the building of this Union Station was presented to the railroads who own it.

Mr. LINTHICUM. That is what I want to say. We built a station here, not only a station, but made it an ornament to the city of Washington.

Mr. BORLAND. So did we.

Mr. LINTHICUM. And surrounded it with parks.

Mr. BORLAND. So did we.

Mr. LINTHICUM. And under the terms on which that station was projected and built it was that it should have such ornamentation——

Mr. BORLAND. So did we.

Mr. LINTHICUM. But you had nothing to do like we did here in the way of streets, approaches, and so forth——

Mr. BORLAND. Oh, yes; we reached out into the city for our approaches for 8 miles.

Mr. IGOE. Who paid for that station, as a matter of fact?

Mr. BORLAND. We paid a great portion of the cost in the cost of readjusting the streets, parks, and so forth.

Mr. LINTHICUM. But the city did not pay for the station.

Mr. BORLAND. We paid no part of the station, of course, but we compelled the railroads when they received the franchise to agree to that. They could not go ahead until plans were submitted for the building and approved, and we only approved the plans when they conformed to the wish of the people.

Mr. LINTHICUM. Then you got a splendid station by compelling the railroads to do certain things?

Mr. BORLAND. By business ability. We said to the railroads, "We will give you this franchise if you will do what we desire." That was the way it was done. The point I am making is the District need not to have to issue bonds, need not to have to go into the market and try to sell them, need not to have

a special election at a considerable expense. It escapes all that expense that other cities must meet by simply drawing on Uncle Sam.

Mr. IGOE. Let me ask the gentleman a question, getting away from that phase of it. The original bill dealt with real estate. Does not the gentleman think, before we attempt to fix the rate of taxation of personal property, we should have a scientific investigation of the subject to ascertain what is fair and reasonable under modern conditions?

Mr. BORLAND. Well, I say to the gentleman I know he is one of the earnest advocates of reform in the District of Columbia, and has given probably a great deal of time and personal attention to the subject. I will say to him it is difficult to adjust equitably and approximately a fair tax upon personal property. My own idea is that this condition that allows escape of taxation is intolerable and indefensible, and ought not to be allowed to go on. I do not think we are in danger of doing much injustice. We are now doing a great injustice by allowing it to escape taxation——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, I would like to have about 10 minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that he may proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. IGOE. The gentleman stated that owners of personal property came to the District to escape taxation. Does the gentleman believe that under the rate of $1.50 they will stay here very long?

Mr. BORLAND. Yes; because I do not know where else they would go. Here is——

Mr. IGOE. They could go right over to Maryland, where they pay less.

Mr. BORLAND. I do not think, in discussing these matters, I have ever used a person's name, because that is against my habit and rule. I would not in this case if the matter was not a closed incident. However, now we are dealing with principles and not men, and I shall now use a name for the purpose of illustration. I would not in this case if it affected anybody now, or it would be likely to do so; but here is the Leiter fortune that is now being litigated in the courts of the District of Columbia between two foreign noblemen. Why is it now being litigated in the courts of the District of Columbia? Was that fortune produced in the District of Columbia? Why, no; it was produced in the States of Illinois, Minnesota, and elsewhere.

What became of it when it was produced in those States? Did it remain there for the purposes of taxation? No; it was turned into investment securities and was withdrawn from the State of Illinois, or wherever its situs was, and brought to the District of Columbia. Does Illinois pay its share to support the National Capital? Yes; she continues to pay it after losing that valuable wealth. But the District of Columbia gains the fortune. What becomes of it here? It remains untaxed; it escapes taxation. There is no tax upon that property at all, and yet its local situs is here. The people who are interested have so declared in their suit down here in the District court. These foreign noblemen are litigating over the control of that fortune in the courts of the District of Columbia, and yet that fortune was never produced in the District of Columbia, and I undertake to say it would not take very much investigation to show that the amount it contributed, directly or indirectly, to the support of the District or any other government would be trifling—practically negligible. That is a system of tax dodging that ought not to be permitted anywhere. Where else could that fortune go and enjoy such an exemption as that? The gentleman talks about a prohibitive rate; but would it stay in Illinois?

Mr. COADY. The gentleman has unwittingly made a mistake. I said that if we taxed it at this prohibitive rate. I am in favor of taxing intangibles at a fair rate.

Mr. BORLAND. Then we can get together on the details. He need not talk about a prohibitive rate, because I am not talking about a prohibitive rate. Where would the fortune go? If it would stay in Illinois, I am in favor of making it stay in Illinois. It was made in Illinois, by the energy of the people of that State, by the fertility of Illinois, by the progress and development of Illinois, and it should stay there. But it did not stay there. Now, if it can be made to stay there, I am in favor of it; and if we needed to put a prohibitive rate on the personal property in the District of Columbia and compel it to stay in Illinois, I will be in favor of that; but I do not——

Mr. PLATT. It might go to New York. We do not tax any of these things in New York.

Mr. BORLAND. The State of New York has one of the best systems of inheritance tax in the United States. The District of Columbia has no inheritance tax at all. Now, where would your fortune go in order to escape an inheritance tax? Would it go to New York? You have some of those New York fortunes here? Why did they come here?

Mr. PLATT. Not to escape New York taxation, surely.

Mr. BORLAND. Then we would gain nothing by sending them back to New York, but every fortune that remains in New York must pay a pretty large inheritance tax. The papers have announced some very large taxes collected on inheritances in the State of New York, but there have been none collected in the District of Columbia.

Mr. PLATT. But none of these estates are taxed in the State of New York so that you can notice it.

Mr. BORLAND. I consider that it is the solemn duty of Congress to see that untaxed wealth is taxed. I am satisfied if it were, instead of producing $7,000,000 as it does now, off of the small home owners and merchants, we would provide $12,000,000. I am satisfied that would be nearly enough, if not quite enough, to run the District of Columbia.

Mr. PAYNE. I want to ask the gentleman whether there is any provision for an inheritance tax in this bill? I have not discovered it.

Mr. BORLAND. No. There is no provision in this bill for an inheritance tax, but there is such a law before the District Committee, which, in my judgment, they will report out favorably. But the first thing to do is to get rid of the half-and-half plan, because as long as Uncle Sam must match every dollar that is raised by the District, then if you put on an inheritance tax and raised $2,000,000, you would have to raise $2,000,000 by taxation in the District. So the half-and-half principle is the bulwark against the reform in the District, and the very best principle in this bill is that it absolutely does away with the necessity for the half-and-half principle. If we raised in the District of Columbia here, on the private property in the District, the same rate of taxation that is raised by your constituents back home, or even a little less, there is no necessity for the half-and-half plan. It could approximately be what the people are paying back home, and private property in the District will not be unjustly treated, but will be able to contribute more than $11,000,000 to the support of the Federal Government.

Mr. GORMAN. Does the gentleman believe the Federal Government ought to contribute anything to the District treasury?

Mr. BORLAND. Yes; and I am liberal to the District in that. I want to look at the thing fairly. The District of Columbia is not only a National Capital, but primarily and exclusively a National Capital. We own the whole thing. Private property is here by our sufferance, and we owe it no duty except to not tax it out of existence. We owe it to ourselves to make it pay its fair share of taxation. It is our function to govern the District, but not without expense to private property. We contribute in many ways directly and indirectly to the support of the District. We have given them a great deal of beauty here that they would not otherwise have had or otherwise have paid for. But the Federal Government owes a larger duty than that, and it owes it on this account. The District will never be a manufacturing center or a wealth-producing district. It will never be a great wealth-producing district like some of our manufacturing cities. Congress would not tolerate for one minute the introduction on a large scale of manufacturing in the District. It would be to the disadvantage of everybody except a few real estate speculators. We have no facilities for taking care of them. They are not wanted here. There are plenty of places in the United States where the location would be much better and productive energy much better. The District of Columbia is a city of homes. It contains the homes of people directly or indirectly connected with the Federal Government. We owe it to them to keep up a better system of government than their system of taxation will justify. I do not think we will shirk that duty. I think we will keep up a better system of government than if the city were turned back to its own taxing power.

Mr. GORMAN. And if we could raise the taxes here to carry on the expenses of the District government without aid from the Federal Government, would the gentleman be in favor of that?

Mr. BORLAND. Yes; I would be. But that is only a problematic question. There are many real problems to be solved in the District.

Mr. GORMAN. I know; but it has been stated that if the property of the District, both real and personal, tangible and intangible, is assessed according to the provisions of the bill now before the House on the property mentioned there will not be any need for Federal aid. Does the gentleman favor the taxing of private property in the District of Columbia and

leaving the Federal Government exempt from the obligation of paying anything at all?

Mr. BORLAND. No; I do not. The Federal Government owns, according to the statement of the commissioners, $90,000,000 worth of real estate in the District of Columbia. Private property owners own $170,000,000 worth of real estate. That is the exact proportion. Now, we are large landowners for our business purposes. We carry on the business of the Federal Government here. We ought to contribute something, even on that sordid basis. But above and beyond that, I take it that we ought to solve problems here in the District of Columbia that lots of cities would like to solve, but can not for lack of means—solve the problem of sanitation, the problem of lighting and of policing, and the destruction of alley slums, the abolition of all possibility of slums, and so on. All of these things ought to be solved in the District of Columbia, because we have the taxable wealth in our power to-day to do it, and if we do not we are under a patent obligation to do it. We are better able to keep up a city government here than if we were to confine ourselves simply to the taxes contributed by the people of the District of Columbia alone. For the purpose of illustrating this I want to give somewhat in detail my views of the history and the relations of the District of Columbia to the United States.

I do not intend to discuss the intimate personal or local history of the District, nor to catalogue the various acts of Congress relating thereto, nor to present to you tedious statistics. I hope to take briefly a broad glance at the situation. The District of Columbia exists by virtue of the provision of the Federal Constitution giving Congress exclusive jurisdiction over a district not exceeding 10 miles square which shall be ceded to the United States for the purpose of the seat of government. The reason for this provision of the Federal Constitution is found in the early history of the Continental Congress and of Congress under the Articles of Confederation. The Federal Government in its infancy and in its feebleness found itself unable to command respect, maintain dignity, or even to protect its own peace and safety if required to meet in a city in some one of the States where the police authority and the maintenance of public order was entirely under the control of the local sovereignty. This was the compelling cause of the creation and establishment of the District of Columbia. It was desired that Congress should have exclusive jurisdiction over sufficient territory to establish in peace, dignity, and safety the National Capital and to protect the administration of the national power and the sessions of the National Legislature. Washington is not only primarily a National Capital, it is exclusively a National Capital. It belongs to the people of the Nation. It has been determined that no government can exist in the District of Columbia, no matter what its form may be, which is independent of the Federal Government. The District of Columbia is not, never has been, and never can be an organized political entity like a State, nor even a corporate political entity like a municipality with power to deal on a contractual basis with the Federal Government. I say this because it seems to be fashionable in discussing the affairs of the District to use the term "organic act" in referring to the act of 1878, and to talk of a solemn contract, as though some contractual relations existed between two relatively equal bodies which could not be violated or altered without the consent of both. The reference to any particular act of Congress creating or altering its relations to the District of Columbia as an organic act in the sense that word is used in creating a new entity in the system of States is a legal absurdity. Congress is charged not only with the right but with the duty to deal with the District from time to time as altered conditions may justify. It is absurd to talk of an act as though it were irrepealable and beyond the power of amendment, or as though it were a contract based upon some form of valuable consideration. The only restriction upon the power of Congress to deal with the District is that it shall not invade private property rights except within the well-defined limitations of the exercise of public power. Congress exercises all of the usual powers of taxation over the District which are exercised by States, through their municipalities or otherwise, over the property of private citizens. Congress has not relinquished, waived, nor bargained away any portion of its taxing power, and it has no moral right to exempt private property in the District, either real or personal, from the operation of laws imposing taxes which are usual and necessary in other portions of the United States.

Prior to 1874 the District enjoyed a territorial form of government, with a species of local autonomy. In 1874 this local government broke down. The policemen, firemen, and city employees were unpaid. The credit of the District was entirely exhausted, and at the same time the tax burden was very grievous. The physical appearance of Washington at that time must have been ludicrous, if we believe the account of Louisa M. Alcott. She described in detail the pigs she met on Pennsylvania Avenue and their individual traits and habits. I suppose the cows still fed in Lafayette Square at that time. The debt which had been incurred for public improvements was enormous, compared with the population of the city, and tangible results were scarcely apparent. Various reasons were given for this humiliating condition. It is said that the great number of ex-slaves who poured into Washington during and following the Civil War demoralized the local government and introduced an element of ignorance and corruption which made home rule impossible. This may be partially true, but the demoralizing effects of the Civil War were by no means confined to Washington. Hundreds of municipalities and scores of States were struggling with the unusual burdens and revolutionary changes of that period, and they were required to meet their problems unaided by the Federal Government. The truth is that all of the larger cities of the country were suffering from the era of extravagance and corruption which followed the Civil War. New York had its Tweed ring, which saddled it with an enormous public debt. Many of the cities throughout the country were burdened with public obligations recklessly imposed upon the people without adequate return. Private property was everywhere confiscated by the tax burdens to meet those obligations. Many of the cities were utterly unable to refund their public indebtedness at any rate of interest and public securities were considerably below par. Some American municipalities actually went out of existence as a means of avoiding this weight of obligations, which were wholly political and largely fraudulent. Washington, however, was fortunate in being the National Capital. It was imperative that a city government be maintained here of the best type and that it be done without the confiscation of private property. Law, order, and the usual functions of the local government must be carried on and paid for. Washington must not be permitted to suffer from the sins of its political rulers or even from its own sins, although other American municipalities could hope for no special relief. In 1874 the District was put in the hands of the receivers and its affairs were straightened out by Congress.

The Federal Government contributed by special appropriations as much as was needed to keep the District government running, and even to provide for the interest on the public debt. I will not stop at this time to discuss the honesty of this public debt nor whether the refunding of it was in the interest of the bondholders or in the interest of the people. I do not know whether the people who claimed to own the bonds paid 30 cents on the dollar for them or less, and I do not know how many private fortunes in the District or elsewhere began with the refunding of these bonds. It is utterly useless at this time to stir the depths of this stagnant pond when we can pluck the pond lily from the surface. The pond lily was the act of 1878 establishing a permanent government for the District of Columbia. From whatever stagnant depths of corruption it arose, it has proved to be a wonderful blessing to the District. Its liberality to the District is doubtless due to the utter financial and political prostration in which the District was then found. It is the wildest dream of the imagination to call it a solemn contract, as though it were a contract between two independent and competent parties. It imposed then and imposes now no obligations upon the Federal Government beyond the obligation contained in the Federal Constitution to provide a seat of government for the Federal power. The false note in all of this recent discussion has been to treat the interest of the property owners of the District as something entirely apart from the rights of other American citizens. The District was not created and is not governed in the interest of those who choose to buy real estate here.

The act of 1878 relieved the District from its embarrassments and removed a great load from private property. It prevented the confiscation of property by excessive taxation. It relieved the people of the District from the results of mismanagement. It refunded the public debt at the rate of 3.65 per cent interest. At that time no State or municipality in the Union could refund its public debt for less than 6 per cent, and in most cases, on account of the sale of the bonds below par, they were paying from 8 per cent to 10 per cent. For more than 30 years the District has enjoyed this low rate of interest. This would be a remarkable benefit even if the District had to pay all of the principal and interest, which is no more than all other American municipalities were compelled to do with indebtedness of this character. This result was achieved by placing the credit of the United States behind the bonds. It is now claimed that the United States not only guaranteed the bonds but jointly agreed to pay them.

If the technicalities are with the District in this matter, the people of the United States must submit, whatever may be the moral aspect of the question. The act of 1878 not only saved

the District at the time but has made possible its continuous growth and improvement. It has made it truly a National Capital. Congress has paid 50 per cent of the running expenses of the District, and, in addition thereto, it has spent a large amount of money in improving the District in various ways which is not charged against the District. These improvements are of a class that other cities would have to pay for themselves or look to the generosity of some patriotic citizen. The most striking of these is the park system. Congress has done so much for the District in addition to its contribution of one-half of the running expenses that it may be truly said that we found Washington of mud and left it of marble.

The act of 1878 provides that taxation in the District should be limited to 15 mills on all of the real property and upon all personal property not taxable elsewhere. This is a very moderate rate of taxation. It must be remembered that this rate covers all of the taxation paid by a property owner in the District. It includes what in other States throughout the Union would be divided into several additional assessments. It includes not only the general expenses of the District government but the school taxes, street improvements, special assessments, road taxes, and so forth, while in the other municipalities an additional tax for the support of the county and State is assessed.

The rate of assessment in the District of Columbia is 66⅔ per cent of the cash value. In other cities the rate of assessment runs from 33⅓ to 100 per cent, so that it requires some care to compare the tax rate in the District with the tax rate elsewhere, and it is very easy to make misleading figures. The statistics are available in a speech of Judge PROUTY, of Iowa, in Congress, and therefore I will not repeat them. It is sufficient to say that the cost of government per capita is higher than in any other city except New York and Boston, while the rate of taxation per dollar on property in the District is the lowest of any municipality of 100,000 or over, and the per capita wealth in Washington is the greatest of any city on the globe. Fifteen mills is the average taxation in American cities for city purposes alone, but this does not include the school tax and special improvements, such as street paving, and frequently does not include park taxes. In addition to this, the property owner in the average American city must pay county taxes and State taxes. The aggregate which he pays runs from 30 to 50 mills on the dollar. If the assessment of property were only half the assessment of property in the District of Columbia, he would in most cases pay more taxes, but the assessments probably average very close to the assessment of the District of Columbia.

Property in the District of Columbia is not overtaxed. I may illustrate by a comparison with my own city of Kansas City, Mo. That city raises approximately $6,000,000 for city purposes, including the general fund, schools, and public improvements, and it raises about $3,000,000 more for county and State purposes. Thus, this city, which is fairly moderate in its tax rate and has constructed one of the most beautiful park systems in the world, raises $9,000,000 from 250,000 people, while the city of Washington raises about $7,000,000 from 350,000 people. In the former city special improvements, such as street paving, are paid for by the abutting property owners, and this is an almost universal rule in American cities. The Supreme Court of the United States has declared that these improvements are special benefits which are not properly included in the general term "taxes."

The act of 1878 provided that there should be levied in the District of Columbia a tax of 15 mills on all real estate and all personal property not taxable elsewhere. It does not seem to be generally understood by the people of Washington that this act has been violated for 30 years in the interest of a privileged class. In the act of Congress providing the machinery for the assessment of personal property in the District the words in the act of 1878 were changed by the addition of the word "tangible" before the words "personal property." I would not undertake to say how this word "tangible" crept into the law. The result is that there is no legal machinery in the District for the taxation of intangible personal property, such as stocks, bonds, and investment securities generally. A merchant pays on his stock of goods, because that is tangible, but the banker or the owner of invested capital pays nothing on his securities. There is no inheritance tax in the District of Columbia, although such a tax exists very generally in the American States. The low tax rate of 15 mills, the exemption of intangible personal property, and the absence of an inheritance tax have resulted in bringing to the District of Columbia a large number of invested fortunes representing wealth which was not created in the District, but which was created in some one of the several States. The owner of one of these invested fortunes who thus withdraws his wealth from the State which produced it and where it can be subject to taxation, practically escapes taxation on it by becoming nominally a legal resident of the District of Columbia. The State from which he withdrew the fortune is doubly wronged, for it not only loses that taxable wealth, but it continues to pay its full quota of the expense of the District of Columbia for the protection and enjoyment of the owner of the fortune. In my judgment, this condition of affairs is morally and economically wrong.

The fact that Washington is the National Capital is no reason for providing tax exemptions in favor of those citizens who can remove their wealth here. Property in the District of Columbia should be assessed and taxed upon an equal and just basis in comparison with property in other American cities. Of all localities in the country the National Capital should be the last place where invested wealth should escape its just share of public burdens. An experience on the District of Columbia Committee and a subsequent service on the Appropriations Committee of the House has led me to believe that to bring the taxes within the District to a just level with taxes outside the District it is necessary first to segregate public improvements from the general fund and tax them upon the abutting property owner; second, to provide for the taxation of intangible wealth on the same basis as tangible property; third, to provide for an inheritance tax. All of these reforms will meet with bitter opposition from certain elements in the District, but no reform is ever popular and no tax was ever received with enthusiasm. If these reforms are accomplished, the District instead of raising $7,000,000 annually will raise $11,000,000.

The plan of paying one-half of the District expenses out of the Federal Treasury and one-half out of the District revenues is responsible for keeping static these abuses of the taxing system. In practice the plan is that every dollar raised in the District shall be matched with a dollar out of the Federal Treasury. If the untaxed wealth in the District were subject to taxation and the revenues of the District correspondingly increased, the charge upon the Federal Treasury would also be increased. As long as the $7,000,000 raised from small house owners and business men, supplemented by an equal amount from the Federal Treasury, is ample for the District expenses no serious attempt is made to tax the exempt classes. As soon as a serious attempt is made it will reveal that the half-and-half plan has long since performed its function and is becoming an increasing burden to the Federal Government and a temptation to extravagance; hence the sacredness of the half-and-half plan is the citadel of privileged wealth. It is sometimes urged in justification of the half-and-half principle that the Federal Government owns half of the real estate in the District. So far as I can find, this was never true. When the boundaries of Washington extended only to Florida Avenue it may have been possible to make such a showing by charging to the Federal Government all of the area of streets, squares, parks, and other land used for city purposes, as well as that used for Federal purposes. My best information is that the Federal Government actually occupies for Federal purposes less than 100 acres in the District of Columbia. It has the title to a great deal of land, like the big parks and the tiny parks at the intersection of avenues, which it has acquired for the beautification of the city and which it holds, not as a private landowner but as trustee for the public. Most of the avenues shown on the map as of exceptional width are not so in fact, the surplus width being actually fenced into the front yards of the adjoining proprietors. I believe that all of the public land in the District will total less than 20 per cent of the area of the District.

The half-and-half plan should be modified by providing that a fair tax be levied upon all private property in the District at approximately the same rate that such property would bear in other American cities and that the Federal Government should contribute either on the basis of its holdings as a private landowner or on the basis of the increased burdens, if any, which it places on the District to maintain a higher standard of government than would be necessary in other cities.

Much has been said about making Washington a beautiful city, and the appeal to the Nation at large is always on this basis, but it is utterly impossible to show any connection between those tax exemptions and the beautification of Washington. Washington has been beautified by Congress and will continue to be so beautified without expense to the property owners, and thus Washington enjoys an advantage which no other city can possibly enjoy. It is more than probable that the liberality of Congress has discouraged rather than encouraged the growth of the spirit of public enterprise in the District.

The present plan of the city of Washington follows in a general way the plans of Maj. L'Enfant, which were made out

at the instance of President Washington. As far as they have been adhered to they have resulted in a very beautiful city, although beauty was not the primary reason for such plans. The first element to be considered in a national capital is not beauty, but strength and defensibility. In this respect Washington is woefully deficient. Twice in our national history we have found that Washington was utterly incapable of defense from a military standpoint. In 1814 the disaster really happened; in 1864 it was only threatened. However, the National Capital is here, and whether it be defensible or not, it has around about it the powerful arms of Uncle Sam, and the whole Nation must stand or fall with the Capital. The Capital can not protect the country nor be the last citadel of its strength, as is the case in most powerful nations, but the country can and will protect the Capital in any case of risk. The plans of Maj. L'Enfant contemplated that Washington should be laid out on a very generous scale. The usual number of streets were provided for, but of a width which was then thought unusual. In addition to the usual streets were the avenues running diagonally across the city, which were all of unusual width. At the crossings of these avenues were arranged circles and squares. At a glance it would appear that this was a plan merely to beautify the city and a design to create a large amount of public grounds and open space within the District. We know, however, that this was not the primary object.

The plan was the conception of an Army engineer, who regarded it as the most effective way of guarding against a sudden rising of the populace, accompanied by rioting and mob violence, such as has so frequently disturbed the peace of capitals, and even threatened the life of governments.

Napoleon afterwards adopted this idea for Paris. He held that if a sufficient number of circles and squares connected by broad avenues could be dispersed throughout Paris, he could plant artillery at the circles and sweep any one of the radiating avenues clear of a mob in a few minutes. The most striking example of this idea is the Place d'Etoile, in Paris, which takes advantage of a little knoll and which is surrounded by radiating boulevards like the spokes of a wheel. From this commanding point all Paris on that side of the Seine can be held in order by a minimum number of men and guns.

Fortunately, we have never been called upon to put this idea to a test in Washington. The plan remains with us as one of those happy accidents which produce beauty and which are the despair of the artist who labors so hard with line, scale, and rule to accomplish in the creation of artistic beauty that which is so frequently done without his aid or even knowledge. It took Washington three-fourths of a century to grow into l'Enfant's plan. But what is three-fourths of a century in the life of a nation? It is well for us that the plan was comprehensive enough at the beginning. About a decade ago it was assumed that an improvement could be made upon l'Enfant's plan, and a committee of artists was set to work on a plan for the beautification of Washington. This has resulted in some fragmentary good. It has resulted in the permanent reclamation of the unsightly swamp near the Potomac Drive. It may further result in the grouping of public buildings in some artistic and imposing way. As far as I can discover, however, it has utterly neglected the possibilities of beauty in other locations of the District. It did not take advantage, as it might have, of the beautiful circle of hills surrounding Washington and the wonderful valleys behind them. It provided no circling boulevards adapted to the topography of the country, opening up the more remote sections of the District for future development. It is not for me as a mere layman and an untutored barbarian to criticize a plan gotten up by a committee who themselves admit that they are fine artists. It is my misfortune, however, to grasp only the art which links itself to nature and smell with a rather keen nose the midnight oil which betrays the laborious efforts of the literary hack or the artistic hack who grasp only the conventionalities of others. However, we should all be gratified, though we may differ as to details, that Washington is rapidly becoming the most beautiful Capital in the world, and the only danger that we have of marring its beauty is in overloading it with too many statues and monuments, many of which we may eventually destroy. In the brief time of six years that I have served in Congress 11 statues or monuments, or an average of 2 a year, have been constructed. This is going fast enough, it seems to me, for a capital which we hope will endure for several hundred years at least.

The obligations of the Federal Government toward the National Capital do not stop with a mere reform in its financial relations. It should be the aim of Congress, with the cooperation of the people of the District, to build here not only the most beautiful but the most progressive city in the country. Living conditions in Washington should reflect the high type of the American ideal of city life. A city is both a home and a workshop. In most of the American cities the workshop idea predominates, because their very existence as a city depends upon their industry and commercial operations. In Washington the home idea predominates. The great population of Washington is dependent upon the existence here of the seat of the Government. The largest employer of labor in the District is Uncle Sam, and even the commercial and financial interests here are dependent upon the business created by the sessions of Congress and the employees of the Federal Government. Washington is not a manufacturing city and never will be. It is entirely unlikely that Congress would encourage or even tolerate the creation of manufacturing districts in the District of Columbia, with the massing of industrial population, the danger of strikes, boycotts, lockouts, the fluctuation in the labor market caused by recurring trade depressions, and all of the problems which arise in an industrial center. No one but a few real estate agents could possibly profit by the establishment of manufacturing industries in the District. In all other respects it would be a distinct and irreparable disadvantage. On the other hand, Washington will be not only the Nation's Capital and the center of its political life, but in many respects the center of its artistic, literary, and scientific life. It will always be a great educational center and will be the greatest convention city of the United States. We are on the eve of a new awakening of the civic consciences all over our land. Cities which have boasted only of the material wealth and their pagan appeals to the senses are beginning to have a soul. This soul of the city is a realization of the demands for social justice.

The humblest worker in the city is entitled to decent conditions for home and family life. He is not only entitled to them but through the inscrutable justice of Providence we realize he will either get them or inflict the penalty upon the city at large. Slum politics have never plundered Washington as they have other cities, but slum conditions exist here because they are a by-product of American civilization. A city can not be made exclusively of boulevards, parks, grand opera houses, and public buildings. Washington should not only be known throughout the world as the city beautiful, but the city with a soul. This is a type of civic effort in which the good people of Washington can command the enthusiastic support of the Nation. Many other American cities are far in advance of Washington in grasping this problem, although they have greater burdens to carry and greater problems to solve.

The time has come for constructive legislation for the city of Washington. Not constructive in the mere sense of expending Federal money wisely or unwisely in the purchase of property or the erection of public buildings, but constructive in the sense of establishing a rule of social justice which will bring the city organism to its highest development. In my view the first step in this direction is a reform in the tax laws by which special privilege should be abolished and all taxpayers made to stand on an equal footing. Second, the abolishment of the alley slums with their danger of physical and moral contamination. Third, the rehousing of the former slum dwellers in sanitary quarters. Fourth, the physical appearance of all parts of the District should be improved, including the reclamation of the Anacostia Flats, the bed of Rock Creek, and other abandoned spots. Both banks of the Potomac should again be in the control of the District by a recession of the Virginia shore. Fifth, a control of the public utilities of the District. There should be universal transfers between the street car lines and better car service. The price of gas in the District is now 85 cents while in Indianapolis, Ind., it is 60 cents, and in many other American cities it ranges from 70 cents to 75 cents. Electric current in the District is selling at 10 cents per kilowatt, and the greatest natural hydroelectric power in the world lies at the very door of the District without being used. As fast as these public utilities come under public ownership they should be put upon a business basis so that they will pay not only their running expenses, but the sinking fund represented by the investment. Sixth, the schools should be made social centers, especially in view of the fact that the plain citizens of Washington have no other common meeting point. They should be made not only centers of instruction for the children, but for the adults as well. They should combine manual training, public baths, public playgrounds, physical and public recreation, day nursery, library features. They should be open every night either for public discussion or amusement, and available for any legitimate meeting either political, civic, or social. In offering recreation of this kind they should lead to a higher standard of citizenship by putting low-class and doubtful places of amusement out of business. Seventh, if I may borrow again an illustration from my own city of Kansas City, Washington should have a board of public welfare to look after the condition of its police court, its juvenile court, public dances, cafés, and other places

of resort and expending its activity in helpful ways for the young citizens, especially the inexperienced boys and girls who may drift into the dangerous environments of a big city. Kansas City, under the direction of its welfare board, even conducts a free legal-aid bureau for poor women and laboring men who can not afford to go to law to secure their rights. It conducts a municipal loan bureau which has almost solved the loan-shark evil. These are some of the constructive measures which ought to find their highest development in the Nation's Capital, so that life here would not only be more beautiful, but purer and cleaner than ever before in the world's history. Before we had gotten very far on such a program as this Washingotn would not only be known as the most beautiful city, but as the city with a soul.

Mr. STAFFORD. Mr. Chairman, for a good many years I have believed that the system of taxation in vogue in the District of Columbia was at fault, and particularly so far as it exempted the taxation of personal intangible property.

I recognize that the exemption of personal intangible property is in large measure the magnet that has attracted to this city, the Nation's Capital, the wealthy classes from other parts of the country for the very purpose of avoiding taxation. Now, any person who has given any consideration to the subject of taxation knows the difficulty that all taxation officials encounter in trying to locate personal property, whether it is tangible or intangible, and particularly so far as intangible personal property is concerned, which is the most elusive of all forms of property for purposes of taxation.

Wisconsin, which is in the vanguard of much advanced legislation, has grappled with this very problem, and I submit this suggestion for the consideration of the chairman of the Committee on the District of Columbia and the members of that committee as a solution for reaching this large and intangible wealth that is to-day escaping taxation in Washington, which at present is exempted on the statute books, but which would also in large measure escape taxation even if you were to put on the statute books the taxation of it, and that is that you establish or extend the principle of the income tax as a substitute for the personal-property tax.

Mr. COADY. That is what they have in the gentleman's State?

Mr. STAFFORD. Yes. In Wisconsin we have adopted the policy of levying an income tax on all persons and granting to the taxpayers the right to be recouped for all personal-property taxes that may be levied against them.

But now that we have this very thorough Federal income-tax system, we have the machinery whereby the National Government is in possession of the returns of income from all persons in this District. How easy it will be for the National Government to levy upon these inordinately wealthy people who are coming to this District for the purpose largely of escaping taxation and require of them the payment of their just share of taxation.

The Members of this House are not seeking to lay an undue burden upon these thousands of people living in this District who are largely dependent upon the Government for their employment and their maintenance and support. We do not wish to place an undue burden upon them; but I think throughout this Chamber there is a desire to reach these wealthy people who are coming here, to my knowledge, in great numbers for the express purpose of escaping taxation, and who would escape even if the gentleman's proposition were adopted of taxing the intangible personal property, because you are still going to have a large amount of escaped taxable property. You are still going to have the problem, whereas if you would extend the principle of the income tax to the District of Columbia as a substitute for or supplement to the personal-property tax for the maintenance of the District government, you would certainly be able to reach this large wealthy class and make them pay their just share of the burdens of local government.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield for a suggestion?

Mr. STAFFORD. I will be glad to yield to my friend from Maryland.

Mr. LINTHICUM. In my State we found, when we had this very heavy taxation on stocks and bonds, that we got less taxes than when we made a moderate tax.

Mr. STAFFORD. Of course, we all recognize that when a heavy tax is levied it will add to the incentive to hide property that is subject to taxation; but I rather agree with the previous speaker [Mr. BORLAND], that even if it is high, the effort to reach it is to be commended, as, perhaps, the social life of the Capital would be better if there were not so many of these wealthy people here, giving lavish entertainments and supplanting the old order of things, with its strong and pleasing democracy.

Now, Mr. Chairman, I yield 15 minutes of my time to the gentleman from New York [Mr. PAYNE]. I ask, Mr. Chairman, how much time have I used?

The CHAIRMAN. The gentleman has used 5 minutes.

Mr. PAYNE. Mr. Chairman, the subject of assessment and taxation is a very difficult one, and has not been fully solved in any part of the United States, and will not be here, under the terms of this bill. There would not seem to be any reason why the real estate in the city of Washington or the District of Columbia should not be assessed at a uniform value, at the full value, if you please. The gentleman from Iowa [Mr. PROUTY] has brought in a chart here, containing the names of a number of cities in the State of New York, where he says they report to him the assessment is at full value, and yet outside of the city of Greater New York I do not believe the assessment of any one of them is anywhere near the full value. It is against the nature of things that it should be so.

In the State of New York we levy now, growing out of our canal debt, a State tax, and in order to apportion the State tax fairly we have an equalization board, which takes into consideration the assessed value of every county in the State. They inquire into the matter; they go around sometimes and visit the various counties, and have a session with the board of supervisors and assessors, to find out the percentage of value that the assessment has really been fixed at. They get at it as nearly as they can, but even in getting at it as nearly as they can the result is very far from the true state of affairs. Then they make an equalization for the State of the amount of the assessed value for each county, in order to get at the proper amount of the State tax for each county. Well, they find there is a great discrepancy in the valuation put upon the property in the different counties; and yet they do not get anywhere within a long way of the truth of it, and they can not get anywhere near the truth of it.

Then we have what is called the county tax in each county, and that is levied upon the property of the various towns. The assessment is made by individual towns. Our laws require that the real estate shall be assessed at its full value, and yet it never is. I know of but one instance in the whole State of New York where the assessment is the full value, and that is for local reasons. The supervisors of the county meet and they equalize the assessment and the valuation between the various towns.

If there is a city in the county having a smaller number of supervisors than the number from the country towns, the equalization is against the city and in favor of the country towns. Years ago I served on the board of supervisors and I know something about it. I was on the equalization committee of the board of supervisors. It is surprising how low is the valuation of farms in the county. It is all human nature, and it all works out. Everyone is in favor of paying as little taxes as he can; there is no question about that. Human nature is the same the world over. They put it on the city. I remember once getting up and saying that I would go into court and bust up the whole thing if they did not cut down the equalized value they had put on the city of Auburn, where I live, and I succeeded in getting a very substantial reduction. Some said it was a bluff, but it was not; I meant to fight all the way through, and they realized it.

Now, bringing in that chart here and saying that the assessment of those cities in New York outside of Greater New York represents their full value will not impose on any man in New York who knows anything about the mode of assessment there. Our law requires it, but they do not do it. The assessors have to make a pretty stiff affidavit in regard to it. There is no deduction from the assessed value of real estate on account of indebtedness, and yet it is not assessed at the full value, or anywhere near it. I am not surprised that the assessment in the city of Washington is found to be below the full value, and yet there is not any such reason for it as there is in the cities and towns of our State, because here the taxes are all paid in one tax. There is no county or State tax for them to pay here. It is all included in one. There is no equalization of valuation. I do not see why we could not get at pretty nearly a fair distribution of the taxes upon the real estate in the city of Washington. I do not believe in this 1½ per cent business, and never did. I believe that a budget should be made up as intelligently as we used to make it up in our county board of supervisors, putting in the entire expenditure and then getting at the entire assessment as it would equalize when we finally got down to equalization; get at the full value of the assessment and divide the budget by the amount of the assessment, and get a percentage figure and extend the tax rates according to that. I never have seen any good reason why that was not a very fair method of getting at it, and I think it would be a good method of getting at it here. If the original George bill had come in here,

there were at least two good features in it, in my judgment. But the committee, in their wisdom, have sought to search out the intangible personal property. Well, the intangible property has been sought after for years, more or less, and a good many men who have been seeking after it have given up the chase to get at it for taxation purposes. It is involved in a good deal of wrong, injustice, and inequality.

Now, take this bill assessing intangible property at the same rate as tangible property, and "including moneys, credits, shares of stocks, bonds, annuities, and all other evidences of indebtedness," and then exempting the shares of stocks and bonds of District corporations which pay a tax now upon that same property. Suppose a man owned some shares in the Pennsylvania Railroad Co. That company pays taxes, of course, in the District of Columbia upon the property that it has here. Why should not the man owning shares in the Pennsylvania Railroad Co. have an exemption under this bill the same as a man owning shares in street railroads? Suppose a man owns stocks and bonds issued by a corporation in the State of New York. The corporation there pays a tax on the full valuation of its property. It can not get rid of it. It has already paid it. When the corporation comes to fix its dividends it takes that into consideration as a part of its expense. Suppose a man holds bonds of the State of New York or bonds of the city of New York which go into the construction of the subways, large amounts of which have been sold within the past few weeks, and which are made exempt from taxation there. Why are those bonds issued by the municipality exempted from taxation? In order to get the loan at the low rate of interest. Why, the gentleman from Missouri [Mr. BORLAND] admitted a few minutes ago that the taxes paid in Baltimore on the public utilities there were paid by the man who rides on the street car. And so the man riding on the car in New York is paying those taxes; and there in the city of New York they exempt the bonds to get a low rate of interest, in order that they may help the man riding on the car in the subway. Now you come along here, after these people have bought these bonds and paid par for them and seek to tax them at the full amount of the value of the bonds—the face of the bonds—and if the rate of taxation is 1½ per cent, tax them 1½ per cent and you take half the income, when they have already bargained for them at 3 per cent or 3½. But, you say, "Oh, well, they are rich, and why should not the rich be made to pay?" Not all the people who own bonds are rich. Some men can not see beyond the rich man who has stock in a corporation; yet statistics show that more than half of the stockholders are poor people who have a few hundred dollars invested in that stock and are getting their annual dividends, and it becomes a necessity in their households and they go hungry if dividends stop. There are some people here in the city of Washington who are in the same plight. They are not all giving entertainments. And, by the way, I have no objection to a rich man giving entertainments. I remember when our present great Secretary of State broke into Washington as a Member of this House.

The fact was announced that Vanderbilt was putting two front doors on his house that cost $100,000 apiece, and Mr. Bryan thought it was an awful waste of money. I said no, the bronze and other materials in those doors cost a very few paltry dollars, and the other part of the $75,000 or $100,000 went to labor. I think that is the best way of helping the laborer, to give him something to do, and the more money they spend in that way the better I like it, because it helps to scatter that money among the poor and deserving people. The best way to help a man always is to give him some work to do and pay him well for doing the work. But you gentlemen over there do not seem to have got that into your political economy.

Mr. COADY. Will the gentleman yield?

Mr. PAYNE. Yes.

Mr. COADY. Has the gentleman observed another vicious part of this plan? It seeks to tax intangible property whether it produces a revenue or not. In other words, if any bonds are in the hands of trustees for the benefit of an orphan and they fail to pay interest, those bonds would depreciate in value. That would be hardship enough, but under this bill they would be compelled to pay a tax on those securities.

Mr. PAYNE. Yes; bonds in our State are largely held by trustees for the benefit of estates.

Mr. JOHNSON of Kentucky. Will the gentleman yield?

Mr. PAYNE. I have not the time. If I do not cover the matters that the gentleman wants to inquire about, I will yield to him later. This bill seeks to tax bonds and mortgages. We have had in our State a tax upon bonds and mortgages. They were according to law to be taxed for the full value, and we did not get any tax out of them. They invented a way to get around it by getting in debt. They had the same provision you put in here, that the debts that a man owed should be deducted from the value of his personal property, so they got around it and did not pay the tax. We got little or no taxes from the bonds and mortgages until the owner died. If he had a little bond or a mortgage of $4,000 or $5,000, when he died his estate went through the probate court and it became a part of the public records, and the assessors were compelled to assess the widows and orphans for the benefit of the State to the full value of the bond or the mortgage, and took their 1½ or 2 per cent of taxes and deducted it from that little income.

People got tired of that. It was an injustice. They would not stand for it, and then they invented something else, five or six years ago, and whatever may be its merit or demerit, it has accomplished this: It has brought in more revenue by the way of taxation, and it is more uniform.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. STAFFORD. Mr. Chairman, I yield to the gentleman 10 minutes more.

Mr. PAYNE. They tax the bond and the mortgage at its full value at a rate of one-half of 1 per cent. This tax must be paid to the recording clerk before the mortgage can be recorded. It is a dead open and shut. We get the amount of that tax. Who pays it? The man that gives the mortgage pays it in almost every instance, because he records the mortgage. Savings banks' mortgages are drawn paying, perhaps, 5½ per cent interest the first year, and after that 5 per cent, because the tax is only collected once, no matter how long the mortgage has to run. It shows, what we have always known, that wherever we do get a little money on a bond or a mortgage or any other indebtedness, it comes out of the man who borrows the money, and not out of the man who owns the security. It comes out of the man who borrows the money, as an additional amount of interest on the loan which he has got; and your endeavor to tax the rich exclusively has fallen upon the poor man that has to borrow the money.

Oh, the borrowers are not all poor; of course they are not; but a great many of them in the city of Washington are. It is the little homes costing $3,500, having a mortgage on them of $2,000 or $3,000. You want to get at that mortgage. It raises the interest when they build new homes, and the man who buys a little home must pay for it. You are greatly interested because the little homes are assessed somewhere near the full value, while you say the rich man is not so assessed, and you are trying to get at the intangible property to make it pay the same rate of taxation; but you are putting it on the owner of the little home that runs in debt when he purchases it.

I have been advising my people who come down here in the civil service to buy a little home, and a good many have done so. They never have laid up any money before, but they are now doing something toward it. They have mortgaged it, but the mortgage is being reduced. Do not make it any harder for these people. You came in here the other day with an amendment changing the method by which the improvement of sidewalks and the paving of streets were to be paid for; that where the pavements were over 40 feet wide the abutting owners paid for the 40 feet and the city for the rest of it, but where they were 40 feet or less—that is, the streets in front of the humble homes—you put it all on the abutting owners; and then you get up and talk about helping the poor man as against the rich man. That thing has been going on so long, and the city at large, with the United States, has been paying for those things, that we had better leave the paving of the street where it is, and not give an advantage to the owners who live on the wide streets—the business streets—where the paving has already been done and paid for by the city government and the United States, and put the balance of what is to be paid on the other streets on the abutting owners.

Do not go backward in making progress. It is only the crawfish and some politicians that make progress backward. If you are going to make progress, take your time and get it right. Now, if you pass this George bill, and then pass that part of it which allows the budget and fixing of the rate in accordance with the budget, you will have made some progress. Before you take the figures of my friend from Iowa, made honestly and in good faith by him, take a little time. Does he suppose that any of the officials are going to give the game away? Why, they have to meet the equalization board in each of the counties and they are not going to confess in any letter of theirs that they have assessed property below the full valuation of that property. Once in a while you can get a response from some one who pays the tax who will say, as some have said to me on the floor of the House when my friend from Iowa was speaking, that they are not being assessed at the full value, but much below it.

Mr. PROUTY. Will the gentleman put those names in the RECORD?

Mr. PAYNE. No; I am not going to give the men away.

Mr. PROUTY. Will the gentleman yield for a question?

Mr. PAYNE. Mr. Chairman, I yield to the gentleman if he will yield me time.

Mr. PROUTY. I will be very glad to yield the gentleman five minutes. Will the gentleman now answer my question?

Mr. PAYNE. If the gentleman will ask it, I shall endeavor to do so.

Mr. PROUTY. What city did the gentleman to whom he refers have in mind?

Mr. PAYNE. I do not propose to say.

Mr. PROUTY. Then, how can I contradict it?

Mr. PAYNE. The gentleman can not. He has made his statement, and I have made mine.

Mr. PROUTY. I offered to produce the evidence for mine.

Mr. PAYNE. No; the gentleman offers to produce some letters, but when he does produce the letters I want the opportunity of cross-examining the men who wrote the letters; and when I produce my statement the gentleman desires to cross-examine my friend who made the statement. I suggest to the gentleman that his committee send a subcommittee into those towns and examine into the matter and find out about it and then call in men from these outside towns and see what they think about it.

Mr. PROUTY. If the gentleman will give me the towns where these facts exist, then we can all of us get at the matter. I will say frankly that if there is anything of which the gentleman knows personally, and will give me his word that it is so, I will accept it. I think it is hardly fair to quote some man whose name he does not reveal and who did not want known the city to which he referred.

Mr. PAYNE. If the man had given me authority to give his name, I would very gladly do it, but I do not know that I would care to have it known without his authority. The gentleman knows that there are some things people do not like to give away. I have no objection in my own case, if I knew the facts, for I would tell them, but I do not want to do this with a man who simply said that to me without his saying that I could reveal his name. But the gentleman will find that to be the case, if he will examine into it and take the evidence on the subject, but he can not do it in a minute.

Mr. PROUTY. I have been working at it for two years.

Mr. PAYNE. I know; but the gentleman has not gotten the evidence that the gentleman from New York [Mr. GEORGE] did. He worked here, and he got the evidence here, and he went into the facts and got the evidence. I suggest to the gentleman that he go to those towns and get the evidence before he undertakes to compare what people are paying there and what people are paying here.

Mr. Chairman, I desire to say one more word before I sit down. I have talked longer than I expected to. This is the Capital City. I want to see it made the finest city in the world [applause], and it is approaching that now. I want the Government of the United States to pay its fair share and more, too, to make it the finest city in the world. [Applause.] But I am not going to weigh it with apothecary's scales. What do your constituents or mine care whether they pay on an average 7 cents apiece a year toward making this the finest city in the world or 5 cents apiece a year. Do not split hairs. Be not only fair, but liberal. This is the Capital City, and it was ceded to the Government of the United States and belongs to the Government of the United States. Let us make it the best-governed city in the world, and let us keep the strings in our own hands to do it. Do not be niggardly; do not go too fast. Be sure you are right before you go ahead.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. STAFFORD. Does the gentleman desire some more time?

Mr. PAYNE. Give me five minutes more.

Mr. STAFFORD. Mr. Chairman, do I understand that the time yielded by the gentleman from Iowa [Mr. PROUTY] has been consumed?

The CHAIRMAN. The gentleman from Iowa has not any time to yield.

Mr. STAFFORD. Mr. Chairman, I yield the gentleman five minutes more.

Mr. PAYNE. I thank the gentleman. Mr. Chairman, I am very glad time is getting so precious, because that makes it begin to look, if we hurry on in this way, as though we might adjourn some time in November—how much before the Lord only knows.

In going around the city I notice a good many things that I think cost an extra amount simply because this is the Capital City. Take the station over here. It cost a great deal more money than it would if it had been in any other city of the same size. It is a beautiful structure, and the surroundings of it will be beautiful if we can ever get the value appraised so that the President will approve it. That is going to cost a great deal of money. I do not see why the United States should not pay the most of that money. The proportion of half and half may not be just right now, but examine into it carefully. Get the facts, not from correspondence merely from interested officials, but go into it in a thorough manner as the gentleman from New York [Mr. GEORGE] went into it in getting at the assessed valuation here in the city of Washington.

I could have gone on through with this intangible-property proposition and demonstrated that you are double taxing a great deal of property. Suppose the property does pay a tax in Iowa or New York. Why should it be made to pay a tax here again in the city of Washington? There is no justice in that. Taxes should be made as uniform as possible, and the same property should not be made to pay taxes twice. If you do that, you simply get it out of the people who use the property, and it may be the poor man, about whom you agonize so much because he happens to be in the majority and has the vote. It may be he when he gets onto a street car every day. Treat all of the inhabitants in the United States, in Washington or anywhere else, with equal and exact justice; and whatever you do, do not retard the progress of this city, which is to remain the Capital forever of a Nation that will never die. [Applause.]

Mr. STAFFORD. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. JOHNSON].

[Mr. JOHNSON of Washington addressed the committee. See Appendix.]

Mr. STAFFORD. How much time have I remaining?

The CHAIRMAN. Twenty-one minutes.

Mr. STAFFORD. I yield to the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Chairman, I have no particular desire to talk partisan politics at this time, and I would not do so were it not for the fact that a member of the Cabinet has been traveling up and down the country making political speeches when he should have been at his desk in this time of his country's need. If he is not worth anything when he is here in the city of Washington attending to his duty, the President should at least persuade him to lapse into valuable silence. This distinguished gentleman has been going around the country, standing among closed mills and smokeless factories and idle men, telling of the great prosperity in the land. In order to show this prosperity he has been drawing upon a fevered and distempered imagination for facts and figures. In one of his speeches, as reported the other day from Columbus, Ohio, he expressed great regret that there was not honesty in discussing business conditions. I call attention to the fact that this same distinguished gentleman sent certain experts out to my State to investigate certain industries; that these experts came back and made a report based entirely upon anonymous testimony. These experts were unable to find any citizens in the entire State of Washington that they dared quote to bolster up the report which they made. The Secretary, upon that kind of discreditable evidence, submitted a report to this House, and yet this is the gentleman who talks about being fair and honest in discussing business. It now transpires that these experts refused to report evidence which did not agree with their preconceived ideas. The West Coast Lumber Association, the great lumber association of the Pacific Northwest, appointed a committee to confer with these experts.

They did confer with them. They made a report in writing, but that report was suppressed by these experts because it did not agree with what they had been instructed to report. I have not seen any statement anywhere that this distinguished member of the Cabinet, who talks about honesty in discussing business, has seen fit to rebuke these gentlemen for making these dishonest and disreputable reports based upon disreputable and anonymous evidence. Not only that, but this same distinguished member of the Cabinet, if he is correctly reported, upon the statement of some gentleman by the name of J. W. Sullivan, of New York City, has changed the method of making certain reports and statements in his department. Why? It will be impossible hereafter to make comparison with former reports. This will make it impossible to tell what the present trade conditions are as compared with those of previous years. Was this the purpose of the change? Who is J. W. Sullivan that has such influence with the Department of Commerce? Was this change made to show or to conceal the truth?

Now, this distinguished gentleman in his speech the other day complains about another thing. He complains because somebody

has criticized the bringing into this country of Argentine corn and beef, and he says:

If any addition to our food supplies is in itself an element of evil, then a State with a large crop is an injurious neighbor to its sister States, and the man who uses up-to-date methods of cultivation is a foe to those who are less enterprising.

This great economist at the head of the Department of Commerce can not distinguish between bringing beef and corn from Argentina, where it is raised on cheap land and by foreign labor, paid for by money sent out of the country, and crops raised in a neighboring State by American labor, by American cultivation, by men who pay taxes, by men who owe allegiance to this country.

Then he has still another statement more remarkable than the other, if possible. He says:

If we want the cost of living to be reduced, that can only be done by having prices fall.

Now, contemplate the wonderful wisdom of that remark, will you?

And this takes time to settle in many relations of our commerce.

Have prices been reduced to the consumer in anything that constitutes the necessities of life? If so, will some one mention it?

The Democratic Party in the last campaign made one of its principal issues the high cost of living. Upon every stump they promised that if they went into power they would reduce the cost of living. Have they done it? I hold in my hands here a statement made by Dun & Co., giving the wholesale quotations of the commodities that we eat and that we wear on the 4th day of October last and on the 4th day of April this year—six months under the new tariff law. I suppose that my Democratic friends will not say that this is partisan evidence. Looking over it, taking one item after another, there has been no reduction in the cost of living even in the wholesale prices. Some of the articles have been slightly reduced and some of them have been slightly increased. Taking them as a whole, there has been some increase. The tariff on these particular articles has nothing whatever to do with it. You take articles on which the tariff has been reduced or removed and just as many of them have increased in price as have decreased in price. Articles upon which the tariff has remained have been reduced just as much as upon those that were placed on the free list. I am going to ask unanimous consent, Mr. Chairman, to insert this schedule in the RECORD, showing the prices and the result of six months of Democratic tariff upon the cost of living. It demonstrates how that party has kept its promises to the American people. I also want to extend my remarks by inserting one or two other articles that I have here.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks by inserting certain matters in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. HUMPHREY of Washington. Mr. Chairman, the distinguished Secretary of Commerce says that they have not had time to reduce the cost of living. Well, they have had time to do some things. They have had time to reduce the revenues of the Government. They have had time to greatly increase the expenditures. They have had time to increase the market in this country for the products of every nation of Europe, of South America, and North America. They have had time to decrease the market for American products in every nation of North America, South America, and Europe. They have had time to increase the sale of foreign-made cotton goods in this country at the rate of $10,000,000 per year. They have had time to increase the sale of foreign-made woolen goods in this country at the rate of $28,700,000 per year. They have had time to close mills and factories. They have had time to see the railroads discharge 250,000 men who are now idle and out of employment. They have had time to see the iron and steel industries of this country throw a million men out of employment. They have had time to bring to idleness 3,000,000 men in this Nation. But they have not had time to reduce the cost of living. They have had time to increase idleness and poverty and want. They have had time to decrease wages and employment. But they have not had time to reduce the cost of living. The American workingman has had less work and received less wages, but it still costs him as much to live as ever. While the American people are not buying as much clothes or as much food as they did a year ago, yet they are buying a good deal more food and clothing made abroad than they did a year ago. This means that the American workmen are out of employment, and that we are giving employment to the labor of other nations.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. HUMPHREY of Washington. Certainly.

Mr. JOHNSON of Washington. Has my colleague heard that within the last few days bids have been opened for the furnishing of a large number of United States flags, and the British bid is some $4,000 less than the bids from home, and the Navy Department is considering the advisability of accepting the foreign bid?

Mr. HUMPHREY of Washington. I have heard that rumor. I do not know whether it is true or not.

Mr. LINTHICUM. Will the gentleman yield?

Mr. HUMPHREY of Washington. Just a moment. When I answer this question I will yield.

I do not know whether the information of my colleague is correct or not. I have heard it. But I prophesy that there is one instance of free trade that even the Democratic Party will not dare accept. I would like to see my Democratic friends and this administration go on record as having the American flags manufactured in England. And yet I am not so sure but that is where our flag ought to be manufactured in view of the attitude of this administration toward the Panama Canal. Probably that is a part of their canal policy. It would be most fitting to have a British-made American flag fly over that zone as long as the Democratic Party is in power. But I would like to see the Democratic Party dare go on record as saying that they would have the American flags manufactured abroad because they can get them cheaper than they can at home. They advocate that policy in regard to other things; why not pursue it in regard to the flag? What is the difference? Is the labor that makes the American flag any more sacred than the labor that manufactures any other article?

Now I yield to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. I want to say to the gentleman that in one of his speeches he made about a month ago he referred to the mills at Sparrows Point, in Maryland, having been closed.

Mr. HUMPHREY of Washington. Yes.

Mr. LINTHICUM. I will say to the gentleman that I would like to report progress. The mills are all running full time.

Mr. HUMPHREY of Washington. I would like to ask the gentleman if he has noticed since making that speech that 250,000 men employed by the railroads have become idle?

Mr. LINTHICUM. I have noticed that. There are always a good many of them idle.

Mr. SHARP. I would like to ask the gentleman also if in the 1907 panic, under Republican administration, and for five or six years afterwards, there were not 500,000 or 600,000 idle cars on the railroad sidings that they could not use?

Mr. HUMPHREY of Washington. I know that when the Republican administration went out of power our railroads were running at full capacity, but now there are about 200,000 idle cars as compared with the number in use then. And I know that there are to-day 3,000,000 men idle and seeking employment. I know that you can not go into a city in this country where they do not have the soup house and the bread line.

Mr. SHARP. Was not that true in the panic of 1907, and did it not remain true for three years thereafter?

Mr. HUMPHREY of Washington. Oh, no. That was not true. But suppose that that were true. Let us admit for the sake of argument that that was true. Does that justify you now in doing it?

Mr. SHARP. We are not doing it.

Mr. HUMPHREY of Washington. I hold in my hand a statement which shows that since the present tariff law went into effect in six months the imports of articles used in manufacturing have decreased $47,000,000. That tells the story.

Mr. SHARP. Does that cover the preceding six months or only the last month or two?

Mr. HUMPHREY of Washington. That is since the Democratic tariff bill went into effect.

Mr. SHARP. But for the last two months it does not show that.

Mr. HUMPHREY of Washington. I am afraid the gentleman has been reading some of the reports put out by the optimistic Secretary of Commerce. [Laughter on the Republican side.]

Mr. SHARP. I would rather take his unbiased report of it than that of the gentleman from Washington, who, I think, is a little prejudiced on account of recent events in regard to Panama Canal tolls.

Mr. HUMPHREY of Washington. I admit that I am not particularly in love with the Democratic attitude on the question of Panama Canal tolls, but that does not justify the Secretary of Commerce, a member of the Cabinet, in running about the country and manufacturing his facts as he goes.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. COOPER. Men were not thrown out of manufacturing establishments in the panic of 1907, as alleged, because of importations of goods from foreign countries. The panic of 1907 was a bankers' panic, pure and simple, and did not come from

the importation of foreign goods or the uncertainty in the minds of manufacturers as to what importations the tariff then existing was going to permit. That was a bankers' panic, pure and simple, and a few days after it began a prominent banker in the city of New York blew out his brains. The gentleman should study the facts of history. [Applause on the Republican side.]

Mr. SHARP. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Ohio?

Mr. HUMPHREY of Washington. I can not yield now.

Now, referring to the question of woolen manufactures, although the tariff on woolen goods did not go into effect until the 1st day of January of this year, since that time we have imported of foreign woolen goods more than we ever imported in any single year before except the year 1910, and the importations thus far this year in three months has almost equaled the total importations of the exceptional year of 1910.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. STAFFORD. Mr. Chairman, I yield the gentleman five minutes of my time.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] is recognized for five minutes more.

Mr. HUMPHREY of Washington. Mr. Chairman, I just want to read a word in regard to the woolen industry, to show its prosperity—not in this country, but in England. I will read from the report of Consul Franklin D. Hale, of Huddersfield, England. He says:

> The general improvement in business and the more hopeful attitude of manufacturers that have been noticed since the beginning of the year continues, and although there is not yet anything in the nature of a trade boom present operations are much more favorable than at any time since October, 1913. The outlook for 1914 seems most encouraging. There is a brisk demand for fancy tweeds and serges in the home market, but fancy worsteds are in only moderate demand owing to high prices. This is perhaps more than offset by a greatly improved continental trade and the great expansion in the general textile trade with the United States.
>
> There is no doubt that Huddersfield manufacturers are benefiting materially by the new American tariff. Many of the mills are again on full time after many weeks of depression. The value of all kinds of textile goods invoiced through this consulate to the United States in February, 1914, exceeded by $199,000 the exportation of similar goods during the same month of 1913.

The farmers of this country sold their wool this year at 33 per cent less than they did a year ago. Who has been benefited by it? Wool has been reduced, but has any man bought a suit of clothes for less? Yet, says our Secretary of Commerce, we have not had time; we have not yet had time to reduce the price. Well, we have had time to buy corn and beef from Argentina. We have had time to purchase eggs from China and from Siberia. We have had time to bring in butter from New Zealand and from Europe. We have had time to materially affect the price of farm products to the farmer, but we have not had time to reduce the price of these products to the consumer.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HUMPHREY of Washington. Certainly.

Mr. MOORE. With respect to beef and corn coming in from Argentina in competition with American-grown corn and beef, is there not a fair reason for believing that the trusts still control corn and beef products?

Mr. HUMPHREY of Washington. Well, as I called attention once before on the floor of this House that so far as we have been able to ascertain, the only people who have benefited by importing corn from Argentina have been the food-products combine and the whisky distillers.

Mr. MOORE. The men who buy the cattle from the raisers and sell the beef to the consumers here are still in control of the Argentine market?

Mr. HUMPHREY of Washington. Apparently so.

Mr. MOORE. Has the price of corn and of beef been affected to the advantage of the consumer here by reason of the lowering of the tariff?

Mr. HUMPHREY of Washington. Before the gentleman came in I called attention to the fact that I had a schedule here prepared by R. G. Dun & Co., in which it is shown that that is not correct; that the consumer has not been benefited.

Now, Mr. Chairman, I want to call attention to just one other matter. I have here in my hand——

Mr. BROCKSON. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Delaware?

Mr. HUMPHREY of Washington. Yes; I yield.

Mr. BROCKSON. What do you consider a fair price for the farmer to receive for his corn?

Mr. HUMPHREY of Washington. I do not know.

Mr. BROCKSON. Does the gentleman consider 64 cents a bushel a fair price?

Mr. HUMPHREY of Washington. I do not know.

Mr. BROCKSON. Is 64 cents a reasonable price?

Mr. HUMPHREY of Washington. I do not know. I do not raise it. I seldom eat it and seldom drink it. [Laughter.] So I do not know anything about it.

Mr. BROCKSON. I will say that on the 16th day of this month I saw corn sold at 64 cents a bushel at public auction. That is 32 cents a bushel basket, on the ear.

Mr. HUMPHREY of Washington. If the gentleman is satisfied in getting that in the RECORD, all right.

Mr. SIMS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. SIMS. I wanted to ask the gentleman a question for information.

Mr. HUMPHREY of Washington. Well, you are coming to the right place for it. [Laughter.]

Mr. SIMS. I understand the gentleman's argument is that imports are increasing and that our markets are so good, both as to imports and our domestic products, that prices are not going down?

Mr. HUMPHREY of Washington. Oh, no; the gentleman did not understand the situation. I have here another statement of figures that I will put in the RECORD, and I hope the gentleman will study it.

Mr. SIMS. I want to know why prices do not decline with an increasing supply.

Mr. HUMPHREY of Washington. If the gentleman will give me an opportunity, I will reply.

Mr. SIMS. I want the gentleman to understand my inquiry, that is all.

Mr. HUMPHREY of Washington. In the first place the imports of farm products have greatly increased. As I pointed out a while ago, in corn, beef, eggs, dairy products, and various other articles——

Mr. SIMS. Then why does not the price go down?

Mr. HUMPHREY of Washington. The price does not go down, as I just explained to you, because the difference is so small that the wholesaler absorbs it. This is illustrated by the corn-food products company and the whiskey distillers; they get their corn for less, but they do not sell their products for less.

Mr. SIMS. I want the price of eggs and butter to go down. I am buying eggs and butter and can not get them for any less.

Mr. HUMPHREY of Washington. Where the imports have greatly increased, the increase has been in finished manufactured products and in agricultural products. I hold in my hand a list which shows that on finished manufactured products the imports increased $9,800,000 in the month of February, 1914, as compared with the month of February, 1913. In the importation of articles used in manufactures I called attention a while ago to the fact that there has been a decrease of $47,000,000 since the Underwood law went into effect. There is the difference. You have so arranged your tariff that you are increasing the imports of the finished product and decreasing the imports of the materials that go into manufactures in this country. The story these figures tell is as clear as the noonday sun. We have largely stopped manufacturing in this country; and while the people of this country are buying less than they did a year ago, yet they are buying a great deal more of imported finished manufactured products.

Mr. SIMS. If they can sell as high as ever, I do not know why they should quit manufacturing. That is what is worrying me.

Mr. HUMPHREY of Washington. I will leave that to the gentleman to explain on the stump this fall. I want you gentlemen on that side to face the people that you told you were going to reduce the cost of living and explain the situation to them. And I will ask you to carry around this schedule that I will insert and read it, and read the list of articles that go upon the poor man's table that you are so fond of talking about; read it article by article and show the reduction in duty that you have made upon it, and then look your audience in the face and tell them how much you have reduced the retail price. Read this schedule item by item and explain why you have not reduced the cost of living, as you promised; read it and explain why the price was not reduced when you reduced the tariff on the article; read it item by item and point out to your audience where you have put articles on the free list and the price of these articles has increased, and then sing to them your ancient song that the "tariff is a tax, that it is added to the price of the article and the consumer pays it." Read it to them item by item and then read to them what you say in your last platform—although I realize that no Democrat should be reminded of his platform—about the tariff being the cause of the high cost of living, and then explain to them whether, when you made that declaration, you were ignorant or whether you were attempting to get their votes under false pretenses. Explain these things to the people.

It ought to be easily done if you are correct in regard to your theories on the tariff. The people would like to know why it is that, although their work has grown less, the revenues of the country have grown less, the import of the products of foreign labor grown greater, that there is no decrease in the cost of living. Work and wages have been reduced, but the cost of living has increased. This is not in accordance with Democratic promises and Democratic prophecies. Go out to the people and explain why.

I especially ask the Members to study the schedule of wholesale quotations of commodities from Dun's Review, giving the minimum price at New York on the 4th day of October, 1913, on the day when the present tariff law went into effect, and on April 4, 1914, after six months' trial of that law. The rate of tariff under the Payne-Aldrich law and under the present tariff law is given in each case. Here you have an opportunity to see in detail what the effect of a tariff reduction means in relation to prices. No unprejudiced mind can read it without being convinced of the fallacy of the theory of free trade, that the tariff duty is added to the price of the article. The Government has lost the revenue, and we are paying, where we purchase goods abroad, as much as we paid for the same article purchased in this country. The schedule is as follows:

Wholesale quotations of commodities.

[From Dun's Review.]

MINIMUM PRICE AT NEW YORK.

Article.	Oct. 4, 1913.	Apr. 4, 1914.	Payne-Aldrich rates.	Underwood rates.
Apples			25 cents per bushel.	10 cents per bushel.
Common, per barrel	$1.25	$2.50		
Fancy, per barrel	3.00	4.00		
Beans			45 cents per bushel.	25 cents per bushel.
Marrow, choice, 100 pounds	6.50	5.40		
Medium, 100 pounds	3.80	3.65		
Building material:				
Brick, Hud. R. Com., per 1,000.	6.75	7.00	30 per cent	10 per cent.
Cement, Portland, dom	1.58	1.58	20 per cent	Free.
Lath, Eastern, spruce	5.00	3.85	20 cents per 1,000.	Do.
Lime, Rockport, com., per barrel.	.90	.92	Free	1 cent per pound.
Shingles, cypress, No. 1, per 1,000.	8.00	8.00	50 cents per 1,000.	Free.
Coffee, No. 7 Rio, per pound	.10½	.09 7/16	Free	Do.
Cotton goods			42.75 per cent	7½ to 30 per cent.
Brown sheetings, standard yard.	.08	.08		
Wide sheetings, 10-4	.28	.30		
Bleached sheetings, st., per yard.	.08½	.09½		
Medium, per yard	.07⅞	.08⅛		
Brown sheetings, 4 yd	.06⅞	.06⅞		
Standard prints, per yard	.05½	.05½		
Brown drills, st., per yard	.08	.08		
Staple ginghams, per yard	.06½	.06½		
Blue denims, 9-oz, per yard	.14	.14		
Print cloths, per yard	.03½	.03½		
Dairy:				
Butter, creamery, etc., per pound.	.30⅜	.24½	6 cents per pound.	2½ cents per pound.
State dairy, common to fair, per pound.	.24	.17		
West'n factory, firsts, per pound.	.24½	.18		
Cheese, w. m., special, new, per pound.	.16½	.19½	do	20 per cent.
W. m., common to fair, per pound.	.12⅜	.16		
Eggs, near-by, fancy, per dozen.	.36	.25	5 cents per dozen.	Free.
Western, firsts, per dozen	.27	.19½		
Dried fruits:				
Apples, evaporated, choice, in cases, 1912, per pound.	.07½	.10½	2 cents per pound	1 cent per pound.
Apricots, Cal. st., boxes, per pound.	.12½	.14½	2 cents per pound.	1 cent per pound.
Citron, boxes, per pound	.11½	.12	4 cents per pound.	2 cents per pound.
Currants, cleaned, bbl., per pound.	.07½	.07	2 cents per pound.	1½ cents per pound.
Lemon peel, per pound	.09½	.08¼	do	1 cent per pound.
Orange peel, per pound	.09½	.08¼	do	Do.
Peaches, Cal. stand., per pound.	.06	.06	1 cent per pound.	Do.
Prunes, Cal. 30-40, 25-lb. box.	.11⅛	.11½	do	Do.
Raisins, Mal., 3-cr. box	2.90	3.00	2½ cents per pound.	2 cents per pound.
California standard loose muscatel, 4-cr., per pound.	.05½	.07½		
Flour			25 cents per bushel.	Free with conditions.
Spring patent, per barrel	4.40	4.55		
Winter patent, per barrel	4.80	4.90		
Spring, clear, per barrel	4.10	4.10		
Winter, clear, per barrel	3.50	4.00		

Wholesale quotations of commodities—Continued.

Article.	Oct. 4, 1913.	Apr. 4, 1914.	Payne-Aldrich rates.	Underwood rates.
Grain:				
Wheat, No. 2, new cr., per bushel.	$.96	$1.05	25 cents per bushel.	Free with conditions.
Corn, No. 2, yellow, per bushel.	.70½	.72½	15 cents per bushel.	Do.
Malt, per bushel	.84	.72	45 cents per bushel.	25 cents per bushel.
Oats, No. 2, white, per bushel.	.47½	.46	15 cents per bushel.	6 cents per bushel.
Rye, No. 2, per bushel	.71	.68½	10 cents per bushel.	Free.
Barley, malting, per bushel	.74	.60	30 cents per bushel.	15 cents per bushel.
Hay, prime timothy, per 100 pounds.	1.05	1.05	$4 a ton	$2 a ton.
Straw, long rye, No. 2, per 100 pounds.	.82½	.85	$1.50 a ton	50 cents a ton.
Lumber			50 cents to $1.25 per M feet.	Free.
Hemlock, Pa., base, per 1,000 feet.	24.50	24.50		
White pine, No. 1 barn, 1 x 4, per 1,000 feet.	37.50	37.50		
Oak, plain, 4 x 4, 1sts & 2ds	59.00	59.00		
Oak, qtd. 6-in., 10 to 16 ft., 1sts & 2nds.	87.00	87.00		
Cottonwood, 1-in., 6 to 13 in. w., 1sts & 2ds.	36.00	38.00		
Red gum, 1-in., 1sts & 2nds	42.00	36.00		
Poplar, 1-in., 7 to 17 in. w., 1sts & 2nds.	61.00	60.00		
White ash, 4 x 4, firsts	52.00	53.00		
Chestnut, 4 x 4, firsts	53.00	50.00		
Cypress, shop, 1-in	28.00	28.00		
Mahog. No. 1 com., 1 in., per 100 feet.	12.00	11.50		
Spruce, 2x4, 14 ft., per 1,000 feet.	23.00	23.00		
Yellow pine, L. L. flatfil, per 1,000 feet.	28.00	30.00		
Cherry, 4x4, firsts, per 1,000 feet.	95.00	95.00		
Basswood, 4x4, firsts, per 1,000 feet.	41.00	41.00		
Molasses and sirups:				
New Orleans, cent common, per gallon.	.15	.15	3-6 cents per gallon.	2½–4½ cents per gallon.
Open kettle, per gallon	.35	.35		
Sirup, common, per gallon	.12	.12		
Oils:				
Cocoanut, Cochin, per pound	.13½	.10½	3½ cents per pound.	3½ cents per pound.
Cod, domestic, per gallon	.41	.38		
Newfoundland, per gallon.	.44	.40	15 cents per gallon.	Free.
Corn, per pound	6.25	6.45		
Cottonseed, sum'r, white, per pound.	7.20	.07½	Free	Do.
Lard, prime, city, per gallon.	.95	.93	1½ cents per pound.	Do.
Extra No. 1, per gallon	.61	.59		
Linseed, city, raw, per gallon.	.50	.54	15 cents per gallon.	10 cents per gallon.
Neat's-foot, prime, per gallon.	.64	.64		
Palm, red, per pound	.06⅜	.06⅜	Free	Free.
Petroleum, cr. at well, per barrel.	2.50	2.50	do	Do.
Refined, in bbls., per gallon	.13	.13		
Tank, wagon delvy., per gallon.	.09	.09		
Rosin, first run, per gallon	.32	.32		
Soy bean, per pound	.06⅜	.06½	do	Do.
Peas, Scotch, choice, per 100 pounds.	3.30	2.25	25 cents per bushel.	10 cents per bushel.
Provisions, Chicago:				
Beef, live, per 100 pounds	7.15	6.05	1½ cents per pound.	Free.
Hogs, live, per 100 pounds	8.30	8.65	$1.50 per head.	Do.
Lard, prime, steamed, per 100 pounds.	10.95	10.47½	1½ cents per pound.	
Pork, mess, per barrel	21.60	20.82½	do	Do.
Sheep, live, per 100 pounds	3.75	5.40	75 cents to $1.50 per head.	Do.
Short ribs, loose, per 100 pounds.	11.05	11.07½	1½ cents per pound.	Do.
Tallow, N. Y., per pound	.06⅜	.06⅜	½ cent per pound.	Do.
Rice, domestic, prime, per pound.	.05½	.05½	2 cents per pound.	1 cent per pound.
Salt:				
Domestic No. 1, 300-lb., per barrel.	3.79	3.79	7 to 11 cents per 100 pounds.	Free.
Turk's Island, 200-lb., per barrel.	1.00	1.00		
Salt fish:

I also insert another schedule showing the prices as given to-day by the Bureau of Labor Statistics of the retail prices of commodities in the city of Seattle on December 15, 1912, and on December 15, 1913, and giving the rate of the tariff on each article under the Payne law and the Underwood law.

This schedule demonstrates that in the city of Seattle at least that the cost of living increased immediately after the Underwood law went into effect. It further shows that some of the most marked increases were upon articles on which the tariff had been entirely removed. This schedule is as follows:

Retail prices at Seattle, Wash.

[Page 146, Bulletin No. 140, Bureau of Labor Statistics.]

Commodity.	Dec. 15, 1912.	Dec. 15, 1913.	Payne-Aldrich rate.	Underwood rate.
Sirloin steak, per pound.	$0.20 –$0.22	$0.20 –$0.25	1½c. per lb	Free.
Round steak, per pound.	.18 – .20	.20 – .22½	do	Do.
Rib roast, bone in, per pound.	.15 – .18	.18 – .22	do	Do.
Chuck roast, per pound.	.12½– .15	.15 – .18	do	Do.
Pork chops, loin, per pound.	.22 – .25	.22 – .25	do	Do.
Bacon, smoked, per pound.	.30 – .35	.28 – .40	4c. per lb	Do.
Ham, smoked, per pound.	.25 – .30	.22 – .35	do	Do.
Lard, pure, tub, per pound.	.15 – .18	.15 – .18	1½c. per lb	Do.
Leg of lamb, yearling, per pound.	.15 – .18	.15 – .20	do	Do.
Hens, year or more old, dressed but not drawn, per pound.	.20 – .25	.22 – .25	5c. per lb	2c. per lb.
Flour, wheat, one-half bag.	1.25 – 1.45	1.30 – 1.45	25c. per bush	Free.
Corn meal, 10-pound lots, per pound.	.03 – .03½	.03 – .03½	40c. per 100 lbs.	Do.
Eggs, strictly fresh, per dozen.	.35 – .50	.50 – .55	5c. per doz	Do.
Eggs, storage, per dozen.	.32½– .40	.32½– .40		
Butter, creamery, print, in 1 or 2 pound lots, per pound.	.40 – .45	.40 – .45	6c. per lb	2½c. per lb.
Potatoes, Irish, per 100 pounds.	.90 – 1.15	1.35 – 1.60	25c. per bush	Free.
Sugar, granulated, per pound.	.057– .066	.52 – .62	Equivalent ad valorem (48.54).	36.25 (free May 1, 1916).
Milk, fresh, unskimmed, delivered, bottled, per quart.	.03 – .10	.09 – .10	2c. per gal	Free.

I also insert another schedule that shows the increase in the imports of merchandise ready for consumption in February, 1914, as compared with the same month in 1913. I have shown that our imports of articles to be used in manufacturing in this country has greatly decreased under the present tariff law. This table demonstrates very strikingly the further important fact that we have greatly increased our imports in finished products. In other words, we are giving our wages and our employment to foreign labor instead of to our own labor.

The schedule is as follows:

Imports of merchandise ready for consumption in February, 1914, showing increase compared with imports in same month in 1913.

Products.	1914	1913	Increase.	Per cent.
Aluminum, manufactures of	$136,873	$78,373	$58,500	74.6
Watches and parts of	250,018	182,237	67,781	37
Cotton cloths	1,454,439	727,121	727,318	100
Stockings	372,741	265,169	107,572	40.5
Other knit goods	340,637	43,825	296,812	677
Linen yarns	88,806	62,287	26,519	42.7
Fruit and nuts	3,265,583	2,523,651	741,932	29
Glassware	561,420	463,947	97,473	21
Cutlery	212,356	157,658	54,698	34.6
Tin plate	209,938	27,979	181,959	650
Leather and tanned skins	1,357,428	755,549	601,879	79.6
Gloves	850,933	782,973	67,960	8.6
Paper and manufactures of	1,998,835	1,581,723	417,112	26
Manufactures of silk	3,126,092	2,257,264	868,828	34
Vegetables	1,222,778	848,255	374,523	44
Wool:				
Class 1	4,398,235	2,192,326	2,205,909	100
Class 2	690,195	248,278	441,917	178
Class 3	1,687,964	1,211,219	476,745	39
Woolen cloths	1,564,197	464,742	1,099,455	236
Dress goods	782,121	262,938	519,183	197
Wearing apparel	142,555	113,947	28,608	25
All other wool manufactures	484,450	85,501	398,949	466
Total	25,198,594	15,336,962	9,861,632	64.2

The above figures are from official sources.

The increase in imports as shown above leaves no doubt as to what the Underwood tariff law is doing to industries employing large numbers of American working men and women.

Mr. MONDELL. Mr. Chairman, the newspaper dispatches of last evening and this morning inform us that the Mexican government has agreed to accept the friendly offer of mediation heretofore accepted by our Government, as I understand it, made by the Governments of Argentina, Brazil, and Chile in

connection with the Mexican situation, particularly with regard to the disagreement between our country and Mexico. I think that most of us regret that an offer of this kind was not made and accepted before we went to the very great expense of sending our battleships to the coast of Mexico and before there was the very considerable lamentable loss of life at Vera Cruz, both on the part of our own sailors and marines and on the part of the Mexican people, quite a number of them, perhaps the majority of them, noncombatants. We regret that this offer, which may lead to the settlement of the trouble in Mexico, was not made and accepted sooner. But notwithstanding that, I think every good citizen hopes that the offer now made, and which we hope has been accepted in good faith, covering all questions at issue, will lend to the establishment of peace and good government in Mexico; that there will be no further necessity for warlike operations.

Even though some of us may not be overhopeful of the results of the negotiations now apparently under way or initiated, still, as good citizens, we ought to hope for the best and do all we can to encourage and aid in the settlement that is thus proposed. In this connection, however, I want to call attention to what I consider some very unfortunate occurrences of the past few days. I had not intended to refer to them until we reached the discussion of the naval bill, but as that has gone over I want to discuss them briefly now.

It seems to have been the deliberate purpose of some people to create the impression throughout the country that American citizens have not been generally protected in their liberty, their lives, and their property in the territory controlled by the Mexican federal government. Those of us who have taken the trouble to keep closely in touch with the situation know that it is a fact that amid all of the rumors of war and amid all of the recent warlike operations of our Government American citizens have to a very remarkable degree—a very unusual degree, considering the circumstances and conditions—been protected in their liberties, their rights, their lives and property in the territory under the complete control of the Mexican federal authorities. It is very unfortunate that anyone should attempt to create the impression that there are causes for war which do not exist. This attempt to create a false impression relative to the condition of our people in the territory under control of the Mexican federal government is all the more marked in view of the fact that very little has been said by the same class of people and from the same sources in regard to the repeated outrages which have been perpetrated on our people and other foreigners in territory under control of the so-called constitutionalists. It is possibly not to be wondered at that newspapers of the yellow stripe, desirous of finding a market for their numerous special editions, should seize upon every dispatch or alleged dispatch wafted to them from anywhere and everywhere containing allegations of the arrest, of the insult, and in some cases the putting to death of American citizens in Mexican federal territory. That, perhaps, is not to be wondered at, coming from sensational journals; but it is altogether a different thing and an exceedingly serious thing when we find this same disposition to magnify the troubles in the City of Mexico, to emphasize the difficulties that American citizens may have encountered in leaving the City of Mexico, to exaggerate tremendously the dangers our people have been subjected to, coming from official sources.

In these times of trouble and threatened war the officials of the Government of the United States at least should be careful what they say, should realize their responsibility, and how great an injury they may do when they create the impression that Americans are in peril and danger of their lives when, as a matter of fact, there has been but little danger to the lives of American citizens in federal territory in Mexico and very little if any actual loss of life. As an illustration of this sort of thing from high official sources, let me call your attention to the dispatches that have been sent out and the interviews that are said to have been given out by a gentleman by the name of Canada, who represents the United States at Vera Cruz. Of all the sensation mongers down in that disturbed district Mr. Canada seems to have been the chief. What he has not reported himself officially he has said to newspaper men seeking highly colored reports to such an extent that of all the dispatches which have come from any source as to the conditions of Americans in the city of trouble in Mexico, lurid as they have been from other sources, have not equaled the extravagance of this official representative of the United States.

Mr. RAGSDALE. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. RAGSDALE. Does the gentleman think at this time that criticism of our administration of its consuls will make it any easier for the South American representatives to bring about a settlement of peace?

Mr. MONDELL. I do.

Mr. RAGSDALE. Does not the gentleman think that the American Congress should forbear criticism of anybody until this committee has acted?

Mr. MONDELL. No; my opinion is that if we have an official at the seat of trouble who is attempting to create an erroneous impression, or whether attempting or not is creating an erroneous impression relative to the condition of Americans in the Mexican territory, my idea is that he ought to be criticized, for two reasons: First, in order that if criticism has any effect at all on him, which I doubt, he shall desist from a course that is likely to inflame our people until they will be disinclined to accept any reasonable settlement that may be proposed; and, second, because when these people enter upon the negotiations in Mexico they should not have the back fire of this overofficious American representative in Vera Cruz sending out or making sensational reports with regard to alleged conditions that do not exist. I am not criticizing the President or the administration in this particular matter. I am not criticizing anyone but the man I have mentioned.

Mr. RAGSDALE. Will the gentleman permit another question?

Mr. MONDELL. Yes.

Mr. RAGSDALE. Does not the gentleman think that criticism and control of that gentleman should come from the State Department and that the representation that the gentleman has to make should be made to the State Department? Is the gentleman relying upon information received from correct authority or upon newspaper reports in his criticism? The information may not be correct.

Mr. MONDELL. I have not reached the time or condition when I no longer believe that this is a coordinate branch of the Government. As a Representative of a very considerable American constituency, I feel that I have a right, and that it is my duty, to criticize American officials when in my opinion these officials are attempting to or if they are not attempting to are in fact creating an impression on the part of the American people altogether erroneous and altogether contrary to the facts. And if I had no other reason for doing it, then this would be sufficient, and that is that no man has a right, particularly a man in an official position, who ought to know better, to arouse the fears of the relatives and the friends of these Americans in Mexico by sending out inflammatory dispatches about conditions that do not exist and prophesying the slaughter and execution of Americans that has not and is not likely to occur.

Mr. RAGSDALE. Will the gentleman say that the reports that are sent out are incorrect and that the reports as published are correct?

Mr. MONDELL. I will say to the gentleman that I take it for granted that the newspapers of this country, including those that are inclined to publish sensational news, certainly are informed and become informed eventually as to just what has and does happen, and the dispatches of to-day do not bear out either the statements or the prophesies of this official representative of our Government at Vera Cruz. It is not true that mobs have been in control of the City of Mexico to any considerable extent, insulting and threatening Americans and looting their property; that it is not true that Americans have been executed by order of the federal government. Consul Canada, I believe, has declared the one and repeatedly prophesied the other. He would be doing his full duty if he reported the facts as they are and as he knew them to exist, and the best service he can render his Government is not to inflame the public mind by sensational assertions and prophesies.

But Consul Canada is a minor official. He may be a very lovable gentleman and he may mean well, he may in other respects be a good official. I do not know him. I criticized him in good faith because I feel it my duty to criticise him. But I want to call the attention of the House to some statements that have been given out on much higher authority than that of Consul Canada. I call attention to the Washington Times of Saturday, April 25, on the third page, in which there is a message sent by the Secretary of State to Herbert A. Parkyn, president of the Motzorongo Co., Chicago, Ill. It is as follows:

CHICAGO, *April 25.*

Twenty refugees, 19 of them Americans, and 1 a British subject, are believed to have been executed following their capture by Huerta's men near the 155,000-acre plantation of the Motzorongo Co., of Chicago, in Mexico late Friday.

Secretary of State Bryan wired Dr. Herbert A. Parkyn, of Chicago, president of the company, to-day, telling of the seizure and probable execution of the party. A. M. Turner, of Chicago, is believed to be one of the 20 shot.

Turner was sent to the plantation by the company to order the force to seek protection in case of trouble, but from Bryan's message it is thought he arrived too late.

Bryan's dispatch names a majority of the party captured.

The Bryan message follows:

"HERBERT A. PARKYN,
"President Motzorongo Co.,
1511 Marquette Building, Chicago, Ill.:

"The following, date April 24, at 10 a. m., and received from the American consul at Vera Cruz, is sent for your information:

"'Am just reliably informed at 8 o'clock Tuesday night soldiers stopped train in vicinity of Tierra Blanca on Vera Cruz Isthmus Railroad, taking following prisoners:

"'W. Mangum, railroad superintendent.

"'Elliott, engineer.

"'Riley and Hart, conductors.

"'All are Americans. These persons are taken to Cordoba or Orizaba and believed ordered shot.

"'Some 18 or more Americans left for Tierra Blanca. C. B. Herron, secretary Isthmus Railroad, wife and three children; J. O. Cook, chief engineer; John Flighter, conductor; J. F. Langston and wife; Kerwin, engineer; and Mrs. Mrs. George Macomber.

"'Same soldiers stopped at Hacienda Motzorongo on same railroad, taking prisoners Edward Wunsch and son Sidney; A. M. Turner, secretary of the Hacienda Motzorongo, all Americans; also a man named Boyd, British subject.

"'All taken to Cordoba or Orizaba. It is reliably stated all these prisoners may be executed.

"'Admirals Fletcher and Badger have this information before them.'

"BRYAN."

Mr. MADDEN. Who said this?

Mr. MONDELL. The Secretary of State sent that cheerful message across the continent to the troubled and anxious relatives of these men. What information did the Secretary of State have? Why, if there was anything in the statement at all, would not the newspapers have had it? The first account we had of this outrage came from Chicago. Chicago is a progressive, up-to-date town, but it is some distance from Vera Cruz, and the dispatch coming from Chicago did not impress anyone very much. But when the Secretary of State takes it upon himself to wire across the continent to the anxious friends of these people, to the relatives, that they are ordered to be shot, the Secretary of State at least ought to have some real facts on which to base that sort of alarming statement.

Mr. RAGSDALE. Will the gentleman yield for a question?

Mr. MONDELL. I do not believe, answering the gentleman's question in advance, that he had any such information.

Mr. RAGSDALE. Does not the gentleman think the Secretary of State had that information?

Mr. MONDELL. I do not believe he had it.

Mr. RAGSDALE. Why not?

Mr. MONDELL. Because there has been nothing in the dispatches from other sources to indicate that anyone had any such information from any source that could be construed as at all reliable, and because up to this time the men have not been shot.

Mr. RAGSDALE. Will the gentleman take the position that after the Secretary of State, acting on the information that he had, had sent this telegram out, no change could have taken place in the attitude of the Mexicans there, and because there had been no execution the gentleman hastily criticizes our Secretary of State adversely, in the face of war, with our men on the firing line? Does the gentleman think that that adds to the prestige of the American flag or the American arms [applause on the Democratic side], or is the gentleman looking for an excuse to criticize?

Mr. MONDELL. Mr. Chairman, I did not yield to the gentleman for a speech. The gentleman can not disturb me with his cheap appeals to the flag and to patriotism. I do not yield to the gentleman from South Carolina or to any gentleman on the ground of patriotism. I do not have to proclaim my patriotism. I take it for granted that every Representative of an American constituency in this House is patriotic, and I never question any man's patriotism except that I might be tempted to question the patriotism of a man who stands here and attempts to parade it. He would be the only man whose patriotism I might be tempted to question.

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I do not yield for a speech.

Mr. THOMPSON of Oklahoma rose.

The CHAIRMAN. Does the gentleman from Wyoming yield to the gentleman from Oklahoma?

Mr. MONDELL. Yes.

Mr. THOMPSON of Oklahoma. Mr. Chairman, I just wanted to know if the gentleman is sorry because it did not occur?

Mr. MONDELL. Mr. Chairman, I am delighted, I am pleased beyond measure, that it did not occur, and if I had been Secretary of State, not knowing any more about it than the Secretary probably did, I certainly would have hesitated to inflame the American people. I certainly would have hesitated to harrow up the souls of these relatives by a dispatch like that, and you can not hide it under any cheap appeal to the flag or to patriotism. Of course we are going to uphold the flag. Of course we are going to uphold our troops wherever they may be gathered under our standards, and nobody except a man who possibly may question in his own heart his own patriotism would raise that question with regard to anyone. [Applause.]

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I yield, but not for a speech.

Mr. RAGSDALE. Does the gentleman think that the criticism of the Secretary of State at this particular juncture adds to the ease with which our forces abroad may win renown for the flag or defend this country?

Mr. MONDELL. Mr. Chairman, I think that any proper criticism of any man who attempts to inflame 90,000,000 patriotic people at a time like this—that any proper criticism of any improper act that tends to make the situation worse helps every good cause everywhere.

Mr. RAGSDALE. Mr. Chairman, will the gentleman permit a further question?

The CHAIRMAN. Does the gentleman yield?

Mr. MONDELL. Oh, if the gentleman is taking that side of it——

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. For a question.

Mr. RAGSDALE. Does the gentleman pretend to put the Secretary of State among the jingoes who try to create a condition of war in this country?

Mr. MONDELL. Mr. Chairman, I am not attempting to put the Secretary of State anywhere. I am simply trying to point out where he has put himself. [Laughter and applause on the Republican side.] I am not responsible for what the Secretary of State did. I have not said that the Secretary of State was a jingo. I have been rather inclined to think that he was not; but that kind of message, if sent by anyone else—and I want to say that I have high regard for the office of Secretary of State and high personal regard for the gentleman who occupies it—if anyone else had sent that message, I would be tempted to say that he was trying to make conditions worse by creating an erroneous impression about them, and that that is jingoism of the worst sort coming from anybody anywhere. It is bad enough as it is, Mr. Chairman. We are all of us pretty quick on the trigger when it comes to the question of the rights of American citizens and when it comes to the honor of the flag, and the man who will attempt to create in the public mind an impression of a condition that does not exist, which is liable to drive a nation headlong into war, is not performing the part of a good citizen, to put it no stronger than that.

Mr. THOMPSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. I yield to the gentleman.

Mr. THOMPSON of Oklahoma. If I understand the gentleman correctly, he criticizes Consul General Canada for his report made at Vera Cruz.

Mr. MONDELL. Mr. Chairman, I have not time to yield for a speech. I have made my statement. Consul General Canada has recently made a report that indicates that these alarms and exaggerations of his were without foundation. So that Consul General Canada has condemned himself out of his own mouth.

Mr. THOMPSON of Oklahoma. My understanding is that the gentleman from Wyoming criticizes the constitutionalists of Mexico.

But I want to know what the gentleman says about Mr. Hanna, the consul at Tampico, and about the conduct of Huerta's government, and the conduct of the constitutionalists in Mexico, as reported this morning?

Mr. MONDELL. Mr. Chairman, I have not time to go into that report of Consul Hanna. I think it illuminating as an evidence of how little a consul may see and how little he may report. He does say some things about alleged outrages on the part of federal soldiers, and the way in which he reports them raises in the mind of any fair-minded man the impression that he has grossly exaggerated.

He tells about insults to the flag by individual Mexicans, and then he concludes by saying that he does not know or has not heard, or something of that sort, of any excesses by the rebels, by so-called constitutionalists. I do not know what happened at the taking of Monterey by the rebel forces, because I was not there. I am informed, however, on what I consider most excellent authority, that at the time of the taking of that city by the constitutionalists an American flag fastened across the door of a building to protect Americans was torn down by the rebels or constitutionalists. They broke open the heavy door and entered the building in which the Americans had gathered for safety and tore down the flag found hanging there, and trampled it under foot. They grossly insulted women gathered there, demanded money, looted the building, and in the mêlée

that resulted one American, at least, was wounded, and yet our Consul General Hanna never heard of it. He seems to be well informed in regard to alleged misconduct on the part of the federals, but occasions such as that I have related entirely escaped him. Certain officials of our Government do not see or recognize outrages when perpetrated by the——

Mr. THOMPSON of Oklahoma. Will the gentleman yield?

Mr. MONDELL. Not until I finish my sentence.

Mr. THOMPSON of Oklahoma. Excuse me.

Mr. MONDELL. Can not see the outrages perpetrated by the constitutionalists. Why, one of our delightfully companionable representatives down at Chihuahua the other day, so the dispatches tell us, was in the warm embrace of a gentleman by the name of Villa, asking him to please be good, and Mr. Carothers was sent there for that purpose by the Secretary of State.

Who is Villa? Why, the first time he came into international prominence was when the American ambassador to Mexico demanded his arrest and punishment for looting American ranches in Mexico. They say he can read, because he learned to read in the penitentiary when under confinement because of looting American property. If he did not kill American citizens in that foray, he at least drove them away from their property. This looter does not like Huerta. Why? Because when Huerta, as one of the generals of Madero against Orozco, was endeavoring to conduct warfare in a civilized manner, this gentlemanly bandit wanted to attack and loot an unprotected town. Huerta insisted that he should not do it, and when he disobeyed orders ordered him to be shot, and only withdrew his order when this brave leader of the constitutionalists got down on his knees and plead for his life.

Mr. LLOYD and Mr. THOMPSON of Oklahoma rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. MONDELL. I yield to the gentleman from Missouri [Mr. LLOYD].

Mr. THOMPSON of Oklahoma. I beg the gentleman's pardon.

Mr. MONDELL. Do I understand the gentleman desires——

Mr. THOMPSON of Oklahoma. I will not ask any further questions. I do not care anything about the gentleman.

Mr. MONDELL. Oh, very well; as you like.

Mr. MANN. The gentleman from Wyoming does not have to yield.

Mr. THOMPSON of Oklahoma. I do not care whether the gentleman yields or not.

Mr. MONDELL. I yield, if the gentleman desires.

Mr. THOMPSON of Oklahoma. The gentleman does not have to sit in his seat and tell me whether a gentleman wants to yield or not.

Mr. MONDELL. I have yielded to the gentleman from Oklahoma several times. Then, as he was in his seat, as I recall, my friend from Missouri [Mr. LLOYD] rose. For the moment I could not yield, but as soon as I could, supposing under the ordinary courtesies of the House it was my duty to yield to my friend from Missouri, I did so.

Mr. LLOYD. Mr. Chairman, I very much regret the gentleman from Oklahoma did not seem to appreciate the situation that is presented. I do not think there is any intention of discourtesy on the part of the gentleman from Wyoming at all.

Mr. MONDELL. Certainly not.

Mr. LLOYD. I rose simply to ask a question I had in mind, and I am sure the gentleman from Wyoming had no intention of mistreating the gentleman from Oklahoma.

Mr. MONDELL. I will be very glad to yield to either gentleman.

Mr. LINTHICUM. Will the gentleman yield to me while these gentlemen are settling their difference?

Mr. MONDELL. I will be glad to do so.

Mr. LINTHICUM. I merely want to ask how long has Consul Canada been in the service in Mexico?

Mr. MONDELL. Well, I do not know; I know nothing of the gentleman at all.

Mr. LINTHICUM. He was not appointed by the present administration.

Mr. MONDELL. Well, I am not holding the present administration responsible for him. My criticism was directed against the gentleman himself and no one else. But let me make this suggestion to the gentleman: What can you expect from the consuls in Mexico when one official representative embraced Villa and asked him to please be an ally of ours; when everywhere our consuls realize that it is the determination of our Government—not of our pople, but of our Government—that the present federal government in Mexico, without regard to any other feature of the situation, must be overthrown, must be eliminated from the situation? What can you expect of our consuls except that they should echo the views and sentiments held and expressed by their superior officers? Assuming, for the sake of the argument, that Huerta is no better than Villa, why do we war on the one who has in the main protected our citizens and their property and make a friend and ally of the other, who until the past few days has made no pretense of doing anything but loot and plunder?

Mr. LINTHICUM. The reason I asked the gentleman that is, the gentleman brings in the Secretary of State in his argument and then brings in this consul, and I wanted to show that this consul was not appointed by the present administration.

Mr. MONDELL. I do not care who appointed him, and I do not know who appointed Mr. Carothers, and I have no objection to Mr. Carothers fondly fondling and embracing Mr. Villa if he likes that sort of a man. That is his affair, not mine. He was sent there as a representative of this great Government, with its twenty-odd battleships in Vera Cruz, with its tens of thousands of fighting men on the border, with the best fighting people in the world back of them; he was sent down to try to negotiate peace with a man who began life as a looter of American property and has continued up to this time as a bandit chieftain, regardless of the laws of war, relentless and murderous in his methods.

This man drove from Mexico the other day some 600 American Spaniards, people who have lived in that country for generations; confiscated their property and sent them across the border. We are responsible for those Spaniards under the Monroe doctrine. We have assumed the responsibility for the nationals of all foreign powers down there. It is as much our duty to protect these Spaniards and their property as it is to protect our own people, and I do not know but that it is a higher responsibility we owe these unfortunate nationalists of Spain, because we have said that Spain can not and must not intervene. And yet what did we do? Our Government, I am informed, in a polite and semiapologetic note asked Mr. Villa if he please would withhold or modify the orders of expulsion and confiscation. And what kind of an answer did we get? He said in effect that he would do as he darn pleased, and the State Department reported the incident closed. This is the gentleman that we are now officially embracing and imploring to be good to us.

Mr. LINTHICUM. I want to say to the gentleman for his information that Consul Canada, of whom he speaks and thinks has done wrong, is a member of his own party, and has been in the service down there for about 12 years, and is from Indiana. So he ought not to criticize the Secretary of State about things that Consul Canada is doing when his own party appointed him and has had him in the service for 12 years.

Mr. MONDELL. The gentleman from Maryland, who is generally very fair, can not help falling into the same attitude that his party has assumed from the beginning toward these things, of trying to put a partisan color to them. To the gentleman from Maryland it is all a matter of politics. What do I care what party Canada belongs to or if he does not belong to any party? If he bore the waving ears of the Democratic donkey, the classic features of the Republican elephant, or the antlers of the Bull Moose, it would make no difference to me in my criticisms of him. What I have attempted to show is this, that in times of trouble and threatened war, with the dogs of war unleashed, with troops on the border, it is bad enough to have irresponsible people send out exaggerated dispatches, and it does not become the representatives of the American people to attempt to inflame the public mind by sending out dispatches not based on the facts and making prophecies which are proved to be without foundation. That is what I have attempted to say. And I include in that criticism all of our officials who may have erred in that regard, though I have mentioned only these two.

Let us hope that the representatives of these South American Republics may be able to bring about an understanding which will restore peace in Mexico under which orderly constitutional government may be established there. While we are trying to do this, let us not attempt to mislead the people, to so inflame public sentiment that an honorable settlement will be practically impossible.

It will be impossible, if the wires are to be laden with official dispatches that Americans have been insulted and their property destroyed, that our citizens have been killed, when there is no foundation for it. As a matter of fact, the probability is—and I am borne out by the latest dispatches—that, with two possible exceptions—and I doubt if the dispatches are correct in their case—that, with the possible exception of these two, not an American citizen in federal territory in Mexico has lost his life or been seriously injured in the City of Mexico or en route from there to Vera Cruz. Some of the sensational dispatches of which I am speaking told us that Mr. O'Shaughnessy, our

chargé d'affaires at the City of Mexico, was compelled to slink away in the dark and try to escape by way of the west coast. As a matter of fact, he was escorted out of the city to the railway station by the finest crack military troop in Mexico, the President's guard, and protected all the way to Vera Cruz, as he should have been. In other words, the federal Government in Mexico has attempted as far as it has been humanly possible for it to do so to protect Americans in Mexico. Are not the facts bad enough as they are? Must the conditions be painted in heightened colors to serve some sinister purpose? I do not think it should be done; and, if done from official sources, I think it our duty to criticize.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. STEPHENS of Texas. Has the gentleman heard of the American ranchman who lived in Texas and whose property was taken away from him, a great many horses, and carried across into the enemy's country?

Mr. MONDELL. Was his name Vergara?

Mr. STEPHENS of Texas. Yes. And when he was invited over there by one of Huerta's captains to get his money, he was seized upon and murdered, and it was denied they had murdered him until Texans went over there and brought his body back. Has the gentleman heard of that?

Mr. MONDELL. Yes; and the remarkable part of that is that, assuming that it occurred just as the gentleman has stated, it is the only authenticated case, if it is authenticated, of an American citizen attending to his own affairs suffering death at the hands of the federals in Mexico in all these months during which we have been breathing threatenings and slaughter from high places against the government of Huerta. The probability is, however, as the gentleman from Texas [Mr. STEPHENS] probably knows better than I do, that that affair of Vergara was a purely personal one. That was an isolated federal garrison, probably not in direct communication with the federal government.

The ranches in the neighborhood had had dealings with these men. The probability is that there was some personal trouble and disagreement, and that his death had no bearing whatever upon the condition of war then existing, and that his death in nowise resulted from the fact that he was an American citizen and that these soldiers were the soldiers of the federal government. That is probably the fact of that one isolated case. But I would not leave that case unchallenged. Had I been the President I think I would have seen to it that we knew more about it, and I would, I believe, have seen to it that we knew more about the killing of Benton by Villa, or one of his aids, a killing which was probably a simple, plain, cold-blooded murder without provocation, and only 1 out of 150, as was stated by a very conservative man in the Senate of the United States the other day. I do not vouch for that number, but the Senator who gave it is a man who ordinarily does not speak unless he knows whereof he speaks. But all these are overlooked by our official representative, who when last heard from was in fond embrace of the arch villain who committed or connived at or had to do with many of these deeds. Meanwhile from official sources we have wild and incendiary accounts of happenings that never happened and prophecies of dire impending calamities that never came to pass.

As a relief from these alarms and sensations, I am pleased to place in the RECORD just a paragraph or two from the latest issue of the Washington Times, which I have just this minute received and which I am sure is up to date:

Transportation as far as Soledad, 26 miles from Vera Cruz, will be furnished by the Huerta authorities for all Americans leaving Mexico City. This information was given by Admiral Craddock, of the British Navy, to Admiral Badger, who transmitted it to Washington to-day.

A train with 250 Americans probably will leave Mexico City some time to-day.

According to advices received by Secretary of State Bryan, there are still from 600 to 700 Americans in Mexico City. All is quiet and there is no fear for them.

Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Twelve minutes and a half.

Mr. MONDELL. I yield 10 minutes to the gentleman from New York [Mr. WALLIN].

Mr. WALLIN. Mr. Chairman, I am opposed to this bill, but not because I am wedded to the half-and-half plan; but after this law has been in operation for 36 years and the time has come when that division is not fair, when some other proportion would be more just, I think the matter should be gone into thoroughly. I do not think that this plan of bringing in a bill every week or two, affecting the property interests here in the District of Columbia, is fair.

Mr. Chairman, this bill was originally intended to apply to real estate only. At the last moment and by a very close vote an amendment was added taxing personal property of all kinds and also retaining the fixed rate of assessment. Thus, its originators evidently were not willing to allow this question to be decided singly and alone on its merits, but so arranged that it must be considered in connection with another proposition, thus endangering the original question.

If, owing to this and similar action, the present acute state of feeling between the property owners in the District of Columbia and the Congress has ever been surpassed, it is beyond my knowledge and time for research. Whether or not that is the fact, the situation of to-day is to be deplored and should be amicably adjusted. While it was said in olden time that "it takes nine tailors to make a man," it has always been conceded that two parties are necessary to a difference. The residents of Washington, it is true, have much to bear. Congress is constantly changing in membership, in personnel of its committees, in policy, and in its estimates of the necessities for the District, so that the permanent resident is uneasy as to what may or may not be done which will affect his personal interests. Then, too, the peculiar form of government for the District entails hardship and also taxation without representation. The executive officers and employees are responsible in no way to the people. They are unsympathetic and often autocratic in their management of affairs, because they are selected for position not by ballot but appointment, coming virtually under the title of patronage. Responsible to Congress for their financial policies in a way, the method of carrying out their determinations is such that those most affected are not consulted or advised with. It is always the little things that sting and create opposition. Most people, not only elsewhere but in Washington, believe their homes are their castles, and while perhaps ready and willing to bear any reasonable burden, are desirous of at least decent treatment at the hands of those who have in their keeping the authority of the municipal government, but whose administration thereof should not permit them to enter the precincts of a man's home without at least a courteous inquiry if it will be convenient.

Sudden and frequent changes of policy, entailing useless expense on the taxpayers, without even a suggestion of the fact, is not welcomed, and yet I am told is of frequent occurrence. All these little things go to creating and emphasizing a feeling on the part of the people toward Congress and the administering officials of the District. Then, again, there is as much of the selfish element in Washington as in any other city, and because this is the Capital of the Nation it seeks excuse for making itself felt. The man who wants something for nothing, the agitator, the dissatisfied, all help to increase the unpleasantness of a situation when it most injures the cause of those sincere in their opposition.

On the other hand, is Congress blameless for the present differences? It is a matter of record that when Washington was chosen as the site for the capital, the few people here were as enthusiastic and as generous as would have been those of any other place. They had nothing whatever to say with reference to the planning of the city or the uses to which their gifts of land were put. The public authorities did all that for them, and from that moment until the present they have enjoyed an almost monarchial form of government, so far as their participation in the affairs of the city is concerned. True, they have made money. True, the worth of their property has increased beyond their wildest dreams; and true, also, as charged here, speculations in land by those whose only claim on the city was their ability to buy cheaply and sell dearly have increased their purses. But that very fact made for the betterment of the city in many ways, and is always an adjunct, if not always a necessity, yet always in some degree beneficial to the comfort and stability of an increasing population. In this direction have the people benefited, but without part in their self-government for many years.

That Congress intended to make of Washington one of the most beautiful cities in the world is unquestioned, and that it did not expect the people of the District to pay for that realization is also evident. As far back as 1800 President Adams, speaking of the District, said to Congress:

You will consider it as the capital of a great nation, advancing with inexhaustible rapidity in arts, in commerce, in wealth, and in population.

From that time until to-day, with varying enterprise and regularity and under different systems of taxation in the District, Congress has proceeded to carry out the original scope and plan for the city with creations of added merit. This work has continued with more or less regularity until to-day, when it is argued that former policies of nearly every name or nature must be abandoned, a new scheme of taxation inaugurated, the Government relieved of a large share of its responsibility, and

but little heed paid to making the city the beauty spot which its founders intended for it.

On several occasions there appears to have been cause or need for investigation into the affairs of the District. In 1835 a most exhaustive inquiry into its finances was instituted and carried through to a report. In 1875 another investigation was made, including the method of taxation, and so forth. In 1874 the House Committee on the Judiciary reported regarding "the extent and character of the mutual obligations between the Government and the District in regard to municipal expenses," in which it was found:

The Federal City was to be a temple erected to liberty, toward which the wishes and expectations of all true friends of every country would necessarily be directed; and, considered under such important points of view as evidently controlled the minds of the founders, it could not be calculated on a small scale. Everything about it was to correspond with the magnitude of the object for which it was intended. It foresaw a far distant future when it was to be the center of a continent under one form of government, looking to it for its laws and for its protection. It was to be a city where all improvements made and expenses incurred were to be for the benefit of the whole people.

Viewing the Capital City in this national aspect, we may well understand the motives which governed its founders in imposing upon all who were to come after them such duties and responsibilities toward it as would be peculiar to the Capital City alone, and which would fully justify a liberal if not a munificent policy in expenditures.

As to the mutual obligations of the Federal Government and the citizens to defray these expenses, the committee find little difficulty. It is clear, if this National Capital was founded for the use of the United States and was placed under its exclusive government and control, and upon a scale of magnificence appropriate only for a national capital, it never could have been contemplated that the burden of expenditures should fall upon those citizens of the United States who might temporarily or permanently take up a residence at the Capital.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. WALLIN. Will the gentleman let me have another minute?

Mr. MONDELL. Mr. Chairman, I yield two minutes to the gentleman.

The CHAIRMAN. The gentleman from New York is recognized for two minutes more.

Mr. WALLIN. I read further:

Originally we know there was no population here to which the Government could look for contributions toward these expenditures, and as the city was not to become one of trade and commerce and manufactures the local population could not be looked to in the future as being sufficient, either in numbers or wealth, to carry out the magnificent intentions of the founders. Nor, indeed, would it have been just to impose this burden upon them, for upon the theory upon which the Capital was founded all these expenditures would ultimately be for the benefit of the whole people, and justice would dictate that the burden should fall upon the whole people.

I believe that this feeling permeates this country to-day. The people look upon Washington as a national asset. They are proud of it and object not to any step which will add to its beauty in any way. They wish to see it a model city—abreast or leading any other capital in any other nation. They note with regret our obsolete school structures, our obsolete sanitary arrangements. They are willing to see the Government expend its funds for betterments in Washington, for, after all, it is their city, made possible only by the patriotism, the independence, and the suffering of their forefathers. They admire the governmental structures, the wide avenues, the beautiful parks. They criticize the poorly lighted streets, the brick pavements, the dumping of sewage in the historic river at their feet. They are irritated because of the meager accommodations afforded the President of their country for the transaction of business. They are a unit for a Washington beautiful, a Washington unsurpassed.

This can only be attained by a complete and thorough cooperation between the Congress and the people of this governmental reservation, formed for the purpose of the making of Washington the greatest capital of the greatest Nation in the world. [Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. MONDELL. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Half a minute.

Mr. JOHNSON of Kentucky. Mr. Chairman, I ask unanimous consent that general debate on this bill now close.

Mr. MANN. I would like to have half an hour.

Mr. JOHNSON of Kentucky. We tentatively agreed during the gentleman's absence that this debate should be closed long ago. The gentleman from Wyoming [Mr. MONDELL] was here representing the gentleman.

Mr. MONDELL. I will say, Mr. Chairman, to the gentleman from Kentucky that I did not intend to talk over 45 minutes at the outset; but, as the gentleman knows, I was interrupted by gentlemen on the other side and answered their questions, and that prolonged my remarks. Mr. Chairman I yield half a minute to the gentleman from Washington [Mr. FALCONER].

Mr. JOHNSON of Kentucky. I make the point, Mr. Chairman, that the gentleman has no time. His time has expired.

The CHAIRMAN. The gentleman did have half a minute remaining. I will recognize the gentleman from Washington [Mr. FALCONER] and the gentleman from Kentucky immediately afterwards. The gentleman from Washington is recognized.

Mr. JOHNSON of Kentucky. Mr. Chairman, I believe I have recognition from the Chair. Have I not the floor?

The CHAIRMAN. The Chair will state to the gentleman that the Chair did recognize him, but the gentleman from Wyoming has a half minute remaining, and the Chair suggested to the gentleman from Kentucky that the gentleman from Washington [Mr. FALCONER] would be recognized and then the gentleman from Kentucky would be recognized. The gentleman from Washington [Mr. FALCONER] is recognized.

Mr. FALCONER. Mr. Chairman, we have just listened to a dissertation by the gentleman from Wyoming [Mr. MONDELL] on the perplexing problems of the Mexican difficulty. We also read this morning of the undesirable conditions obtaining in Colorado, where up to this time little has been done to bring about peace between the warring parties to the industrial conflict in the mining regions.

MEXICO AND INTERNATIONAL DIFFICULTIES—COLORADO AND DOMESTIC DIFFICULTIES.

For the moment, Mr. Chairman, we wonder if the work is not too big for the present administration. The final solution will answer the query.

I read in the morning paper:

"Gov. Ammons, of Colorado, telegraphed to the White House yesterday that the warfare had grown to such proportions that the State troops now are helpless to cope with it.

"Senator THOMAS also took to the White House a telegram received by him from Gov. Ammons. The governor said both sides were preparing for trouble, and that the strikers were bringing reenforcements and arms and ammunition into the State. He made it plain that he considered the situation serious.

"The Senator told White House officials that the State was nearly bankrupt, and that he did not know what could be done in case a request for Federal troops was not granted. He laid before the President the following telegram received by him last night from a close friend in Denver:

"'The situation is getting more urgent every minute. Strikers are absolutely disregarding truce, and took Pictou mines, near Walzenburg, this morning, and at this moment heavy fighting is going on at the Chandler mines, near Canon City. There has been heavy shooting there all day. I can not hear of any fatalities. The strikers largely outnumber the mine guards, and the men and their families have had to flee to the hills. There is every probability of strikers gaining the camp and a possibility of their securing the machine gun there. The union has also purchased all the guns and ammunition in Glenwood Springs. We look for trouble there. They are also securing automobiles in small towns throughout the State and buying all the guns and ammunition. I trust President Wilson will order Federal troops here to-morrow.'

"Senator THOMAS broke down and cried when he recited the horrors of the strike in the mining camps. Women and children are being killed without an opportunity to defend themselves. They live in trenches and tunnels under their tents, he said.

"SITUATION GROWING WORSE.

"Senator THOMAS told the President last night that the situation in Colorado was growing worse, and that Federal assistance was needed immediately."

The above, Mr. Chairman, presents an incident attendent upon mining operations in the several States all too frequent of late.

Is it not possible to enact legislation that will tend to put a stop to such occurrences?

Tears of emotion and sentiment, salted by senatorial gentleness, is not what is wanted, but what is needed is substantial legislation covering the responsibilities involved in developing and producing the product of the natural resources of the country.

Here we have in Colorado minerals—natural resources—for the product, and the public for the market, interests of the whole people, combined in an industry where the employers and the employees are involved in a conflict bringing death and disaster while the public looks on.

Are we of this Congress to continue here paying little heed to the demands of this undesirable situation?

Why does not our Committee on Mines and Mining, having this matter under consideration, bring in and act upon its investigation? Why have not we—the Congress—long before this time taken steps to bring an end to this industrial warfare?

Gov. Ammons asks for Federal troops, announcing that the treasury of Colorado is depleted and without funds to pay State militia.

The gentleman from Colorado [Mr. SELDOMRIDGE] several days ago told us that because of the depleted condition of the State treasury that indebtedness warrants, issued to defray the expense of the State militia, were universally handled by the clearing houses and big business in Colorado, saying, in effect, that when the State militia was engaged in keeping peace it was subject to suggestion from and control of the moneyed interests of the State, or, in other words, under the control of one of the parties to the controversy.

This is a sad reflection upon the conditions now obtaining in Colorado, a condition that involves the integrity of the State militia feature of our governmental fabric.

This being the case, sir, State militias would better be eliminated from the field of military action, especially in connection with industrial disturbances, and industries built on natural resources, with the whole people as a market, would better be under the jurisdiction of the National Department of Labor.

The time will come, and that soon, too, when the public will demand changed conditions.

West Virginia, Michigan, and Colorado mining operations menacing our standard of citizenship!

What is the cause and what is the remedy? Let us hear from the Committee on Mines and Mining, and then let the Congress follow with legislation that will give the Department of Labor power to act.

Mr. Chairman, I have received many protests from organizations in my State against the brutal methods employed in Colorado.

Protests of the Central Labor Council of the city of Seattle and others I have forwarded to the committee. I herewith attach resolutions from several organizations which would indicate that the Congress is expected to act now.

The greatest argument for Government ownership or absolute control of mines is the fact that disturbances like the present in Colorado periodically occur to the discredit of the country.

SNOHOMISH, WASH., *April 22, 1914.*

Hon. J. A. FALCONER, M. C.,
Washington, D. C.:

We, the Timber Workers' Union and Women's Label League of Snohomish, urge you to use your good office to stop the slaughter of innocent women and children in Colorado. Our people in Colorado should have the same protection as that which is being so vigorously demanded in Mexico.

W. E. WINSCOTT, *President*,
CHAS. M. MARTIN, *Secretary*,
MRS. GUY C. BEEDE,
Women's Label League.

—

LOCAL UNION No. 2610,
UNITED MINE WORKERS OF AMERICA,
Ravensdale, Wash., February 13, 1914.

Hon. J. A. FALCONER,
Representative from Washington, Washington, D. C.

DEAR SIR: As acting secretary of this local union, I have been instructed to submit the following for your consideration:

"Whereas the corporations of the State of Colorado engaged in the production of copper are engaged in conflict with their employees; and

"Whereas the first steps taken by said corporations was the importation of gunmen and thugs for the purpose of beating, intimidating, and, in some cases, shooting the strikers, even going so far as to order certain of the labor men and union officials from certain cities of the State; and

"Whereas such proceedings are contrary to the Constitution of the United States and the rights therein guaranteed to its citizens; and

"Whereas the periodical recurrence of such conflicts between labor and capital work to the detriment of all citizens, we believe that the best interest of the Nation would be conserved if an end be made to existing conditions: Therefore be it

"*Resolved*, That an investigation by the Senate and the House of Representatives be held at once, covering these matters; and be it further

"*Resolved*, That the Government of the United States take steps immediately to acquire all mines in its domain."

Respectfully,

WILL LLEWELLYN.

ROSLYN, WASH.

Whereas a state of war exists in the Commonwealth of Colorado between the coal operators and the coal miners; and

Whereas the principal cause of this war is the nonenforcement of the labor laws of the Commonwealth of Colorado; and

Whereas the coal operators of the Commonwealth of Colorado have imported an armed force from another State, maintaining them and equipping them with rapid-fire guns and armored automobiles, etc.; and

Whereas such an act is one of treason and is destructive of the liberties of the people and of good government; and

Whereas the moving of armed forces from one State to another is vested solely in the President of the United States or such persons as he may designate; and

Whereas the governor of the Commonwealth of Colorado is derelict in his duty in not carrying out the laws of the State of Colorado, so far as they relate to the above matter: Therefore be it

Resolved, That a copy of these resolutions be sent to the President of the United States, urging upon him the necessity of having a committee of the Senate or House of Representatives, or both, appointed or elected by either body to investigate this matter immediately.

Resolved, That a copy of these resolutions be sent to Senators and Members of the House of Representatives from the State of Washington, urging upon them the necessity of such an investigation; and it is further

Resolved, That, in our opinion, the best interests of the people would be conserved by the Government ownership of all mines. We therefore urge upon our representatives the necessity of taking steps whereby the Government may secure control of all mines; and be it

Resolved, That a copy of these resolutions be sent to the United Mine Workers' Journal and to the convention of the Washington State Federation of Labor.

Adopted and indorsed by Local Union No. 2583, United Mine Workers of America, Roslyn, Wash., this 13th day of January, 1914.

[SEAL.]

JOHN FERKO,
GEO. TEMPERELAY,
GEO. MCCULLOCH,
Committee.

—

LOCAL UNION No. 934,
UNITED MINE WORKERS OF AMERICA,
Carbonado, Wash.

Hon. J. A. FALCONER, M. C.,
Washington, D. C.

HONORABLE SIR:

Whereas the military authorities, at the instigation of the Colorado Fuel & Iron Co. and other coal operators operating coal mines in the State of Colorado, under orders of Adjt. Gen. John Chase, on date of March 11, destroyed the tents of the striking miners at their camp located at Forbes, Colo., and threatened to deport the striking miners; also ordered them to leave their homes in 48 hours; and

Whereas these tents were erected on land leased by the United Mine Workers of America, and therefore their property by law; and

Whereas on March 23 Mother Mary Jones, an old lady over 80 years of age, was rearrested while a passenger on board a train near Walsenburg and thrown into the county jail there and held incommunicado, in violation of amendments 4, 5, and 6 of the United States Constitution: Therefore be it

Resolved by the members of Local Union No. 934, United Mine Workers of America, located at Carbonado, Wash., That we call on the Congress of the United States, in the name of humanity, to immediately put a stop to such atrocities perpetrated against poor, defenseless coal miners, who are only asking for a chance to live and asking that they be granted the right to organize and thereby protect themselves against the illegal methods used by various coal operators in robbing said miners of their just earnings, said acts being in violation of the State laws of Colorado; and be it further

Resolved, That we call on Congress to grant to said striking miners their constitutional rights, which are denied them at present in Colorado, and compel Gov. Ammons to immediately restore to said miners their constitutional freedom and hold in check the rapacious militiamen under command of Gen. Chase, and see to it that said militia in future live up to and do not violate the United States Constitution by beating up, bayoneting, or shooting the poor, defenseless miners or destroying their

homes and driving them out to perish in the snow of a Colorado winter; and be it further

Resolved, That we call you, if you have any feeling for humanity, to demand the immediate release of poor old Mother Mary Jones, and that in future her constitutional rights be not abridged by such men as Gov. Ammons or Gen. Chase, of Colorado, and that you call them to task for such violation of Article I of the United States Constitution, and that they be dealt with as provided by law for such violations of the United States Constitution; and be it further

Resolved, That if you ignore this call for justice in defense of our striking brother coal miners of Colorado we will call on all coal miners in the United States who are organized to lay down their tools and strike until justice is granted us and the coal miners of Colorado are granted their demands and constitutional rights, as we consider the atrocities perpetrated against the coal miners of West Virginia and Colorado, also against the copper miners of Michigan, of sufficient extent to cause a rebellion, and should not be allowed to continue for a day in a country that boasts of so much freedom as does the United States, and which to-day has become worse than ever Russia was, as far as tyranny of the laboring class is concerned.

Respectfully, yours,

ALBERT EDWARDS,
LEW REES,
JACOB DAVIS,
CANDIDO PAROLINI, *President*,
JACK HOPKINS, *Secretary*,
Resolution Committee L. U. No. 93¼, U. M. W. of A.

—

UNITED MINE WORKERS OF AMERICA,
LOCAL No. 2369,
Mendota, Wash., March 17, 1914.

Hon. J. A. FALCONER, M. C.,
Washington, D. C.

DEAR SIR: At a mass meeting of the members of the above local union held at Mendota, Wash., the following resolutions were unanimously adopted:

"Whereas constitutional law has been abolished and the rights and liberties of citizens have been trampled upon; in many instances women and children have been brutally assaulted and men have been brutally murdered, because they have rebelled against the brutal and tyrannical force of corporate rule in southern Colorado; and

"Whereas all of those crimes have been committed with the full knowledge and approval of a corporation governor, who has permitted his corporation masters to import into the State of Colorado large numbers of gunmen of the lowest type and arm them for the purpose of terrorizing and intimidating those citizens who refuse to longer submit to enforced slavery; and

"Whereas those gunmen, in conjunction with the State militia, under Gen. Chase, have attacked the tent colonies, destroying the tent homes of our people in an effort to drive them out of Colorado; and

"Whereas said Gov. Ammons has refused to give those citizens and their families any constitutional protection of life and liberty, but has allowed the corporations and Gen. Chase to perpetrate greater outrages upon the citizens of southern Colorado than has ever been perpetrated by the most vicious revolutionists in Mexico: Therefore be it

"*Resolved*, That this Local Union No. 2369, United Mine Workers of America, of Mendota, Wash., urgently protest and ask President Woodrow Wilson and the United States Senate and Congress to take such steps as will restore to those people the protection of life, liberty, and the pursuit of happiness guaranteed them by the Constitution of the United States of America, and to prosecute to the fullest extent in the power of the National Government those fiends who have committed those outrages: And be it further

"*Resolved*, That these resolutions be forwarded to President Wilson and to each of the Senators and Representatives from the State of Washington in the hope that action may be taken at once thereon."

PETER HENBETTY,
FRED BEHRBAUM,
FRANK BIEDERMAN,
Committee.

Friend ALEX: I fully expect you to raise Cain over the treatment which organized labor is receiving in Colorado, for old time's sake. From

Your friend,

PETE HENBETTY.

Whereas there are thousands of coal miners in the State of Colorado engaged in a fierce and bitter struggle with the mining barons to obtain by lawful means through trades-unions a living wage for themselves and their families; and

Whereas the State of Colorado, through its authorities, has denied said coal miners, citizens, and trades-unions their civil rights of peaceful assemblage and free speech, which is contrary to the Constitution of the United States; and

Whereas the governor of the State of Colorado, to intimidate said miners and to prevent them from being successful in carrying on a peaceful strike against said barons, has by unlawful use of the State militia, private detectives, and other powers of the State, for the financial interests of the coal barons, acted against the interests and welfare of the working class and the large majority of the citizens of said State; and

Whereas the unlawful detention and imprisonment of Mother Jones, the valiant fighter and champion of the working class, and the breaking up of peaceful parades, inciting riots, assaulting women with drawn sabers, and riding roughshod over women and children: Therefore be it

Resolved by Carpenters' Union No. 131, of Seattle, Wash. (in regular meeting assembled), To demand an immediate congressional investigation of the conditions prevailing in the coal mines of the State of Colorado; the reestablishment of civil law and the abolition of martial law; the immediate release of Mother Jones; that the findings of Congress be published at the earliest possible moment; that the Federal Government be urged to take immediate steps to acquire ownership of all mines and to operate them for the benefit of all and the welfare of its citizens.

J. L. HARDY,
Secretary Carpenters' Union, Seattle.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to extend and revise my remarks.

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. JOHNSON of Kentucky. Mr. Chairman, I ask unanimous consent that general debate now close on the bill.

Mr. BORLAND. Mr. Chairman, pending that, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri [Mr. BORLAND]?

There was no objection.

The CHAIRMAN. The gentleman from Kentucky [Mr. JOHNSON] asks unanimous consent that general debate now close on the bill. Is there objection?

Mr. THOMPSON of Oklahoma. Reserving the right to object, Mr. Chairman——

Mr. MANN. On what?

Mr. THOMPSON of Oklahoma. I reserve the right to object. I do not care to talk under the five-minute rule. The gentleman from Wyoming refused to yield to me for general debate. I want the right to extend my remarks, at least, if nothing else.

Mr. JOHNSON of Kentucky. How much time does the gentleman want? Would five minutes do?

Mr. THOMPSON of Oklahoma. Yes.

Mr. JOHNSON of Kentucky. Mr. Chairman, I ask unanimous consent that all debate on the bill close in 25 minutes, 20 minutes to be used by the gentleman from Illinois [Mr. MANN] and 5 minutes to be used by the gentleman from Oklahoma [Mr. THOMPSON].

Mr. LINTHICUM. Reserving the right to object, Mr. Chairman, I would like to say to the gentleman that I want to have five minutes.

Mr. JOHNSON of Kentucky. The gentleman can get time under the five-minute rule. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Kentucky [Mr. JOHNSON] moves that the committee do now rise. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. JOHNSON of Kentucky. I make the point of order, Mr. Chairman, that there is no quorum present.

The CHAIRMAN. The gentleman from Kentucky makes the point of order that there is no quorum present.

Mr. LINTHICUM. If the gentleman will yield me 15 minutes, I will withdraw my reservation of the right to object.

Mr. JOHNSON of Kentucky. I move that the committee do now rise.

The CHAIRMAN. The gentleman from Kentucky moves that the committee do now rise. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. JOHNSON of Kentucky. Mr. Chairman, a division.

The CHAIRMAN. A division is called for. Those in favor of the motion to rise will stand until they are counted. [After counting.] Twenty-six gentlemen have risen in the affirmative. Those opposed will rise and stand until they are counted. [After counting.] Twenty-three gentlemen have arisen in the negative. On this vote the ayes are 26 and the noes are 23, and the motion prevails.

Mr. JOHNSON of Kentucky. What is the vote, Mr. Chairman?

The CHAIRMAN. The ayes are 26 and the noes are 23; and the committee decides to rise.

Mr. GORMAN. Mr. Chairman, I make the point of order that there is no quorum present.

Mr. STAFFORD. It does not require a quorum of the committee to rise.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ADAIR, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes, and had come to no resolution thereon.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of further considering House bill 12873, and pending that I move that all general debate thereon be now closed.

Mr. MANN. Will not the gentleman give us a little further time for general debate by unanimous consent?

Mr. JOHNSON of Kentucky. Mr. Speaker, I will say to the gentleman that we have agreed practically upon the closing of general debate several times, and it did not close. I regret to be compelled to make this motion.

Mr. MANN. I think there was some misunderstanding. I have no criticism of the gentleman for the course that he takes, but I wish he would let me have 20 minutes.

Mr. THOMPSON of Oklahoma. Reserving the right to object, Mr. Speaker, I am a member of the Committee on the District of Columbia, and I have not occupied the time of the House. I do not wish to do so, but in view of the fact that I was denied even the privilege of asking a question of the gentleman from Wyoming [Mr. MONDELL] I think I am entitled to a little time. I will ask for five minutes. I should like to have more time than that, but will make out with that.

Mr. JOHNSON of Kentucky. Pending the motion that the House resolve itself into the Committee of the Whole House on the state of the Union, I move that all general debate be closed in 40 minutes, 20 minutes to be used by the gentleman from Illinois——

Mr. MANN. Will not the gentleman make it a request for unanimous consent?

Mr. JOHNSON of Kentucky. I ask unanimous consent that all general debate close in 40 minutes, 20 minutes to be controlled by the gentleman from Illinois [Mr. MANN], 15 minutes by the gentleman from Maryland [Mr. LINTHICUM], and 5 minutes by the gentleman from Oklahoma [Mr. THOMPSON].

The SPEAKER. The gentleman from Kentucky moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes; and pending that he asks unanimous consent that the general debate be limited to 40 minutes, 20 minutes to be controlled by the gentleman from Illinois [Mr. MANN], 15 minutes by the gentleman from Maryland [Mr. LINTHICUM], and 5 minutes by the gentleman from Oklahoma [Mr. THOMPSON]. Is there objection?

Mr. MOORE. Mr. Speaker, reserving the right to object, I should like to inquire of the gentleman from Kentucky [Mr. JOHNSON] whether he has any further business to call up to-day besides this half-and-half bill?

Mr. JOHNSON of Kentucky. No.

Mr. MOORE. Are you likely to consume the rest of the day?

Mr. JOHNSON of Kentucky. The gentleman knows as much about that as I do. It seems as though it might take two weeks if we go along as we have been.

Mr. MOORE. I ask the question because a number of gentlemen desire to be here when the naval bill is next taken up.

Mr. JOHNSON of Kentucky. I will say to the gentleman that I expect to call up no other bill except this, and the gentleman is as good a judge as I am of the time that this bill will consume.

The SPEAKER. Is there objection to the request?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Kentucky that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of House bill 12873.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes, with Mr. ADAIR in the chair.

Mr. THOMPSON of Oklahoma. Mr. Chairman, a little while ago when the gentleman from Wyoming [Mr. MONDELL] was discussing the administration's attitude toward Mexico he was apparently criticizing the attitude of the administration toward the Huerta government. I asked him at that time if he had read the communication from Monterey, Mexico, under date of April 26, 1914, signed by Consul General Hanna. He did not see fit to answer that interrogatory.

Mr. MONDELL. Will the gentleman yield?

Mr. THOMPSON of Oklahoma. Yes.

Mr. MONDELL. The gentleman wants to have his statement accurate.

Mr. THOMPSON of Oklahoma. Certainly.

Mr. MONDELL. It would not look well for the gentleman's statement to be published in just the words that he has used, in view of the fact that he will find, if he will consult the notes of the Official Reporter, that in my speech I did say that I had read that, and I went on and made some observations in regard to it.

Mr. THOMPSON of Oklahoma. Of course I am sure the gentleman from Wyoming is in perfect good faith, but he has made a statement which is not exactly correct. I asked him that question in good faith, and I received no response. I notice that the gentleman from Wyoming [Mr. MONDELL] criticized the conduct of Consul General Canada at Vera Cruz, and his criticism was in connection with the acts of the Washington administration in its opposition to this murderer, this assassin, Huerta; and his criticisms were that the Washington administration was in opposition to Huerta, but in recognition of Villa, and his excoriation of Villa was most severe.

I want to say to the gentleman that the same paper which contains the dispatch from Monterey which shows that the Huerta government had imprisoned the consul general of the United States at Monterey shows that the constitutionalists had liberated that representative of the United States, and that Villa had said in the public press that he approved of the conduct of the United States, and was waiting for the United States to bottle up this drunken Huerta, so that he could go down there and get him and feed his bones to the sharks in the Gulf of Mexico.

Mr. Chairman, if we are to be spared the horrors of a war with Mexico, in my judgment, we can thank the God of nations for this despised and abused Villa. He may not be all we would have him be; his character may not be such that we would have our children emulate him, but he is the iron man of Mexico in this crisis. At Juarez, while his so-called chieftain, Carranza, is inspiring hatred toward the Americans, he is sending out messages of good cheer to them and protecting their lives and property and bidding Godspeed to the American arms. Born of Indian parents, brought up amid oppression and misrule, forced to the life of a bandit by abuse, maltreatment, and usurpation on the part of the so-called governing aristocracy of Mexico, he feels most keenly the injustice to his people by the usurper, Huerta, and his conduct of the war with untrained Indians, without equipment and without money, during the past year stamps him as the dominant character of the Mexican revolution. I sincerely trust he may be able to calm the oppressed people of Mexico and thereby avert a war with the United States.

Mr. Chairman, I have just read in the newspaper a word picture of Villa by H. M. Dean, who has just returned from Mexico, where he lived for months with him in camp and on the battle field. He was with him in the campaign against Chihuahua and in the battles about Torreon, and took moving pictures of the havoc of those conflicts. He is here now to exhibit to the President the pictures taken. In describing Villa he says:

Far from being uncouth and savage, he is a man of intelligence, who has surrounded himself with others from whom he can learn more. He has a passionate regard for the welfare of the peon class, with which the rich landed Mexicans of the south have little in common. Between battles he reads constantly, and has been informing himself on such

matters as the single tax and kindred ideas designed to relieve the burdens of the poorer classes. He believes that north and south Mexico never can get along harmoniously, and wants them constituted into separate States. His friendship for the United States can not be questioned. He is not the cruel man with a blood lust, as he is described, and has permitted wholesale killings only when they were absolutely necessary. Away from the battle field he has many humanitarian impulses, is fond of children, and loves his home. His main purpose is to obtain from the war the right for the peon to own land and work it without giving all profits to the taxgatherers.

Mr. Chairman, the man who suffers when the cruel hand of oppression is pressed against his fellow man can not be the black and soulless fiend his accusers would have us believe he is.

That the revolution in Mexico is justified can not be disputed by those at all familiar with the conditions there. Here I want to quote the language of our colleague from California [Mr. KENT] himself a man of affairs and of keen and discriminating judgment. In speaking on the Mexican situation he said today:

I have been associated with some of the rich men, some of the plutocrats, and a more useless gang of crooks I have never met. They have no regard whatever for their own common people. They despise them, look down upon them; but they understand the method of thought better than we do, and therefore they are preferred by the common people to us. Our history in Mexico has been scandalous to us until recent times. We have sent down there our outlaws, our promoters, our grafters, our refugees, who have uniformly and always despised the common people. They have spit upon them; they have killed the men and they have not dealt fairly with the women. Now we wonder that our good efforts and impulses, our good intentions, are not appreciated by the people of Mexico.

In this connection the condition of the peons of Mexico appears to me to present a very strong parallel to the condition of our laboring people in the mines of West Virginia, Michigan, and Colorado. The newspapers bring us reports daily from the troubled regions of Colorado. I am glad that I was one of the Members of the House to assist in calling a Democratic caucus to provide for an investigation of the conditions there, and that I was one of the Democrats in that caucus who voted to secure the passage of a resolution providing for the investigation. While the committee that made that investigation has not yet filed its report, we have seen enough of the testimony taken and we have heard enough through the newspapers to know that a condition exists in Colorado worse in its bloodshed than exists at this time in Mexico.

My sympathies have at all times been with the revolutionists of Mexico. That revolution is a natural result of the long period of misrule of the Diaz reign. During his administration every natural resource of the Republic came under the control of special interests. The railroads, the timber, the mines, the cattle, and the oil industries all found a home in the tight grip of monopoly. The common people—the laboring people—of Mexico were ground beneath the heel of oppression until they could bear it no longer, and the revolution resulted. The special interests that controlled the natural resources of Mexico were the cause of that revolution, and the special interests that control the mines of Colorado are behind the murders and outrages now being perpetrated on the defenseless women and children who are being shot to death in the mining camps of that State. I read in the morning papers that Rockefeller is unwilling to arbitrate—unwilling to permit his laborers to organize themselves for self-protection—and that his reply to all suggestions of a peaceable settlement to the laboring men is:

You can work at our price or you can starve.

Mr. Chairman, if the laborers should give in and work at his price, they would soon find that they both work and starve. The conditions among the miners of Colorado, Michigan, and West Virginia are very similar to the conditions of the common people of Mexico. Our people, with a genius for organization and a genius for self-protection, are striving to meet powerful monopolistic combinations that control the mines by organizing themselves into unions. In doing this they ought to have the sympathy of the people of the United States. They are fighting a battle for their homes, for their families, and for the right to work and to receive a living wage for that work. If they are defeated, the lessons of Mexico will be repeated. They are being shot down—men, women, and children—by hired assassins simply because they ask to work and to receive a living wage for that work.

Now, Mr. Chairman, that is about all I want to say about that. I have not the time. I desire to talk about the pending bill, which has to do with the half-and-half plan. I am in favor of the Prouty substitute for the George bill. I am a member of the Committee on the District of Columbia, Mr. Chairman. I do not know how I came to be a member of the District Committee, except that the Committee on Ways and Means wanted to bury me here and never hear of me afterwards. That is the way they haze a new Member, I understand, but they can not haze me. I am here to discharge a public duty as I understand it, and I am going to do it to the best of my ability, whether it pleases or displeases any Member of this House or any person in this country or any newspaper in Washington.

Now, I know that the position I have taken with reference to the George bill does not please the newspapers of the District of Columbia. I know that from what they have said about it. I am not anxious to displease them, but I would much prefer to displease them, Mr. Chairman, than to do what I believe in my own conscience is wrong. I do not believe that it is right to charge the people of Oklahoma a part of the taxes that are required to sustain the government of the District of Columbia.

Mr. Chairman, the George bill is the result of an exhaustive examination into the taxing methods of the District of Columbia, and it provides that all real estate shall be assessed at 15 mills on the dollar of its actual value. The bill was amended in committee by providing that all property in the District should be assessed at 15 mills on the dollar of its actual value. Under the present law in force in the District, stocks and bonds, notes, accounts, money, jewelry, and diamonds are not taxed, and it seems that the assessors have a sliding scale for the purpose of taxing real estate. For instance, the homes of the poor people are taxed at 75 cents on the dollar of their value, while the thousands of acres of unimproved land around the city, held by millionaires for speculative purposes, is taxed at 45 cents on the dollar; the homes of the middle class are taxed at 60 cents on the dollar; the business property, which belongs usually to the wealthy class, is taxed at 45 cents on the dollar, and the homes of the millionaires—the idle rich—are taxed at 40 cents on the dollar. If a poor man goes to a rich real-estate speculator and purchases one of these unimproved lots that is now taxable at 45 cents on the dollar and erects his home, it is immediately put on the tax duplicate at 75 cents on the dollar, or nearly double in the rate of taxation. If the millionaire goes to one of these real-estate speculators and purchases land on which to erect his mansion, it is put on the tax duplicate at 40 cents on the dollar. The team which the poor man drives on the street, and his wagon, his pick, his shovel, his cow that furnishes the milk for his children, and every article of property that he owns is taxable, while the bonds and the stocks and the notes, money, the jewelry, and the diamonds of the millionaire are not subject to taxation. It makes no difference to me how much condemnation the newspapers of the District of Columbia may give me—how much abuse they may heap upon me—this is not right, and I for one will never cast my vote to tax the cow, the pick, and the hoe of the poor man and exempt the jewelry, diamonds, stocks and bonds, and the money of the rich man, nor will I consent to tax the home of the poor man at 75 cents on the dollar and let the mansion of the rich man escape at 40 cents on the dollar. If we love this country, if we would preserve it and hand it down to our children, emblazoned with the motto of Thomas Jefferson: "Equal rights to all and special privileges to none," such inequalities as these must not be permitted. Why should a hundred millions of dollars in stocks and bonds, moneys, credits, jewelry, and diamonds escape taxation, and the thousands of acres of land held for speculative purposes, and the million-dollar residences, be taxed at 40 cents on the dollar, and the people of the United States have a tribute levied on them of $7,000,000 per year to assist the people of the District of Columbia in keeping up their government?

The actual value of the real estate in the District of Columbia assessed at 19 mills would produce $10,830,000; moneys, stocks, bonds, and credits, estimating them to amount to a hundred million dollars, would produce $1,900,000. There was collected last year from tangible personal property—property belonging mostly to the poor people, consisting of household goods, horses, wagons, cows, chickens, and the like—$1,130,840.52; from penalties and interest on delinquent taxes, $45,830.31; license, excise tax, and so forth, $1,010,648.92, making a total of $14,917,750, and this amount will more than meet the expenses of the District of Columbia. The rate of taxation of 19 mills on the dollar is the average rate paid in the different cities of the country, based on full valuation. I desire to incorporate in my remarks a list of the leading cities of the country with the rate in force on the actual value of the property. This table was prepared by Judge PROUTY and appears in his remarks on this bill:

	Mills.
Boston	17.2
Bridgeport, Conn	16.5
Brooklyn, N. Y	18.5
Buffalo, N. Y	22.9
Baltimore	19.8
Cambridge, Mass	20.4
Camden, N. J	20
Charleston, S. C	25
Chicago	17.1
Cincinnati	15.6

	Mills.
Cleveland	18.8
Detroit	19.9
Des Moines, Iowa	22.2
Fall River, Mass	20.3
Grand Rapids, Mich	21.4
Jersey City, N. J	21.2
Lawrence, Mass	18
Lowell, Mass	19.4
Indianapolis, Ind	15.8
Lynn, Mass	20
Milwaukee	17.6
Minneapolis, Minn	17.9
Newark, N. J	20.2
New Bedford, Mass	20.2
New Haven, Conn	19
New Orleans	17.2
New York	18.2
Philadelphia	15
Providence, R. I	20.5
Rochester, N. Y	19.3
Springfield, Ill	18.2
St. Louis, Mo	15.1
St. Paul, Minn	17.6
Syracuse, N. Y	20
Tacoma, Wash	21.7
Trenton, N. J	20
Utica, N. Y	22
Washington, D. C	10

The average rate of taxation in the cities named above is 19 mills on the dollar. What reason can be given why the property owners of the District of Columbia should not pay the average rate required of the citizens who live or own property in all these cities? Is there anything sacred about the Capital of the country that should exempt property located here from the ordinary burden that it bears all over the country? We know, of course, that this claim was made for the capital of the Chinese Empire, and that property in Peking, the capital—the holy city, the city of the celestial Empire—was exempt from taxation, while the burden of supporting the Government fell upon the poor people of China. The rich who lived at the capital escaped taxation. Can it be possible that the example is to be followed in the United States? If it is, we had as well confess our incapacity for self-government and abandon the rule of equality which has been the boast of our civilization.

What just claim can there be for the people of the United States outside of the District of Columbia paying one-half the cost of the construction of all the public buildings belonging to the District—the city hall, fire stations, and the schoolhouses? Why should they pay one-half the expenses of the 1,000 policemen on the pay roll of the city of Washington, one-half of the expenses of the fire department, one-half the salaries of all the employees of the District, one-half the expenses of running the schools in the District? Why should the people of Oklahoma pay $28,815 every year to support the schools in the District of Columbia? Is it because that 10 months during the year children from the age of 6 to 66 can attend school either in the day or in the night time here? Is it to take care of the services of the physician who treats the school children free, and of the dentist who keeps their teeth brushed? Is it to employ the nurses who lounge about the school buildings to bind up their toes and fingers if they happen to receive an injury in play? Is it to pay for the shower baths that one of the colored teachers said were of "so much benefit to his pupils," or to erect a greenhouse that another colored teacher advocates? Is it to pay for the arnica and salve now kept on the playgrounds to remove the soreness from the stiffened joints of the 66-year-old children, or is it to pay for the 300,000 lead pencils which annually are furnished at public expense to the Washington schools?

The $9,190 levied on the Oklahoma people every year as its part of sustaining the 1,000 policemen is a small matter, and the Oklahoma people ought to be glad to embrace the opportunity of showing their pride in the Capital of their country. The $10,925 levied on my people in Oklahoma as their part in keeping up the streets, sewers, and water mains is a fund that they ought to gladly contribute, though out in our State we have a backwoods way of requiring the man whose property is benefited to pay these expenses.

Why should not the people of the United States pay one-half for paving the streets and building sidewalks in front of these millionaires' homes? Absolutely no reason can be given why they should not.

Only blockheads could be expected to oppose a bill of this kind. The taxpayers all over the country are volunteering to help meet these expenses, and a man who opposes the system of taxation which levies this $7,000,000 on the people of the United States is wanting in patriotism and in intelligence. When this bill was reported by the Committee on the District of Columbia with the amendment, the Washington Times, under date of March 7, 1914, carried a cartoon of the 10 members of the Committee on the District of Columbia, which was described at the time in the great speech of the chairman of this committee, Hon. BEN JOHNSON. In commenting on the cartoon and the Times's reference to it Mr. JOHNSON said:

That cartoon represents the District of Columbia with a large man dressed in colonial style, "winking his other eye," and opposite him are some roughly drawn things, which might be taken for human beings, and they are topped off with blockheads. One of these blockheads is a Member of the House of Representatives from Iowa. In that they refer to Judge PROUTY, of Iowa. The next blockhead is the chairman of the District Committee, which is myself. Then down the row we have 8 more blockheads. Those blockheads are the other 8 members of the committee who stood up like men and said, "Yes; we will cast our vote in favor of taxing stocks and bonds in this community and not permit the burden of that tax to fall upon our constituents at home," and who are those other 8? They are Messrs. O'LEARY, REED, THOMPSON, CLAYPOOL, CARY, CARAWAY, MAPES, and HART. The other 2, making 10 members, are Judge PROUTY and myself. But, gentlemen, there is one thing in connection with this cartoon which the casual observer might overlook. Down at the bottom of it is printed this: "The man representing the District of Columbia and winking his other eye is looking over this army of blockheads and saying, 'It is evident they are not owners of District property.'"

And after some interruption, and speaking further with reference to this blockhead cartoon, Mr. JOHNSON continued:

But, reverting just here to the cartoon of blockheads who do not own property in the District of Columbia, and referring to some statements made here the other day to the effect that owning property did not change anybody's views, let us see what the Washington Post says about it. This article appeared in the Washington Post:

"The drift of the well-to-do and influential toward this city could take no better turn than we see in the increasing number of congressional homes. Once they become interested it is noticed that Members undergo a change of heart that bodes no ill for the municipality. Naturally they come to see that Washington really needs all that Washington people are asking for. Already we owe much to the efforts of Senators and Representatives who have made permanent investments here, and conceivably the good offices of many others would be quickened if proper influences were brought to accelerate the movement from the 'deestrict' to the District."

Mr. Chairman, I do not own any property in the District of Columbia, and I never expect to. I am here to represent the people of Oklahoma, and I do not expect during the time I am honored by them as their Representative to divide that representative capacity between them and the people of the District of Columbia.

Then, again, going a little further into the expenses contributed by the Oklahoma people, I see that they pay $20,806 yearly for improvements and repairs to the District property. This is to keep in repair these schoolhouses, city halls, fire stations, and other public property owned exclusively by the District of Columbia and which our people contributed one-half toward building. It seems that they are not satisfied with the contribution of one-half the original cost, but we must perpetually be charged with one-half the cost of repairs. I notice a little further on that we pay $7,485 per annum toward the salary and health account and $8,785 on interest and sinking fund account of the District, $4,190 for the streets and alleys, $6,012 to support the fire department, and $12,581 for charity work. I have always been taught that charity begins at home. The sum of $698,216 is contributed annually by the people of the United States for charity work in the District of Columbia.

Then, Mr. Chairman, I notice a little further on that Oklahoma contributes $2,876 for miscellaneous expenses of the District, making a total of $111,664 levied on the Oklahoma people toward supporting the government of this District; and the whole people of the United States contribute the stupendous sum of $6,197,403 toward supporting the District.

For opposing this we are called "blockheads." We are charged with being unpatriotic and unworthy citizens of this Republic. Now, Mr. Chairman, I have no objection to beautifying Washington. The only objection I have is that they levy a tribute upon my people to assist in beautifying it, and I much prefer that they be taxed the average rate levied on the property of all the people of the United States, and that these men here who are thirty, forty, and fifty times millionaires come forward and assist the poor people of Oklahoma in beautifying the Capital City. All this talk about the Capital being a burden on the people of Washington could be better addressed to some one who had made no study of the benefits Washington receives from the location of the Capital here. If the Capital were removed, instead of being a city of 350,000 population you could count its population with 10,000 and have numbers to spare. If it were not for the untold millions being spent here from day to day in the construction of public buildings and the rent of private buildings for offices for Government use; were it not for the millions and millions of dollars paid out monthly to the employees of the Government, amounting to more than $72,000,000 annually; if it were not for the more than 1,000 visitors attracted to this place daily throughout the year by reason of its being the Capital, there would be no great furor raised about the half-and-half plan, because there would be no

city here. There is not a town or city in the United States that would not give free to the Federal Government sufficient land on which to locate all its buildings and guarantee that land and the buildings free from taxation for all time to come if the Capital could be removed from Washington and located there. Practically all the land owned by the Government in the District of Columbia is used for the comfort and pleasure of Washington people.

The Government does not use for its own purposes exceeding 100 acres of the nearly 3,000 acres of land it owns in the District of Columbia. The remainder of the land is dedicated to parks for the enjoyment and pleasure of the District people. Potomac Park and Rock Creek Park contain more than 2,000 acres, and they are maintained at an enormous expense out of the taxes paid by the people of the United States for the enjoyment of the people here. Not only are they kept in the finest condition, but great zoos, containing every known species of snake, fowl, and animal, are there kept and exhibited for their pleasure. The Congressional Library, one of the finest in the world, is maintained at an enormous expense, and its enjoyment is largely local. The National Museum, one of the finest in the world, is maintained wholly at the expense of the American taxpayers, and its enjoyment is largely local.

But they say this is the Capital of the Nation and belongs to all the people. Now, let one of your people back at home, or one of mine, come here and announce that this is the Capital and in part belongs to him; that he has been paying taxes to build these streets and sidewalks, to erect these schoolhouses, fire stations, and city halls, and to keep them in repair; to conduct the schools, maintain the police and firemen, and see how quickly these thousand policemen would round him up and hurry him off to the madhouse. All this talk about "Our Capital" is like naming one of those "ocean-to-ocean" highways the "Lincoln Highway," or the proposed bridge across the Potomac at public expense the "Grant and Lee" bridge. It is for the purpose of beclouding the real issue and arousing the patriotism of the people. But I warn you that while they are tickling your ear with beautiful speech to be careful lest they have their hands in your pockets up to the elbows.

Mr. Chairman, because I have seen fit to favor a bill that will require the rich of this District to pay their just portion of the taxes and to relieve the people of Oklahoma from this burden, it has gone forth that I am to be defeated and not sent back to Congress. Because I favor putting on the tax duplicate more than one hundred millions of stocks and bonds, notes, accounts, money, jewelry, and diamonds; because I favor requiring the millionaire home owner to pay taxes like the man who owns an humble home; because I favor requiring the Mary Leiter Curzon estate to pay taxes on $1,500,000 of stocks and bonds in the District that are not now taxable; because I favor the Blanchard estate in the District paying taxes on $700,000 securities that do not now contribute one cent toward supporting the District government; because I favor requiring the Clapp estate to pay on more than a million dollars of securities which are now untaxed; because I favor requiring the Eugene Peters estate to pay taxes on more than $600,000 which is now untaxed; and the Richardson estate, amounting to more than $150,000 in securities, which is now untaxed, I am to be defeated and left at home. The Washington Times, under date of December 20, 1913, announced that this would be the policy of the people of the District of Columbia. It said:

> Plans for a concerted fight against the reelection of the Members who voted for the measure are already under way. Their respective districts will be flooded with letters protesting against their unpatriotic stand toward the National Capital. Voters throughout the country will be appealed to in the hope that Congressmen will be urged to take the welfare of the District at heart and aid in making the Capital City of the United States the queen metropolis of the world.
>
> Members of the executive committee of the joint committee of chamber of commerce, the board of trade, and the Retail Merchants' Association have been notified by Chairman William H. Singleton, of the committee, that they must be ready at a moment's notice to answer a call to meet and determine on some concerted action immediately.

Mr. Chairman, if by the passage of this bill we were doing an injustice to the people of Washington, if we were treating them differently and putting an unjust burden on them not borne by the rest of the people of this country, then I would fear an attack, but I have no fear of the result when the facts are understood by the people of the country. The people are just and will do right when they know the facts. When it is understood that by the provisions of this bill we are seeking to tax stocks, bonds, notes, accounts, money, jewelry, and diamonds that are now untaxed, and that we are seeking to require the rich to bear their just proportion of the burdens of taxation, and when it is known that we are fixing a lower rate than the average rate throughout the country on the property of the people of the District of Columbia, and a rate less than one-half the people of Oklahoma pay, I have no fear of the result. The danger in this opposition will not come from a knowledge of the facts, but it will come because they will not submit their opposition to me on the stand I have taken on this tax question. They will put their opposition on some imaginary ground. They are resourceful, they have an abundance of money, and when a Member of Congress arouses their antagonism it is certain he will be made to feel the strength of their opposition. I have for the past 22 years lived in the district I represent. I was born and raised within a hundred miles of its borders. Men live in every county who have known me since I was a child, and they will be able to take care of any slanders or misrepresentation that may be circulated against me.

Mr. Chairman, these threats will not deter me from discharging the duty I owe the people of Oklahoma. I would prefer defeat fighting for what I believe is right than to be returned by a betrayal of those back home who depend on me to guard their interests here.

Mr. MANN. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. KENT].

Mr. KENT. Mr. Chairman, there are very few Members present, and I do not suppose that what I shall say will have much influence; but I wish to speak from a standpoint of sympathy with the Mexican people, whom I know and like, as well as from a knowledge of what will constitute our own welfare. I have had much experience in Mexico. I have spent months in the back country and can claim to have a knowledge of and a sympathy with the common everyday people, whom we vaguely know and often despise as peons. I have been associated with some of the rich men, the plutocrats, the nickel-plated aristocrats, and a more useless gang of crooks I never met. [Laughter and applause.] These folk are in no sense an aristocracy—they never heard of "noblesse oblige"—they have no regard whatever for their own common people. They despise them more than we do, look down upon them more than we do; but they understand their methods of thought better than we do, are more prone to superficial politeness, and therefore they are more popular with the common people than we are.

The history of our people in Mexico has been scandalous until recent times. We have sent down there our outlaws, our promoters, our grafters, our refugees, and these have uniformly and always despised the common people. They have treated them with contempt; they have killed the men, and they have not dealt fairly with the women, and we have participated in the larceny of their land. Now, we wonder that our protestations of our good intentions are not taken at their face value by the people of Mexico.

I voted against the resolution that the President requested simply because I know the Mexican people. I felt that in the passage of that resolution for the acts complained of we had stumbled into hell. [Laughter and applause.] I did not believe that any leading Mexican could have the courage to indorse an act of territorial aggression.

Now, between us and a general war in Mexico there seems to be but one thing, and that is the fact that there is one man in Mexico, one strong man—Villa, bandit to be sure, a child of ignorant Indian parentage, who began an outlaw career because he was robbed, insulted, and abused, started out on the hypothesis that he must make war against Mexican society in accordance with the only code he knew, and that code justified barbarous methods. With the little education he had he proved himself to be a great leader of men. That man has been continually growing, not alone in power but in knowledge of what the civilized world demands of him and in knowledge of the needs of his country. The testimony I have received from private sources is that he is a brave man who keeps his word. He has, in a crucial time, had the courage of his convictions, and the enlightenment, almost alone among his people, to believe our protestations of disinterestedness, and seems to possess such a marvelous power of leadership as to hold his people in leash. We have now before us the choice of whether, in view of all the facts, we are willing to recognize this man as, in a measure, our ally, whether we are willing to accept his good offices in conjunction with the good offices of the great Republics of South America, or whether we feel it incumbent on us to go into Mexico and to declare war on the Mexican people, 15,000,000 in number, who can not understand us any more than we can understand them, and to fight through a war to its indefinitely distant conclusion.

It is simple to talk about war as something short and determinate; but when the longer we fight the less we are going to be understood and the more inherent hostility we are going to incur, in view of this irreconcilable situation, it is time to see whether in God's name we can not be led out of this hell. [Applause.]

Therefore, in the hope of peace, in the hope that we may not be forced into war and bitter misunderstanding with a fifteenth-century people of Indian and Spanish blood, I sincerely hope that something may be done to stop this conflict.

I am utterly sick at heart when I think of the petty futility that would sacrifice thousands of lives on the ground of preserving the national self-respect. Does any gentleman of to-day feel it incumbent upon him to kill every underbred, drunken bully that accosts him? When shall nations reach an equal sanity?

These people are barbaric. We ought to know that. They are 90 per cent Indian. The wars among themselves have been cruel; they shoot prisoners as a matter of course and torture as a matter of course. So-called civilization has been cruel to them; they are only gentle when kindly and sympathetically treated. What a farce it is to expect what we call civilized warfare with a people like this. If we become involved, we shall be forced to accept their view of the game. We can not reciprocate, but we must understand what we shall have to suffer.

Within the last 10 years I know of my own knowledge and can give the names of a new type of Americans that have been going to Mexico, men who have sympathy with the common people, who have treated them as human beings. These men have shown the honest, hardworking people of Mexico that ahead of them was opportunity for food, clothing, and, most of all, for their children to have a better chance than they had. To my own knowledge these common people have responded to this appeal and have worked faithfully, so that their children might be educated and become self-supporting and self-respecting. We have been sending there mining and civil engineers and railroad contractors and other producers of things—decent people, who were not there to exploit or rob the Mexicans. We have sent men who have realized that these backward folk, who are living in a fifteenth century, of Indian and Spanish origin, simple and backward, yes, and cruel, though they are, after all, good, honest, kindly, human beings, entitled to a chance and worthy of it.

I could bring many men here who could tell of their own knowledge that these common Mexicans whom we propose to kill are the kindest-hearted people in the world; could tell of their fortitude, their boundless hospitality; could tell of the antecedent causes of their backwardness. If you believe that we can send an army of men into Mexico that will so comport itself that the survivors of these people will have a better understanding of the altruistic impulses of this country, such impulses having been shot into them, I think you are not thinking. If we can have 10 years more of peace, I believe the Mexicans will come to be friendly with us. I can not tolerate the thought of war with these people, looked at either from our viewpoint or theirs. Thousands of our soldiers would be killed by a people fully armed, incompetent in many warlike ways, but a people in a fighting state of mind. We all know that psychologically as between a man who is mentally in a state of peace and a man who is mentally in a state of war you can shoot the latter through the heart and before he falls he will kill his adversary, whereas the man who is mentally peaceful will quit with the slightest wound. Those people are excited; as we cow-punchers say, they are "on the prod." They have arms which they did not have until recently, and as long as their ammunition holds out they will make a desperate fight, and it will be a war of miserable reprisals. If we fight it will be against a people who do not know civilized methods of war, and who can blame them for not understanding the absurd refinements of murder? I know what such war would mean—the 50 years, the 100 years, the 150 years of misunderstanding and bitterness. It means possibly the wiping out of existence of a people who, though backward, are honest, kindly, hospitable, and industrious, and who, I believe, have the right to live and be led toward civilization through the use of the opportunities of a rich country, and who have been looted, despoiled, embittered, and rendered savage by despots of Spanish and Mexican origin. If those on this side of the line who are chiefly plotting, planning, and fomenting war against this people were free of the lust of profit and land, we should merely call them senseless; we could not call them ghouls. [Applause.]

Mr. MANN. Mr. Chairman, the pending bill, as I understand, is designed to increase the taxes in the District 50 per cent upon the real estate, and, in addition, to tax the intangible personal property which is not now taxed. I think I am correct in saying that it will increase the taxes 50 per cent upon real estate.

Mr. BORLAND. Mr. Chairman, if the gentleman is asking me, I will say that he is not quite right. It increases it more than 50 per cent on the big fellows and less than that on the little fellows.

Mr. MANN. I do not take that interpretation. I do not think that is correct. It increases the taxes 50 per cent.

Mr. COADY. Mr. Chairman, I will say that I just obtained some figures from the tax assessor, and he says it will have the effect of increasing the taxes on the small property holders.

Mr. MANN. It increases the taxes on its face 50 per cent. Mr. Chairman, all of my life I have heard certain gentlemen talk about how the rich had their property assessed at a low rate and the poor had their property assessed at a high rate. I think that is all a mistake. I have no doubt whatever that as a rule the small owner of property living in a home of his own has a much lower rate of assessment than the rich fellow, because the assessor has sympathy for the small one and he has no sympathy for the rich one, and unless the assessors are bribed the rich do not get the best of it, in my judgment and in my experience. I have watched the assessment of property for a long time. It is claimed that the people of the District of Columbia do not pay their fair proportion of the expenditures in the District—that they pay only one-half of the expenditures—and we have before us a chart, or whatever it may be called, to show the rate of expenditure in various cities. My distinguished friend from Des Moines, Iowa [Mr. PROUTY], for whom I have a high regard, calls attention to the fact that in his city the rate of taxation is a little more than 20 mills on the dollar, on the actual valuation, while in the District of Columbia it is only 1 cent on the dollar.

If that is the fact, then I think that the District of Columbia form of government ought to be maintained as a school, and that it would be desirable to make an appropriation to bring to Washington the city officials of all these other cities in the United States, because no one will contend who has ever been in Des Moines and Washington that the city of Des Moines is as well governed and is kept in as handsome a condition, as clean and as healthy, as the city of Washington. I do not single out Des Moines. Take the city of Chicago, where it is said the tax rate is 17 mills on the dollar as against 10 mills on the dollar in Washington. If we should double the tax rate in Washington, so as to pay in the amount contributed by the United States Government, the tax rate here would be 20 mills on the dollar. Let us assume that for the purpose of argument. There is no comparison in the value of the service received by the people who live in Washington for the expenditure of the 20 mills on the dollar here and the 17 mills on the dollar in Chicago. In addition to that, they call our attention further to the fact that special improvements here are to a large extent paid out of the general fund, while in my city—and I assume the same is true of Des Moines—sidewalks, sewers, water mains, water-service pipes, sewer drains, street improvements, and everything are paid for by special assessment and not out of a general fund; and if it be true that we have a form of government in the District of Columbia under which, by the payment of 1 cent on the dollar in taxation and 1 cent on the dollar out of the Treasury of the Federal Government, we can maintain a government more efficient, more economic, of more value to the people, paying for the special improvements out of the general fund, than these other cities can, not paying for the special improvements out of the general funds, then we ought to bring them here and show them how it is done. And no more valuable education has ever been received by any Member of Congress than is the education which my distinguished friend from Iowa, whom I regret to say has informed us publicly that he is not coming back to the House, has received, and I hope when he goes out of the House he will carry with him the knowledge that he has received about what we do here with the money which we expend for the Government, and take that knowledge home to Des Moines and teach the people there how to get half as good a government for twice the cost. [Applause.]

Mr. Chairman, we have before us another chart, telling how much more the people of Alexandria, Va., pay in taxes than do the people of Washington. I believe I am not mistaken in supposing that Alexandria is in that portion of Virginia which was formerly in the District of Columbia, and that there have been various propositions to bring Alexandria back into the District. I see before me my very good friend from Virginia [Mr. CARLIN], representing the Alexandria district. I never have been able to observe any energetic efforts upon his part to get the Alexandria people back into the District of Columbia in order to avoid the payment of these great taxes which they pay down there.

Mr. CARLIN. And the gentleman never will.

Mr. MANN. No; I assume I never will. One would suppose from the chart before us that the people of Alexandria sit up nights to complain about the amount of taxes they pay for their

own government and the amount they pay for the District government, and yet when they are offered in a way the opportunity to be brought into the District and have these taxes reduced—on the chart—they decline, and why? One reason is because the chart is wrong.

Mr. PROUTY and Mr. CARLIN rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. MANN. I yield first to the gentleman from Virginia.

Mr. CARLIN. The people of Alexandria have no knowledge of any such chart as this. There are no better friends of the National Capital anywhere on earth than the citizens of Virginia, and especially those of Alexandria. [Applause.]

Mr. MANN. And no better friend than the gentleman from Virginia [Mr. CARLIN]. [Applause.]

Mr. CARLIN. I hope not, and I hope that no chart which attempts to make any comparison between the figures in Alexandria and Washington will have any effect upon the membership of this House, especially a chart that does not state the facts, as this chart does not. In fact, this chart gives the impression that for Alexandria's sidewalks the people pay all and for pavements they pay a third. That is practically true. Under the constitution of Virginia the law requires that the streets shall be paved out of the treasury of the whole people, and that the abutting property owner shall not pay any part of it anywhere in our State, but despite the fact of this constitutional provision it turns out sometimes that the people of Virginia, who wanted to get a street paved, contribute their part——

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CARLIN. I hope I did not take up the gentleman's time. [Laughter.] I just came into the Hall of the House, and I did not know anything about this controversy.

Mr. LINTHICUM. Mr. Chairman, it is not my intention to take up a great deal of the time of the committee, for I have not much to say. The fact is I have been questioning the various speakers upon this bill, and it might be supposed if I said nothing that I am against the taxation of the District upon unfair terms, and therefore these few remarks.

I am in favor of taxing the District fairly. I do not oppose taxing the realty upon a proper basis. I believe in taxing the intangible property of the District upon a fair basis, but I am not in favor of taxing bonds and savings-bank deposits upon the same basis that we tax realty. I notice in this amendment, known as the Prouty amendment, the following section:

> Neither shall a tax be imposed upon shares of the capital stock of any corporation which corporation pays to the District of Columbia the tax herein provided for upon all the property represented by its capital stock or pays taxes on its gross income—

And so forth.

Now, why should a man holding a bond of a corporation of the District of Columbia be exempt from taxation on these bonds any more than the man who owns the bonds of corporations in your city or my city? The theory upon which bonds are not taxed at the same rate as realty, we all recognize, is this: That the money which the bond represents is already taxed. Let us take, for instance, that I, practicing law, should happen—which is merely a supposition—to lay up some money derived from that practice. Now, let us assume that I put that money into a corporation and that that corporation invests the money in laying tracks, in building power houses, and in general improvement of its railroad system.

Now, my State and city tax that railroad and tax everything in which that money is invested. It will tax the power house that it builds, it will tax the rails that it helps to buy and lay, it will tax everything that that money is put into, which is then represented by tangible property of the road. Therefore, if you tax me again at the full rate upon that bond, you are not only taxing what the money is invested in, the tangible property of the railroad, but you are taxing the money or bond again at the same rate upon the money which is represented by the bond in my possession.

Now, you will notice that the Prouty amendment especially recognizes this fact as to the District of Columbia. If I invest money in a bond of a railroad in this District, then I would not be compelled to pay taxes on that bond, but if I invested in the bond of a railway in Baltimore city, then I have to pay full tax upon that bond if I should happen to live here. And what does that mean? Our railroad, for instance, pays 4 per cent interest on its first bonds. It would mean that I would be compelled to give practically a dollar and a half of every $4 that I got as a tax upon that bond, and it would reduce my money to 2½ per cent interest. In effect, it would depreciate the value of my bond and I would lose part of my principal.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. LINTHICUM. Will the gentleman allow me to proceed along this theory a little longer and then I will yield to him?

Now, when the railroad wants more money, what must it do? Why, if you pay on those bonds at a dollar and a half it will have to raise the rate of interest and pay 5½ per cent or 5 per cent instead of 4 per cent, so the tax really goes back to the railroad and depreciates the value of the bonds in which the man has his money invested at 4 per cent. Now, in my city we tax the real estate at its full value, and I think that is fair, because, what is the difference in taxing property at half its value and have the rate higher than taxing it at the full rate and having the rate lower? It is the same in the end. I think property ought to be taxed at its full value and have the rate lower, as this reduces the rate and looks better. Then there ought to be a fair rate upon the bonds and savings deposits. In my city we found this: We tried to tax them at the full rate at which we tax real estate up until some 15 years or more ago, and the effect was we did not get the bonds on the books. The people would not come there and turn them in for taxation, because the tax took such a large part of their income; so we devised a system by which we made the taxation for local taxes 30 cents on the hundred, and then we added on the State tax, which at that time was 16 cents, but our State tax began to rise, just like those in every State rise where you build extensive systems of good roads, and State taxes ran up to 32 cents.

What was the result? There we had a tax of 62 cents on investments, in bonds and securities, and our people found it was unwise. It would not produce the amount of taxes that a moderate taxation would. Every man is willing to pay a fair tax, or, at least, a majority of people are. It did not produce as much taxes, because you could not get the people to turn in their securities. So our legislature, upon the advice of men versed in tax matters, decided to make it a flat rate of 45 cents on the hundred, 30 cents to go to the local community and 15 cents to the State. You will find by adopting such a system as that that you will get more taxes out of the bonds and investments than you ever would get by a large tax rate which takes nearly half of the income. Now I yield to the gentleman from Pennsylvania.

Mr. MOORE. I wanted to call the gentleman's attention to the question he raised a moment ago that the money invested in stocks or bonds is already taxed. Has the gentleman considered the savings funds, all of which reinvest the deposits of the poor which come into their vaults? If he has not, I call his attention to one savings fund in my city which has about 300,000 depositors, whose deposits average about $500. Over $120,000,000 of these savings deposits is invested in stocks and bonds throughout the whole of the United States, and some of it in the District of Columbia. Does the gentleman think in a case of this kind that the burden of new taxation would fall so much upon the rich as it would fall upon the poor depositors who thus have their money in savings funds?

Mr. LINTHICUM. I will say to the gentleman that, in my opinion, the rich find a wider field for investment. They have a great many bonds and other securities in which to invest, while the poor man has only a few hundred dollars, and does not know anything about other institutions than the savings banks and savings funds, and he goes there and loans his money for 3 to 3½ per cent interest. If you take a dollar out of his 3 per cent interest, you take half of his interest away from him.

Mr. MOORE. And the savings fund necessarily invests this money in enterprises which issue stocks and bonds?

Mr. LINTHICUM. I think it is safe to say on a broad principle that comparatively little money lies idle, unless it is in the hands of some fellow who wants to bury it in the ground. The idea some people have that great sums of money are hoarded in banks is wrong. No sensible bank will put its money in a vault and let it lie there. It goes out. It goes from the savings bank to real estate at 4½ to 5 per cent. But a small amount of it is kept in the bank. It is generally invested in bonds and mortgages and other gilt-edged security, and constantly works. No bank keeps its money in its vaults and does not make it work.

Mr. BORLAND. The gentleman was speaking about the tax on corporation bonds in his State. I will ask him whether his State does not levy an excise tax upon the capital stock of the corporation over and above what it levies upon other property? In a great many States, you know, they have a State tax on corporate stocks or corporations, which is a general State tax in addition to property tax. Does your State levy that tax upon its corporations?

Mr. LINTHICUM. Our State tax commission fixes the stock value, and we also have a State tax on business corporations—a franchise or excise tax.

Mr. BORLAND. I want to call the attention of the gentleman to the fact that that kind of tax is absent also in the District of Columbia. Corporations here have no State tax to pay.

Mr. LINTHICUM. We have a State tax, of course, but I am talking principally about bonds and savings-bank deposits. I would like to say to the gentleman from Missouri, that while he is in favor of a dollar and a half tax rate on securities, or some other rate, the same as on real estate in the District of Columbia, in his own State he says he only pays 50 per cent of the tax on bonds and securities. So I think you will find that nearly all the States in the Union do not tax bonds and securities or that kind of property at the same rate they tax real estate.

Now, Mr. Chairman, I merely wanted to bring out these facts to show that I am not in favor of the District people escaping taxation. I am in favor of their having fair taxation. I am in favor of their having just about what we have, which I think is fair. Of course this chart here is gotten up in the very best shape it could be gotten up, but we all recognize it can not be correct. There are certain cities which charge a paving tax——

Mr. PROUTY. Will the gentleman yield?

Mr. LINTHICUM. In just a moment. They charge a water tax and various taxes of that kind. And why? Because they do not want the tax rate of their city to seem too large, as it drives away capital and keeps people away from the city; and, therefore, many cities have a plan by which they have these various kinds of taxes, and I do not take it that those are included in this chart.

Now I yield to the gentleman.

Mr. PROUTY. You said they were incorrect. Will the gentleman be so kind as to point out any one of those cities that are incorrect?

Mr. LINTHICUM. I do not know that I could go through all of those.

Mr. PROUTY. Any one of those.

Mr. LINTHICUM. My own city, for instance, is not correct.

Mr. PROUTY. I said that these only include general taxes; not special taxes.

Mr. LINTHICUM. That is what I mean to say, that in many cities general taxes and special taxes are all one. In some cities they are divided up into various classes.

Mr. KELLEY of Michigan. Will the gentleman yield to me for a suggestion on that point?

Mr. PROUTY. In half a second. If you would add that special tax, it would make those figures larger.

Mr. LINTHICUM. I realize that. I am not saying that the figures are too low. I am saying that chart is not correct by reason of that fact.

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield to me for a suggestion on that point?

Mr. LINTHICUM. Yes.

Mr. KELLEY of Michigan. In the city of Washington there are no industrial corporations to speak of, as I understand it, while in all these large cities there are millions of dollars' worth of property owned by industrial corporations, and it is a fact well known to almost everybody that in many cities it is the custom to put these industrial corporations on the tax roll at a very low valuation for the purpose of encouraging those industries; so that it is safe to say that there are millions of dollars' worth of industrial and corporate property in every large city in the United States, or nearly so, that is not found upon the tax roll, which, if put upon the tax roll, would very much reduce the tax rate. This is undoubtedly true of many of these cities named on the chart.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. LINTHICUM. I want to say that in our State of Maryland, by a recent act of the legislature, we have taken all taxes off industrial plants and all taxes off furniture, up to the limit of $500.

In conclusion, Mr. Chairman, as I have said, I have spoken at this time for the reason that I wanted the people of the District of Columbia to have just as fair treatment as the citizens of any other part of our country. In fact, in my view we owe them even more consideration, for the reason that they are compelled to entirely rely upon us to administer the affairs of this District. They have no power by which they can yea or nay to anything we do except by complaint to those in authority. In other cities, if Congress or their other public officials do that which they do not like they have redress to the ballot; but here in the District we are taxing people without giving them representation, and it is therefore incumbent upon us to be most particular in the administration of their affairs. I for one am particularly anxious that they should be done no wrong, and that they should bear only their just portion of the burden, which I am sure they are willing to bear.

In a lecture which I had the pleasure of listening to the other evening the speaker spoke of Paris being the most beautiful city in the world save one, and the one to which he had reference was our own city of Washington. I do not believe that the people of this country wish to be parsimonious with the beautiful Capital of this Republic. I believe they want it to be the most beautiful city in the world, and that they are willing to make up any necessary difference after the residents of the District have paid a fair taxation. I am not prepared to say whether or not the half-and-half plan is fair. I rather think that since the city has grown to such large proportions, and since its revenues have so greatly increased, perhaps some other ratio would be just; but that is a question for those who understand the affairs of the District better than I do. I am opposed, however, to the Prouty amendment for the reasons I have assigned and which seem to me to prove conclusively that it is absolutely unfair to the residents of the District of Columbia.

My colleague [Mr. COADY] has shown by facts and figures unimpeachable that the very gentlemen who are supporting this Prouty amendment are not giving the residents of the District of Columbia as liberal treatment as the people of their own States receive. They are attempting to tax securities at the same rate as they do real estate, when the laws of their own States do not do it. They are endeavoring to limit expenditures upon the capital of the Nation which they would favor were they to be devoted to beautifying and adorning their own cities.

I for one am proud of the city of Washington, of its splendid buildings, its magnificent thoroughfares, its beautiful parks, with their wonderful foliage. Let me say to those gentlemen who are upholding this amendment, which would hinder and delay the progress and prosperity of this city, that when they go home they will find that those of their constituents who have visited Washington and beheld the beauties which I have enumerated are proud of our Capital and do not begrudge what it has cost them or their State.

We are all one people. Some of us are engaged in making the laws, some in manufacture, some in the professions, and some in various other lines of industry and work; but we are, nevertheless, partners in the same enterprise, citizens of the same great country; and while some may receive more than others for their labors, it is a partnership in which we are all interested and of which we all should be proud and satisfied.

When I return to my constituents I shall say to them that I was in favor of continuing the progress of our Capital upon the same broad lines upon which it is now moving and that, while I am in favor of taxing the people of the District of Columbia fairly and justly, I am also in favor of the National Government beautifying and adorning its own home, as it should, as the Capital of a great and enlightened people.

Mr. JOHNSON of Kentucky. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That all real estate in the District of Columbia subject to taxation shall hereafter be assessed annually at its true value.

Mr. PROUTY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Iowa [Mr. PROUTY] moves to strike out the last word.

Mr. PROUTY. As I have not had an opportunity to explain or discuss this chart heretofore, I am going to avail myself of the opportunity under the five-minute rule.

In the first place, the paper this morning, or yesterday—it came into my hands this morning, and it has come into the hands of all of you, no doubt—said this is a table of Prouty-made figures. I want to say to the Members of this House that there is not a figure on that chart that is made by PROUTY, except where reductions have been made in certain instances, for instance, like one-fourth, and so forth. I have left this chart in the lobby of the Hall for two weeks. Those figures have been in the possession of the newspapers of this city for two weeks, and if you will read the article through, which undertakes to comment upon my speech, you will notice they do not call in question a single figure that is on this chart.

Now, what does this chart show? It shows the actual tax rate at actual cash value that is paid in the cities named. It shows that the average is 19 mills on full value. It shows that in Washington the rate is 10 mills. If the Members of this House, under the idea of being generous to Washington, wish to

go back home and say they voted for a bill that gave a preference to the citizens of Washington that amounted to one-half of the taxes they are paying at home, all right. I have done my duty. I have examined the facts carefully and candidly, and I can say truthfully to the Members of this House that under the present system of taxation the people of the United States are paying to this people to support it while this people is paying only half the taxes that are paid at home.

Mr. REED. Mr. Chairman, will the gentleman yield for just a question?

Mr. PROUTY. No; I can not yield under the five-minute rule. Now, the gentleman from Illinois [Mr. MANN] suggested that this chart was false. I ask him now to rise and in my time point out the item in it that is wrong.

Mr. MANN. I will say that the valuation that the gentleman puts upon real estate in both this city and Alexandria is entirely erroneous.

Mr. PROUTY. I did not place the valuation at all. Under the laws of the State of Virginia, in which the city of Alexandria is located, it is provided that property shall be assessed at its full value, and the ordinances of the city show that the real estate is assessed at 18 mills on the dollar.

Mr. MANN. The gentleman asked me to point out wherein the figures are wrong. The law of my State for many years required property to be assessed at its full value, but it was not.

Mr. PROUTY. True; but the mayor of Alexandria says in fact it is assessed at 75 cents, while the George report shows that in the District of Columbia it is assessed at only 66⅔ per cent of the required amount under the laws of the United States.

Mr. MADDEN. How does the gentleman know?

Mr. PROUTY. I will explain that if I have another five minutes.

Mr. MADDEN. I would like the gentleman to explain it.

Mr. PROUTY. Here is Alexandria, just across the river. A man living in Alexandria—a poor man, who has just as poor a house as the man living in this city—is called upon to pay 18 mills on his personal property, while in this city a man pays only 15 mills. On his real estate the man over in Alexandria pays 18 mills, and the man in Washington pays only 10 mills. On intangible personal property the man in Alexandria pays 18 mills, while the man in Washington pays nothing. On stocks and bonds, such as we have been proposing to tax here, the man in Alexandria pays 18 mills and the man in Washington pays 5.

These figures are accurate, gentlemen, and I will risk my reputation as a man that every one of them is absolutely correct. Are you going, now, to say that a poor man living over in Alexandria that pays these taxes shall come over here and help educate the people of this District and help to build the sidewalks and pavements in this city? Is that equity, gentlemen? I am not discussing war in Mexico; I am discussing the broad principles of right and equity at home.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Maryland [Mr. LINTHICUM] asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MADDEN rose.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] is recognized.

Mr. MADDEN. Mr. Chairman, I suppose it is quite out of order for any person to tell what his personal experience is anywhere, and particularly in the District of Columbia; but I happen to be one of those men here who own a little house, and I will sell that house to anybody here who wants it for $10,000, and if we are only being taxed 6½ mills on the value of the property, I want to say that I am paying over $130 a year taxes on that house. I paid $12,000 for the house; it is not worth more than $10,000, and I am willing to sell it to anybody who wants it for that price. Now, that is $1.30 instead of 65 cents on $100. There is no place in America where the money is expended as judiciously as it is in this city.

Mr. BORLAND. Then the gentleman would not be hurt by raising the assessed value to the full valuation, I take it?

Mr. MADDEN. I certainly would be hurt by raising it, because I am paying on the full value of it now.

Mr. BORLAND. Then the gentleman would gain, perhaps, by having other people pay on the full valuation, likewise.

Mr. MADDEN. I take it everybody is paying on the same basis as I am.

Mr. Chairman, we are living in the Capital of the Nation, and every man, woman, and child in America is interested in having this the most beautiful city in America.

Mr. COOPER. Will the gentleman yield for an interruption?

Mr. MADDEN. Yes.

Mr. COOPER. How is it possible in a great many cases to determine what is the full valuation of property?

Mr. MADDEN. Why, nobody on earth can tell. It is only the imagination of the assessor.

Mr. MANN. But when it comes to writing a chart they can tell exactly.

Mr. MADDEN. Yes; when it comes to writing a chart you can tell, but there is no way on earth that any man can fix the full value and know that he is right in fixing it.

Now, I take it nobody cares whether you assess property on the basis of the full value of it or on the basis of 10 per cent of the value.

Mr. GARRETT of Texas. How does the gentleman arrive at the value of his house?

Mr. MADDEN. I do not arrive at it. I am simply saying to you that I will sell it to you for $10,000.

Mr. GARRETT of Texas. I understand the gentleman is paying on the full valuation. I ask him how he arrives at that.

Mr. MADDEN. I am simply saying that I will sell the house for $10,000, and that I am paying $130 a year taxes. I do not know whether it is full value or half value, but I am offering to sell this property to you for $10,000, if you want to buy it, and I am saying to you that instead of paying 6½ mills on the dollar on the full value I am paying 1 cent and 3 mills on the dollar.

Mr. GARRETT of Texas. Who fixes the assessed value of the property?

Mr. MADDEN. I suppose the assessors do.

Mr. GARRETT of Texas. Did they have any idea what it cost the gentleman?

Mr. MADDEN. I do not know anything about that. I am only telling the gentleman what I paid for it, and what I consider it is worth.

Mr. GARRETT of Texas. I did not understand the gentleman to say what he paid for the property.

Mr. MADDEN. I told what I paid for it, and what it is worth, and what I will sell it to you for.

Mr. GARRETT of Texas. I did not catch what the gentleman said he paid for it.

Mr. SIMS. I want to know if the gentleman knows of any village anywhere in the United States where the total amount of taxes on a piece of real estate does not exceed $1.30 a hundred?

Mr. MADDEN. I will say to you right now that I own a piece of property in Chicago that is worth a good deal more money than the house in which I live here is worth, and on it, instead of paying $130, I pay only $79.

Mr. SIMS. I said any village.

Mr. MADDEN. I am talking about a great city.

Mr. SIMS. There is not any village in the United States whose taxes are as low as they are here.

Mr. MADDEN. When property in the great city of Chicago is only taxed $79 a year, and property which is worth no more pays $130 taxes here, I assume that the people in Washington are not untaxed. And I am paying in Chicago the same rate that everybody else pays. I am not making this argument on account of my personal interest in it, but I simply want this House to understand that there is a misconception somewhere about the amount of taxes paid, according to the value of the property, by the people of the District of Columbia.

In all the States of the Union, in all the cities of all the States of the Union, we have great manufacturing enterprises. These manufacturing enterprises employ our people. Here there is no such thing. The Government departments take the place of the factories in the District of Columbia, and the department is the only place where people can find employment.

Mr. GARRETT of Texas. May I ask the gentleman a question?

Mr. MADDEN. Yes.

Mr. GARRETT of Texas. I understand, in the District of Columbia, that all the public parks and buildings, all the public property, are taken care of by the public separate and apart from the city. If that be true, then, outside of that property all the other property owned by individuals would be on an equal footing.

Mr. MADDEN. I do not think that is the case.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MADDEN. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Illinois asks that his time be extended five minutes. Is there objection?

The was no objection.

Mr. MANN. The gentleman knows that the parks, and so forth, are paid for under the half-and-half rule?

Mr. MADDEN. Yes. I understand that Potomac Park is not.

Mr. SIMS. And the park around this building is not, and it is a pretty good-sized park.

Mr. MADDEN. All of the parks in the city except Potomac Park and the Capitol Grounds is paid one-half out of the District revenues and one-half out of the National Treasury, Rock Creek Park as well. I want to say, further, that there is no opportunity here for building a new factory, and so adding to the assessible value of the property. The people of the District of Columbia are employed by the Government. The only activity in which they can engage to increase the value of property in the District is to endeavor to get a new bureau created somewhere in one of the departments of the Government. Everywhere else, all over the Union, people are engaged in the activity of bringing new enterprises into town to employ more labor and increase the wealth, so that they will have more taxable property and, in a way, create greater prosperity. We live here in this Capital of the Nation owned by everybody in the Union. Every man and woman in the Union is proud of this Capital City of the United States. They want to see it made the most beautiful city in the world. They want it kept, as it ought to be and will be if we do our duty, as the most beautiful city in the world. [Applause.] This Capital City is to be here for all time. It is to be the property of all the people of the Union. I have never yet known a man or a woman to come here from any place in the Union who did not go away and feel proud that they were part owners in this beautiful city. Can we, in our capacity as Members of Congress, afford to say to the people of the Nation that we no longer have any interest in beautifying this city? I take it not. Can we afford to say that the Nation whose Capital buildings are here, whose Government is here, that that Nation ought not pay something to maintain it?

Mr. BORLAND. Will the gentleman permit me to ask him a question?

Mr. MADDEN. Certainly.

Mr. BORLAND. During the last five years the Government has erected 11 Federal monuments without expense to the District. Is not that beautifying the Capital at rather a rapid rate?

Mr. MADDEN. Monuments are not all that this Capital needs.

Mr. BORLAND. But is it right for the gentleman to cast such slurs against us who have voted for those improvements?

Mr. MADDEN. I am not casting any slurs.

Mr. BORLAND. Is not Congress beautifying the Capital?

Mr. MADDEN. I am giving you an opinion of what I think ought to be done. The gentleman from Missouri has vociferated about what the people of the United States ought not to do for the Capital of the Nation, and I have not interrupted him or questioned his integrity or honesty of purpose. I say to the gentleman that I am as patriotic as he. I have no desire to impugn his motives, and I only ask of him the same right to exercise my views as he arrogates to himself.

Mr. BORLAND. But I think in all fairness the gentleman ought to state what Congress is doing on behalf of the city.

Mr. MADDEN. Everybody knows what Congress has done and what it is doing. Everybody that I know, everywhere in the United States, hopes that Congress will continue to do what it has done in the past, and not only what it has done in the past, but will do more, so that Washington, the National Capital, may be considered by everybody coming from anywhere to look upon it as the most attractive and beautiful city in the world. [Applause.]

Mr. CROSSER. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11269) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The message also announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 4353) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. SMOOT as the conferees on the part of the Senate.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 4167) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and of other wars than the Civil War, and certain widows and dependent relatives of such soldiers and sailors, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. SMOOT as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bills and joint resolution of the following titles:

H. R. 122. An act authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes;

H. R. 5487. An act to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis.; and

H. J. Res. 204. Joint resolution authorizing the Secretary of Agriculture to make exhibits at forest products expositions to be held in Chicago, Ill., and New York, N. Y.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture.

TAXATION OF REAL ESTATE IN THE DISTRICT OF COLUMBIA.

The committee resumed its session.

The Clerk read as follows:

Strike out all after the enacting clause and insert the following:

"That all real estate in the District of Columbia subject to taxation shall hereafter be assessed annually at its true value.

"SEC. 2. That upon the assessed value of all real estate the Commissioners of the District of Columbia shall hereafter annually levy a tax of such per cent as shall, with other revenues of said District, be sufficient to pay the portion to be borne by said District of the estimated expenses of the government thereof for the ensuing fiscal year and to satisfy the portion to be paid by said District of any debts thereof. Said tax rate shall be fixed by the said commissioners on or before the 16th day of October of each year for the ensuing fiscal year. If the commissioners shall fail to make said levy or to fix said tax rate on or before said date, the tax rate for the preceding year shall be the rate of taxation for the ensuing year to all intents and purposes the same as if made and fixed by the commissioners. The tax rate hereafter levied upon tangible personal property now assessable shall be the same as that fixed by the said commissioners to be levied upon real estate as herein provided.

"SEC. 3. That to accomplish the purposes herein specified the said commissioners, within 90 days after this act shall become effective, shall appoint nine assistant real estate assessors, who, with the assessor and the five members of the present board of assistant assessors, shall constitute and compose the board for the assessment for taxation of taxable property in said District. In cases of emergency arising during the first two assessments under this act the said commissioners may appoint not exceeding five additional assistant real estate assessors for periods of not exceeding three months each, who shall be compensated at the same rate as the assistant assessors in performing the duties herein imposed on them. Each person so appointed shall, within 10 days after receiving notice of his appointment, take and subscribe to an oath diligently, faithfully, and impartially to perform all and singular the duties imposed upon him by law. If any such appointee shall fail to qualify within the time stated or shall fail to enter upon the discharge of his duties within 10 days after such qualification, the appointment shall be invalid, and the commissioners shall forthwith appoint another suitable person, who shall qualify as above provided. The only qualifications of the assessor or of any assistant assessor shall be good, moral character and competency; and all members of the said board of assessors shall devote their time exclusively to the discharge of their official duties. The said commissioners are vested with power to remove the assessor or any of the assistant assessors for any cause deemed by said commissioners to be sufficient and to appoint the successor of the officer so removed.

"SEC. 4. That the assessor shall receive an annual compensation of $5,000, and the 14 assistant assessors shall each receive an annual compensation of $3,000.

"SEC. 5. That, in addition to the duties now imposed upon him by law, the assessor shall supervise the assessments of all taxable property in said District, and the assistant assessors shall at all times be subject to his administrative control. He shall cause to be prepared annually the tax roll herein provided. He shall annually select 10 of the assistant assessors, who shall constitute the board of equalization of assessments of real estate, and shall also annually select two other assistant assessors, who shall compose the board of personal tax appraisers to assess personal property as now provided by law, and the two remaining assistant assessors shall constitute the board of appeals from assessments of real estate, and shall also constitute the board of personal tax appeals and shall perform all the duties prescribed by law immediately prior to the passage of this act to be performed by the board of personal tax appeals. When not engaged in hearing and determining appeals as herein provided the members of the said board of appeals shall perform such duties connected with the assessor's office and the records thereof as may be

assigned to them by the assessor, but they shall not participate in the actual work of making assessments, except as hereinafter provided. The assessor shall be a member and chairman of all boards created by this act and shall designate a member of each board and of each division thereof to act as chairman in his absence. A majority of the members of each board or of any division thereof shall constitute a quorum for the transaction of business.

"SEC. 6. That the assessor shall, subject to approval by said commissioners, divide the District of Columbia into such assessment districts as will best facilitate the making of the assessments herein directed. To each assessment district the assessor shall assign one or more of the said assistant assessors other than the members of the said board of appeals or the assessors of personal property. The assistant assessors so assigned shall diligently devote themselves to the study of conditions affecting the value of land and of improvements throughout the District of Columbia, particularly in their respective districts, and shall, under the direction of the assessor, from actual view and from the best sources of information obtainable, determine and assess the true value of each parcel of land within their respective districts and of the improvements thereon. They shall record such values in field books with appropriate descriptions, showing separately the value of the land and the value of the improvements, the area of each parcel, the location by square, lot, and street numbers, the name of the owner, if obtainable, otherwise the name of the person in possession, and such other information as shall be required by the assessor.

"SEC. 7. That said work of assessing real estate shall be commenced not later than the first Monday in November and concluded by the last day of February in each year. On or before the first Monday in March the said board of equalization shall convene, and shall review and fairly and impartially equalize said assessments within each and all of said districts. Said board of equalization shall hear such complaints as may be made relative to said assessments, and shall raise the valuation of such parcels of land or improvements as, in its opinion, have been returned below their true value, and shall reduce the valuation of such as, in its opinion, have been returned above their true value, so as to make each assessment represent the true value of the property and taxation uniform according to value throughout the District of Columbia. The assessor may, in his discretion, divide said board of equalization into not more than three divisions, whose duties and powers shall be the same as those of the whole board, but the action of any of said divisions shall be subject to revision or alteration by the whole board. The said work of equalization shall be completed, as nearly as practicable, by the 15th day of May of each year, after which date no complaints as to valuations shall be received. The assessor shall thereupon record or cause to be recorded, in a set of books properly prepared for such purpose, every parcel of land and all improvements so assessed and equalized, which record shall constitute the assessor's roll, and shall show the following facts in each instance, namely: The name of the owner or other person in whose name the property is assessed; the number of each parcel; the assessment per square foot or per acre of each parcel; the number of square feet in each parcel, or in the case of lands not subdivided the number of acres; the value of the land and the value of the improvements stated separately; the location of the property by square, lot number, and street number; and such other information as the Commissioners of the District of Columbia shall direct to be shown thereon. Said roll shall be properly ruled in tabular form to show the said facts in appropriate columns. When said roll shall have been so prepared and completed and shall have been approved by said commissioners, it shall constitute the basis of taxation for the ensuing fiscal year, subject only to such changes as may be made by the board of appeals, as hereinafter provided; and when all valuations therein shall have been finally determined, the said commissioners shall have prepared such numbers of printed copies of said roll as shall be needed for the use of the officers of the District of Columbia, the committees of Congress, and for the inspection of the public.

"SEC. 8. That any taxpayer who shall have made complaint to said board of equalization and who shall feel aggrieved at the action taken thereon may, on or before June 1, appeal to the board of appeals by filing with the assessor, on printed blanks furnished by the assessor, a statement verified by oath or affirmation of the owner or his agent taken before the assessor or one of the assistant assessors, or other officer authorized by law to administer oaths, showing the assessment complained of and also the true value of the property in the opinion of the affiant, estimated at the price it would bring at a fair, voluntary sale, without regard to conflicting claims of title. Beginning the first Monday in June and continuing as long as may be necessary to dispose of the appeals filed, but not later than the first Monday in July, the said board of appeals shall hear and determine said appeals; but no valuation shall be reduced unless it shall have clearly appeared that the assessed value of the property is more than the true value as herein defined. The said board of appeals, and also the said board of equalization, are empowered to make all reasonable rules and regulations for the transaction of their business not inconsistent herewith and to limit the number of witnesses who shall testify for or against any complainant or appellant. Within five days after any valuation shall have been changed by said board of appeals the chairman thereof shall certify such fact to the board of equalization, which shall make a corresponding change on the assessor's roll. At the conclusion of their work the said board of appeals shall file in the assessor's office and with the Commissioners of the District of Columbia duplicate reports of the action taken by them on each appeal, showing also the name of the appellant and names of the witnesses, the valuation fixed by the board of equalization and that fixed by the taxpayer, and a brief description of the property.

"SEC. 9. That it shall be the duty of the board of equalization at any time to retrospectively assess for taxation at its true value for any year or years any real estate omitted from assessment, in whole or in part, and also any real estate the assessment of which has heretofore been declared by judgment of court to be invalid: *Provided*, That no such property shall be retrospectively assessed for more than five years, except in case the validity of the assessment or any part thereof has been or is in litigation. The board of equalization shall at once certify all such retrospective assessments to the collector of taxes and to the auditor of the District of Columbia, and such retrospective assessments shall have the same force and effect as the regular annual assessments herein directed.

"SEC. 10. That as soon as said assessor's roll shall have been corrected to conform to the action of the board of appeals and finally completed, duplicate copies thereof shall be certified by the assessor to the auditor of the District of Columbia and to the collector of taxes of said District. Hereafter it shall be the duty of the said collector of taxes and the subordinates of his office, under his direction, to prepare and issue the tax bills according to said roll. The said collector of taxes shall receipt for said roll in triplicate and he shall be held responsible individually, and on his official bond, for all taxes, cost, interest, and penalties on the valuations contained in said roll and all valuations of property retrospectively assessed as herein directed, except such as he may not be able to collect after fully complying with the requirements of law. Copies of the said receipt shall be delivered to the assessor and to the board of commissioners of said District. The remaining copy shall be retained by the collector.

"SEC. 11. That all real estate in the District of Columbia subject to taxation shall hereafter be assessed and its taxable status determined as of the commencement of the 1st day of January for taxes of the fiscal year beginning the 1st day of July following.

"SEC. 12. That all real estate shall be assessed in the name of the owner or owners, trustee, agent, claimant, or person in possession, in the order named. The real estate of the estate of deceased persons shall be assessed in the name of the representative of such estate or as the property of the heirs or devisees of the decensed person without naming them. The real estate of any person under disability and such as may be held in trust for another or others shall be assessed in the name of the person controlling the property or in that of the beneficial owner or owners. If there be no known person of any of the classes herein named, such property shall be assessed to "unknown owner."

"SEC. 13. That all field books and all other books and plats pertaining to or used in the preliminary or final assessment of real estate are hereby declared to be public records and shall be subject to the inspection of the public during the office hours of the officers herein mentioned.

"SEC. 14. That each of the said boards, and also the assessor and each of the assistant assessors, are authorized and empowered to take testimony, on oath or affirmation, relative to any matter pertaining to assessment of real estate; and they, and each of them, are given power to administer oaths or affirmations to any person so testifying. The assessor or the acting chairman of any of the aforesaid boards or divisions thereof is empowered to summon by subpœna any person before him or before any of said boards or any division thereof, and to require such witness or witnesses to give testimony under oath or affirmation touching the subject matter of the investigation or hearing. Any member of the Metropolitan police force may serve such subpœnas anywhere in the District of Columbia, but no extra compensation shall be paid for such service. Such fees shall be allowed witnesses so examined as are allowed in civil actions before the Supreme Court of said District, and said fees shall be paid out of the contingent fund of the commissioners on the certificate of the assessor, except those of witnesses for complaints before the said board of equalization and for appellants before the said board of appeals, for which said District shall not be liable. In case of disobedience, neglect, or refusal on the part of any person to comply with any such subpœna, or on the refusal of any witness to testify to any matter about which he may be interrogated by any of the officials aforesaid, it shall be the duty of any judge of the Supreme Court of said District, on the application of the assessor, to compel obedience and the giving of testimony by proceedings for contempt as in the case of disobedience of the requirements of a subpœna issued from such court or a refusal to testify therein. Any false swearnig on the part of any person in any statement to secure the appeal herein provided, or of any witness testifying before the assessor or any of the said assistant assessors or any board or any division thereof, shall be deemed perjury, and shall be punished as in other cases of perjury.

"SEC. 15. That no error or informality in the description or location of the property, or in the name of the owner or party assessed, or in any step or proceeding herein provided shall invalidate the assessment. Any act herein directed to be performed by any of said boards may be performed and certified by a majority of the members thereof.

"SEC. 16. That the words 'real estate,' as herein used, in addition to their ordinary meaning, shall include easements, rights of way, and rights of occupancy of the lands of another. The word 'improvements,' in addition to its ordinary meaning, shall include all structures of every kind upon, beneath, or over land. The words 'true value,' as herein applied to assessments, shall be construed to mean the fair cash value of the property, or the equivalent thereof, estimated at the price it would bring at a fair, voluntary sale, without regard to conflicting claims of title. The word 'person,' in appropriate cases, shall include persons, firms, corporations, companies, associations, executors, administrators, guardians, committees, or trustees. The word 'parcel' shall include lots, parts of lots, tracts, acreage, and other pieces of real estate.

"SEC. 17. That the provisions of law in force immediately prior to the passage of this act for the exemption of property from taxation shall remain in full force and effect.

"SEC. 18. That this act shall become effective on July 1, 1914, and all laws or parts of laws inconsistent or in conflict herewith are hereby repealed."

Mr. STAFFORD. Mr. Chairman, I make the point of order that the substitute offered by the gentleman from Ohio is not in order at the present time. I direct the Chair's attention to the following to be found in section 805 of the Manual:

When a bill is considered by sections or paragraphs an amendment in the nature of a substitute is properly offered after the reading for amendment is concluded.

The gentleman's substitute is virtually the bill that has been reported to the House for consideration without the amendments of the committee, and under the ruling to which I just called the Chair's attention it is not in order to offer this substitute until the bill has been read for amendment and an opportunity has been given to perfect it. We have had no opportunity to act at the present time upon the amendments submitted by the committee. I call the attention of the Chair to the citation, which is paragraph 5788 of Hinds' Precedents, volume 5.

Mr. MANN. Mr. Chairman, if the gentleman will just read one line more than he did——

Mr. STAFFORD. I will read it:

But when it is proposed to offer a single substitute for several paragraphs of a bill which is being considered by paragraphs, the substitute may be moved to the first paragraph, with notice that, if agreed to, motions will be made to strike out the remaining paragraphs.

Mr. MANN. I think that covers the case.

Mr. STAFFORD. But, Mr. Chairman, here we have a substitute offered that is substantially the bill reported to the

House without the committee amendments. It presupposes that we are going to act on the substitute without having any opportunity to offer more than one amendment, a substitute embodying not only 1 paragraph, but 16 sections.

Mr. CROSSER. Mr. Chairman, that has more to do with the wisdom of the thing than with the question of whether it is in order.

Mr. STAFFORD. In the interest of orderly procedure, we ought to have the substitute deferred until we pass upon the committee amendments.

Mr. MANN. Mr. Chairman, I think the rule is pretty well settled upon the subject. It is true that where a paragraph itself is under consideration a substitute to the paragraph can be submitted only after amendments to perfect the paragraph have been voted on. On the other hand, parliamentary law is for the purpose of enabling the body to transact business in an orderly way. When the first paragraph or the first section is read, it is in order to offer a substitute for the entire bill, giving notice that if agreed to you will move to strike out the other sections as they are reached. That is in order. If the body has concluded to take the entire substitute, to save time, and adopt it instead of going ahead and perfecting a large number of sections which in the end will be stricken out of the bill, it is surely in the interest of orderly procedure to act upon the substitute. It is good sense, and it is parliamentary law that has been adhered to in this House for many years.

The CHAIRMAN. The point of order is overruled.

Mr. CROSSER. Mr. Chairman, the amendment just read is the real George bill. The one which is pending before the House is the bill as amended by the majority of the committee. The provisions of this bill are as follows: It provides for a full-value assessment, a thing as to which both sides are agreed.

Mr. COOPER. That is on real estate only?

Mr. CROSSER. Yes; on real estate only. It provides for full-value assessment of real estate for the purposes of taxation. That is also provided by the majority report on the bill. Our bill provides that the rate of taxation shall be fixed by the commissioners in order to meet the requirements of the budget of the District. The other bill provides for a fixed, rigid one dollar and a half rate, regardless of whether we may need more or less revenue than that will raise. I think that is dangerous, unwise, and unscientific. I think that is the chief reason for the existing inequality in assessments in the District of Columbia to-day. We have assessments of some kind of property at 25 cents on the dollar, others at 35, and at varying amounts up to 65 cents on the dollar. None of the assessments goes to the limit required by the law. It is natural and reasonable that you should expect just that situation. As long as you have your rate absolutely fixed, determined by statute, how in the world would it be possible for the commissioners to adjust the situation so as to get the required amount of revenue, no more and no less, unless they did lift this assessment up or down, according to the requirements of the budget. It seems to me manifestly the more sensible and wiser plan to fix the tax base correctly to start with and then, if you require more or less revenue, make your rate higher or lower accordingly.

Why upset all of the assessments in order to retain a fixed tax rate and meet exactly the requirements of the budget? Another provision in this bill is that which changes the triennial to an annual assessment, but both sides agree to that. That is common sense. Now, the only other thing this bill does not do that the bill as amended by the committee does is that we do not change the kinds or classification of property which are to be subject to taxation. We leave that exactly as it is. At the end of section 2 the only reference we make to personal property is—

> The tax rate hereafter levied upon tangible personal property now assessable shall be the same as that fixed by the said commissioners to be levied upon real estate as herein provided.

We neither add to the quantity of personal property assessed nor take away from it, so that you therefore have presented to you the question of assessment and not a question of taxation policy at all, which I think ought to be settled in another bill. You never will settle it until you settle it in that way. You will not only defeat the taxation rate you may have in mind, but you will defeat the much-desired object of getting a full-value assessment of real estate for the purpose of taxation. Now, we could debate from now until doomsday whether or not intangible property ought to be subject to taxation. I have my own opinion about that and the gentlemen of the majority have theirs, but certainly it has not anything to do with this bill which provided originally for a method of assessment.

Mr. MAPES. Will the gentleman yield?

Mr. CROSSER. Yes.

Mr. MAPES. Just for information. The gentleman did not complete the reading of the sentence he started to read. Does the substitute the gentleman proposes provide for a flexible rate as to personal property, or does it fix it at 1½ per cent?

Mr. CROSSER. The substitute provides for a flexible rate on personal property and real property alike. In other words, the commissioners shall levy such a rate as will be sufficient to raise revenue upon the tax base which is furnished them; and the real purpose and the only purpose of this bill, as I said when I was on my feet before, is to provide for a full-value assessment of real estate; and I will tell you that if you leave it as it is, the very people we have heard so much about—the poor people—will suffer a much greater injustice than they would if——

The CHAIRMAN. The time of the gentleman has expired.

Mr. CROSSER. I would like to ask unanimous consent that I may have five minutes more.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CROSSER. The small home owner's property is on the duplicate at about 60 cents on the dollar, whereas the large homes are on about 40 per cent, and if you leave that as it is at present that injustice will be continued indefinitely. Now, these gentlemen have indulged in a great deal of discussion here in regard to taxes paid in the cities, all for the purpose of showing that we ought to repeal the half-and-half plan. Why do not they come in and do that, if that is their purpose? Why do not they call up the bill which has been on the calendar for months and repeal the half-and-half, if that is their purpose? If they have the sentiment of the House with them, and it is sufficient to pass it, why do not they do it? No; they bring that proposition into a bill which has nothing more to do with the half-and-half plan than the man in the moon—not a bit. Why? Because it makes a fine vehicle; this is a popular idea—the full-value assessment. This would make a good machine to carry their proposition through, and thereby annul the half-and-half.

It will have the effect of repealing the half-and-half, as it would produce practically all the revenue necessary to run the District of Columbia. I think any fair-minded man who believes in legislating on one proposition at a time and not trying to carry some other thing through on it will see the advantage in adopting this substitute, and I give notice, Mr. Chairman, that if this substitute is adopted I shall move to strike out each section of the bill as it is read afterwards.

Mr. COOPER. Will the gentleman yield?

Mr. CROSSER. Yes.

Mr. COOPER. To see if I can state exactly the issue raised by the gentleman. The substitute proposes that there shall be a full-value assessment on real estate for taxation and that the present law as to personal property shall be left untouched so far as the substitute is concerned?

Mr. CROSSER. Yes.

Mr. COOPER. That is just as it is now——

Mr. CROSSER. Except we levy the same rate on that as the other.

Mr. COOPER. Precisely; and then the commissioners determine what the budget is, and having the full value of the real estate and the budget, that determines the rate?

Mr. CROSSER. That determines the rate of taxation.

Mr. COOPER. And the proponents, the friends of the substitute, the ones who introduced it, have opposed fixing an arbitrary rate by statute?

Mr. CROSSER. That is it.

Mr. COOPER. Because when you have the full valuation and the arbitrary rate, you may produce more or less than is necessary for the budget?

Mr. CROSSER. That is exactly the situation.

Mr. COOPER. Does the gentleman know of any city, or any place, anywhere, where they have a full valuation required by statute and then in the same statute arbitrarily fix the rate?

Mr. CROSSER. This is the only place in the United States where I have heard it proposed.

Mr. COOPER. I never heard of it, either, before.

Mr. CROSSER. There is not a place in the United States where they have a tax rate fixed by statute, so far as I know.

Mr. COOPER. They do not arbitrarily fix the rate and then have the full valuation fixed in the same statute?

Mr. CROSSER. Certainly not.

Mr. COOPER. At least, I never heard of it.

Mr. BORLAND. Is there any place in the United States where the outside community pays anything of the running expenses?

Mr. COOPER. That has nothing to do with this proposition.

Mr. BORLAND. Is not that vital?

Mr. COOPER. Not at all. I can not see the wisdom of requiring in a statute a full valuation of property and then arbitrarily fixing a rate, until you know what your budget is. The true way is to value your property and find out how much money you need, and then that of itself fixes the rate. I never heard of a tax proposition in any other way.

Mr. BORLAND. The gentleman, then, would be in favor of having full valuation, and then fixing the rate in the District to meet the budget, which would exclude the United States from any contribution?

Mr. COOPER. I am talking about one thing at a time. The gentleman wants to repeal the half-and-half proposition arbitrarily by the bill which has been reported by the majority here, and that, I understand, if carried out, would relieve the United States Government from paying any part of this tax. And it has seemed to me from the facts that have come to my knowledge, and from the study I have been able to give it, that the United States ought to do something from the Public Treasury in the way of paying the taxation.

Mr. BORLAND. Will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. CROSSER. Mr. Chairman, I want about a minute more.

Mr. BORLAND. I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BORLAND. Does the gentleman believe somebody in the District, the commissioners or somebody else, ought to be empowered with discretion to fix the rate of assessment and Congress pay what it does not fix?

Mr. COOPER. If they know what the budget is, and know the valuation, that of itself determines the rate, if they are going to raise the money. I do not care to argue it any further than that, but it seems to me if you want to bring up this question of repealing the half-and-half principle, to have that a distinct issue before the House, this other proposition is quite separate and distinct from that, and ought to be determined on its own merits aside from anything else.

Mr. CROSSER. I simply want to say in reply to the gentleman from Missouri here, if he is not satisfied to have the United States Government pay half of the expenses of running the District government there is a very simple and obvious way of correcting that, and that is by amending the statute which provides for the United States Government paying half of that expense, instead of coming here and attempting to regulate that through a tax measure. Do you not concede yourself that that is the more sensible way?

Mr. BORLAND. If the gentleman will yield to me, the only objection I have heard urged against the repeal of the half-and-half principle is that in repealing it we must otherwise raise the funds that we would lose by repealing it. This precedes, necessarily, a direct repeal.

Mr. CROSSER. It does not precede any such thing. This bill which we have offered here as a substitute, which I have offered in the absence of my friend Mr. GEORGE, as a substitute for the pending amendment, simply provides that whatever the District is required to pay the rate required to produce it shall be determined by the commissioners, whether the amount of the expense to be raised be all, only half, or some other part. I know that the bill provides that. Now, is not that a fair and equitable way of getting at it?

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Michigan?

Mr. CROSSER. Yes; I yield to the gentleman.

Mr. KELLEY of Michigan. I would like to ask whether, in connection with this whole matter, you thought of this: That where the rate is an arbitrary rate it will raise an arbitrary amount?

Mr. CROSSER. Absolutely.

Mr. KELLEY of Michigan. Now, what authority has the Government to levy a tax that will meet an arbitrary amount? The Government has authority to raise only a sufficient tax to pay the expenses of the Government, and not to raise an arbitrary amount.

Mr. CROSSER. That is right. That is why I say that this proposition of the majority is ridiculous.

Mr. KELLEY of Michigan. And it is in conflict with the fundamental principles of taxation?

Mr. CROSSER. Yes; I never saw anything so unscientific whether you are simply considering this from the standpoint of assessment for taxation or for taxation itself.

Mr. MAPES and Mr. BORLAND rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. CROSSER. I will yield to the gentleman from Michigan.

Mr. MAPES. So far as that unscientific part of it is concerned, the fixed rate is the rate that has been in vogue here for 36 years, has it not?

Mr. CROSSER. Yes; but it is unscientific nevertheless.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. CROSSER. Yes.

Mr. BORLAND. The gentleman and I are pretty well agreed on mattters here in the District.

Mr. CROSSER. Yes.

Mr. BORLAND. If the District paid its own taxation, all its expenses, this flexible rate might apply, but inasmuch as the District is not meeting all its expenses, then the rate should be apportioned differently?

Mr. CROSSER. The way to change the portion to be paid by the United States is to change the statute providing how much each party shall bear. It has no business here. I ask you why you put it here if it is not for the reason that you think this measure for full value of assessment is a good vehicle to carry along some questionable merchandise? If it is not so, why did you not call up the Crisp bill, which has been on the calendar here since the 17th of December and which provides specifically for the repeal of the half-and-half principle? I say take up one measure at a time and do not come here and jeopardize this bill by any such proposition as you make.

Mr. BORLAND. The Crisp bill does not provide for this.

Mr. CROSSER. This bill provides for it. The gentleman from Missouri evidently did not understand me.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. PROUTY rose.

Mr. BUCHANAN of Illinois. Mr. Chairman, I want to have an opportunity to talk for half a minute on another matter.

The CHAIRMAN. The Chair will ask the gentleman from Illinois whether he is a member of the District Committee?

Mr. BUCHANAN of Illinois. No.

The CHAIRMAN. The Chair will recognize, then, the gentleman from Iowa [Mr. PROUTY]. He is a member of the committee.

Mr. PROUTY. Mr. Chairman, the question has now reached its vital point, and I do not want the members of this committee to labor under any misapprehension or be deceived by any ambiguity. The question now before you is clear-cut. The amendment that has been offered is not the original bill. The gentleman from Ohio [Mr. CROSSER] stated that, but he did not mean to so state it.

Mr. CROSSER. Practically so.

Mr. PROUTY. It is practically not true. The original bill left the rate to be fixed upon real estate as a floating rate, while the rate to be fixed upon personal property was fixed by law.

Mr. CROSSER. The gentleman agrees that I stated the points of this bill correctly?

Mr. PROUTY. Yes; but not the contents of the original bill. I know that the gentleman wants to be accurate and correct.

Mr. CROSSER. I stated the terms of this bill correctly?

Mr. PROUTY. Yes; the gentleman stated the terms of this bill correctly. But the bill introduced by the gentleman from New York [Mr. George] left personal property at 15 mills and real estate to be fixed as would be found necessary. That appeared to me to be unfair, and I offered an amendment as it appears in the majority report.

Now, let us be real calm and look at this thing from the pure schoolmaster's standpoint. There are no figures that we need to quarrel about. The facts are all practically well known. If the bill that has been just now offered by the gentleman prevails, and it accomplishes just what is desired to be accomplished by it, you will have exactly the results that appear upon Mr. MANN's placard, as he called it, and these are figures taken from the report.

The District half of the budget is $6,143,401.74. I am splitting the difference between the Senate bill and the House bill. We collected last year from licenses and taxes on gross incomes $1,056,451.23. Under the minority bill the commissioners will have to levy a tax on personal property and real property enough to collect the balance of $5,086,950.51. Now, there is no dispute about those facts. There will be no quarrel about that. That will be the amount that the District Commissioners will have to levy and collect.

The valuation of real estate by the George report is $744,000,000.

During all my discussion I have taken these figures because they were prepared by the gentlemen who are advocating what is known as the George bill, and if they are not reliable upon their report upon that proposition it would naturally raise the suspicion that they might be mistaken on something else. But I will take a moment to show how that $744,000,000 was obtained. A committee was appointed and spent one year in investigating. I will tell you how they got at the principal facts. There are in the city of Washington what is known as guaranty title companies. Every transaction that is made in the District of Columbia passes through them, because they guarantee it; but in order to do that, they require that the man who buys the property shall pay the money to the company, and after they have taken out their per cent they turn it over to the man who has sold the property. They do that in order to protect themselves against an inflated guaranty. That is the way real estate passes in the District of Columbia.

Now, the District assessors had long tried to get hold of that information, because that would show bona fide, real cash transactions, but the guaranty title companies had always refused to give it. But when this committee got after them, using the strong power of the United States, and issuing a subpœna duces tecum, the guaranty companies consented to lay their books open for examination. Expert accountants were put upon those books and they examined transactions covering the last three years. They found actual bona fide cash transactions amounting to 46,000. If you will remember that there are only 70,000 families in Washington, you will see what a large per cent they got in actual bona fide cash transactions. Here was a row of houses. If they found sales of two of them, it was no trouble whatever to find out the value of the rest of them. That is not the only thing they did, but that is the principal thing. The report says that in order to make a conservative estimate they cut off $31,000,000. That is the way they reached these figures of $744,000,000, and it is the purpose of this bill to have the property so assessed that it will show $744,000,000.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PROUTY. I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PROUTY. The present assessment of personal property, as shown by the assessor's books, is just about $39,000,000. It is so near that that nobody will quibble about it. They will have $783,000,000 worth of property on which they will have to levy a rate of taxation enough to raise $5,086,952.50. If you will take those figures you will find it will take 6.5 mills on the dollar to produce that result. Now, to some members of the committee it seemed that that was a shocking situation; that Congress, by a deliberate act, with its eyes wide open, should come in here and pass a law that would require the payment of only 6.5 mills on property in the District of Columbia while all over the United States men who are contributing to the education of these children here, and so forth, are paying about 19 mills. What is the effect of this bill of ours as amended? It is simply to make the people of the District of Columbia pay 15 mills. I do not care who he is, there is not a man on either side of this House who will say that that is an unfair and unreasonable rate of taxation.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. PROUTY. With pleasure, if you do not take up too much time.

Mr. BUCHANAN of Illinois. I can not understand why the different cost of operation in Washington is due to the different measures. How does it come that one calls for 15 mills and the other for 6.5? Is it due to the fact that the expenses of the government are reduced?

Mr. PROUTY. In the first place, the question of the gentleman from Illinois is not quite accurate.

Mr. BUCHANAN of Illinois. That is what I understood the gentleman to say.

Mr. PROUTY. I said on the valuation of real estate it would only take 6.5 mills to produce the revenue required to make the budget to be raised on the part of the District.

Mr. OGLESBY. Then, why make it 15 mills if 6½ is enough?

Mr. PROUTY. Because I am in favor of making it enough so that my people—poor people, if you please—having less capital, having less goods, having less salary, before they are required to come down here and contribute to the expenses of the District of Columbia, the people of the District of Columbia shall pay somewhere near what my people are paying.

Mr. BUCHANAN of Illinois. The difference is that the bill you are in favor of changes it so that the District pays all of the taxes.

Mr. PROUTY. My bill does not do that.

Mr. CROSSER. That is the effect of it.

Mr. PROUTY. I will be frank with you. I am in favor of the District of Columbia paying 15 mills on the actual value, which is the least rate, if you will look over the chart, of any city of its size in the United States. If they do have to pay that, and I have exempted all the intangible personal property.

I have excluded all the inheritance tax, I have left out the special improvement tax, and only ask them to pay 15 mills on the dollars, which is the least rate that is paid in any city of the United States of its size.

Mr. BUCHANAN of Illinois. What is the amount of revenue that 15 mills would create?

Mr. OGLESBY. What is going to be done with the surplus?

Mr. PROUTY. Answering the gentleman from Illinois, it would raise about $14,000,000.

Mr. GORMAN. If you assess the personal property, tangible and not intangible, you will have more money than is needed to run the District, and what are you going to do with the surplus?

Mr. PROUTY. It rather amuses me to hear these fellows yelling for the half-and-half plan—the organic act of 1878—to hear them for the first time in 36 years criticizing the fact that the Government levies a rate. For 36 years every man that has spoken on this side of the House has voted for the straight flat rate—every one of them—and yet because we come in and want to make it really applicable they are shocked.

Mr. MADDEN. I understand the gentleman's idea is that if he levies the rate he proposes there will be no necessity for taking any money out of the National Treasury.

Mr. PROUTY. I am not trying to conceal it.

Mr. MADDEN. I did not say that the gentleman was trying to conceal it.

Mr. PROUTY. I said it the other day in as loud tones as I could command, and I say it again, that if the people were assessed as my people are, as your people are, it would not be necessary for my people or your people to send money down here to the District of Columbia to help educate these children, build sidewalks, and put down pavements.

Mr. GORMAN. The gentleman has not yet answered my question.

Mr. PROUTY. No; but I will answer it.

The CHAIRMAN. The time of the gentleman from Iowa has again expired.

Mr. GORMAN. I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the time of the gentleman from Iowa be extended five minutes. Is there objection?

There was no objection.

Mr. PROUTY. Here is the way the bill will work automatically. There is no concealment about it and nothing mysterious about it. The District appropriation bill which this House has passed provides—

That to the extent the revenues of the District of Columbia for the year 1915 shall exceed the proportional part of the appropriation made in this or any other act chargeable against such revenues, the same shall be covered into the Treasury of the United States to the credit of miscellaneous receipts.

The effect of that is simply that the District of Columbia will pay a fair rate, compared with the rest of the people in the United States. After they have paid that the rest of the burden will fall on the General Government.

Mr. OGLESBY. But under your plan you will raise more revenue than the District government needs, and what are you going to do with the surplus?

Mr. PROUTY. Pardon me, I have not raised anything.

Mr. BARTON. I would like to get the difference between this bill and the amendment so that I may know what property your bill assesses and what property the amendment assesses.

Mr. PROUTY. The amendment leaves out intangible property moneys and credits. But the effect is this: Under the law that has been enforced in this District for 36 years Congress fixes the rate. If you will examine the practice carefully and shrewdly, you will find that the District of Columbia fixes the amount of property so as to meet the amount that it is necessary to raise on a fixed tax rate.

Mr. BARTON. Does the law which we have now in force tax diamonds and jewelry?

Mr. PROUTY. The law requires it, but it has never been done. The law of 1902 repealed it and in 1909 reenacted it.

Mr. OGLESBY. Can the gentleman mention any city in the United States that fixes its rate with reference to the amount that some other city pays, or do they fix it according to the amount of revenue needed?

Mr. PROUTY. No; that can not be done and ought not to be done. Where a city raises its own money and expends it, that

is all right. It fixes both ends of it, and it has a right to; but so long as you make the Government of the United States responsible for a deficit, if there is one, then it becomes proper that the United States shall fix both ends of it—the amount of property and the rate—otherwise this District could easily mulct the United States in the whole thing.

Mr. CROSSER. Mr. Chairman, will the gentleman yield?

Mr. PROUTY. Yes.

Mr. CROSSER. What does the statute provide in regard to the amount to be contributed by the National Government and by the District government?

Mr. PROUTY. One-half by each.

Mr. CROSSER. What does the law say?

Mr. PROUTY. That is, until this bill was passed the other day by the House.

Mr. CROSSER. That has not passed as yet.

Mr. PROUTY. It passed the House.

Mr. CROSSER. But it is not going to pass in the Senate.

Mr. PROUTY. I do not know. Unfortunately I have little influence in the House and none over there.

Mr. CROSSER. The gentleman knows that the law at the present time requires that the United States Government shall contribute one-half?

Mr. PROUTY. Yes.

Mr. CROSSER. If we get such a great amount of revenue, what will be the duty of the United States? Will it not be to contribute this other amount?

Mr. PROUTY. No; because they have always absolutely the right to fix the budget.

Mr. CROSSER. But the statute would still remain unamended.

Mr. PROUTY. They have amended it in this bill.

Mr. CROSSER. It is not amended as yet.

Mr. PROUTY. If you concede that the Senate will never pass anything that the Houses passes, then, of course, there is no use of our doing anything.

Mr. CROSSER. We have as much right to insist upon that as to suppose that this bill will go through the Senate.

Mr. PROUTY. I never legislate in this House with reference to what the Senate will do. If I should concede for one moment that we should pass nothing in this House except what the Senate shall pass, then, without question, I would like to abolish the House of Representatives. I shall not hesitate a moment to insist upon anything that I think is right to the people of the United States at this end of the Capitol, simply because I am menaced with the threat that the Senate may not adopt it.

Mr. CROSSER. Then this amendment, which the gentleman's fond hope seems to indicate will go through the Senate, does not in terms repeal the half-and-half statute.

Mr. PROUTY. No.

Mr. CROSSER. Of course, it does not. It still provides they shall raise half. If the gentleman thinks half is too much, why does he not amend this law?

Mr. PROUTY. I may say this: If the gentleman does not know the effect of this bill——

Mr. CROSSER. Oh, I know the effect of it.

Mr. PROUTY. I am quite sure that the newspapers of the city of Washington know the effect of it. They have said a hundred times, and the gentleman must have read it, that this in effect repeals the half-and-half law.

Mr. CROSSER. The gentleman helped to report a bill that would do it directly.

Mr. PROUTY. I was not there.

Mr. CROSSER. That was a misfortune.

Mr. PROUTY. Yes.

Mr. CROSSER. Why do they not call that bill up and pass it?

Mr. PROUTY. The gentleman asked that question before. I have already told him that I am not the author of that bill, and that the author is away sick.

Mr. CROSSER. That is no reason, is it, why we should stop legislating—because a man has been away from here for a number of months. The gentleman from New York [Mr. GEORGE] is away from here sick now, and we are discussing his bill, and I expect that he will be gone for a number of months.

Mr. PROUTY. The gentleman was going to ask a question.

Mr. CROSSER. That is a question, but it consists of more than three words.

Mr. COADY. Mr. Chairman, will the gentleman yield?

Mr. PROUTY. No. Let me answer the gentleman from Ohio. That bill has been reported favorably to this House. That fact does not in the least interfere with this bill which has been reported to this House and is now up for consideration. I had the honor of presenting the amendment that has aroused this storm; I had the honor of proposing the amendment that has raised a committee of 100 in this town; I had the honor of introducing every amendment that has caused lobbyists to meet practically every Member of this House who would listen to them.

The CHAIRMAN. The time of the gentleman from Iowa has again expired.

Mr. CROSSER. Let me call attention of the gentleman to the fact that he has not answered my question yet.

Mr. PROUTY. Mr. Chairman, may I ask unanimous consent to proceed for five minutes?

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for five minutes. Is there objection?

Mr. GARNER. Mr. Chairman, reserving the right to object, this bill has been under discussion for two days. It is now 20 minutes of 6 o'clock, and I think we ought to have some information whether it is intended to conduct this bill to a vote to-night.

Mr. IGOE. Mr. Chairman, reserving the right to object, I would like to say to the gentleman from Texas that I expect to have a few minutes to-night; the gentleman from Iowa has already had about four hours.

Mr. GARNER. I am not objecting to the extension of time.

Mr. PROUTY. Well, I hardly think we can get a vote to-night, but I do not know——

Mr. JOHNSON of Kentucky. I do not know.

Mr. GARNER. Let us have some understanding about it.

Mr. JOHNSON of Kentucky. Nobody can tell how many gentlemen are going to rise to debate under the five-minute rule. I have no idea how many are going to speak.

Mr. STAFFORD. Mr. Chairman, reserving the right to object, I would like to have the attention of the chairman for a moment. Does not the gentleman think, in view of the fact we will not be able to come to a decision on this proposition to-night, that it would be advisable to let it go over and have this discussion on the next District day, so that a larger membership of the House will be able to appreciate the arguments being advanced by the proponents of the amendment?

Mr. JOHNSON of Kentucky. I have said to those gentlemen inquiring of me it was my purpose to move that the committee rise about 6 o'clock.

Mr. STAFFORD. I so understand, and that is the purpose of the inquiry.

The CHAIRMAN. Is there objection?

Mr. COOPER. Mr. Chairman, reserving the right to object, what is the request?

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. COADY. Will the gentleman yield to me for a question?

Mr. PROUTY. Well, I had wanted to say a few words on my own account, if I could.

Mr. COADY. I just wanted to make a correction. A few moments ago the gentleman from Illinois [Mr. MANN] questioned the accuracy of this comparative statement about Alexandria and Washington, and, as I recall, the gentleman was very vehement in declaring this was accurate. I want to call attention to one inaccuracy just now; that is, tangible personal property and intangible personal property in Alexandria is taxed at 18 mills. That is true, but I will call the attention of the gentleman to the fact that so far as bank deposits are concerned they are only taxed 2 mills——

Mr. PROUTY. Pardon me, I have not put that in, as the gentleman will notice. I have before me in my budget the law in reference to Alexandria, and I will go on record that it provides that all kinds of personal property shall be assessed at 18 mills on the dollar——

Mr. COADY. And I also have——

Mr. PROUTY (continuing). Which was furnished me by the mayor of Alexandria. I have the law in my possession.

Mr. SUTHERLAND. Will the gentleman yield for a question?

Mr. PROUTY. Yes; I yield.

Mr. SUTHERLAND. If $5,086,000 is all the money needed to be raised, what would you do with the rest of the revenue that would be raised by the 15 mills assessment?

Mr. PROUTY. Well, of course it is my opinion, to be perfectly frank with this committee, that while there is $744,000,000 worth of real estate here that ought to be assessed, I am well satisfied in my mind that the assessing forces here under the influences that are at work would never assess it that high. Now, that is a perfectly candid statement from me. That does not change the fact the property ought to be assessed at 15 mills

at least before we have any right to call upon the rest of the people of the United States to contribute to Washington's welfare.

We forget the prime equity all the time. If the District of Columbia needs the assistance of the other people of the United States, they will give it, and I am one who will. I am not at all penurious about that. But before they call on the rest of the people of the United States who are poorer than they are to pay for their education and for their works of improvement, they ought at least to pay as much as those from whom they ask alms. That is all there is to it.

Mr. SMITH of Minnesota. Will the gentleman yield to a question?

Mr. PROUTY. With pleasure.

Mr. SMITH of Minnesota. I notice you have Minneapolis paying 17.9 mills. I would like to know what valuation the property is assessed at in Minneapolis—whether it is full value or not?

Mr. PROUTY. My recollection is, just offhand, that Minneapolis is assessed at full 100 per cent value.

Mr. SMITH of Minnesota. City, county, and State taxes, or just——

Mr. PROUTY. County and State.

Mr. SMITH of Minnesota. City, county, and State?

Mr. PROUTY. Yes, sir; all the taxes they pay upon their property.

Mr. SMITH of Minnesota. The valuation is 50 per cent, the basis that you use——

Mr. PROUTY. You will probably find, although I have not the figures here—I have left them here for a week for somebody to trip me up on it, and I have not had any occasion to correct them——

Mr. SMITH of Minnesota. I am not trying to trip you. I think our tax is about 32 mills on the dollar.

Mr. PROUTY. That corresponds, then. That makes .16 mills on the full value.

Mr. SMITH of Minnesota. Yes.

Mr. PROUTY. That is as I remember it. This is 17.9. It is not very far out of the way.

Mr. SMITH of Minnesota. You stated that that includes the city and the State tax?

Mr. PROUTY. Yes.

Mr. SMITH of Minnesota. And, of course, in the District of Columbia they have no county or State tax, but they have some of the burdens that are borne by the county and the State?

Mr. PROUTY. Some of them. But we have none of the legislative expenses, for instance, like the salaries of legislators, governors, and so forth.

Mr. SMITH of Minnesota. The overhead charges are not so great?

Mr. PROUTY. We have not the overhead charges here that we have in other cities of the United States.

Mr. JOHNSON of Kentucky. Mr. Chairman——

Mr. PROUTY. Just one minute, and I will finish. I want this House and this committee to know exactly what you are doing. If you do it, you will hear no complaint from me. If you vote for this amendment which has been offered here by the gentleman from Ohio [Mr. CROSSER], you will find, if his bill works, and I admit it will, that the District Commissioners, when they meet, will make a levy of 6.5 mills. If they levy any more than that, they will have a surplus. I want to know if you wish to go home and face your people who are paying 19 mills on the dollar and say to them, "I voted for a rate here in the most beautiful city in the world of 6.5 mills"?

Mr. SMITH of Minnesota. Suppose this bill—the minority proposition—is adopted, and subsequently Congress decides that the District shall pay more than half of the expenses, or all the expenses, can not that sum be raised under this minority bill?

Mr. PROUTY. Yes; if you had a commission to do it.

Mr. SMITH of Minnesota. They would have to do it, would they not, if they wanted the money to pay the expenses?

Mr. PROUTY. I admit that they can do it.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ADAIR, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes, and had come to no resolution thereon.

UNANIMOUS CONSENT CALENDAR.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the bill H. R. 117 be placed upon the Unanimous Consent Calendar, at the foot thereof. It was objected to twice, and the gentleman who objected says he has no objection now; and, if there is no objection, I would like to have it go back, so that it can be considered.

The SPEAKER. Has it been taken off twice or only once?

Mr. RAKER. Twice. If there is no objection, can it not go on?

The SPEAKER. You can do anything on earth by unanimous consent.

The gentleman from California [Mr. RAKER] asks unanimous consent that the bill H. R. 117, which has been taken from the calendar twice under the rule, shall be restored to the Unanimous Consent Calendar, to go to the foot of the said calendar.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, personally I think it would be very bad practice to change the rules of the House, which are so very positive as to the Unanimous Consent Calendar, by giving Members opportunity at a late hour to ask unanimous consent to have some bill that has been objected to reinstated on that calendar, and I feel constrained to object.

Mr. RAKER. Before the gentleman objects, will he withhold until I can make this little statement?

Mr. STAFFORD. Yes; I will withhold for a statement.

Mr. RAKER. The bill has an amendment in it. I could reintroduce the bill with the amendment and get it back on the calendar again. The report has been made. There will be no objection when it is brought up on the calendar again.

Mr. STAFFORD. I have no objection to the bill, but I think it would be a very bad practice to do what is desired. It would be better to reintroduce the bill again and have it reported.

The SPEAKER. Is there objection?

Mr. STAFFORD. I object.

The SPEAKER. The gentleman from Wisconsin [Mr. STAFFORD] objects.

ADJOURNMENT.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 51 minutes p. m.) the House adjourned until to-morrow, Tuesday, April 28, 1914, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. FLOOD of Virginia, from the Committee on Foreign Affairs, to which was referred the bill (H. R. 15505) authorizing the appointment of an ambassador to the Republic of Chile, reported the same without amendment, accompanied by a report (No. 583), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 57) making an appropriation to M. C. Burke for tax liens held by him on property acquired by the United States, reported the same without amendment, accompanied by a report (No. 582), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. EDWARDS: A bill (H. R. 16052) to authorize the Secretary of War to donate two condemned brass or bronze cannon and cannon balls to the city of Statesboro, in the State of Georgia; to the Committee on Military Affairs.

By Mr. ADAMSON: A bill (H. R. 16053) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910; to the Committee on Interstate and Foreign Commerce.

By Mr. McKELLAR: A bill (H. R. 16054) to authorize the President in making appointments in the Volunteer forces of the United States to prefer officers on the active list holding medals of honor for distinguished service; to the Committee on Military Affairs.

By Mr. KAHN: A bill (H. R. 16055) to amend section 4474 of the Revised Statutes of the United States; to the Committee on the Merchant Marine and Fisheries.

By Mr. TAYLOR of Colorado: A bill (H. R. 16056) to increase the limit of cost of the United States post-office building at Grand Junction, Colo.; to the Committee on Public Buildings and Grounds.

By Mr. HAMLIN: A bill (H. R. 16057) to provide for the erection of a public building at Sedalia, Mo.; to the Committee on Public Buildings and Grounds.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 16058) for the relief of Cornelia E. Laws; to the Committee on Claims.

By Mr. BELL of Georgia: A bill (H. R. 16059) granting a pension to Robert Shope; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16060) granting an increase of pension to Elizabeth McMinn; to the Committee on Pensions.

By Mr. BORLAND: A bill (H. R. 16061) granting an increase of pension to Jerome Dano; to the Committee on Invalid Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 16062) granting a pension to Goldie Woods; to the Committee on Pensions.

By Mr. BURNETT: A bill (H. R. 16063) granting an increase of pension to Anna C. Moore; to the Committee on Invalid Pensions.

By Mr. DOREMUS: A bill (H. R. 16064) granting an increase of pension to Mary Haas; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16065) for the relief of Julia Klavinski; to the Committee on Claims.

By Mr. FRANCIS: A bill (H. R. 16066) granting a pension to Abner D. Moore; to the Committee on Pensions.

Also, a bill (H. R. 16067) granting an increase of pension to Amanda W. Clancy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16068) granting an increase of pension to Thomas Cochran; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16069) granting an increase of pension to William Graham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16070) granting an increase of pension to Robert Henry; to the Committee on Invalid Pensions.

By Mr. GILMORE: A bill (H. R. 16071) granting a pension to Walter F. Carman; to the Committee on Pensions.

Also, a bill (H. R. 16072) for the relief of Edward H. Wheeler; to the Committee on Military Affairs.

By Mr. HAMLIN: A bill (H. R. 16073) granting a pension to Napoleon B. Goodknight; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16074) granting a pension to Claus Henning; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16075) granting an increase of pension to Charles Van Buren; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Iowa: A bill (H. R. 16076) granting an increase of pension to John Newhouse; to the Committee on Invalid Pensions.

By Mr. KEY of Ohio: A bill (H. R. 16077) granting an increase of pension to Charlotte Diller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16078) granting an increase of pension to Jacob C. Utz; to the Committee on Invalid Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 16079) granting a pension to Squire F. Brown; to the Committee on Invalid Pensions.

By Mr. NEELY of West Virginia: A bill (H. R. 16080) granting an increase of pension to Joseph Pettit; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16081) granting an increase of pension to Woodman S. Sample; to the Committee on Invalid Pensions.

By Mr. J. I. NOLAN: A bill (H. R. 16082) for the relief of Mary Curtin, widow of Michael Curtin; to the Committee on Military Affairs.

By Mr. SELLS: A bill (H. R. 16083) granting an increase of pension to Mollie A. Crosswhite; to the Committee on Pensions.

Also, a bill (H. R. 16084) granting a pension to Hiram C. Jett; to the Committee on Pensions.

By Mr. SUTHERLAND: A bill (H. R. 16085) granting an increase of pension to George Thomas; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Arkansas: A bill (H. R. 16086) granting a pension to Jennie Parker; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of sundry citizens of Iowa, Minnesota, Indiana, and New York, against polygamy in the United States; to the Committee on the Judiciary.

By Mr. ANSBERRY: Petition of the International Association of Machinists, relative to building battleships in Government navy yards; to the Committee on Naval Affairs.

Also, petition of the federal council of the Churches of Christ in America, relative to Mexican situation; to the Committee on Foreign Affairs.

By Mr. CARR: Petitions of 188 citizens of Pine Bank, 561 citizens of Carmichaels, 2,256 citizens of Uniontown, and 758 citizens of Rockwood, all in the State of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CARY: Petition of the Merchants and Manufacturers' Association, relative to selection of regional reserve bank at Minneapolis; to the Committee on Banking and Currency.

Also, petition of the Northwestern Lithography Co., of Milwaukee, Wis., protesting against the Hobson-Works-Sheppard resolutions relative to national prohibition; to the Committee on the Judiciary.

Also, petition of M. V. Price and other citizens of Milwaukee, Wis., against national prohibition; to the Committee on the Judiciary.

Also, petition of I. C. Schmidt, John Druse, and A. J. Rechlicz, all of Milwaukee, Wis., against passage of House bill 11321; to the Committee on Patents.

By Mr. CLINE: Petition of 500 citizens of the twelfth Indiana district, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petition of 77 citizens of the fourth New York congressional district, against national prohibition; to the Committee on the Judiciary

Also, petition of the Association of Master Plumbers of New York City, favoring passage of House bill 14288, relative to estimating on Government work; to the Committee on Public Buildings and Grounds.

Also, petition of K. Schulz, of Jamaica, N. Y., favoring passage of the Bartlett-Bacon bill (H. R. 1873); to the Committee on the Judiciary.

Also, petition of the National Board of Workmen's Sick and Death Benefit Fund of United States of America, relative to mining troubles in Colorado; to the Committee on the Judiciary.

By Mr. DAVENPORT: Petition of the First Baptist Church of Maramec, Okla., favoring national prohibition; to the Committee on the Judiciary.

By Mr. DOOLITTLE: Petition of sundry citizens of the State of Kansas, favoring bill to create a bureau of farm loans (H. R. 11755); to the Committee on Banking and Currency.

Also, petition of sundry citizens of Emporia, Kans., protesting against passage of Sunday observance bill; to the Committee on the District of Columbia.

Also, petitions of sundry citizens of Emporia, Kans., favoring passage of House bill 12928, retaining section 6; to the Committee on the Post Office and Post Roads.

By Mr. ESCH: Memorial of the Merchants and Manufacturers' Association of Milwaukee, Wis., protesting against reserve-bank districting; to the Committee on Banking and Currency.

Also, petition of the national executive board of the Workmen's Sick and Death Benefit Fund of the United States of America, asking Federal intervention in mining trouble in Colorado; to the Committee on the Judiciary.

Also, petition of the Wisconsin State Court of the Guardians of Liberty, favoring literacy test in immigration bill; to the Committee on Immigration and Naturalization.

By Mr. FERGUSSON: Petition of E. M. Brockman, R. W. Magill, and 50 other citizens of Mills, Mora, and Roy, all in the State of New Mexico, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Law and Order League of Las Vegas, N. Mex., signed by its presiding officer, John Lee Imhof, and its secretary, R. B. Schoonmaker, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of L. L. Klienfelter, I. H. Hall, and 68 other citizens of Obar, N. Mex., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 33 citizens of La Plata precinct, of San Juan County, N. Mex., favoring national prohibition; to the Committee on the Judiciary.

By Mr. FLOOD of Virginia: Petitions of 115 citizens of Appomattox, Va., and various voting citizens of Riverhead district, Va., favoring national prohibition; to the Committee on the Judiciary.

By Mr. FRANCIS: Petition of 194 citizens of Tacoma, 500 citizens of Steubenville, and the Woman's Christian Temperance Union of Short Creek, all in the State of Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. GILMORE: Memorial of the City Council of Cambridge, Mass., favoring passage of the Hamill bill, for retirement of aged civil-service employees; to the Committee on Reform in the Civil Service.

By Mr. GOOD: Petition of sundry citizens of the fifth congressional district of Iowa, against national prohibition; to the Committee on the Judiciary.

By Mr. GOULDEN: Petition of 1,000 citizens of the twenty-third congressional district of New York, against national prohibition; to the Committee on the Judiciary.

By Mr. GREEN of Iowa: Petitions of 24 citizens of Glenwood, 29 citizens of Emerson, 40 citizens of Emerson, 138 citizens of Malvern, 175 citizens of Malvern, 200 citizens of Malvern, 50 citizens of Hastings, 88 citizens of Malvern, and 82 citizens of Glenwood, all in the State of Iowa, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of various members of the Musket Home Guard of the Mosquito Valley, Iowa, favoring pensions for home guard for services rendered in Civil War; to the Committee on Invalid Pensions.

Also, petition of sundry citizens of the ninth congressional district of Iowa, against national prohibition; to the Committee on the Judiciary.

Also, petitions of 40 citizens of Henderson, Iowa, and 13 citizens of Malvern, Iowa, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HAMILTON of Michigan: Petitions of 448 citizens of the fourth congressional district of Michigan, opposing the adoption of national constitutional prohibition amendment; to the Committee on the Judiciary.

By Mr. HAMLIN: Petition of N. L. Murray and 19 other citizens of Walnut Grove, Mo., favoring national prohibition; to the Committee on the Judiciary.

By Mr. HAYES: Petition of sundry citizens of California, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of California, against national prohibition; to the Committee on the Judiciary.

Also, petition of the Juvenile Protective Association of Los Angeles, Cal., and the faculty of the California State Normal School, favoring appropriation for children's bureau; to the Committee on Appropriations.

Also, petition of sundry citizens of Victor Valley, Cal., favoring appropriation for the Mojave River; to the Committee on Rivers and Harbors.

Also, petition of the Riverside (Cal.) Chamber of Commerce, favoring House bill 12292, relative to child-labor legislation; to the Committee on Labor.

Also, petition of the board of directors of the Chamber of Mines and Oil, of Los Angeles, Cal., relative to restoration of mineral lands to entry under United States mining laws; to the Committee on Mines and Mining.

Also, petition of the San Francisco Labor Council, favoring House bill 1933, regulating interstate commerce in convict-made goods; to the Committee on Labor.

By Mr. HOWELL: Petitions of the Mine & Smelter Supply Co., the Boyle Furniture Co., the Blackman & Griffin Co., the Utah Implement Vehicle Co., the Inland Crystal Salt Co., the Zion's Cooperative Merchandize Co., and the Salt Lake Hardware Co., all of Utah, indorsing House bill 14328, to prohibit the transmission through the mails of false statements in writing for the procuring of credit; to the Committee on the Post Office and Post Roads.

Also, petition of 16 citizens of Uinta County, Utah, favoring law creating national farm-land banks; to the Committee on Banking and Currency.

Also, petition of Salt Lake (Utah) Typographical Union, No. 115, against increasing rates on second-class mail matter; to the Committee on the Post Office and Post Roads.

By Mr. IGOE: Petitions of George P. Jones & Co., the Blackwell-Wilandy Book & Stationery Co., the Desmonds National Detective Agency, the St. Louis Screw Co., W. H. Markham & Co., the Democratic City Central Committee, the Mermod, Jaccard & King Jewelry Co., and W. L. Hempelmann, all of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Butler Manufacturing Co., of Kansas City, Mo., favoring passage of House bill 14328; to the Committee on the Post Office and Rost Roads.

Also, petition of George O. Carpenter, of St. Louis, Mo., favoring submitting prohibition amendment to the States; to the Committee on the Judiciary.

Also, petition of St. Louis (Mo.) Electrotypers' Union, No. 30, National Stereotypers and Electrotypers' Union, favoring passage of the Bartlett-Bacon bill (H. R. 18731); to the Committee on the Judiciary.

Also, petition of the Alumni Association of the Missouri School for the Deaf, favoring passage of House bill 15217; to the Committee on Labor.

By Mr. JOHNSON of Washington: Petition of sundry citizens of Montesano, Wash., opposing the passage of the Sabbath observance bill (H. R. 7826); to the Committee on the District of Columbia.

Also, petition of sundry citizens of Shelton, Wash., opposing the passage of the Sabbath observance bill (H. R. 9674); to the Committee on the District of Columbia.

Also, petition of sundry citizens of Battle Ground, Wash., favoring the passage of a bill to amend postal and civil-service laws (H. R. 12928); to the Committee on the Post Office and Post Roads.

Also, memorial of the United Mine Workers of Carbonado, Wash., asking that Federal troops be sent to strike district in Colorado; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Cowlitz County, Wash., and Montesano, Wash., favoring passage of bill to amend postal law (H. R. 12928); to the Committee on the Post Office and Post Roads.

By Mr. KALANIANAOLE: Petition of 55 citizens of Honolulu, favoring national prohibition; to the Committee on the Judiciary.

By Mr. KEISTER: Petitions of the Methodist Episcopal Churches of Renfrew and Conoquenessing, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KELLEY of Michigan: Petition of 4,828 citizens of Michigan, opposing the national prohibition amendments to the Constitution proposed in House joint resolution 168 and Senate joint resolutions 88 and 50; to the Committee on the Judiciary.

Also, petition of Loyd Ligon and 44 other citizens of Flint, Mich., protesting against section 6 of House bill 12928, relative to Sunday work in post offices; to the Committee on the Post Office and Post Roads.

By Mr. KETTNER: Memorial of the State Reclamation Board, of Sacramento, Cal., protesting against passage of the

Newlands inland waterways commission bill; to the Committee on Rivers and Harbors.

By Mr. KIESS of Pennsylvania: Petition of the Men's Personal Workers League, of Jersey Shore, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of the fifteenth congressional district of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

By Mr. KINDEL: Petition of sundry citizens of Colorado, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Denver, Colo., favoring House bill 12928, relative to Sunday hours for postal employees; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of Denver, Colo., against Sabbath-observance bill; to the Committee on the District of Columbia.

By Mr. LANGHAM: Petition of various churches of Indiana and of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

By Mr. LEVY: Petition of 257 citizens of the fourteenth congressional district of New York, against national prohibition; to the Committee on the Judiciary.

Also, petition of Camp No. 171, United Confederate Veterans, disclaiming authority for an appeal recently made by one of their number for subscriptions to defray expenses of veterans to the reunion at Jacksonville, Fla.; to the Committee on Military Affairs.

By Mr. LINDQUIST: Petitions of sundry citizens of the State of Michigan, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. McKENZIE: Petitions of sundry citizens of Apple River, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MAGUIRE of Nebraska: Petitions of various members of the Deaconess Daughters' Class of the St. Paul's Methodist Episcopal Sunday School, of Lincoln, Nebr., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MAPES: Petition of sundry citizens of Kent and Ottawa Counties, Mich., against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Conklin, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MARTIN: Petitions of sundry citizens of Camp Crook, S. Dak., favoring passage of House bill 12928, retaining section 6, relative to Sunday work in post offices; to the Committee on the Post Office and Post Roads.

Also, petitions of sundry citizens of Camp Crook, S. Dak., protesting against passage of the Sunday-observance bill; to the Committee on the District of Columbia.

By Mr. MERRITT: Petitions of 245 citizens of Plattsburg, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Ogdensburg, N. Y., favoring passage of House bill 12928, retaining section 6; to the Committee on the Post Office and Post Roads.

Also, petitions of sundry citizens of Ogdensburg, N. Y., protesting against passage of Sunday-observance bill; to the Committee on the District of Columbia.

By Mr. METZ: Petition of sundry citizens of the tenth congressional district of New York, against national prohibition; to the Committee on the Judiciary.

By Mr. MURRAY of Oklahoma: Petition of the Presbytery of Oklahoma and sundry citizens of Pryor and Verden, Okla., favoring national prohibition; to the Committee on the Judiciary.

By Mr. NEELY of West Virginia: Petition of sundry citizens of Cameron and Glen Falls, W. Va., favoring national prohibition; to the Committee on the Judiciary.

By Mr. O'LEARY: Petition of sundry citizens of the second congressional district of New York, against national prohibition; to the Committee on the Judiciary.

Also, petition of the Property Owners and Business Men's Association of Metropolitan New York, favoring Hamill retirement bill; to the Committee on Reform in the Civil Service.

Also, petition of sundry citizens of New York, against national prohibition; to the Committee on the Judiciary.

Also, petition of the United Societies for Local Self-Government of Chicago, Ill., against national prohibition; to the Committee on the Judiciary.

By Mr. O'SHAUNESSY: Petition of J. G. Gabrielsen and other citizens of Providence; 21 citizens of Portsmouth; 23 citizens of Jamestown; and Francis H. Spear, of Warren, all in the State of Rhode Island, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of District No. 44, International Association of Machinists, of Washington, D. C., favoring building of one battleship in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the Belcher & Loomis Hardware Co., of Providence, R. I., and the Providence (R. I.) Retail Druggists' Association, favoring House bill 13305, to prevent discrimination in prices; to the Committee on Interstate and Foreign Commerce.

By Mr. SCULLY: Petitions of sundry citizens of Lakewood and Asbury Park, N. J., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the national executive board of the Workmen's Sick and Death Benefit Fund of the United States of America relative to strike conditions in Colorado; to the Committee on Rules.

Also, petition of the board of directors of the First National Bank of Perth Amboy, N. J., relative to selection of Federal reserve banks; to the Committee on Banking and Currency.

Also, petition of the International Photo-Engravers' Union of North America, favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

By Mr. J. M. C. SMITH: Papers to accompany a bill (H. R. 14149) granting an increase of pension to Daniel F. Vickery; to the Committee on Invalid Pensions.

By Mr. STEPHENS of California: Petitions of the Victor Valley Mutual Water and Power Distributing Association and the Victor Valley and Riverside Chambers of Commerce, relative to irrigation of semiarid lands along the Los Angeles and Salt Lake Railroads; to the Committee on the Public Lands.

Also, petition of the Parent Teacher Association of the Loretto Street School, of Los Angeles, Cal., and the Riverside Chamber of Commerce, of Riverside, Cal., favoring passage of the child-labor bill; to the Committee on Labor.

By Mr. SUTHERLAND: Papers to accompany a bill (H. R. 16085) granting an increase of pension to George Thomas; to the Committee on Invalid Pensions.

By Mr. THOMSON of Illinois: Petition of 1,346 citizens of Chicago, Ill., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 1,061 citizens of Lake County, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. TUTTLE: Petition of the German Branch of the Socialist Party of Dover, N. J., relative to strike conditions in Colorado; to the Committee on Rules.

By Mr. WALTERS: Petitions of sundry citizens of the State of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of various voting citizens of Johnstown, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. WHITE: Petition of sundry citizens of Ohio, against national prohibition; to the Committee on the Judiciary.

Also, petitions of Rev. Ashwood and 25 others, of Cambridge; William Duez, of Cambridge, and 700 others, all of the State of Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. WILSON of New York: Petition of 120 citizens of the third congressional district of New York, against national prohibition; to the Committee on the Judiciary.

SENATE.

TUESDAY, *April 28, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, our sense of need compels us to prayer. It is not for need of power or of material resources, which Thou hast given to us with such great abundance, but, lest we come short of Thy glory, our need of divine help to meet the higher obligations of life. Throughout all the providences of God with us as individuals and as a Nation there runs the golden thread of a divine purpose. We need to know what God's purpose is. We come to Thee lifting our hearts that we may receive that wisdom which cometh from above that will enable us to meet the mighty responsibilities of the day. Thou hast taught us to overcome evil with good. Oh, give us hearts to understand the divine program and courage to commit ourselves and our Nation to God's great plan for us. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had

signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

H. R. 122. An act authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes;

H. R. 5487. An act to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis.;

H. R. 11269. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. J. Res. 204. Joint resolution authorizing the Secretary of Agriculture to make exhibits at forest products expositions to be held in Chicago, Ill., and New York, N. Y.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a telegram in the nature of a petition of Local Division No. 482, Brotherhood of Locomotive Firemen and Enginemen, of White Fish, Mont., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. McLEAN. I have here a petition signed by several American societies in favor of an appropriation for the enforcement of the Federal law for the protection of migratory birds. The petition contains but four sentences, and I ask permission to have it read at the desk, with the accompanying signatures.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

NATIONAL ASSOCIATION OF AUDUBON SOCIETIES,
1974 Broadway, New York City, April 27, 1914.

To Hon. GEORGE P. MCLEAN,
United States Senate, Washington, D. C.

SIR: The undersigned authorized representatives of National and State associations for the protection of wild life request you to present to the Senate of the United States the following petition in behalf of the many thousand members of those associations and affiliated societies, representing practically every State in the Union:

"To the honorable Senate of the United States in Congress assembled:

"The undersigned citizens of the United States, being authorized and accredited representatives of National and State organizations for the preservation of birds, game, and wild life, hereby represent that their enormous combined membership is a unit in favor of the enforcement of the Federal law for the protection of migratory birds. We believe that the great majority of the people of the United States are in favor of Federal protection of such birds. We represent most respectfully that such a law can not be made fully effective until its enforcement is provided for, and we believe it is imperative that at least $100,000 be included in the Agricultural appropriation bill for the purpose of enforcing this law. This will give but two Federal game protectors to each State. We believe that it is essential to have at least this number to cooperate with the State authorities to secure the proper enforcement of this statute, and we urge that the honorable Senate appropriate this sum, which was originally recommended in the estimates of the Department of Agriculture."

Boone and Crockett Club, George Bird Grinnell, Vice President, Camp Fire Club of America, Marshall McLean, Chairman Conservation Committee. New York Zoological Society, Madison Grant, Chairman; William T. Hornaday, Director Zoological Park. American Game Protective and Propagation Association, William S. Haskell, First Vice President. National Association of Audubon Societies, Frederick A. Lucas, Acting President; T. Gilbert Pearson, Secretary.

Mr. THOMPSON presented a petition of sundry citizens of Valley Falls, Kans., praying for the adoption of a system of rural credits, which was referred to the Committee on Banking and Currency.

He also presented a petition of James R. Fulton Post, No. 257, Grand Army of the Republic, Department of Kansas, of Garden City, Kans., praying for the enactment of legislation granting a minimum pension of $30 per month to persons honorably discharged who served 90 days or more in the Civil War, which was referred to the Committee on Pensions.

Mr. OLIVER presented memorials of sundry citizens of Pennsylvania, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. SHEPPARD. I send to the desk a telegram from the president of the Woman's Missionary Council of the Methodist Episcopal Church South, in the nature of a petition. I ask that it may be read.

There being no objection, the telegram was read, as follows:

FORT WORTH, TEX., *April 16, 1914.*

Hon. MORRIS SHEPPARD, *Washington, D. C.:*

In behalf of the Woman's Missionary Council of the Methodist Episcopal Church South, now in annual session in Fort Worth, Tex., representing a great host of women actively engaged in many forms of philanthropic and religious activity, we do hereby petition the Senate to pass the Smith-Hughes bill to establish a Federal censorship of motion pictures in interstate commerce and in the Territories and wherever else the jurisdiction of Congress extends. In view of our large constituency, we request that this petition and resolution be printed in full in the CONGRESSIONAL RECORD.

Miss BELL H. BENNETT, *President.*
Mrs. FRANK SILER, *Recording Secretary.*

Mr. SHEPPARD. I send to the desk a telegram from the Lutcher & Moore Lumber Co., of Orange, Tex., which I ask to have read.

There being no objection, the telegram was read, as follows:

ORANGE, TEX., *April 27, 1914.*

Hon. MORRIS SHEPPARD,
United States Senate, Washington, D. C.:

In yesterday's press we notice Pacific coast lumbermen are protesting against the repeal of free tolls through canal. If competitive shipping is to be a factor in the toll fight, would it not be advisable to hear from the Gulf? West coast of South America is as attractive to us as the Atlantic coast line is to Pacific coast lines; yet we believe President Wilson's attitude correct, and protest against Pacific coast interest befogging the issue.

THE LUTCHER & MOORE LUMBER CO.

Mr. SHEPPARD presented a memorial of sundry citizens of Naples, Tex., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Naples, Tex., praying for the enactment of legislation providing for compensatory time for Sunday services of employees of the Post Office Department, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the congregation of the Twenty-third Avenue Baptist Church, of Oakland, Cal., and a petition of sundry citizens of Oakland, Cal., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented the memorial of John Harris, of Choice, Tex., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the Trades Council of Austin, Tex., praying for the enactment of legislation to increase the salaries of compositors and bookbinders and bookbinder machine operators in the Government Printing Office, which was referred to the Committee on Printing.

Mr. MARTINE of New Jersey. I present a petition signed by a number of citizens of Pemberton, N. J., which I ask may be printed in the RECORD and referred to the Committee on the Judiciary.

There being no objection, the petition was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

We, the undersigned, earnestly petition for the passage by the United States Congress of the joint resolution introduced in the House of Representatives December 10, 1913, by Congressman RICHMOND P. HOBSON and on the same day introduced in the Senate by Senator MORRIS SHEPPARD, providing for the prohibition of the sale, manufacture for sale, transportation for sale, importation for sale, and exportation for sale of intoxicating liquors for beverage purposes in the United States and all territory subject to the jurisdiction thereof.

Rev. A. B. CARLIN
(And others).

PEMBERTON, N. J.

Mr. LODGE. I send to the desk a resolution adopted by the survivors of the Old Sixth Massachusetts Regiment. It is brief, and I ask that it may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

MEMORIAL HALL,
Lowell, Mass., April 20, 1914.

The survivors of the Old Sixth Regiment, assembled on the fifty-third anniversary of the march of the regiment through Baltimore, April 19, 1861, hereby pledge our continued loyalty and support to the Government and offer our services for any duty we are able to perform.

Resolved, That a copy of the offer be sent to the President of the United States and to our Congressmen from Massachusetts.

EDWIN F. SPOFFORD,
Secretary Old Sixth Regiment Infantry Association.

Mr. O'GORMAN presented resolutions adopted by the New York Board of Trade and Transportation, favoring the enactment of legislation to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work, which were ordered to lie on the table.

Mr. POINDEXTER presented a memorial of the Pacific Coast Loggers' Association, of Hoquiam, Wash., remonstrating against the repeal of the exemption clause of the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

Mr. WORKS presented a memorial of the Loggers' Association of Oregon and Washington, remonstrating against the repeal of the exemption clause of the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

Mr. WARREN presented a petition of Local Union No. 2055, United Mine Workers of America, of Acme, Wyo., and a petition of Local Union No. 2335, United Mine Workers of America, of Hanna, Wyo., praying for Federal protection in the mining districts of Colorado, which were referred to the Committee on Education and Labor.

Mr. KERN presented petitions of sundry citizens of Seymore, Ind., praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Terre Haute, Ind., remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

Mr. CRAWFORD presented petitions of sundry citizens of Elk Point, Faulkton, and Harding, all in the State of South Dakota, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. McLEAN presented a memorial of Richard E. Holcomb Camp, No. 38, Sons of Veterans, of New Canaan, Conn., remonstrating against any change in the American flag, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Bridgeport, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of the congregation of the Methodist Church of Pittsford, Vt., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. WEEKS presented resolutions adopted by the City Council of Cambridge, Mass., favoring the enactment of legislation to provide for the retirement of superannuated civil-service employees, which were referred to the Committee on Civil Service and Retrenchment.

Mr. SHIVELY presented a petition of 57 citizens of Huntingburg, Ind., and a petition of the congregation of the West Creighton Church of Christ, of Fort Wayne, Ind., praying for national prohibition, which were referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. OVERMAN, from the Committee on Claims, to which was referred the bill (S. 2359) for the relief of Rittenhouse Moore, reported it without amendment and submitted a report (No. 455) thereon.

Mr. MARTIN of Virginia, from the Committee on Claims, to which was referred the bill (H. R. 2407) for the relief of the Pennsylvania Engineering Co., of the city of Philadelphia, reported it without amendment.

Mr. SHIVELY, from the Committee on Pensions, to which was referred the bill (H. R. 13920) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported it with amendments and submitted a report (No. 456) thereon.

SOUTHERN COALING STATION FOR NAVY.

Mr. TILLMAN. From the Committee on Naval Affairs, I report back favorably Senate resolution 291 with a substitute, which I ask to have read.

The VICE PRESIDENT. The proposed substitute will be read.

The SECRETARY. The committee reports to strike out all the text of the resolution as referred to it and in lieu to insert:

Whereas in view of the early completion of the Isthmian Canal and of its importance to the United States Navy and the national defense generally, and to the development of trade with Central and South American countries, the establishment of adequate coal-supplying facilities south of Cape Hatteras is deemed imperative; and

Whereas the usefulness and efficiency of any harbor as a coaling station must depend upon the facilities (first) of the coal producers for reaching it and (second) of the coal carriers in the matter of assembling the product at said port, including coal docks and other facilities for loading and handling, which should be accessible to all shippers and carriers alike on the same terms and conditions; and

Whereas it appears from numerous complaints now before the Interstate Commerce Commission, as well as from other sources, that the power and influence of the so-called Coal Trust is being persistently used through the management of the railroads reaching south Atlantic ports to prevent the free movement of coal not belonging to said Coal Trust, and it is alleged that practically all of such roads are actually dominated by the same financial interests that control the great coal combines finding outlet chiefly through New York Harbor, Philadelphia, and the Chesapeake Bay ports: Now, therefore, be it

Resolved, That the Committee on Naval Affairs be, and it is hereby, authorized and instructed to investigate the natural and strategic advantages for naval purposes of ports south of Hatteras as compared with Norfolk and other Chesapeake Bay ports as a permanent point for coal distribution, and included and embraced in the scope of said investigation the said committee is further authorized and instructed to investigate into the character and proximity of the coal supply, and the rates obtainable on coal from the coal fields near by; and the committee is further instructed to ascertain, as far as it is practicable—

First. What quantity of bituminous coal is consumed or used at Charleston, Savannah, Brunswick, Fernandina, and Jacksonville, and in their vicinities, and what proportion of this coal is supplied from mines located on the Pennsylvania Railroad system, including the Baltimore & Ohio, Norfolk & Western, and Chesapeake & Ohio, and what proportion is supplied by mines on the Southern Railway.

Second. Whether the United States Navy, including the naval stations, now pays a higher freight rate for coal supply at any or all Atlantic seaports than is charged to commercial ships for bunkerage or for coastwise distribution; and whether all coal for naval supply, at the Atlantic seaports, is not supplied by the so-called Coal Trust; that is, by the mines that have a common ownership or control with the coal carriers; and whether present conditions prevent competitive bidding for the United States Navy coal supply, or any part thereof, by independent coal operators.

Third. The mileage from mine groups located on the Southern Railway in Virginia, Kentucky, Tennessee, Georgia, and Alabama to Wilmington, Charleston, Savannah, Brunswick, Fernandina, and Jacksonville; and the mileage to these same ports, the way the coal is moved from the mines on the Pennsylvania Railroad system and on the Baltimore & Ohio, Norfolk & Western, and Chesapeake & Ohio Railroads and all connecting lines in West Virginia; and in all cases show the freight rates on coals to the cities named, both by rail and rail and water; and where two or more carriers participate, ascertain the proportion of the rate (or service charge) each receives; and also compare these rates with those at seaport towns and cities from Norfolk to New York for local use, for tidewater shipment, and for naval use.

Fourth. Why the Southern Railway has built no wharves or made no provision for handling tidewater coal at any of the South Atlantic ports, and whether the riparian rights and water frontage of South Atlantic harbors is not now being bought up by the parties in the interest of the Coal Trust, while the Southern Railway is taking no active steps to build for itself an independent outlet.

Fifth. Whether trustees for the stockholders and members of the board of directors of the Southern Railway are financially interested in coal-mining industries on the Pennsylvania Railroad system, the Baltimore & Ohio, the Norfolk & Western, or the Chesapeake & Ohio, and to what extent; and whether they, or any of them, are financially interested in any coal-mining indutries tributary to any of said railways. And if found to be interested, ascertain whether such mines have been allowed preference or advantages not allowed to all other shippers (shown by cases already decided by the Interstate Commerce Commission or State commissions). And in all coal-mining operations tributary to the Southern Railway in which any director of the Southern Railway or director of any railroad controlled by it, or allied with the Southern Railway, is financially interested, ascertain the division of through rates with other railroads, and in all cases where a coal operation tributary to the Southern Railway controls a local railroad, or when such local railroad is controlled in common with a coal operation, for assembling and distributing its own coal, ascertain just what proportion of rates it receives, if any, from the carriers, or what compensation other than a division of the rates it may receive.

Sixth. Whether the rate making for the Southern Railway, or other southern carriers of coal, is dominated by the Pennsylvania Railroad or Norfolk & Western; or whether the freight rates of the Southern Railway and any of the other southern coal carriers are made and fixed and maintained by the traffic men of the Southern Railway and other southern carriers; or whether the Pennsylvania Railroad, the Norfolk & Western Railway, the Baltimore & Ohio, and Chesapeake & Ohio exercise any influence either through a rate-making or traffic association or otherwise in the matter of making the rates for the Southern Railway and other southern carriers.

Seventh. Whether or not there is any discrimination now existing in favor of any one port on the Atlantic seaboard as against another port, and, if so, in what does such discrimination consist; and whether or not any coal trust or combination of railroads and coal companies control the coal tonnage to any port or ports, and, if so, how; and whether or not the coal supply of West Virginia, Virginia, Pennsylvania, Tennessee, and Kentucky flows naturally and without unnecessary obstruction to their respective natural ports upon the Atlantic seaboard; and whether or not there is any discrimination in rates against any coal operators.

Eighth. The coal rates to 30 or more representative cities on the Southern Railway in Virginia, North Carolina, South Carolina, Georgia, and Florida, and compare these rates with the rates enjoyed by the cities of relative importance and location, with regard to mines, in Pennsylvania, Ohio, Indiana, and Michigan on the Pennsylvania Railroad system, including the cities whose rates are compared in the letter read into the CONGRESSIONAL RECORD by Senator TILLMAN on April 8.

Ninth. What actual ownership each director of the Southern Railway Co. has in that company, and what ownership, if any, is held in it by the individuals composing the trustees for the stockholders.

Said Committee on Naval Affairs is authorized to sit during the sessions of the Senate and during any recess of Congress, and its hearings shall be open to the public, and it is authorized and empowered to employ counsel, coal experts, railroad-rate experts, and such other clerical and stenographic and expert assistants as it may deem necessary. Said committee shall have power to compel witnesses to testify, to send for persons and papers, to administer oaths to witnesses, and do anything necessary to arrive at all the facts.

The expenses incident to the investigation herein authorized not to exceed $10,000, shall be paid out of the contingent fund of the Senate upon vouchers signed by the chairman of the Committee on Naval Affairs and approved by the Committee to Audit and Control the Contingent Expenses of the Senate. The said Committee on Naval Affairs may, in its discretion, conduct this investigation by a subcommittee of not less than five members, to be appointed by the chairman, and shall make its report as soon as possible.

Mr. TILLMAN. Mr. President, in order that the Senate may understand the scope and purpose of this proposed investigation, I take the liberty to say that I consider it as important as anything we have before us at this time—I mean a merely domestic matter relating to our internal affairs.

I published in the RECORD of April 8 a letter from Mr. B. L. Dulaney, of Bristol, Tenn. I also published in the RECORD of April 20 a letter from Mr. Fairfax Harrison, president of the Southern Railway, contradicting Mr. Dulaney's statements of fact and asking for an investigation before the Naval Committee to be promptly and thoroughly made. The fight is in the interest of the Navy and naval stations and for the consumers of coal in the South Atlantic States, and for the producers of coal in the Appalachian fields, involving mines in West Virginia, Virginia, Kentucky, and Tennessee against the alleged Coal Trust which is dominated and is run in the interests of the Pennsylvania Railroad system and the mines which use that system and its tributaries in order to reach the markets. The owners of the coal mines not in the Coal Trust are making little or no money because of discrimination and favoritism on the part of the railroads. The Southern States are being milked systematically to enrich Morgan & Co., George F. Baker, and their associates, living in New York mainly. Southern industries are languishing and being put to undue expense because of the high price of coal and other discrimination.

I was talking with a friend last week in South Carolina, who is president of three cotton mills, and he told me that coal cost them at the mines around $1 per ton, and the miners could make money at that; that the cost of transportation was anywhere from $1.75 to $2.50. This is due to the fact that the Southern Railway, as is alleged, is controlled by Morgan & Co. and associates, who use and abuse it in the interest of their greater investments in coal mines on the Pennsylvania System.

There can be no just reason why the manufacturers in Georgia, South Carolina, North Carolina, Florida, and Virginia should be discriminated against and their industries throttled or made to bear unjust burdens as compared with their competitors in other States.

Another thing: This Coal Trust, so called, by some arrangement which we seek to find out, prevents the shipment of coal from West Virginia and the territory I have outlined to New York or any point south of it. The city of Washington itself is prevented from getting coal from this field on account of the Pennsylvania's dominating attitude toward the other coal roads, viz, the Southern Railway, the Chesapeake & Ohio Railroad, and the Norfolk & Western Railway.

I am told it costs 67 cents a ton to get coal across the bridge here from Alexandria, 7 miles, if it comes from the mines on the Southern Railway, while coal from the mines on the Norfolk & Western Railway shipped over the Southern Railway, comes into Washington at only 20 cents a ton higher than the rate to Alexandria.

I am told that the people of the South Atlantic States are sending several millions of dollars to the coal fields of the Pennsylvania System to pay for fuel and for its transportation, which ought to go to the Southern Railway and to the mines on the Southern Railway. I am no champion of the Southern Railway's interests, but I do hate to see a fine property like that robbed of its just rights by its trustees. The relation of the trustees to the property in trust is a sacred one, and I want to call on Mr. George F. Baker and his associates in the trusteeship to give an account of their stewardship of the Southern Railway. Besides the people of my State are directly interested in getting cheap coal for fuel, both for consumption in their homes and to run their factories with; and as the Southern Railway penetrates the coal fields, it ought to serve our people by bringing us cheap coal; but it is not allowed to do so, because it is not managed for the interests of the stockholders.

If coal is shipped to Norfolk, it can not go to New York at all or to any intermediate port or point. There is no free trade in coal within the area embracing the States of New York, Pennsylvania, New Jersey, Delaware, and Maryland, nor in the South Atlantic States, and the Navy and naval stations on the Atlantic coast are completely at the mercy of the Coal Trust, both as to the supply and as to the price of their coal. Therefore I sincerely trust the Senate will pass the resolution authorizing an investigation; and for that reason I ask for its prompt consideration.

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 5418) to provide for certain changes and additions to the public building at Salem, Oreg.; to the Committee on Public Buildings and Grounds.

By Mr. STERLING:

A bill (S. 5419) granting an increase of pension to John Flynn (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 5420) granting an increase of pension to Pliny H. Barnes (with accompanying papers); to the Committee on Pensions.

By Mr. ASHURST:

A bill (S. 5421) granting an increase of pension to Mary A. Flynn (with accompanying papers); to the Committee on Pensions.

By Mr. SIMMONS:

A bill (S. 5422) granting an increase of pension to Abraham J. Yeomans; and

A bill (S. 5423) granting an increase of pension to Nancy A. Stanley (with accompanying papers); to the Committee on Pensions.

INDIANS IN NORTH CAROLINA.

Mr. SIMMONS submitted the following resolution (S. Res. 344), which was read and, with the accompanying papers, referred to the Committee on Indian Affairs:

Resolved, That the Secretary of the Interior be, and is hereby, requested to make an investigation of the Indians of Robeson and adjoining counties of North Carolina, recently declared by the Legislature of North Carolina to be Cherokees, and formerly known as Croatans, and report to Congress whether or not they have received any lands, whether there are any moneys due them from the Government, their present condition, their educational facilities, and such other facts as would enable Congress to determine whether the Government is obligated to make suitable provision for them.

REVENUES OF RAIL CARRIERS.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a preceding day, being Senate resolution 343, which was submitted on yesterday by the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. LA FOLLETTE. Mr. President, I do not wish to take up the time of the Senate to discuss the resolution. I do not believe any discussion will be necessary. I therefore ask for the present consideration and adoption of the resolution.

Mr. NEWLANDS. Mr. President, I will state that I have consulted the members of the Interstate Commerce Committee on the floor, and none of them has any objection to the present consideration of the resolution without a reference to the committee.

The VICE PRESIDENT. The resolution was read on yesterday. The question is on agreeing to the resolution.

Mr. CLARKE of Arkansas. I was probably absent from the Chamber on yesterday when the resolution was read, and, if it will not consume too much time, I should like to have it read.

The VICE PRESIDENT. The Secretary will read the resolution.

The Secretary read Senate resolution 343, submitted by Mr. LA FOLLETTE on yesterday, as follows:

Resolved, That the Interstate Commerce Commission be, and it is hereby, requested to transmit to the Senate of the United States all anonymous letters and communications and all written or printed letters and communications received with signatures thereto, and all circulars, clippings, newspaper or magazine articles, marked or otherwise, received by said commission or member thereof which were manifestly designed to influence the action of said commission in making or refraining from making any ruling, conclusion, finding, recommendation, report, or order in the determination of the case known as Docket No. 5860, entitled Revenues of Rail Carriers in Official Classification Territory, and in the case known as Investigation and Suspension Docket No. 333, entitled Rate Increases in Official Classification Territory, now pending before said commission, excepting such letters, communications, briefs, records, and other matters as have been received by said commission or any member thereof, under the rules and regulations of the commission governing its proceedings in the orderly administration of the interstate-commerce law and the acts amendatory thereof, from the officials, employees, and attorneys of the railroads parties to such proceedings, the attorneys, investigators, and employees of the commission engaged in investigating and preparing said cases, and from the shippers and associations of shippers, individuals, and attorneys who appear in the proceedings as protestants.

The Senate proceeded to consider the resolution.

Mr. LA FOLLETTE. I desire to modify the resolution in line 7, page 1, after the word "or" and before the word "member," by inserting the word "any," so that the line will read "received by said commission or any member thereof."

The VICE PRESIDENT. The question is on the adoption of the resolution as modified.

The resolution as modified was agreed to.

THE INTERSTATE COMMERCE COMMISSION.

Mr. LA FOLLETTE. In this connection, if I may be permitted, I wish to give notice that on Thursday morning, after the routine morning business, and not to interfere with other business of the Senate, I shall address the Senate upon Senate

bill 5127, which I introduced some time ago and asked to have lie on the table. It is a bill making it an offense to transmit communications to the Interstate Commerce Commission with the intention of influencing their action upon cases pending before them, excepting such communications as they receive under the rules and regulations which they prescribe in the ordinary conduct of the business of the commission under the law.

Mr. LEWIS. Mr. President, may I ask the Senator from Wisconsin, if I may be permitted, if the Senator's resolution as tendered now, or if the remarks which he proposes to make, will comprehend information as to the people, their names, and addresses, who have been influencing or seeking to influence the commission in the appointment of lawyers and special examiners in connection with the matter of the physical valuation of the railroads?

Mr. LA FOLLETTE. No, Mr. President; the resolution which I have submitted to the Senate, and which the Senate has acted upon, as well as the remarks which I shall submit, are limited entirely to what has taken place regarding what is known as the advance rate cases now pending before the Interstate Commerce Commission.

Mr. LEWIS. I only desire to say that I did not refer to Senators or Representatives; that is their privilege; but I am interested in knowing who they are who have been effective in having a certain class of men named as attorneys and special examiners in that department touching the physical valuation of the railroads for the Interstate Commerce Commission. That is why I made the inquiry.

PANAMA CANAL TOLLS.

Mr. NORRIS. I desire to give notice that on Friday next, immediately after the routine morning business, I shall address the Senate upon the economic aspects and the arbitration of the Panama Canal tolls dispute.

RESERVATION OF PUBLIC LANDS.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 657) to authorize the reservation of public lands for country parks and community centers within reclamation projects in the State of Montana, and for other purposes.

Mr. SMOOT. I should like to ask the Senator who has the bill in charge if he will not let the conference report go over to-day and have it printed, so that we may see just what it is?

The VICE PRESIDENT. It is not a conference report. It is a message from the House of Representatives showing certain amendments to a Senate bill.

Mr. SMOOT. I understood the Senator had presented it as a conference report.

Mr. WALSH. Mr. President, I desire to accommodate the Senator in this matter as much as I can. I will say to the Senator from Utah that the principal amendment proposed by the House is the one to which I called his attention the other day. It extends the operation of the act to all of the States within which are reclamation projects, the original purpose having been to confine it in its operation to the State of Montana. It gives the Secretary of the Interior the right to set aside for parks and community purposes a limited area in any reclamation project. I myself think the amendment ought to be adopted; I believe it is a meritorious provision. I understood the Senator, however, to believe otherwise, and that he would like to have it restricted to Montana. If he perseveres in that purpose, I will move that the Senate disagree to the amendments of the House, request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the conferees on the part of the Senate be appointed by the Chair.

Mr. SMOOT. That will be perfectly satisfactory.

The VICE PRESIDENT. The question is on the motion of the Senator from Montana that the Senate disagree to the amendments made by the House of Representatives, request a conference with the House on the disagreeing votes of the two Houses, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. PITTMAN, Mr. SMITH of Arizona, and Mr. SMOOT conferees on the part of the Senate.

POSTAL SAVINGS BANK FUNDS.

The VICE PRESIDENT. Morning business is closed.

Mr. BRYAN. I ask unanimous consent to proceed to the consideration of Calendar No. 269, being House bill 7967.

The VICE PRESIDENT. Is there objection?

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Montana?

Mr. BRYAN. Certainly.

Mr. WALSH. I desire to inquire of the Chair what the parliamentary status would be if this bill should now be taken up for consideration? I make the inquiry because I have given notice that, upon the conclusion of the unfinished business, I shall ask the Senate to proceed with the consideration of Senate bill 4405.

The VICE PRESIDENT. If the bill be taken up, the parliamentary situation would be that it would run until 2 o'clock, at which time it would be the duty of the Chair to lay before the Senate the unfinished business.

Mr. WALSH. Would the motion of which I gave notice then be in order at the conclusion of the unfinished business?

The VICE PRESIDENT. A motion to take up a bill is always in order after 1 o'clock.

Mr. WALSH. Then I have no objection.

Mr. SMOOT. Mr. President, will the Senator make his request for unanimous consent, so that we will begin at Order of Business 269? Then, if we get through with the bill before 2 o'clock, we can proceed with the calendar from that point on.

Mr. BRYAN. I have no objection to that modification, Mr. President.

The VICE PRESIDENT. Is there any objection to beginning with the calendar at Order of Business 269, the point where the Senate left off on yesterday?

Mr. GORE. Mr. President, I should like to ask the Senator from Florida if he has any idea of being able to finish the consideration of the bill to-day?

Mr. BRYAN. It is very difficult to answer that question. I hope to be able to do so.

Mr. GORE. I have been deferring the consideration of the Agricultural appropriation bill for several days; but I wish to state now that at the first opportunity—and I will make an opportunity as soon as possible—I intend to ask to bring up that bill and get it out of the way.

The VICE PRESIDENT. Is there any objection to the request of the Senator from Florida? The Chair hears none.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7967) to amend the act approved June 25, 1910, authorizing a postal savings system.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from New Hampshire [Mr. GALLINGER], which will be stated.

The SECRETARY. It is proposed to amend the committee amendment, on page 1, line 9, by striking out "$2,000" where it appears and in lieu thereof inserting "$1,000," so that, if amended, it will read: "but the balance to the credit of any person, exclusive of accumulated interest, shall not exceed $1,000."

Mr. HITCHCOCK. Mr. President, I have not heard any effective argument for permitting the total amount of the depositor's account in a postal savings bank to reach as high a figure as $2,000.

In the first place, while the present limit is $500, the average account in the postal savings banks at the present time is only $102. In the second place, there is no country in the world that permits depositors in postal savings banks to use them for investment purposes.

It has been universally conceded that postal savings banks should be used only as the kindergarten for savings accounts; that they should be used to encourage people of very small means to make their initial deposits and accumulate in a small way the money which they may be afraid to deposit with private banks, or even with mutual savings banks.

Those were the considerations which induced the Congress, when the postal savings bank bill was passed, to limit the accounts to $500; and no experience since that time has given any reason why that limit should be made as great as $2,000. I shall vote for the amendment offered by the Senator from New Hampshire to limit the amount to $1,000; but I believe that is going the extreme limit of wisdom and safety.

Mr. President, let me point out what would be a danger not yet referred to if this limit is raised, as is proposed in the House bill. It would encourage runs on savings banks. A few weeks ago we had the spectacle in New York City of a dangerous run upon one of the strongest savings banks in the United States, a bank which had existed through many panics, and which was recognized to be one of the safest savings institutions in the United States, and perhaps in the world; a bank which, I believe, had total savings accounts approximating $100,000,000. Yet thousands of people besieged that bank and withdrew their accounts day after day for nearly a week.

Suppose during that time the proposed amendment had been in effect, and depositors had known that they could take out $2,000 from that bank and deposit it with the post office in New York City. The inevitable result would have been to encourage the run upon that bank, because one of the deterring influences upon such an occasion has been that the depositor has not known where to find a safe place for his money. One of the reasons why that run was finally stopped was that the panic-stricken people finally realized that their money was safer in that bank than it would be if they withdrew it and took it elsewhere, and the result was that the panic finally subsided and the run ceased. If, however, you make it possible for depositors to place as much as $2,000 in a postal savings bank at one time, or possibly even $1,000, every run that begins upon a savings bank will be stimulated, and timid people will take out their money and possibly wreck a perfectly sound savings bank by temporarily placing their money in a postal savings bank.

Mr. President, another danger has been already pointed out here—that if you permit postal savings banks accounts to go past the kindergarten stage of legitimate savings accounts and reach the condition of being investments, you practically give an invitation to people to withdraw their money in large amounts from accounts where it is accessible to their creditors. You practically enlarge to $2,000 the statutes of States which now give exemptions to the extent of a few hundred dollars; and that is not all. It has been, I understand, developed under the present postal savings bank law, even where the amount is limited to $500, that it has been used for tax-dodging purposes. If we permit the limit of savings accounts with the Post Office Department to reach $2,000, we practically afford an almost unlimited opportunity for those people to dodge taxes to a greater extent than now. If this bill is passed, you will have the spectacle of money being withdrawn from ordinary banks just before the time arrives when the taxes are levied, or when they are assessed, temporarily placed in the Post Office Department, and then withdrawn from the Post Office Department and placed back in the banks for use for ordinary purposes after the tax period has elapsed.

In other words, Mr. President, the proposed enlargement of the limit opens the door to a number of evils which will not exist if our Postal Savings Bank System is kept where it was originally placed and where every nation of the world places it, as a kindergarten of savings-bank accounts.

Mr. President, it was a difficult matter to induce the Congress to enter upon the Postal Savings Bank System. I was an enthusiastic advocate of that system. I believe it is highly valuable under proper limitations, but I think it is the first step toward destroying the Postal Savings Bank System to enlarge it to a point where the limit of the postal savings bank accounts passes the legitimate uses of savings-bank business.

I am for the amendment which the Senator from New Hampshire offers, because it places the limit at a lower point than it is placed in the bill supported by the Senator from Florida; but I believe it will be better still to leave the limit at $500, as it is now, particularly in view of the fact that the present average account is only $102, particularly in view of the fact that the average of savings-bank accounts in other countries is less than $102 and particularly in view of the fact that a provision is made in the present law by which those having larger amounts of money can invest them in Government bonds carrying 2½ per cent interest.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Oklahoma?

Mr. HITCHCOCK. I yield to the Senator from Oklahoma.

Mr. GORE. I wish to ask the Senator from Nebraska if he has any report showing the average of deposits in banks other than savings banks?

Mr. HITCHCOCK. I have not at the present time. I think the chances are, by reason of the fact that the mutual savings banks of New England and New York belong to an older system, that the average accounts are probably larger. I have not the figures at hand at the present time. Possibly the Senator from Massachusetts can state the average.

Mr. WEEKS. Mr. President, the average account in the Massachusetts savings banks is about $380 at this time. It gradually increases from year to year. There are in those banks about two and a quarter million depositors, or within a million of as many depositors as there are inhabitants of the State. I think the average deposit in some of the New England States is somewhat higher than in Massachusetts, because there is not the same limit on the total deposit that can be placed in bank by one individual in some of the New England States.

Mr. GORE. Mr. President, can the Senator from Massachusetts state the average deposit in banks other than savings banks? That is what I was trying to ascertain.

Mr. WEEKS. No; I can not, Mr. President.

Mr. HITCHCOCK. Of course the average deposits in banks other than savings banks would be very much larger. I think the figures have been stated in the case of national banks, for which statistics are more or less accurate; but while they would undoubtedly be somewhat larger than the average deposit in savings banks, those deposits consist, to a great extent, of notes discounted. They do not represent the deposit of actual cash. They represent, for instance, the credit given to a borrower who goes to the bank and draws a note for $10,000 which he discounts there, the amount being then placed to his credit. So the average cash deposits of commercial banks probably would not reach the limit which is contemplated here in the proposed amendment to the postal savings bank law.

It is because I believe in the Postal Savings Bank System, because I was an enthusiastic advocate of it, that I do not like to see it perverted here in a way which will lead ultimately to its destruction. I believe it ought to be kept within the lines that experience in European countries has demonstrated to be wise; that it should be retained as it was intended to be. It has been upon the statute books all too short a time to warrant such a radical departure. Our experience has not been great enough to warrant us in a revolution of the system that was introduced. As I understand, the only reason back of the contention for the change is to do something to place more money under the jurisdiction of the Post Office Department, so that the system may be operated at a profit instead of, as at the present time, at a loss.

Mr. President, we all knew that the early operations of the Postal Savings Bank System would be at a loss. We all realized that if the United States paid to the depositors 2 per cent interest and received from the banks only 2½ per cent interest the margin of profit would not be sufficient to make it a profitable operation for the United States at the outset. We did not go into the system for the purpose of making money. We went into the system for the purpose of introducing in this country a method and a means by which people who were too timid to place their money in private banks, too timid to trust even mutual savings banks in the Eastern States, would place their money with the post offices scattered throughout the country under a management known to be safe. I do not think the fact that the first years of operation have developed a loss, due possibly to some mismanagement in the Post Office Department itself, affords a reason for tearing the system up by the roots, converting it into an investment project, and inviting accounts running up to $2,000.

Mr. BRYAN. Mr. President, I shall be very brief in what I have to say in reply to the remarks of the Senator from Nebraska [Mr. HITCHCOCK]. While I am on my feet I shall also undertake to answer, as best I can, some of the statements and remarks made upon yesterday by the Senator from Massachusetts [Mr. WEEKS].

The Senator from Massachusetts called attention to the fact that there are about 60,000 post offices in the United States, and wondered what would happen in case men with money about their persons who wanted a safe place to put it should go to any of these 60,000 post offices in the United States—any fourth-class post office, for instance—and ask the postmaster to take care of $2,000 for them. The Senator from Massachusetts was under the impression that any postmaster in the United States would be obliged to accept the deposits offered to him and preserve them for the depositors.

The facts are that not more than 12,000 banks have ever been designated by the Postmaster General and the other members of the board of trustees for this Postal Savings System. Under an amendment of 1912, I believe, that matter is now entirely in the hands of the Postmaster General. I understand that since the last report of the Postmaster General a number of offices have been discontinued, it appearing that in certain localities where people had confidence in the banks, whether State or national or private, where the population was made up of citizens of this country who had confidence in the banks, it was perfectly useless and a waste of time and energy to undertake to operate the postal savings banks there; but there are certain other great localities in this country, where the population is largely foreign born and where little faith is placed in a bank, whether national or State, but they are willing to trust the Government. I rather suppose that comes about because of the fact that the countries from which they came have a system similar to our Postal Savings Bank System. Remarks were submitted to the effect that there was no unlimited amount allowed

in any country; but there is no limit on the amount which may be deposited in New Zealand, or in Italy, or in Belgium, or in the Netherlands, or in Sweden, countries from which our foreign-born population comes. In Canada deposits to the amount of $3,000 are allowed. So it is not accurate to say that all the 60,000 post offices of the United States are open to deposits.

The Senator from Massachusetts argues that to increase the amount which may be deposited in one of these banks would operate to the injury of the mutual savings banks, and yet it seems to me that the Senator answers his own argument when he says that mutual savings banks pay 4 per cent interest on deposits, whereas under the present law the Government pays only 2 per cent interest, and under this amendment it would pay only 2 per cent interest to the amount of $1,000.

The Government, however, would put this money in the banks at 2½ per cent, and thereby the banks get whatever money comes in because of this system. The Post Office Department says $42,000,000 have been taken out of hiding by reason of this system. The banks will get that at a less rate of interest than they now pay their time depositors.

Another thing, Mr. President, the Government does not pay interest for a quarter or for any time less than a year. Money may be placed in a postal savings bank on the 1st of January, 1914, and taken out of it December 20, 1915, and only one year's interest will be paid. So the inducement is not sufficient for depositors who have confidence in banks which will pay a higher rate of interest for their savings.

Coming now to the objection of the Senator from Nebraska [Mr. HITCHCOCK], that when runs occur upon banks, under the amendment proposed by the committee money will be withdrawn from the banks, and that this system would aid in runs upon banks and cause perhaps failures where otherwise failures would not occur. Mr. President, there can be no better assistance provided for banks of whatever character when runs are made upon them than this very system. Under the law as it now is, and under the rules made in pursuance of the law, when money is taken out of a bank and placed in a postal savings bank it goes right back into the bank out of which it was taken, whereas in an ordinary run the depositors withdrawing their money place it in hiding. How it can be argued that to take money out of a bank by a depositor who is timid in regard to leaving it there longer, or who, trusting this system, will deposit his money in a postal savings bank, when by the postal savings bank it will be replaced in the very bank out of which it was taken, would operate to assist a run, I confess I am unable to understand.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Utah?

Mr. BRYAN. Certainly.

Mr. SMOOT. I wish to ask the Senator where money is taken from a bank in case of a run or otherwise and placed on deposit in a postal savings bank, and the postmaster having the money in charge deposits it in the bank, is it not true that before that can be done the bank in which the money is deposited must have deposited in Washington bonds of a certain character, and in order to buy those bonds it would have to pay at least par for them? Is it not also a fact that the banks are allowed a deposit of only 90 per cent of the value of the bonds that they have deposited here at Washington, or, in other words, that for every $1,000 of postal funds deposited in a bank in any part of the country the bank has to deposit with the Government $1,100 of bonds? Banks do not generally carry such bonds, and in order to get the deposit they would have to go out and purchase the bonds and deposit them in Washington before the postal funds could be deposited with them.

Mr. BRYAN. Mr. President, it is not the fact, as I understand it, that whenever a deposit is made at a particular time the bank puts up security. The banks that desire to receive these deposits qualify, and it is said that more than 7,200 of them have already qualified and already have the securities up.

Mr. SMOOT. For the money they have.

Mr. BRYAN. They have the securities not only for the money they have, but for the money they receive. They do not put up an additional security every time a deposit is made. Let me read to the Senator the rule adopted by this board:

> If one or more local banks have qualified under the law, the postmaster shall deposit each day to the credit of the board of trustees, Postal Savings System, all postal savings funds amounting to $10 or more on hand at the close of business on the preceding business day.

Then follows a provision that the deposits shall be equally distributed; that if $200 is gathered up within a day it need not be distributed among all the banks; it may be deposited in one, but that no more shall be deposited in that particular bank until the other banks have been treated in like manner. I suppose it is true that a bank that can not furnish security satisfactory to the Government can not receive these deposits, and it ought to be true.

Mr. SMOOT. I am not objecting to that, Mr. President. I was simply calling attention to the fact that the Government requires it, and rightfully requires it.

Mr. BRYAN. Certainly.

Mr. SMOOT. I know banks that qualified and to secure the first deposit made by the Government of the United States obtained $10,000 in bonds. Just as soon as they had $9,000 of deposits they were called upon for additional security, and then, of course, they would deposit another $10,000 in bonds, and as soon as they had reached the limit—that is, 90 per cent of the value of the bonds deposited—they were called upon for additional security.

I am not objecting to the Government calling upon the banks for security. The Government ought to have it; I agreed with the proposition, in the first place, that they ought to have it; but I do not want a misunderstanding as to the proposition that this is helping a bank in the case of a panic. The only way it would help a bank in the case of a panic would be by having in its safe bonds that the Government would accept for the deposit, and then it would get 90 per cent of the money on them, whereas if the bonds were accepted by the Government, or with a suggestion that the Government would accept them, they could be sold on the market at any time and the bank receive full value instead of a deposit of 90 per cent of their value.

Mr. BRYAN. Of course that but illustrates the point that a bank able to put up security, solvent in every respect, can save itself under this system when a run is made upon it and stop the run when otherwise all its deposits might be withdrawn and the bank eventually ruined. It gives them a chance, at any rate, to get back the deposits taken out of the bank by creditors who are panic-stricken.

Mr. SUTHERLAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the junior Senator from Utah?

Mr. BRYAN. Certainly.

Mr. SUTHERLAND. I wish to ask the Senator from Florida about another feature of the bill. I understand under the existing law no person can make a deposit of more than $100 in any one calendar month, and he can not in the aggregate deposit more than $500. Under the bill as now proposed the limitation as to $100 is taken off altogether, as is also the limitation upon the aggregate amount of $500, so that a person might at one time deposit $2,000. I ask the Senator whether he understands under the postal savings bank law that the amounts deposited in the post offices are exempt from execution or attachment?

Mr. BRYAN. I understand they are, under an opinion of an Assistant Attorney General.

Mr. SUTHERLAND. It would seem that funds on deposit in an institution of the Government would not be subject to execution. Then, is it not the effect of the bill to enable any debtor, if he should be sued, to withdraw at once from the bank $2,000 which in that State would be liable to execution and put it in a situation where it could not be reached? Is it not the effect of the bill, so far as that aspect of it is concerned, to aid a dishonest debtor?

Mr. BRYAN. Mr. President, the ingenuity of man has never yet been able to overcome the schemes of dishonest debtors. Suppose a man had $2,000 that he wanted to get out of the reach of his creditors and he would buy Government bonds, State bonds, or city bonds; it would have the same effect. I call the attention of Senators to the fact that the deposits which are now in the postal savings banks have the same protection, and if it is wrong to exempt them at all, it is only a matter of degree, because under the law now if a man is indebted and has $500 in a postal savings bank, it is beyond the reach of his creditor.

Mr. SUTHERLAND. Of course, he can only——

Mr. BRYAN. Let me read to the Senator the proviso occurring in section 10 of the act:

> *And provided further*, That the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

Mr. SUTHERLAND. I am not speaking of taxes. I am speaking of funds being withdrawn from the process of the court.

Mr. BRYAN. The bonds authorized to be purchased under this law are exempt, as all Government bonds and all State bonds are exempt.

Mr. SUTHERLAND. The point I am arguing, however, is that under the present law no debtor could at once withdraw

a large sum of money and turn it over to the Post Office Department and thereby avoid a judgment or an execution.

Mr. BRYAN. But he can now, without this law being passed, withdraw $2,000 from the bank and invest it in bonds and have it beyond the reach of his creditors.

Mr. SUTHERLAND. That is not quite so simple as the method provided here. He would have to find bonds to buy and he would have to withdraw his money, and in the meantime an attachment could be levied. This gives him a very ready method of withdrawing his money and at once putting it into the post office, where it is completely sequestered from any possible process of a court.

Mr. BRYAN. That brings up the question whether we ought to provide that these funds shall be exempt, which is an entirely different proposition and is only one of degree, because they are exempt now under a $500 limit, and they would be exempt if this amendment is passed under a $2,000 limit.

The Senator from Nebraska referred also to tax dodgers. He said that money might be deposited for the purpose of avoiding the payment of taxes on the fund. Ohio and Indiana especially, I am informed, have undertaken to tax these deposits. What was the result? The depositor converted the money into bonds and immediately placed it beyond the taxing power. So instead of accomplishing anything the State, in trying to reach the fund, gave an excuse to the depositors to withdraw it. Furthermore, the depositors sent it away from the localities where the money was deposited.

Now, by another provision the committee has offered and which will be pending, all this money except 5 per cent reserve is required to remain in the locality, and I submit that in that respect the amendment is much better than the present law.

Mr. CUMMINS and Mr. WEST addressed the Chair.

The VICE PRESIDENT. Does the Senator from Florida yield, and to whom?

Mr. BRYAN. I yield first to the Senator from Iowa.

Mr. CUMMINS. There is one phase of this matter which I should like to submit to the Senator from Florida, which, it seems to me, has not yet been sufficiently considered. We will assume that a depositor has $2,000 to his credit in a bank. He becomes a little fearful of the bank and draws it out and walks over to the post office and deposits it. Then he has the Government's obligation to repay it. The Government then goes back to the bank from which it was drawn and deposits it there at 2½ per cent interest. In doing so, the bank must give to the Government at least $2,000 in public bonds for the security of repayment. In doing that the bank diminishes its assets by just so much applicable to the payment of other depositors. Does the Senator from Florida think that that is a fair transaction? Does he not think that it would be exceedingly unjust to the remaining depositors, who were depending upon the solvency or the assets of the bank to pay them whenever they demanded or were entitled to their money?

In other words, this is simply another way of making the Government the guarantor of bank deposits. If it were extended so that there were no limitations, then the process would be comparatively easy. If the bank were willing to take the Government deposits, the Government would in that way become responsible for the deposits that might be withdrawn from the bank or banks on account of this trust.

Mr. BRYAN. That is the very reason, Mr. President, why the committee thought it would be unwise to leave the deposits unlimited, but it was not supposed that if the limit was placed as low as $2,000 that result would come about.

Mr. CUMMINS. If the Senator will strike out of this bill the provision that requires special security to be given to the Government and make the Government take its chances with other depositors in these banks, I would have no objection at all to the enlargement of the deposits, but I can not see the justice in the Government interfering so that it may protect one depositor and leave the others without any security at all. I think when the Government comes to deposit money in a bank, it ought not to demand any security, anyway, to the disadvantage and to the impairment of the security that the bank has for other depositors. I hope the Senator from Florida will not overlook this phase of it when he comes to consider the matter.

Mr. BRYAN. Mr. President, it occurs to me that the Senator from Iowa overlooks the fact that when the securities are put up by the banks with the Government, the Government is putting money in place of the security, which goes, of course, to the benefit of the bank and all of its depositors.

Mr. WEST. Mr. President——

Mr. BRYAN. I yield to the Senator from Georgia.

Mr. WEST. I understand from the discussion that this $2,000 is nontaxable. What would be the result? I will say that in my own State the time is fixed——

Mr. BRYAN. No; the Senator is mistaken. It depends upon the law of the State whether these deposits are taxable or not.

Mr. WEST. Does the Senator from Florida refer to deposits in savings banks?

Mr. BRYAN. Yes.

Mr. SHIVELY. I think the Senator from Florida is mistaken about that. So far as the money deposited in postal savings banks is concerned where a citizen makes a deposit and receives an evidence of it from the Government, I understand that that evidence of that deposit is not taxable.

Mr. BRYAN. I was informed differently at the Post Office Department.

Mr. WEST. I want to show to the Senator from Florida the situation that would exist in my State. A return of property must be made there on the 1st day of May. What would prevent every bank depositor who had $2,000 on deposit from going to his bank just before the 1st of May, taking it out, and turning it over to the Government by putting it into a Government savings bank, so that he would not have that money in his possession on the 1st day of May, and then on the 2d day of May go and turn it back into his own savings bank?

Mr. BRYAN. That would be a mere dodging of taxes, which I do not believe any court would uphold.

Mr. WEST. It would amount to thousands and thousands of dollars in the State of Georgia.

Mr. BRYAN. Well, a man would perjure himself in order to do it; and, if the Senator from Georgia will allow me to say so, I do not believe that there are more people in the State of Georgia in proportion to their numbers that would do that than there are elsewhere.

Mr. NORRIS. Mr. President——

Mr. BRYAN. I yield to the Senator from Nebraska.

Mr. NORRIS. I wish to ask the Senator from Florida a question. Suppose the deposits in savings banks are exempt from taxation—I do not remember that there is anything in the law that exempts them from taxation—that operation could not be performed, could it?

Mr. BRYAN. Such deposits are not exempt by the law, as I understand. That is my information about it.

Mr. NORRIS. Then, the suggestion made by the Senator from Georgia [Mr. WEST] would not be applicable. A man could not avoid paying taxes on his money by depositing it in a postal savings bank.

Mr. SHIVELY. Will the Senator from Florida yield for a moment?

Mr. BRYAN. Certainly.

Mr. SHIVELY. Mr. President, when the bill creating the Postal Savings Bank System was before the Senate, the question was raised whether the certificate of a deposit in the postal savings banks would be exempt from taxation. At that time it seemed to be the general opinion in the Senate that such certificate would be exempt from taxation; that it would be one of those evidences of debt against the Government of the United States that would fall in the same category of exemption from taxation as would a Government bond. It may be that in some of the States such deposits are in fact taxed. But very probably that is because the issue has not been raised.

Mr. NORRIS. Mr. President——

Mr. BRYAN. Just a moment, if the Senator from Nebraska will pardon me. I said a moment ago that I was informed by the Post Office Department—and it was the Third Assistant Postmaster General who gave me the information—that in some of the States such deposits are taxed.

Mr. NORRIS. If the Senator from Florida will yield to me, I should like to suggest, in reference to what the Senator from Indiana [Mr. SHIVELY] has said, that my recollection is that as the bill was introduced in the other House it contained a direct provision that these deposits should not be subject to taxation, and that that was stricken out, the idea of Congress being that they ought to be subject to taxation. If the Senator from Indiana is right, then we have a serious proposition before us.

So far as I am concerned, I am not willing to exempt these deposits from taxation any more than I would exempt deposits in an ordinary savings bank from taxation. I concede they might be exempted by the State law from taxation, but not because they are savings deposits. If all deposits were to be exempted, it would, of course, be proper to exempt these; but I do not understand—although, of course, I may be mistaken and the Senator from Indiana may be right—that there is anything in the postal savings bank law that could be construed into an exemption from taxation of such deposits.

Mr. WEST. Mr. President, I understand they are exempt because they are in the postal savings banks under the law as it at present exists.

Mr. BRYAN. Mr. President, I will conclude what I have to say by quoting from the report of the Postmaster General upon this subject as to the amount allowed to be received under the existing law.

Mr. CLARK of Wyoming. Mr. President, before the Senator from Florida proceeds with that, I wish to suggest to the Senator, in view of the discussion which has just occurred in regard to the taxability of these deposits, that it seems to me that the deposits while they are in the bank constitute an indebtedness of the United States to depositors, and therefore would be free from taxation by any local authority.

Mr. SHIVELY. And under the general statute.

Mr. CLARK of Wyoming. And under the general statute; yes.

Mr. BRYAN. Mr. President, I must say that my information is different, and that in Ohio and Indiana such deposits have been taxed. I do not know whether the matter was questioned or litigated, but some of the depositors, because of that very fact, converted their deposits into Government bonds.

Mr. NORRIS. I was unable to hear what the Senator from Florida said or what the Senator from Wyoming said in regard to such deposits being taxable.

Mr. CLARK of Wyoming. I suggested that probably these deposits would be an indebtedness of the United States to the individual depositors, and would therefore not be subject to taxation.

Mr. NORRIS. I should like to inquire of the Senator from Florida if he has a definite opinion from the Attorney General on the subject?

Mr. BRYAN. No; I have not. I have stated several times——

Mr. NORRIS. It had not occurred to me that postal savings deposits were not subject to the laws of the respective States in regard to taxation, and I have been laboring under that impression all the time. I know that the question was discussed when the bill was passed in the House. The bill as originally introduced exempting deposits in the postal savings banks from taxation received my opposition; I wanted to strike out any provision exempting them from local taxation; and if by construction of the general law they are now exempt from taxation, it seems to me that is another particular in which we ought to amend the law and make them subject to the laws of the States.

Mr. WEST. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Georgia?

Mr. WEST. Is a national indebtedness taxable, I ask the Senator from Nebraska?

Mr. BURTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Ohio?

Mr. BRYAN. I do.

Mr. BURTON. I think postal savings deposits are subject to taxation. The question of the taxation of Government obligations of similar nature was very much discussed during the time of the Civil War, and I think it was conceded that, without some affirmative provision for exemption, they would be taxable in the respective States or jurisdiction in which they were held. There is another provision in the postal savings law that rather confirms the position that they are taxable. In the tenth section provision is made for exchange of deposits for bonds, and there is this provision:

And provided further, That the bonds herein authorized shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under State, municipal, or local authority.

If the deposits and the bonds were to be free from taxation, why was it necessary to insert a provision of that kind? Under the general principle expressio unius est exclusio alterius, the expression of the provision exempting bonds seems to convey the intention that the deposits are not exempt from taxation.

Mr. BRYAN. I am obliged to the Senator. Mr. President, the Postmaster General in his report for the year ending June 30, 1913, has this to say in advocacy of this change:

A conservative estimate indicates that more money has been refused by the Postal Savings System than has been accepted.

He means because of the limit of $100 and the aggregate limit of $500.

A still more serious effect than the loss to business of rejected savings, a large percentage of which has been sent abroad, is the confused thought and consequent lack of confidence which prevails among foreign-born people, who can not understand why the Government will safeguard a part of their savings and not all of them. This misunderstanding is generally prevalent among those who are most in need of the service.

Mr. President, I trust the amendment will not prevail.

Mr. WEST. Mr. President, I do not propose to address the Senate at any length on this subject, but only wish to give a few reasons why I do not think the postal savings-bank law ought now to be changed. I think it ought to be tried out longer. Furthermore, outside of the question as to whether or not the deposits in the postal savings banks are taxable, I think that the proposed increase in the limit of deposits to $2,000 will give the person who has his money on deposit in the postal savings bank too much leeway from his indebtedness. If a man who ought to pay his debts and who has the money elsewhere becomes involved, he can remove his money to a postal savings bank in order to elude the payment of a just and honest debt. I even think the $500 limit is too much. Each State of the Union makes laws providing for exemptions in their respective jurisdictions. Then, why should the United States Government come forward and make provision for the exemption of $2,000 more?

Another reason is, I do not think the original scope and purpose of the postal savings act contemplated that the Government should go into the banking business; and, in my judgment, the banks scattered over this country would be injured by making this limit $2,000. For these reasons I shall oppose the amendment offered to the present law.

Mr. SHIVELY. Mr. President, one of the alleged purposes of the act establishing the system of postal savings banks was to encourage habits of thrift, prudence, and economy. This was to be accomplished by furnishing depositories where those people who are suspicious of the ordinary banks of deposit could place their savings in perfect confidence that they would incur no risk of loss. It was thought that this sense of security would not only encourage the savings habit, but that it also would bring hoarded savings from their hiding places, which, through deposit with the Government and redeposit by the Government in the local banks, would reenforce the actual available circulation of the community. The system so established is now patronized, as I am informed, up to the sum of $40,000,000. There is no question that these deposits are exempt from seizure on execution. I believe they are exempt from all forms of local taxation. When the bill was before the Senate I submitted to Senator Carter, of Montana, who was in charge of the measure, the question whether the certificate of deposit contemplated by the bill would not, under then existing law, be exempt from State and local taxation. He replied that in his opinion it would. I have not had occasion to examine the subject recently, but my impression is that there is a general Federal statute——

Mr. BURTON. Mr. President, if the Senator from Indiana will yield to me, I will say that the general Federal statute on the subject, section 3701 of the Revised Statutes, reads:

All stocks, bonds, Treasury notes, and other obligations of the United States shall be exempt from taxation by or under State or municipal or local authority.

The Senator from Indiana will remember that there was a considerable amount of discussion when the postal savings bill was under consideration in 1910 as to whether the postal savings bank deposits were obligations of the United States. As the bill was at first framed, I think they were not. Payment was to be made from the securities in which deposits were invested. I remember conducting a line of questioning with the then Senator from Montana, Senator Carter, at the time, asking his opinion about it. But this is the provision as it was finally inserted in the postal savings bank act:

SEC. 16. That the faith of the United States is solemnly pledged to the payment of the deposits made in postal savings depository offices, with accrued interest thereon as herein provided.

Query, does not that leave the Federal Treasury in the position of a guarantor rather than of an original obligor? I think that question is certainly open to doubt, with the probability that it is not a direct obligation of the United States in the sense intended by section 3701 of the Revised Statutes.

I thank the Senator from Indiana for yielding to me.

Mr. WEST. If they were obligations of the United States Government, would they not be nontaxable?

Mr. BURTON. They would be under a literal interpretation of this statute; but, as the Senator from Georgia knows, a general expression of that kind following specific expressions such as "stocks, bonds, and Treasury notes" would be interpreted by reference to those items.

Mr. WEST. The inclusion of the one is the exclusion of the other.

Mr. SHIVELY. Mr. President, I can not accept the view of the Senator from Ohio as the correct one. Here is a certificate issued to the citizen by the United States Government. It is a certificate calling for a certain amount of money. The money has been placed on deposit at the post office. That certificate is payable by the United States. That paper, that certificate, that whatever you see fit to call it, bears interest at the rate of 2 per cent. That interest is also payable by the United States Government to the holder of the certificate. It seems to me that these facts bring the certificate squarely within the section of

the Revised Statutes exempting "obligations of the United States" from "taxation by or under State or municipal or local authority." When it is contended that in certain States these deposits actually have been taxed, I apprehend that it will be found that that was because no one raised the question of exemption, and therefore that no adjudication of the right to tax was had. With these features of exemption from execution and taxation in the system, no good purpose can be served by advancing the maximum deposit to the amount proposed in the bill. I doubt the wisdom of increasing the limit fixed in the act creating the system. I certainly could not vote to raise the limit above $1,000. This limit would leave in full force all laudable inducements to habits of economy and thrift and to bring money out of its hiding places. The system should not be permitted to degenerate into a convenience for execution jumping and tax dodging.

Mr. WORKS. Mr. President, before the Senator takes his seat, does he agree with the suggestion that is made here that the Government is only a guarantor and not a principal debtor?

Mr. SHIVELY. No, indeed; I do not—a guarantor of what?

Mr. WORKS. It has been claimed by the Senator from Ohio [Mr. BURTON] that the Government is only a guarantor. It seems to me that as the deposit is made in a Government institution and a certificate is issued by the Government, it becomes the original and principal debtor.

Mr. SHIVELY. Undoubtedly; the original undertaker. Of what or of whom is the Government the guarantor? Who is guaranteed? No; the Government is an original debtor.

Mr. BANKHEAD. Mr. President, it seems to me we have entirely forgotten the purpose of the establishment of the Postal Savings Bank System. It seems to me we have entirely forgotten the argument that was made in the Senate that induced the Senate to vote for the establishment of the system. We were told—and I conclude the Senate were convinced of the correctness of the statements made at that time—that the main purpose of establishing the system was to bring money out of hiding; to induce people who had small amounts of money, and who were not willing to trust the banks in this country with the deposits, largely the class of people who had been accustomed to postal savings banks in foreign countries, to deposit it with the post offices here. That was the purpose of establishing the system. If that is not the purpose now, it ought to be abolished.

I can see no reason why the Postal Savings Bank System should be conducted by the Government of the United States at a cost largely beyond the revenues derived from it by the Government. I think the proposition to increase the limit of deposits to $2,000 ought to be adopted, and I think so mainly for the reason that it is the only way the Post Office Department has discovered, and I believe it is the only means, by which the Post Office Department can recoup its losses and make the system self-sustaining. More than a million dollars is already charged up to the Postal Savings System as a loss to the Government.

I do not see very much force in the suggestion that in times of stress, or at a time when small depositors become suspicious of the banks, they will go and withdraw their deposits and redeposit the money with the postal savings bank. I can see no reason why they should do that. There is no profit in it. If, however, they can not have the opportunity of depositing the money somewhere when they become frightened and withdraw it from the bank, they will inevitably put it in their stockings, or hide it somewhere around the premises, and thereby it will be taken absolutely out of the channels of trade and commerce. If they can not make their deposits in the postal savings banks to an amount that is satisfactory to them, they will do what they did before the Postal Savings System was adopted; they will go and buy money orders and send their funds abroad, to be deposited in Government depositories or in countries where the postal savings bank laws permit deposits, in some cases, without limit.

If this amendment could be adopted, it would enable the Post Office Department to run the Postal Savings Bank System without a clear loss of a large amount to the Government; and, in my opinion, they can not do it in any other way. Something ought to be done in this respect. I do not know whether this is the proper remedy or not; but I simply desire to call the attention of the Senate back to the original proposition and the arguments that were submitted that induced the Senate in the beginning to adopt this system, namely, that it would offer encouragement to the class of people who were suspicious of our banks and desired some place to make their deposits where they would feel secure, or else they would continue to do as they have done for a long period of time—send their money away to be deposited in banks where they had confidence, where they had been accustomed to making these deposits.

There has not been as much money deposited in these banks by far as was contemplated. Many of them have been discontinued and ought to have been discontinued. No doubt the department went too fast and too far in their establishment. Postal savings banks were established in many places where there was never any excuse or reason for their establishment. There is no question about that. Necessarily, as a matter of economy and good common sense, they have been discontinued.

The whole purpose of this amendment is to enable those who have shown some evidence of thrift and saving to have what they consider a safe depository, and one akin to or along the lines of those to which they have been accustomed.

I have no doubt—and I think the statistics will show—that a very large percentage of the deposits in our postal savings banks have been made by foreigners. I am informed by the Senator from Florida [Mr. BRYAN] that 75 per cent of the money comes from that source. Doubtless, Mr. President, from the information we have, from the statistics that have been gathered, more than twice the amount that had been deposited would have been deposited if it had not been for the narrow limits imposed.

If the Senate should adopt this amendment, I do not think there is any reason to fear that any great harm will be done by the so-called tax dodger. He is a pretty hard fellow to catch when he makes up his mind to dodge. I have never yet discovered any means by which you can discover and tax the money that is hidden away in the old family trunk or in the old lady's stocking or in the cracks around the cottage. You can not discover that; you can not reach it for any purpose. I submit that it is better to have that money go into the banks, in order that it may be returned to the channels of trade and commerce and be active in business, than it is to permit it or encourage it, if you please, to remain in hiding, as is the case now and was before the establishment of this system.

So the tax dodger does not concern me very much. The amount that he will deposit in one of those postal savings banks does not amount to very much in the way of revenues to the State or municipal government when you come to talk about taxing values. It seems to me it is an excuse rather than a reason why this proposition should not be adopted.

That is all I care to say about the matter. If the Senate in their wisdom think best, they may continue this system as it is now; but I beg Senators to remember that, like all other new systems, it was to be expected from the beginning that it would be discovered when we came to apply the machinery of this system that there were defects in it that ought to be remedied. It is perfectly natural that all great machines like this, obtaining all over the country and applying to thousands and thousands of postal savings banks, would have to be adjusted. It is natural that a great machine like this should "slip a cog," so to speak, that it might get off the track somewhere, and that it would become necessary to investigate all of its bearings and to adjust them as circumstances and experience indicate.

Mr. WEST. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Johnson	Page	Smith, S. C.
Brady	Kern	Perkins	Smoot
Brandegee	Lane	Pittman	Sutherland
Bristow	Lea, Tenn.	Poindexter	Thomas
Bryan	Lewis	Ransdell	Thornton
Burton	Lippitt	Reed	Tillman
Catron	Lodge	Shafroth	Townsend
Chamberlain	McCumber	Sheppard	Vardaman
Cummins	Martin, Va.	Sherman	Warren
Dillingham	Martine, N. J.	Shively	Weeks
du Pont	Norris	Simmons	West
Gore	Oliver	Smith, Ariz.	Works
Hitchcock	Overman	Smith, Md.	

Mr. TOWNSEND. I wish to announce the absence of my colleague, the senior Senator from Michigan [Mr. SMITH], on important business. He is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY] and also the junior Senator from Wisconsin [Mr. STEPHENSON].

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. BRYAN. I ask the Senator from North Dakota, in charge of the unfinished business, if he will not ask unanimous consent to lay it aside for the present? I have canvassed the situation thoroughly and I think the discussion of the postal savings-bank bill is over, or practically so. I make this request in view of the fact that yesterday when the unfinished business was placed before the Senate it was discussed for only a few minutes and then the Senate adjourned until to-day.

Mr. McCUMBER. I do not question the sincerity of the view of the Senator from Florida as to the probability of obtaining a vote in a very short time, but I have made some inquiry upon this side and I find that there will be an amendment offered and that there will be considerable discussion upon that amendment, enough so, Senators think, that probably it would take all day if I should yield at this time.

There are notices on the calendar to take up important bills after we have disposed of Senate bill 120; and I feel, under the circumstances, that it is due to the Senators who have given those notices that I should try and see if we can not get a vote upon this bill to-day and have it disposed of. Then it will be entirely out of the way of the Senator from Florida.

Mr. BRYAN. I hope very much that it will be, Mr. President. The unfinished business has been standing in the way of the regular procedure of the Senate for a long time. I do not concede that Senators have a right to insist that the Senate shall take up bills simply because they put notices on the calendar that they will call them up.

Mr. McCUMBER. No; I do not know that I concede that right, but the unfinished business has been before the Senate for a long time. I have taken a great many chances with the bill in trying to accommodate Senators. I tried my best to make an arrangement whereby the Senator could dispose of his measure yesterday, and the Senator thought then, as he thinks now, that a vote could be reached upon it in a very short time. Yet we have had another discussion of an hour and a half to-day, and we do not seem to be any nearer the end than we were yesterday. I am informed that the amendments which will be offered will require considerable discussion. I really want to accommodate the Senator, but——

Mr. BRYAN. The trouble is, if we proceed as we have been doing, we shall not get through with it by taking it up one morning for an hour and then be cut off by the unfinished business and have to start all over again the next day.

Mr. McCUMBER. The Senator will let me try and finish this bill to-day, and then he can have the whole day to-morrow.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. REED. Mr. President, I do not know whether it is possible to engage the attention of the Senate with this bill. It has been before the Senate now for, I think, nearly six weeks as the unfinished business. The discussion has been taken part in by the Senator from North Dakota [Mr. McCUMBER] and the Senator from Minnesota [Mr. NELSON] at great length. The Senator from Illinois [Mr. SHERMAN] delivered some illuminating remarks upon the bill. Yet, Mr. President, I undertake to say that the situation then was as I find it when I rise to discuss the bill, namely, that there are only a very few Senators in the Chamber. I make no complaint of this, because we all understand that there are several committees engaged in very important work which compels the absence of the members of those committees from the Senate Chamber. Nevertheless, it is a regrettable fact that a bill of far-reaching importance should be discussed in the absence of Senators, and then voted upon by Senators without any real knowledge of the question.

This bill is not like an ordinary matter of legislation relating to a law of a general nature and which may be well considered by Senators when they come to vote in the light of the general information they possess. This bill requires an intimate study and knowledge regarding the subject with which it deals.

Mr. President, by way of preliminary, I remark that just now we appear to be embarking upon a policy of regulating everything "in heaven above, on the earth beneath, and the waters under the earth" by acts of Congress. A fitting illustration of the direction in which we are going is afforded by the petition which was filed here this morning by some good citizen praying that the Federal Government proceed to regulate moving-picture shows. We will speedily arrive, I think, at a period where the size and contents of pap bottles will be made the solemn subject of congressional action and a commission of Federal officeholders will be appointed to regulate the nursing of babies.

We go from one of these propositions to another, and, having once seized a jurisdiction, we hold it fast and reach out greedily for some new object for regulation. We started with laws which had for their purpose the prevention of the propagation of disease. That was followed by laws regulating the sale of foodstuffs deleterious to the human being. Then we undertook to regulate crimes committed within the States. Thus we passed a law prohibiting the use of the mails in the furtherance of fraud, and that law, which seemed at the time to be of limited scope, has been extended by construction, so that now it is held that if two or three residents of a State engage within the State in a conspiracy to commit a crime, and actually commit the crime within the State, and therefore are amenable to the State laws, nevertheless, if some letter be written and mailed, which does not in itself constitute a crime, but simply is a message sent in furtherance of some act of the conspirators, the entire conspiracy becomes at once subject to the purview of the Federal court. So we find our Federal courts are to-day congested with cases which are properly triable by the State tribunals, but which are immediately seized upon by the Federal tribunals because of the mere fact that a letter was sent through the mails.

We passed a law which was supposed to prohibit the decoying of an innocent, unsuspecting girl from one State to another, from the overreaching of her by some fraudulent pretense or by some trick or device and inducing her to cross a State line. That law has been construed by some of the Federal courts to include cases where men and women by mutual consent and with full knowledge of what is to occur have crossed a State line. Naturally such a law has become the most powerful instrument of the blackmailer.

The peculiar thing about conferring Federal jurisdiction lies in this fact that the authority granted by Federal statutes appears to possess the equality of indefinite expansion and unlimited stretching. The law is held to embrace not only that which its terms describe but all incidental powers which the imagination of men can add to or deduce from the act.

So that when we propose to establish a system of Federal inspection of grain we must do so fully understanding that the Federal authority will at once grasp not only that which we now have within our minds but that its arm will be stretched over many fields we do not contemplate.

I want to emphasize the fact that this is not a bill concerning the health of the people. It is not a bill concerning the morals of the people. It is not a bill which concerns the prevention and propagation of disease. It is a bill having for its object and purpose the mere regulation of an article of commerce. It is proposed that we shall inspect wheat, corn, rye, oats, barley, and things of that kind. Of course no distinction in principle can be drawn between the inspection of wheat and corn and rye and oats, on the one hand, and the inspection of potatoes, carrots, beets, alfalfa, and hay, on the other hand. If you reply that wheat is a great article of commerce, I answer so are the other commodities I have mentioned. If you reply that wheat is a prime necessity of life, or that corn is an article of great value, I reply that the same argument can be made for all the products of the farm.

If we are to have a Government inspection of all the products of the farm, I inquire why we should not have a Government inspection of all the products of the factory? Why not put a Government officer beside the door of every manufacturing establishment in the United States and insist upon an inspection and a Government stamp going upon everything produced. I repeat what I said, not because it is brilliant but because it is in point, that if we continue to expand our governmental activities it will not be long until some people will want us to regulate the size of the pap bottle, to prescribe its contents, and to specify the shape of the nipple.

To my mind, Mr. President, when this Government was formed it was intended that the Federal Government should only exercise those powers essential to the solidarity and strength of a National Government. The fathers were extremely careful in limiting the powers of the Federal Government. It was intended that every State should remain sovereign in all respects save as it had expressly delegated powers to the Federal Government. It was contemplated that the people of the States would know how to maintain the peace within their borders, that they would know how to establish courts of justice, to regulate trade and commerce, to pass wise and provident laws, and to enforce those laws through the ordinary machinery of State government.

But it has come to a point now where it is expected that Congress shall be the clearing house for all human ills and

that every man who has a cause of complaint shall immediately bring it here to the Halls of Congress and demand a remedy by national legislation.

I repeat, Mr. President, if there is any reason why this bill should be passed, it being a bill that neither relates to the health nor the police powers of Government, then the same argument could be advanced for the inspection of everything which comes from the farm, everything which comes from the mine, and everything which comes from the doors of the factories of this country, because we will have entered into a new field, into the field of commerce and trade; we are no longer in the domain of morals or of health.

Mr. President, I want to call the attention of the Senate to just what this bill undertakes to do. It is an extremely radical measure. It is a measure which, if understood by the Senate, will, in my judgment, not be passed.

In the first place, Mr. President, this bill gives the Secretary of Agriculture broader powers than have ever been conferred upon any governmental official to my knowledge.

First. The Secretary of Agriculture is authorized to hire an unlimited number of men.

Second. He is authorized to pay unlimited salaries. It is true, there is a clause which states the salaries shall be consistent with the salaries usually paid for similar work, but that constitutes no legal limitation or bar upon his powers.

Third. The fees that he shall charge for his services are limited only by the statement that they shall simply be sufficient to defray the expense of inspection.

Fourth. He is authorized to fix an unlimited number of points of inspection.

Mr. President, these are very broad powers, and very improper powers, and very dangerous powers to grant to any one man. Of course what I say is no reflection upon the present occupant of the position of Secretary of Agriculture. This law is not intended to apply to him. It is intended to apply to the office and to any man who may occupy it. But whether wise men or foolish men shall hereafter fill the office, the fact nevertheless remains that Congress should not grant to any man the right to employ an unlimited number of men at an unlimited number of places and at unlimited salaries. The author of this bill can not point to a real limitation with respect to any of the powers I have mentioned.

Mr. President, this bill prohibits the shipment of any grain from one State to another unless that grain has been inspected.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER (Mr. McLEAN in the chair). Does the Senator from Missouri yield to the Senator from Nebraska?

Mr. REED. Certainly.

Mr. HITCHCOCK. Before the Senator leaves the part of the discussion he was just engaged in, I should like to ask whether he has made any computation or whether he knows of any computation showing the number of grain inspectors that would be necessary if this bill should become a law?

Mr. REED. I have not made a computation of that.

Mr. McCUMBER. Mr. President——

Mr. REED. It is impossible, I think, for any human being to make an accurate computation, for the reason that as the bill is drawn, while it names certain points where there must be inspection, it also leaves it within the power of the Secretary of Agriculture to establish any other points he may see fit. I was about to say that the bill, as I construe it, requires the inspection of every bushel of grain that is shipped across a State line.

I can, in partial reply to the interrogatory of the Senator from Nebraska, say that the estimate of the man charged by the Secretary of Agriculture with the duty of fixing grades is that Federal inspection will cost $1 a car, which is about two and a half times what inspection now costs.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. I yield.

Mr. McCUMBER. I wish to answer the question which the Senator from Missouri said he was unable to answer. The Secretary of Agriculture a few years ago made an estimate—and, of course, he made it upon the probable number of inspectors that are now required at these grain centers—and his estimate was something even above the number that were employed at that time. He gave 650 as the limit of the number that would be required; that is, about the same number now employed at the several exchanges at these points. While the Senator from Missouri says that the bill authorizes the Secretary to establish other places, that is simply other places that may grow into importance, and the bill uses the words "important centers of interstate grain traffic." Of course, the Secretary would not appoint additional inspectors unless there were such important points developed.

Mr. REED. No, Mr. President; the bill goes further than that.

Mr. McCUMBER. I want to suggest, further, that the Secretary of Agriculture has estimated that the cost of inspection would be about 40 cents a carload.

Mr. REED. I have a different estimate, and I shall produce it in a moment.

The bill which the Senator from North Dakota has drawn here goes beyond the mere inspection of interstate grain, and proposes to establish a system by which intrastate shipments shall also be inspected. There is, in my judgment, no human being capable of making even a reasonable guess as to the extent to which this system may be enlarged.

Mr. SMITH of Michigan. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Hitchcock	Norris	Smith, Ariz.
Brady	Hollis	O'Gorman	Smith, Ga.
Brandegee	Johnson	Overman	Smith, Md.
Bristow	Kern	Owen	Smith, S. C.
Bryan	Lane	Page	Smoot
Burton	Lea, Tenn.	Perkins	Thomas
Catron	Lee, Md.	Pittman	Thompson

Mr. WALSH. I announce the absence of my colleague [Mr. MYERS] on account of illness. I am pleased to say that he is recovering very satisfactorily.

Mr. REED. Mr. President, I desire to say that my colleague [Mr. STONE] is detained from the Senate by official business.

The PRESIDING OFFICER. Fifty-four Senators have answered to the roll call. There is a quorum of the Senate present.

Mr. REED. I was about to say, Mr. President, when interrupted by the call for a quorum, that the bill prohibits the shipment of grain from one State to another in the absence of inspection. I undertake to say, sir, that under this bill a farmer living in the State of Missouri can not buy a load of corn in the State of Kansas, haul it 2 miles across the State line, and feed it to his hogs without laying himself liable to the pains and penalties of the proposed statute; I undertake to say that a farmer living in the State of Ohio, if there are no places established for inspection other than those named in the bill, desiring to buy corn in the State of Indiana, just across the State line, would be obliged to have that corn sent to Philadelphia and have it there inspected and shipped back to him. I undertake to say that this bill calls for the inspection of ten times the amount of grain inspected under the present system, of ten times more grain than goes at present to the terminal markets. Over 90 per cent of the grain of the country is consumed in the United States. The greater part of it never reaches a terminal market; nevertheless vast quantities of it are shipped across State lines. As I construe the bill, it will compel all of the grain that is shipped from one State to another to be sent to a terminal market, possibly hundreds of miles away, then shipped back. All that burden of transportation will fall upon the consumer. Not only would the cost fall upon the consumer, but there is no adequate advantage to be gained by the inspection of the greater part of the grain used in domestic consumption.

The farmer, Mr. President, in the State of Illinois finding himself short of corn to feed his hogs or cattle, who goes to his neighbor across the State line and buys a few hundred bushels of corn, does not care to have it inspected by a civil-service employee or by anyone else. He uses his own eyes and his own judgment.

Let us see, now, if I am correct in this construction of the bill. It is conceded that, as the bill was originally drawn by a committee which has had it under consideration for at least six years, it required the inspection of all grain crossing a State line. But it is claimed that certain amendments have been proposed, although not yet adopted, if I understand the state of the record, that will limit the operation of the bill to those grains which do in fact reach some one of the terminal markets. I undertake to say, however, that if this bill is passed as now written, including the amendments to which I have just adverted, non obstante the amendments, it will still remain true that you can not transport a bushel of corn or of wheat

or of oats or of barley across a State line unless it has gone to a terminal market and has there been inspected. I challenge attention to the language contained in section 2. That section reads:

SEC. 2. That said Secretary shall also appoint, in accordance with the rules of the civil service, at each of the following cities, to wit, Portland, Me.; Boston; New York; Philadelphia; Baltimore; Chicago; Minneapolis; Duluth; Superior; Kansas City, Mo.; St. Louis; New Orleans; Seattle; Tacoma; and San Francisco; and at such other important centers of interstate trade and commerce in grain as he may consider necessary or proper for carrying out the provisions of this act, one chief grain inspector and such assistants as may be required to inspect and grade grains as herein provided.

Then follows a provision with reference to intrastate shipments or business. I now turn to section 8, which reads:

SEC. 8. That it shall be the duty of any railroad company, steamship company, or other firm or corporation or private individual engaged in the transportation of grain destined to any State, Territory, or country other than that in which it is received for inspection, or received from any other State, Territory, or country than that to which it is consigned, to notify the chief grain inspector at the place of destination of any consignment of grain, where an inspector is located at such place—

The words "where an inspector is located at such place" constitute the much-talked-of amendment—

within 24 hours after its arrival, that a shipment, cargo, or load of grain is in its, their, or his hands and the place of destination of said grain.

That it shall be unlawful for any person herein named—

That is, any corporation, firm, or private individual—

to willfully unload or otherwise discharge any load, cargo, or consignment of grain which has been at any time during the period of its transit an article of interstate commerce and which has not been inspected in accordance with the provisions of this act, until the same has been inspected as provided herein.

Now, Mr. President, you will observe that the language of the bill is that it shall be the duty of any corporation or private individual—

engaged in the transportation of grain destined to any State, Territory, or country other than that in which it is received for inspection, or received from any other State, Territory, or country than that to which it is consigned—

To do what?—

to notify the chief grain inspector—

Where?—

at the place of destination of any consignment of grain, where an inspector is located at such place—

If the bill stopped at that point, there might be a doubt as to the meaning, but when we go to the next clause we find the general language—

That it shall be unlawful for any person herein named—

That is, any private individual or any firm or any railroad—

to willfully unload or otherwise discharge any load, cargo, or consignment of grain which has been at any time during the period of its transit an article of interstate commerce and which has not been inspected in accordance with the provisions of this act.

Mr. President, remembering that Federal courts extend their authority to the limit, remembering also that the proposed statute will be regarded as a remedial statute, and not as one to be construed strictissimi juris, we are forced to conclude that if we pass this bill as it is written, the Federal courts in all probability will hold this clause—

That it shall be unlawful for any person herein named to willfully unload or otherwise discharge any load, cargo, or consignment of grain which has been at any time during the period of its transit an article of interstate commerce, and which has not been inspected in accordance with the provisions of this act—

as sufficiently broad in its language to embrace all shipments across a State line. The courts are very likely to hold that the general clause controls and that the other provisions of the bill must be regarded as subsidiary to it.

I would undertake as a district attorney of the United States to convict under this bill any man who transported corn across a State line for sale. The amendment which has been introduced here does not at all meet the case; it does not accomplish the objects which the Senator who is fathering this bill intended it should accomplish.

Permit me at this point to summarize. We have here a bill which declares:

First, that all grain shipped across a State line must be inspected;

Second, the Secretary of Agriculture is granted unlimited power to fix the number of places where grain shall be inspected;

Third, the bill gives him the right to employ an unlimited number of men;

Fourth, it gives him substantially the unlimited power to determine the grades and the character of inspection;

Fifth, it gives him the unlimited power to fix the salaries of the employees; and

Sixth, it gives him the power to fix a charge for inspection which is limited only by the amount of cost which he may incur in the inspection.

Mr. WEST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Georgia?

Mr. REED. Certainly.

Mr. WEST. For the purpose of transit, if a train is going across the corner of a State in a section where there might not be any place for inspection, would that train have to stop there in order that the grain it carried might be inspected?

Mr. REED. Under this bill it would have to go on to a point of inspection and there be inspected before it could be unloaded at the point of consumption.

Mr. President, think of the situation we would be in. Suppose there were no points selected except those named in this bill and that the construction I have given to the bill is accurate—and that it is accurate I feel absolutely convinced—we would have an inspection point at Portland, Me., another at Boston, another at New York, another at Philadelphia, and another at Baltimore, these places all being upon or near the eastern coast. There would be no other place of inspection until we reach Chicago, 900 miles farther west. We jump then to Minneapolis and Duluth and Superior, all located far to the north. In the great interior Kansas City and St. Louis and New Orleans are named. There is not another point of inspection named until we get west of the Sierra Nevada Mountains. If, then, a man in Oklahoma wanted to buy grain from a man in New Mexico, he would have to ship that grain to Kansas City, four or five hundred miles, and haul it back to Oklahoma. If a man in New Mexico wanted to buy from a man in Arkansas, he would be compelled to have the grain shipped to Kansas City, hundreds of miles, then inspected and hauled back to his own State. If he did otherwise, he would violate this law and lay himself liable to a fine of $5,000. That is the absurd condition in which it is admitted that this bill was when it was introduced, and the amendment which is proposed does not, in my opinion, avoid the difficulty.

It was said here by the Senator who is the author of the bill—indeed, it has been said several times to Senators who have ventured to ask questions—that they are not acquainted with the grain business. I submit that the bill fails to disclose any great familiarity with the grain business by the committee.

Mr. President, before we pass a bill of this kind we ought to give it careful consideration. Mark you, the commonest thing in this life, when we find some evil has grown up under a system, is, keeping our eyes upon the evil alone and thinking of none of the virtues, to proceed to demolish the whole system. Then we start to build an entirely new structure, forgetful of the fact that the new may embrace more evils than the old. There is a class of philosophers in this world who, if they found the plumbing in their house out of order, would want to dynamite the house. There are certain gentlemen who, if they found that a prisoner had cut his way through the bars of a cell in a jail, would want to burn down the jail instead of fixing that cell.

There is a class of people, very numerous just now, who, finding that some evil exists under a State regulation or a State law, immediately propose to destroy the State authority and take over all of the business into the hands of the Federal Government. These assume that Federal agents are gifted with infallibility, and that if the agents pass a civil-service examination the reign of righteousness and virtue and goodness is certain.

My experience, sir, has been that, almost without exception, that government is best which is closest to the people directly affected and that government is worst which is farthest from the people directly affected. The reason is that when local communities possess the power to regulate their own affairs the moment an oppressive or bad condition exists the effect is immediately felt by those responsible for the state of affairs. As soon, therefore, as they feel the effects they begin to set about to find a remedy. But when the seat of authority is far off it is impossible to rectify an evil unless it becomes so widespread as to provoke a general revolt. Therefore, I lay it down as a fundamental proposition that, so far as the inspection of grain is concerned, local boards created by State authority are better qualified for the business than is a general board created by Federal authority.

I want to impress, if I can, upon the few Senators who do me the honor of listening the important consideration that the mere fact that some evils may exist under our present system affords no reason whatever for the destruction of the system and the establishment of a Federal scheme. The question to be deter-

mined is whether Federal inspection is better than State inspection, or will be if improved so far as it can reasonably be improved.

Mr. President, I call the attention of the Senate to the peculiar fact that the report in favor of this bill is six years old; that the hearings upon this bill were concluded six years ago; that since that time there has not been a bit of evidence taken in this case, except that two years ago some men came and demanded the right to be heard. When that demand was made they were treated in a manner so discourteous and so unfair that I blushed as I read the record.

The circumstances were these: This bill was before a committee, and a report was written attacking the entire grain trade and all inspection boards. That old, original report appears here to-day, six years old, without a single addendum to it, so far as I have been able to discover. At a subsequent session of Congress—in the Sixty-first Congress—there was an appearance by some men interested upon the other side of the bill, and the bill passed over without being reported. At the Sixty-second or Sixty-third Congress the bill was again reported. About this time the newspapers printed what was claimed to be the report of the committee, and thereupon some men prominently engaged in the grain business asked for a hearing upon the ground that they had been libeled in the report. The Senator from North Dakota strenuously objected to reopening the case, and the committee replied that they had not made any such report; that they had written a little, short, innocent report of about 20 lines.

So these men were denied a hearing, except upon one or two subjects which were alleged to be new matter. Then, after that had transpired, at this session of Congress the old, original report, which was repudiated two years ago, when the protesting gentlemen were here, was taken out of the pigeonhole, the dust blown off it, and it is filed here to-day.

I say that for six long years the men interested in this business have not been given an opportunity to appear before a committee of Congress and have a real hearing upon the bill. Since the hearings were had, six years ago, there have been important modifications and changes in business, and since that time the Federal Government has taken some most important steps to which I shall call attention a little later on.

It is a singular thing that a bill embracing the important matters which are gathered within the sweep of this measure should be brought before Congress on hearings six years old.

Mr. President, I make bold to say that the report upon which this bill is brought to the Senate is mistaken in every material fact that it alleges; that it is prejudiced; that it is partisan; that it is unjust; and I undertake to prove my assertions.

I am going to take a little time to go through the report; and if I can continue to get the attention of even the half dozen Senators who are paying attention now I shall hope, at least, to put a litle seed in ground that will bear fruit when we come to the vote.

I start with page 1 of the report:

> The producer, for the most part, is without any voice in determining the rules or regulations governing the handling or grading of his grain, the price of which is fixed by such grading, and helpless to reform or eliminate the many abuses which have entered into the system of handling and grading grain at these great terminals, and which operate as a fraud and injustice upon both the producer and consumer.

A little later on the report states:

> These evils, which have been established by both the positive evidence of witnesses and the record admissions of the boards of trade and State warehouse commissions, which for the most part govern the commerce in grain, may be epitomized as follows.

Then follows language to which I shall refer in a moment. I read now paragraph 2:

> (2) Practically all grain passes through one or more great terminal markets before reaching the consumer.

Not 20 per cent of it passes through the great terminal markets.

The report continues:

> Its value is fixed by the grade that is placed upon it at such terminals.

Now, listen:

> Under the present system, whether under State laws or board of trade rules, the parties in interest as purchasers at the great terminals dominate and control all rules governing the handling of grain, its inspection, and grading. That such rules should be in the interest of the terminal purchasers under such a system is not surprising.
>
> (3) The appointment of inspectors and the fixing of grades are under the control of the boards of trade.

Listen:

> The appointment of inspectors and the fixing of grades are under the control of the boards of trade. The relation between the inspection and grading power and the purchasing interest is most close and intimate.
>
> (4) Appeals from the decision of inspectors are almost invariably taken to a board of appeals composed of persons who are either directly or indirectly interested in the purchase of grain from the inspection of which the appeal is taken.
>
> (5) That the inspection and grading departments at these great terminals are subservient to and dominated by the great elevator interests is established beyond question.

In a word, this report baldly and nakedly charges that practically without exception the purchasers of grain at great terminals dominate the inspection, appoint the inspectors, fix the grades, and fix them in their own interest. I utterly deny this general statement.

Mr. President, there are two methods of inspection in this country. One is the board of trade inspection, where the inspectors are selected by boards of trade, and the members of boards of trade are grain dealers. In addition to inspection by boards of trade, there is State inspection in the following States: Missouri, Minnesota, Iowa, Illinois, Indiana, Kansas, and Ohio. The State grain inspector, by whatever title he may happen to be known in these respective Commonwealths, is a State officer, appointed by authority of all the people of the State, and not appointed by boards of trade. He names every assistant he has, not by virtue of the let or hindrance of a board of trade or of any grain dealer, but upon his own initiative and under his own oath of office. When, therefore, a report indulges in the extravagant and reckless statements contained in the paragraphs I have read, it ought at once to cease to have the regard of careful men.

In my State we have a State grain inspector who appoints his own deputies, establishes his own office, fixes his own grades, and is under oath that neither he nor any of his inspectors shall be directly or indirectly interested in the grain business. The same thing, in substance, is true of all the other States I have named. I repeat, that when the statement is made in this report to the effect that all of the people engaged in inspection are under the dominance and control of men engaged in the grain business, omitting all consideration of or reference to the fact that in the greatest grain-producing States in the world, embracing the greatest markets in the world, there is State grain inspection, is most astonishing.

Why, Mr. President, a State grain inspector who would do the things that are charged in this report would, first of all, be guilty of a crime, and secondly, he would be incontinently kicked from office. Why? Because whenever he passed as No. 1 a cargo of grain which was in fact No. 2 the man who had purchased No. 1 and received No. 2 would immediately appeal to the superior authorities of the State, demand an investigation, and bring to book the guilty inspector. To deny that is to deny the ordinary course of human events. The statement, therefore, is untrue—of course, unintentionally untrue; but, nevertheless, untrue. It has not a leg to stand upon, so far as State inspection is concerned.

Then follows the statement that in case of appeal, the appeal goes before interested parties. In case of appeal in these States that have State grain inspection it does not go to interested parties. It goes from the inspector to the chief grain inspector. It goes from the employees of the inspection department up to the head of the inspection department, a sworn officer of the law, elected in my State by the popular vote of the people.

Turning to board of trade inspections. I do not think board of trade inspections are anything near so desirable as inspections by the State. Nevertheless, a moment's consideration and reflection will lead any candid man to the conclusion that a statement such as I have made here—

> That the inspection and grading departments at these great terminals are subservient to and dominated by the great elevator interests is established beyond question—

can be true.

Let us look at the matter for a moment. We have heard much about the farmer and how the farmer is gouged by this inspection. Mr. President, the farmer has nothing to do with this case. He is like "the flowers that bloom in the spring." Not 5 per cent of the grain that reaches these great grain centers is, when it reaches there, the grain of the farmer. What farmer in your community, sir—unless he is one of these senatorial farmers who owns 9,000 acres of land and farms it from the floor of the United States Senate—what farmer is there, what ordinary farmer, who sends his grain in his own cars to Chicago or Kansas City or Minneapolis or Indianapolis?

There is the occasional farmer, possibly, who does so, but 90 per cent of all grain sold is sold at the railroad station to somebody who has an elevator. When the grain reaches the market it is the grain of the elevator man. Now, who is he? He is not a weak, helpless farmer, one of the oppressed and downtrodden of the earth, needing the protection of all legislative bodies. He is a shrewd, keen, sharp grain dealer, with plenty of capital. He handles thousands and hundreds of thousands and in some instances millions of bushels a year. Very frequently elevators

are owned by corporations, and often one corporation will own a large number of elevators, stretching along hundreds of miles of railway and located in different States. They buy the grain from the farmer, and they buy it upon sight and upon their own judgment as to its value, and upon the farmer's willingness to sell at that price.

When the grain comes to Chicago, or when it comes to Kansas City, or when it goes to one of these cities where there is board-of-trade inspection, let us see what happens. If the farmer should follow the grain there himself—which would be a very rare occurrence—he would insist on seeing it inspected, and if it was dishonestly inspected he would not deliver the grain. That, however, is not the way the business is ordinarily done.

The business is ordinarily done in this wise: The owner of an elevator has upon the board of trade a commission man or member, who acts as his agent or factor. He ships in grain to that agent or factor, and it is the business of that agent or factor to do for him the best he can possibly do. What is the result? The agent could not keep the business of the elevator man if he did not deal fairly by him and did not protect his interests any more than a dealer at the stockyards could keep the business of the ranchman if he did not deal fairly by him; any more than the lawyer could keep the business of his client if he did not represent him fairly. Accordingly, it is to the interest of this board of trade member to get as good a bargain as he possibly can for his customer who owns the elevator, or even for the individual farmer, who, in rare and spasmodic instances, may ship his own grain. Therefore the seller of grain has upon the market his advocate, his champion, his agent, his factor, his man.

Then what happens? Another man is a consumer. He wants a thousand bushels of wheat. He writes to some man upon the board of trade to buy it for him, and that man gets a commission for buying it for him. If he does not buy it for him on the right terms and protect him, he loses the custom of that consumer. Accordingly, that board of trade man is interested in opposition to the first man of whom I have been speaking. He is interested on the other side of the trade. It is to his interest to protect his customer and get the grain graded as low as possible. The man who represents the "shipper in" is impelled toward the idea of getting as high a grade as possible. The man who represents the "shipper out" is interested in getting as low a grade as possible. Thus, you have now two board of trade men arrayed upon either side of the same proposition, and between these two are inspectors appointed by the board of trade to inspect all grain that comes in.

How long would a board of trade last, how long would men continue to be members of it, if these inspectors, appointed to do justice and to fix a proper grade and standard, were to fix an improper and an unjust grade or standard?

Why, if the grade were fixed too low for the man who received the grain from the elevator, he, as a member of the board, would immediately object, and he would continue to object and fight for his rights, because his commercial life depends upon the success of his fight. On the other hand, the man who represents the consumer in that transaction, if the grain were graded higher than it ought to be, if his customer were to be thereby injured, would fight for a proper grade because of loyalty to his customer and because of loyalty to himself, desiring, as he would, to retain the trade and business of his client.

So when it is stated that these boards of trade inspectors represent one side of all deals it is manifest that the declaration is a mistake. The inspectors can not represent one side in a deal. They must stand in an impartial position.

I am not saying that there may not have been a dishonest trick turned here or there. I am not saying that there may not have been dishonest men upon the boards of trade and dishonest inspectors. But there was a dishonest man among the twelve disciples, and there will be dishonest men among Federal inspectors.

So, Mr. President, the fundamental fallacy of this report is the assumption that there is no such thing as honest State inspection or honest board-of-trade inspection.

The report is full of errors of fact. The very first thing in this report, the sweet morsel that has been rolled under the tongue of this committee, and that has dropped like honey dew from the lips of the distinguished Senator who so valiantly champions the bill, are some resolutions passed at Salina, Kans., seven years ago. It seems to have been the particular bit of evidence that exactly suited the committee, and therefore, like the poor, we have it always with us. I read:

These evils, which have been established by both the positive evidence of witnesses and the record admissions of the boards of trade and State warehouse commissions, which for the most part govern the commerce in grain, may be epitomized as follows:

(1) Lack of uniformity in the grading of grain at the various terminal markets. A resolution adopted at Salina, Kans., January 15, 1907—

Why did we not go back to 1807 for a resolution at Salina, Kans., or at Plymouth Rock—

by independent grain dealers succinctly presents the injustices resulting from this evil. The portion referred to reads as follows:

Quoting:

Too much can not be said and done in favor of a national inspection law. We have no uniform inspection of grain and cotton, the principal farm products, which are so largely dealt in and which are of such great importance to both the producer and consumer. A shipper of grain can not send a car of wheat from one point to another with any degree of security at the present time, take all the precaution he may. A shipper at some point in Kansas may have a car of grain inspected by the Missouri State grain-inspection department as No. 3; the same car of grain may be forwarded to Illinois, and there inspected as No. 4; and from Illinois it may be sent to New Orleans, and there inspected as "no grade"; discounted from place to place anywhere from 1 to 15 cents per bushel, until it falls into the hands of the trust exporter, when it is again inspected as No. 2 and sold for No. 2 at No. 2 price, the difference falling into the hands of the trust instead of the farmer and producer.

I undertake to say that there is not in this record the testimony of a single witness bearing out generalization of these unknown gentlemen who seven years ago met out at Salina, Kans., and who called themselves "the independent grain dealers." That leads me to remark that a little further on I will try and show who some of these distinguished witnesses are.

But I call the attention of the Senator who is the author of this bill to the fact that last January the grain dealers of Kansas distinctly condemned his proposed Federal inspection law. That circumstance probably accounts for the fact that the author of this report preferred a resolution 7 years old to one 4 months old. I have not seen the original resolution, but it is so reported in the press. The Senator from Oklahoma [Mr. GORE] suggests to me "that the resolution may improve with age." Mr. President, the doctrine of improvement with age does not apply in this case. We are dealing with a dry subject. [Laughter.]

I have here a letter written by the State grain inspector of the State of Missouri, Mr. James T. Bradshaw. He was elected by the people at large in the State. He has had some 10 years' experience in the grain-inspection department. He has had occasion to follow and keep track of these questions. Mr. Bradshaw states:

The very first statement in the committee's report is misleading, quoting a resolution adopted by grain dealers at Salina, Kans., January 15, 1907, in favor of national inspection of grain, and leaving the inference that the grain dealers generally of Kansas were in favor of Federal inspection of grain, and hence would favor the bill under consideration.

The fact is that the grain dealers generally of that State are opposed to Federal inspection, and the Kansas Grain Dealers' Association, composed of grain dealers of every part of that State, at a meeting in January of this year, adopted resolutions strongly opposing Federal inspection of grain. So much for that part of the Senate committee's report favoring the bill.

And yet the repudiated resolution of seven years ago was not only made a part of the report, but was dwelt upon in the very forceful speech of the Senator from North Dakota.

Upon that point I desire to submit the statement of Mr. F. G. Crowell, who is to-day the best grain expert there is in the Central West. He makes this statement:

The report of this committee is evidently based on conditions claimed to exist six or seven years ago, and shows a lamentable lack of knowledge as to conditions existing to-day. In providing for the fixing of standards and classification of grain it ignores the fact that the honorable Secretary of Agriculture has, through the bureaus of the department, already established uniform standards for corn grading, effective July 1, 1914, and the Department of Agriculture is now investigating the proper standards to establish for other cereals. When the work of this department is completed, a uniform standard for all grain will have been established, and the only question open for discussion or legislation is the question as to whether the necessity exists for the United States Government to pass any legislation to enforce these standards.

At page 5347 of the RECORD he quotes the St. Louis Merchants' Exchange as being in favor of his bill. This is the quotation:

That the Merchants' Exchange of St. Louis favors the enactment by the United States Congress of such laws as will place the inspection and weighing of grain under Federal control, under such conditions as will insure (1) uniformity of grading, so far as practicable; (2) the preservation of the individuality and the interests of the various markets which have been built up by their own efforts; (3) a square deal to all concerned.

That is quoted as favoring this Federal inspection bill now before Congress.

Mr. President, I do not know what the telegram was which the Senator received, but I am in receipt of a telegram which is in hæc verba the same as the Senator read into the RECORD and which I have just read, but it contains this addititonal

statement, beginning just where the Senator left off in his reading:

On February 25, 1914, on instructions of the board of directors, I wrote you and Senator STONE asking you to oppose the McCumber bill, as we were in favor of Federal supervision of grain, the later action of the board being in line with the recommendation of the Grain Dealers' National Association.

Mr. President, that puts a different face on the matter—"Federal supervision" as opposed to "Federal inspection." The Department of Agriculture has already undertaken, in a measure, Federal supervision; that is to say, the establishment of grades and the securing by the various boards of trade and State grain boards of the adoption of those grades. That is Federal supervision, but it is a very different thing from ousting those who now make the inspection and putting in a lot of Government employees to take their place.

So in so far as the indorsement of the Merchants' Exchange of St. Louis is concerned, instead of being an indorsement it was a condemnation of this bill. Instead of favoring the bill they opposed it; and I presume since the Senate put this witness upon the stand and brought in this resolution and urged it as a reason why we should pass his bill he must admit that the opinion of the Merchants' Exchange is of some virtue and force, and therefore he can scarcely be heard to deny that it is opposition to his bill which ought to be harkened to.

The Senator quoted another authority in his speech. He read from the testimony of one Mr. Beall. The quotation will be found in the RECORD at page 4910.

I want now to give a little of the testimony of Mr. Beall, of Kansas City, Kans. I asked the Senator from Kansas if he knew Mr. Beall, and the Senator spoke very highly of the gentleman and of his truthfulness; and, so far as I know, he is telling the truth here. I want the Senator from Illinois to listen to his statement:

Mr. BEALL—

Quoting:

"In connection with the statement that the last witness has just made in reference to the efforts of the farmers to establish their own commission house, I want to say that the farmers of the State of Kansas in 1905 organized a grain company to be located at Kansas City for the purpose of handling their grain."

I want the Senator to listen carefully, because this will answer his statement that the States are always able to bring about exact justice and see that the people of the country get justice at their hands.

Quoting again from the witness:

For the benefit of the Senator from Kansas, I will say that these gentlemen were composed of such men as W. T. Harris, of Solomon, president of the Citizens' State Bank there; S. H. McCullough, a large farmer; E. M. Black, down at Preston; and a number of other good men throughout the State. They organized this company and started doing business.

Senator LONG. What was the name of the company?

Mr. BEALL. The National Grain & Elevator Co. They started doing business in Kansas City, Mo. The Kansas City Board of Trade immediately passed a rule prohibiting its members from trading with this company in any manner whatever, the penalty for doing so being expulsion from their board and the loss of something like $3,000 or $4,000 as the price of a membership. So that the farmers in Kansas shipped altogether to this company in Kansas City, Mo., about half a million bushels of grain, which they were compelled to forward on a declining market to other points for sale, at a loss of something like $15,000. The National Grain & Elevator Co. are now suing the Kansas City (Mo.) Board of Trade under the antitrust law of that State for three times the loss they sustained, or about $45,000.

That testimony is seven years old. But who is this Mr. Beall, whose testimony is thought to be so important as to bring it in here to the Senate and on it ask us to pass a law that will affect the entire course of trade as to all the cereals of the United States produced upon our vast acreage by all our farmers? Who is he? Here is a telegram, dated March 18, in response to an inquiry as to who Mr. Beall is:

Suspended May, 1905—

Just about the time he gave this testimony, or shortly prior thereto—

for violating rules—

That is, suspended from the board of trade for violating the rules of the board of trade—

by refusing to comply with an arbitrary decision. His membership subsequently sold. Proceeds used toward settling debts. He sued board for damages. Never pushed trial. Was associated with Christee on Kansas side. Was at one time found guilty, and admitted plugging 18 cars wheat at Diamond elevator.

That comes from a responsible man.

Mr. President, of course the committee and, of course, the Senator from North Dakota, when they quoted this man's testimony and relied upon it, did so in the best of good faith; but the vice that springs always from taking the unsupported statement of one man, without ascertaining who he is or what the motives which impel him or the objects which inspire him, is herein well illustrated.

Here was a man who refused to comply with the board of trade rules; here was a man who started a rebellion, who after he was ousted from the Kansas City Board of Trade undertook to start an organization in Kansas of an irregular character; and that man is brought before a committee of Congress and his testimony listened to and accepted as a verity. Instead of ascertaining the general condition, instead of ascertaining not what one man might say but what many would say, instead of finding out the regular and general course of trade and business, we are confronted with the statement of one man, whose mind was poisoned by rancor, hatred, and malice, whose motive was revenge, and who had admitted the charge that he had plugged 18 cars of wheat.

Mr. President, I want now, having, I trust, stripped this structure of these incompetent and rotten props, to consider some other statements contained in the report. I am sorry to say that in many other respects the report appears to be mistaken as to its deductions, its conclusions, and its facts. I have just read the statement that grain would be started in Kansas as No. 2, and get to Missouri and be graded No. 3, and get to Chicago and be graded No. 4, and get to New Orleans and be graded nothing, and get into the hands of the trust shipper, whoever he may be. I take it he is a bit of legislative imagination; I know of no such individual; but when it gets into his hands, this report states, it goes back to No. 2. In the meanwhile everybody along the line has been swindled. This report says or it leaves the inference that the farmer is the man who has been swindled; but, ah, that will not bear analysis for a minute; and why? Did the farmer own this grain and have it graded as No. 2 in Kansas? Did he then haul it to Kansas City and have it graded as No. 3, still owning it? Did he then haul it on down to Chicago and have it graded as No. 4, still owning it? Did he then haul it down to New Orleans and have it graded as nothing, still owning it, and then did this poor, unfortunate farmer sell it to the trust dealer, whoever he may be, and that gentleman run it up to No. 2 grade? Did that happen? If such an instance as that ever happened that grain had passed out of the farmer's hands at the elevator, upon the sidetrack, of his own home country; or if he did not sell it there, he at least sold it when it got to Kansas City.

Now, when it got to Kansas City it got into the hands of a grain dealer. Would that dealer at Kansas City, abundantly able to take care of himself, submit to having his grain that was No. 2 grain marked down to No. 3 in Chicago? Do you not think the Kansas City man would have been in Chicago the next morning asking why he had been plundered? Why, sir, that Kansas City grain man would have emitted a western war whoop that would have made the vessels bob up and down on Lake Michigan. Again, do you suppose that your Chicago man, having purchased that grain as No. 3, and sending it on down to New Orleans, would submit to have his No. 3 wheat, which was in fact No. 2 wheat, graded "no grade," and that he would quietly sit down, supinely fold his hands, while he was being robbed? Everybody knows the man from the "Breezy City" would take the first train for New Orleans, armed with a meat ax, and accompanied by his lawyer.

You are not dealing, I say to Senators, with helpless farmers. This bill deals with men who are engaged in handling grain; it deals with men capable of taking care of themselves. This talk about the innocent farmer having his grain graded five or six times is moonshine. Salina, Kans., seven years ago put something silly of that kind, by way of illustration, into a resolution, which probably was not considered by anybody, but the resolution does not establish the fact. That repudiated resolution, dusty with age and rotten with untruthfulness, we are now asked to make the basis of legislation that will affect the entire country.

Here is what Mr. Frank G. Crowell, one of the most honorable men in my State, whose name is a synonym for integrity, who is a grain expert of the highest order, has to say:

We do not think there is a case on record where barring untoward conditions, such as damage to grain in transit in such manner that the grain may have been exposed to the elements, etc., a car of wheat justifying a grade of No. 2 in the State of Kansas, has shown a lower grade in the State of Missouri, a still lower grade in the State of Illinois, and in New Orleans has been graded as "No grade." The inference intended to be drawn is that a car of wheat grading No. 2 at point of origin, and without suffering any deterioration in transit, can be graded under the present system "No grade" at destination. With the establishment of the uniform grades in the various market centers that now exist, and the adoption of the standards as fixed by the Department of Agriculture, the statement made in paragraph 1 of the report of this committee is simply a figment of the imagination and can not be supported by the facts.

You do not need to read that statement to know that the Palma resolution can not be supported by the facts. You might as well say that a man selling woolen goods from a factory in the State of Massachusetts would, if the purchaser in the State of Missouri declared that the goods were bad, accept the statement of the purchaser and settle in accordance with his de-

mands. The Massachusetts man, being a man of common sense and business acumen, would insist upon his rights, and the owner of a cargo of grain is not going to submit to robbery in that way. It is true if an individual farmer shipped one wagon-load of grain he would have to submit, because there would not be enough involved to pay him to make a contest, but he would never ship again to that market, and no market dare maintain conditions of that kind.

But, I repeat, it is not the individual farmer with whom we are dealing. We are largely dealing with corporations that own big elevators and possess abundant capital. They are in the business for money; and you might just as well try to rob one of those gentlemen as to rob a Yankee in a trade of jackknives.

Mr. MARTINE of New Jersey. I should like to inquire, Mr. President, just where the line is drawn which differentiates the Yankee from the other classes of our countrymen?

Mr. REED. Well, I do not know, Mr. President. It is a general term. I once heard of an old Hebrew, a very good and kindly disposed old gentleman, who had made his fortune in trading out in Chicago. When his son got to be 21 years of age, in accordance with the good old Hebraic custom, he proposed to start his boy in business. He called him to him and said, "Now, my son, I am going to give you $50,000; but if you stay out here in Chicago among these sharp people they will beat you out of it. I want you to go down into the New England States—that is a pastoral, simple people down there—and engage in business. When you get some business experience, then come back here where the smart people are, and you can trade with them." In about three weeks the boy called the old gentleman up on the long-distance telephone and said, "Father, I want $50 to come home on." [Laughter.] The father said, "My heavens, boy; what has become of that $50,000 I gave you?" The boy replied, "Father, they got it all away from me." The father said, "What, that pastoral people got your money away from you?" The boy replied, "Pastoral people, the devil. This is the 10 lost tribes of Israel." [Laughter.]

Mr. President, I know that I ought not to encumber the RECORD with a story of that kind, but it illustrates the general estimate of the New England people. I am wandering from my subject, and beg pardon for having done so. I come back to this statement of Mr. Crowell's. He says:

Of course, under any system of inspection, whether Federal, State, or board of trade, there will always be a difference of opinion of the various inspectors in applying the fixed standards in grading the car "in" or "out" of a market, but an instance of the kind referred to in paragraph 1 of the report has never occurred and never will occur under the present system of inspection existing in the United States.

And, of course, it can not. While I have already discussed the proposition contained in paragraph 2, I want to put into the RECORD at this point the observations of Mr. Crowell. They are as follows:

The statement made that under State laws or board of trade rules, that parties interested as purchasers at the great terminal markets dominate and control all rules regarding the handling of grain, its inspection, and grading, is a reflection upon the honesty, integrity, and ability of every State inspection department and of every board of trade inspection department and is absolutely untrue and libelous. The price of grain is not dependent solely upon the grade it receives; color, weight, and condition are potent factors, and any daily market report or any market center will show, for instance, that No. 3 wheat of a certain kind and texture has sold at a substantial premium over No. 2. It is not true that the purchasers at the terminal markets dominate and control the rules governing the handling of grain, its inspection, etc. The sellers of grain at the various exchanges, through their representatives, the commission men on the floor, outnumber the purchasers 2 to 1. Their one interest is to see that the highest possible price is at all times obtained for the grain intrusted to them by their principal, and the rules and regulations governing the handling and inspection of the grain absolutely protect the interests of their shippers.

The author of the report charges that the purchasers and their representatives dominate all the terminal markets, as if the terminal markets consist solely of purchasers to the exclusion of all other interests; but this is not a fact, as even the slightest familiarity with the manner in which grain is sold on the grain exchanges would show. The States, through their representatives, see to it that impartiality exists in the grading of grain, both upon the grain shipped into the market and shipped out of the market. The sellers of grain have, therefore, a two-fold protection—their commission man or agent representing them in the selling of their grain, and impartial action of the State and boards of trade inspection departments.

That is in exact consonance with what I said, but is perhaps more tersely and better stated. Mr. President, it has to be so. You can not run dens of robbers in this country and continue to transact a great volume of business, constantly increasing and growing as the years go by.

Now, referring to paragraph 3 of the report, I will read what this gentleman states. Paragraph 3 is as follows:

(3) The appointment of inspectors and the fixing of grades are under the control of the boards of trade. The relation between the inspection and grading power and the purchasing interest is most close and intimate.

I have already commented upon that, but I shall put in at this point the comment of Mr. Crowell. He says:

3. The selling interests, or the representatives of sellers on all boards of trade, have just as close and intimate relation to the grading and handling of the grain as the purchasers. The States in many instances, as at Kansas City, Chicago, Minneapolis, St. Louis, etc., fix the standards and inspect the grain through their official representatives.

And yet here is a report solemnly telling us that one side to all board of trade deals, viz, the buyers, names inspectors, fixes the grades, and thus defrauds all others engaged in the trade, when the fact is that in all the principal markets—that is, in the greatest markets—there is State grain inspection, and in the other markets there is an inspection which from the very nature of things must, in general, be honestly conducted.

The fourth paragraph of this report I have already commented upon; but again I want to put in the statement of Mr. Crowell. The fourth paragraph reads:

(4) Appeals from the decision of inspectors are almost invariably taken to a board of appeals composed of persons who are either directly or indirectly interested in the purchase of grain, from the inspection of which the appeal is taken.

I have already commented upon that, and shown that it is not true; but here is what Mr. Crowell says. Of course, being an honorable member of a board of trade, never having been dismissed, never having "plugged" any cars, his views may not be worthy of consideration; but just putting his statement in here as that of an ordinarily honest man, under the severe handicap of having transacted business so that he has kept out of jail, and the further disadvantage of not having been tried and expelled by his own exchange, I submit his observations, which are as follows:

4. Appeals from the decision of inspectors are not taken to a board of appeals composed of persons who are directly or indirectly interested in the purchase of grain. Investigation will show that on all committees of appeals the representatives of the sellers are fully represented, and in a large number of cases constitute a majority of the appeals committee. It must be borne in mind that every buyer of grain ultimately becomes a seller of grain.

That fact entirely escaped the committee that for six years gave profound study to this bill. The committee also overlooked the fact that every member of a board of trade who buys a thousand bushels of grain is as certain to sell that thousand bushels of grain as he is to live; that, speaking broadly, he has to be on both sides of the market every day of his life; that his business consists of a stream of wheat and corn and rye and oats and barley coming in, which he buys for himself or as the factor of another; and that upon the same day or the next day the stream flows out, the board of trade man in this instance selling for himself or as the factor of the man for whom he bought the day before.

To assert that men so situated could engage in a conspiracy to create a board of appeals that would discriminate against the seller is to assert the absurd, because the conspirators would only be stealing money out of one pocket in order to put it into another pocket, and in the meantime would be engaged in a felony out of which he could not profit a penny. On the contrary, he would only succeed in destroying his own business, his market, and in utterly discrediting himself before the world.

Paragraph 5 of the report reads:

That the inspection and grading departments at these great terminals are subservient to and dominated by the great elevator interests is established beyond question.

It is hardly necessary to refer to that, and I pass on by simply submitting Mr. Crowell's remarks. He says:

(5) The inspection and grading departments of terminal markets are not subservient to and dominated by the great elevator interests. These departments work absolutely independently of any interests represented and their grading is as impartial and as uniform as it is possible to make it. The charge that the great elevator interests dominate the inspection of the State and board of trade departments can not be borne out by the facts, and there is no reason why a State inspector could not be and is not as fair and impartial as a Federal inspector.

Mr. President, I know the grain inspectors of my State. They came, for the most part, from the farms or small towns which are in close touch with the farming communities of the State. They were brought to Kansas City and St. Louis, the two terminal markets of the State, and were trained until they became experts in the grading of grain. They retain their old residences out in the State; they count themselves as still residing in the old home counties. They are in constant antagonism to the demands of the selfish interests, and they have no cause to serve except that of justice. If they should fail to faithfully observe the rules and regulations of the State department they would lose their positions and bring themselves into contempt and disrepute. I am sorry that a report should be filed here containing these aspersions upon thousands of men who honorably perform their appointed tasks.

I come to paragraph 6:

(6) As a result of this domination and control has grown what is known as a system of rigid and easy inspection; that is, rigid inspection into the elevator and easy inspection out.

Again, I say that a moment's consideration will show that that position can not be well taken. The man who buys the grain out of the elevator is as likely to be a board of trade man representing himself or representing some other man as is the man who puts the grain into the elevator. To assume that grain in great quantities can be graded into an elevator "rigidly," thus defrauding the seller, and then be graded out "easily," thus defrauding the purchaser, is to ignore the fact that the purchaser is right in the very market and has an office side by side with the seller and that he is a competent, skillful man. Further, the assumption impugns the integrity of every State grain inspector, to say nothing about unofficial inspectors.

Mr. Crowell, commenting upon paragraph 6 of the report, makes this statement:

Inspections out of any elevator are just as rigid as the inspections in, and many years have passed since a custom has prevailed such as outlined in the report, whereby an elevator could control an easy inspection "out" and a rigid inspection "in."

Mr. President, in that connection I call attention to what the committee claim is a demonstration of this statement. By a table, which is printed on page 3 of the report and which purports to set forth the number of bushels of wheat put into an elevator of certain grades and the number of bushels taken out, they claim to have demonstrated that the grain was graded in lower than it should have been and taken out higher than it should have been. This "demonstration" is dwelt on in the report; it is the Gibraltar of the committee. Here the champions of the bill range themselves. This is their bombproof fortress from which they assert no power can expel them.

What is the fact? The committee overlooked the simplest proposition in the grain business; which is, that grain may grade into an elevator as No. 4 and may actually come out as No. 3 or No. 2 or No. 1, and that the inspection in both instances may be absolutely correct. Why? What makes the grades of wheat? The fact that wheat grades low does not mean that no part of the wheat is good and sound, but it does mean that the good wheat is mixed with dirt, weed seeds, or blighted grains. It may be underweight or have other defects. If the percentage of defective or false materials is large, the grain grades low, although the berry may be as perfect as any that ever grew. All that is necessary to do in order to raise the grade is to remove the defective and false materials, and the residuary is good wheat and entitled to a high grade. Just take a gross illustration: Suppose you take a bushel of absolutely perfect No. 1 red wheat, and mix with that bushel of wheat a bushel of weed seeds. You would then, by measure, have 2 bushels; but would you expect anybody in the world to grade those 2 bushels as No. 1 wheat? Such a ruling would compel the purchasers to pay the price of No. 1 wheat for a bushel of weed seed.

Mr. SMITH of Georgia. Will the Senator allow me to interrupt him?

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Missouri yield to the Senator from Georgia?

Mr. REED. Certainly.

Mr. SMITH of Georgia. Do they reduce the quantity as they raise the grade?

Mr. REED. Certainly.

Mr. SMITH of Georgia. They raise the grade and reduce the quantity by cleaning out the chaff. That is the Senator's argument?

Mr. REED. The chaff and other material.

Mr. SMITH of Georgia. And other objectionable material?

Mr. REED. Sometimes they do not even have to appreciably reduce the quantity; I shall come to that in a moment. Returning to my illustration, when that 2 bushels of wheat and weed seed is delivered at the elevator, it probably would be reported as "no grade." But when the elevator man puts it in his separating apparatus and takes every bit of the weed seed out of it, then what have you left? You have a bushel of No. 1 red wheat and you have a bushel of weed seed. The thing that determines the grade of wheat is the degree of foreign material that is found in the wheat, together, in some instances, with certain other deleterious conditions which I will hereafter advert to, among them being the amount of moisture, color, broken grains, etc.

Again, let me give the Senator another illustration. It is the commonest thing in the world to find this sort of condition: Here is a wheat field 160 rods long; a part of the swathe which you are going to cut is down in the valley, part of it is on the side of a hill, part of it is in a swale, and part of it may be where the soil is light. As you run your reaper you may cut wheat affected by black rust, wheat that is blighted, wheat partially developed, and wheat that is absolutely perfect. You have cut from every kind and quality of wheat in that one swath. It all goes through the thrashing machine and comes out together. You have now four or five grades of wheat, some of it absolutely worthless, some of it of slight value, some of it of a medium value, and some of it is perfect wheat. When this wheat goes into an elevator it is the business of the elevator to separate the good from the bad, to put the chaff in one place, the weed seed in another place, the black-rusted wheat in another place; so that, while the mixed material could not be graded as better, perhaps, than No. 4, a part of the separated material may properly be graded No. 1.

The separation and improvement of grain is the ordinary business of an elevator. That is what an elevator is for. Why, if the Senator from Georgia please, you find that in some instances they actually wash the wheat with water. There are some States where there are a great many wild onions which taint the wheat. If the wheat goes into the mill unprepared, the taint of the wild onions follows the flour and it is not fit to use. In cases of that kind, as well as in other instances, they wash the wheat with water and dry it quickly and produce a fine, perfect flour from it. Yet because the elevators have been doing that, because they actually have been improving the product of the farm, because they have been giving value to that which had no value or but little value, because they have been making fit for food and for the market that which theretofore was not fit for food or for the market, they are denounced here as a lot of scoundrels who when they grade wheat in at one number and grade it out at another are guilty of fraudulent practices.

If the Senator will examine the table that is found here on page 3 of the report, he will find from the figures that there was a diminution of the amount of grain. The Senator from Oklahoma [Mr. GORE] suggests, in his usual pointed way, that the rule the committee is applying here would bar a wool dealer from washing his wool, lest having improved it by scouring he would at once be liable to the charge of skullduggery, when all he was doing was removing the grease and dirt.

Take this very table that is exhibited in the report. It shows receipts of 890,245 bushels and shipments of 877,512 bushels, showing a net diminution in quantity of 12,733 bushels, which is stated here as "on hand, estimated"; but it can not be estimated as wheat on hand. It must be "estimated" as a certain amount of material.

Mr. President, I want to drive this point home. I want to leave no doubt about it. I hold in my hand the rules of the State board of Missouri, and I invite the attention of the Senators who are here to these rules. They show upon their face why grain going into an elevator at one grade may come out at another grade.

I will take the red winter wheat specifications:

No. 1 red winter wheat shall be pure, soft, red winter wheat, of both light and dark colors, dry, sound, sweet, plump, and well cleaned, and weighing not less than 60 pounds to the measured bushel.

Contrast that with No. 3:

No. 3 red winter wheat shall be sound, soft wheat, not clean or plump enough for No. 2, shall not contain more than 8 per cent of white winter wheat—

It allows a mixture of another wheat with it, because the wheat has been mixed in the field—

and weigh not less than 55 pounds to the measured bushel.

You see at once there is a difference of 5 pounds in weight, and that 5 pounds is accounted for very frequently by the foreign material, the chaff and the dirt, which is in the wheat. There is 5 pounds allowed there; and, of course, if you take out the imperfect wheat until the remainder weighs 60 pounds to the measured bushel you have a wheat that, so far as weight is concerned, grades No. 1.

Now, take No. 4:

No. 4 red winter wheat shall be soft red winter wheat; it shall contain not more than 8 per cent of white winter wheat; it may be damp, musty, or dirty, but must be cool, and weigh not less than 50 pounds to the measured bushel.

There is a loss of 10 pounds allowed for, and musty wheat is allowed for, and dirty wheat allowed for; but when you take out the dirt you have taken out one of the elements which reduced the grade. When you take out the light grains, as they can be taken out by the draft process, you may again raise the grade of the wheat; and if there is no must there that can not be gotten rid of, it is possible to transform that wheat into a No. 3 wheat or possibly even into a No. 2.

Mr. SMITH of Georgia. You raise the weight of part of the wheat and lower the weight of part of it.

Mr. REED. Why, certainly. You take a measured bushel of wheat; you take out of it all the shriveled grains of wheat, which make a light bushel. You take out the dirt, the chaff, the weed seed, and stuff of that sort, and you have left a less measured quantity, but what you have is the good which has been separated from the bad.

To take an illustration, suppose No. 1 apples were required to be free from specks, and suppose a farmer brought in a load of a thousand apples, and there were 100 specked apples in the load. The load would not grade as No. 1 apples, because the load is not free from specked apples. Suppose, however, the farmer should pick out every specked apple, and were then to return with nothing but 900 sound, good apples. Would he have perpetrated a fraud because he took out the bad from the good? Neither would the dealer who bought the load as No. 2 while it contained the specked apples be guilty of a fraud. And having bought as No. 2, he would not be guilty of fraud if, having thrown out the specked apples, he were then to sell the sound ones for No. 1.

That is all there is in this wonderful mare's-nest which it took six years to discover and which has led to the characterization of honest and decent men as rogues and scoundrels.

Mr. President, I do not want to conclude my remarks to-night, and if it is agreeable I should like to have this matter go over.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Is there objection? If not, the bill will go over.

Mr. McCUMBER. Mr. President, I did not understand the request.

The PRESIDING OFFICER. The Senator from Missouri asked that the bill might go over for to-night.

Mr. McCUMBER. It does seem to me as if we ought to go on at least until 5 o'clock. We adjourned over Saturday waiting for the Senator to return, and we have tried to accommodate him in many ways. It does seem to me that now, when others are crowding their bills upon the Senate, we at least ought to run on until 5 o'clock.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. REED. Certainly.

Mr. LODGE. I desire to speak very briefly on this bill, and if it will be agreeable to the Senator from Missouri I will speak now, and he can continue to-morrow.

Mr. REED. It will be quite agreeable to me.

Mr. SHIVELY. Mr. President, I wish to give notice that we expect to have a brief executive session to-night.

Mr. LODGE. The Senator will allow me to conclude what I wish to say?

Mr. SHIVELY. Certainly. I am just giving notice of the executive session.

Mr. LODGE. Mr. President, the case in opposition to this bill has been argued so thoroughly by the Senator from Illinois [Mr. SHERMAN], the Senator from Minnesota [Mr. NELSON], and to-day by the Senator from Missouri [Mr. REED] that it would be a work of supererogation for anyone to attempt to add anything to it. I should not detain the Senate at all were it not that there are some views in opposition to the bill which are held very strongly by persons interested in the question in my State which I feel it to be my duty to lay before the Senate.

Of course, in New England, and in my State particularly, we are consumers of grain, and we are also exporters of grain. There is a large export of grain from the port of Boston; and we have an inspection and supervision there under the chamber of commerce which, I believe, is the system in use in some other States where there is no State inspection.

I wish briefly to lay before the Senate some of the objections which we find to this bill. I do not know precisely what amendments are intended to be proposed, if any; and in what I am about to say I shall deal with the bill as it appears.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Oklahoma?

Mr. LODGE. Certainly.

Mr. GORE. I should like to call the Senator's attention to the fact that I have offered a substitute for the pending bill, which I will present to the Senate for a vote later on.

Mr. LODGE. Yes; I understood the Senator intended to offer a substitute; but I merely wish to say that my objections, such as they are, are submitted as against the bill reported by the committee and now before us.

Section 8, in lines 5 to 13, provides in effect that when a carrier receives grain to be shipped in interstate commerce, said carrier shall within 24 hours notify the chief grain inspector at the point of destination of the shipment of grain that such grain is in its hands for shipment. When such shipment is made from certain designated cities, as noted in section 2, there must be inspection at such originating point.

The same section, beginning with line 21 and running to the end of the section, states that the inspector at the point of destination of such shipment, upon receipt of the notice from the carrier mentioned in the clause to which I referred, must inspect the shipment of grain referred to in the notice. It is therefore seen that no choice is left to the chief inspector at the point of destination of the shipment, regardless of what may have been done to the grain en route. His only orders are to inspect grain upon receipt of the notice. It seems to me that that would, in many cases, lead to duplication in inspection.

I know the argument has been made that section 8, lines 14 to 20, obviates the need of inspecting grain the second time—for instance, at Boston, if it has already been inspected at Chicago; but I am not clear that that is the case. It merely states that it shall be unlawful to unload grain that has not been inspected. It does not state clearly that there need not be two inspections nor does it seem in any way to controvert the other provisions of the section. Therefore I think there is some ground for the criticism that there is an ambiguity in the provisions for the inspection of grain.

I now come to the second point—the impracticability of enforcing the proposed law. I take, of course, an illustration from my own part of the country, about the conditions of which I have been informed and with which I have some familiarity.

About 60,000 to 100,000 cars of grain annually enter New England. Of this number only three or four thousand are inspected. This shows how very little the usages of the trade require inspection at destination. To inspect this small proportion of the total number of cars coming into New England annually a force of from six to seven men is required. As inspection is always required at the end of the haul, a force of at least ten times the number now employed would be necessary properly to inspect the grain under this bill.

It is not easy to get a competent inspector; and to get a force of the size that is thought by those familiar with the grain trade in my State to be necessary would take time, if it would not be impossible to obtain it. The Government certainly would have to have inspectors of the highest ability, for it would not be willing to lower the existing standards of inspection. In view of the fact that it is a matter of common knowledge in the grain trade that first-class grain inspectors are hard to find, it is felt by those who are interested in dealing in grain at Boston—and, I think, in New England generally—that it would be very hard to get suitable inspection.

The difficulty of getting inspectors, which is more serious in the East than in the West, would lead probably to delay and possibly to deterioration of the grain, and consequent loss to the owner. It would give rise, as is set forth by the chamber of commerce in their statement, to demurrage charges, for the railroads could not be expected to allow their cars to be used as grain elevators without some reimbursement. They state, and I believe correctly, that under the present system a dealer can usually avoid such a demurrage charge, as he is a free agent; but under the system proposed in the bill it is perfectly conceivable that an inspector might require several days to reach a given point, and thus the owner of the grain, through no fault of his own, would be forced to pay to the railroad charges for storage.

Then there would be the diversion of cars in transit to points where an inspector was ready, in order that such contingencies as I have spoken of might be avoided. This would tend to handicap the prompt movement of cars, to congestion of terminals, to additional cost of operation to the railroads, and to a shortage of cars by tying up equipment, followed by a general holding up of the trade in the New England region. I am speaking of that region, where grain elevators are not so plentiful as they are in the West and where, as I say, we are a consuming and exporting community.

The effect that is most feared in New England and in Boston is the needless interruption of business, and practically the imposition of a tax which is not called for by the usages of the trade. I will give an illustration furnished me by the Boston Chamber of Commerce.

At the present time traders on the floor of the Boston Chamber of Commerce buy "Daugherty's oats," as they are called. They have been buying them for years, and they know just what sort of oats they will get. They are perfectly content to take the oats on the trade name. This is also true of many other brands and kinds of grain. Under this law it is compulsory that the grain shall be inspected—a procedure which the

trade cares nothing about, and which, in fact, it does not desire. So a tax is levied upon the trade for a totally unnecessary process, and the profits of the business are decreased.

In connection with this sort of trading, it must be remembered that grains of this sort are never subjected to inspection, because the usages of the trade have never found such inspection desirable. A man may buy a carlond of corn at Palmer, a town in my State, to be shipped to his farm at Durham, N. H. He wants this corn for his own use, and does not care in the slightest about getting it inspected. In fact, he would prefer not to have it inspected, as it would involve a charge and a delay for something he does not desire. Being an article of interstate commerce, however, this carload of corn must be inspected before it can be unloaded at Durham.

I know it has been argued that under this bill a double inspection is not required; but it does seem to me, after such examination as I have been able to give to the bill, that it would be necessary, if you attempted to follow out the law strictly, in many cases. If, however, for the purposes of argument we assume that double inspection is not required, that brings us to another objection to the bill which is very important to us on the seaboard; and that is, first, the lack of inspection at the point of export.

When buying grain under ordinary conditions the foreign buyer—and it is the foreign buyer with whom we deal in the seaboard cities like Boston—does not care what the condition of the grain was when it left Chicago if weather conditions were such that when it left Boston it was not in good condition; yet this is the sort of thing that can prevail under the provisions of the bill, as grain frequently changes in condition between the initial point and the point of export. Let us say that the corn is in good condition, as shown by inspection, when it leaves Chicago. It goes to Galveston, whence it is to be exported to Liverpool. Section 13, however, states that—

> Where grain has been once inspected thereunder, and remains unmixed with other grain, the same need not be reinspected at the place from which it is experted.

Clearly stating that since the grain was inspected at Chicago, it need not be reinspected at Galveston. If, however, the corn heats, as is often the case, I am informed, on the trip to Liverpool, because of an undue amount of moisture, such an inspection as the one at Chicago is not of the slightest information to a foreign buyer unless he knows, in addition to his knowledge of the condition of the grain when it left Chicago, what its condition was when it left Galveston.

Then there is the question of the responsibility for inspectors' errors. That is a matter which is of very great moment to our people in Massachusetts. I will take an example given me by the chamber of commerce.

Grain is shipped to Boston from the west as No. 2. When it reaches Boston, the Federal inspector inspects it and says it is No. 3. The exporter has his contract to fulfill, calling for No. 2 grade, and as he can appeal only to the chief inspector, who might decide against him, and then to the Secretary of Agriculture, all of which would take up time, and as it is usually imperative that he have an immediate decision in his favor, as otherwise the boat will sail without his cargo, he is confronted with a choice of losses, as follows:

He may allow the boat to sail without loading a cargo, in which case he must pay for "dead freight" and suffer loss through suit for breach of contract; or he may ship the grain as a lower grade than stipulated in the contract, in which case he can be sued for nonfulfillment of the contract; or he may go into the open market and buy sufficient grain of stipulated grade, probably at a loss of thousands of dollars, with which to fill the contract.

Where we have a Government inspection in this way there is no redress. The exporter is exposed to all this loss, and has no redress in case the inspector has made an error. As it is at present, however, he does have redress against the inspectors of the chamber of commerce, if there is an error.

Mr. NELSON. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Minnesota?

Mr. LODGE. Certainly.

Mr. NELSON. If the Senator will allow me for a moment, I desire to say that in connection with our State system of inspection in Minnesota the inspectors are required to give a bond to the State; and if any dealer is injured by the action of the inspectors, he can bring a suit on that bond, although it is a bond running to the State.

Mr. LODGE. Precisely.

Mr. NELSON. There is no such protection in this bill, however.

Mr. LODGE. Exactly. In the States where the State system of inspection exists the dealer is protected, the buyer or the seller or the exporter; and with us there is a responsibility which comes on the chamber of commerce and its inspection.

Mr. SHERMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Illinois?

Mr. LODGE. I do.

Mr. SHERMAN. I wish to state, in this connection, that under the statute of Illinois a like bond is required as in the State of Minnesota, furnishing complete indemnity.

Mr. LODGE. Mr. President, as to the effect of the grain inspection, there is a point made very strongly by those who deal in grain in Massachusetts.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Missouri?

Mr. LODGE. Certainly.

Mr. REED. I am sorry to interrupt the Senator.

Mr. LODGE. I yield very gladly.

Mr. REED. In the State of Missouri the chief inspector and all his deputies are required to give bonds similar in character to those referred to by the Senator from Minnesota.

Mr. LODGE. That secures the redress of which I spoke for the dealer and the purchaser and exporter.

Under the provisions of this bill there is to be a chief inspector and such deputies as may be necessary at Portland, Me., Boston, New York, Philadelphia, Baltimore, Chicago, Minneapolis, Duluth, Superior, Kansas City, St. Louis, New Orleans, Seattle, Tacoma, and San Francisco, and additional points in the discretion of the Secretary of Agriculture. If we are to have this regulation, with the burdens which it imposes, it seems only fair that every shipper who takes part in interstate commerce should bear his part of the burden, just as he should have his share of the profits. Thus, to take an example, grain moving from Peoria, Ill., not a point designated as one to have an inspector, would avoid the cost of inspection. Therefore corn moving from Peoria would be favored over corn moving from Chicago, a point where an inspection must be made. Of course, additional points may be designated by the Secretary of Agriculture, but that opens an unlimited vista of points for chief inspectors.

The bill provides for inspection of grain at certain designated points, and excludes many other points where the grain interests are entitled to equal privileges, where their interests lie. Business will not be compelled to go by way of certain routes. To avoid the granting of special privileges, it will be necessary to supply many thousands of points with inspectors to provide for all of the routing of grain, and that will entail enormous expense, which, of course, the grain will ultimately pay.

As to the foreign export trade, which is of the utmost importance to my constituency, I have seen and I have heard no argument which leads me to believe that this will effect any improvement on present conditions. In fact, in my judgment, Federal inspection could not help having an unfavorable effect on the export business in grain, for the reason that raising the standards of inspection—and it is safe to assume that it is not the intention of the bill to lower the standards—would decrease rather than increase our export business.

The foreign business in grain is very largely a business of trading in documents or contracts, and these contracts oftentimes pass through many hands before reaching the buyer who receives the shipment. Inasmuch as the trade abroad is handled in this way, it can be readily seen that raising the standards of grading would not improve, but would lessen our chances on export business, inasmuch as the standards already in force in this country are higher than those in force in any competing country, and it is a well-known fact that our grades of grain stand higher abroad than those of other countries. If our standards are raised still higher above those of competitors—and the old standards are already perfectly satisfactory, as experience, on the whole, during the past few years has proved—raising the grades can only result in lower prices to our farmers or a decrease in our export business. The surplus grain that we have to sell from this country can not be improved by grading, but the price that it brings can be materially lessened by grading it lower than it is now graded.

The varying climatic conditions in this country make it impossible to grade grain fairly under the same rules at all points, as no doubt would be insisted upon under Federal inspection. Long experience and strict supervision of the various boards of trade and chambers of commerce of this country have brought about, on the whole, satisfactory conditions for the

grading of grain; that is, as far as I can discover. The certificates of the Boston Chamber of Commerce in exports are accepted abroad. They are established. Our business has been done on those certificates. It is for the interest, of course, of the Chamber of Commerce and the export business from Boston to maintain a good inspection. Their business rests upon it, and we have been in the habit of selling abroad on those certificates.

Mr. President, here we have a system of inspection by States and by boards of trade and chambers of commerce which is working well. I do not mean to say that there are no evils in the system of selling and disposing of grain that can not be remedied, but I do think that it would be a great mistake to establish this huge Federal machine. We can not tell how many inspectors it will ultimately have. They will have to multiply inspecting points in order to give equality to all who are dealing in grain. To construct this vast machine and wipe out all the present system on which grain is inspected and sold, dislocating a business which is an enormously important one, upsetting our export trade and all our relations with foreign buyers, and which is an immense subject of export, as Senators are aware, and to do it by a law of this kind is a very great mistake.

If improvements are needed, or if it is thought that we shall give greater justice to the producer and improve our export trade by Government supervision, I do not know that there is any objection to that, though I think it should be carefully guarded. But certainly, Mr. President, I do not see any good reason for putting all this additional burden upon this branch of a business in which the people of Boston and my State are interested both as buyers for their own use and as exporters for the foreign trade.

Mr. NORRIS. Mr. President, I am interested to know whether there will be an increase of expense. It is claimed on the other side that it will cost no more to inspect the grain after the bill is passed than it costs now.

Mr. LODGE. I am not an expert on the subject.

Mr. NORRIS. Neither am I. I am trying to get information.

Mr. LODGE. I can only take the testimony of those who are familiar with the subject.

Mr. NORRIS. I wish to ask the Senator if the grain that is exported from Boston is inspected at Boston before it is exported?

Mr. LODGE. I understand it is all inspected under the provisions that apply in the case of other States or other boards of trade.

Mr. NORRIS. As a matter of fact is that grain inspected before it comes to Boston at some other point or points?

Mr. LODGE. I do not know. I do not know whether they would take a certificate from an interior point or not.

Mr. NORRIS. I wish to know if, under the present system, there is not sometimes double inspection?

Mr. LODGE. They claim there is none, but I do not know how that is. At all events the expense does not fall upon them.

Mr. WEST. Mr. President——

Mr. LODGE. I yield to the Senator from Georgia.

Mr. WEST. I wish to ask just one question before the Senator from Massachusetts takes his seat. He stated that this enormous expense for grain inspection would have to be paid by the grain of the country. Why is $850,000 appropriated in the bill to pay the expense?

Mr. LODGE. That is, of course, for the Government machinery. I am speaking of the burden it places on the trade. They think it will lead, as I tried to show, to demurrage charges, and to serious losses by differences in the grading and to duplication of the grading, for which they will have to pay. They will have to pay for the inspection despite this large appropriation.

Mr. WEST. Does the Senator from Massachusetts think that the standardization could be kept up just as well by the States as by the National Government?

Mr. LODGE. I have no objection and I do not think anyone has any objection to the National Government fixing standards. I do not think there is any objection to that, but the objection comes to breaking down the whole inspection system and substituting a great machine of Federal inspection for it.

Mr. REED. The Senator from Nebraska [Mr. NORRIS] asked the Senator from Massachusetts as to the cost of Government inspection. The report on file estimates the cost at from 35 cents to 75 cents a car, and I think, if my recollection is not in error, strikes an average of 50 cents. I hold in my hand a letter, which I intend to introduce to-morrow, by Mr. John T. Duvel, crop technologist, in charge of grain standardization. It bears date of to-day. In it he states:

> On the basis of our investigations it is believed that the cost of inspecting grain outright by the Federal Government would be approximately $1 per car to do the work thoroughly, and that it would take a total appropriation of not less than one and one-half million dollars.

Mr. McCUMBER. Has the Senator from Massachusetts concluded?

Mr. LODGE. I have concluded.

Mr. McCUMBER. I wish right here to correct an error that is made with reference to the cost and then I will answer the proposition made by the Senator from Massachusetts, a proposition which he admits almost in the beginning is based upon what he understands the bill to be and without reference to any proposed amendments. If the bill should be as he understands it to be, many of his arguments, of course, would be applicable. They are not applicable as I understand the bill to be and as I intend it shall be beyond any possible question before it leaves the Senate.

Mr. LODGE. I wish to say that, of course, I could not discuss amendments not reported by the committee and that do not appear in the bill.

Mr. McCUMBER. I so stated; but the amendments are to make certain what I intended the bill to mean. I had from the Chamber of Commerce of Boston the same letter the Senator speaks of, and also from New Hampshire, and I think from Vermont, and other New England States. I sent a copy of the bill with the proposed amendments, and a letter explaining its purpose, and when and where and upon what conditions under the bill the inspections would be had. I received a number of letters from those who are dealers saying that with that explanation and with those proposed amendments they are entirely satisfied.

But the particular thing I rose to correct at this time was the statement of the cost and expenses brought out by an inquiry from the Senator from Georgia [Mr. WEST]. The bill appropriates $850,000. Before the Government can pay an employee who does the inspecting it has to have authority from Congress in the shape of an appropriation to pay that employee. The Government gets it back under the bill immediately or practically as rapidly as it pays it out. It gets it back in the fees that are charged, just as they are charged to-day, on each carload or bin of grain that is inspected.

I had an estimate made by the Agricultural Department, and the estimate was that 40 cents per carload would pay the entire expense. I had them make an estimate of the number of men who would be required. They gave me a statement showing the number of men now employed at all the great terminals to which we expect the bill to apply. They made their estimates upon that and upon the usual wages that are paid, and stated that $850,000 would be necessary to pay about 650 men, who are now inspecting under the present system and who, under this system, would be taken over into the Federal system.

Mr. WEST. And it would not in the end cost the Government anything?

Mr. McCUMBER. It would not in the end cost the Government one penny, no more than it now costs the States. I have before me an estimate made from the State of Minnesota, for instance, in which, in charging I think only 25 or 35 cents a carload, there was over $20,000 profit to the State of Minnesota. That went toward the payment of their expenses. I think 35 cents a carload will cover all the expenses, while under the present system the charges run from 35 cents up to 75 cents per carload.

Mr. WEST. Mr. President, I have been apprehensive that it would be somewhat like the Postal Savings Bank System—that it would not near pay the expense of running it.

Mr. McCUMBER. We have made an allowance for the extra cost which I admit exists in the conduct of business by the Government, and after making that allowance we arrive at $850,000 as the probable expense which would have to be paid out; and it would be repaid. The bill provides that the fees paid shall be the same as those usually paid now under the several systems.

Mr. SHERMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield.

Mr. SHERMAN. I want to inquire of the Senator from North Dakota if he knows of any department conducted by the Federal Government that is self-sustaining?

Mr. McCUMBER. I do not know many where the charges for the services are made upon the people served. In every instance, I presume, where that charge is made and where the law says it shall be self-sustaining, it probably will be self-

sustaining. This very bill provides that the amount of charge for inspecting per carload shall be sufficient to pay the expense of the conduct of the inspecting business.

Mr. SHERMAN. The Post Office Department is supposed to be self-sustaining, but it is not. It never has been, and it is not now.

Mr. McCUMBER. This service must be self-sustaining under the bill.

EXECUTIVE SESSION.

Mr. SHIVELY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 8 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 21 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, April 29, 1914, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 28, 1914.

UNITED STATES DISTRICT JUDGE.

Oliver B. Dickinson to be United States district judge for the eastern district of Pennsylvania.

UNITED STATES ATTORNEY.

Charles A. Karch to be United States attorney, eastern district of Illinois.

UNITED STATES MARSHALS.

John J. Bradley to be United States marshal for the northern district of Illinois.

Joseph Howley to be United States marshal for the western district of Pennsylvania.

POSTMASTERS.

GEORGIA.

John H. Hodges, Perry.

MARYLAND.

William E. Burke, Taneytown.
Thomas J. Coonan, Westminster.
Victor F. Cullen, State Sanatorium.
Henry C. Lawder, Havre de Grace.
William D. Lovell, New Windsor.
Michael J. Tighe, Laurel.
Millard H. Weer, Sykesville.

MASSACHUSETTS.

John L. Markham, Ayer.

MISSISSIPPI.

William C. Hill, Ellisville.

NEW YORK.

Hugh W. McClellan, Chatham.

OHIO.

Charles R. Musson, Arcanum.

OKLAHOMA.

Charles E. Howe, Gotebo.

PENNSYLVANIA.

John J. Remaly, Bath.
Albert Smith, Shickshinny.

HOUSE OF REPRESENTATIVES.

TUESDAY, *April 28, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We seek Thee, O God our heavenly Father, and pray with all the fervor of our souls for Thy sustaining grace, that we may be upheld and guided in the present crisis by Thy spirit, that whatsoever we are called upon to do may be done with vigor in the interest of humanity, that civilization may be advanced, and a world-wide peace be established on a firmer and more lasting foundation; "that nation shall not lift up sword against nation, neither shall they learn war any more," but each vie with each in the peaceful pursuits of life, in brotherly love and kindness; for Thine is the kingdom, and the power, and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

VOCATIONAL EDUCATION COMMISSION.

Mr. HUGHES of Georgia. Mr. Speaker, I ask unanimous consent to call up Senate joint resolution 142, authorizing the vocational education commission to employ such stenographic and clerical assistants as may be necessary, and so forth. This resolution was referred to the Committee on Education, which has reported it favorably.

The SPEAKER. The gentleman from Georgia asks unanimous consent for the present consideration of a resolution which the Clerk will report.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection?

Mr. FITZGERALD. Reserving the right to object, does this merely authorize the commission to employ stenographers to be paid for out of the appropriation heretofore made?

Mr. HUGHES of Georgia. That is the intent of the resolution.

Mr. FITZGERALD. Have they not that authority already?

Mr. HUGHES of Georgia. We thought we had that authority under the original resolution passed here January 20, but the Comptroller of the Treasury insists that this resolution be passed before he will agree to pay these expenses.

Mr. FITZGERALD. It does not increase the appropriation?

Mr. HUGHES of Georgia. It does not increase it. It simply gives them authority to pay for these stenographers and secretaries.

Mr. STAFFORD. In the original bill there is a limit on the amount of the appropriation?

Mr. HUGHES of Georgia. Yes.

Mr. MANN. Reserving the right to object, has this bill been reported by the committee?

Mr. HUGHES of Georgia. Yes; it is reported favorably.

Mr. MANN. This morning?

Mr. HUGHES of Georgia. This morning.

Mr. MANN. The gentleman can put it on the Unanimous Consent Calendar and reach it in the regular order next Monday, I think.

Mr. HUGHES of Georgia. I would like very much, indeed, if the House would act upon it to-day. It is something that ought to be done.

Mr. MANN. Every gentleman who has a bill would like to have it acted upon immediately.

Mr. HUGHES of Georgia. I will say to the distinguished gentleman that this is a case of emergency. These employees have been at work almost day and night, and we thought we had the right under the original resolution to pay them. They need their money.

Mr. MANN. The gentleman could have introduced a resolution some time ago and reported it, and had it considered by the House, but he did not.

Mr. HUGHES of Georgia. I would like to say to the gentleman that we thought this was covered in the original resolution, until the comptroller recently raised the question. This resolution was passed a day or two ago in the Senate, and referred to the House Committee on Education, and was acted upon by that committee this morning.

Mr. MANN. Personally I am in favor of the passage of the resolution; but I think it is a very bad practice, when the matter can be put on the Unanimous Consent Calendar and considered next Monday, to ask unanimous consent now, before the resolution has been printed as reported, to consider it in the House.

The SPEAKER. Is there objection?

Mr. HUGHES of Georgia. I wish the gentleman would permit this to be an exception.

Mr. MANN. I feel obliged to object to this method of procedure.

The SPEAKER. The gentleman from Illinois objects.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3696. An act providing for the removal of snow and ice from the paved sidewalks of the District of Columbia;

S. 5289. An act to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work;

S. 5031. An act quieting the title to lot 44, in square 172, in the city of Washington;

S. 4552. An act granting pensions and increase of pensions to certain widows and dependent relatives of such soldiers and sailors;

S. 4377. An act to provide for the construction of four revenue cutters; and

S. 3590. An act to make the appointment of pay clerks in the United States Navy permanent and to create the grade of chief pay clerk, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3590. An act to make the appointment of pay clerks in the United States Navy permanent, and to create the grade of chief pay clerk, and for other purposes; to the Committee on Naval Affairs.

S. 4552. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Invalid Pensions.

S. 5031. An act quieting the title to lot 44, in square 172, in the city of Washington; to the Committee on the Public Lands.

S. 5289. An act to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work; to the Committee on the Merchant Marine and Fisheries.

S. 3696. An act providing for the removal of snow and ice from the paved sidewalks of the District of Columbia; to the Committee on the District of Columbia.

ENROLLED BILLS SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 11269. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 5487. An act to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis.;

H. R. 122. An act authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes; and

H. J. Res. 204. Joint resolution authorizing the Secretary of Agriculture to make exhibits at forest products expositions to be held in Chicago, Ill., and New York, N. Y.

THE LATE REPRESENTATIVE PEPPER.

Mr. KIRKPATRICK. Mr. Speaker, I ask immediate consideration of the following order, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the order.

The Clerk read as follows:

Ordered, That Sunday, the 3d day of May, at 12 o'clock, be set apart for addresses on the life, character, and public services of Hon. IRVIN S. PEPPER, late a Representative from the State of Iowa.

The order was agreed to.

OLD TRAILS.

Mr. BORLAND. Mr. Speaker, I ask unanimous consent for a change of reference of the bill H. R. 2864, which is now before the Committee on Agriculture. I ask that it be referred to the Committee on Roads.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read the title of the bill (H. R. 2864) to be known as the Daughters of the American Revolution old trails act, to provide a national ocean-to-ocean highway over the pioneer trails of the Nation, thus making a continuous trunk-line macadam road from the site of Jamestown, Va., and from the city of New York, N. Y., to the city of Washington, D. C.; thence by way of St. Louis, Mo., to Gardner, Kans., and there to branch, one branch leading through Santa Fe, N. Mex., the other branch leading from Gardner, Kans., through Kearney, Nebr., to Olympia, Wash.; also to aid the States through which the highway herein described as the national old trails road shall run in extending, constructing, rebuilding, and repairing same.

The SPEAKER. The gentleman from Missouri [Mr. BORLAND] asks unanimous consent to discharge the Committee on Agriculture from the bill just reported, and to refer the same to the Committee on Roads. Is there objection?

Mr. MANN. Reserving the right to object, I should like to ask the gentleman whether the Committee on Roads would have jurisdiction to report such a bill?

Mr. BORLAND. I think so. The Committee on Roads seem to think so. The Committee on Agriculture, since the creation of the Committee on Roads, have disclaimed any jurisdiction over bills for the construction of roads or for the locating or improvement of roads or for Federal aid to roads in any form. This bill, being a bill for Federal aid to a particular road, is within the jurisdiction of the Committee on Roads.

Mr. MANN. I do not have the rule before me, but I am under the impression that the Committee on Roads under the rule can not report a bill for a particular road.

Mr. LEVER. I think the gentleman from Illinois is correct in his recollection. The Committee on Agriculture, however, has disclaimed jurisdiction of the bill, because since the creation of the Committee on Roads it has taken the position that it should not handle such propositions. As chairman of the Committee on Agriculture I have no objection to the bill going to the Committee on Roads.

Mr. MANN. If we could get a manual that was up to date, we would know what the jurisdiction of the committee was.

Mr. BORLAND. It seems that the Committee on Roads is the proper committee. There is no other committee claiming jurisdiction of this bill.

Mr. MANN. I know; but if the rule provides that the Committee on Roads can not report this bill, what jurisdiction has the committee got over it?

Mr. BORLAND. The gentleman is simply assuming that.

Mr. MANN. I am not assuming that——

Mr. BORLAND. My recollection is that the Committee on Roads have jurisdiction over Federal aid to roads, and that is the purpose of this bill.

Mr. MANN. My recollection is that the rule provides that that committee shall not report bills for a particular road.

Mr. BORLAND. I will say that the Committee on Roads presume that they have jurisdiction of this bill because they have conducted two hearings on the bill, but they have asked that the change of reference be made formally.

Mr. MANN. I have no objection to the bill being referred to the proper committee.

Mr. BORLAND. On what ground does the gentleman think that it does not fall within the jurisdiction of the Roads Committee?

Mr. MANN. My recollection is—I am not sure that it is in the rule—that that committee can not report aid for a particular road; that is must be a general legislation. I know the statement was made, and I think it was within the rule, although I am not sure about that.

Mr. LEVER. Mr. Speaker, my recollection of the rule and of the debates is in accordance with that of the gentleman from Illinois.

Mr. MANN. I have the rule now. It reads:

To matters relating to the construction or maintenance of roads, other than appropriations therefor, to the Committee on Roads: *Provided*, That it shall not be in order for any bill providing general legislation in relation to roads to contain any provision for any specific road, nor for any bill in relation to a specific road to embrace a provision in relation to any other specific road.

I take it that would give the committee jurisdiction.

The SPEAKER. Originally all the road bills went to the Committee on Agriculture, as far as I can ascertain. Both committees were claiming jurisdiction, and so the Chair took occasion to study the matter up and made up his mind to refer all roads bills to the Committee on Roads except those that came under that specific prohibition as to making appropriations. It really does not make much difference which committee it goes to, providing they all go to the same one. Without objection, the change of reference will be made.

There was no objection.

LEAVE OF ABSENCE.

Mr. LENROOT, by unanimous consent, was given indefinite leave of absence on account of sickness in family.

SARAH E. COATES.

Mr. LLOYD. Mr. Speaker, I present the following privileged resolution from the Committee on Accounts.

The Clerk read as follows:

House resolution 479 (H. Rept. 591).

Resolved, That the Clerk of the House be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Sarah E. Coates, widow of Robert Coates, late a special employee of the House, an amount equal to six months of his compensation as such employee and an additional amount, not exceeding $250, to defray the funeral expenses of said Robert Coates.

Mr. LLOYD. Mr. Speaker, this provides the usual allowance for the family of a deceased employee. Mr. Coates was a man who worked on the majority side in the cloakroom.

The resolution was agreed to.

JAMES J. COATES.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

House resolution 480.

Resolved, That House resolution No. 145, Fifty-ninth Congress, first session, be amended by striking out the name of Robert Coates and inserting the name of James J. Coates.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman from Missouri how this House can amend a resolution of the Fifty-ninth Congress.

Mr. LLOYD. The appropriation act provided for this laborer in the cloakroom under the name of Robert Coates.

Mr. MANN. You may get authority under the law to put another man in his place, but this is to amend that resolution. We can not amend a House resolution of the Fifty-ninth Congress.

Mr. LLOYD. The amendment in this resolution is intended to provide for the son of Robert Coates, that he shall be named in place of his father and receive the same salary.

Mr. FITZGERALD. The way that that must be done is by a resolution designating the person.

Mr. MANN. I think the gentleman had better prepare another resolution.

Mr. LLOYD. This designates the person as James J. Coates, and that he shall occupy the same place that his father occupied. The resolution was prepared by the gentleman from Maryland [Mr. TALBOTT].

Mr. FITZGERALD. This House has no power to amend a resolution of a former Congress.

Mr. MANN. The resolution ought to provide that this James J. Coates, or whatever his name is, be appointed to fill the place under House resolution numbered so and so.

Mr. HOWARD. Why is there any necessity to indicate the name of the person to fill the place under the system now in vogue?

Mr. MANN. Because under the law it is necessary.

Mr. HOWARD. Does that perpetuate him in office?

Mr. MANN. Until the House removes him.

Mr. LLOYD. Mr. Speaker, according to the suggestion made on the floor, the resolution ought to provide that the place heretofore filled by Robert Coates shall be filled by James J. Coates.

Mr. FITZGERALD. I object.

The SPEAKER. The gentleman from New York objects.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14034, the naval appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill, the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes.

The CHAIRMAN. The Clerk will proceed with the reading of the bill.

The Clerk read as follows:

Recruiting: Expenses of recruiting for the naval service; rent of rendezvous and expenses of maintaining the same; advertising for and obtaining men and apprentice seamen; actual and necessary expenses in lieu of mileage to officers on duty with traveling recruiting parties, $130,000: *Provided*, That no part of this appropriation shall be expended in recruiting seamen, ordinary seamen, or apprentice seamen unless, in case of minors, a certificate of birth or a verified written statement by the parents, or either of them, or in case of their death a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by navai regulations, which shall be presented with the application for enlistment; except in cases where such certificate is unobtainable, enlistment may be made when the recruiting officer is convinced that oath of applicant as to age is credible; but when it is afterwards found, upon evidence satisfactory to the Navy Department, that recruit has sworn falsely as to age, and is under 18 years of age at the time of enlistment, he shall, upon request of either parent, or, in the case of their death, by the legal guardian, be released from service in the Navy, upon payment of full cost of first outfit, unless, in any given case, the Secretary, in his discretion, shall relieve said recruit of such payment: *Provided*, That authority is hereby granted to employ the services of an advertising agency in advertising for recruits under such terms and conditions as are most advantageous to the Government.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. I want to ask the gentleman who has the information about the employment of advertising agents.

Mr. PADGETT. That has been carried for several years.

Mr. MANN. I am asking for the facts. What contract do we have now?

Mr. PADGETT. We have a contract with the advertising agency of Van Cleve & Clague, of New York and Chicago.

Mr. MANN. They place the advertisement in magazines, and so forth?

Mr. PADGETT. Yes; and get reductions in doing a general business which the Government gets the benefit of. They get the commission from the people with whom they do the advertising.

Mr. MANN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Any alien of the age of 21 years and upward who may, under existing law, become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States Navy or Marine Corps, and who has received therefrom an honorable discharge or an ordinary discharge, with recommendation for reenlistment, or who has completed four years of honorable service in the naval auxiliary service, shall be admitted to become a citizen of the United States upon his petition without any previous declaration of his intention to become such, and without proof of residence on shore, and the court admitting such alien shall, in addition to proof of good moral character, be satisfied by competent proof from naval sources of such service: *Provided*, That an honorable discharge from the Navy, Marine Corps, or the naval auxiliary service, or an ordinary discharge with recommendation for reenlistment, shall be accepted as proof of good moral character: *Provided further*, That any court which now has or may hereafter be given jurisdiction to naturalize aliens as citizens of the United States may immediately naturalize any alien applying under and furnishing the proof prescribed by the foregoing provisions.

Mr. WITHERSPOON rose.

Mr. MOORE. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. WITHERSPOON. Mr. Chairman, I move to strike out the last word. If the gentleman desires to make a point of order, I will yield.

Mr. MOORE. Mr. Chairman, is the gentleman from Mississippi recognized to make the point of order?

The CHAIRMAN. The Chair does not know for what purpose the gentleman rose. He rose and addressed the Chair, and the Chair recognized him.

Mr. WITHERSPOON. Mr. Chairman, I rose to move to strike out the last word.

The CHAIRMAN. The Chair would say this, that the gentleman from Pennsylvania [Mr. MOORE] was upon his feet addressing the Chair, and if he desires to make or reserve the point of order, he is in time.

Mr. MOORE. I merely desired to reserve the point of order.

The CHAIRMAN. The Chair holds that the gentleman is in time.

Mr. MOORE. Mr. Chairman, I am very glad to yield to the gentleman from Mississippi, so long as my rights are preserved. I am quite willing that the gentleman should be recognized.

The CHAIRMAN. The point of order is reserved. The gentleman from Mississippi is recognized.

Mr. WITHERSPOON. Mr. Chairman, I desire to present to the committee some facts developed in the hearings that I consider very material to an intelligent solution of the principal question to be decided in this bill. I have attempted to show that the American Navy is superior to that of Germany. Conscious of my liability to err, and supposing it to be possible that the facts which I presented to you, namely, that we have nine more armored vessels than Germany, that we have on those vessels 89 more guns, that our guns are much larger as to caliber, that our shells are more destructive—assuming that all of that does not prove that our Navy is superior to that of Germany, and assuming that it is not as powerful, I desire to now submit testimony drawn from the advocates of this increase in the Navy to show that even under that condition we do not need any more battleships. And to substantiate that position I desire to call attention to the testimony of Admiral Vreeland, given to your committee, as it appears on page 597 of the hearings. There you will find this to be his statement.

Mr. CALLAWAY. Mr. Chairman, before the gentleman begins, who is Admiral Vreeland?

Mr. WITHERSPOON. Mr. Chairman, he is one of the great admirals of the American Navy. He is now the ranking member on the General Board, and was brought before our committee at the request of one of the members who favors more battleships to give us the reasons why we should have them. It is the statement of Admiral Vreeland to which I now wish to direct your attention.

Mr. WITHERSPOON. Do you believe, Admiral, that foreign Governments in providing for the size of their navies are influenced by the question of whether their navies shall become more powerful than ours alone, or do they consider the question of how they stand with reference to all nations?

Admiral VREELAND. With reference to all nations generally. Often with special reference to one or two.

Mr. WITHERSPOON. Assuming that you are correct in your idea that the aggressor in a war is governed by his idea of whether he can win or not, would you not say that if Germany should ever contemplate going to war with us that she would seriously take into consideration what would be the probable effect of the result of that war, even if she could win, upon her relations to the other European nations that you say she has more apprehension of than us?

Admiral VREELAND. She would be guided somewhat by fear of other nations while at war with us.

Mr. WITHERSPOON. Not while at war, but if she thought that she could whip us on the seas and destroy our Navy, would she not still be restrained by the fear that she would lose so many of her ships in the engagement that it would make her unable to resist a conflict with other nations?

Admiral VREELAND. Yes, sir; she would be very largely governed by that.

Mr. WITHERSPOON. She would consider that very seriously before going into a war with us?

Admiral VREELAND. Yes, sir. I think that is one reason Germany is not trying to maintain equality with England. The thought you have in mind is doubtless the same as that expressed in the memorandum appended to the German naval bill, 1900:

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. WITHERSPOON. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. WITHERSPOON. Mr. Chairman, here is the quotation from the German law:

"Germany must have a battle fleet so strong that even for the adversary with the greatest sea power a war against it would involve such dangers as to imperil his position in the world."

And, again—

"But even if it should succeed in meeting us with considerable superiority of strength, the defeat of a strong German fleet would so substantially weaken the enemy that, in spite of the victory he might have obtained, his own position in the world would no longer be secured by an adequate fleet."

The CHAIRMAN. While Germany might be defeated, England would be crippled so that she could not rally?

Admiral VREELAND. Precisely.

So we learn from the opinion of Admiral Vreeland, and also from the view of Germany, as expressed in one of her laws, that as between Germany and England it is not necessary for Germany to have as strong a fleet as England in order to protect itself against England, for the reason that England knows that if she were to go to war with Germany, while she might win in the war, yet she would be so crippled as to imperil her position among the nations of the world, so that she would be no longer protected by an adequate navy.

At this point the gentleman from Illinois, my friend Mr. WILLIAMS, came to my relief and this occurred:

Mr. WILLIAMS. In determining the size or extent of our Navy you no doubt take into consideration our location with reference to the other powers, our isolation, and the extent of our shores, do you not?

Admiral VREELAND. Yes, sir.

Mr. WILLIAMS. In view of that condition do we require so great a Navy, a defensive Navy, as those powers of Europe who are in direct touch and contact with other powers?

Admiral VREELAND. No; for the reason that any power coming 3,000 miles or more to attack us would not be able to bring all of its forces to bear.

Mr. WILLIAMS. What per cent of the navy, for instance, of England could be spared under ordinary conditions and complications in Europe to be sent to America to attack us?

Admiral VREELAND. I do not think she would like to spare any.

Mr. WILLIAMS. Could she, under ordinary conditions and complications, spare 50 per cent of her navy to come here?

Admiral VREELAND. I should say not—not without an understanding with the other powers.

Mr. WILLIAMS. Is that true also of Germany?

Admiral VREELAND. I should say that it is true also of Germany at the present time.

Mr. WILLIAMS. Is that true of France?

Admiral VREELAND. I should say that is true of France also.

Here is the testimony, not from this little Navy crowd but from Navy statesmen, telling you that no nation on earth could afford to send one-half of its ships against us in case of war with the relations existing between the countries of the world; and the necessity that each country is under to protect itself against its neighbors is such that if they are in a war with us, 3,000 miles away, not one of them could afford to send one-half of her ships against us. If that be the truth, and it seems to be the general idea——

Mr. CALLAWAY. Mr. Chairman, have any of these big Naval Committee men disputed that?

Mr. WITHERSPOON. Nobody. The testimony stands there in the record uncontradicted. If that be the truth—and I say it seems to be generally thought around here that unless a man is steeped in extravagance and afflicted with battleship hysteria, he can not tell the truth—if that be the truth, then what need have we for more ships? If Germany believes, as she has said in the law, that her navy, which is just a little over one-half as great as that of England in the number of battleships, is sufficient to protect herself against England, then, my God, who is willing to so belittle the American Navy as to say that it is not amply adequate to protect us against Germany?

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. WITHERSPOON. I yield to the gentleman.

Mr. CALLAWAY. Is it not a fact, if this is the truth, as the gentleman states, that the only necessity we have for increasing our Navy is to make it an offensive Navy instead of a defensive Navy?

Mr. WITHERSPOON. Mr. Chairman, I can hardly follow my friend to that conclusion, but I will say this, that there is no reason for an increase in the Navy except, as the gentleman suggests, to provide for conquest or to provide for larger profits for those who are engaged in the business—one or the other—and my friend from Texas can take his choice.

Mr. CALLAWAY. Will the gentleman yield further?

Mr. WITHERSPOON. I will yield to the gentleman.

Mr. CALLAWAY. Might not both of these influences have been working? Some desire to go out and bring everybody in the world up to their standard and ideals. That would be one force, and others are pecuniarily interested in our building our Navy bigger. That would be another influence.

Mr. WITHERSPOON. Certainly. Now, I want to call the attention of the committee to what was said by a great German admiral in a speech lately delivered at a number of different places in Germany, and this admiral spoke on behalf of the Germany Navy League, and the report of his speech was that everywhere he has delivered it it aroused great enthusiasm in Germany; and this speech goes on to describe the relation between Germany, France, and England and to show the efforts that those countries have made to involve Germany in war with them, and predicts war with England, and the part I want to read to you shows what he thinks will be the result of that war. Bear in mind, now, that Germany has just two or three battleships more than half as many as England has, and I want to call attention to what this German admiral says about it.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. WITHERSPOON. Mr. Chairman, I would like to have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi? [After a pause.] The Chair hears none.

Mr. WITHERSPOON. Here is what the admiral said:

After some time there will come the decisive action between the two fleets, in which as many as possible of the enemy's ships must be destroyed. After this battle we shall be able to rebuild our fleet more quickly than England, thanks to our larger number of skilled artisans and laborers in general. The decisive engagement will begin at 10,000 to 12,000 meters, which range it will be the German tactics to maintain as long as possible. At 7,000 meters the torpedo will come into action, and later on the fight will degenerate into a melée of the wildest description, ship fighting ship, and using every method of destruction. The German fleet will probably enter into this close action already possessing an advantage, due mainly to its excellent Krupp gun material, which England simply can not equal. Whoever wins in this struggle, it is certain that the defeated side will leave all its ships and men at the bottom of the sea, while the victors will return home a ruined fleet.

Now, that is the judgment of a great admiral as to the result of a battle between England and Germany where England has almost twice as many battleships as Germany has, and in that entire speech this admiral never refers to the number of battleships.

Mr. GOULDEN. Will the gentleman yield?

Mr. WITHERSPOON. I will yield to the gentleman.

Mr. GOULDEN. I think it would interest all of the Members—I know it would myself—to know the name of this admiral.

Mr. WITHERSPOON. I think his name is Admiral Breusing. Now, if the strength of a fleet, if the power of a nation was proportioned, as so many think, upon the number of battleships you can count on your fingers, do not you believe that this great admiral would have said something about it? But he pointed out what he said was the superiority in the German ships, and he said they would have an advantage on that account, but never said a word about the number.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. WITHERSPOON. Yes.

Mr. BRITTEN. Has the gentleman any opinion from a British admiral on this subject?

Mr. WITHERSPOON. No; I am discussing a German admiral now. But if that would be the result between England and Germany in naval engagement, then what would be the result between the American Navy and the German Navy? It might be uncertain, as this admiral said, between England and Germany as to which would win, but he said it is absolutely certain that between them that one side or the other would lose all of its ships and the other would return home a ruined fleet. If that would be the case there, what would be the result between us and Germany with more armored vessels and more powerful vessels than she has? It seems to me that if the conception of this admiral is correct that we need no more battleships.

Mr. GRAY, Mr. CALLAWAY, and Mr. HOBSON rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. HOBSON. I thought the gentleman had finished.

Mr. WITHERSPOON. I yield to the gentleman from Texas.

Mr. CALLAWAY. In reading from Admiral Vreeland a moment ago, I understood Germany would not want to send any of her battleships.

Mr. WITHERSPOON. Half of them.

Mr. CALLAWAY. I thought the gentleman said at first she would not want to send any of them.

Mr. WITHERSPOON. He said England would not like to send any of them and she could not send over half of them, and the same thing was true about Germany.

Mr. CALLAWAY. Did he express an opinion——

The CHAIRMAN. The time of the gentleman has expired.

Mr. CALLAWAY (continuing). That we would be likely to have any trouble whatever with Germany—any prospective trouble with Germany?

Mr. WITHERSPOON. No, sir.

Mr. GRAY. Mr. Chairman, I move to strike out the last two words.

Mr. HOBSON. Mr. Chairman, I move to strike out the last two words.

Mr. GRAY. Mr. Chairman, if it is proper to yield to the other side alternately, I will conform to the rules.

Mr. HOBSON. I will be very glad to yield to the gentleman.

Mr. GRAY. Mr. Chairman, great calamities are often taken advantage of by men to secure that which otherwise could not be obtained. War is one of such calamities.

The possibility of war with Mexico is thus sought to be taken advantage of, and I want to call your attention to a late editorial in the Washington Post, the first lines of which read:

> These are bad times for the people who think it is a sin to authorize more than one battleship.

In other words, it is meant that these are good times for men who believe in still further increasing the Navy. And I have observed even among our friends here, while wearing a very sober and sedate visage, they betray an unmistakable expression of exultation and triumph on their faces, because it appears to them that these are good times for the men who seek to still further increase our Navy.

Mr. Chairman, our position is that we have the greatest Navy in all our history. Not only this, but the completion of the Panama Canal is soon to double the power and efficiency of that Navy, according to the very experts that these gentlemen are pleased to quote here. We are agreeing that this Navy should be maintained at this time, the greatest Navy in all our history, and soon to be doubled in power and efficiency by whatever that requires, but we are opposing a still further increase. And we are maintaining the position that there is no ground for a further increase of our Navy at this time. We are at peace with all the great naval powers of the world, and we have entangling alliance with no naval power of the world and with no country, except it be Mexico. [Applause.]

Never before in all our history was there less liability for war with any naval power than there is to-day. Never before in all our history was there such a widespread and strong sentiment among the civilized nations of the world for peace and against war as there is to-day. Never before in all our history were there as many precautions and safeguards taken among the great powers of the world to prevent war as there is to-day. There is no more reason now for the increase of our Navy than there was before this war became a possibility, except as to Mexico. And, Mr. Chairman, we are claiming and asserting that we do not need to increase our Navy to deal with Mexico.

Mr. RAGSDALE. Will the gentleman permit a question?

Mr. GRAY. Yes; a question.

Mr. RAGSDALE. Whom does the gentleman charge with having brought about this war scare?

Mr. GRAY. That is a question I am not going into at this time. If you want your curiosity satisfied, I will look it up, and we will talk about that proposition. [Laughter.]

Mr. RAGSDALE. Will the gentleman permit a further question?

Mr. GRAY. Now, we are maintaining that the United States has the greatest and most powerful Navy in all its history. If we are not second as a naval power, we are third, and Mexico has practically no navy. We claim that it is not necessary for us to still further increase our Navy to deal with Mexico, and yet they say these are bad days for the men who advocate one warship; that is, these are good days for the men who advocate a still further increase of our Navy.

Mr. BRITTEN. Will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. GRAY. Mr. Chairman, I ask for an extension of time of five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BRITTEN. I would like to ask my colleague of the Committee on Naval Affairs if he voted for the war resolution, and ask him whether——

Mr. GRAY. Yes; I voted for the resolution and I will take that question up with the gentleman when that question arises. I will try and satisfy the gentleman at the proper time. [Laughter.]

Mr. BRITTEN. The question has already been voted on.

Mr. GRAY. Mr. Chairman, I refuse to yield. I want to proceed.

Mr. CALLAWAY. These big-navy men claim that a big navy is one of the things that keeps us out of war. How do they reconcile that with the war that we have gotten into with Mexico?

Mr. GRAY. Yes; they say it is the size of our Navy that insures peace, and yet we have a Navy only half as large as England, and we are at peace and have been at peace with England for a hundred years. We have a Navy more than 50 times as large as Mexico, and yet it is the only country with which our peace is jeopardized. Now, we claim that we have such a superior Navy over Mexico that we require no increase by reason of our strained relations, but observing the disposition manifested here to disparage our own Navy and to exalt other navies, I am constrained to go into some of the facts and show and prove to these doubting gentlemen the superiority of our Navy over the Mexican Navy. The United States has in all over 300 vessels and Mexico has only about 20. Our fighting ships number about 177, and those of Mexico not over 13, all of which are obsolete and many of which are only partially armed. We claim that on the number of ships there is no ground for an increase in our Navy. But now as to the tonnage. Our vessels have a tonnage of more than 754,000 tons, while those of Mexico have a tonnage of only about 10,000 tons. We claim that on tonnage there is no necessity shown for an increase in order to deal with Mexico.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. GRAY. Surely.

Mr. BRITTEN. My colleague on the committee is comparing our Navy with the Mexican Navy. Has he any doubt about our ability to take care of the Mexican Navy?

Mr. GRAY. No; I have not, but I fear you will not believe it unless I state all the facts and make a demonstration. [Applause.] You have been disparaging our own Navy and exalting the navies of other countries. I want to prove to you and convince you that we have a greater Navy than Mexico, and therefore I feel constrained to give you the figures. Please be seated, and I will proceed.

Now, we have over 2,000 guns on our ships, and they have only 62 guns, and we insist that this excess of guns gives us a sufficient advantage without still further increasing our Navy. We have ten 14-inch guns and thirty-two 13-inch guns; we have one hundred and sixty-two 12-inch guns and over 600 guns over 6-inch, and twenty-two 4-inch guns; and Mexico has twenty-two 6-pounders, and the rest of them are less than 4-inch, and we insist that in size of our guns we have a sufficient advantage without a further increase. But, Mr. Chairman, if we are wrong in our conclusions on the number of vessels, if we are wrong in our conclusions on the number of guns, if we are wrong in our conclusions on the size of the guns, we insist that in one respect it can be conclusively shown that we have the advantage. All our guns are breechloaders and part of their guns are muzzle-loaders, and we insist that this gives us sufficient advantage without further increase. When war comes and they come out to swab out the barrels, we can shoot them. That will give us an advantage. [Laughter.] In the heat and excitement of battle they may break their ramrods or twist their ramrods or spill out the powder, and then we can shoot while they are loading. We claim that by reason of the kind and character of guns we have the advantage. If the only reason for increasing our Navy to-day is to be found in our strained relation with Mexico, then there is no reason for still further increasing our Navy. This claim that our naval policy should be influenced by reason of threatened hostilities with Mexico is absurd, but it can not be allowed to go unchallenged. It must be met, explained, analyzed, and the facts constituting the superiority of our Navy made apparent and brought within the comprehension of those who are to shape the destinies of this Nation as a world power on the sea. [Applause.]

Mr. HOBSON. Mr. Chairman, the gentleman from Indiana [Mr. GRAY], who has just spoken, has come pretty near bringing up what I have been expecting constantly—an imputation

that these calamitous times upon which we have fallen have been brought about by the advocates of an adequate Navy just as the naval appropriation bill is due. Every year, when any international complication comes within months of the naval appropriation bill's coming up, we are met with the imputation that it was improvised for the purpose of getting more battleships.

Why do you suppose it is that, with the superiority we have over the Mexican Navy, this is a good time to have proper attention given to the national defense in the House of Representatives? It is simply because, Mr. Chairman, the attention of the people of this Nation is momentarily turned to the question of national defense. It is only when an emergency arises that the people give attention to national defense. That is the weakness of our country; it has been the weakness of Republics since the world began, that their people, absorbed in industrial and productive pursuits, naturally and necessarily neglect the national defense; and when the people neglect it their representatives neglect it, and so, as a rule, war overtakes Republics unprepared, and in some cases it is then too late to avert disaster. You need never fear that the impulse for national defense in America will be disproportionate as compared with other nations, even with all of the wars and rumors of wars that may come. Our whole war experience has been to the contrary. Wars have actually come because we were unprepared, and other wars have lasted much longer than they should have lasted, entailing heavy unnecessary losses of blood and treasure.

Now I would like to call attention to the remarks made about the Panama Canal and its effect upon our Navy. The Panama Canal is far distant from our shores, almost as far as from the nations of Europe. If we are in control of the sea, the Panama Canal is ours, and we can mobilize by transferring our fleets from one ocean to the other. But if the Panama Canal falls into the control of the enemy, which it would if the enemy came into control of the sea and had a mobile Army, then the Panama Canal would be closed to our ships and open to the enemy's ships. And so the Panama Canal makes both of our coasts exposed, when formerly only one coast would have been exposed when we lose control of the sea. The Panama Canal, instead of minimizing the importance of our Navy, has enlarged it.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Alabama yield to the gentleman from Colorado?

Mr. KEATING. Will the gentleman yield for a question?

Mr. HOBSON. Certainly.

Mr. KEATING. Does the gentleman from Alabama mean to tell the House that those who constructed the Panama Canal just doubled the danger of this country suffering from an attack by a foreign fleet?

Mr. HOBSON. I will say to the gentleman that they fully realized that they doubled the importance of our controlling the sea, so that we could thereby control the canal.

Mr. KEATING. The theory upon which the Panama Canal was constructed, I think the gentleman will agree with me, was that it was a great war measure and would enable us to mobilize our fleet. Now the gentleman tells the House that it really weakens us instead of strengthening us.

Mr. HOBSON. Speaking in general terms, it doubles our weakness if we are not in control of the sea, and it doubles our strength if we are in control of the sea.

Mr. KEATING. Under present conditions, is the gentleman prepared to say that the construction of the Panama Canal reduced the efficiency of our fleet and doubled our danger?

Mr. HOBSON. It has very materially increased our exposure in the present status of our Navy.

Mr. KEATING. And thereby increased our danger?

Mr. HOBSON. In the present status of our Navy it has very materially increased our exposure.

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Alabama yield to the gentleman from South Carolina?

Mr. HOBSON. Yes; I yield to the gentleman.

Mr. RAGSDALE. Under the position taken by Senator OWEN recently, that the war vessels of Japan have the same rights in the Panama Canal as our vessels, it certainly makes it necessary that our Navy should be maintained at least to the standard that it bore relative to other nations.

Mr. HOBSON. I do not believe that the war vessels of the enemy will ever have equal rights with our vessels in the Panama Canal as long as we control the canal.

Mr. RAGSDALE. Yet the gentleman knows that the Senator from Oklahoma [Mr. OWEN] recently took that position on the floor of the Senate.

Mr. HOBSON. I did not read his speech, but, of course, I assume that the gentleman is correct in his statement of it.

Mr. SABATH. Mr. Chairman, will the gentleman yield for a question?

Mr. HOBSON. Certainly.

Mr. SABATH. Was it not contended by experts before and during the construction of the canal that by the construction of the canal that instead of our being obliged to have two fleets one will suffice, and we will be able to transport our fleet from one ocean to the other, and therefore shall not need to have a double fleet or two fleets, one on each ocean, but that one will suffice?

Mr. HOBSON. Of course.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. SABATH. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. HOBSON. I will say to the gentleman that he is correct, that the experts pointed out the advantage of added facilities for the mobilization and concentration of our fleet; but the gentleman knows, of course, that in pointing that out it was assumed, of course, that we actually did possess and control the canal and could reach it with our ships; otherwise we would not mobilize.

Mr. SABATH. Is not our Navy at least 50 per cent stronger than it was at the time the canal was being constructed?

Mr. HOBSON. Does the gentleman mean absolutely or relatively?

Mr. SABATH. Oh, absolutely.

Mr. HOBSON. Speaking of absolute strength, I should say it is ten times as strong as it was in 1904, and that it is stronger in proportion now to what it was in 1908, in proportion to our dreadnaught tonnage now as it compares with what it was then; but the strength of our Navy should be considered as relative and not absolute. In 1904 our Navy was probably 60 per cent stronger than the German Navy. There is no question about that.

Mr. SIMS. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Alabama yield to the gentleman from Tennessee?

Mr. HOBSON. In a moment. And when Germany hoisted her flag in Venezuela, and Great Britain declined cooperating further with Germany, and we called upon Germany to retire from Venezuela, we had undisputed control of the sea. And although Germany had a great army, it could not reach Venezuela. We were in control of the situation, and Germany very promptly and courteously retired. Now, if that situation were repeated to-day—if Germany hoisted her flag in Venezuela to-day, with or without the cooperation of any other power, and if we called on Germany to retire—Germany would laugh in our face, for the simple reason that she has almost double the first-line strength of battleships that we have, and could therefore sweep the seas. In other words, Germany to-day has control of the sea, where America had it in 1904, and in her control of the sea Germany could not only stop our sending any of our forces to Mexico or Venezuela or anywhere else, but she would be absolutely free to send her forces—not only her naval forces, but her armies—and her forces then would be in absolute power, and she could without much difficulty take and occupy and control the Panama Canal.

Mr. SIMS. If we were in a war with England, I assume that we must have a Navy equal to that of England in order to protect our canal against England.

Mr. HOBSON. A war with England involves factors that are not involved in a war with any other power, for this reason——

Mr. SIMS. Upon the theory that we must have a Navy equal to that of any other nation that might be brought against us, and England having double ours, we would be in no condition to defend ourselves against England's Navy with reference to the Panama Canal.

Mr. HOBSON. Yes; that is correct, but with this difference: If we had a good military force of occupation in Panama, the English Navy could not dislodge it.

Mr. PADGETT. Will the gentleman refer to the position of Canada?

Mr. HOBSON. Yes; I will come to that in a moment. From the military point of view England is more like America. She has no mobile army behind her navy. Consequently, England could not go down and possess itself outright of the Panama Canal.

Mr. SIMS. But she could prevent us from using it.

Mr. HOBSON. She could control the sea, and so ultimately could control the Panama Canal, because she could ultimately bring over military forces sufficient to come up and take the defenses of the Panama Canal from the rear. But the question of England and the Panama Canal is neutralized because of the fact that we have just north of us a hostage that is far more valuable than the Panama Canal would be as a hostage, and I do not contemplate our ever having a war with England. But that does not mean that England might not be willing to let some other power or powers have a war with America without interference of any kind.

Mr. SIMS. But the logic of your position is that in order to defend the Panama Canal and use it ourselves we must have a naval strength equal to or exceeding that of any other nation or nations that might combine——

Mr. HOBSON. Any military nation that would undertake to seize the Panama Canal or make war upon us.

Mr. SIMS. I mean that.

Mr. HOBSON. That is correct.

Mr. SAUNDERS. Having in mind what Admiral Vreeland stated as to the proportion of the German Navy that could be utilized against America, and therefore in operations against our canal, do you undertake to say that the proportion of the German Navy that could be so used would be superior to the whole American Navy?

Mr. HOBSON. What I should like to say to the gentleman is that he is not manifesting his usual penetrating and shrewd logic when he imagines that Germany would only send half her navy in case of a war with America——

Mr. SAUNDERS. Well, I am stating——

Mr. HOBSON. Permit me to answer your question. In case of war with America, Germany, desiring to seize the Panama Canal—Germany, desiring to seize South American territory—the gentleman is not displaying his usual penetration and logic when he imagines that Germany would send only half of her fleet against the American fleet.

Mr. SAUNDERS. Then the gentleman disagrees with Admiral Vreeland?

Mr. HOBSON. No; I will show the gentleman in a minute.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. I ask unanimous consent that the time of the gentleman from Alabama be extended five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. HOBSON. I thank my colleague for procuring an extension of time for me. If the theory advanced by the gentleman is to be adopted, then Germany needs only half as big a navy as England, England needs only half as big a navy as Germany, Germany needs only half as big a navy as America, and no nation would need more than half as big a navy as any other nation.

Mr. SAUNDERS. I am not advancing any theory. I am merely predicating that Admiral Vreeland's statement was correct. Assuming then Admiral Vreeland is authority in this respect, is it the gentleman's conclusion that that proportion of the German Navy which they could utilize in offensive operations against the United States, would be superior to all of our present Navy? That is a fair question, I think.

Mr. HOBSON. Yes; and I will answer it by quoting Admiral Vreeland's words.

Mr. SAUNDERS. They were read here a moment ago.

Mr. HOBSON. I know they were read, and it was predicated on these words:

> Not without an understanding with the other powers.

But Germany would have that understanding with the other powers before she went to war.

Mr. SAUNDERS. Would the gentleman still further complicate this question by admitting that Germany before attacking us, would need to secure an understanding with the great powers of the world?

Mr. HOBSON. I will say that America, before attacking Mexico, has sought to have an understanding with the great powers of the world, and any nation with a reasonable amount of intelligence would do the same thing.

Mr. SAUNDERS. Does the gentleman assume that Germany, in spite of all her problems of a menacing character confronting her in Europe, and with respect to which she is professedly building up a navy, could secure the agreement of all her possible enemies, so to keep hands off for the future, in the event she desired to utilize all of her navy in a useless war with America? Does not the gentleman think that it is a rather remote possibility that Germany will attack us, if such an agreement must be secured as a necessary condition precedent?

Mr. HOBSON. If the gentleman would carry it to an extreme, of course it would be, using his words literally; but I will say to the gentleman, on the contrary, that for centuries Europe has always been under what is known as a balance of power, and no great nation has placed its trust for defense in such a condition.

Individual nations of Europe have been able to come to such an understanding, largely as occasion required, and have been able to conduct distant wars without any molestation on the part of others. This dependence on the balance of power between other nations with their own misunderstandings and own complications has been the main method of defense employed by Turkey and the chief method of defense employed by China, but any nation in the long run that depends on the balance of power between other nations and their quarrels for its defense has in the end suffered spoliation.

Mr. SAUNDERS. All of my friend's answer is foreign to my question. Having in mind the great population of the United States, the character of that population, our power, and our resources, it is idle to talk about Turkey and China, as being in the same class with this country.

Mr. HOBSON. How about Russia in the Japanese war? She was not molested by England or Germany.

Mr. SAUNDERS. My view that Germany is not likely to attack this country is predicated on the idea that Germany has certain domestic interests requiring her attention, and certain immediate dangers at home, that must be provided against. Now, the gentleman tells me that she could make an arrangement with her ancient enemies by which she would be able to utilize the whole strength of her navy in an effort to capture, and hold the Panama Canal.

Mr. HOBSON. I say to the gentleman that Germany's defense does not depend on its naval power. That is the reason that its navy is only half as big as that of England. Having a large mobile army, she could not be invaded by any neighbor, and England in control of the sea could not invade Germany. Her defense does not depend on her navy.

Mr. SAUNDERS. The view expressed by the gentleman from Alabama is in opposition to the view of the German admiral who was quoted in our presence this morning by the gentleman from Mississippi [Mr. WITHERSPOON].

Now, permit me to ask a further question and I am through, I am reasonably familiar with the debate that was in progress in this House at the time the construction of the Panama Canal was ordered. Does the gentleman from Alabama recall that ever at any time during that debate the argument was put forward that as a result of the construction of the canal we would, by virtue of that very fact, be compelled to immensely increase the fighting strength and number of the ships of our Navy?

Mr. HOBSON. I will say to the gentleman that that is self-evident.

Mr. SAUNDERS. It may be self-evident now, but at the time to which I refer it was distinctly urged that the construction of the canal would enable us to maintain our position in the world with a smaller Navy than would otherwise be necessary.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. SAUNDERS. Mr. Chairman, I ask unanimous consent that the gentleman may have five additional minutes, as I have consumed a considerable portion of his time.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the gentleman from Alabama have five minutes more. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I dislike to take up the gentleman's time, but I would like to ask him one question.

Mr. HOBSON. Certainly; I yield.

Mr. MANN. Does the gentleman from Alabama believe that we ought to have a Navy sufficiently large to protect the canal by being down near Panama?

Mr. HOBSON. No; I will say that if our Navy is in control of the sea no enemy's transport would ever shove off from a foreign shore. Our Navy would not have to go down there.

Mr. MANN. How would anybody know that our Navy was in control of the sea?

Mr. HOBSON. If we took what is called the first line for our Navy and for the other nation's navy, and if ours were clearly superior in power, we would have control of the sea.

Mr. MANN. By 1917 does the gentleman think that we would be afraid to send our Navy to sea?

Mr. HOBSON. I do not think we would be afraid to do anything if the Nation's safety demanded it, but of course ordinarily we would not send out our fleet unless there was a reasonable chance of its being advantageous.

Mr. MANN. By "afraid" I do not mean fear, but good sense.

Mr. HOBSON. I will say to the gentleman that if in 1917 there should be war between Germany and America, Germany

would have undisputed control of the sea; and Germany would proceed to occupy the Panama Canal the very first thing, and nothing could prevent her occupying it.

Mr. MANN. What would we be doing with our Navy while that was being done?

Mr. HOBSON. I think, although Germany's fleet would be more powerful than ours, that our fleet would probably be ordered forth to offer an engagement on the high seas, with very heavy odds against us.

Mr. MANN. Where? I do not suppose that they would arrange by cablegram where they were to meet.

Mr. HOBSON. I think this would be the course of events: Certainly our fleet would not go to Germany. I do not believe our fleet would go to Panama. I believe the German fleet would go back and forth from Germany to Panama and convey troops on a reduced scale, continuing operations there and in control in South America until public clamor in America compelled our fleet to go forth. We may rest assured that when the final engagement came the Germans would practically determine where it would be held, and it would be held so that our fleet would be as far from its base as Germany's was.

Mr. MANN. Suppose that we had a fleet larger than the German fleet, where would our fleet go in time of war?

Mr. HOBSON. It would not have to go anywhere.

Mr. MANN. It would have to be somewhere.

Mr. HOBSON. We would be ready to strike if the German navy put to sea. I will say this to the gentleman: Germany would not attempt to strike. Germany's strength is in her army, and until she has this control of the sea she would never send a transport from her shores; and the fact that America has no army at all would have no influence on the outcome of the war. We would be on a footing with the great military nations of the world.

Mr. MANN. That was not the case when we had the Spanish War. The Spaniards sent a fleet, and we had the more powerful navy.

Mr. HOBSON. But the Spaniards did not know it.

Mr. MANN. That is just what I say. Nobody knows it until it is over. We will not know it until it is over. Suppose we have a larger navy than Germany, we could not keep it at Panama, because the German navy might sail for New York. We could not keep it at New York, because they might sail for Panama. The gentleman talks about keeping track with the wireless, but I take it we could not get wireless messages telling us where they were.

Mr. HOBSON. If we had the proper scouting system we would have messages of our own. But I will say to the gentleman that he has pointed out a very interesting factor of our national defense. If we have not control of the sea, so that an enemy can take to sea and take his transports with him, he can strike anywhere from Portland, Me., to the Panama Canal; but if we have control of the sea, no foreign fleet would set out for our shores, and certainly no transports would go forth, without expecting and certainly having a fleet encounter with a superior force; and knowing that, such a foreign nation would be very slow to enter upon war with us, slower than under other conditions.

Mr. MANN. We had control of the sea, theoretically, at the time of the Spanish War, and Spain did not know it, and we did not know it. We did not know whether the Spanish fleet was on its way to Cuba or whether it was on its way to Porto Rica or to New York or to Portland or to Charleston or to New Orleans. I was here at that time in the House.

Mr. HOBSON. And I was with the fleet that was trying to find the Spanish fleet.

Mr. MANN. And the gentleman did not find it.

Mr. HOBSON. We finally found it.

Mr. MANN. Not until they got to their point of destination. Under the same circumstances, how can we have a fleet large enough—and I understood that is what the gentlemen were discussing—to protect the Panama Canal and at the same time protect all of the ports on the Atlantic, unless we maintain our fleet over in Germany to prevent their fleet starting out to sea?

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. BUCHANAN of Illinois. Mr. Chairman, I ask unanimous consent that the gentleman may continue for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BUCHANAN of Illinois. Mr. Chairman, I will ask the gentleman if he thinks the Germans are going to obtain control of the Panama Canal before it is completed and in successful operation?

Mr. HOBSON. No. I will say now, in answer to the gentleman from Illinois [Mr. MANN], that his questions are very illuminating. At the time of the Spanish War the foreign experts—not only the Spanish experts, but the German and other experts—actually estimated the Spanish fleet as equal, if not superior, to ours. It was upon that presumption that Spain went to war, instead of granting reforms in Cuba, and it was upon that presumption that she sent forth her fleet, a homogeneous fleet it was, too, of 21 knots speed, while our battleship fleet had monitors in it, and the battleships were only of 16 knots speed. When we finally got control of the sea, the war was over; the Seventh Army Corps, held ready in Florida, never embarked to go over and storm Habana. The war was over. If Spain had known that it had not control of the sea, that we could reach Cuba and Spain could not at will, then Spain as an intelligent organism would have granted us reasonable reforms, and only when we made unjust and unreasonable, even insulting, demands, which we never would make, would she have brought on the war; and the *Maine*, I believe, would never have been blown up.

By the way, let me say in connection with the trip of the *Oregon*, that in order to give us superiority the *Oregon* went posthaste on around the Horn. We believed that the *Oregon* would give us the balance of power. The Spaniards, when the *Maine* was blown up, evidently believed they had the balance. Suppose we had that condition to repeat to-day. If we wanted to bring forces from the Pacific to the Atlantic, if we were in control of the sea, we would bring them through the Panama Canal. If we had had the Panama Canal at the time of the Spanish War, the *Oregon* would have come through the canal. Of course, if we had had the Panama Canal, the Spanish fleet might have been directed against Panama instead of into Santiago; but I do not believe so, because they would not have had a base at Panama.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield for a question right there?

Mr. HOBSON. But if Spain were in control of the sea, we could not have sent the *Oregon* through or around either. I yield now to the gentleman from Missouri.

Mr. HENSLEY. I understood the gentleman to say a few moments ago that at the time we had the little difficulty over the Venezuelan situation our Navy was superior to Germany's navy, and that because of that fact Germany submitted to our demands, or yielded, by reason of that fact. I would ask the gentleman how he would compare the Navy of this Nation with the navy of Great Britain at that particular time, and whether Great Britain did not also yield to the position of the United States?

Mr. HOBSON. Great Britain did, and Great Britain yielded at the time President Cleveland issued his Venezuelan message, for the special reasons which I mentioned to the gentleman before, that Great Britain is not a military power, and even with full control of the sea she could not strike us, while we could strike Great Britain by ultimately taking Canada. That brings up the essential difference that should be borne in mind in comparing the German Navy with the British Navy. The Germans are content with a navy a little over half as large as the British, and why? As I said, because the British, though in undisputed control of the sea, can not invade Germany; but the British are not satisfied with a navy equal to that of Germany. The British demand a navy twice as great as that of Germany, and even then great uneasiness prevails, because if the German fleet should get control of the sea, the German armies would be thrown into England and it would be the end of the British Empire. If at Trafalgar, Admiral Villeneuve, the French admiral, with his Spanish allies, had destroyed the British fleet under Nelson, Napoleon instantly would have begun his embarkation to cross the English Channel and conquered England as had William the Conqueror, and the course of English civilization would have been different. That is the essential difference. We are like Great Britain. We have no great standing Army. We are open not only upon our mainland, where ultimately we could drive out any invader, and consequently an invader would not linger permanently, but simply do the damage and levy tribute on our cities and retire; but we have Hawaii, we have the Philippine Islands, we have the Panama Canal, we have the Monroe doctrine, covering the hemisphere, which makes it so that if we lose control of the sea to a nation that has a great army all of these interests are exposed. But suppose we have control of the sea, then no matter how powerful a foreign nation may be, if it has the greatest armies in the world and transportation ready to carry them over the sea, it would not dare venture across the sea, and our defense is complete.

Mr. SABATH. Will the gentleman permit me another question?

Mr. HOBSON. I yield to the gentleman.

Mr. SABATH. The gentleman has stated that due to the Panama Canal our danger is almost as great as it has been before the completion of the canal. Does the gentleman take into consideration the question of our fortifications at the Panama Canal?

Mr. HOBSON. Yes; I do. The gentleman will understand this. If you have a mobile army in conjunction with coast fortifications, your fortifications are secure, because no ship can stand up and fight in front and no army can land and take you in the rear, but if you have no mobile army and a nation with a powerful army has control of the sea she can land her army below and take your fortifications in the rear, because the fortifications are practically impotent from this attack unless you have a mobile army. Now as to the point on which I was proceeding. About 6 to 8 or 10 years ago our Navy was much superior to the German Navy. That is the comparison that gentlemen who have made this minority report have made. When they made a comparison of our Navy and the German Navy they incorporated the *Oregon* and other old ships with the ships of to-day. At the predreadnaught period, before dreadnaughts appeared at all, our Navy was fully 60 per cent stronger than the German Navy, but when I undertook to point out the other day you could not compare the *Oregon* and put it on the same line with the dreadnaughts of to-day it appeared actually so ridiculous that the gentleman from Virginia [Mr. SAUNDERS] began to try to make an explanation for any comparison with the *Oregon* having been made and said that I had put up a man of straw in order to knock him down to put the *Oregon* up against the *Pennsylvania*. I was not putting up any man of straw. Here is what the gentleman from Mississippi said:

> So in point of weight of the metal in a broadside, in point of the muzzle energy, in point of protection by their armor, in point of the destructive forces of the gun, there is not a battleship in the German line that is near equal to the *Oregon*. The truth of the business is if the *Oregon* was in a battle with any six German battleships it would destroy every one of them before they would get close enough for their guns to penetrate its armor.

Then he goes on to say he did not compare the *Oregon* with dreadnaughts; but when he says there is not a battleship in the German line that is near equal to the *Oregon*, my impression was of course he meant dreadnaughts in the line, because the line means the dreadnaught line. But I was not trying to compare the *Oregon* with the dreadnaughts merely as a point of controversy, but also as an illustration. The point I wanted to make was, and which I did make, and which nobody can contradict, and which no one has tried to contradict, is that a vessel of the predreadnaught period has no right to be put in a logical, rational comparison in the same class with vessels of the dreadnaught period.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HOBSON. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama? [After a pause.] The Chair hears none.

Mr. HOBSON. Mr. Chairman, I am sorry the gentleman from Virginia [Mr. SAUNDERS] has left, because I desired him to hear this: Here is the substance of what I tried to say. There is no comparison between the two. You might as well compare a street car pulled by horses along a street with electric cars of the New York subways as to compare ships of the predreadnaught period with the ships of the present day. They simply can not be compared. Taking the dreadnaught period, and here it is, I want Members to look at it on page 41 of the report of the committee, where it shows that Germany has 28 of the dreadnaught period, with a total of 678,000 tons, and assuming that we put into our list the *Michigan* and *South Carolina*, of only 16,000 tons, America would have only 14, with a tonnage of 329,000 tons, about half of that of Germany. That is the situation between the two navies to-day. Again, taking the naval appropriation bill's basis of comparison is not to take the totals of the bills and compare the lump sums any more than you would compare ships in a lump class. But compare the appropriations for new construction, what will you find? It costs about as much to build a dreadnaught in other countries as ours. Germany during that period from 1905 to 1913 has spent on dreadnaught construction about $457,000,000. America has spent during that period a total of $346,000,000. Japan in that period has spent $107,000,000 for new construction. Now take the years from 1909 to 1914. In this period Germany has spent on new construction $359,000,000, while the United States has spent $185,000,000 and Japan has spent $88,000,000. This verifies the comparison above and shows that Germany is in the midst of a program about twice as great as ours, while Japan is running up around more than half of ours. America to-day is down far below the German navy. The truth is, as the table shows, it is actually below France and is not very far ahead of Japan.

My contention was, and it is now, and it is rational, that when any great nation in Europe or in Asia has a great army, we are entitled to have, and for our security ought to have, at least, a fleet the equivalent of theirs on the ocean in question. If we have, then we can insure a chance for mobilization through the Panama Canal and realize a reasonable margin of superiority.

Mr. GARNER. If I understood the gentleman from Illinois and the reply of the gentleman from Alabama, it was that the construction of the Panama Canal weakens our defense.

Mr. HOBSON. If the enemy has the control of the sea.

Mr. GARNER. In other words, that it was a mistake from a defensive standpoint to have constructed the Panama Canal?

Mr. HOBSON. I think not. You can put this down, whether we learn the lesson before punishment comes or not, that America some day is going to have the Navy I am advocating. It is written in the book of fate. With our influence now covering the Western Hemisphere and the far-distant shores of South America, with the open-door policy, even now advocated in far-off Asia, America is going to be compelled to have this reasonable equilibrium in the two oceans which will insure her control of the sea, as far as defense is concerned, and will make the Panama Canal of vast permanent advantage to the Nation.

Mr. SAUNDERS. May I ask my friend a question in that connection? I was out a moment ago.

Mr. HOBSON. Certainly.

Mr. SAUNDERS. I understand from you, then, that for the proper defense of the United States, in your view, we ought to have a fleet in the Atlantic Ocean equivalent to the German fleet. In addition we should maintain in the Pacific Ocean another fleet that would be the equivalent of the Japanese fleet. This statement, if you are correct, would establish a naval policy for this country. Of course, as soon as we agree upon what is necessary for our interest and security, the next step will be to provide a construction program that will carry out that policy. Now, if that is to be our policy—and our program should carry out the policy—what would be your naval construction program, designed to afford the United States adequate protection? We all want adequate protection.

Mr. HOBSON. I am very glad the gentleman asked the question. It brings me right down to a final statement of what I believe ought to be the program. Assuming that we are not going to make up for our delinquencies in the past, it will take from three to three and one-half to keep up with Germany and one to one and one-half to keep up with Japan. It would take between four and five dreadnaughts a year for us to maintain the required equilibrium.

Mr. GARNER. Then we can not get adequate protection under the present program?

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE. Mr. Chairman, I reserved a point of order some time ago on the alien seamen paragraph, and now I wish to withdraw it and to offer an amendment.

Mr. HENSLEY. Will the gentleman allow me?

Mr. MOORE. Very well.

The CHAIRMAN. Without objection, the point of order is withdrawn.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order.

Mr. MOORE. I offered an amendment in lieu thereof.

The CHAIRMAN. The point of order is reserved.

Mr. HENSLEY. Mr. Chairman, there has been a great deal said in this debate concerning the fighting qualities of three battleships mentioned—the *Oregon*, the *Massachusetts*, and the *Indiana*. I desire to briefly call your attention to some records which have been made. A few days ago the chairman of the committee in his speech—and I would like very much to have the attention of all here—quoted from Admiral Dewey with reference to the fighting value of these battleships. And I shall now quote what the gentleman from Tennessee [Mr. PADGETT], the chairman of this committee, said when he quoted from Admiral Dewey a few days ago. He said:

> My opinion is that they have all three passed their limit of usefulness and are obsolete in guns, construction, and speed, and that they should be stricken from the list, as their military value does not compensate for the loss to the fleet that would be entailed by their manning and maintenance.

Now, that is the opinion of Admiral Dewey at this time. I call your attention to a portion of the speech made by the gentleman from Tennessee [Mr. PADGETT] on March 31, 1910, which also gives an opinion from Admiral Dewey. Now catch this, gentlemen:

> Speaking about ships becoming obsolete, I want to call your attention to a fact that may, perhaps, be somewhat misapprehended. It is said the life of a battleship is 20 years.

Now, gentlemen, listen:

In one sense, he says, and to a limited degree, that is correct, but the hull of a ship is preserved indefinitely. Admiral Dewey said that it would be as good in a hundred years, perhaps, as when it was made. It is the machinery on the ship that becomes worn out and antiquated. It is the guns on the ship that become obsolete by improvement in other guns; but when that machinery is taken out and up-to-date machinery put in, and when the old guns are taken out and up-to-date guns replace them, that battleship is approximately as good and as effective as when first launched.

Now, Mr. Chairman, in connection with this let me call your attention to the fact that these battleships have been in dry dock for the very purpose of reconstruction and repair, for the purpose of making them efficient. Now listen: The report of Secretary Meyer for the fiscal year 1910, on page 34, said the *Oregon* was laid up for extensive repairs for five years and five months, from April 26, 1906, to October, 1911; the *Indiana* for two years, from December 29, 1904, to January 8, 1906; the *Massachusetts* for two years and four months, from January 9, 1906, to April 28, 1910. For the construction of these vessels the following sums were expended, to wit, that is, the repairs covering the period of time they were there in those docks for the purpose of repair: The *Oregon* cost $1,709,468.11; the *Massachusetts* cost us $1,925,354.53; the *Indiana* cost us $2,112,202.55.

Now I ask, Mr. Chairman, in all candor and seriousness, if Admiral Dewey's opinion, given by the gentleman from Tennessee [Mr. PADGETT] in 1910, was correct, and if these vessels were put in dock for the purpose of repairing and making them efficient, why have we expended that sum of $5,747,025.17 upon them and to-day their usefulness and efficiency are nil, as expressed by Admiral Dewey?

The CHAIRMAN (Mr. HAY). The time of the gentleman from Missouri has expired.

Mr. PADGETT. Mr. Chairman, I think it is but just to state, with reference to Admiral Vreeland, some of whose statements were quoted, that he based them upon the continuation of the existing conditions in Europe. He says, answering a question—

At present you can not tell what will be the case a year hence. No one can tell.

And then further on he said:

At the present time no one can predict what alliances and ententes may exist a year hence.

So that in stating what proportion of its ships England or Germany or any other country might send, it would be based upon the conditions and international relations existing at the time the emergency arose.

The gentleman who just took his seat [Mr. HENSLEY] said that in 1910 I quoted Admiral Dewey as saying that the hull of a ship was as good a hundred years after as it was at the time it was made. That is true. The letter I read the other day from Admiral Dewey showed that the design of the *Oregon* has been changed so that to-day its armor is 4½ inches beneath the water level when it is loaded, showing that it matters not what sort of guns you put on it at the present time it would not be a fighting ship, because its whole protection is below the water line.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield right there?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Missouri?

Mr. PADGETT. Yes.

Mr. HENSLEY. Then will the gentleman answer me why we have expended $5,747,025.19 on the repair of those vessels if they are absolutely useless?

Mr. PADGETT. Those repairs, as stated in the letter I have from Admiral Watt, giving the amounts in detail, were repairs that had been made since the ships were launched 18 or 20 years ago, and they embrace the whole period of repairs. There was a large expenditure made in recent years, and events now show that in the progress and development of ships that have since been attained it was an expenditure that very well might have been dispensed with, and it shows that we have ships to-day on which it would have been very well to have left off those expenditures. But that is shown not by the light that we had at that time but by the developments of the present time and the immense progress and development that have been made in ships since then.

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Yes.

Mr. KELLEY of Michigan. Does the gentleman remember how long the *Oregon* was building? Was it five years?

Mr. PADGETT. I do not remember. You can find the date when its keel was laid and when it was put in commission.

Mr. KELLEY of Michigan. It was something like five years, was it not?

Mr. PADGETT. It was several years. I do not remember exactly how long.

Mr. KELLEY of Michigan. So that the plans and designs of the ships were prepared considerably more than five years before the ships were put in commission?

Mr. PADGETT. Yes.

Mr. HENSLEY. Mr. Chairman, do I understand the gentleman from Tennessee to charge that the report made by Secretary Meyer was incorrect as to the amount expended within the time I quoted?

Mr. PADGETT. I do not say the figures are incorrect for the time, but I have the figures of Admiral Watt, as specific years for whole period.

Mr. HENSLEY. If I can not safely proceed upon the theory that the figures that have been given by the department and the Secretary are true, I can not handle the matter properly.

Mr. PADGETT. The Secretary reported the gross sums of expenditure, without giving the years. The expenditures began in 1896 on the *Indiana* and continued up to the present time. They began in 1897 on the *Massachusetts*, and the sum given includes the present year 1914. The repairs on the *Oregon* began in 1897 and conclude with 1914. Each year is given here, making up the sums of which the gentleman gave the aggregate amount, as shown by the report.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. PADGETT. Mr. Chairman, I wanted to make one request. I think everybody will concede that I have been very liberal in regard to the time allotted to the discussion of the battleship proposition. We had 18 hours of general debate.

Mr. BUCHANAN of Illinois. Mr. Chairman, I want to ask the gentleman a question in regard to the expense of repairing these ships. I think it ought to be put in the RECORD when the money was expended. I think if we have been expending our money on obsolete ships there ought to be some investigation about it, to see why it is being done.

The CHAIRMAN. The gentleman is not entitled to the floor without unanimous consent.

Mr. PADGETT. I ask five minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. BATHRICK. Mr. Chairman, I think the gentleman from Tennessee very explicitly stated that these repairs ran along for a number of years.

Mr. BUCHANAN of Illinois. Who has got the floor?

The CHAIRMAN. The gentleman from Tennessee has the floor.

Mr. BUCHANAN of Illinois. Wait a moment. I want to make clear what information I wanted. I want a statement of the amount expended and the years it was expended in. I want that put in the RECORD, if the gentleman does not want to take up the time to repeat it.

Mr. PADGETT. I will include it in my remarks, covering each vessel and each year. This is the statement:

Statement showing expenditures by fiscal years, Title D, for repairs, including changes and additions.

	Indiana, first commissioned Nov. 20, 1895.	Massachusetts, first commissioned June 10, 1896.	Oregon, first commissioned July 15, 1896.
1896	$347.37		
1897	25,789.42	$19,685.37	$8,354.50
1898	13,096.63	20,516.25	12,741.78
1899	198,614.60	138,661.04	28,321.04
1900	90,306.20	82,151.67	34,541.00
1901	40,162.97	23,612.57	12,697.38
1902	34,068.16	32,589.58	291,930.54
1903	75,889.85	69,260.45	86,581.78
1904	230,100.26	125,255.74	22,623.70
1905	477,737.11	62,057.66	19,215.54
1906	538,765.55	8,705.18	8,627.36
1907	37,122.97	429,743.31	122,992.15
1908	27,993.29	347,489.78	104,022.86
1909	86,701.12	465,981.82	201,138.32
1910	109,726.57	42,950.62	304,356.34
1911	82,631.12	12,412.25	412,448.79
1912	17,101.72	5,766.45	27,059.81
1913	18,878.14	6,544.44	10,907.14
1914	4,569.50	1,970.35	937.99
Total	2,112,202.55	1,925,354.53	1,709,468.11

The above figures for fiscal years 1896 to 1913, inclusive, are as shown in the Paymaster General's annual reports for said years, and the figures for 1914 (to Feb. 1, 1914) are per monthly reports of expenditures from navy yards.

Mr. BATHRICK rose.

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Ohio?

Mr. PADGETT. Yes.

Mr. BATHRICK. I desire to state that these expenditures were made at the time, according to the information that was on hand at the time, and that there have been repeated changes and additions since then. The total expenditures cover these various periods down to the present time, and the money could not be stated to have been wasted.

Mr. COOPER. Mr. Chairman, will the gentleman yield there to an interruption?

Mr. PADGETT. Yes.

Mr. COOPER. May I ask the gentleman from Missouri [Mr. HENSLEY] from what report he read?

Mr. HENSLEY. I read from the report of Secretary Meyer, giving certain dates when these repairs were done on the vessels and the amounts expended.

Mr. COOPER. And the gentleman from Tennessee says that is incorrect?

Mr. PADGETT. No. I say that statement gives the totals up to that time, but it does not give the years in which the money was expended.

Mr. COOPER. The gentleman from Missouri says these repairs were all made during the three or four years he mentioned.

Mr. PADGETT. No; he said that Secretary Meyer stated that these ships had been laid up for general repairs between certain dates, and then he gave the total sums that had been expended on repairs of those vessels. The figures I am giving here commence with the commission of the vessel and cover the interval down to the present time.

Mr. COOPER. But the inference from what the gentleman from Missouri said was that those repairs were made between the dates that he named.

Mr. PADGETT. I do not know about that. I have just wanted to give the exact figures.

Now, the proposition I want to submit is this: At the opening of the general debate on this bill I asked for 18 hours of general debate, and all of it practically was consumed in the discussion of the battleship program. Now, we have had more than two hours of discussion on that same subject, all told, under the five-minute rule. I am going to request the House that we forego for the present any further discussion of battleship matters. We have had ample discussion. Nothing new is being brought out. There are many other things in this bill besides battleships, and I will ask that we proceed with the reading of the bill under the five-minute rule and not take up the time in debate.

The CHAIRMAN. Does the gentleman from Pennsylvania [Mr. MOORE] insist on his point of order?

Mr. MOORE. I withdrew the point of order and submitted an amendment, whereupon the gentleman from Wisconsin [Mr. STAFFORD] renewed the point of order.

The CHAIRMAN. Did the gentleman from Wisconsin reserve a point of order?

Mr. STAFFORD. I reserved a point of order during the occupancy of the chair by another Member.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order. Until the point of order is disposed of, an amendment is not in order.

Mr. MOORE. I desire to speak on the point of order, and ask to have the amendment read for information.

The CHAIRMAN. If there be no objection, the Clerk will report the amendment.

The Clerk read as follows:

Page 8, line 13, after the word "than," strike out "four" and insert "three"; and in line 16, on the same page, after the word "completed," strike out "four" and insert "three."

Mr. MOORE. Mr. Chairman, being a member of the Committee on Immigration and Naturalization, I intended to ask the chairman of the committee to explain why this item appears in the naval appropriation bill; but having conferred with the chairman of that committee and others on the committee, I do not desire to make a point of order against the paragraph, which I assume would be sustained if the question were raised. More particularly would I not want to raise that point of order at this time, when young men are being called upon to enlist in the Navy for purposes of national defense. Although technically this matter should have gone to the Committee on Immigration and Naturalization, there seems to be no good reason why we should discourage young aliens, who have taken up their residence in this country, from enlisting in the wars of the United States, if wars there be. And in submitting an amendment which I trust may have the attention of the gentleman from Wisconsin and of the Committee of the Whole, and may ultimately induce the gentleman from Wisconsin to withdraw his point of order, I have hoped to remedy an apparent defect in the law with regard to the naturalization of aliens who enlist in the Navy of the United States.

Last week two young men, both residents of the city of Philadelphia, laid down their lives at Vera Cruz. The question has arisen as to what is to be done with those dependent upon those two young men. They were both natives. I have made inquiry at the Navy Department and have learned that there is some sort of provision by which at least a half year's pay may be allowed to those dependent upon these two young sailors. In one particular case a year's pay would be none too large an allowance, because a mother has been left destitute with three minor children, and this is made worse by the withdrawal of the pittances which her patriotic boy sent home. There is only one other way to take care of their dependents after the enlistments—after wounds, and after death—and that is by pension. The pensions, if applied for, in the case of these two young men can not possibly exceed $12 per month to a dependent mother or father; and this $12 per month, or $144 a year, is a small amount for a great Government to pay to those who sacrifice the lives of loved ones in the service of the country. But in the case of civil employees, men who are killed in an accident on river and harbor work, for instance, the law provides that we shall vote to the dependent relatives at least one year's pay.

That is for civil service. Now, it seems to me, where a boy, native or foregin born, enlists and offers his services, aye, even his life to this country—and it is extremely creditable to him if he does it as an alien boy—there ought to be some better return to those who have given him up than this $12 per month, or this half year's salary.

Many boys of foreign birth are to-day going into the service of the United States. Some of them will be wounded and some of them will be killed. What are we going to do for their dependents?

Leaving that question aside for the moment, we have one or two anomolies in the law. We have provided in the case of a man who enlists in the Army that he may, after one year's honorable service, on the presentation of his certificate, be permitted to apply for naturalization and receive it in our Federal courts. Mark you, that alien who seeks after service in the Army to become a citizen of the United States has the advantage over other aliens; upon proof that he has served this country in the Army for one year he may then apply for naturalization and receive it. I do not know of any provision in this regard that takes care of the boy who enlists in the Navy. I presume the purpose of the Naval Affairs Committee in bringing in this four-years paragraph was to give some encouragement to the alien who enlists in the Navy, very much as we have already given encouragement to the soldier who enlists in the Army.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. MOORE. I suppose it was the hope and expectation of the Naval Affairs Committee that after four years of honorable service, and on the presentation of the certificate, that would be sufficient proof to the court that the alien seaman was entitled to citizenship and might receive his naturalization papers. There is, as I believe, no special provision for the sailor who enlists in the naval service to-day. Strange to say—and rather surprising, too, in view of this request of the committee—we passed a law some years ago, which is operative to-day, granting the right of application for citizenship to the sailor who does not engage in the service of the United States, who does not take up arms in defense of this country, but who serves three years as a seaman on board a merchant vessel. To that man we say: "If you engage in the merchant marine service of the United States—if you, an alien, will help to build up our coastwise trade, if you will come under the American flag and serve in a merchant vessel, not a war vessel, where your life is at stake—then, on the mere certificate of the captain of your vessel that you have been on board that vessel for three years and that you have been honorably discharged, the court shall consider your application for naturalization."

So that we are in this position to-day. With a possible war on hand to the south of us, with the demand for young men to go to the front, with many men offering for enlistment who can not be naturalized because of the crowded condition of the courts, we say to an alien who enlists for service in the Army of the United States that he may become a citizen if it

is shown that he has served in the Army for one year, or if it is shown that he has engaged with the merchant marine service of the United States—that is to say, if he engages with some private employer who sends forth a ship floating the American flag and has served in that service three years, he is qualified for naturalization, and the court is authorized to grant him papers. But if the alien goes down to one of our navy yards or to one of our navy recruiting stations and offers his services to the United States, puts the musket on his shoulder, and goes into service in Vera Cruz or Tampico or the interior of Mexico, fighting for this country, there is no way that he can obtain naturalization unless he comes back and lives out his five years' residence and takes his chances in the courts.

If we have given a preference to the alien who serves in the Army and we let him in after one year, or as to the merchant marine service, we let him apply after three years' honorable service, then tell me why we should not reduce the period of the residence of the alien who enlists upon the battleship and takes his life in his hands for this country? Why, after an honorable service of three years, should he not be put on equal terms with an alien who serves on the merchant vessel or in the Army?

I am submitting the matter because at this time it seems to be just and fair to those who are asked to serve this country when the country needs their services. I hope the gentleman from Wisconsin will withdraw his point of order and permit the matter to be discussed.

Mr. STAFFORD. Mr. Chairman, reserving a point of order, I have listened enraptured, as Members of the House always do, to the eloquent words of the distinguished gentleman from Pennsylvania, but this question has nothing to do with the present situation that confronts us in Mexico, or as an incentive to enlistment, and whether it stays in this bill or not, it would not add one iota to the inducement to enlistment in the Navy.

The gentleman from Pennsylvania is an authority on matters pertaining to naturalization because he is a distinguished member of the Committee on Immigration and Naturalization. I am surprised in this particular instance that he has not refreshed his memory so as to really know what the amendment purposes to do. There is at present a law on the statute book that gives the seamen in the Navy and the Marine Corps the privilege of taking out citizenship papers after they have served five years. This provision reduces that to four years, but it has been pointed out by the officials of the Navy Department that the seamen have difficulty in proving their good moral character by two witnesses as is prescribed under the general law admitting aliens to citizenship, and so this bill provides for striking out the words after "good moral character," "as now provided by law." I think everybody in this Chamber will recognize the remarkable character of the amendment offered by the gentleman from Pennsylavnia in reducing the period from four to three years. This provision is predicated on the idea that the seaman who has served for the full period of enlistment of four years is to receive citizenship based on that idea, and the gentleman from Pennsylvania wishes to adopt a conflicting amendment and substitute three years. This proposition has been very carefully considered by the officials of the Navy Department, and my purpose in reserving the point of order was to inquire not as to the matters discussed by the gentleman from Pennsylvania, because they are immaterial and irrelevant, but whether we should extend the law that now exists to those in the auxiliary service.

I can understand why it is wise to regard the service of men in the Navy removed from shore duty on the ship as equal to a residence on land. I can understand wherein there should be a qualification in relation to citizenship extended to those who enlist in the Navy where we require three years' service and one year's residence on land as to men enlisted in the Army.

But different conditions prevail entirely in the naval auxiliary service. I would like to inquire why you should extend the law to those in the naval auxiliary service?

Mr. PADGETT. Those in the naval auxiliary service that are in the Navy are and do have the benefit of it. But in the naval auxiliary service there are men who are employed there simply and are not under enlistment. This provision limits it to enlisted men. If an enlisted man is serving in the auxiliary service he is in the Navy just as much as if he was on a battleship. But in the auxiliary service there are men who simply are working for wages; they are employed as they would be in private life and are not enlisted men.

Mr. STAFFORD. Does this provision give everybody in the auxiliary navy—those employed on the Great Lakes and others—the privilege of citizenship after four years' service?

Mr. PADGETT. Yes; if they are enlisted men.

Mr. STAFFORD. What disqualifies these men from at any time qualifying for citizenship? They are on land, performing the duties the same as they would be in private life.

Mr. PADGETT. A great many of them are on colliers out on the sea.

Mr. ROBERTS of Massachusetts. I think the gentleman from Wisconsin is confusing the Naval Militia with the naval auxiliary.

Mr. STAFFORD. I was trying to understand whether this provision included the Naval Militia.

Mr. ROBERTS of Massachusetts. Oh, no, indeed. The naval auxiliary has a peculiar meaning in the service. It means colliers, supply ships, and classes of ships other than the battleships.

Mr. STAFFORD. Mr. Chairman, it was my main purpose——

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. Mr. Chairman, it was my main purpose in reserving a point of order to obtain information as to whether this term "naval auxiliary" would extend to the Naval Militia?

Mr. PADGETT. No; that is not a part of the naval auxiliary at all.

Mr. STAFFORD. I can see there would be no applicability to that service.

Mr. PADGETT. Mr. Chairman, the Naval Militia are simply at sea at stated periods during the year for practice. They are not at sea all of the while. They go to their maneuvers and practice, just like the land militia or the National Guards go out and have their summer practices. This does not affect the Naval Militia.

Mr. STAFFORD. Mr. Chairman, I certainly would not wish to establish a bar to the gentleman from Pennsylvania [Mr. MOORE] offering his amendment to reduce the number of years from four to three years, and accordingly I withdraw the point of order. If the gentleman wishes to ask me any questions, I would be very glad to yield to him.

The CHAIRMAN. Without objection, the point of order will be withdrawn. [After a pause.] Is there objection?

Mr. MOORE. Mr. Chairman, in view of the magnanimous action of the gentleman from Wisconsin [Mr. STAFFORD], I shall withdraw any comments upon the adjectives he applied to me and to my argument.

The CHAIRMAN. The Chair did not understand whether the gentleman from Pennsylvania rises to make objection to the withdrawal of the point of order. Is there objection? [After a pause.] The Chair hears none, and the point of order is withdrawn.

Mr. MOORE. Mr. Chairman, I repeat that in view of the magnanimity—because I want to use a big word—displayed by the gentleman from Wisconsin [Mr. STAFFORD] in withdrawing the point of order against this meritorious provision, I shall not comment upon the adjectives he applied to me in my argument. I believe there is a spark of patriotism, in fact, several sparks of patriotism, in his manly breast, and I appreciate that fact, and make public acknowledgment of it now; but I would like to say to the gentleman that I am unable to see wherein it is "ridiculous" to suggest—I withdraw that word, if I have misquoted the gentleman—that if we give the privilege of citizenship to a man who has served on a merchant vessel, after three years of service, upon the certificate of his captain only—that being sufficient to satisfy the courts—we should also accord that same privilege after a three-year service, whether the enlistment period be for three years or four years or five years—and in this case it happens to be four years—when that man enlists in the service of this country, and not in the service of any private vessel, and offers his life in our defense. Mr. Chairman, I do not believe the gentleman from Wisconsin [Mr. STAFFORD] means to criticize that situation, and I do not impute any such motive to him, but I can not harmonize the suggestion that it is fair to require an alien enlisting in the Army to serve only one year, in order to obtain his naturalization and become a citizen of the country, and not unfair to hold up an alien who engages upon a battleship for a period of four years because that happens to be the term of enlistment. Mr. Chairman, is the amendment before the House now?

The CHAIRMAN. No.

Mr. MOORE. Then, in view of the withdrawal of the point of order, I shall reoffer the amendment changing the period

from four to three years, and I will ask to have the amendment read.

The Clerk read as follows:

Page 8, line 13, after the word "than," strike out the word "four" and insert the word "three," and on line 16 of the same page, after the word "completed," strike out the word "four" and insert the word "three."

Mr. PADGETT. Mr. Chairman, as a matter of equalizing, I shall not object, but I can call to the gentleman's attention at once a matter that has occurred to me. Since the enlistment in the Navy is for a period of four years, the enlisted man can not have a discharge until he has served the four-year term of enlistment, and by providing that he should receive naturalization at the end of three years, there is a conflict at once.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MOORE. Suppose an alien enlists in the Navy to-day, goes to Vera Cruz, arrives there two weeks hence, is wounded so that he is of no further use to the Navy, and is honorably discharged, comes back to this country, and seeks citizenship in order that he may conduct some petty little business with which to earn a living, why hold him up for four years before he is qualified to go to a court to apply for naturalization?

Mr. PADGETT. This provision reads:

Any alien of the age of 21 years and upward who may, under existing law, become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States Navy or Marine Corps, and who has received therefrom an honorable discharge or an ordinary discharge—

And so forth.

The regular enlistment is four years. To now strike out "four" and insert "three" would make it read:

For one enlistment of not less than three years.

Whereas there is no enlistment of three years provided for by law. It causes confusion immediately.

Mr. MOORE. Mr. Chairman, will the gentleman permit me to call attention to section 2174 of the United States Statutes, which provides:

Every seaman, being a foreigner, who declares his intention of becoming a citizen of the United States in any competent court and shall have served three years on board of a merchant vessel of the United States subsequent to the date of such declaration, may, on his application to any competent court, and the production of his certificate of discharge and good conduct during that time, together with the certificate of his declaration of intention to become a citizen, be admitted a citizen of the United States.

Mr. PADGETT. That is very true. He has no enlistment. There is no enlistment period prescribed by law. That is a permission. He could retire from the merchant service at will. Here the man has enlisted and the term of enlistment is fixed at four years. To strike that out and give him that privilege at the end of three years, when there is no enlistment period of three years, would create confusion. He would not be discharged at the end of the three years.

Mr. MOORE. What of the alien who is discharged by reason of wounds or for other cause before the four-year term of enlistment expires?

Mr. PADGETT. That may be an exceptional case, but that would be a confusion.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the purpose of this section that is under discussion is not to induce young aliens to come into the service. As a matter of fact, we are not enlisting aliens; we are only enlisting American citizens. The real reason for this change of law is to take care of certain cases now in the Navy of aliens who, up to a certain period, were being allowed increased pay that came to them from reenlistment. The naval authorities had treated their services in the Navy as having made them citizens, but the comptroller rendered a decision that men were not entitled to this increase of pay from reenlistment unless they were American citizens.

Now, the law stated these men who were not citizens and who had been in the Navy and had been reenlisted could not become citizens, because they could not get the year's residence ashore required in most jurisdictions, and because they could not furnish a certificate of good conduct, and so forth. Hence, we propose to change the law as suggested by the Navy Department, to take care of those men, who are to all intents and purposes citizens and who have been getting the advantage of the increased pay on reenlistment until the comptroller decided it was unlawful, and to make it so that these men will become citizens and give them the same advantage that the native-born citizen has on reenlisting the second or third and fourth time. It is not at all for the purpose of bringing young aliens into the service. We do not want them. I mean by that no disparagement to the alien, but we are getting almost all of the membership of the naval personnel from American citizens and we are only taking American citizens into the service now, hence the amendment of the gentleman would be useless.

Mr. SABATH. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. I yield to the gentleman.

Mr. SABATH. Do I understand the gentleman to state that we do not accept aliens in the Navy now?

Mr. ROBERTS of Massachusetts. That is the practice to-day. We are not taking aliens in the Navy except on reenlistment. We reenlist a certain class of aliens who have been in the service and are very glad to do so. Now, if the period be changed to three years, as suggested by the gentleman from Pennsylvania, it does not touch the case at all of the men who have been enlisted and reenlisted for the four-year period and have not been able under the decision of the comptroller to get an increased pay by reenlistment, and I have great doubt if the three-year period would not defeat the very purpose of this bill, because they would not have served the three-year enlistment.

Mr. BRYAN. Mr. Chairman, the gentleman from Massachusetts [Mr. ROBERTS] has called attention to a situation that really has caused a great deal of embarrassment to enlisted men in the Navy and one that we ought to lose no opportunity of correcting. On May the 22d, 1913, I received a letter from George Penney, ship's cook, first class, United States Navy, written from the U. S. S. *Galveston*, which is as follows:

U. S. S. GALVESTON,
Navy Yard, Puget Sound, Wash., May 22, 1913.

Hon. JAMES W. BRYAN,
United States Representative from State of Washington,
Washington, D. C.

MY DEAR SIR: I am writing you to ask your help in the matter explained below.

It is a matter of the very greatest importance, and through no fault of my own. I am placed in very serious financial difficulties. Unless there should be some relief I shall lose my home and all my property, and if you can help me in this matter I shall consider myself under the greatest obligations to you.

I first enlisted in the Navy March 10, 1896. At the time I enlisted I was a citizen of Newfoundland, but my first papers had been taken out in Los Angeles, Cal., on June 20, 1892. My record has been excellent throughout my service. I served in the Spanish-American War on the U. S. S. *Charleston* and in the Philippine campaign following that war.

I have served continuously in the Navy since I first enlisted, never remaining out more than one day between enlistments.

I hold war medals for the Spanish-American War and for Philippine campaign and three good-conduct medals.

I have considered myself a citizen of the United States ever since I reenlisted in 1903, as the recruiting officer enlisting me told me that my continuous service in the Navy made me a citizen, and so entered it on my enlistment record. I have been receiving extra pay given to a citizen for reenlisting ever since the issuance of General Order No. 34 by President Roosevelt in 1907.

By a decision of the Auditor of the Navy Department, my account has already been checked a large sum, and undoubtedly the checkage will finally be carried back until about $428 is taken from me.

I have been married for 10 years and have two children. I have not yet paid for my home in Charleston, Wash.; and as there is a mortgage on this, I shall lose my home and find great difficulty in supporting my family unless something is done to relieve me.

The Navy Department is trying to get Congress to straighten out the tangle, as there are hundreds of men in my situation. I earnestly request that you visit the Bureau of Navigation and find out just how you can bring about speedy action in my case.

I met you in Charleston last fall and have always regarded you as a personal friend. I feel sure that if the matter is brought to the attention of those concerned in legislation that they will adopt some means of relieving myself and others in the same situation.

I have also written to Hon. WESLEY L. JONES, Hon. WILLIAM E. HUMPHREY, and Hon. RICHMOND P. HOBSON.

Respectfully, yours,

GEORGE PENNEY,
Ship's Cook, First Class, United States Navy.

Thereupon I communicated with the Secretary of the Navy, and I received the following letter:

DEPARTMENT OF THE NAVY,
Washington, June 10, 1913.

Hon. JAMES W. BRYAN, M. C.,
House of Representatives, Washington, D. C.

MY DEAR MR. BRYAN: I transmit herewith a letter addressed to you by George Penney, ship's cook, first class, on board of the *Galveston*, which he forwarded through official channels.

Through Executive orders additional pay has for several years been given to men for reenlistment, if they were citizens. In December last, in a decision of the comptroller, it was held that it was incumbent upon pay officers to satisfy themselves of the sufficiency of the evidence of citizenship, and as a result pay officers are requiring all men who have received these benefits to produce evidence of their citizenship.

Evidence of birth in the United States is in a great many cases impossible to secure, and while the difficulties are not so great in proving naturalization, there are hundreds of men in the same position as Penney, who have believed, by reason of their service and residence, that they were citizens. The department believes that under the act of Congress approved July 26, 1894, providing for the naturalization of aliens who have enlisted in the United States Navy and been honorably discharged after five years' service, Penney and others are really de facto citizens although they have never gone through the formality required by said act.

The hardships which the enlisted men of long service are made to suffer as the result of the above can not be too strongly dwelt upon. Checkages range from a few hundred to, in one case, over $2,000, and some of the men face the proposition of working for years without a cent of money for themselves or their families unless relief is afforded by Congress.

A bill has been introduced by the chairman of the Naval Committee having in view this relief, and the department hopes that you will lend your earnest cooperation to the prompt passage of this bill.

Sincerely, yours,

JOSEPHUS DANIELS.

Then came the decision of the comptroller, to which the gentleman from Massachusetts has referred, in which the comptroller held that paymasters in paying this additional pay to these enlisted men paid it at their own peril in case it was discovered that the enlisted men were not citizens, and so it became necessary for these enlisted men to submit proof of their citizenship and their naturalization, which bore very hard upon these men. This enlisted man, George Penney, was subject to a charge of $400 or $500, and he states in his letter that he is liable to lose his home in the navy yard town of Charleston, Wash. The same situation prevails in the case of Peter Mason. I referred his case to the Secretary of the Navy, and I have the following reply:

DEPARTMENT OF THE NAVY,
Washington, April 26, 1913.

Hon. J. W. BRYAN, M. C.,
House of Representatives, Washington, D. C.

MY DEAR MR. BRYAN: I have received your letter of April 25, 1913, inclosing a communication of Peter Mason, Bremerton, Wash., regarding pay checked on account of his inability to present evidence of citizenship.

An Executive order of November 27, 1906, allowed $5 additional pay per month to men who reenlisted after a discharge on account of expiration of enlistment and who were citizens of the United States, and this was later enacted into law.

Mason was discharged December 22, 1909, on account of expiration of enlistment, and reenlisted December 23, 1909, and as he made oath he was a naturalized citizen of the United States he was credited with the $5 additional pay per month from the date of reenlistment.

Recently the Comptroller of the Treasury decided that the risk of making payments to enlisted men of the Navy under the above order rested solely with the pay officers, and that it was incumbent upon the pay officers to satisfy themselves as to the sufficiency of the evidence of citizenship presented, and that it was their right to refuse to make such payments unless in their judgment the evidence was legally sufficient. As a result a large number of men when called upon for evidence of citizenship found themselves in the same unfortunate position as Mason, and have been checked for the entire amount of the additional pay received.

While greatly sympathizing with these men, some of whom, like Mason, will receive no money for an extended period, the department has no discretionary power in the matter, as citizenship is a requirement. The department has in preparation the drafting of a bill which is intended to relieve these men from the checkage, and it is hoped there will be no difficulty in getting it enacted this session. The department is powerless in this matter without the aid of Congress.

Sincerely, yours,

JOSEPHUS DANIELS.

So far as making the amendment for three years is concerned, I do not see any great question concerning that, and, if desired, the amendment can be amended and worded in such a way as not to interfere with this additional pay. I have no doubt about that. The main object is the relief of these men who actually served in the Navy, who have fought and performed their duty, and who have rendered obedient and sufficient service. I think that the purpose is right, and there should be no hesitation about it, and I am glad the point of order has been withdrawn, and I hope that the provision will pass. Many of these men have rendered distinguished service, as was the case of George Penney, with his medals and his record of good service.

Mr. PADGETT, the chairman of the Committee on Naval Affairs, introduced a bill on June 6, 1913, containing the following provision:

That hereafter the increased pay authorized by law for each rating of the Navy during the second and subsequent periods of service of enlisted men who are citizens of the United States shall be paid to such enlisted men as are otherwise entitled thereto, irrespective of the citizenship of such enlisted men: *Provided*, That any and all enlisted men who have, subsequent to the 27th day of March, 1906, been carried on the records of the Navy Department as citizens of the United States shall be entitled to any increased pay to which they would have been entitled if citizens of the United States: *And provided further*, That where any enlisted men of the Navy have received such increased pay and have subsequently been checked on account of their inability to prove that they were citizens of the United States during the time they were in receipt of such increased pay, the proper accounting officers of the Treasury are hereby authorized and directed to reopen the accounts of such enlisted men and to credit them respectively with the amounts so checked against them.

I think it is absurd to place men in the situation of Penney and Mason and many others on a different plane as to pay and privileges than others who may have more definite records as to citizenship. There is no question as to their service; there should be no further questions raised.

Mr. SABATH. Mr. Chairman, I am just as jealous of the rights and jurisdiction of my committee as the gentleman from Pennsylvania or any other member of that committee. However, when a committee refuses to act on an important matter and refuses to listen to appeals and refuses to report bills placed before them which are fair and just, then I can not criticize some other committee which has acted in the right direction when ours has failed. In fact, I congratulate the chairman of the Committee on Naval Affairs in reporting the bill which embodies this provision. I think it is legislation aimed in the right direction, and it should be adopted. I can not agree with the gentleman from Pennsylvania in his amendment. I really believe that it will not benefit the bill in any way. I think the provision as it now reads is much stronger than the provision that we have pertaining to those aliens who enlist in the Army and those who enlist in the merchant marine. In those cases they are obliged to file a declaration of intention, whereas this section reads that there is no need for such enlisted alien to file a declaration of intention. It provides that after he has served his four years, or after he is honorably discharged, he can apply for citizenship and it will be granted without his making an application beforehand and filing an intention or declaring his intention to become a citizen.

Mr. MOORE. How does the gentleman explain the difference between the three years allowed to the man in the merchant service and the four years required of the man in the naval service?

Mr. SABATH. Do you mean section 2174?

Mr. MOORE. Yes.

Mr. SABATH. That section provides for a seaman who is a foreigner, but who declares his intention to become a citizen of the United States. Now, in that case he must first declare, and the chances are 99 out of 100 that he will not declare his intention until he has spent two, three, four, or, perhaps, five years in the country. In fact, it matters not how long he has been a resident of the United States, he must wait three years more after he has filed his declaration of intention.

Mr. MOORE. But, on the face of it, does he not have one year's advantage over the man in the naval service if this provision is carried to-day?

Mr. SABATH. Well, as I have stated to the gentleman from Pennsylvania before, I do not think he has, because under this provision it is not necessary for him to file the declaration of intention of becoming a citizen.

Mr. MOORE. There is certainly one year's difference between three years and four years. I will ask the gentleman how he accounts for the difference between the one year of service required of a man who enlists in the Army and the four years that are required of the man who enlists in the Navy?

Mr. SABATH. To what section or provision does the gentleman from Pennsylvania refer as to the one year in the Army?

Mr. MOORE. It is in the Revised Statutes.

Mr. SABATH. I do not know of any section that would give anyone the right to become an American citizen in one year.

Mr. MOORE. The section I read said that the alien enlisting in the Army can after one year's service, or on proof that he served one year, have the court approve his papers for naturalization.

Mr. SABATH. Well, I am not acquainted with that provision.

Mr. MOORE. I showed it to the gentleman. The one-year provision is clear. The soldier submits to the court evidence that he served one year, and that is to be regarded as sufficient proof.

Mr. SABATH. The gentleman from Pennsylvania [Mr. MOORE] is under the wrong impression. He has reference to section 2166, which provides:

Any alien of the age of 21 years and upward who has enlisted, or may enlist, in the armies of the United States, either the regular or volunteer forces, and has been, or may be hereafter, honorably discharged shall be admitted to become a citizen of the United States upon his petition without any previous declaration of his intention to become such; and he shall not be required to prove more than one year's residence within the United States previous to his application to become such citizen; and the court admitting such alien shall, in addition to such proof of residence and good moral character, as now provided by law, be satisfied by competent proof of such person's having been honorably discharged from the service of the United States.

Therefore this means one additional year after his honorable discharge from the Army and not that he can be naturalized in one year because of the fact that he has been in the Army.

Mr. MOORE. I will say to the gentleman that there is a discrepancy there. I do not care whether the Naval Committee remedies this or it is done somewhere else.

Mr. SABATH. Had the Committee on Immigration and Naturalization done as you and I requested the last four or five years, all of these provisions would have been embodied in one and made much more liberal than they are now, and there could be no misunderstanding or misconstruction. For that reason I welcome this provision in the bill, and, of course, I would not object to the gentleman's amendment, realizing that he means well and that he at all times desires to aid and assist those deserving aliens who are willing to sacrifice their lives for their adopted country, were it not clear to me that it may

endanger the provision as well as the relief contemplated by the committee.

Mr. MOORE. If he fights for us, we want to give him a chance for citizenship.

Mr. SABATH. I agree with you, and I want to say that that is what I have been asking and advocating ever since I first became a Member of this House.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MOORE. Division, Mr. Chairman.

The committee divided; and there were—yeas 14, nays 30.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Outfits on first enlistment: Outfits for all enlisted men and apprentice seamen of the Navy on first enlistment, at not to exceed $60 each, $800,000: *Provided*, That the Secretary of the Navy is authorized to issue a clothing outfit to all enlisted men serving in their second enlistment who failed to receive an outfit of the value authorized by law on their first enlistment, or who, having received such outfit, were required to refund its value on account of discharge prior to expiration of enlistment: *Provided further*, That the net cost to the Government of clothing outfits furnished any one enlisted man shall not exceed $60.

Mr. MADDEN. Mr. Chairman, I reserve a point of order for the purpose of asking the chairman of the committee what the purpose of these two provisos is.

Mr. PADGETT. Under the law, when a person enlists in the Navy he is entitled to an outfit of $60 for clothing. There was a case brought to the attention of the committee by the gentleman from California [Mr. STEPHENS] and also by the department—and it appears in the hearings—where a young man enlisted, and before he got his outfit he was discharged and got no outfit on that enlistment, and then he reenlisted, and when they went to give him an outfit the authorities held that he could not get any outfit at all; that he ought to have gotten it on his first enlistment; and not getting it on his first enlistment, he was not entitled to it. And when he enlisted a second time, that being a second enlistment, the law did not provide for any on second enlistment. And this sailor who enlisted did not get the clothing that he was entitled to get.

Mr. MADDEN. And this is just made to meet a special case, then, is it not?

Mr. PADGETT. No; it is to meet cases of that kind. There are other cases, but this one is illustrative.

Mr. ROBERTS of Massachusetts. I might, if the chairman will pardon me, say it quite frequently happens that during the first enlistment the man does not draw the full amount to which he is entitled, and on his second enlistment he is not allowed to draw the balance, and it is thought by the department only fair, especially as he comes back into the service, that he should then have the undrawn balance allowed to him.

Mr. MADDEN. And a new outfit as well?

Mr. ROBERTS of Massachusetts. No.

Mr. PADGETT. To finish out the outfit which he failed to get.

Mr. ROBERTS of Massachusetts. The outfit only comes to the men on first enlistment.

Mr. MADDEN. Mr. Chairman, I withdraw the point of order.

Mr. STEPHENS of California. Mr. Chairman, I would like to say one word about this very proposition. The case was brought to the attention of the committee because of a young man at Los Angeles, a most excellent young man, who enlisted in the Navy with the consent of his father. He was passed by the surgeon there, taken to San Francisco, and passed by the surgeon there, and then taken to the training school, where he was rejected. In all he was in the service six days. Within 30 days after that time the Secretary of the Navy permitted him to reenlist. He did so, and when about to draw his first month's pay was informed that there was nothing coming to him, because his clothing outfit was charged to him. Enlisted men are entitled to a clothing allowance of $60 on first enlistment. The boy was declared to be serving his second enlistment, and therefore not entitled to a clothing allowance, notwithstanding the fact that he never before had drawn one single penny of allowance for clothing. The case came to Washington, and it was decided here by the law department of the Navy that this was the young man's second enlistment and not his first, and therefore he was not entitled to clothing allowance. Thus a technicality had worked and would continue to work a rank injustice to honest and patriotic young men anxious to serve their country and their country's flag. This provision is put in here to cure cases of this kind, of which there have been quite a number. The Navy Department desires this change in the law for the good of the service.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Naval training station, Great Lakes: Maintenance of naval training station: Labor and material, general care, repairs, and improvements of grounds, buildings, and piers; street car fare; purchase and maintenance of live stock, and attendance on same; motor-propelled vehicles, wagons, carts, implements, and tools, and repairs to same; fire apparatus and extinguishers; gymnastic implements; models and other articles needed in instruction of apprentice seamen; printing outfit and material, and maintenance of same; heating and lighting, and repairs to power-plant equipment, distributing mains, tunnel, and conduits; stationery, books, schoolbooks, and periodicals; washing, packing boxes and materials; lectures and suitable entertainments for apprentice seamen; and all other contingent expenses: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, drafting, inspection, and messenger service for the fiscal year ending June 30, 1915, shall not exceed $1,500; in all, naval training station, Great Lakes, $98,457.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] moves to strike out the last word.

Mr. MADDEN. Mr. Chairman, I notice that the committee has reduced the amount for clerical hire to be paid out under the direction of the Secretary of the Navy from $44,553.36 to $1,500. I was wondering whether the reduction would cripple the service there.

Mr. PADGETT. They are not reducing it there. That old amount was the amount for clerical service, drafting, and so forth, that was in the bill while the station was under construction and building. It included pay of the building force. Last year their drafting expenses, and so forth, were a little less than $1,500, and we put it at $1,500. That is a little bit more than the actual expenses of last year.

Mr. MADDEN. This clause provides that "the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, drafting, inspection, and messenger service for the fiscal year ending June 30, 1915, shall not exceed $1,500"; so that really it was not mere clerical service last year, but included a lot of other service?

Mr. PADGETT. Yes; that is right. Last year it did not amount to $1,500.

Mr. MADDEN. And there is no reduction now?

Mr. PADGETT. There is no reduction. The other figures were put in there at the time that that clerical and drafting force was used in the work of building the station.

Mr. MADDEN. One thousand five hundred dollars would about pay one man as a clerk, would it not?

Mr. PADGETT. Yes.

Mr. MADDEN. Is the clerical work done by the officers?

Mr. PADGETT. Yes, sir.

Mr. MADDEN. Or the enlisted men, or both?

Mr. PADGETT. It is done by apprentice boys and others there.

Mr. MADDEN. And they are not classed as "clerks" at all?

Mr. PADGETT. No.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Naval Home, Philadelphia, Pa., pay of employees: One secretary, $1,600; 1 foreman mechanic, $1,500; 1 superintendent of grounds, at $720; 1 steward, at $720; 1 store laborer, at $480; 1 matron, at $420; 1 beneficiaries' attendant, at $300; 1 chief cook, at $480; 1 assistant cook, at $360; 1 assistant cook, at $300; 1 chief laundress, at $240; 5 laundresses, at $192 each; 4 scrubbers, at $192 each; 1 head waitress, at $300; 8 waitresses, at $192 each; 1 kitchen servant, at $300; 5 laborers, at $360 each; 1 stable keeper and driver, at $480; 1 master-at-arms, at $720; 2 house corporals, at $300 each; 1 barber, at $360; 1 carpenter, at $846; 1 painter, at $846; 1 painter, at $720; 1 engineer for elevator and machinery, $720; 5 laborers, at $540 each; 1 laborer, at $420; 1 laborer, at $360; total for employees, $22,696.

Mr. FOWLER. Mr. Chairman, I reserve the point of order on the paragraph.

The CHAIRMAN (Mr. JOHNSON of Kentucky). The gentleman from Illinois [Mr. FOWLER] reserves a point of order on the paragraph.

Mr. FOWLER. Mr. Chairman, I desire to call the attention of the chairman of the committee to a few increases of salaries.

Mr. PADGETT. Yes, sir.

Mr. FOWLER. On page 14, line 20, there is one beneficiaries' attendant at $300. That is an increase of salary from $240 to $300?

Mr. PADGETT. Yes, sir; but there are several other increases in the paragraph.

Mr. FOWLER. I am not complaining at the increases at all. I commend the committee for the increases. What I was wanting to do, however, was to ask the chairman of the committee why more of the low, and exceedingly low, salaries have not been increased?

Mr. PADGETT. We put in all that was recommended. The Naval Home there is maintained out of what is known as the "Navy pension fund." The men there that are in charge are in full sympathy with the increases, and we put in every one that they have recommended. The salaries are fixed in proportion to the time taken and the amount of work that is done by the different people.

Mr. FOWLER. Did you increase the salary of all of these low-salaried people who work full time?

Mr. PADGETT. Every one that was recommended was increased; yes, sir.

Mr. FOWLER. I mean all that put in full time?

Mr. PADGETT. I could not answer that, because I have no information on the subject as to which ones put in full time and which ones do not.

Mr. FOWLER. I see. That would be real information for me if it were given.

Mr. PADGETT. We know that the governor of the home is in full sympathy with them, and when he sent in his recommendations we took them just as he sent them.

Mr. FOWLER. You did not go into the question, then, as to whether the other low-salaried people were deserving of an increase?

Mr. PADGETT. We did not, because the governor of the home did not appear himself directly before us, but we took his recommendations.

Mr. FOWLER. I presume the gentleman believes that an increase ought to be made in all these salaries?

Mr. PADGETT. I think certainly no injustice was done to those who were not increased.

Mr. FOWLER. Certainly no injustice was done to those who were increased, for even a most economical man would recommend an increase in those cases. But I find that there are five laundresses, at $190 each, who were not increased. I would like to know if they put in full time?

Mr. PADGETT. I am not prepared to answer, because I do not know. I do not know whether they do other work for private customers or not. We did not go into that. We took up the question upon the submission of recommendations for increases. We thought they were proper recommendations, and we granted all of them. If the governor of the home were to submit recommendations for others and would show that their present salaries are not sufficient for the work they do and the time they are putting on it, I assure the gentleman those recommendations would have the sympathetic consideration of the committee.

Mr. FOWLER. Where does this money come from?

Mr. PADGETT. It is an institution of a Navy fund originating from prizes taken by the Navy in years past and turned into the Treasury, and it constitutes a trust fund. The Naval Home is supported out of that fund, and the remainder of the fund, the interest, is turned over to the Secretary of the Interior and disbursed by the Commissioner of Pensions in the payment of pensions.

Mr. FOWLER. Is the interest on this fund great enough to increase the salaries of these low-salaried people?

Mr. PADGETT. Oh, yes.

Mr. FOWLER. I would be very glad to see it done.

Mr. PADGETT. Well, sir, if those in charge submit a recommendation to that effect, the committee will give it very sympathetic consideration. I will say to the gentleman that in the time I have served on the Committee on Naval Affairs, for 10 years, I do not remember a single instance where the committee has failed to increase these low-priced salaries at that home upon a recommendation; but the gentleman can well appreciate that we can not on our own initiative undertake to do it, not knowing how much time these people may put in or the value of the work which they do.

Mr. FOWLER. I am well aware of the fact that it will take some time and investigation in order to determine the relative value of the service done by these various people, and of course the value of the service ought to determine the amount of salary. But I observe in this list perhaps the very lowest salaries paid to any public servants.

Mr. PADGETT. Yes; they are. But——

Mr. FOWLER. I am in sympathy with an increase to a point which will be respectable and decent.

Mr. PADGETT. The committee has the same feeling that the gentleman has, and we have so acted in all cases, and the governor of the home is in full sympathy with those who are employed, and we felt that wherever he made a recommendation we could follow it; and if he did not make a recommendation, it was because he was satisfied that the service performed was being fully compensated.

Mr. FOWLER. Mr. Chairman, I do not desire to make a point of order. I would rather offer an amendment to increase the salaries which have already been increased slightly than to interpose a point of order.

The CHAIRMAN. If there be no objection, the point of order will be withdrawn and the Clerk will read.

The Clerk read as follows:

Maintenance: Water rent, heating, and lighting; cemetery, burial expenses and headstones; general care and improvements of grounds, buildings, walls, and fences; repairs to power plant equipment, implements, tools, and furniture, and purchase of the same; music in chapel and entertainments for beneficiaries; stationery, books, and periodicals; transportation of indigent and destitute beneficiaries to the Naval Home, and of sick and insane beneficiaries, their attendants and necessary subsistence for both, to and from other Government hospitals; employment of such beneficiaries in and about the Naval Home as may be authorized by the Secretary of the Navy, on the recommendation of the governor; support of beneficiaries, and all other contingent expenses, $54,421; in all, for Naval Home, $77,117, which sum shall be paid out of the income from the naval pension fund: *Provided*, That all moneys derived from the sale of material at the Naval Home which was originally purchased from moneys appropriated from the income from the naval pension fund and all moneys derived from the rental of Naval Home property shall be turned into the naval pension fund: *And provided further*, That hereafter all moneys belonging to a deceased beneficiary of the Naval Home or derived from the sale of his personal effects, not claimed by his legal heirs or next of kin, shall be deposited with the pay officer of the Naval Home; and if any sum so deposited has been or shall hereafter be unclaimed for a period of two years from the death of such beneficiary it shall be deposited in the Treasury to the credit of the naval pension fund: *And provided further*, That the governor of the Naval Home is hereby authorized and directed, under such regulations as may be prescribed by the Secretary of the Navy, to make diligent inquiry in every instance after the death of an inmate to ascertain the whereabouts of his heirs or next of kin: *And provided further*, That claims may be presented hereunder at any time within five years after moneys have been so deposited in the Treasury, and, when supported by competent proof in any case after such deposit in the Treasury, shall be certified to Congress for consideration: *And provided further*, That the pensions of beneficiaries of the Naval Home shall be disposed of in the same manner as prescribed for inmates of the Soldiers' Home, as provided for in section 4 of the act approved March 3, 1883, under such regulations as the Secretary of the Navy may prescribe, except that in the case of death of any beneficiary leaving no heirs at law nor next of kin any pension due him shall, subject to the foregoing provisions, escheat to the naval pension fund.

Mr. MANN. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. A point of order is reserved by the gentleman from Illinois.

Mr. MANN. I should like to ask the gentleman as to the first proviso at the top of page 16:

That hereafter all moneys belonging to a deceased beneficiary of the Naval Home or derived from the sale of his personal effects, not claimed by his legal heirs or next of kin, shall be deposited with the pay officer of the Naval Home, and if any sum so deposited has been or shall hereafter be unclaimed for a period of two years from the death of such beneficiary it shall be deposited in the Treasury to the credit of the naval pension fund.

Is there now any authority for anyone to sell his personal effects?

Mr. PADGETT. Under a law that was passed two or three years ago there is a provision that they shall be sold and the proceeds kept for a certain length of time, and if not claimed by the next of kin or those entitled under the law, the money shall be turned into the general fund of the Treasury. This provides that it shall go into the naval pension fund.

Mr. MANN. That is the only difference?

Mr. PADGETT. Yes.

Mr. MANN. The authority now exists for the person in charge of the Naval Home to sell?

Mr. PADGETT. Yes. They hold the proceeds for a certain length of time and ultimately turn the money into the general fund, and this provides that it shall go into the naval pension fund.

Mr. MANN. I see this provides that it shall go into the pension fund if it is not claimed within two years, and then there is a further provision that anybody can present a claim within five years, in which case it shall be certified to Congress.

Mr. PADGETT. Yes.

Mr. MANN. I take it with the expectation that it shall then be paid out of the general fund.

Mr. PADGETT. No; out of the pension fund. This would go into the naval pension fund, and then would be paid out of it.

Mr. MANN. We do not appropriate any money out of the naval pension fund, do we?

Mr. PADGETT. All of this is appropriated out of the naval pension fund.

Mr. MANN. All of which?

Mr. PADGETT. Beginning with the paragraph headed "Naval Home, Philadelphia," on page 14, all of that goes out of the naval pension fund.

Mr. MANN. Do they pay any money out of the naval pension fund except what is appropriated?

Mr. PADGETT. No; except there is a general provision of law that the interest upon what is remaining over shall be turned over to the Secretary of the Interior, who turns it over

to the Commissioner of Pensions, and it becomes a part of the pension fund and is distributed in the payment of pensions.

Mr. MANN. Of naval pensions?

Mr. PADGETT. Yes.

Mr. MANN. Is there legislation similar to this in reference to the soldiers' homes?

Mr. PADGETT. This puts the Naval Home in this particular upon the same basis as the soldiers' homes. Under the law with reference to soldiers' homes the beneficiary goes into the soldiers' home and his pension continues. It is there paid to the governor of the home and held for his benefit, or it goes to his wife and children under the provisions of the law.

Mr. MANN. In the soldiers' home?

Mr. PADGETT. Yes.

Mr. MANN. I think it goes to the pensioner.

Mr. PADGETT. It goes to the pensioner, but under certain conditions a part of it can be paid to his wife.

Mr. MANN. It can, if he consents to it.

Mr. BRYAN. It can without his consent.

Mr. PADGETT. In the discretion of the governor of the home——

Mr. MANN. I do not think it is in the discretion of the governor of the home.

Mr. PADGETT. When a naval pensioner goes to the Naval Home he loses his pension altogether; it stops. This continues his pension and provides for its disposition upon the same terms as beneficiaries in the soldiers' homes receive their pensions.

Mr. MANN. I do not understand how this continues a man's pension. The gentleman says inmates of the Naval Home receive no pensions.

Mr. PADGETT. They do not while in the Naval Home.

Mr. MANN. Then they have no pension due them if they die without heirs or next of kin?

Mr. PADGETT. No.

Mr. MANN. This provides for the disposition of the pension when they die without heirs or next of kin.

Mr. PADGETT. But a man may have some other little effects in the home, which he may have purchased.

Mr. MANN. Oh, but here is the language of the bill:

Except that in the case of the death of any beneficiary leaving no heirs at law nor next of kin—

It should be "or next of kin"—

any pension due to him shall, subject to the foregoing provision, escheat to the naval pension fund.

Mr. PADGETT. Yes.

Mr. MANN. You say he does not get a pension?

Mr. PADGETT. He does not under existing law; but this, as I understand it, provides for it. This was sent down by the department. I have not read it for some time. It provides that he shall continue to draw his pension if he is in the Naval Home, the same as they do in the soldiers' homes, and that is the purpose of this legislation.

Mr. MANN. I think the gentleman must be mistaken about the naval pensioners in the home not receiving pensions now.

Mr. VARE. At the present time while they are in the Naval Home they do not get any pensions.

Mr. MANN. A pensioner in the Naval Home does not receive a pension?

Mr. VARE. While they are in there it is turned over to the fund.

Mr. MANN. If that is the case, I will make a point of order on the last proviso at the bottom of page 16.

Mr. PADGETT. I will say to the gentleman that the purpose of that is to allow them to receive their pensions while in the Naval Home, and to let the pensions be distributed, as is done now for beneficiaries in the soldiers' homes. We have put the two upon an identical basis.

That is the object and purpose, and the Secretary and governor of the Naval Home have so recommended. I will call the attention of the gentleman to the statement of the governor of the home found on page 31 in the hearings. It is as follows:

It is not the intention to permit persons receiving large pensions or retired pay to enter and reside at the home, but to make the home available for such needy persons whose pensions are small and who, in many cases, have a wife, child, or dependent relative. The former class can easily be prevented from entering the home by investigating their cases and examining their pension certificates, and by giving preference to men of long service and small pensions and to those who have been disabled in the service in line of duty. The deprivation of their pensions has often caused the separation of a beneficiary's family; a pensioner becomes too old and feeble to earn sufficient to add to his pension and support himself and wife, and his pension being too small to aid in his support, not to speak of that of his wife, the only course open to him is to have his wife or child placed in some charitable institution, a charge on some State, while he is compelled to enter the home and surrender his pension. Were he allowed to retain his pension, or at least to have the benefits of it, as is the case with inmates of the Soldiers' Home and the National Home for Disabled Volunteer Soldiers, his pension would probably be sufficient to support, in part at least, his wife, and the latter could, if she so desired, take up her residence near the Naval Home, and the two thus be enabled to spend their last days together, instead of being separated and their homes broken up in their declining years.

Mr. MANN. How did this pension fund arise?

Mr. PADGETT. It came from the sale of prizes captured by the Navy. The prizes were sold and the proceeds turned into tht Treasury of the United States as a trust fund, and there is a certain amount of interest that accumulates upon it each year. The Naval Home is supported out of the interest of that trust fund, and the surplus of it is turned over to the Pension Department, as I explained a moment ago, and used to pay the Navy pensions.

Mr. MANN. How much is the surplus?

Mr. PADGETT. Several hundred thousand dollars. The principal is about $14,000,000. I think it is well to let the old men have these pensions.

Mr. MANN. The gentleman talks about old men; a lot of them are not old. This is for the regular service.

Mr. PADGETT. But many of them have reached old age.

Mr. MANN. Living in the soldiers' home they reach old age, and they are pretty well taken care of.

Mr. PADGETT. In the soldiers' home they get their pensions, but in the Naval Home they are deprived of the pensions.

Mr. MANN. The people who were in the Civil War do not go to the naval home at all.

Mr. PADGETT. Some of them do.

Mr. MANN. I think not, but I do not know.

Mr. PADGETT. I have not specially investigated it.

Mr. VARE. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. VARE. For the benefit of the committee, I will say that I recently visited the sailors' home on Grays Ferry Avenue, Philadelphia. My recollection is that at that time there were between 80 and 90 inmates, and that their ages ranged from 70 to 95 years. My understanding of the matter is that these men under the existing law turn over their pensions to this treasury with a view to securing a home there. If this proviso is allowed to stay in the bill, they would not only have a place to live, but also receive pensions as well.

Mr. PADGETT. That is true.

Mr. MANN. I suppose the men who are 95 years old want to take care of their wives, who live just outside. As I understand the gentleman from Pennsylvania, there is no one there under 70 years of age.

Mr. VARE. That is my understanding.

Mr. MANN. Mr. Chairman, I make a point of order on the proviso, beginning in line 21, page 17.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

BUREAU OF ORDNANCE.

Ordnance and ordnance stores: For procuring, producing, preserving, and handling ordnance material; for the armament of ships; for fuel, material, and labor to be used in the general work of the Ordnance Department; for furniture at naval magazines, torpedo stations, and proving ground; for maintenance of the proving ground and powder factory and for target practice, and for pay of chemists, clerical, drafting, inspection, and messenger service in navy yards, naval stations, and naval magazines: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for chemists, clerical, drafting, inspection, watchmen, and messenger service in navy yards, naval stations, and naval magazines for the fiscal year ending June 30, 1915, shall not exceed $468,000. In all, $5,800,000: *Provided*, That hereafter no part of any appropriation shall be expended for the purchase of shells or projectiles for the Navy except for shells or projectiles purchased in accordance with the terms and conditions of proposals submitted by the Secretary of the Navy to all the manufacturers of shells and projectiles and upon bids received in accordance with the terms and requirements of such proposals: *Provided*, That this restriction shall not apply to purchases of shells or projectiles of an experimental nature or to be used for experimental purposes and paid for from the appropriation "Experiments, Bureau of Ordnance": *Provided*, That hereafter the Secretary of the Navy is hereby authorized to make emergency purchases of war material abroad: *And provided further*, That when such purchases are made abroad, this material shall be admitted free of duty.

Mr. HOBSON. Mr. Chairman, I wish to offer the following amendment.

The Clerk read as follows:

Amend, page 17, line 22, after the word "of" and before the word "shell," insert the words "armor-piercing," so as to read: "purchase of armor-piercing shells or projectiles."

Mr. MANN. Will the gentleman from Alabama yield for a question?

Mr. HOBSON. Certainly.

Mr. MANN. Does not the language of the bill and the law cover the gentleman's proposition? They could not purchase any shells or projectiles. This is only a prohibition.

Mr. HOBSON. Yes; and I want it to be so that they could purchase torpedo shells.

Mr. MANN. The gentleman wants to except torpedo shells?

Mr. HOBSON. Yes. It makes the provision apply only to armor-piercing shells. The torpedo shell is in a stage which

may be called experimental, but I hope before the fiscal year is over that it will have been accepted and be beyond the experimental stage, and that when the question of a purchase of torpedo shells comes up it may properly be considered by the Government. When that time comes this limitation might work a hardship and prevent torpedo shells being purchased by the service. This limitation was developed in the matter of armor-piercing shells.

Mr. FOWLER. Mr. Chairman, if I understand the amendment, it seeks to carry with this proviso the idea of armor-piercing shells.

Mr. HOBSON. No; it is to carry limitation only with reference to armor-piercing shells. The proviso is a limitation, and I want it limited to armor-piercing shells.

Mr. FOWLER. I would like to have the amendment read, so that I may understand it.

The CHAIRMAN. Without objection, the amendment will be again reported.

The Clerk again read the amendment.

Mr. HOBSON. Thus the gentleman will see that the proviso places a limitation on the purchase, and that it will apply only to armor-piercing shells which are commercially manufactured and sold, and it would remove the limitation of the proviso from the purchase of torpedo shells.

Mr. FOWLER. The word "projectiles" does not seem to be sufficiently limited. If the gentleman's amendment carries, it would prohibit the purchase of "armor-piercing shells or projectiles."

Mr. HOBSON. Then, Mr. Chairman, I will ask to insert, before the word "projectiles," the word "armor-piercing," so that it will read "armor-piercing shells or armor-piercing projectiles."

Mr. ROBERTS of Massachusetts. Will the gentleman from Alabama yield?

Mr. HOBSON. I will.

Mr. ROBERTS of Massachusetts. I want to ask the gentleman if he has in mind exempting from the limitation of purchase the so-called Isham shell?

Mr. HOBSON. No; but I have in mind experiments carried on in connection with the Isham shell. The art of manufacturing a torpedo shell has been developed in many other lands besides our own.

I am in hopes that there will be other torpedo shells put into the field along with the Isham shells, and that the development may be sufficiently advanced before the next fiscal year ends to warrant the purchase of them.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if the gentleman's amendment is adopted, it will then leave it within the power of the department to purchase as many of the so-called Isham shells as they see fit, will it not?

Mr. HOBSON. I think it would; or any other torpedo shell or any other form of shell besides the armor-piercing shell, without these limitations; but the gentleman will see that it is not incumbent upon the department to purchase anything under that proposition.

Mr. ROBERTS of Massachusetts. I realize, Mr. Chairman, it is not incumbent upon them to purchase, but it is within their power to do so if the right pressure is brought to bear. I want to say in regard to the so-called Isham shell that the last report I had, from personal interviews with certain officials of the department, impressed me so unfavorably that I would like to have some way found to stop the purchase of any more Isham shells until those that have been submitted are in shape to conform to the requirements of the department and have been tested.

Mr. FOWLER. Mr. Chairman, I decline to yield any further.

The CHAIRMAN. The gentleman from Illinois declines to yield further.

Mr. HOBSON. Mr. Chairman, I will ask unanimous consent to proceed for five minutes.

The CHAIRMAN. But the gentleman from Alabama has not the floor. The gentleman from Illinois [Mr. FOWLER] has the floor.

Mr. FOWLER. Mr. Chairman, I am very much interested in this discussion, because I do not think there ought to be a limitation on the character of shells which the Government should manufacture. The progress which is being made now, and which has already been made, has demonstrated that there are other shells than the armor-piercing shells which are more highly destructive than even the armor-piercing shell itself, if I am correctly informed. I understand that it has been scientifically demonstrated that what is called the torpedo shell, or the high explosive shell, is able to destroy a war vessel much more readily than an armor-piercing shell. That was demonstrated in the experiment made on the *Puritan*, wherein one high-explosive shell put her out of business in two minutes, and yet at the same time the experiment was going on with the armor-piercing shell on the *Texas*, and for two days they pounded away on the *Texas* with the armor-piercing shell; and I understand that they never did sink her by virtue of that bombardment.

Mr. Chairman, I ask unanimous consent to proceed for four minutes longer, if my time is about up, and I apprehend that it is.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FOWLER. Mr. Chairman, I understand also that there was another demonstration of the power of the armor-piercing shell which ought to appeal to the people of America in no uncertain terms. It is known that we furnished Russia a large portion of her armor, indeed, that we made some of her vessels in America. In the Battle of Tsushima the story was told in such a decisive way that there can be no mistake. The war vessels of Japan, as I am informed, were armed with high-explosive shells, and from the time the Japanese fleet sighted the Russian fleet, which was armed with armor-piercing shells, the Japanese fleet began to shell the Russian fleet and really destroyed it with the high-explosive shells before the Russian fleet could get close enough to use the armor-piercing shells effectively. Really, before Rojestvensky knew that real danger was at hand, one of the greatest Russian vessels had received what we call a solar-plexus blow and was knocked out, and the rest of the ships of that great navy of Russia went to the bottom of the sea before they ever got close enough to do any damage with the armor-piercing shell.

If this be true, then we ought to encourage the manufacture of the high-explosive shell, because if we come in contact with the Japanese Navy or the Germany Navy we will find that they are armed with the high-explosive shell. I understand that German war vessels are protected by triple-plate armor and Japan's by double-plate armor, while our war vessels have only single-plate armor; so that if we should be without the high-explosive shells and come in contact with either one of those great fleets, in my opinion they would be able to destroy us with those high-explosive shells before we could get in reach of them with our armor-piercing shells for effective work.

Mr. Chairman, I am very glad to know that the able gentleman from Alabama [Mr. HOBSON] takes the advanced stand for the high-explosive or torpedo shell, and I believe that he will find many Members, if not all of us on the floor of this House, splicing hands with him, so as to make the American Navy as strong as the ingenuity of man can contrive. We ought not to be behind any other nation in the world in the effectiveness of our armor or our armament. If we must expend millions for a Navy, let it be said that ours is the most effective.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word, for the purpose of referring to the remarks of the gentleman from Massachusetts [Mr. ROBERTS]. The gentleman from Massachusetts will recall the history of this proviso; it appeared only after the art of the manufacture of armor-piercing projectiles was well developed by a few large firms. Its effect has been to practically prevent smaller firms, who at the outset could not produce the high-class shell at the same rate as the larger firms, from ever getting a start in the manufacture of projectiles. The effect of this proviso or limitation has been to get a very high-class shell, but it also has been to limit the number of producers and manufacturers. I am not so very sure but that the whole proviso could be left out, but I am sure of this, that in the development stage of the new type of shell carrying a high explosive, known as the torpedo shell, this limitation should not apply. The gentleman from Massachusetts will notice, on page 18, that this limitation in the second proviso is removed from shells or projectiles of an experimental nature. We may get beyond the stage of experiment, and we may get to the point where there ought to be a purchase for issue to the service of this type of shell. And under those conditions I do not think that this limitation on that particular provision ought to apply to them, so that by the introduction of the simple words "armor-piercing shells" or "armor-piercing projectiles" it would leave that general-proviso limit on these particular shells and remove from its application any new type of shell.

Mr. PADGETT. Mr. Chairman, I do not favor the amendment offered by the gentleman. I think that the second proviso of the bill takes care of any matter that may be needed in the way of experimental purposes. It says:

Provided, That this restriction shall not apply to purchases of shells or projectiles of an experimental nature or to be used for experimental purposes—

And so forth.

Now, if the Government is to go into the purchase of shells of any character, either armor-piercing shells or high explosives for general purposes, they ought to be purchased, giving everybody an opportunity to bid and an opportunity for everybody to have a chance to furnish them. If they are for experimental purposes, and that is all there can be in this stage in which they are now, then the second proviso of the bill takes care of such purchases——

Mr. HOBSON. Will the gentleman yield?

Mr. PADGETT (continuing). And it is not necessary to give authority to the department to make fish of one and fowl of another.

Mr. HOBSON. Will the gentleman yield?

Mr. PADGETT. Yes, sir.

Mr. HOBSON. Why does this proviso appear in the purchase of shells and projectiles and in the purchase of nothing else carried in the bill?

Mr. PADGETT. It is in there for the purpose of requiring that in the purchase of shells and projectiles the terms shall be offered by persons who are capable of contracting with the Government for the other as well.

Mr. HOBSON. That is evident, but that is not my question. My question is, Why has not the committee of the gentleman put it in for other war material besides these projectiles?

Mr. PADGETT. This amendment was originally put in on the floor of the House several years ago.

Mr. HOBSON. And, if I remember correctly, the gentleman opposed it very vigorously.

Mr. PADGETT. I do not remember I did; I do not remember practically one way or the other about it. I do not recall now that I opposed it; but I think it is a good provision that the opportunity of making these purchases should be extended to everybody, and so far as projectiles for experimental purposes or shells for experimental purposes are concerned they are fully cared for and provided for in the second proviso.

Mr. HOBSON. Will the gentleman yield for another question?

Mr. PADGETT. Yes, sir.

Mr. HOBSON. The gentleman is assuming that any new type of shell shall only be in the experimental stage. Suppose that is not correct; suppose the assumption is not correct?

Mr. PADGETT. Well, if there are two or three who are capable of furnishing them, they can bid on them; and if there are half a dozen capable of providing them, they can bid on them. If there is only one that is prepared to furnish them, only one can bid——

Mr. HOBSON. But I have not finished my question as yet.

Mr. PADGETT. The gentleman stopped.

Mr. HOBSON. Not yet. Now, does not the gentleman realize that this proviso would prevent many firms capable of manufacturing projectiles from bidding?

Mr. PADGETT. I think not.

Mr. HOBSON. The Navy Department has repeatedly recommended that the whole proviso be stricken out, so that we can begin to develop competition instead of keeping it as it is, which practically cuts out all except particular manufacturers.

Mr. PADGETT. No; I think not.

Mr. HOBSON. That is what it does, whether the gentleman thinks so or not.

Mr. PADGETT. The Navy Department has heretofore recommended——

Mr. HOBSON. And kept on recommending until it got tired of it.

Mr. PADGETT (continuing). That this and other limitations be cut out. They have recommended the cutting out of a number of limitations that we have kept in the bill every year.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word again.

The CHAIRMAN. The amendment is not in order. The gentleman will have to get permission of the House.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HOBSON. Mr. Chairman, I simply desire to point out that if this amendment that I have offered is not voted I am going to move to strike out the whole proviso paragraph, because it is indefensible that in this stage of development there should be this kind of provision. The effect of it has been, as I said, to get us a good shell—to get us a good armor-piercing shell—although in the idea of the gentleman from Massachusetts the velocity of the shell, I believe, is very much higher than, possibly, the real conditions would warrant. We are getting a good shell, but we have to pay a good price, larger I believe, because of this proviso. I fought before and I am ready to fight now to have this restriction removed in this experimental stage of the development of the torpedo shell and other experimental shells.

Mr. MANN. Mr. Chairman, our distinguished friend from Alabama speaks with such absolute cocksureness on any proposition, that it is sometimes very difficult to understand whether he is really in earnest or not. Now, what have we here? The gentleman said there was a provision in the bill which compelled the Government to pay high prices and that did not give everybody a chance, and here is a provision in the bill that projectiles shall not be purchased except in accordance with the terms and conditions of proposals submitted by the Secretary to all manufacturers. The Secretary can name what he wants. He can provide any shell that he pleases and he names the terms and conditions and submits them to all known manufacturers of these shells. Yet the gentleman from Alabama would have us believe from what he says that the provision in the bill was aimed to make favoritism, and that he was opposed to it, when his provision is to permit the Secretary to buy shells of a particular kind without giving anybody else a chance to bid on them.

Mr. HOBSON. Will the gentleman yield?

Mr. MANN. Wait a minute. The gentleman has spoken three times on this question. He took the time of my colleague from Illinois [Mr. FOWLER] and also the time of the gentleman from Tennessee [Mr. PADGETT], and so I ask him to withhold until I take my own time.

This provision was inserted in the bill some years ago for the express purpose of preventing a chance for favoritism or any suspicion of favoritism. My recollection is it was inserted on the floor of the House. Some gentlemen believed that there was favoritism or might be favoritism where the Navy could purchase shells without submitting the proposals to all the manufacturers, and we put this provision in the bill.

Now, if the Secretary desires to purchase the kind of shells suggested by the gentleman from Alabama he has that license. There is nothing in here to prevent him from doing so, but he can not go and make a secret deal with the manufacturer of some special shell. I do not believe the House wants to give him the opportunity to do so, or that he wants the opportunity to do so. He has not asked for any change from the existing condition in the bill. I take it that this provision was carried in the estimates from the department. He wants to be on the square. But why should we subject him to the secret influences that come when somebody wants to get favoritism out of the Government? Let him, when he wishes a particular thing, prepare his estimates and conditions of proposal and submit them to the manufacturers of shells and projectiles upon the list in the Navy Department, and then everyone will be free from suspicion.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent to proceed for three minutes, because I can see how there may be ambiguity in the reading of this language. But if any gentleman here will call upon the Navy Department, he will find that my statement of the facts is absolutely correct; that if this limiting provision had been left out in the previous bills there would have been probably two and possibly three more manufacturers of armor-piercing projectiles. The department again and again has wanted to give awards to these smaller firms that could make a good projectile, but could not quite compete with the old firms, and has again and again wanted to do it, but this provision has been put in here, so that the young firm would have to come right up on an equality with the full-fledged firm, and it removes all discretion from the Navy Department. The result has been that they have been manufactured by a few large firms.

Mr. GARNER. As I understand the gentleman from Alabama, his idea is not to get the best shell with less money, but he wants to build up expensive firms at the expense of the Government?

Mr. HOBSON. What I want to do is to leave it so that the Secretary of the Navy may have the same discretion in the purchase of shells as he has with anything else in connection with the bill. I do not want any provision in here that will tie the hands of the Secretary of the Navy, as they have been tied in connection with the armor-piercing shells. They have tied his hands for years, and the result has been that only a few large, fully developed firms are now able to manufacture armor-piercing shells for the Government. I do not want that repeated in the future.

Mr. ROBERTS of Massachusetts. Mr. Chairman——

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in five minutes.

Mr. WITHERSPOON. I object, Mr. Chairman. Did you mean this amendment or all other amendments?

Mr. PADGETT. All other amendments is what I said.

Mr. WITHERSPOON. I want to offer an amendment, and I want to address the committee.

The CHAIRMAN. Objection is heard.

Mr. PADGETT. I will move, Mr. Chairman, that debate upon this paragraph and this amendment close in five minutes.

The CHAIRMAN. The gentleman moves that all debate upon this paragraph and amendments thereto close in five minutes.

Mr. WITHERSPOON. Mr. Chairman, I do not understand it that way.

Mr. PADGETT. I said, "this amendment." I will limit it to this amendment.

The CHAIRMAN. The gentleman moves that all debate on the paragraph and the amendment offered by the gentleman from Alabama [Mr. HOBSON] be limited to five minutes.

Mr. PADGETT. On the pending amendment. The gentleman from Mississippi [Mr. WITHERSPOON] said he wanted to offer some other amendment to the paragraph.

The CHAIRMAN. The Chair understood the gentleman's motion to be to close debate on the paragraph and this one amendment, and the Chair was putting it. Now how does the gentleman wish it?

Mr. PADGETT. Mr. Chairman, I move to close debate on this pending amendment in five minutes.

The CHAIRMAN. The gentleman moves that all debate on the pending amendment close in five minutes.

The motion was agreed to.

The CHAIRMAN. The gentleman from Massachusetts [Mr. ROBERTS] is recognized.

Mr. ROBERTS of Massachusetts. Mr. Chairman, my recollection of the proviso under discussion is confirmed by its language, that it was put into this bill for the purpose of broadening competition and reducing prices. This happened some years ago. I am not very clear as to the wording and all the incidents, but my recollection is that it was hinted or openly charged that prior to the adoption of this language the department had been favoring certain manufacturers and that others could get no opportunity to bid; and to put an end to such practices as that this language was inserted, which makes it obligatory upon the Secretary to communicate to all manufacturers of shells the specifications and conditions under which he solicits bids, and that all then have an equal opportunity to make their bids and to get the contract.

Now, the gentleman from Alabama [Mr. HOBSON] is very much exercised in his mind because he thinks the Secretary of the Navy is tied by the law. I want to say to the gentleman that had he been in the committee at a certain meeting this last winter, he would have heard the Secretary of the Navy tell the committee of the wonderful success he had been meeting with in getting shells at less price; so much so that with the amount of money available he was able to buy a great many more shells than he had anticipated, judging by the figures that had been submitted on the prior competition.

Mr. WITHERSPOON. Mr. Chairman——

Mr. ROBERTS of Massachusetts. Now, Mr. Chairman, if the gentleman will pardon me, I have only five minutes——

Mr. WITHERSPOON. I just wanted to ask you a question.

Mr. ROBERTS of Massachusetts. I will yield to my colleague for a question.

Mr. WITHERSPOON. I just wanted to ask you if the facts you have so correctly stated about the ability of the Secretary to buy shells so much cheaper, by which he saved $100 on each shell, is not a good sign as to why he should not have his hands tied?

Mr. ROBERTS of Massachusetts. I do not just catch the drift of the gentleman's argument; but if he means that under the law as it now exists the Secretary has been enabled to reduce the price $100 a shell, I certainly, for one, do not think we ought to change that law.

I was about to say, Mr. Chairman, that if the Secretary of the Navy felt that he was being handicapped in the slightest degree by existing law, the gentleman has a tongue and he has stenographers at his command, and I know his interest in the Navy is so great that he would not hesitate a moment in letting Congress and the appropriate committee know that he was being bound down and circumscribed by existing law and for that reason he could not give the best results in his department, and we should have heard from him very promptly along those lines. But we have not heard the first word of complaint coming from the Navy Department. In fact, I was somewhat surprised when the gentleman from Alabama [Mr. HOBSON] took the floor and offered the amendment which he did. It is the first complaint I have heard from any source as to the splendid operations of the existing law. For that reason, Mr. Chairman, I hope the committee will sustain the Committee on Naval Affairs and reject the amendment of the gentleman from Alabama.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Alabama [Mr. HOBSON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 16, noes 38.

So the amendment was rejected.

Mr. HOBSON. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The gentleman from Alabama [Mr. HOBSON] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 17, in line 20, beginning with the word "*Provided*," strike out all words through the page; and on page 18, from the top of the page down to line 7, through the word "ordnance," striking out the first and second provisos.

Mr. HOBSON. Mr. Chairman, that amendment would leave the Secretary of the Navy, with regard to the purchase of projectiles, in practically the same position as he is in as regards the purchase of torpedoes, in regard to the purchase of small-arms ammunition, and with regard to the purchase of every other article in the bill.

Now, I want the gentleman from Massachusetts [Mr. ROBERTS], and the chairman of this committee [Mr. PADGETT] also, to explain to this House why, in the matter of the purchase of projectiles and shells, they feel that the Secretary of the Navy ought to have additional specifications by law. Why can not the whole question of all shells, all projectiles of all kinds, be left simply on the same even footing as all other articles purchased by the Government? The gentlemen can not answer that proposition.

Now, I want to repeat that the effect of this limitation has been to confine the supply of armor-piercing projectiles for our Navy to a few firms, and that again and again the Navy Department has recommended and requested that it be allowed the same latitude here as in the purchase of all other war materials, stating again and again that this provision left it no discretion whatsoever, and put a small firm at the beginning right in full competition with the full-grown firms that could very easily, for their own personal advantage, form a trust and underbid the little fellow and destroy him under the hard conditions that might be imposed.

Now, I say there can be no justification for it, and it is indefensible that in the purchase of projectiles there should be an additional limitation of law upon the Secretary of the Navy that does not exist for the purchase of any other war material by the Navy Department or the War Department or any other department of the Government; and now if the gentlemen want to have all business on exactly the same footing, they will vote for this amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Alabama [Mr. HOBSON].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. HOBSON. A division, Mr. Chairman.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 15, noes 39.

So the amendment was rejected.

Mr. Chairman, I offer an amendment to the pending paragraph in the bill.

The CHAIRMAN. The gentleman from Mississippi [Mr. WITHERSPOON] offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 17, line 20, after the word "all," strike out the figures "$5,800,000" and insert "$5,164,000."

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. WITHERSPOON. Mr. Chairman, I want to explain to the committee the purpose and object of this amendment.

This is an amount appropriated for ordnance and ordnance stores. It says nothing about powder, but if you will turn to the hearings where the Bureau of Ordnance gives a table of all the items constituting this entire amount of $5,800,000 you will see there is included in the amount $636,000 for the purchase of powder. I deduct that $636,000 from the $5,800,000, and therefore substitute $5,164,000 for the amount carried in the bill.

Now, I want to call your attention to the facts about this powder. This item of $636,000, at the price fixed by law, 53 cents a pound, will purchase 1,200,000 pounds of powder. Now, you will reach an item in this bill presently entitled "Ammuni-

tion for ships," and included in that, as explained by the Chief of the Bureau of Ordnance, is $360,000, if I remember the figures correctly, for the purchase of powder. That will purchase 700,000 pounds of powder. Now, you will also soon reach an item—I think it is on the next page—where we appropriate $1,150,000 under this head, "For the purchase and manufacture of powder." Now, the Chief of the Bureau of Ordnance explained to us that there was included in that $1,150,000 provision for the purchase of 3,800,000 pounds of powder, and if you will add the three sums together, the 1,200,000 that this item will purchase, and the 700,000 that the second item I referred to will purchase, and the 3,800,000 pounds that are included in the third item, it amounts to nearly 7,000,000 pounds of powder that this bill appropriates money to purchase.

Now, in addition to that, the appropriation for the powder factory provides for the manufacture of two and one-half million pounds of powder. The Chief of the Bureau of Ordnance tells us that the capacity of the powder factory is now two and one-half million pounds per year, and he says we use for target practice and at the proving grounds 1,600,000 pounds a year.

In other words, we are now manufacturing 900,000 pounds of powder a year more than we use. Stated in another way, we are adding to the reserve from our powder factory 900,000 pounds of powder every year; and here are three items in this bill that provide for the purchase of 7,000,000 pounds of powder. What do we need with that powder? I say there is nothing in these hearings that shows the semblance of necessity for that powder. I say it is just a waste of the public funds to appropriate that money for powder. Now, let me present the facts to you about that. Every gun on every battleship we have is provided with 100 rounds.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. I ask unanimous consent that the time of the gentleman from Mississippi be extended five minuts.

The CHAIRMAN. Is there objection to the request that the time of the gentleman be extended five minutes?

There was no objection.

Mr. WITHERSPOON. The experts have explained to us about these large guns, that they can only be used 175 times. When you fire them 175 times the rifling becomes worn, the shell begins to wobble, and they are worthless and have to be relined before they are any good again. Now, each one of these guns has a supply of 100 rounds on the ship. They fire each one of these big guns every year 12 full charges in target practice. They carry that on for six years, until they have fired them 75 times. Then they reline them. So that every gun in the Navy has a capacity to fire 100 times before it begins to deteriorate in accuracy. Each gun is supplied with that much ammunition on the ship.

We have a very large powder reserve. The amount of it is a secret, and I can not tell it to you. The Navy Department regards it as a secret, but we know what it is. And while I can not tell you what it is I will tell you this, that I have calculated the amount of powder that it will take to wear out every one of the 254 big guns in our Navy, firing each one of them 175 times, which is the maximum. It will take 13,000,000 pounds of powder to do it. Now while I will not tell you how much powder we have in reserve, I will tell you that the amount necessary to wear out every big gun in the Navy is not one-third as much as we have in reserve. That is the condition of the powder supply as shown by the testimony of the experts; and yet they have nearly $2,000,000 here in this bill for the purpose of purchasing 7,000,000 pounds of powder. We do not need a single pound of it. We have enough powder to wear out every gun in the Navy, and have 60 rounds left when we have worn out every one of them.

Mr. BRYAN. That covers it, does it?

Mr. WITHERSPOON. I am telling the truth. That is all I am telling.

Mr. BRYAN. Was it the truth when you said a while ago that the amount of powder was regarded as a naval secret?

Mr. WITHERSPOON. Yes. It is not only the truth, but the Chief of the Bureau of Ordnance, who gave us the facts about this, when he revised his remarks, as you sometimes do yourself, struck out nearly all of that. The fact is we do not need a pound of this powder.

There is just one other thing I want to tell you. We are purchasing this vast amount of 7,000,000 pounds of powder every year. The appropriation last year was just the same. We are purchasing it, not because we think we need it, not because of any earthly use for it, but we are purchasing it because the Powder Trust tells us we must do it. That is the testimony. That comes about in this way: You have passed a law providing that the Navy Department can not purchase any powder and pay more than 53 cents a pound for it, and you have that law repeated in this appropriation bill. They are powerless to purchase powder unless they can get it for 53 cents a pound.

Now, the Chief of the Bureau of Ordnance tells us that he can not buy that powder except from one concern, the Powder Trust; and the Powder Trust says, "We will let you have the powder at 53 cents a pound provided you will take 4,500,000 pounds; you can not get it on the terms that Congress says you must get it unless you are willing to take as much as four and one-half million pounds." And in order to comply with the conditions and terms of the Powder Trust the Navy Department has gotten the Army to take a part of the powder that it would purchase from the Powder Trust, and in one instance has induced some foreign Government to come in and take a part of it in order that it might be able to comply with the conditions imposed by the Powder Trust to purchase four and one-half million pounds.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WITHERSPOON. I ask unanimous consent for three minutes more.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that his time be extended three minutes. Is there objection?

There was no objection.

Mr. WITHERSPOON. I just want to put it up to you. If you will examine the hearings, you will see that I am right. The facts show that we do not need a pound of this powder; but if we did need it, I have not so much lost my independence as an American citizen as to be willing to buy it if the Powder Trust has got to decide how much I shall buy. [Applause.]

Mr. PADGETT. Mr. Chairman, I shall take only a few minutes. This bill carries the same appropriations for the purchase and the manufacture of powder and projectiles that were carried in the bill last year and the year before, and less than the amount carried for some years before that.

I might observe what has already occurred to every Member here present, that under the existing circumstances it does not seem to be a very propitious time just now to reduce our purchases of powder, especially to reduce those purchases below the amount we have been purchasing under normal conditions.

Some years ago Congress adopted the policy of establishing a reserve on shore, in addition to the amount of projectiles and powder aboard ship. No nation would consider it wise to have only the ammunition that it had on the ships and none ashore for a reserve. I want to say that at this time we are considerably short of that reserve. The gentleman made some statements about the matter. I shall not give the exact amount——

Mr. MADDEN. The gentleman from Mississippi stated that there are 39,000,000 pounds of powder on hand. That is what he stated.

Mr. WITHERSPOON. No; I did not state that.

Mr. MADDEN. He said that it took 13,000,000 pounds to do a certain thing, and that we had three times that amount.

Mr. WITHERSPOON. I said we had more than three times that amount.

Mr. MADDEN. A calculation based on the gentleman's statements would show that we have 39,000,000 pounds on hand.

Mr. PADGETT. The gentleman's statement was that we had more than 39,000,000 pounds on hand.

Mr. MADDEN. Then 40,000,000 pounds.

Mr. WITHERSPOON. It may be 100,000,000 pounds.

Mr. PADGETT. The gentleman used an illustration to convey his meaning as nearly as he could without using the precise language. I will simply state that to supply all the new ships in course of construction, and counting in 2,700,000 pounds of old powder that has to be reworked in order to be made available for the present-day guns, we are more than 12,000,000 pounds short of our reserve.

I want to state another thing that I have here. I asked Admiral Strauss, Chief of the Bureau of Ordnance, how long the present supply of powder would last if we were in a continuous battle, and he says that the question is difficult to answer; that it would depend upon whether the engagement was continuous at the highest rate of speed that they could fire; that it would probably last throughout a battle of two hours, and that this would provide for reducing the supply less than the maximum of target practice.

Now, there is the reserve powder in addition to that that is afloat.

Mr. STAFFORD. Will the gentleman inform the committee how many competing firms can furnish powder at a rate of 53 cents a pound?

Mr. PADGETT. Practically only one, the Du Pont Powder Co. That is the only one that manufactures smokeless powder for big guns except the Navy manufacture and the Army. That is the only private firm. They have three plants that they maintain in operation available and ready for the manufacture

of powder. I will state that it has been the policy of the Navy Department for a number of years to use its influence with these manufacturers to maintain three factories instead of making it all in one.

Mr. STAFFORD. Is it a fact that the supply concern exacts as a condition that the Government shall take a certain quantity as represented by the gentleman from Mississippi?

Mr. PADGETT. It is like this: They submit the bids in the alternative. If you take so much, we will furnish it at 60 cents. I am not giving the exact figures. If you take so much, it will be 58 cents, and so much at 53 cents.

Mr. STAFFORD. The minimum price is 53 cents?

Mr. PADGETT. The minimum price was 53 cents, and in order to get the benefit of the minimum price the Navy Department and the War Department joined together. At one time they submitted a proposal for 5,000,000 pounds, and the War Department took so much to make up the 5,000,000 pounds, and the Navy Department took so much, and then I believe it was Argentina that agreed to take 500,000 pounds in order to make out the difference.

Mr. GARNER. As a matter of fact, then, they do make a condition that you must take so much powder in order to come within the statute price of 53 cents?

Mr. PADGETT. Yes; that is what they have done so far.

Mr. BUCHANAN of Illinois. Mr. Chairman, on this question of powder it seems that no matter how much powder the Government manufactures at Indian Head we have to appropriate sufficient money to give the Powder Trust its usual profit. I offered an amendment in the last Congress, and in fact I have offered it in every appropriation bill until it finally became a law, providing that the Indian Head powder factory should be run at its full capacity before any powder was purchased. That is being done, and it seems that they are manufacturing a sufficient amount of powder for the Navy. Not only that, but there is information which shows that the powder mills of the Army are manufacturing more powder than we need. If the Government powder mills were properly utilized, there would be no need of purchasing powder from any manufacturers any more than for the purpose of continuing to give them extortionate prices that they may secure profit on watered stock and overcapitalization.

The chairman of the committee has made a statement that may mislead some Members as to how much powder we would use in two hours if the Navy was all in action. He knows that it is impossible for us to be engaged in a battle where all the Navy would be firing at full capacity for two hours at any time. It is impossible to become engaged in battle in any such way.

Mr. WITHERSPOON. Will the gentleman yield?

Mr. BUCHANAN of Illinois. Yes.

Mr. WITHERSPOON. Let me call attention to the fact that these big guns can be fired twice a minute, and they could not be fired for two hours, because they would fire 120 times the first hour, and long before the second hour was out they would be worn out.

Mr. BUCHANAN of Illinois. There has never been a war and never will be one where all the ships are engaged to their full capacity at the same time, or any majority of our battleships or any 10 of them will be engaged at one time.

Mr. BRYAN. It would destroy the Mexican fleet if they did.

Mr. BUCHANAN of Illinois. Yes; and it is given as a reason for a big navy that we will never get into war if we have a navy of a sufficient size, and yet the Mexican fleet, I suppose, is so large that they do not care to declare war. That certainly destroys the argument that a large fleet is going to secure peace.

Mr. BARTON. Will the gentleman yield?

Mr. BUCHANAN of Illinois. Yes.

Mr. BARTON. Does the gentleman mean to say that the powder factory at Indianhead and the other powder factory are not run at their full capacity?

Mr. BUCHANAN of Illinois. They are; and they manufacture 2,500,000 pounds of powder annually, making 900,000 pounds annually more than we are using as a surplus. We already have a large surplus. In my opinion, the amendment offered by the gentleman from Mississippi should be carried, as we are manufacturing all the powder that we have any use for.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. WITHERSPOON) there were 27 ayes and 43 noes.

Mr. WITHERSPOON. I ask for tellers.

Tellers were ordered, and the Chair appointed Mr. WITHERSPOON and Mr. PADGETT.

The committee again divided; and the tellers reported that there were 30 ayes and 52 noes.

So the amendment was rejected.

Mr. TAVENNER. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend by inserting as a separate paragraph, following the words "free of duty," line 11, page 18, the following:

"For beginning the erection of suitable buildings and the purchase of suitable machinery and materials necessary for the enlargement of the plant of the Bureau of Ordnance to permit the manufacture of armor plate and gun forgings for the use of the Navy of the United States, $1,000,000: *Provided*, That the Secretary of the Navy is hereby authorized to appoint a board, to consist of three officers of the Navy, who shall examine and report what, in their opinion, is the most suitable site for the erection of such extension of the plant of the Bureau of Ordnance as is herein provided for, and also as to what the capacity of such extension of plant should be; and no money shall be expended until the site so selected and the capacity so determined upon shall have been approved by the Secretary of the Navy: *Provided further*, That the board so appointed shall report to the Secretary of the Navy within three months after the passage of this act and that work on the extension of the plant of the Bureau of Ordnance herein provided for shall begin within six months after this act goes into effect, and be continued with all due expedition until completed: *And provided further*, That the board herein provided for to ascertain the most favorable site for said extension of plant shall give due consideration to the advantages possessed by any possible site now owned by the Government; but in the event that any such Government-owned site is not approved, the Secretary of the Navy is authorized to expend such portion of the appropriation herein provided for as may be necessary to acquire the site determined upon by the board and approved by the Secretary of the Navy."

Mr. BROWNING. Mr. Chairman, I make the point of order against the amendment.

Mr. PADGETT. Mr. Chairman, I will state to the gentleman that I wish he would let this go over now. We have a provision in the latter part of the bill with reference to this.

Mr. TAVENNER. But the provision in the bill provides only for an investigation of armor plate, and we reached that stage 18 years ago. This provides for the building of the plant.

Mr. BROWNING. Mr. Chairman, I make the point of order against the amendment.

Mr. PADGETT. Will the gentleman reserve it?

Mr. BROWNING. I reserve the point of order.

Mr. TAVENNER. Mr. Chairman, amendments have been offered to naval appropriation bills providing for armor-plate factories in the past, and they have been ruled out upon points of order. I have looked up most of these amendments, or all that I could find, and I found they specified simply the building of an armor-plate factory, referring to it in the amendments as an independent proposition. My amendment proposes to enlarge and extend the present plant of the Bureau of Ordnance. The Bureau of Ordnance in the Navy Department already has an extensive plant. It does a large amount of manufacturing. It manufactures guns and a great many other things. All I ask is to extend the present plant. For 20 years there has been a movement on foot to obtain a Government armor-plate factory. Time after time amendments have been offered, and time after time points of order have been made, and the amendments have been stricken out, and therefore, year after year, the armor-plate ring—and I use that term advisedly—has been permitted to go on drawing down hundreds and hundreds of thousands of dollars in extortionate profits. There are only three firms engaged in the manufacture of armor plate—the Bethlehem Steel Co., the Midvale Steel Co., and the Carnegie Steel Co. Those three concerns have drawn down more than $100,000,000 worth of fat Government contracts from the Army and Navy.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

Mr. TAVENNER. Yes.

Mr. HENSLEY. Is it the gentleman's purpose in this effort to take the profit out of war?

Mr. TAVENNER. That is exactly what I wish to do. I am not so much concerned whether we have one battleship or two battleships or three battleships, so long as the Government does the manufacturing of the battleships, because then when we appropriate a dollar for a battleship we will get a dollar's worth of battleship, and now no one knows how much we get. We do know that Mr. Carnegie, who was one of the first to go into the armor-plate business, boasts of having made millionaires out of 25 men, and he is now going through life giving his millions away right and left, and death is going to overtake him with untold millions still on his hands. So there must be huge profits in the armor-plate business, and the Government ought to save some of these millions of profits to the taxpayers.

Mr. BARTON. Mr. Chairman, will the gentleman yield?

Mr. TAVENNER. Yes.

Mr. BARTON. Is it not also true that we have found that we pay enormous prices for armor plate that a committee of Con-

gress, and that the courts themselves, have found was faulty, worth about $30 a ton, and that we have paid $300 a ton for it?

Mr. TAVENNER. Yes; and I have affidavits, or the gentleman from Illinois [Mr. RAINEY] has affidavits, of the employees of the Bethlehem Steel Co., which are sworn to, who stated under oath that they were instructed to patch up defective armor plates in order to fool the Government inspectors.

Mr. Chairman, the chairman of the Naval Affairs Committee has paid a high tribute to the Secretary of the Navy, and I wish to join him in that tribute, because I think the present Secretary of the Navy is one of the greatest Secretaries we have ever had. But I wish to point out that while the chairman of the Naval Affairs Committee has paid Secretary Daniels a high tribute, he has not followed the recommendations of the Secretary. The Secretary of the Navy asked Congress to give him an appropriation for an armor-plate factory.

The committee has brought in a provision in the bill authorizing an investigation for a site for an armor-plate factory. Eighteen years ago we had a proposition of that kind enacted into law. We have passed that stage now, and I desire to read what the Secretary of the Navy asked for in his annual report and to show that the Naval Affairs Committee has dodged the proposition, and that instead of giving us an armor-plate factory they have simply provided for an investigation. The Navy Department already has all of the evidence that any fair-minded person would require to come to the conclusion that we have been outrageously overcharged by this armor-plate ring. The Secretary of the Navy, on page 8 of his annual report, says:

IMPORTANCE OF ARMOR-PLATE FACTORY.

I desire to recommend the passage at the earliest moment of a sufficient appropriation to begin the construction of a Government armor plant to relieve a situation which, in my estimation, is intolerable and at total variance with the principle of economy in spending Government money. It is evident that without an armor plant of its own the Government in time of war or impending war would be entirely at the mercy of these three manufacturers and obliged to pay practically whatever price they asked. History does not warrant an assumption that the patriotism of these companies would prove superior to their desire for profits, inasmuch as during the time that war with Spain was imminent these companies refused to accept the price fixed by Congress after investigation as a just rate and declined to manufacture any armor until they got their own price of $100 a ton more than that which Congress had determined on. In this connection it is well to note that the love of country possessed by these companies did not prevent them from furnishing armor to Russia, as reported to Congress, in 1894 at $249 a ton, while they were charging the United States $616.14 a ton.

* * * * * * *

I do not see how it is possible for Congress to justify to the people a refusal to erect a Government plant, nor how it can answer the charge that will invariably be brought up—that the same mysterious Providence which saved this profitable business to the steel companies three times in the past, even after money for a Government plant had actually been appropriated, is not still at work exercising its beneficent protection over these lusty specimens of infant industries, who are even now under Government investigation as violators of the antitrust law.

Mr. Chairman, those are the words of the present Secretary of the Navy, and I think that Congress ought to respect his recommendation and permit this amendment to be voted upon on its merits. [Applause.]

Mr. PADGETT. Mr. Chairman, the question of armor plate is a very important one, and if an investigation should show that it would be proper for the Government to enter upon the manufacture of armor plate no one would be more glad or willing to see it done than I. The committee has incorporated in the bill a provision for a very thorough and complete investigation, has authorized and directed—not merely authorized—this investigation as to location of site, cost of site, and cost of plant, and the probable cost of manufacture.

The CHAIRMAN. Will the gentleman permit the Chair at this stage to ask him if the provision in the bill is authorized by existing law?

Mr. PADGETT. It is not.

The CHAIRMAN. It bears on a proposition now offered by the gentleman from Indiana?

Mr. PADGETT. It is not authorized by law. It is subject to the same point of order that this is. When we reach it in the bill I shall ask the House to waive the point of order; but the present amendment is subject to a point of order, as is the provision that is incorporated in the bill.

Now, the language that was read by the gentleman from Illinois from the report of the Secretary of the Navy expresses his views and his ideas, but when the Secretary came to submit estimates to go into the appropriation bill he did not submit one dollar of estimates for the actual beginning of the work. Those matters must be determined upon business principles, and when we took the matter up in the hearings we found the estimated cost of a factory would run from $7,000,000 to $15,000,000, dependent upon the size and the character and capacity of the plant.

Mr. BARTON. Will the gentleman yield?

Mr. PADGETT. And I think we should go at the matter in a business way, and the committee has attempted in a business way to proceed to a consideration and a determination of this question, as a business man would with his private affairs.

Mr. BARTON. Will the gentleman yield?

Mr. PADGETT. I do.

Mr. BARTON. I would say in the outset that I have the fullest confidence in the committee in their honest intention in reporting this amendment, and the amendment, in my judgment, is a businesslike way to do this work, and yet it very easily goes out on a point of order, for in a body of this kind some one is always ready to make a point of order. Now I will ask the chairman of the committee, in case it does go out on a point of order, if he would be willing to report a bill that carries this investigation?

Mr. PADGETT. Yes.

Mr. BARTON. I want to say, further, I drafted a bill, and it is now pending before that committee, providing $8,000,000 to purchase an armor-plate factory.

Mr. PADGETT. That would only establish one of about 5,000 tons capacity.

Mr. BARTON. I want to say I drew this after talking directly with the Secretary of the Navy, the Hon. Josephus Daniels, who told me at that time that if I would make that amount the maximum amount he thought for less money he could buy a plant already in operation that would produce about 8,000 tons, if I remember correctly. What do we use?

Mr. PADGETT. We use 16,000 tons.

Mr. BARTON. A plant of the size mentioned would be large enough to establish competitive conditions and furnish a considerable amount of the armor we use.

Mr. PADGETT. But when we came to the matter with the Chief of the Bureau of Ordnance and he submitted the estimates, the estimated cost ran, as I read yesterday and put in the RECORD, from $7,000,000 to $15,000,000, owing to the character and size of the plant.

Mr. STAFFORD. May I ask the gentleman if I understand correctly that the Secretary of the Navy did not press his recommendation for the building of an armor-plate factory when he appeared before the committee?

Mr. PADGETT. No; he submitted his views upon it, but he had submitted no definite estimates coming down from the Treasury as all estimates come, and we are not including any estimate to go in the bill.

Mr. STAFFORD. But his later recommendation before the committee could be construed as an estimate if the committee so desired to construe it.

Mr. PADGETT. There was no estimate submitted. There was simply a hearing, in which he expressed himself in favor of the policy of the Government having an armor-plate plant.

Mr. STAFFORD. Did he recommend before the committee that the time was opportune for the Government to go right ahead with this project, as is stated in the newspapers?

Mr. PADGETT. I do not think so; but he is in favor of it——

Mr. STAFFORD. Of going ahead without any further investigation?

Mr. PADGETT. Well, I do not know about a further investigation.

Mr. STAFFORD. Did not the gentleman's committee come to a consideration of the question of the opportuneness of whether the Government should go right ahead without making some investigation?

The CHAIRMAN. The time of the gentleman has expired.

Mr. BROWNING. Mr. Chairman, I renew my point of order.

The CHAIRMAN. The Chair will ask the gentleman from Illinois [Mr. TAVENNER]—the gentleman spoke of the amendment not being subject to a point of order on account of its being a continuation of something—the Chair would like to ask the gentleman what is this a continuation of?

Mr. TAVENNER. Of the Bureau of Ordnance, which does manufacturing. There is a Bureau of Ordnance in the Navy Department, which manufactures guns and many other things.

Mr. PADGETT. Mr. Chairman, the Bureau of Ordnance, I will state, if the gentleman will permit me, is simply one of the divisions of the administration of the department located up here in the State, War, and Navy Building.

Mr. TAVENNER. I mean to enlarge the buildings and plants of the Bureau of Ordnance.

Mr. PADGETT. The Bureau of Ordnance has some plants where it does some work. Down at the navy yard it does some work, and at Indianhead, Md.; and it does work in every navy yard we have. Sometimes it is in the same building and sometimes in separate buildings.

The Bureau of Ordnance is simply one of the divisions of the administrative department of the Navy that is located in the State, War, and Navy Building here in the city. But the work that is done under the jurisdiction of that bureau is done in all navy yards; sometimes, as I said, in the same shop, sometimes in a different shop adjoining the other one, and sometimes the Bureau of Construction and Repair and the Bureau of Ordnance will be working in the same shop.

Mr. TAVENNER. What construction does the gentleman put on the words "plant of the Bureau of Ordnance"? Would he consider that term to mean the main office, where they keep books?

Mr. PADGETT. The Bureau of Ordnance has no main plant. There is no plant that belongs to the Bureau of Ordnance as a separate bureau. It belongs to the Government. A navy yard is established, and in that yard the Bureau of Construction will do work and the Bureau of Ordnance will do work, and various other bureaus will do work, and there is no separate plant belonging distinctively to the Bureau of Ordnance.

The CHAIRMAN. The Chair will be glad if the gentleman from Tennessee [Mr. PADGETT] will yield to the Chair for a minute.

Mr. PADGETT. Yes, sir.

The CHAIRMAN. The gentleman from Illinois [Mr. TAVENNER] said that his amendment is in continuation of a work, yet his amendment begins with these words, "for the beginning," and so forth.

Mr. TAVENNER. For the beginning of the work of the extension of the plant; for the beginning of the enlargement.

The CHAIRMAN. As much as the Chair would like to agree with the gentleman, he finds himself unable to do so. He is therefore compelled to sustain the point of order.

Mr. FOWLER. Mr. Chairman, I offer an amendment.

Mr. GREEN of Iowa. Mr. Chairman, I rise for the purpose of asking the chairman of the committee a question. I notice in the third proviso the Secretary of the Navy is authorized to make emergency purchases of war material abroad. Is there some general provision that he may make emergency purchases at home?

Mr. PADGETT. Oh, yes. This is simply permissive that he may do it abroad. The great bulk of things is here. This is simply to provide in case a ship is abroad and an emergency arises that they can purchase what they need and bring it home without any duty on it.

Mr. GREEN of Iowa. This is a provision which says that they shall submit to competitive bids. Unless there is some provision in the law that he may make emergency purchases at home, that word "abroad" ought to be stricken out there.

Mr. PADGETT. This section of the bill is for the purchase generally of the materials.

Mr. GREEN of Iowa. That is true, but it is not general.

Mr. PADGETT. Now, then, if an emergency arises, he can purchase them abroad.

Mr. GREEN of Iowa. Certainly; but can he purchase them at home if he wishes?

Mr. PADGETT. Yes, sir.

Mr. GREEN of Iowa. Where do you find the provision of law for it?

Mr. PADGETT. The authority allows him to do it.

Mr. GREEN of Iowa. Well, that does not answer the query, it seems to me.

Mr. PADGETT. We have been doing it for years under this language.

Mr. TAVENNER. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. TAVENNER. This matter has been passed upon so far as the point of order is concerned, but I would like to ask the gentleman a question relative to his statement that the Secretary of the Navy did not have any estimated cost of this plant.

Mr. PADGETT. I said he did not submit any estimate in the regular Book of Estimates.

Mr. TAVENNER. He submitted it to the Senate, and I have a copy of it here in which he states how much it will cost to a penny and how much he will save.

Mr. PADGETT. That is a matter of private advice to the chairman of the committee, but the law provides that estimates shall come down to the Secretary of the Treasury and appear in the Book of Estimates.

Mr. TAVENNER. Then, the only thing is that the estimates have not come through the right channel. A resolution was passed by the Senate asking for this information, and it was supplied to the Senate, telling what a plant of 10,000-ton capacity would cost and what a plant of 20,000-ton capacity would cost, and how much we would save on that plant. So I do not see why we need an investigation to get that information.

Mr. PADGETT. You will find some things at length in regard to it in the hearings we have here.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GREEN] has expired.

Mr. PADGETT. Mr. Chairman, I ask the Clerk to read.

Mr. FOWLER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 17, line 20, after the figures "$5,800,000"——

Mr. STAFFORD. Mr. Chairman, I make the point of order that we have passed the paragraph.

The CHAIRMAN. The Clerk advises the Chair that we have not passed it. The Chair understood that the last amendment offered by the gentleman from Illinois [Mr. TAVENNER] was an independent paragraph.

Mr. PADGETT. I understood it was an independent paragraph.

Mr. STAFFORD. It being an independent paragraph, it is to be supposed that the last paragraph had been completed.

The CHAIRMAN. The Clerk did not read the next paragraph.

Mr. PADGETT. The gentleman offered the amendment as an independent paragraph, to come in between lines 11 and 12 of page 18 of the bill.

Mr. GARNER. Mr. Chairman, that would not cut off a Member from opportunity of offering an amendment at any line of the paragraph unless the next paragraph had been read and a Member got recognition of the Chair to offer an amendment to it.

The CHAIRMAN. The Chair rules that the amendment is in order. The Clerk will read.

The Clerk read as follows:

Amend, page 17, line 20, after the figures "$5,800,000," by adding the following: "*Provided*, That no part of this sum shall be used for the purchase of projectiles unless not less than $250,000 of this appropriation shall be used for the manufacture of high-explosive torpedo shells for 12 and 14 inch guns."

Mr. PADGETT rose.

Mr. STAFFORD. Mr. Chairman, I make a point of order on the amendment, if the chairman or any other member of the committee does not wish to make it.

Mr. FOWLER. Mr. Chairman, if the point of order is going to be insisted upon in good faith——

Mr. STAFFORD. It is certainly going to be insisted upon in good faith.

Mr. FOWLER. I shall insist that the gentleman point out the basis of his point of order.

Mr. STAFFORD. Mr. Chairman, I claim that it is a limitation on the discretion of the Secretary of the Navy in the purchase of materials as to which he is not at present so limited. It has been held many times that if any amendment in the form of a limitation limits the discretion that the Secretary or any other administrative officer now has, it is in the nature of legislation and not in order upon an appropriation bill.

Mr. FOWLER. Mr. Chairman, the gentleman from Wisconsin has had a good deal of experience, I understand, as a parliamentarian.

Mr. STAFFORD. No; I have not.

Mr. FOWLER. Ordinarily I would attach a great deal of importance to his judgment.

Mr. STAFFORD. I wish to disclaim that position as coming from the gentleman from Illinois.

Mr. FOWLER. Well, Mr. Chairman, I repeat that, I understand that the gentleman from Wisconsin has had a great deal of experience, and that his judgment ordinarily is superb. [Laughter.]

Mr. STAFFORD. I will make a complete disclaimer of that position.

Mr. FOWLER. But, Mr. Chairman, in this instance I am constrained to believe that the gentleman from Wisconsin has not read the decisions upon the question of limitations on appropriations. Whenever a bill carries a provision for an appropriation, it is proper to place a limitation upon the appropriation, and that is what this amendment does. Hinds' Precedents is full of instances where the Chair has held that a limitation upon an appropriation is in order and is not subject to a point of order.

This paragraph, Mr. Chairman, appropriates $5,800,000 for ordnance. Among other things, projectiles are provided for. This amendment seeks to limit the use of the appropriation, which is proper. During the consideration of the naval bill in 1910, Capt. HOBSON offered an amendment to that paragraph carrying an appropriation for experiments in the Bureau of Ordnance. The paragraph read as follows—and I read from

the Naval Yearbook of 1913, which carries a complete copy of that bill:

Experiments, Bureau of Ordnance: For experimental work in the development of armor-piercing and other projectiles, fuses, powders, and high explosives in connection with problems of the attack of armor with direct and inclined fire at various ranges, including the purchase of armor, powder, projectiles, and fuses for the above purposes, and of all necessary material and labor in connection therewith, and for other experimental work under the cognizance of the Bureau of Ordnance in connection with the development of ordnance material for the Navy, $100,000.

To that Capt. HOBSON offered the following amendment:

Provided, That no part of this appropriation shall be expended in experiments unless in the development of armor-piercing projectiles and high explosives an attack on heavy turret armor and heavy belt armor is made by armor-piercing projectiles at a battle range not less than 8,000 yards and by explosive gelatin in quantity not less than 200 pounds exploded against the heavy belt armor and heavy turret armor of an actual vessel.

A point of order was made to this amendment, and the Chair, in passing upon the amendment and the point of order thereto, held that it was a limitation upon the expenditure. That is just what this amendment which I have offered seeks to do.

It seeks to place a limitation upon the expenditure of the money, whereby its use can not be had unless a certain character of explosives are manufactured. It is well known, Mr. Chairman, that our armament is not provided with high explosive torpedo shells, and I offer this limitation so that we can get the benefit of this destructive projectile, which is, I think, the most destructive of all projectiles.

But as to the limitation, I desire to say that there are numerous limitations of this character cited in Hinds' Precedents, limitations which have been offered as amendments to the naval appropriation bill, and wherever the amendment seeks to limit the expediture it has been held in order. There is quite a difference between the limitation of an expenditure and a limitation on some other matters, such as the office itself.

This does not seek to limit anything except the expenditure, because it provides that no part shall be used for the manufacture of projectiles unless a certain portion is used for the manufacture of high-explosive torpedo shells.

Mr. Chairman, I do not desire to take up the time of the committee, because I think the amendment is not subject to a point of order at all. I have a series of limitations here that I have compiled from Hinds' Precedents, but I do not think it is necessary to read them. The Hobson amendment, which I have cited, is in harmony with all the rulings of the Chair upon this question that I have been able to find, and I have gone through all of Hinds' Precedents.

The CHAIRMAN. Was the point of order made against the Hobson amendment?

Mr. FOWLER. The point of order was made against the amendment offered by Capt. HOBSON, and it was overruled by the Chair.

Mr. HOBSON. The gentleman is correct.

Mr. FOWLER. Capt. HOBSON says so himself, and last night I read the proceedings as reported in the CONGRESSIONAL RECORD, so that I might not be mistaken in it at all.

The CHAIRMAN. Has the gentleman the citation to the page of the CONGRESSIONAL RECORD?

Mr. FOWLER. I do not know that I can lay my hand on it now, but I have it marked in my office and I will telephone over and get it.

The CHAIRMAN. The Chair will be glad if the gentleman will do that.

Mr. FOWLER. I will do it, Mr. Chairman, because I do not want my reputation for veracity to be questioned by anybody. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, it seems to me the amendment offered by the gentleman from Illinois is subject to a point of order, in that it is not germane to the paragraph. The appropriation in this paragraph is—

For procuring, producing, preserving, and handling ordnance material—

while the amendment of the gentleman from Illinois is for the manufacture by the Navy Department of certain ordnance material. There is nothing contemplated in the paragraph about the manufacturing by the Navy Department of any of the class of ordnance materials set out in the paragraph; and when you attempt by a limitation to bring in a new process, to wit, the manufacturing of material, it seems to me the amendment is clearly not germane and so is subject to a point of order.

Mr. STAFFORD. Mr. Chairman, if the Chair will indulge me further on the point of order, I wish to direct the attention of the Chair first to the language of the proviso. It is a mandatory direction in the form of a limitation. Permit me to read it:

Provided, That no part of this sum shall be used for the purchase of projectiles unless not less than $250,000 of this appropriation shall be used for the manufacture of high-explosive torpedo shells for 12 and 14 inch guns.

Nothing can be clearer from the language of that amendment than that it is a mandatory direction on the part of Congress to the Secretary of the Navy that he shall employ $250,000 of this fund for the manufacture of 12 and 14 inch explosive projectiles. Now, I direct the attention of the Chair to the manual, paragraph 825, in which we find this language, under the familiar clause 2 of Rule XXI:

The limitation may not be applied directly to the official functions of executive officers—

Citing Fourth Hinds' Precedents, sections 3957–3966—

but it may restrict executive discretion, so far as this may be done, by a simple negative on the use of the appropriation.

Citing Fourth Hinds' Precedents, sections 3968–3972—

Which does not give affirmative directions.

Citing Fourth Hinds' Precedents, sections 3854–3859, 3975.

Now, I have Hinds' Precedents before me, and the paragraphs there cited are strongly confirmatory of the position stated; and there is not only 1 precedent, but there are 25 precedents.

The CHAIRMAN. The Chair doubts if the precedents which the gentleman is citing bear upon the amendment that is before us.

Mr. STAFFORD. If the Chair please, here we have the proviso, which is mandatory in its provisions, directing that no part of the appropriations will be used unless the Secretary of the Navy uses $250,000 of the appropriation for the manufacture of a certain character of projectiles. What language could be more regarded as legislation than this character of limitation that he shall manufacture a certain character of projectile?

Mr. HOBSON. Does the gentleman's conception of it turn on the word "manufacture"? If the word "manufacture" was changed to "purchase," would it obviate his objection?

Mr. STAFFORD. I think it would be subject to a point of order, whether we used the word "manufacture" or "purchase." You are directing, in the form of a limitation, the discretion of the Secretary of the Navy, which you have not the authority to do, because under the authorities it is legislation.

Mr. HOBSON. As I understand it, the Secretary is not directed to spend any of this money. This much is appropriated, and if expended it must all be spent under the limitations of law.

Mr. STAFFORD. But this proviso says that no part of this shall be spent.

Mr. HOBSON. For a certain purpose.

Mr. STAFFORD. Unless $250,000 is expended, which is the same as if you said that there shall be expended $250,000 for the manufacture of 12-inch and 14-inch projectiles.

Mr. HOBSON. If he does expend for other purposes.

Mr. STAFFORD. The precedents are many, holding that that character of amendment or limitation is in effect legislation.

Mr. MANN. Mr. Chairman, I would like to ask the gentleman from Tennessee a question—whether the Secretary of the Navy has authority to manufacture these high-explosive shells under this provision in the bill?

Mr. PADGETT. There is no provision that I know of for the Secretary manufacturing high-explosive shells. They are experimenting with some under a contract with Mr. Isham, and I think Mr. Isham is having it done by some private concern. There is no Government plant set apart and devoted to the manufacture of such shells.

Mr. MANN. Mr. Chairman, the Chair will notice that this amendment provides that no portion of this sum shall be used for the purpose of the purchase of projectiles unless a certain thing happens. Now, it is quite within the power of Congress to put any limitation it pleases on the expenditure of money, but that limitation must be negative and not affirmative limitation. This provision is that no portion of this money shall be used for the purchase of projectiles unless the Secretary uses a portion of the fund for the manufacture of explosives. That is a direction to the Secretary giving him authority to use a portion of this $5,800,000 for the manufacture of explosives, which he can not do under the terms of the bill.

Mr. HOBSON. Will the gentleman yield?

Mr. MANN. Yes.

Mr. HOBSON. Is the gentleman sure that the Secretary of the Navy can not do it now? On the contrary, I think he can.

Mr. MANN. I did not say that. If the gentleman will mark what I did say, under this item in the bill appropriating $5,800,000, there is no authority to manufacture these shells.

Mr. HOBSON. And I take exception to that.

Mr. MANN. Point it out.

Mr. HOBSON. These shells are ordnance material.

Mr. MANN. I have read the paragraph, and I have asked the chairman of the committee, and he can find no such provision.

Mr. HOBSON. It says "to procure, produce, preserve, and handle ordnance material." This is ordnance material. That carries authority to produce this material, because torpedo shells are ordnance material. He has the authority already.

Mr. MANN. I think the term "manufacture" is quite well understood. If they intended to have these projectiles manufactured, they would have said "manufactured."

Mr. HOBSON. When it is manufactured, is it not produced?

Mr. MANN. Yes; it is produced if you purchase, and if you steal it, it is produced. Now, this provision which purports to be a negative provision is in fact, as it seems to me, a positive provision, and therefore it is subject to a point of order.

Mr. GARRETT of Texas. Will the gentleman yield?

Mr. MANN. Yes.

Mr. GARRETT of Texas. If my memory serves me right, the appropriation bill for the Army carried a provision that in the purchase of small arms and ammunition they placed a limit on it that they should be manufactured in the arsenals of the Government. Would not that be similar to this amendment?

Mr. MANN. Oh, we could very easily provide that no portion of the money should be expended for the purchase of material. We could very easily provide that no portion of it should be expended for the purchase of material, as it is done in this bill, unless the powder factory, for instance, shall be run full time. That is quite a different proposition, as it seems to me.

The CHAIRMAN. If the Chair understands the gentleman from Illinois correctly, he is basing his argument on the point of order on the claim that the section does not authorize the manufacture.

Mr. MANN. That is the argument that I was basing my proposition upon.

The CHAIRMAN. And the gentleman contends that the word "producing" in this section does not mean manufacture? The language of the section is for "procuring," which might mean purchasing, "producing, preserving, and handling ordnance material." The Chair is rather inclined to think that the word "producing" does mean manufacturing, and for that reason the Chair would be very glad to hear the gentleman further upon the point as to what he thinks about the matter, whether the word "producing," as used there, does mean manufacturing.

Mr. MANN. Really, Mr. Chairman, I have no precedents on the subject, and I would just as lief take the Chair's judgment as my own upon that point. I asked the chairman of the Committee on Naval Affairs whether there was any other authorization. I did not read it as being manufacturing. I do not know even what the custom is in the department.

Mr. HOBSON. Mr. Chairman, would the Chair permit an interruption?

The CHAIRMAN. Certainly.

Mr. HOBSON. The next clause, for the armament of ships, would authorize it. These shells are armament of ships.

Mr. WILLIAMS. Mr. Chairman, I would suggest that the producing of material is an entirely different proposition from the manufacturing of the shell. The shell is the manufactured product, and the material may be the component parts of that manufactured product, and authority to produce material is not authority to manufacture the product—the shell itself. I make a distinction between the material and the manufactured product.

The CHAIRMAN. The Chair was dwelling on the word "producing."

Mr. WILLIAMS. The Chair does not understand my distinction, evidently. What I mean to say is this: There is a difference between the material and the finished product. This bill authorizes the procuring and the producing of the material. The material may be that which goes to constitute the shell when manufactured, and I do not believe that the language employed would authorize the manufacturing of shells, but merely the production of material with which the shell is manufactured.

Mr. HOBSON. Mr. Chairman, in the gentleman's use of the word "material," of course he must take it in connection with the phrase "ordnance material." Ordnance material is not raw material, but is a finished product in this instance, and if the Chair will permit me just a moment, practically everything aboard a ship in the matter of ordnance is authorized for production in that first paragraph. You could rule out of order the whole body of ordnance material, if the gentleman's contention were correct, but if there were any question in the world about the word "producing," which, in my judgment, there can not be, then the next phrase would certainly authorize these torpedo shells, because they are for the armament of ships.

The CHAIRMAN. Does the gentleman from Alabama, while insisting that the ordnance material is a finished product, see any distinction between the words in the bill "procuring, producing, and preserving and handling ordnance material," if it is not the finished product, and material out of which the product may be made? Has the Secretary of the Navy the right to make the finished product out of the ordnance material?

Mr. HOBSON. Mr. Chairman, I see the point of the Chair; but I desire to call the Chair's attention to this fact, that we have not authorized here, and we never have authorized, anything for the procuring of any raw material. I would like to say to the Chair that he has never seen the words "ordnance material" used in the sense of raw material. Ordnance material covers all the material of ordnance, always has, and does here. It would be utterly childish to think that we would authorize the procuring of certain raw material alone. Why, you could not manufacture a thing provided in the whole paragraph if you simply authorize for the raw material, and those words "ordnance material" mean now, and always have meant, and were intended to mean the finished product.

The CHAIRMAN. The Chair would like to ask the gentleman from Illinois, Mr. MANN, getting back to the original proposition, if the Secretary of the Navy is authorized to manufacture, whether the limitation fixed by the amendment offered by the gentleman from Illinois, Mr. FOWLER, is negative or affirmative in its nature?

Mr. MANN. Mr. Chairman, answering the Chair frankly, as I always endeavor to do, when I examined this amendment I thought it was in order at first, until the question of manufacture came up, and I had concluded, without very careful examination, that this did not authorize the paragraph to manufacture material, and hence that that would be an affirmative provision.

If the Chair holds that the paragraph authorizes the manufacture of these high explosives, why I think it is only a negative limitation and would be in order under those circumstances.

Mr. WILLIAMS. Mr. Chairman, I did not yield the floor when the gentleman from Alabama rose, only for one or two questions. I want to know from the gentleman from Alabama, in my time, what is included under the general head of ordnance material.

Mr. HOBSON. I would be glad to say to the gentleman that the word "procure" there is used instead of the word "manufacturing" in order that it may include purchase as well.

Mr. WILLIAMS. Well, but my question now is, What is the general class of material here that is designated as ordnance material?

Mr. HOBSON. It is all the material used in ordnance in the Navy. For instance, ammunition for small arms, for magazine equipment, turret materials, the sights and ammunition appliances, and then the shells themselves and the powder. Powder is not a raw product.

Mr. WILLIAMS. I yield the floor.

Mr. GARNER. I would like to ask the gentleman from Alabama to tell the committee the meaning of the word "armament" of a ship.

Mr. HOBSON. It means everything that pertains to the offensive power short of the ram. It means torpedoes; it means guns and everything that relates to them. It is a comprehensive word for the offensive power short of the ram.

Mr. SAUNDERS. Mr. Chairman, it seems to me that the meaning of the word, "production" in this connection may be ascertained by having reference to the fact that the word "procure" precedes it in the same sentence. In endeavoring to get away from the meaning attributed to the word, "production," by the gentleman from Alabama, the gentlemen who are opposing that view, are giving to the word "production," a meaning that properly belongs to the word, "procuring." The use of the latter word in this connection very clearly shows that the word, "production," must carry some other meaning than the one imputed of assembling, or bringing material together. If this meaning is to be attached to the word "production," in this connection, there was no occasion at all to use it, since this meaning is sufficiently conveyed by the word, "procuring." Hence it seems to me, having in mind the words used that the proper meaning to be applied and attached to the word "production" in this connection, is not an assembling, or gathering together of material, but a process of working out a finished product, in other words, a process of manufacturing. Unless this meaning is imputed to the word "production," it is merely the equivalent, and substantial repetition of, the word "procuring."

The CHAIRMAN. The Chair prefers that a ruling on the point of order go over until to-morrow and that the reading of

the bill be proceeded with and that we return to the amendment to-morrow.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that the point of order be passed over and we may proceed with the reading of the bill.

The CHAIRMAN. Is there objection?

Mr. FOWLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FOWLER. If this goes over, will opportunity be given for the purpose of offering an amendment to perfect the amendment if the point of order should be sustained?

The CHAIRMAN. If the point of order is sustained to the amendment, the amendment will go out. The gentleman, the Chair thinks, would then have the right to offer any further amendment.

Mr. FOWLER. All right, Mr. Chairman, with that understanding I have no objection.

The Clerk read as follows:

Purchase and manufacture of smokeless powder, $1,150,000: *Provided*, That no part of any money appropriated by this act shall be expended for the purchase of powder other than small-arms powder at a price in excess of 53 cents a pound: *Provided further*, That in expenditures of this appropriation, or any part thereof, for powder, no powder shall at any time be purchased unless the powder factory at Indianhead, Md., shall be operated on a basis of not less than its full maximum capacity.

Mr. WITHERSPOON. Mr. Chairman, I desire to offer an amendment to the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 19——

The CHAIRMAN. The gentleman offers an amendment to a page which has not yet been read.

Mr. WITHERSPOON. No, sir; it is the paragraph on page 18, line 12.

The CHAIRMAN. The amendment says, page 19, line 10.

Mr. MURRAY of Massachusetts. Mr. Chairman, I ask unanimous consent that the gentleman may modify his amendment to read at the page and place he desires it to read.

Mr. WITHERSPOON. It is page 18, line 12.

The CHAIRMAN. The Chair will say to the gentleman again that if he writes his amendment to apply to page 18, line 12, that has not been reached yet.

Mr. MANN. Can we have the amendment again reported, so that the committee will know what it is?

The CHAIRMAN. The Clerk will report the amendment.

Mr. PADGETT. They have just read from line 12 to line 20.

Mr. WITHERSPOON. The paragraph has just been read, and I move to strike out the first two words in it, namely, "purchase and."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 18, line 12, strike out the words "purchase and."

The CHAIRMAN. The Chair finds that the amendment is now in the correct place, and the Clerk has made the correction in the amendment offered by the gentleman.

Mr. WITHERSPOON. Mr. Chairman, the amendment is made under the facts that I have already had occasion to explain to the House. This appropriation of $1,150,000 is for the purchase and manufacture of powder. We have a powder factory that can manufacture 2,500,000 pounds of powder per annum. We use only 1,600,000 pounds. We can manufacture 900,000 pounds more than we use. We already have a greater reserve than the capacity of our guns could possibly use in any kind of war, and that portion of this $1,150,000, under the paragraph as it is written, would be used for the purchase of powder and, in my judgment, is a waste of public funds. I therefore move to strike out the two words and confine the use of this money to the manufacture of powder.

The CHAIRMAN. The question is on the adoption of the amendment.

Mr. PADGETT. Mr. Chairman——

The CHAIRMAN. The gentleman from Tennessee.

Mr. PADGETT. Mr. Chairman, this amount is the same amount and under the same provision that has been carried in the bill for years. The larger part of it is for the manufacture of powder at Indianhead, but there is a small part of it that is for purchase. As I stated before, I do not think this is any time to be cutting down the purchase of our powder.

Mr. GARNER. Will the gentleman yield?

Mr. PADGETT. Yes, sir.

Mr. GARNER. Was there not a provision carried in the Army bill cutting out the right to purchase powder?

Mr. PADGETT. No, sir. It was limited, just as we have it here, to 53 cents a pound.

Mr. GARNER. Did we not strike out of the Army bill the right to purchase powder and only make the appropriation available for manufacture?

Mr. PADGETT. I do not recall that we did.

Mr. FOWLER. Did they not do it in the Senate?

Mr. GARNER. I do not know. I saw the statement——

Mr. PADGETT. I do not think they did anything of that kind. I think the House will realize this is not the time to be cutting down our powder. I ask for a vote.

Mr. MANN. Will the gentleman yield for a question?

Mr. PADGETT. Yes, sir.

Mr. MANN. Suppose the appropriation was only for the manufacture of powder, and that we should have a war this summer, and after Congress adjourned the powder mill would blow up or burn up—I believe they frequently blow up——

Mr. PADGETT. Yes, sir.

Mr. MANN. Could anything be done with the money?

Mr. PADGETT. No, sir. They could not get it.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. GARNER having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 657) to authorize the reservation of public lands for country parks and community centers within reclamation projects in the State of Montana, and for other purposes, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PITTMAN, Mr. SMITH of Arizona, and Mr. SMOOT as the conferees on the part of the Senate.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For modifying or renewing breech mechanisms of 3-inch, 4-inch, 5-inch, and 6-inch guns, to be available until expended, $75,000.

Mr. GARNER. Mr. Chairman, I reserve a point of order against that paragraph. The only objection that I have to it is that portion of it "to be available until expended." Discussing it with the gentleman from Tennessee [Mr. PADGETT], the chairman of the committee, I suggested it be changed to make it available until June 30, 1916.

Mr. PADGETT. I have no objection to that. That would meet the situation.

Mr. GARNER. I move to strike out the word "expended," in line 26, and insert in lieu thereof "June 30, 1916."

Mr. MANN. Not yet. The gentleman has a point of order reserved.

Mr. GARNER. If the gentleman from Illinois [Mr. MANN] and the other gentlemen desire to make a point of order——

Mr. MANN. The gentleman has still a point of order pending.

Mr. GARNER. Mr. Chairman, I withdraw the point of order.

Mr. MANN. Then I reserve the point of order. I have no objection to the proposition with the gentleman's amendment or without it, I think, but there are a number of these items in here of this sort.

Mr. PADGETT. Yes, sir.

Mr. MANN. And we might as well ask about them all. Why should the item for torpedoes be made available until expended?

Mr. PADGETT. Because it takes a longer time to manufacture them than the fiscal year.

Mr. MANN. And is the same true of liners for eroded guns, whatever that may be?

Mr. PADGETT. Yes, sir. For instance, they may not get an eroded gun brought in. They may get a provision for lining an eroded gun. At the time the ship may be away, but by the time she got in the appropriation would have expired.

Mr. MANN. There is this item that is under consideration and three other items—that makes four items in this bill—where this language is new and not in the current law. What are they doing with the present money that is appropriated?

Mr. PADGETT. They are having a great deal of difficulty in the matter.

Mr. MANN. Do they turn it back into the Treasury?

Mr. PADGETT. Yes. As I remember, Admiral Strauss stated that he had to go before the Committee on Appropriations to get deficiency appropriations.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if the gentleman will yield for just a moment, I wish to say that the chief of the Bureau of Ordnance stated to the committee that under the first appropriation for the purpose of modifying or

renewing breech mechanism of guns, amounting to $200,000, they were obliged to turn back into the Treasury unexpended $175,000, because they could not get the guns off the ships and to the factory during the time wherein the money was available.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question there?

Mr. ROBERTS of Massachusetts. Yes.

Mr. MANN. This money is appropriated every year, is it not—a regular appropriation?

Mr. ROBERTS of Massachusetts. On some types of guns; yes.

Mr. MANN. On all items of this bill of this sort not only the items are the same but the amounts are the same, with the exception of torpedoes, and that is increased. Now, why do they have to get the guns off the ship and repair them during the fiscal year?

Mr. PADGETT. Because this money is available only during the fiscal year named.

Mr. MANN. They can take the guns off with the money that is now available. They do not draw such a sharp line as that. After the 1st of July this money will be available, and they can repair the guns, and next year there will be another appropriation.

Mr. PADGETT. Let me call the attention of the gentleman to this fact: It is contemplated, for instance, that during the current fiscal year for which they received an appropriation in the last bill that they would line or repair or change certain guns, but they do not get those guns off in time to do the work during the fiscal year.

Mr. MANN. Then they will have them in in time to do the work during the next fiscal year, will they not?

Mr. PADGETT. Yes.

Mr. MANN. After you get started it works out itself, does it not?

Mr. PADGETT. No. If they do not spend the money, they have to turn it back into the Treasury.

Mr. MANN. You say they can not get the guns off the ship. They say before the end of the year the appropriation is exhausted. But another appropriation becomes available instantly. They can go right ahead with the repair of those guns.

Mr. PADGETT. They can do so out of the appropriation made for the succeeding year, but at the end of the year named they return to the Treasury that money that they did not use.

Mr. MANN. Well, after they get started they will not have to turn any money back into the Treasury.

Mr. PADGETT. Oh, yes; they will.

Mr. MANN. Then that is certainly not like anything else under the Government.

Mr. PADGETT. It may happen each year with regard to some of those ships.

Mr. ROBERTS of Massachusetts. If the gentleman from Illinois [Mr. MANN] will permit me, I will say that this item of $75,000 is to complete the work on these guns mentioned in the bill, and there would be no occasion for repairing them in the succeeding year.

Mr. MANN. Is there to be a similar item like this next year?

Mr. ROBERTS of Massachusetts. Not for these particular makes of guns—4, 5, and 6 inch guns.

Mr. MANN. Then, Mr. Chairman, I withdraw the point of order.

Mr. STAFFORD. I renew the point of order, Mr. Chairman, for the time being.

Mr. GARNER. Mr. Chairman, I want to suggest to the chairman of the committee and to the membership of the committee that the gentleman from Tennessee [Mr. GARRETT] has just called my attention to a provision of the Constitution which specifically prohibits an appropriation for the Army for a longer period than two years.

Mr. PADGETT. That may apply to the Army, but it does not apply to the Navy.

Mr. GARNER. Oh, it certainly applies to the Navy.

Mr. PADGETT. It applies to the Army but not to the Navy.

Mr. GARNER. It ought to apply to the Navy.

Mr. MANN. It does. But this is not for an expenditure of the Army.

Mr. STAFFORD. Mr. Chairman, will the gentleman from Tennessee permit a question? I would like to inquire if all this work is being performed by the Government in our own yards, or whether any of it is let out by contract?

Mr. PADGETT. I understand it is done in our own yards.

Mr. STAFFORD. If it were let out by contract the money would be available for two years.

Mr. PADGETT. They could obligate the money and hold it, if it was done by contract, but it is in the Government yard here at Washington, in the gun factory. I am perfectly willing to put the limitation in these matters until June 30, 1916. That is all we want to accomplish, so as not to have to turn this money back.

Mr. STAFFORD. That is satisfactory. I will withdraw the point of order.

The CHAIRMAN. Is there objection to the withdrawal of the point of order? The Chair hears none.

Mr. GARNER. Mr. Chairman, I offer an amendment, on page 18, line 6, to strike out the word "expended" and insert the words "June 30, 1916."

The CHAIRMAN. The gentleman from Texas [Mr. GARNER] offers an amendment which the Clerk will report.

The Clerk read as follows:

On page 18, line 6, strike out "expended" and insert "June 30, 1916."

Mr. MANN. Mr. Chairman, the gentleman from Tennessee stated a moment ago that the limitation in the Constitution did not apply to the Navy.

Mr. PADGETT. That is my recollection. I have not read it in a good many moons.

Mr. MANN. I will read it:

To raise and support armies; but no appropriation of money to that use shall be for a longer term than two years.
To provide and maintain a navy.

I think the gentleman is right in his contention; but I do not think it applies to this item, anyhow.

Mr. PADGETT. No; this is manufacture.

Mr. MANN. That is what I rose to say. This is not to raise and support either an army or a navy.

Mr. PADGETT. Certainly not. This is to manufacture certain material.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. PADGETT) there were—ayes 40, noes 0.

Accordingly the amendment was agreed to.

The Clerk read as follows:

For replacing Mark VI 6-inch guns with Mark VIII guns and repairing and modernizing the Mark VI guns for issue, to be available until expended, $150,000.

Mr. PADGETT. I move to strike out the word "expended," in line 3, and insert "June 30, 1916."

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Line 3, page 19, strike out "expended" and insert "June 30, 1916."

The amendment was agreed to.

The Clerk read as follows:

For liners for eroded guns, to be available until expended, $100,000.

Mr. PADGETT. Mr. Chairman, I move to strike out the word "expended," in line 4, and insert "June 30, 1916."

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 19, line 4, strike out "expended" and insert "June 30, 1916."

The amendment was agreed to.

The Clerk read as follows:

Ammunition for ships of the Navy: For procuring, producing, preserving, and handling ammunition for issue to ships, $3,178,890, to be available until expended.

Mr. WITHERSPOON. Mr. Chairman, I offer an amendment to that paragraph.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 19, line 10, after the word "ships," strike out the figures "$3,178,890" and insert the figures "$2,802,890."

Mr. WITHERSPOON. Mr. Chairman, the Chief of Ordnance explained to the committee that the sum carried in this paragraph includes $360,000 for the purchase of powder. I say we do not need it, that it is a waste of money, and I think that sum ought to be deducted from it. That is the purpose and effect of the amendment I propose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. WITHERSPOON].

The amendment was rejected.

Mr. STAFFORD. Does the chairman of the committee intend to offer an amendment to this paragraph similar to the amendments he has offered to the preceding paragraphs?

Mr. PADGETT. No; this is old language that has been carried from year to year, and the point which applied to the other paragraphs does not apply to this.

Mr. MOORE. Will the gentleman kindly inform us whether small-arms ammunition is provided for in this paragraph?

Mr. PADGETT. Yes; they can buy small-arms ammunition, but we buy all of our small-arms powder from the Army.

Mr. MOORE. That is what I want to get at.

Mr. PADGETT. The Navy buys all of its small-arms powder from the Army.

Mr. MOORE. Under the new Army bill the Army will manufacture in Government factories probably 90 per cent of its supply, will it not?

Mr. PADGETT. I presume so; I do not know whether it amounts to 90 per cent.

Mr. MOORE. Heretofore the requisition for small arms in use in the Navy has been made on the War Department?

Mr. PADGETT. Yes; the War Department has been furnishing them for years.

Mr. MOORE. Independent purchases have not been made?

Mr. PADGETT. No; I do not think there have been any.

Mr. CULLOP. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. CULLOP. Is this the amount that was carried in the bill last year?

Mr. PADGETT. Yes.

Mr. CULLOP. Was the whole amount expended last year?

Mr. PADGETT. Yes.

Mr. CULLOP. I see the amount is to be available until expended.

Mr. PADGETT. I beg the gentleman's pardon. It was $3,850,000 last year, and we have reduced it to $3,178,890.

Mr. CULLOP. Was the whole amount expended last year?

Mr. PADGETT. It was either expended or obligated.

Mr. WITHERSPOON. I think the chief of the bureau said that they had expended the whole of it.

Mr. PADGETT. He may not have expended the whole of it, but he may have made contracts, and it might not all have been delivered.

Mr. CULLOP. I wanted to know whether there was some that was not expended; and, inasmuch as there is a provision making it available until expended, there would be some of that available.

Mr. PADGETT. Instead of increasing it, we have reduced it about $600,000.

Mr. MANN. The gentleman from Tennessee, chairman of the committee, has several times observed that this was not a very appropriate time to cut down appropriations for the Navy. Does the gentleman think this an appropriate time to cut down the item for ammunition for the ships of the Navy? It was $3,850,000 for the current year, and you have reduced it to $3,178,890.

Mr. PADGETT. The chief of the bureau recommended that reduction in the hearings before the committee on account of the fact that he got projectiles, heretofore referred to in debate, at a much cheaper price; that there has been a saving of about $600,000; and so we reduced the amount. That enabled him to buy that much more.

Mr. MANN. That was before the present emergency arose that the gentleman has referred to on every other occasion. Now, in view of the present situation, quoting the gentleman's language, does the gentleman think that this is an appropriate time to reduce the appropriation from what it now is?

Mr. PADGETT. As the bill has been reported carrying the reduction on account of economies heretofore stated, and the department not asking for an additional amount, I think the amount in the bill is sufficient. They get the same results from a less appropriation.

Mr. MANN. We do not know what the result will be until we fire some of the ammunition.

Mr. PADGETT. That may be, but we get the same result in the amount of purchase.

The Clerk read as follows:

Torpedoes and appliances: For the purchase and manufacture of torpedoes and appliances, to be available until expended, $1,000,000.

Mr. PADGETT. Mr. Chairman, I move to strike out the word "expended," in line 13, and insert in place thereof the words "June 30, 1916."

Mr. STAFFORD. Mr. Chairman, I would like to ask the gentleman from Tennessee why this appropriation could not be utilized for the fiscal year?

Mr. PADGETT. Because it takes more than two years to manufacture the torpedoes that this item appropriates for. The matter that I was hesitating a moment ago about was to make it clear that June 30, 1916, would be a long enough time, and I think it will.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GREEN of Iowa. Mr. Chairman, I rise for the purpose of asking the chairman of the Naval Committee a question. We have now in stock only about one torpedo for each tube?

Mr. PADGETT. No. I have a statement here, which I will show to the gentleman or anyone else, that gives a detailed statement as to the condition of the torpedoes. I am glad to report that we are in splendid condition.

Mr. GREEN of Iowa. You have only about 1,000 on hand?

Mr. PADGETT. I can not give the exact number, but I will state that the number we have under the provisions that have been made for torpedoes is satisfactory.

Mr. GREEN of Iowa. This is public property already?

Mr. PADGETT. No; it is not. The things circulated in the press are not at all accurate. I am perfectly willing to give the gentleman the figures, and he will see at once that the status we are in is a very satisfactory one and one with which the department is entirely satisfied and well pleased.

Mr. GREEN of Iowa. The gentleman may be perfectly satisfied, but I am not.

Mr. PADGETT. Will the gentleman take these figures and look at them? He undoubtedly gets his dissatisfaction from the reports in the newspapers, that are not borne out by the facts.

Mr. GREEN of Iowa. No; I get it from reading scientific journals.

Mr. PADGETT. This is an official statement which I have here from the Chief of the Bureau of Ordnance, giving detailed statements, and I am perfectly willing to give it to the gentleman or any other Member of the House, but I do not think it would be proper to publish it.

Mr. GREEN of Iowa. I do not care for it for that purpose. It takes something over a year to manufacture a first-class torpedo, and about two years from the time they are ordered before we can get them into commission?

Mr. PADGETT. Yes; but we are in fine shape on the question of torpedoes, the newspaper statements to the contrary notwithstanding. I am willing to submit to the gentleman or any other Member this detailed statement.

Mr. GREEN of Iowa. As the gentleman does not care to go into the subject publicly I will not go into it further.

Mr. BARTON. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BARTON. The statement of the heads of the department that we were totally unprepared for war is not well founded.

Mr. PADGETT. I do not know who made that statement; but I do not think it is well founded.

The Clerk read as follows:

Experiments, Bureau of Ordnance: For experimental work in the development of armor-piercing and other projectiles, fuses, powders, and high explosives, in connection with problems of the attack of armor with direct and inclined fire at various ranges, including the purchase of armor, powder, projectiles, and fuses for the above purposes and of all necessary material and labor in connection therewith; and for other experimental work under the cognizance of the Bureau of Ordnance in connection with the development of ordnance material for the Navy, $150,000.

Mr. HOBSON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 19, line 21, after the word "armor-piercing," insert the words "and torpedo shell," so as to read:

"In the development of armor-piercing and torpedo shell and other projectiles."

Mr. HOBSON. Mr. Chairman, this amendment is not necessary for giving authority to the department to carry on this experiment. It is merely a recognition of a stage in ordnance development that has now been reached. The torpedo shell is being used in the navies of the world. A recent experiment in the British Navy gave a very striking illustration, where the *Empress of India*, one of their battleships of about the middle nineties, was put at a distance of 16,000 yards and was destroyed, and the report was that there were breeches in her side as large as lock gates.

Mr. FOWLER. Mr. Chairman, the torpedo shell did not strike the *Empress*, but struck in the water near her. Is not that true?

Mr. HOBSON. I am not informed as to that detail.

Mr. FOWLER. I understand that it did not even strike the battleship.

Mr. PADGETT. Mr. Chairman, stating that this is a recognition and not to be construed as a direction to the department with reference to any particular make or form of shell, and I do not understand the gentleman to mean it to be a direction——

Mr. HOBSON. No.

Mr. PADGETT. About any particular shell?

Mr. HOBSON. No; and the words do not give it, either.

Mr. PADGETT. Understanding it so, I have no objection to the amendment.

The CHAIRMAN. The question is on the adoption of the amendment.

The amendment was agreed to.

The Clerk read as follows:

Arming and equipping Naval Militia: For arms, accouterments, ammunition, medical outfits, fuel, water for steaming purposes, and clothing, and the printing or purchase of necessary books of instruction, expenses in connection with the organizing and training of the Naval Militia of the various States, Territories, and the District of Columbia, under such regulations as the Secretary of the Navy may prescribe, $125,000.

Mr. MOORE. Mr. Chairman, I move to strike out the last word. How will the Naval Militia be accepted in the service?

Mr. PADGETT. We recently passed a general bill upon that subject, organizing and establishing upon an organized basis the Naval Militia, with specific provisions and instructions relative to that.

Mr. MOORE. What has become of that bill?

Mr. PADGETT. It has become a law.

Mr. MOORE. Has it been passed and signed?

Mr. PADGETT. Yes.

Mr. MOORE. Then the question naturally arises, how will the Naval Militia be accepted in the service if the President should issue a call for the Mexican emergency?

Mr. PADGETT. If there is occasion or necessity for that, they will be accepted gladly and given the recognition provided for them in this law, which is very liberal and was entirely satisfactory to the Naval Militia.

Mr. MOORE. I think the gentleman does not quite understand what I am driving at. I want to know just how the Navy Department would receive the Naval Militia. They are organized as the National Guard is. With reference to the National Guard, we are told that they would be accepted as volunteers in regiments, and that the officers would be accepted up to the rank of colonel, and that beyond that the officers would not be accepted, except at the discretion of the War Department or the President.

Mr. PADGETT. These are called in by the President as an emergency may arise under the law, and when they come in they are distributed into the different ships according to the provisions of the law. They may be assigned to some of the subordinate ships. It is all provided for in the law which recently was enacted.

Mr. MOORE. There may have been some later information as to what our various constituencies in the Naval Militia would have to do when called for the service of the Government.

Mr. PADGETT. That is provided in the law—how they come in, how the Secretary of the Navy may make regulations—and I am told they are coming in very rapidly. Since that law was passed the States are accepting it.

Mr. MOORE. There is an organization in Pennsylvania. Now, will that organization be accepted as a body, with its present officers? If called for and they would volunteer and be accepted, would they go in intact as a body, or would their officers be distributed and the men sent to various ships?

Mr. PADGETT. That would depend upon the Secretary of the Navy how they might be distributed. They might be distributed among different vessels, or they might go on one vessel. That would depend upon the Secretary of the Navy when they become a part of the naval organization. Whenever they are accepted they accept the terms of detail as any other naval force.

Mr. MOORE. Is the gentleman sufficiently informed to tell us whether if the Pennsylvania Naval Militia were to offer itself as a body, volunteering upon the call of the President, it would be assigned as a body, or would it be cut up and its officers distributed hither and yon?

Mr. PADGETT. I could not tell the gentleman how it would be. They might be assigned to one ship or they might be distributed to different vessels.

Mr. MOORE. Well, there would be an inclination of those trained together to enlist together and serve together.

Mr. PADGETT. That would be a matter that would address itself to the superior officers in the Navy in making their assignments.

Mr. MOORE. That would be subject to the discretion of the Secretary of the Navy?

Mr. PADGETT. Why, certainly.

The Clerk read as follows:

Contingent, Bureau of Ordnance: For miscellaneous items, namely: Cartage, expenses of light and water at magazines and stations, tolls, ferriage, technical books, and incidental expenses attending inspection of ordnance material, $9,500.

Mr. MANN. Mr. Chairman, I move to strike out the last word just for the purpose of suggesting to my genial friend——

Mr. PADGETT. Mr. Chairman, I am going to say to the gentleman I was just about to announce to the Chair that all present have been so patient and so kind to the chairman and others in consideration of the bill that I now move that the committee rise.

The question was taken, and the motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14034, the naval appropriation bill, and had come to no resolution thereon.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills and joint resolution:

H. J. Res. 204. Joint resolution authorizing the Secretary of Agriculture to make exhibits at forest products' expositions to be held in Chicago, Ill., and New York, N. Y.;

H. R. 122. An act authorizing the State of California to select public lands in lieu of certain lands granted to it in Imperial County, Cal., and for other purposes;

H. R. 5487. An act to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis.; and

H. R. 11269. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

JAMES J. COATES.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk, with an amendment.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 480 (H. Rept. 593).

Resolved, That House resolution 145, Fifty-ninth Congress, first session, be amended by striking out the name of Robert Coates and inserting the name of James J. Coates.

With the following committee amendment:

Strike out all after the word "*Resolved*," line 1, and insert the following:

"That James J. Coates be, and he is hereby, appointed a laborer at $840 per annum, as successor to Robert Coates, named in House resolution adopted June 5, 19—, referred to in the current law making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, approved March 4, 1913. Said appointment to commence April 20, 1914."

The SPEAKER. Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, may I ask the gentleman, Does this boy Robert out here get the same salary?

Mr. LLOYD. Yes, sir.

Mr. GARRETT of Tennessee. There is no difference in the salary?

Mr. LLOYD. No.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The question was taken, and the amendment was agreed to.

The resolution as amended was agreed to.

WITHDRAWAL OF PAPERS.

By unanimous consent, Mr. FOSTER was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of Jacob Hefler, Sixty-second Congress, no adverse report having been made thereon.

Mr. HAY was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of David Crowther, Sixty-second Congress, no adverse report having been made thereon.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p. m.) the House adjourned to meet to-morrow, Wednesday, April 29, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers reports on preliminary examination and survey of Boston Harbor, Mass., with a view to securing increased width and depth in the channel from President Roads to the sea; also with a view to providing deep-

water connection with such suitable terminals as may be established by the directors of the port of Boston (H. Doc. No. 931); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

2. A letter from the Secretary of the Treasury, transmitting an estimate of appropriation in the sum of $25,000 for quarantine facilities at Providence, R. I., submitted by the Surgeon General of the Public Health Service (H. Doc. No. 930); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, requesting that the sum of $100,000 be appropriated by joint resolution or otherwise, to be immediately available for use in the prevention of the introduction and spread of epidemic disease (H. Doc. No. 929); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HUGHES of Georgia, from the Committee on Education, to which was referred the resolution (S. J. Res. 142) authorizing the Vocational Education Commission to employ such stenographic and clerical assistants as may be necessary, etc., reported the same without amendment, accompanied by a report (No. 585), which said resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURNETT, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 6279) to authorize the Secretary of the Treasury to purchase additional land for a public building site at Fairbanks, Alaska, reported the same with amendment, accompanied by a report (No. 588), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DUPRÉ, from the Committee on the Judiciary, to which was referred the bill (H. R. 11624) to repeal an act approved March 2, 1895, entitled "An act to amend section 3 of an act entitled 'An act to regulate the liens of judgments and decrees of the courts of the United States,' approved August 1, 1888," reported the same without amendment, accompanied by a report (No. 590), which said bill and report were referred to the House Calendar.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 16053) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, reported the same without amendment, accompanied by a report (No. 592), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 1182) for the relief of John Brodie, reported the same with amendment, accompanied by a report (No. 584), which said bill and report were referred to the Private Calendar.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 9270) to correct the military record of John M. Gray, reported the same with amendment, accompanied by a report (No. 589), which said bill and report were referred to the Private Calendar.

ADVERSE REPORT.

Under clause 2 of Rule XIII,

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the resolution (H. Res. 492) requesting the President of the United States to report to the House facts within the knowledge of the Interstate Commerce Commission relating to cases of failure to grant increases in freight rates in certain cases, reported the same adversely, accompanied by a report (No. 586), which said resolution and report were laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WHITE: A bill (H. R. 16087) authorizing the Secretary of War to donate to the town of Zanesville, Ohio, one cannon or fieldpiece; to the Committee on Military Affairs.

Also, a bill (H. R. 16088) authorizing the Secretary of War to donate to the town of Frazeysburg, Ohio, one cannon or fieldpiece; to the Committee on Military Affairs.

Also, a bill (H. R. 16089) authorizing the Secretary of War to donate to the town of Black Run, Ohio, one cannon or fieldpiece; to the Committee on Military Affairs.

Also, a bill (H. R. 16090) authorizing the Secretary of War to donate to the town of McConnelsville, Ohio, one cannon or fieldpiece; to the Committee on Military Affairs.

By Mr. J. M. C. SMITH: A bill (H. R. 16091) to amend the homestead laws relative to settlers who served in the Army, Navy, or Marine Corps; to the Committee on the Public Lands.

By Mr. ADAMSON: A bill (H. R. 16092) to amend an act entitled "An act to prevent cruelty to animals while in transit by railroad or other means of transportation from one State or Territory or the District of Columbia into or through another State or Territory or the District of Columbia, and repealing sections 4386, 4387, 4388, 4389, and 4390 of the United States Revised Statutes," approved June 29, 1906; to the Committee on Interstate and Foreign Commerce.

By Mr. J. M. C. SMITH: A bill (H. R. 16093) to enlarge, extend, remodel, etc., post-office building at Kalamazoo, Mich.; to the Committee on Public Buildings and Grounds.

By Mr. SELLS: A bill (H. R. 16094) authorizing the Secretary of War to donate condemned cannon and cannon balls; to the Committee on Military Affairs.

By Mr. O'HAIR: A bill (H. R. 16095) to provide for the payment to all persons carried on the pension rolls of the Government the amount of pension due each of said persons at the end of each and every calendar month; to the Committee on Invalid Pensions.

By Mr. BRYAN: A bill (H. R. 16096) to authorize and direct the President of the United States, as Commander in Chief of the Army of the United States, to restore order in certain portions of Colorado and to acquire and operate certain properties, and for other purposes; to the Committee on Military Affairs.

By Mr. HAYDEN (by request): A bill (H. R. 16097) for the establishment of a national park near, adjacent to, and in connection with the Salt River project in the State of Arizona, fixing its boundaries, and prescribing restrictions upon its use and occupancy; to the Committee on the Public Lands.

By Mr. PALMER: A bill (H. R. 16098) revising and amending the statutes relative to trade-marks; to the Committee on Patents.

By Mr. RAKER: A bill (H. R. 16099) to amend the act of June 23, 1910, entitled "An act providing that entrymen for homesteads within the reclamation projects may assign their entries upon satisfactory proof of residence, improvement, and cultivation for five years, the same as though said entry had been made under the original homestead act"; to the Committee on Irrigation of Arid Lands.

By Mr. GODWIN of North Carolina: Resolution (H. Res. 494) providing for an investigation by the Secretary of the Interior to ascertain the status of the Indians of Robeson and adjoining counties of North Carolina; to the Committee on Indian Affairs.

By Mr. GOULDEN: Resolution (H. Res. 495) authorizing the printing of the Journal of the National Encampment of the Grand Army of the Republic; to the Committee on Printing.

By Mr. HULL: Joint resolution (H. J. Res. 256) to amend S. J. Res. 8, approved May 4, 1898, entitled "Joint resolution providing for the adjustment of certain claims of the United States against the State of Tennessee and certain claims against the United States"; to the Committee on War Claims.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BATHRICK: A bill (H. R. 16100) granting a pension to Martha Rodgers Bodine; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16101) granting a pension to Alma Drummond Wharfield; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16102) granting a pension to Marryetta J. Wilson; to the Committee on Invalid Pensions.

By Mr. BUCHANAN of Illinois: A bill (H. R. 16103) to indemnify Arthur A. Sheldon for injuries sustained in the employ of the Post Office Department of the United States Government; to the Committee on Claims.

By Mr. BURKE of Wisconsin: A bill (H. R. 16104) granting an increase of pension to Christina Demerath; to the Committee on Invalid Pensions.

By Mr. CLARK of Florida: A bill (H. R. 16105) granting a pension to Mrs. James H. Gillis; to the Committee on Invalid Pensions.

By Mr. CLINE: A bill (H. R. 16106) granting an increase of pension to Mary E. West; to the Committee on Invalid Pensions.

By Mr. DIXON: A bill (H. R. 16107) granting a pension to William P. Duffy; to the Committee on Pensions.

Also, a bill (H. R. 16108) granting an increase of pension to Matilda Dobbins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16109) granting an increase of pension to James Harris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16110) granting an increase of pension to Joseph Wayman; to the Committee on Invalid Pensions.

By Mr. DOUGHTON: A bill (H. R. 16111) granting a pension to Henry C. Miller; to the Committee on Pensions.

By Mr. GLASS: A bill (H. R. 16112) granting a pension to Hiram C. Howard; to the Committee on Pensions.

Also, a bill (H. R. 16113) granting a pension to Pyrrhus Williams; to the Committee on Pensions.

By Mr. GOLDFOGLE: A bill (H. R. 16114) for the relief of William W. Case; to the Committee on Claims.

Also, a bill (H. R. 16115) to authorize the restoration of Edward P. Bigelow to the retired list of the Army and his appointment as a captain thereon; to the Committee on Military Affairs.

By Mr. YOUNG of North Dakota: Petition of various Choctaw and Chickasaw Indians, favoring a per capita payment; to the Committee on Indian Affairs.

SENATE.

WEDNESDAY, *April 29, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, our continual cry to Thee is for light, light more abundant. Thou hast committed to us the great power of self-determination and with it Thou hast given to us our likeness to God. We pray that all that is within us may respond to the Divine ministry, so that the outward expression of the thoughts of our hearts may be godlike. We pray that Thou wilt guide us this day in every thought. Let us remember that it is not in the great crises of life, amidst the stir and storm and stress of the world, that our real personal revelation must come, but in the unguarded moments, the hours of conflict of opinion and personal contact, we may express that which is godlike within us. So do Thou help us to live this day. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

REVENUES OF RAIL CARRIERS.

The VICE PRESIDENT laid before the Senate a communication from the Interstate Commerce Commission, transmitting, in response to a resolution of the 28th instant, certain anonymous letters and communications and written letters and printed letters and communications with signatures thereto, circulars, clippings, newspaper or magazine articles marked or otherwise that are immediately available, and stating that all additional papers of the nature referred to in the resolution and received by the commission will be presented at the earliest practicable moment, which was ordered to lie on the table.

PERSONAL EXPLANATION—LABOR TROUBLES IN COLORADO.

Mr. THOMAS. Mr. President, I seldom pay much public attention to statements in the public press concerning myself, since to do so neither corrects the evil nor subserves any satisfactory purpose. I am impelled, however, to make this occasion an exception to the rule because of conditions now prevailing in my State.

The World of this morning contains an article relating to the action of the President yesterday in mobilizing Federal troops in obedience to the requisition of the governor of Colorado in which I find this statement, referring to a conference between the President and myself:

> At this conference the President was told by Senator THOMAS that in the beginning the sympathy was with the strikers, but that lately it had turned against the miners because of their repeated breaking of truces. He informed the President that the merciless killing of men, women, and children by mine guards and State militia a few days ago was largely the fault of the miners; that the guards and militia were attacked during a truce period and were compelled to fire in self-defense. It was this return fire which slaughtered so many innocents and induced Gov. Ammons to appeal to the Federal Government for aid, Senator THOMAS informed the President.

The writer of this statement is entirely mistaken. I have refrained from expressing any opinion or of passing final judgment upon the immediate causes of the present disasters in my State. I have, however, felt it my duty to lay before the President all the information reaching me from reputable sources, including, of course, statements from both sides of the controversy, as well as from noncombatants and officials of the State. In doing this I have expressed no opinion as to the real fault and as to the sources or the responsibility for the resumption of violence and disorder on the 20th of the month and continuing to yesterday. Both will, I hope, be fully disclosed in time.

AFFAIRS IN MEXICO.

Mr. FALL. Mr. President, I have several telegrams in the nature of petitions, which I ask to have read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read them.

The Secretary read as follows:

[Telegram.]

GALVESTON, TEX., *April 28, 1914.*

Senator A. B. FALL,
Washington, D. C.:

Know your past interest in behalf of ill-treated Americans in Mexico. Wish to inform you that an attempt was made to maltreat and lynch Vice Consul Bevens on streets of Tampico after most refugees had sought safety on foreign ships; Bevens was saved with difficulty by British consul. Wholesale slaughter of Americans in Southern Hotel surrounded by mob, among whom were Mexican officers, was only averted by the coolness of Ed Williams, formerly United States consul at Durango, and others, who persuaded the few armed men inside building protecting 150 men, women, and children to withhold fire until last moment; this rule was strictly enforced in spite of frequent and persistent efforts of mob to batter down hotel doors. Since then this building has been recklessly searched and probably looted; coaches were stopped in Tampico and American occupants forced to get out and shout "Long live Huerta—Death to the Americans." All mobs were incited by incendiary speeches made by leading Mexican lawyers, doctors, and customhouse officials, who are well known to many of us. One of my boats, filled with fleeing American men and women and some Chinamen, was held up by the Mexican gunboat *Vera Cruz* in the Panuco River, although they had a pass from Gen. Zaragosa, in command of Federals at Tampico. This boat was forced at the point of guns to return up the river and there remain for many hours. Wish call your attention further to fact that none of us know what has occurred since the city of Tampico and all of the valuable properties owned by Americans in that vicinity have been absolutely abandoned by the owners and caretakers. I represent an oil company having over 3,000 small shareholders, composed of men of small means. We have a property of immense value that we have been forced to leave entirely unprotected from the acts of careless people and of employees who hate us, because we are Americans, and for no other reason. Call your attention further to fact that the outrages committed upon Americans are occasioned by no acts performed by these Americans, but simply because they are Americans, and many of us fear that unless we are avenged life will not be worth living for us in Tampico vicinity. We call your attention further to the fact that at all times during the past 8 or 10 months the port of Tampico has been under the guns of American gunboats lying directly in the harbor in front of the city and but a few hundred yards distant. But when the hatred of the Mexican population at Tampico has been brought to blood heat by the landing of American troops at Vera Cruz and by the trouble raised over the arresting of marines in Tampico, our Government peremptorily ordered Admiral Mayo to remove all gunboats from the river without any notice to American inhabitants or any invitation to take refugees on board same. It is commonly understood that Admiral Mayo informed Washington fully of the situation existing and warned Washington of danger to American citizens if such course was adopted. Call your attention further to the fact that all the Americans who secured safe refuge did so through courtesy of foreign nations, to wit, German and English, whereas within 9 miles from the port was a fleet of our own Nation equipped with men, anxious to rescue their own countrymen, and who feel ashamed over the fact that what was their duty was turned over to the forces of other nations.

JOHN N. NEWELL.

[Telegram.]

GALVESTON, TEX., *April 28, 1914.*

Hon. A. B. FALL,
United States Senate, Washington, D. C.:

In reply to yours to Wood. Outrages and insults to Americans in Tampico can not be exaggerated, not to speak of the destruction of millions of property. Can state with positive assurance that present arrangement will result in untold property losses to all Americans, and will also make it impossible for them to continue in business of any kind in Mexico in the future.

S. R. R. POLLOCK,
Refugee, U. S. S. Connecticut.

The Secretary proceeded to read a telegram from J. B. Wood, and was interrupted by,

Mr. GORE. Mr. President, is this communication being read by unanimous consent?

The VICE PRESIDENT. It is.

Mr. GORE. I should like to interpose an objection, if it is not too late, because it is a reflection upon the Secretary of State.

Mr. FALL. I will read it myself, Mr. President, if there is any objection.

The VICE PRESIDENT. It is too late. Unanimous consent was given.

Mr. GORE. I call for the regular order.

The VICE PRESIDENT. This is the regular order. The Secretary will proceed with the reading.

Mr. REED. Mr. President, a parliamentary inquiry. When a request is made in a formal way for unanimous consent to read a document, are we to understand that it is the rule that unanimous consent can not be withdrawn, and that an objection can not be interposed during the reading, if it transpires that there is matter in the document which is objectionable?

The VICE PRESIDENT. The Chair is of the opinion that unanimous consent having been given to the reading of the document it is entitled to be read.

Mr. REED. Unless the right exists for a Senator to object at any time during the course of the reading of a document, the only safe thing to do would be to object to all documents until they have been inspected. Not cavilling with the decision of the Chair or the opinion expressed by him, it seems to me a

better rule would be that if matter is contained in an instrument which is objectionable to a Senator when it appears, his right to object ought then to obtain. Here is a document very seriously reflecting upon the Secretary of State and insulting in its language, and I do not think it ought to be put in the RECORD of the Senate.

Mr. BRANDEGEE. If the Chair will bear with me in relation to the parliamentary inquiry——

The VICE PRESIDENT. Certainly.

Mr. BRANDEGEE. I wish to state simply that the other day the Senator from Washington [Mr. POINDEXTER] obtained unanimous consent for the reading of a certain letter here in which expressions attacking a Senator of this body appeared. It was not known what was in the letter when unanimous consent was given. As soon as the reading of the letter had proceeded a short time I rose and objected and was advised by the President pro tempore that unanimous consent had been given, whereupon the entire letter, in spite of the offensive expressions, had to be read from the desk. It seems to me that is a perfectly parallel case with this on the Senator's own statement.

Mr. REED. I think the Senator is correct that it is a parallel case. I was not, however, aware of the fact, because I did not happen to be in the Chamber, that an objection was sought to be interposed under the circumstances the Senator refers to. But whether it is a parallel case or not, the question still remains whether it is the rule of the Senate that unanimous consent having been once obtained to read a document no objection can thereafter be interposed. I am not undertaking to dispute the correctness of the Vice President's ruling, although I had the opinion that a different rule obtains, and I made the inquiry in order to elicit the view of the Vice President.

Mr. CLARKE of Arkansas. Mr. President, in view of the statement of the Senator from Connecticut [Mr. BRANDEGEE] I think I should make an observation. The attitude in which the question was presented on the occasion referred to by him is entirely different from the one presented here to-day. The Senator from Connecticut was absent when the Senator from Washington asked for unanimous consent that a document, without disclosing its character, should be read at the desk. When he came into the Chamber the Secretary was proceeding with the reading of the document. At that time no objectionable part of it had been reached, and he sought at that stage to interpose an objection. When his attention was called to the fact that unanimous consent had previously been obtained, and nothing objectionable about the paper having been disclosed at that time, he was entirely satisfied with the ruling and sat down.

He did not at that time seek to exercise his right to object on the ground that the document contained matter which did not entitle it to be incorporated in our RECORD. I am not prepared to say what the ruling would have been had that aspect of the question been presented, but it serves my purpose sufficiently on this occasion to say it was not presented then.

Mr. BRANDEGEE. The RECORD will show that I did object and stated that I objected, and the Chair said the objection could not be entertained because the Senate had already given unanimous consent. I thought the Chair was right in its ruling, and I still think so. I think that if the Senate wants to give unanimous consent for the reading of a document without knowing what is in the document it is estopped from interposing an objection the minute something happens that the Senate might have objected to if it had taken the pains to look at the document before it consented to the reading. Otherwise I see no sense whatever in the Senate unanimously consenting that a document may be read if it can immediately object to it after it has consented. Of course this is not a proceeding under Rule VIII at all, where an objection can be interposed at any stage of the proceedings.

Mr. CLARKE of Arkansas. Mr. President, just one word further. I am not going to dispute with my friend from Connecticut as to which would be the better rule. I only make reference to the decision which was made on that occasion. The objection interposed by the Senator from Connecticut was a broad objection that the matter should not be read at all. The objection, I understand, interposed by both the Senator from Oklahoma [Mr. GORE] and the Senator from Missouri [Mr. REED] is to the effect that there is objectionable matter in this particular document.

Mr. BRANDEGEE. But the reason for an objection need not be stated. The question is, Can an objection be made with effect after the Senate has, by unanimous consent, agreed to the reading?

Mr. FALL. I should like to say one word, Mr. President.

The VICE PRESIDENT. The Senator from New Mexico.

Mr. FALL. I think Senators are entirely too sensitive. There is not a word in any of these documents which is offensive, in so far as I know. I certainly would not undertake to slip into the RECORD any insulting expressions.

Mr. GORE. Mr. President——

Mr. FALL. I do not yield at the present time, Mr. President. I do not put into the RECORD any documents the responsibility for which I am not willing to assume. There is nothing contained in the telegram insulting to the Secretary of the Navy. The Senator is too sensitive. There is a criticism of the action of the Secretary of the Navy in ordering the withdrawal of the American battleships, and that is all. There is simply a statement to that effect. If the Senator will get the telegram and read it, I think he will find there is no objection to it at all.

Mr. REED. Mr. President, surely I misheard the reading of the telegram or the Senator from New Mexico must be mistaken. I think there is a statement in the telegram to the effect that the Secretary of State would have desired that the Americans should not have escaped from Mexico.

Mr. FALL. That is proof, Mr. President, of what I have just said. Neither the name of the Secretary of State nor his title is referred to at all in any of the telegrams.

Mr. GORE. Mr. President——

Mr. SUTHERLAND. I call for the regular order, Mr. President.

Mr. BRANDEGEE. Regular order!

Mr. LODGE. Mr. President——

The VICE PRESIDENT. The Senator from Massachusetts.

Mr. LODGE. It is, of course, a perfectly simple thing to have those telegrams read. I make a motion that they be referred to the Committee on Foreign Relations. That is a debatable motion, and I ask to read the telegrams myself.

Mr. FALL. Of course, they will be read under that motion, Mr. President.

Mr. LODGE. It is useless to try to stop their being read.

The VICE PRESIDENT. It is true the Chair has once ruled——

Mr. LODGE. The Chair's ruling, I think, was entirely correct.

Mr. SMOOT. It was perfectly correct.

The VICE PRESIDENT. The Chair was about to make an additional observation in this case, unless the Senator from Massachusetts insists on his motion.

Mr. LODGE. I withdraw the motion, Mr. President.

The VICE PRESIDENT. It is the view of the present occupant of the chair that when unanimous consent is given for the reading of a document it can be read and must be read by the Secretary, unless in the course of the reading of the document there appears some statement which is in violation of the rules of the Senate with reference to documents that may be presented to the Senate, in which event the Chair would be inclined to hold that an objection would stay the reading, and that then the question of the reading would be put to the Senate. If by a majority vote the Senate consented, the reading would proceed.

There is no rule of the Senate which prevents any Senator from saying anything that he pleases about the President of the United States or about any member of the Cabinet. It is a matter of propriety with a Senator whether on the floor of the Senate he either reads into the RECORD himself or makes upon his personal responsibility a statement with reference to any administrative officer of the Government. There is no rule against that; it is a question of propriety, of which the Senator himself is to be the sole and exclusive judge, subject always, the Chair takes it, to the right upon the part of the Senate to expunge from the RECORD anything which it deems ought not to remain a part of the permanent RECORD of the Senate of the United States.

There is this further right, the Chair believes, under the head of morning business, of petitions and memorials, that instead of sending petitions and memorials to the desk to be read a Senator may rise in his seat and read such petitions and memorials. Upon this particular question the Senator from New Mexico [Mr. FALL], according to the view of the Chair, has the clear right, if he chooses to do so, to rise in his seat and read his petitions and memorials to the Senate of the United States. So, in the rough-and-ready way that the Chair tries to reach a conclusion, it is immaterial for all practical purposes whether the Senator from New Mexico reads the document or whether it be read from the desk. That was the basis of the ruling of the Chair, that unanimous consent had been given, and it was the duty of the Secretary to read the paper until it proceeded to some point when there was a violation of the rules of the Senate. That point, in the judgment of the Chair, has not yet been reached.

Mr. BRANDEGEE. I rise to a point of order, Mr. President.

The VICE PRESIDENT. The Senator from Connecticut will state the point of order.

Mr. BRANDEGEE. The Senator from Utah [Mr. SUTHERLAND] demanded the regular order, and I myself had asked for the regular order.

The VICE PRESIDENT. The regular order would be to proceed with the reading of this telegram until it was completed unless there should appear to be something in it in violation of the rules of the Senate. The Secretary will proceed with the reading.

The Secretary resumed and concluded the reading of the telegram, and then read the following telegram:

[Telegram.]

GALVESTON, TEX., *April 28, 1914.*

Hon. A. B. FALL,
United States Senate, Washington, D. C.:

The refugees aboard battleship *Connecticut* have mailed signed statement of conditions in Tampico district to chairman Senate Foreign Relations Committee.

ED. WILLIAMS, *Chairman.*

Mr. BRANDEGEE. Mr. President, with relation to a statement which, as I remember, was contained in one of the telegrams, I want to ask the Senator from New Mexico [Mr. FALL], who has had the telegrams read, a question. Does the Senator understand that the time our citizens were taking refuge upon German and British men-of-war at Tampico was when our own vessels of war were within 9 miles?

Mr. FALL. Certainly, Mr. President. For six months past, or something like that, we have had gunboats in the Panuco River, alongside the wharves at Tampico; and more recently we have had men-of-war in the harbor, anchored off Tampico, and gunboats at the mouth of the Panuco River. My understanding is that our gunboats were withdrawn from the river, and our ships slipped anchor, sailed out 9 miles away, remained there, and are there yet, and that in the meantime our citizens were protected, as they say, by the German and British vessels. That is my understanding of it.

Mr. STONE. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Missouri?

Mr. FALL. I do.

Mr. STONE. I desire to say that as chairman of the Committee on Foreign Relations I have not received any such paper.

Mr. FALL. I can not hear the Senator.

Mr. STONE. I say that the chairman of the Committee on Foreign Relations has not received any such paper as that alluded to in the telegram.

Mr. FALL. Of course he has not, Mr. President. The statement has not had time to reach here. This telegram is dated last night.

Mr. STONE. I make a parliamentary inquiry as to whether debate is now in order, or whether there is any matter pending that is the subject of debate.

The VICE PRESIDENT. There is no matter pending. Any Senator can call for the regular order.

Mr. STONE. I call for the regular order.

Mr. FALL. I want the RECORD to show that the Senator from Missouri asked the Senator from New Mexico a question, to which he is replying. I have not sought to interject debate.

Mr. STONE. I was not accusing the Senator of doing it. I am simply calling for the regular order.

The VICE PRESIDENT. The presentation of petitions and memorials is in order.

Mr. CRAWFORD and Mr. SHEPPARD addressed the Chair.

The VICE PRESIDENT. The Senator from South Dakota.

Mr. SHEPPARD. Mr. President, I ask permission of the Senate to make a brief statement in reference to the Tampico incident. It has been satisfactorily explained by Admiral Mayo himself, and I have a brief reference here to the matter in the New York Times of this morning. It is only four or five lines long, and for the information of the Senate I should like to read it.

Mr. CRAWFORD. Mr. President——

The VICE PRESIDENT. Is there any objection to the request of the Senator from Texas?

Mr. CRAWFORD. I was recognized, I believe.

The VICE PRESIDENT. The Senator was.

Mr. CRAWFORD. If the Senator from Texas will withhold that for just a moment——

Mr. SHEPPARD. I will.

Mr. CRAWFORD. I have a telegram similar to those presented by the Senator from New Mexico. It comes from a citizen of my State, and I should like to have it go into the RECORD in connection with the telegrams offered by the Senator from New Mexico, so that it may be referred to the Committee on Foreign Relations. It is a serious statement, but I do not think it can be regarded as an offensive statement.

Mr. LODGE (to Mr. CRAWFORD). Read it.

Mr. CRAWFORD. I was going to hand it up to the desk and ask to have it read there, but I will read the telegram myself. It is dated Galveston, Tex., April 27, 1914.

Mr. SMITH of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Georgia?

Mr. SMITH of Georgia. I rise to a point of order—not that I object so much to the Senator from South Dakota reading the telegram, but I wish to make the point of order that the Senator can not read the telegram except by unanimous consent.

Mr. LODGE. Mr. President, I make the motion to refer these telegrams to the Committee on Foreign Relations. That motion is debatable.

Mr. SMITH of Georgia. One moment. I wish to call——

Mr. CRAWFORD. Mr. President——

Mr. SMITH of Georgia. I wish to call the Chair's attention——

Mr. LODGE. The Senator from South Dakota has the right to debate the motion of reference; there is no question about that at all.

Mr. SMITH of Georgia. I have the floor to complete my point of order, and the Senator from Massachusetts was out of order when he made the motion.

Mr. LODGE. The motion will be made; you can not prevent the reading of these telegrams.

Mr. SMITH of Georgia. Very well; the Senator can make the motion at the proper time; but he was out of order when he did make it. The Senator will agree with me that he can not take me off the floor to make a motion when I am making a point of order.

Mr. LODGE. I made the motion some time ago, and withdrew it because the Chair desired to make a statement, and under the Chair's ruling the telegram had the right to be read. At the proper time I will renew the motion, and we will debate it.

Mr. SMITH of Georgia. Mr. President, I only desire to complete bringing to the attention of the Chair the rule I have in view on this subject. It is on page 10, paragraph 5, of Rule VII:

> Every petition or memorial shall be signed by the petitioner or memorialist and have indorsed thereon a brief statement of its contents, and shall be presented and referred without debate.

The motion to refer also is to be decided without debate under the rule. I make the point of order that there is no provision which allows the Senator to read the paper from his seat. He can send the petition to the Secretary, when a memorandum is made upon it, and it is referred without debate, unless unanimous consent is given that it be read. I think this is the correct construction of the rule, and the motion to refer is to be decided without debate.

Mr. LODGE. Very well, Mr. President, the motion to refer can be made on any bill or any report that is made here, and then it is open to debate. It is impossible to prevent the reading of documents which Senators desire to read, and all of this debate is a waste of time.

Mr. SMITH of Georgia. Mr. President, I do not question that that may be true later on. I was only calling attention to what seemed to me the rule as to the present time.

Mr. CRAWFORD. Mr. President——

The VICE PRESIDENT. On the point of order made by the Senator from Georgia the difficulty is this, that the Senate has never been willing so far to agree with the opinion of the Chair as to where these documents should be referred. The Chair has exercised that right once or twice, and the Chair has been promptly overruled by the Senate, claiming that the Chair referred it to the improper committee and not to the proper committee. The Chair is clearly of the opinion that a petition or memorial may be read to the Senate of the United States, and that upon motion to refer it to a committee discussion may take place as to whether it is being referred to the proper or improper committee.

Mr. CRAWFORD. Mr. President, I desire to present to the Senate the communication to which I have referred, which I will read and ask to have sent to the Committee on Foreign Relations. It reads as follows:

[Telegram.]

GALVESTON, TEX., *April 27, 1914.*

Senator COE I. CRAWFORD,
Washington, D. C.:

Twenty-five hundred men, women, and children have been forced to fly from Tampico to save their lives, leaving property behind them worth $250,000,000, least calculation, entirely unprotected. Washington Government gave Admiral Mayo peremptory orders to take all gunboats from Panuco River in front of Tampico at critical moment, causing Mexicans to believe us left to our fate and precipitating riots and threats that forced us all to leave at moment's notice. Four hundred Americans in the interior near Tampico are abandoned now unless the German and English people take care of them. Many of these from

your State hope you will see it your duty to stand by your countrymen and see that we get justice.

JOHN I. NEWELL.

Mr. Newell is an old citizen of my State, but during the last few years has been interested in property in the vicinity of Tampico. I received this telegram on yesterday. I ask that it be referred to the Committee on Foreign Relations.

The VICE PRESIDENT. Without objection, it will go to the Committee on Foreign Relations.

Mr. SHEPPARD. Mr. President, in reference to the Tampico incident, I desire to read to the Senate an extract from the leading editorial of the New York Times of this morning:

The puzzling incident of the withdrawal of our warships from Tampico, which the country felt to be a mistake, is fortunately explained now in the statement issued from the Navy Department. It was the information and the belief of Admiral Mayo that "it was necessary for the safety of all foreigners that the United States naval vessels should not be near the town." He therefore withdrew upon receiving the assurances of Admiral Craddock, of the British cruiser *Hermione*, that he would make provision for refugees. That service has been performed by the British admiral in a way to win the gratitude of the American Government and people.

It seems that the action in question was taken on the responsibility, or at the suggestion, of Admiral Mayo, who was on the ground.

Mr. CLARK of Wyoming. Has the Senator the statement of Admiral Mayo?

Mr. SHEPPARD. It is quoted here in this paper; I have not the original statement.

Mr. CLARK of Wyoming. Is it quoted directly?

Mr. SHEPPARD. It is quoted directly, and the quotation marks are used in the editorial.

Mr. LODGE. Mr. President, there is no doubt that our ships were withdrawn from Tampico. I asked the Navy Department why they were withdrawn, and I was informed that they were withdrawn because it was thought that the sight of our ships with the American flag would inflame the mob. That is the information I was given. There is no doubt that the American refugees were rescued first by the commander of the German boat *Dresden;* 1,300 were taken on board the British vessel *Hermione* and 800 on board the German boat. They were subsequently, I believe, transferred to our battleships, which were lying outside, 9 miles away. That is what happened, as a matter of fact.

Mr. McCUMBER. Mr. President, I have read the excuses that were made, and it seemed to me that there was substance in them. We are practically at war with Mexico. There were some 3,000 refugees there at that port not properly protected at that time. There was danger of a mob being incensed by the approach of a hostile fleet, and danger of a massacre of our citizens. Acting under those conditions, it seems to me it is not reprehensible that nothing was done upon our part to put a flame to that feeling and to put our citizens in danger of being massacred by Mexicans. It was perhaps better for us, although it might touch our pride a little bit, to have 2,500 live Americans taken out through this process rather than to have 2,500 corpses of Americans taken out. I am perfectly willing to give to Admiral Mayo the opportunity to determine which he thought was the best method of relieving the conditions there and securing the opportunity of our citizens to leave without danger of massacre.

Mr. CLARK of Wyoming. Mr. President, the Senator's statement leaves a doubt in my mind. I had understood that our ships were already at Tampico and that they then withdrew. The Senator speaks of the danger that might possibly have occurred through the approach of our fleet. It seems to me there is a difference.

Mr. LODGE. They were there, in the river and in the harbor.

Mr. CLARK of Wyoming. I so understood from the statement of the Senator from Massachusetts.

Mr. LODGE. There is no question at all about it.

Mr. CLARK of Wyoming. It seems to me that presents the matter in a somewhat different aspect.

Mr. McCUMBER. I understood they were there, but not at the harbor and for the purpose of taking on citizens. I did understand, of course, that they were in the immediate vicinity.

Mr. LODGE. There were gunboats in the river Panuco and our battleships were in the harbor, and they were withdrawn. Of course if we had landed men and taken possession of Tampico for the protection of lives and property, they would have all been protected and saved. I have a sort of feeling, and I can not get over it, that it is a good thing for us to protect our own people and not leave the task to foreign nations.

Mr. FALL. Mr. President, I should like to ask the Senator a question, as a member of the Foreign Relations Committee, namely, whether that committee, or he as a member of it, has any information with reference to this quotation from Admiral Mayo, which the Senator from Texas did not read:

Admiral Mayo reported that Admiral Craddock, of the British cruiser *Hermione*, had dispatched Maj. Clark and a detachment of British Royal Marines 400 miles inland from Tampico to rescue 8 Americans at Orange Hill, and was expected back to-night. The *Hermione* sent 13 refugees aboard the *Des Moines* to-day.

My question is whether there is any information from an authentic source as to this dispatch from Admiral Mayo, which was also printed in the papers yesterday.

Mr. LODGE. So far as I am aware, if the question is addressed to me, no information in regard to these incidents has been furnished to the Foreign Relations Committee. The only information I had was in response to a personal inquiry I made of the Navy Department as to the withdrawal of the gunboats and the ships. I was told that they had been withdrawn for the reason I have already stated—that it was feared that their presence would excite the mob.

Mr. SMITH of Georgia. Mr. President, a few moments ago a ruling was made by the Chair, from which no appeal was taken, and I can not, of course, make an appeal at this time; but I wish to read and call attention again to paragraph 5 of Rule VII:

Every petition or memorial shall be signed by the petitioner or memorialist and have indorsed thereon a brief statement of its contents, and shall be presented and referred without debate. But no petition or memorial or other paper signed by citizens or subjects of a foreign power shall be received—

And so forth.

I read the rule again simply to ask that the question, so far as it may appear to be an acceptance of the ruling by the Senate as a final ruling on the subject, may be reserved, and to ask the President of the Senate to consider the matter, although it is not a question immediately before the Senate.

As I understand the rule, during the presentation of petitions and memorials a Senator has no right to the floor except to present and send to the desk the petition. He can not speak upon it except by unanimous consent. The petition itself will be referred without debate, with a memorandum upon it, unless unanimous consent is given. Otherwise any Senator could occupy the floor during the morning hour as long as he pleased upon any subject that he might at any time bring before the Senate; and the consequences to the morning hour would be destructive.

Mr. BRANDEGEE. Mr. President, I desire to ask the Senator a question. Does the Senator, then, think that when a Senator introduces a petition, if he wants to read it he has to get unanimous consent?

Mr. SMITH of Georgia. I do.

Mr. BRANDEGEE. I agree with the Senator.

Mr. SMITH of Georgia. I certainly do; or, if he wishes to talk upon it, he must have unanimous consent.

Mr. BRANDEGEE. Yes.

Mr. SMITH of Georgia. Under the rules, the presentation of petitions and memorials is limited to their mere presentation and to sending them to the Secretary's desk, when memoranda——

Mr. FALL. Mr. President, will the Senator yield to me?

Mr. SMITH of Georgia. No; I do not yield yet. When memoranda would be placed upon them and they would be referred to the appropriate committee, unless a different direction were given to them by unanimous consent. If a motion is made to refer them to a particular committee, that motion is acted upon, under the rule, without debate. The rule specifically declares that it shall be acted upon without debate. So there is nothing in the rules in connection with the presentation of petitions and memorials that gives an opportunity for the occupancy of the floor by a Senator to talk; and such talk is out of order, just as mine now is out of order.

Mr. BRANDEGEE. Does not the Senator think the fact that the rule provides that a brief summary of the substance of the petition shall be indorsed upon it confirms his construction of the rule?

Mr. SMITH of Georgia. Yes; I read that, and I think that is clearly the case. The memorandum of what the petition contains is to be put upon it to indicate what it is, because it can not be read.

The VICE PRESIDENT. The RECORD will show that the ruling of the Chair is not to be considered as a precedent. The Chair wishes to say, however, that he does not believe it to be within the power of the Senate to prevent a Senator from getting into the RECORD in some way anything he wants to get in.

Mr. LODGE. Mr. President, referring to the point of order, there is no question that the Senator from Georgia [Mr. SMITH] is entirely right as to the strict interpretation of the rule as it

stands. It is, however, a rule which has been utterly disregarded for many years. Under the head of "Petitions and memorials," letters of all kinds and telegrams of all sorts have been freely read from the desk, attacking everybody, everywhere, and with various observations attached to them. The Senate has fallen into the way of permitting that.

It seems to me it is rather sudden to apply a strict interpretation of the rule to the telegrams presented by the Senator from New Mexico; but, if it is to be done, it must be applied to everything. We can not have exceptional applications.

Mr. SMITH of Georgia. Mr. President, if the Senator will yield, I did not press the point of order, because I really did not wish to enforce it at this time; but we have all understood that the occupancy of the floor for the presentation of these petitions was by unanimous consent, and that any Senator could have cut it off at any time, although the practice is to let it go on. What I was seeking to avoid was a committal of the Senate to the proposition that under the rules this was being done as a matter of right, and not by consent.

Mr. STONE. Mr. President, whether the Chair or the Senator from Georgia [Mr. SMITH] is right in the construction which they respectively place upon the rule, it would, in any event, be a difficult thing to prevent a Senator reading telegrams such as these which have been read this morning in the hearing of the Senate. Mr. President, there is an expression—more than one, for that matter, but one particularly—in one of the telegrams submitted by the Senator from New Mexico—the one signed, or at least apparently sent, by J. B. Wood——

Mr. FALL. Mr. President, will the Senator yield for a moment? I did not understand just what the Senator said about its being "signed or apparently sent under the authority of" some one. I did not catch his expression.

Mr. STONE. That is substantially what I said.

Mr. FALL. "Sent under the authority of, or signed apparently"; is that what the Senator said?

Mr. STONE. What I man is that it is not signed by J. B. Wood, but is apparently sent by him.

Mr. FALL. Did the Senator ever receive a telegram with the signature of the sender attached to it?

Mr. STONE. Oh, Mr. President, I am not impeaching the fact that Wood sent this telegram.

Mr. FALL. Very well, Mr. President. I did not understand the Senator's position in that regard, and I wanted to understand it.

Mr. STONE. There is an expression in this telegram so offensive that I do not wonder that the Senator who offered it should be sensitive about the telegram itself.

The telegram says:

> There would have been but few refugees in Galveston Harbor to-day, except for the intervention and aid furnished by English gunboats, which, there is no doubt, is disappointing to our State Department.

The Senator from New Mexico reads here into the RECORD this dispatch, containing a charge so absurd, so wicked, so contemptible as to destroy the effect of its own influence, if any it could have. Here it is stated that the Secretary of State is disappointed because these Americans who have been brought to Galveston Harbor were not killed in Tampico or drowned in the waters of the Gulf. I am astonished that the Senator from New Mexico, or that any Senator, should ask to have read into the RECORD of Congress such a monstrous indictment as that here made against even the humanity of great public officials representing the United States. I can not conceive of anything that could be done here in the Senate that could be more objectionable or offensive.

It is difficult for me to understand just what is the matter with some Senators on the other side. There is to-day an effort being made, initiated and now being carried on by the representatives of friendly Governments, to bring about peace in Mexico, and they are proceeding with the hope that the war which has almost wrecked that country may be brought to an end, and that a stable government, constitutional in form, may be established, and that peace and order may be restored. Is it possible that there are Senators here who do not wish that result brought about, and who would like to put something in the way of accomplishing it?

Some Senators are now very sensitive—in fact, supersensitive—about protecting the lives of American citizens in Mexico. This seems to be a new-born zeal with some of them. I can well recall the time, not far distant in the past, when I myself stood on this floor and pleaded that some positive action should be taken by this Government to prevent the very kind of things about which these complaints are now being made; I then urged that some action should be taken more drastic than had been taken; and I was told then by some of these same Senators that the effort I was making, if agreed to by the Senate, would be a long step backward in the march of civilization. There has been some change since then in political conditions, however, and I can not reconcile the present attitude of Senators who were quiet 18 months, 2 years ago, 3 years ago, or who, if they did not seal their lips and if they were outspoken at all, spoke against any attempt to protect American citizens on the border or in the interior.

Mr. FALL. Will the Senator yield to me for a moment?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from New Mexico?

Mr. STONE. I do.

Mr. FALL. I want to say to the Senator from Missouri, for whom I have a great deal of respect, and I will say a little more later on a question of privilege, that this reference in the dispatch to the Secretary of State and what he might want I overlooked entirely. I will say to the Senator I did not know, as I said to the Senator from Missouri, that the Secretary of State was mentioned in the telegram.

Mr. STONE. The State Department was mentioned.

Mr. FALL. Or the department. So far as I am concerned, I would ask that that portion of the telegram be stricken out, or that the entire telegram be stricken from the files and expunged. I have no desire in the world to reflect in this way upon the Secretary of State. I will make a further statement presently, but I wanted to make that statement at this time.

Mr. STONE. Very well. Mr. President, I think the entire telegram ought to be withdrawn. It ought not to be printed in the RECORD.

Mr. FALL. I am perfectly willing to withdraw from the RECORD the portion of the telegram which was read by the Senator.

Mr. STONE. Mr. President, without making the motion——

Mr. FALL. I will make the motion if the Senator will allow me.

Mr. STONE. I was going to remark, without making a formal motion, I will ask the consent of the Senate that the entire telegram be withheld from the RECORD.

Mr. FALL. I agree to that, for I said to the Senator I would make the motion.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the telegram is withdrawn from the RECORD.

Mr. STONE. Mr. President, that being done I do not care to longer occupy the attention of the Senate.

Mr. FALL. I rise to a question of privilege, if the Senator yields the floor. Has the Senator yielded the floor?

Mr. STONE. I do not wish to interfere with the Senator's question of privilege.

Mr. FALL. I understood the Senator to say that he would not longer hold the floor.

Mr. STONE. I do not. I yield to the Senator.

Mr. FALL. Mr. President, I have done in this case exactly what I would do in any other case. If I can not myself be responsible for the contents of a telegram or feel that I can assume the responsibility, I do not care to offer it. I do not make my attacks in that way, nor do I take a position outside the Senate that I will not take in it upon public questions. I believe that American citizens should be protected by the American flag and American forces. To me it is not singular that Senators should now be somewhat influenced by repeated outrages of several years duration and should finally voice their sentiments to some extent. Of course the Senator does not apply his remarks to me, because he knows that in season and out I have been expressing my opinion upon Mexico, and expressing it openly in the Senate, as it would do more good if expressed here than privately, or possibly might reach the public more easily. I have not been at all backward in expressing it, and the same sentiments which I express privately are expressed here.

I do not, however, think it strange that some Senators have finally become awakened to the proposition that Americans should be protected in Mexico; that the flag means something to them; that they should be protected by their own forces; that they should not be compelled to rely upon the Germans or the British for protection.

It does not seem to me very singular that the Senator should now express his opinion in view of his own statement that he has long, long entertained that opinion. I do not think I have heard him express it here since this administration came into power until the present, but I know that he entertained it.

Mr. President, as I said, I not only agreed that this telegram should be expunged from the RECORD, but would have made the motion. While I know of Mr. Wood very well through a Representative from Texas and other parties he undoubtedly,

in the heat of his anger at what he considered to be the manner in which he has been treated, wrote things that he himself would not want to appear in the RECORD. I was glad to have my attention called to it and to withdraw it, because I take the responsibility for what I intentionally have printed in the RECORD and, as I said before, I have never hesitated to express of either administration, in season or out, in public my true sentiments concerning their actions about Mexico.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the school committee of the town of Stamford, Conn., praying for the enactment of legislation to retire on annuities superannuated Federal employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented petitions of sundry citizens of Imlay City, Mich.; Ashland, Ky.; Wamego, Kans.; Clinton, Iowa; Westfield, N. Y.; and Fort Wayne, Ind., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

Mr. BURTON presented memorials of sundry citizens of the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of the State of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the board of directors of the Cincinnati Chamber of Commerce, remonstrating against the extension of the present Parcel Post System without specific authority of Congress and under the supervision of the Interstate Commerce Commission, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Chicago, Ill., and of Local Union No. 283, International Molders' Union, of Hamilton, Ohio, praying for a peaceful settlement by mediation of the Mexican situation, which were referred to the Committee on Foreign Relations.

Mr. SHIVELY presented memorials of sundry citizens of Lawrenceburg and Terre Haute, in the State of Indiana, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Fulton and Pulaski Counties, in the State of Indiana, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. LODGE presented memorials of sundry citizens of Boston and Lowell, in the State of Massachusetts, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Fitchburg, South Lancaster, Somerville, Sheffield, Gloucester, Melrose, and Petersham, all in the State of Massachusetts, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a memorial of the Massachusetts Real Estate Exchange, remonstrating against the repeal of the exemption clause of the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

He also presented a petition of the City Council of Cambridge, Mass., praying for the enactment of legislation to provide pensions for civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the directors of the port of Boston, Mass., praying for the refunding of tolls collected from American coastwise vessels passing through the Panama Canal in the event of the repeal of the exemption clause of the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

Mr. ROOT presented sundry memorials of citizens of the State of New York, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of the State of New York, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. DILLINGHAM presented a petition of the Woman's Christian Temperance Union of Orleans, Vt., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of the congregation of the First Methodist Church of Rutland, Vt., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented memorials of sundry citizens of the State of Michigan, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. POINDEXTER presented a memorial of the Central Labor Council of Seattle, Wash., remonstrating against war with other nations, which was referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. CLARK of Wyoming, from the Committee on Public Lands, to which was referred the bill (S. 3457) authorizing the issuance of a patent to James Deegan for lots 15 and 16, in block 10, in the town site of Frazer, Mont., reported it without amendment and submitted a report (No. 458) thereon.

Mr. BRYAN, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 14684) for the relief of the Commissioner of Internal Revenue (Rept. No. 459); and

A bill (H. R. 1138) for the relief of Helen Wakefield (Rept. No. 460).

Mr. CRAWFORD, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 771) for the relief of George R. Campbell, Milton B. Germond, and Walter D. Long (Rept. No. 463);

A bill (H. R. 2536) for the relief of John Streckfus (Rept. No. 462); and

A bill (H. R. 7484) for the relief of Stanley J. Morrow (Rept. No. 464).

Mr. CRAWFORD, from the Committee on Claims, to which was referred the bill (S. 4930) for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth, reported it with amendments and submitted a report (No. 461) thereon.

DIPLOMATIC HISTORY OF THE PANAMA CANAL (S. DOC. NO. 474).

Mr. HITCHCOCK. From the Committee on Foreign Relations I submit a report (No. 465), accompanied by a resolution, and ask unanimous consent for its present consideration.

The VICE PRESIDENT. The Secretary will read the report.

The Secretary read as follows:

Mr. HITCHCOCK, from the Committee on Foreign Relations, submitted the following report:

The Committee on Foreign Relations, to which was referred the message from the President of the United States transmitting a report of the Secretary of State in relation to the negotiation and application of certain treaties on the subject of an interoceanic canal, in response to a resolution of the Senate submitted by Mr. BRANDEGEE on April 15, 1914 (S. Res. 339), having considered the same, report the said message, with accompanying correspondence and papers, to the Senate with the recommendation that the message, correspondence, and papers be printed; and that, in addition thereto, the message of the President of the United States dated November 16, 1903, with accompanying papers, included in House Document No. 8, parts 1 and 2, Fifty-eighth Congress, first session; the message of the President of the United States dated December 18, 1903, with accompanying papers, included in Senate Document No. 51, Fifty-eighth Congress, second session; the message of the President of the United States dated January 18, 1904, with accompanying papers, included in Senate Document No. 95, Fifty-eighth Congress, second session; and certain letters from Jose Vincente Concha, the Colombian minister, and other papers included in House Document No. 611, Fifty-seventh Congress, first session, be printed with the message aforesaid.

In accordance with the foregoing, the committee recommends the adoption of the following resolution (S. Res. 345):

"Resolved, That there be printed as a Senate document the message from the President of the United States, dated April 24, 1914, transmitting a report of the Secretary of State in relation to the negotiation and application of certain treaties on the subject of an interoceanic canal; the message of the President of the United States, dated November 18, 1903, with accompanying papers, included in House Document No. 8, parts 1 and 2, Fifty-eighth Congress, first session; the message of the President of the United States, dated December 18, 1903, with accompanying papers, included in Senate Document No. 51, Fifty-eighth Congress, second session; and certain letters from Jose Vicente Concha, the Colombian minister, and other papers included in House Document No. 611, Fifty-seventh Congress, first session, together with correspondence relating to said protocol, and that 1,000 additional copies be printed for the use of the Senate."

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. CLARK of Wyoming. Mr. President, I wish to ask a question of the Senator from Nebraska. Does this vary in any degree the documents or the instruments or the information

asked for in the original resolution? I should like to know how the conclusions of the committee differ from the resolution introduced by the Senator from Connecticut [Mr. BRANDEGEE], who is not now in his seat.

Mr. HITCHCOCK. I will say that the committee in considering the resolution and the correspondence which was received in response to the resolution decided that the correspondence should be printed, and also that certain other documents not sent by the State Department at that time, but already in print, should be attached to the report, so as to make a complete diplomatic history of the Panama Canal.

Mr. CLARK of Wyoming. Then there is nothing that was called for in the original resolution that was introduced that is not, in fact, covered by the report of the committee?

Mr. HITCHCOCK. There is not.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

Mr. HITCHCOCK. I ask for the present consideration of a supplemental resolution from the Committee on Foreign Relations.

The VICE PRESIDENT. The Secretary will read the resolution.

The resolution (S. Res. 346) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the President is hereby requested, if not incompatible with the public interest, to cause to be transmitted to the Senate all papers, correspondence, messages, and dispatches in the Department of State, not heretofore communicated to Congress, having relation to certain tripartite agreements or conventions, concluded between the United States and the Republic of Panama, the United States and the Republic of Colombia, and the Republic of Colombia and the Republic of Panama, all dated the 9th day of January, 1909, together with all correspondence relating to the Hay-Concha protocol not included in House document 611, Fifty-seventh Congress, first session.

VOLUNTEER FORCES OF THE UNITED STATES.

Mr. POMERENE. There has been quite a demand for copies of the act passed recently for the raising of volunteer forces of the United States. Under the law only 1,000 extra copies can be printed, and there is demand for a great many more copies. I send to the desk an order and ask unanimous consent for its present consideration.

The order was read, considered by unanimous consent, and agreed to, as follows:

Ordered, That there be printed 10,000 copies of the slip law of H. R. 7138, entitled "An act to provide for raising the volunteer forces of the United States in time of actual or threatened war."

CAPT. P. H. UBERROTH AND GUNNER CARL JOHANNSON.

Mr. SMITH of Arizona. I am directed by the Committee on Foreign Relations, to which was referred the bill (S. 1304) authorizing the Department of State to deliver to Capt. P. H. Uberroth, United States Revenue-Cutter Service, and Gunner Carl Johannson, United States Revenue-Cutter Service, watches tendered to them by the Canadian Government, to report it favorably without amendment, and I submit a report (No. 457) thereon. I ask for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That Capt. P. H. Uberroth, United States Revenue-Cutter Service, and Gunner Carl Johannson, United States Revenue-Cutter Service, be, and they are hereby, authorized to accept watches tendered to them by the Canadian Government, through the Department of State of the United States, in recognition of their services in saving the lives of the crew of the wrecked British schooner *S. A. Fownes* on December 16, 1910.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HUGHES:

A bill (S. 5424) amending paragraph 81 of the act creating a public utilities commission; to the Committee on the District of Columbia.

By Mr. CATRON:

A bill (S. 5425) to pay the claim of the late Harrison S. Weeks; to the Committee on Claims.

By Mr. CRAWFORD:

A bill (S. 5426) for the relief of the heirs of Dolphise Fortin; to the Committee on Claims.

A bill (S. 5427) granting an increase of pension to Levi W. Eiseley (with accompanying papers); to the Committee on Pensions.

By Mr. WORKS:

A bill (S. 5428) granting an increase of pension to Ida M. Davis (with accompanying papers); to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 5429) for the purchase of two bronze copies of the original marble portrait statue of George Washington; to the Committee on the Library.

A bill (S. 5430) granting a pension to Thomas Allen; to the Committee on Pensions.

By Mr. GORE:

A bill (S. 5431) for the relief of E. M. Hundley; to the Committee on Claims.

A bill (S. 5432) granting an increase of pension to John T. Taylor (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH:

A bill (S. 5433) to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line, in the State of Montana, and for other purposes," approved May 11, 1910 (with accompanying papers); and

A bill (S. 5434) to provide for the leasing of oil and gas lands withdrawn from entry; to the Committee on Public Lands.

By Mr. WALSH (for Mr. MYERS):

A bill (S. 5435) for the relief of Henry J. Davis; to the Committee on Military Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JOHNSON submitted an amendment proposing to increase the appropriation for enforcement of the plant-quarantine act from $50,000 to $150,000, intended to be proposed by him to the Agricultural appropriation bill, which was ordered to lie on the table and be printed.

Mr. SAULSBURY submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. LODGE submitted two amendments intended to be proposed by him to the river and harbor appropriation bill, which were referred to the Committee on Commerce and ordered to be printed.

Mr. POMERENE submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

REGULATION OF INTERSTATE COMMERCE (S. DOC. NO. 475).

On motion of Mr. NEWLANDS, it was

Ordered, That 2,000 copies of the act to regulate commerce, as amended, also district court jurisdiction act, compulsory testimony act, immunity of witnesses act, Elkins Act, expediting act, Government-aided railroad and telegraph act, Lake Erie and Ohio River ship canal act, parcel-post act as revised to January 1, 1914, be printed for the use of the Senate document room.

CAPT. TEMPLIN M. POTTS.

Mr. TILLMAN. I ask unanimous consent for the publication in the RECORD of a communication received from the Navy Department in relation to Capt. Templin Morris Potts.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

NAVY DEPARTMENT,
BUREAU OF NAVIGATION,
Washington, D. C., April 28, 1914.

Hon. B. R. TILLMAN,
Chairman Committee on Naval Affairs,
Senate Chamber, Washington, D. C.

MY DEAR SENATOR: The CONGRESSIONAL RECORD of April 7, 1914, publishes in the second column on page 6321 a supplementary statement of Capt. Potts, commenting on certain statements made by me before the Naval Committee and published in the same issue of the RECORD. This statement of Capt. Potts was not seen by me until it appeared in the RECORD.

It will be noted that the text of my statement does not indicate the quotation of any particular Revised Statute, but that sections 1492–1510, Revised Statutes, provide that "all officers of the Navy, to be eligible for promotion, shall pass such professional, moral, mental, and physical examination as the Secretary of the Navy shall from time to time prescribe."

The quotation is a Navy regulation covered by the statutes mentioned, and has appeared in the various editions of the Bluebook for 21 years.

It was a surprise to me to learn that anyone presumably acquainted with the Navy regulations and with the laws governing the Navy would contend that this regulation, which has stood unquestioned for so many years, is illegal.

Inasmuch, however, as Capt. Potts has taken issue with the interpretation of the law as given in my statement, I deemed it advisable for your committee to have the official opinion of the Judge Advocate General on the subject, which, as will be noted, substantiates all I have said in the matter.

It is requested that this opinion, hereto attached, together with this letter, be published in the RECORD.

Very sincerely, yours,

VICTOR BLUE.

(Inclosure.)

MEMORANDUM FOR ADMIRAL BLUE.

DEPARTMENT OF THE NAVY,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
Washington, April 22, 1914.

Referring to the opinion submitted yesterday in regard to the Potts affair, in order to cover the entire case a rather lengthy opinion seemed necessary. The question is, however, a very simple one. Leaving aside the fact that section 1547, Revised Statutes, clearly legalizes article R–3331, Navy Regulations, independent of the statute which you referred to in your statement, and considering merely the statement made by you, namely, that "sections 1493 to 1510, Revised Statutes, provide that candidates for promotion shall pass such examination as the Secretary of the Navy may, from time to time, prescribe," the question in a nutshell reduces itself to this: Do these sections, or any of them, provide or authorize the Secretary of the Navy to prescribe qualifications for examination?

There is no question that full authority for the statement that they do so provide may be based on section 1502, Revised Statutes, which requires as a condition to promotion that a board of examiners recommend and the President approve of that recommendation.

This same section authorizes the President to disapprove the board's recommendation, and as long as he does disapprove the candidate can not be promoted; and this disapproval is entirely in the discretion of the President. He may disapprove for any reason which to him appears adequate. He can disapprove because, from a personal examination of the record, he is not convinced that the officer is qualified, or he could have his private secretary review the record and disapprove on the recommendation of said secretary, or he could require the Secretary of the Navy to review the record and, if he so desires, base his disapproval upon the recommendation of the Secretary of the Navy.

This being the case, it is competent for him to state that under certain conditions he will not approve the recommendation of the board. This he has done in article R–3331, Navy Regulations, which states, in effect, that unless the candidate passes such examination as the Secretary may from time to time prescribe he, the President, will not approve whatever recommendation the board may submit.

The same line of reasoning may be applied to the Secretary in regard to his letter, namely, that the conditions under which he will recommend to the President a favorable action on the recommendation of the board is that the officer to be promoted has sufficient sea service to insure beyond a doubt that he will perform his duties efficiently. Please note that this may be regarded merely as a condition to his favorable recommendation, and the regulation, as above noted, may be regarded merely as a condition to the President's favorable action on the recommendation of the board.

The above line of reasoning is based entirely on the President's absolute power of disapproval for any reason which he sees fit. It is unnecessary to consider the question which Capt. Potts endeavors to bring forward as to whether or not the Secretary of the Navy has a right to dictate to the board what their recommendation shall be or on what qualifications their recommendation shall be based. Their action is purely a recommendation. Granting, for sake of argument, that the Secretary has not the authority to dictate to them the conditions under which they will make a favorable recommendation, no one would contend that he has not a perfect right to inform the board of the conditions under which he personally will make a favorable recommendation to the President; and in view of the provisions of section 1502, Revised Statutes, no one could for a moment contend that the President could not legally state to the board that he would not approve of their recommendation unless it met the approval of the Secretary of the Navy.

This is simply another view of the same general idea that was covered in the longer opinion which I handed you yesterday.

RIDLEY MCLEAN,
Judge Advocate General.

—

NAVY DEPARTMENT, BUREAU OF NAVIGATION,
Washington, D. C., April 17, 1914.

To: The Judge Advocate General.
Subject: Re Capt. Templin M. Potts, retired.
Reference: CONGRESSIONAL RECORD of April 7, 1914, page 6321, second column. Statement of Capt. Templin M. Potts with reference to statement of Rear Admiral Victor Blue, Chief of the Bureau of Navigation, before the Senate Naval Committee, Wednesday, March 11, 1914.

1. It is noted in the above reference that Capt. Templin M. Potts states as follows:

"I beg leave to call the attention of the committee to the fact that no such statute as quoted above exists, and, further, that under the Revised Statutes no authority whatever is vested in the Secretary of the Navy to change or make requirements for the qualification of officers for promotion."

Also: "This statute is perfectly clear that the establishment of the professional fitness of officers is vested in a board of naval experts appointed by the President. The letter of the Secretary of the Navy to the president of my examining board fixing requirements as to sufficient sea service is, in my opinion, not sanctioned by law, but contravenes it."

2. The opinion of the Judge Advocate General is requested as to the interpretation of the statutes governing the matter at issue in connection with the statements of Capt. Potts as quoted above.

VICTOR BLUE.

—

DEPARTMENT OF THE NAVY,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
Washington, April 21, 1914.

To: The Bureau of Navigation.
Subject: The Bureau of Navigation requests the opinion of the Judge Advocate General as to the interpretation of the statutes governing the manner of the promotion of naval officers in connection with certain statements made by Capt. Templin M. Potts, United States Navy, retired, before the Senate Naval Committee.
Reference: CONGRESSIONAL RECORD of April 7, 1914, page 6319, second column.

1. The CONGRESSIONAL RECORD of April 7, 1914, page 6319, column 2, under "Statement of Rear Admiral Blue," contains the statement referred to by Capt. Potts, as follows:

"Sections 1492–1510, Revised Statutes, provide that: 'All officers of the Navy, to be eligible for promotion, shall pass such professional, moral, mental, and physical examination as the Secretary of the Navy shall from time to time prescribe.'

"Under these statutes the Secretary acted, and if by so doing he changed the requirements for qualification of officers which had existed for 40 years—as claimed by Capt. Potts—there is hardly anyone who would seriously contend that it was not for the best interests of the Navy, or that the Secretary was not fulfilling a plain duty placed upon him by Congress."

2. To this statement Capt. Potts, before the Senate Naval Committee, replied (CONGRESSIONAL RECORD, page 6321, column 2):

"I beg leave to call the attention of the committee to the fact that no such statute as quoted above exists, and, further, that under the Revised Statutes no authority whatever is vested in the Secretary of the Navy to change or make requirements for the qualification of officers for promotion."

Capt. Potts then quotes section 1496, Revised Statutes, as follows:

"No line officer below the grade of commodore, and no officer not of the line shall be promoted to a higher grade on the active list of the Navy until his mental, moral, and professional fitness to perform all his duties at sea have been established to the satisfaction of a board of examining officers appointed by the President."

And states:

"This statute is perfectly clear, that the establishment of the professional fitness of officers is vested in the board of naval experts appointed by the President. The letter of the Secretary to the president of my examining board fixing requirements as to sufficient sea service is, in my opinion, not sanctioned by law, but contravenes it."

3. My opinion is requested "as to the interpretation of the statutes governing the matter at issue," in connection with the statement of Capt. Potts, as quoted above.

4. From a somewhat restricted point of view, the "matter at issue" in Capt. Potts's statements may be divided into these questions:

1. Whether or not Rear Admiral Blue correctly quoted the Revised Statutes.

2. Whether or not under the Revised Statutes any authority whatever is vested in the Secretary of the Navy to change or make requirements for the qualification of officers for promotion, or whether this is left by statute entirely in the discretion of the board of examiners.

3. Whether or not the letter of the Secretary of the Navy to the president of the examining board, dated March 24, 1913, "fixing requirements as to sea service," did contravene law or was even sanctioned by law. Broadly stated, however, the "matter at issue in connection with the statements of Capt. Potts" is:

4. The legality of the action of the President of the United States in withholding his approval of the recommendation of the naval examining board in Capt. Potts's case on account of the fact that, in the President's opinion, Capt. Potts's 10 months' sea service in his grade was regarded as insufficient to establish his professional qualifications to perform efficiently all of the duties of the grade of rear admiral at sea.

1. Did Rear Admiral Blue correctly quote the Revised Statutes?

(a) Sections 1493–1510, Revised Statutes (17 sections in all), embrace the principal sections of the Revised Statutes which relate to promotion or advancement of officers of the Navy. Rear Admiral Blue's statement was:

"Sections 1493–1510, Revised Statutes, provide that: 'All officers of the Navy to be eligible for promotion shall pass such professional, moral, mental, and physical examination as the Secretary of the Navy shall from time to time prescribe.'"

(b) Although the statement as to the provisions of the Revised Statutes does appear in the RECORD in quotation marks, the fact that Rear Admiral Blue includes in the very sentence a reference to 17 sections of the Revised Statutes renders it manifest that no attempt was made to quote them. It was merely a statement that under the provisions of these statutes the Secretary was authorized from time to time to prescribe the qualifications of officers coming up for promotion. The statement appearing in quotation in the CONGRESSIONAL RECORD is, in fact, an approximate quotation of article R–3331 of the Navy Regulations, 1913, which in parentheses refers to Revised Statutes 1493–1510 as the fundamental basis of the regulation which requires an examination preliminary to promotion. Said regulation is as follows:

"All officers of the Navy to be eligible for promotion shall pass such professional, moral, mental, and physical examination as the Secretary of the Navy may from time to time prescribe." (Secs. 1493–1510, R. S.)

(c) The statement of Rear Admiral Blue does not quote Revised Statutes 1492–1510, nor any one of them, nor on its face does it purport to do so. Therefore the question resolves itself into a consideration as to whether or not the sections referred to, which cover the subject of promotions in the Navy, authorize or permit the Secretary of the Navy from time to time to prescribe the standards of qualifications for officers who are candidates for promotion. This brings us directly to a consideration of the second point at issue enumerated above, viz:

2. Is any authority whatever vested by the Revised Statutes in the Secretary of the Navy to change or to make requirements for the qualification of officers for promotion, or is this left by the Revised Statutes entirely at the discretion of the board of examiners?

(a) Sections 1493, 1496, and 1502 prescribe the method of determining the qualifications of officers for promotion; section 1493 provides for the physical examination; section 1496 prescribes the method of determining whether or not an officer possesses the necessary mental, moral, and professional qualifications, but is silent as to who shall determine the standard or the subjects in which he shall be examined; and section 1502 provides for the submission to the President of all the documentary evidence before the board, together with the record of its proceedings, and empowers the President to approve or disapprove the recommendation of the board at his discretion.

(b) To be complete the board must recommend and the President either approve or disapprove. In the case of approval by the President, the officer is promoted; in case of disapproval he is in the same status as if he had never been examined. Until the board has recommended an officer for promotion and the President approved its recommendation no officer can legally be promoted. The exercise of the duty imposed upon the President by section 1502, Revised Statutes, to either approve or disapprove the recommendation of the board of examiners carries with it not only the authority, but imposes on him the duty of assuring himself that the candidate possesses the qualifications which he, the President, considers essential. If, therefore, the statutes authorize the President at his discretion to disapprove the recommendations of the board, and if, in face of such disapproval, the officer can not be promoted it follows as the only reasonable construction of the statute that the President is clothed with complete authority to indicate to the board the qualifications which he, the President, considers essential. Being empowered to disapprove, and thus at his discretion indefinitely to suspend an officer's promotion for reasons which to him appear valid, it seems frivolous to contend that he has not the power to notify the board that if an officer possesses certain qualifications he will exercise his authority of approval, but if he does not possess such

qualifications he will exercise his authority to disapprove or suspend action at his discretion. This is exactly what is provided for in Article R–3331, Navy Regulations, which states, in effect, that in accordance with authority vested by sections 1493–1510, Revised Statutes, candidates for promotion will pass such examinations as the Secretary of the Navy may from time to time prescribe. The actions of the Secretary of the Navy in his own department, pursuant to that regulation, are, in legal effect, the actions of the President. In other words, the regulations issued by approval of the President and pursuant to statute merely state the conditions under which the President will approve the recommendation of the board.

(c) The extent to which the power of the President, referred to above, may be exercised is shown by the opinion of the Attorney General, dated June 23, 1913, in the case of Maj. Ray, of the Army. By reason of seniority, that officer had become eligible for promotion to fill a vacancy in the next higher grade, and had been examined for promotion thereto, and recommended for promotion by the board. The President, however, was of opinion that his record was such as not to justify his promotion, and, as stated by the Attorney General in his opinion, he could not be eliminated either through the agency of a retiring board or a general court-martial. In that case it was held, quoting from the syllabus:

"The act of October 1, 1890 (26 Stat., 562), regulating the promotion of certain officers of the Army, does not make it obligatory upon the President to promote to a vacancy existing in the grade of lieutenant colonel the senior officer in the next lower grade, if, in his opinion, the record of the officer has been such as to indicate that he is disqualified for promotion."

(d) Pursuant to this Attorney General's opinion an officer below him on the list of majors was nominated for promotion to fill the vacancy to which Maj. Ray was eligible by reason of seniority.

(e) But in addition to the above, and wholly aside from the authority necessarily vested in the President by reason of the provisions of section 1502, Revised Statutes, to prescribe the qualifications for promotion, the question of the legality of that action may be determined by the Navy Regulations, which are authorized by the very Revised Statutes which cover the question of promotion. In the Navy Regulations of 1841 the qualifications for promotion were specified in detail, among them certain sea-service requirements. These regulations were legalized by the act of Congress of 1862, said act also legalizing any alterations to be made in same, with the approval of the President.

(f) The Navy Regulations of 1870, printed under the authority of the act of 1862, prescribed that examining boards should "proceed to examine him on all required qualifications," and then prescribed in detail what those qualifications should be. It will be noted that in this edition of the regulations it was not provided that officers should pass such examinations as might "from time to time be prescribed by the Secretary of the Navy," but used the expression "on all required qualifications," and that among the required qualifications there were sea-service requirements.

(g) In 1874, when the Revised Statutes were approved, the regulations of 1870 were again legalized, together with changes by section 1547 of the Revised Statutes.

(h) Pursuant to section 1547 of the Revised Statutes, the Regulations of 1876 were printed. In that edition the qualifications for promotion were not prescribed in detail, as had previously been the practice, but, instead, there was substituted the general regulation containing the expression, "to be eligible for promotion all officers shall pass such physical, mental, moral, and professional examinations as may, from time to time, be prescribed by the Secretary of the Navy."

(i) Since the edition of the Regulations of 1876 to date all subsequent editions have contained that expression, the wording of article R–3331 of the current edition of the regulations having stood without change since October 16, 1893.

(j) It will thus be seen that, in addition to the authority necessarily vested in the President, or in the Secretary of the Navy acting for him, by reason of the provisions of sections 1496 and 1502 of the Revised Statutes, to prescribe the standard of qualifications of officers for promotion, the practice of the Secretary of the Navy, acting for the President, in prescribing those qualifications has been on two occasions confirmed by legislative authority.

3. Was the letter of the Secretary of the Navy to the president of the examining board "fixing requirements as to sea service" in contravention of law, or even sanctioned by law?

It will be noted that the letter of the Secretary of the Navy to the president of the examining board did not fix any sea-service requirement, but simply stated for the information of the examining board that the Secretary required that officers coming up for promotion shall have "sufficient sea service." Conceding for purposes of argument, however, that the Secretary really did fix a sea-service requirement, it would appear from the above that such action on his part was legal. It has been pointed out under question No. 2 above that the President, independent of article R–3331, Navy Regulations, 1913, has the power to prescribe what qualifications shall be possessed by officers before he will approve the recommendation of an examining board that they be promoted; that it is perfectly legal for him to inform examining boards that he will not approve recommendations to promote an officer unless such officer passes the requirements prescribed by the Secretary of the Navy; and that the action of the Secretary of the Navy in conformity with the authority vested in him by the President and the regulations, is, in legal effect, the action of the President himself. Furthermore, we have seen that from the earliest date sea-service qualifications have been part of the requirements for promotion, and that these requirements were sanctioned by legislative authority on two occasions. Later this, along with the other multitudinous detailed qualifications, was, by authority of section 1547 of the Revised Statutes, merged into the phrase "such examinations as the Secretary of the Navy may from time to time prescribe." The sea-service requirement is therefore as much a provision of law now as it was in 1862, with the exception that to-day, instead of a specific number of years' sea service being necessary, the amount thereof is a matter within the discretion of the Secretary of the Navy, acting for the President.

4. Finally, was the action of the President of the United States in withholding his approval of the recommendation of the naval examining board in Capt. Potts's case legal?

We have seen under question No. 2 above that the President, in conformity with the power vested in him by section 1502, Revised Statutes, was authorized to approve or disapprove the finding and recommendation of the board, and that the exercise of the power under that section is a matter within his discretion. In accordance with the opinion of the Attorney General in the case of Maj. Ray, the President was empowered to fill the vacancy existing in the grade of rear admiral, to which Capt. Potts was eligible, by promoting thereto another officer, if, in the President's opinion, Capt. Potts was not qualified for promotion thereto. This action could have been taken by the President as often as a vacancy in the grade of rear admiral occurred and Capt. Potts's disqualification continued to exist. It will thus be seen that such action would have the effect of indefinitely postponing the promotion of Capt. Potts, and if that power is vested in the President, it certainly can not be contended that the lesser power of simply withholding action (neither approving nor disapproving) until the disqualification be removed is not also vested in him. Furthermore, as stated above, the power vested in the President by section 1502, Revised Statutes, is one which is purely within his discretion, and, being the exercise of a discretionary power, I know of no authority which could coerce the President in exercising the same. It is apparent, therefore, that the President's action in withholding his approval or disapproval of the recommendation of the board in Capt. Potts's case for such time as he deemed proper was entirely legal.

SUMMARY.

Summarizing the above, the following would appear to be the result:

1. Rear Admiral Blue made no attempt to quote the Revised Statutes.

2. The Revised Statutes, sections 1493, 1496, 1502, et al., prescribe the method of determining whether an officer, eligible for promotion, possesses the necessary qualifications.

Section 1493 provides for the physical examination which must be approved by the President before there can be a promotion.

Section 1496 provides for the examining board to determine the mental, moral, and professional qualifications, but is silent as to who shall fix the standards thereof.

By reason of the provisions of section 1502, the opinion of this board is nothing more nor less than an advisory one for the information of the President, and no promotion can take place until the recommendation of the board has received his approval.

3. By virtue of section 1502 the President is authorized to disapprove the recommendation of the board at his discretion. Under this statute he possesses not only the authority, but it is his duty to disapprove the recommendation if the officer fails to possess any qualification which the President deems necessary. It clearly follows that the President is clothed by the statute with full authority to stipulate the conditions or the qualifications which are by him considered necessary to his approval. It follows that candidates for promotion may, without any question whatever, be legally required to pass such examination as the President may, from time to time, prescribe, for the very simple reason that if they do not come up to such qualifications as the President deems necessary he is clothed with statutory authority not to promote them.

4. The President has, by regulation, delegated to the Secretary of the Navy a part of his power of prescribing what qualifications shall be possessed before he will approve a board's recommendation to promote, and the Secretary's acts, pursuant thereto, are, in legal effect, the acts of the President himself. Therefore the Secretary of the Navy has full statutory authority from time to time to prescribe qualifications for promotion.

5. These regulations of the President have, in one form or another, existed since 1841. The principle that the President or the Secretary of the Navy has the power to prescribe qualifications for promotion, contained in said regulations, has been twice approved by statute. The substantial wording of the present regulation (Art. R–3331) has been in effect since 1876, and all prior editions of the regulations stipulated in detail what requirements were essential for promotion, among them sea-service requirements.

6. The President, under the authority of the Ray decision, could have promoted an officer below Capt. Potts to the vacancy in the grade of rear admiral, to which he was eligible by reason of his seniority, if, in the President's opinion, Capt. Potts was not qualified, and could have repeated that action as often as a vacancy occurred in the grade of rear admiral and Capt. Potts's disqualification continued to exist.

7. The broad question is not whether the Secretary of the Navy has the power, under the law, to prescribe what qualifications shall be possessed by officers before they shall be eligible for promotion. The real question is the power of the President to prescribe a regulation or rule that he will not approve an examining board's recommendation to promote a candidate unless he measures up to certain standards prescribed by the Secretary of the Navy.

8. There is, under section 1502, no question as to the absolute power of the President to disapprove the recommendation of the board for any reason which he sees fit. There is therefore no question that he had statutory authority to disapprove of the promotion of Capt. Potts until that officer had sea service of the nature and amount considered necessary by the President. There is no question of his authority to form his opinion based on the recommendation of the Secretary of the Navy or on any other evidence available. It follows, therefore, as entirely legal for the President to prescribe, as he has done in the regulations, that he will not approve of the promotion of any candidate unless he possesses the qualifications prescribed from time to time by the Secretary of the Navy. Such regulation, therefore, has full authority of statute, and is supported independently by sections 1493 to 1510, Revised Statutes.

RIDLEY MCLEAN,
Judge Advocate General.

THE INTERSTATE COMMERCE COMMISSION.

Mr. LA FOLLETTE. Mr. President, I wish to change a notice which I had entered upon the calendar on yesterday to address the Senate on Thursday, April 30, upon Senate bill 5127, which is now upon the table. I find it impossible within the time specified to classify and tabulate the vast amount of material that I have and which I wish to present to the Senate, and therefore I give notice that on Tuesday, May 5, following the routine morning business, I shall address the Senate upon this bill.

AGRICULTURAL EXTENSION WORK.

Mr. JONES. Mr. President, I note that day before yesterday the conference report on the agricultural extension work bill was presented and was adopted without discussion. I have been very much interested in that report and hoped to be able to be here when it was considered. I was necessarily absent from the city day before yesterday and yesterday, and regret very much that the report was adopted. I desired to be present, as I

said, when the report was considered, that I might present some reasons why I thought it should not be adopted if the Senate should recede from its amendment with reference to the distribution of the fund. I find from the report printed in the House proceedings that the Senate conferees did recede from that provision and accepted the provision as it came from the House.

I am not in a position to move to reconsider the vote by which the report was agreed to, because I was not here, and I did not have an opportunity to vote on it; but I am going to ask the unanimous consent of the Senate for a reconsideration of the report. I do this not for the purpose of delaying it unnecessarily, because I will take but very little time; but I should like to have an opportunity to present the reason why I think the report should not be adopted. I should like very much if the vote could be reconsidered, and I make that request.

Mr. BRANDEGEE. What was the report? I did not hear the Senator.

Mr. JONES. It is the report of the committee of conference on House bill 7951, the agricultural extension work.

The VICE PRESIDENT. There is a request for unanimous consent to reconsider the vote by which the conference report on the agricultural extension bill was adopted.

Mr. SMITH of Georgia. I object.

The VICE PRESIDENT. There is objection.

Mr. TOWNSEND. Mr. President, I myself was absent on committee work when the conference report was agreed to without a roll call. I had no notice that it was coming up at that time. I should like very much to have that matter before the Senate, so that the views of those who believe that that amendment ought not to have been rejected may be presented.

Mr. SMITH of Georgia. I will state to Senators that I wish the Senator from Idaho [Mr. BRADY] were here. We were in conference over this matter for a long time before we finally reached an agreement. The other House has receded on more matters than the Senate has receded on. The bill is now in the other House, and it is very important that the matter should be disposed of. The bill, if it becomes a law, goes into effect on the 1st of July. There are only 60 days left for the States to take steps to utilize this fund. I do not believe there is a possibility of passing a bill except in the shape in which the conference report brings it in. The conferees have been in conference for six weeks.

Mr. TOWNSEND. Mr. President, if the Senator from Georgia will permit me, I will say I know there is no disposition to delay the passage of the bill. I am positive that what I suggest would take but a little while, and yet I feel as though Senators who were not present, and perhaps ought not to be criticized for not being present, because they were at work on the business of the Senate, should at least have an opportunity to present their views on the matter, hoping that they might effect a change.

Mr. WARREN. May I ask the Senator from Georgia whether the bill has gone to the other House?

Mr. SMITH of Georgia. The bill is in the other House; it has been reported by the conferees on the part of the House and is ready to be acted on this morning. Possibly it has already been acted on.

Mr. WARREN. It would require a motion for the recall of the bill from the other House before we would have it in our power to act on it.

Mr. SMITH of Georgia. I want to let the Senate understand why, while I would consent ordinarily, I must decline to do so in this case. The Senator from Idaho [Mr. BRADY], I am sorry to say, is not here. We have wrestled with the bill in conference, we have been considering it for over six weeks, and two or three times we thought we would not be able to agree at all. A conference report was finally obtained. I think it will be useless to send this bill to conference again. If we are going to recede from this conference report, I think it means the death of the bill. That is the reason why I feel such hesitation about giving unanimous consent to bring the bill back from the House.

Mr. JONES. Mr. President, I know this bill has been in conference for some time, but I think the Senator from Georgia will remember that I spoke to him some little while ago as to what was being done, and the subject had not then, as a matter of fact, been taken up in conference. So I have been waiting. As I have said, I was necessarily away on Monday and Tuesday, not expecting the report would come up. I will say to the Senator from Georgia that I shall not delay the bill.

Mr. SMITH of Georgia. I mentioned to the Senator from Nebraska, and likewise to the Senator from Colorado, the change from the view they had presented, and mentioned to them that we had yielded.

Mr. JONES. Yes. I was very much interested in that proposition, and, as stated by the Senator from Michigan [Mr. TOWNSEND]——

Mr. SMITH of Georgia. That was not the proposition the Senator from Washington had charge of at all.

Mr. JONES. But it was the result of that proposition and was the controversy on the floor. It was a compromise made by the Senate on the proposition that I had presented, and I much prefer what the Senate did to what the House has done. I therefore had very much hope that we would at least get that much, and I did want an opportunty to present the reasons why I thought the Senate provision should be accepted.

Mr. SMOOT. Mr. President, I ask the Senator from Georgia if he will not give unanimous consent to the request. There are a number of Senators who desire to be heard, not that they want to speak upon the subject at any length, who assure me that they will take but a short time, who desired me to make a motion to recall the bill and ask for its reconsideration. I do not want to do that, and so I am going to ask the Senator from Georgia if he will not give unanimous consent, rather than that I shall make a motion, have it voted on here, and take the time necessary for that.

Mr. SMITH of Georgia. I merely feel that I ought not to give the unanimous consent.

Mr. SMOOT. If it were going to make a particle of difference, Mr. President, I should not ask the Senator from Georgia to do it; but he knows I was very deeply interested in the bill, and I had been with him through nearly the whole consideration of it.

Mr. SMITH of Georgia. I say to Senators frankly, that I think if this conference report is not agreed to, the bill is dead. I do not see any chance to get the conferees nearer together than they were brought together in making this report.

Mr. SMOOT. I will say to the Senator that I have not the least doubt in my mind that when the question is brought before the Senate, the Senate will agree to the conference report; but it does seem to me that what little Senators are asking in regard to the subject we ought to grant, and whatever they have to say, the Senators have stated that they will say in a very few moments. I therefore hope the Senator from Georgia will see his way clear to grant the unanimous consent.

Mr. SMITH of Georgia. Could we not bring it up merely on a motion and let it be done in that way? I do not want, of course, to exclude any Senator from voting. I do not wish to take such a responsibility, and I can not consent to the proposed arrangement.

Mr. SMOOT. Then, Mr. President, in order to bring the question to an issue, I move——

Mr. JONES. I want to suggest to the Senator from Utah that the bill having passed here and gone to the other House, it would require a motion to recall it, and that motion is not debatable.

Mr. SMOOT. I am perfectly aware of that rule.

Mr. JONES. There could be no discussion on that motion.

Mr. SMOOT. I am perfectly aware of that, and that is the only motion that I can make. Mr. President, I now make the motion that the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, be recalled from the other House for further consideration.

The VICE PRESIDENT. The question is on the motion of the Senator from Utah [Mr. SMOOT] to recall the bill named by him from the other House.

Mr. JONES. I ask for the yeas and nays, Mr. President.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SHEPPARD (when Mr. CULBERSON'S name was called). I wish to announce for the day the unavoidable absence of my colleague [Mr. CULBERSON] and his pair with the Senator from Delaware [Mr. DU PONT].

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT], which I transfer to the junior Senator from South Carolina [Mr. SMITH] and vote "nay."

Mr. STONE (when his name was called). I inquire whether the Senator from Wyoming [Mr. CLARK] has voted?

The VICE PRESIDENT. The Chair is informed that he has not.

Mr. STONE. I have a general pair with that Senator and therefore withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT]. I do

not see him in his seat, and I therefore withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. WALSH (when his name was called). I inquire if the Senator from Rhode Island [Mr. LIPPITT] has voted?

The VICE PRESIDENT. The Chair is informed he has not.

Mr. WALSH. I have a pair with the Senator named. I transfer that pair to the junior Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. WARREN (when his name was called). I am paired with the senior Senator from Florida [Mr. FLETCHER] and therefore withhold my vote.

Mr. WEEKS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. JAMES]. I transfer that pair to the Senator from Minnesota [Mr. NELSON] and vote. I vote "yea."

The roll call was concluded.

Mr. CLARKE of Arkansas. I have a pair with the junior Senator from Utah [Mr. SUTHERLAND]. I find that he is not in his seat, and I therefore withhold my vote.

Mr. CHAMBERLAIN. I have a pair with the junior Senator from Pennsylvania [Mr. OLIVER], and in his absence I transfer that pair to the Senator from Oklahoma [Mr. OWEN] and vote "nay."

Mr. O'GORMAN. I have a general pair with the senior Senator from New Hampshire [Mr. GALLINGER]. I transfer that pair to the senior Senator from Illinois [Mr. LEWIS] and vote "nay."

Mr. THOMAS. I transfer my pair with the senior Senator from New York [Mr. ROOT] to the junior Senator from Louisiana [Mr. RANSDELL] and vote "nay."

Mr. WARREN. I transfer my pair with the Senator from Florida [Mr. FLETCHER] to the Senator from North Dakota [Mr. MCCUMBER] and vote "yea."

The result was announced—yeas 32, nays 30, as follows:

YEAS—32.

Borah	Crawford	La Follette	Sherman
Brady	Cummins	Lane	Smith, Mich.
Brandegee	Dillingham	Lodge	Smoot
Bristow	Fall	Norris	Sterling
Burleigh	Hitchcock	Page	Townsend
Burton	Hollis	Perkins	Warren
Catron	Jones	Poindexter	Weeks
Clapp	Kenyon	Shafroth	Works

NAYS—30.

Ashurst	Lea, Tenn.	Reed	Swanson
Bankhead	Lee, Md.	Robinson	Thomas
Bryan	Martin, Va.	Saulsbury	Thompson
Chamberlain	Martine, N. J.	Sheppard	Vardaman
Chilton	O'Gorman	Shively	Walsh
Gore	Overman	Simmons	West
Hughes	Pittman	Smith, Ariz.	
Johnson	Pomerene	Smith, Ga.	

NOT VOTING—33.

Bradley	Gronna	Newlands	Stephenson
Clark, Wyo.	James	Oliver	Stone
Clarke, Ark.	Kern	Owen	Sutherland
Colt	Lewis	Penrose	Thornton
Culberson	Lippitt	Ransdell	Tillman
du Pont	McCumber	Root	Williams
Fletcher	McLean	Shields	
Gallinger	Myers	Smith, Md.	
Goff	Nelson	Smith, S. C.	

So the motion to recall the bill from the House of Representatives was agreed to.

PANAMA CANAL TOLLS.

Mr. TOWNSEND. I desire to give notice that on Monday morning next, at the conclusion of the routine morning business, I shall submit some remarks on the Panama Canal tolls question.

ALLEN EDWARD O'TOOLE AND OTHERS.

Mr. GORE. I inquire if morning business is closed?

The VICE PRESIDENT. Not yet.

Mr. GORE. I desire to make a motion as soon as that announcement is made by the Chair.

The VICE PRESIDENT. Is there further morning business? [A pause.] Morning business is closed.

Mr. GORE. I move that the Senate proceed to the consideration of House bill 13679, being the Agricultural appropriation bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Oklahoma.

Mr. WARREN. Mr. President, will the Senator from Oklahoma yield to me for a moment to call up a five-line bill for the relief of some suffering orphans? It is a House bill, and will only take a moment.

Mr. GORE. I think the Senator asks for all the time I have, but I yield.

Mr. BURTON. I should like to ask what is the bill which the Senator from Oklahoma has moved to take up?

The VICE PRESIDENT. The Agricultural appropriation bill.

Mr. WARREN. Mr. President——

Mr. GORE. I yield to the Senator from Wyoming.

Mr. WARREN. I ask unanimous consent for the present consideration of the bill (H. R. 2314) for the relief of Allen Edward O'Toole and others, who sustained damage by reason of accident at Rock Island Arsenal.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay for the relief of Allen Edward O'Toole, Bessie O'Toole, and Clifford O'Toole, whose father, Edward O'Toole, was fatally injured by an accident at the Rock Island Arsenal, February 24, 1905, the following sums, namely: To Allen Edward O'Toole, $333.33; to Bessie O'Toole, $333.33; to Clifford O'Toole, $333.34; and in case any of the beneficiaries are minors, the amount appropriated shall be paid to his or her duly appointed guardian.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I renew my motion that the Senate proceed to the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry with amendments.

Mr. GORE. I ask that the formal reading of the bill be dispensed with and that it be read for amendment, the amendments of the committee to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and that order is made.

The Secretary proceeded to read the bill.

The first amendment reported by the Committee on Agriculture and Forestry was, under the head of "Department of Agriculture," on page 1, line 11, after the words "Assistant Secretary of Agriculture," to strike out $5,000 and insert "$6,000: *Provided*, That if the position is held by any other than the present incumbent the salary shall be reduced to $5,000."

Mr. SMOOT. Mr. President, I ask the Senator from Oklahoma to allow that amendment to go over for the present, to be taken up later.

Mr. GORE. I will state to the Senator from Utah that it is my intention to ask that all objected amendments may go over until the unobjected amendments are considered and disposed of. I ask, therefore, that this amendment may be passed over for the present.

The VICE PRESIDENT. That will be done.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 2, line 6, after "$2,250," to insert "one executive assistant, $2,250"; in line 8, after "$2,750," to insert "one law clerk, $3,250"; in line 9, before the word "law," to strike out "two" and insert "three"; in the same line, before the word "law," where it occurs the second time, to strike out "seven" and insert "nine"; in line 10, before the word "law," where it occurs the second time, to strike out "eight" and insert "six"; in line 11, before the word "law," to strike out "four" and insert "three"; in line 14, before the word "clerks," to strike out "eight" and insert "ten"; in line 15, before the word "clerks," to strike out "eleven" and insert "twelve"; in the same line, after the words "class 1," to insert "one auditor, $2,000," so as to read:

Solicitor, $5,000; chief clerk, $3,000, and $500 additional as custodian of buildings; private secretary to the Secretary of Agriculture, $2,500; stenographer and executive clerk to the Secretary of Agriculture, $2,250; 1 executive assistant, $2,250; 1 appointment clerk, $2,000; 1 chief, supply division, $2,000; 1 inspector, $2,750; 1 law clerk, $3,250; 1 law clerk, $3,000; 3 law clerks, at $2,500 each; 9 law clerks, at $2,250 each; 1 law clerk, $2,200; 6 law clerks, at $2,000 each; 3 law clerks, at $1,800 each; 3 law clerks, at $1,600 each; 1 expert on exhibits, $3,000; 1 telegraph and telephone operator, $1,600; 4 clerks, class 4; 10 clerks, class 3; 12 clerks, class 2; 21 clerks, class 1; one auditor, $2,000.

The amendment was agreed to.

The next amendment was, on page 3, line 15, after the word "Secretary," to strike out "$328,830" and insert "$343,130," so as to make the clause read:

Total for office of the Secretary, $343,130.

The amendment was agreed to.

The next amendment was, under the head of "Weather Bureau," on page 3, line 17, after the words "One chief of bureau," to strike out "$6,000" and insert "$5,000," so as to read:

Salaries, Weather Bureau: One chief of bureau, $5,000.

Mr. SMOOT. Mr. President, I will ask the Senator whether the present Chief of the Weather Bureau is drawing $6,000 or $5,000?

Mr. GORE. The present chief is drawing $6,000, and he is the only chief of any bureau who draws more than $5,000. The purpose of the committee was to make it uniform.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, in the item of appropriation for "Salaries, Weather Bureau," on page 4, line 20, after the words "in all," to strike out $328,270" and insert "$327,270," so as to read:

Twenty-seven messenger boys, at $360 each; 1 charwoman, $360; 3 charwomen, at $240 each; in all, $327,270.

The amendment was agreed to.

The next amendment was, on page 6, line 15, after the word "climatology," to insert "seismology," so as to make the clause read:

For necessary expenses in the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, seismology, evaporation, and aerology, $122,000.

The amendment was agreed to.

The next amendment was, on page 6, line 20, after the word "climatology," to insert "seismology," so as to make the clause read:

For necessary expenses outside of the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, seismology, evaporation, and aerology, $1,189,000, including not to exceed $591,000 for salaries, $120,000 for special observations and reports, $275,000 for telegraphing and telephoning, and $30,000 for traveling expenses.

The amendment was agreed to.

The next amendment was, on page 7, line 5, after the word "that," to insert "in the judgment of the Secretary of Agriculture," so as to make the clause read:

For the maintenance of a printing office in the city of Washington for the printing of weather maps, bulletins, circulars, forms, and other publications, including the pay of additional employees, when necessary, $26,000: *Provided*, That no printing shall be done by the Weather Bureau that, in the judgment of the Secretary of Agriculture, can be done at the Government Printing Office without impairing the service of said bureau.

Mr. SMOOT. Mr. President, I should like to ask the Senator from Oklahoma to explain the provision here for the maintenance of a printing office in the city of Washington for the printing of weather maps, and so forth, which is found on page 7, and particularly the amendment offered by the committee.

Mr. GORE. Mr. President, at present only maps, bulletins, and cards relating to the Weather Bureau are printed by this printing establishment. It is the purpose to continue that practice and to limit it strictly to the requirements of the office. There is, however, a considerable force of men employed in this printing office, and they have a considerable plant and equipment.

The urgent work of the bureau has to be run off early in the morning, such as bulletins that have to be distributed over the country, and therefore the chief press of the work is early in the morning. It has been thought by the department that they could employ the machinery and the men during the remainder of the day in printing cards and bulletins and other publications required in the service; otherwise the men and the machinery will be idle during a large portion of the day.

Nothing is intended to be printed except what relates exclusively to this office, and the Secretary is invested with discretion so as to keep the work limited to those particular publications. It is simply a matter of economy, to keep the machinery and the men from being idle during the day.

Mr. SMOOT. It has been the practice during the last 10 years, at least, to consolidate all of the Government printing at the Government Printing Office. Originally, nearly every department of the Government had printing done under its own direction.

Mr. GORE. I may say to the Senator that I understand this is all lithographing.

Mr. SMOOT. I hardly think it is all lithographing. Certainly bulletins, circulars, and telegrams would not be lithographed.

Mr. GORE. Circulars would not be, of course.

Mr. SMOOT. I am quite familiar with the printing that is being done at the Weather Bureau. I am fully aware why that has been allowed in the past. As I was saying before the Senator interrupted me, a number of the departments have ceased to have printing of any kind done under the direct care and charge of the department. It has proven so far to be a saving to the Government, and the appropriations that have been made for the printing of the departments have not been so large since the consolidation of our printing in the Government Printing Office as they were before, when appropriations for printing were granted to each of the departments.

I think the amendment that is offered by the committee here, to insert "in the judgment of the Secretary of Agriculture," will broaden the authority of the department to do almost any sort of printing in the Weather Bureau. I can not tell whether or not advantage will be taken of this authority to print all sorts of documents and charts and maps and bulletins which in the past have been and at the present time are being printed at the Government Printing Office.

I sincerely hope the Senate will not take this backward step and authorize the Secretary of Agriculture by this amendment to run a printing office, when we now have the Government Printing Office, and all the overhead expenses are paid there, and it will cost no more if all of the printing of the Government is done there than it would if the printing were divided up among the different departments. I sincerely trust the amendment will not be agreed to, and I hope the Senator will not insist upon it.

I wish to say to the Senator just one more thing. This is not a new question. It has been before the Senate before. Other Secretaries of Agriculture have asked for this authority, and in the past it has been denied, and I believe wisely denied. I think the printing of the department, outside of the very peculiar weather maps incident to the Weather Bureau alone, should be done at the Government Printing Office, rather than to begin the maintenance of another printing establishment in the Weather Bureau of the Department of Agriculture.

Mr. BRADY. Mr. President, referring to the amendment which the Senator from Utah is discussing, I will say that the committee considered that matter very carefully, and it was the thought of the members of the committee that there was certain printing necessary to be done by the department that could not be done economically at the Public Printing Office, such as the printing of weather maps and bulletins and things of that character. The Assistant Secretary of Agriculture appeared before the committee and convinced me, as well as the other members of the committee, that it would be a saving to the Government to have it done in this manner. That is the reason why I favored the amendment—not with the thought of giving the Secretary of Agriculture more authority than he has now, but with the idea of leaving it to his judgment as to what could be done in the printing office in the department and what should be sent to the Public Printing Office.

Mr. SMOOT. Let me tell the Senator what the practical effect of this amendment will be. Take the Weather Bureau bulletins, circulars, and forms that at present are printed at the Government Printing Office: Having them printed by the department will not displace a single employee in the Government Printing Office. The Government Printing Office will cost just as much for the Government to run as it will if all of these things are printed there. On the other hand, if they are printed at the Weather Bureau, there will be extra employees required for their printing. The only cost there will be to the Government of the United States if these things are printed in the Government Printing Office will be for the paper and the ink.

I admit, and everyone who knows anything about the question admits, that the weather maps should be printed at the bureau itself. That is why we are maintaining there a small printing plant. I believe that ought to be done, because they must be printed at a certain time. They must be gotten out in a certain way. They must be overseen by certain men and no mistake in them can be permitted. Therefore that class of printing is being done at the Weather Bureau, and rightfully. If, however, it is extended, I wish to say now that it will cost the Government more than it does to-day, for it will not make a difference of one man in the force employed at the Government Printing Office; and all that it actually costs the Government of the United States to do the work to-day is the cost of the paper and the ink required for printing these bulletins and circulars.

Mr. BRADY. The Department of Agriculture at the present time prints the weather maps and charts and things of that character?

Mr. SMOOT. Oh, certainly.

Mr. BRADY. My understanding of the matter is that the printing of whatever bulletins it is necessary to send out immediately can be done to better advantage at the department than at the Public Printing Office. It requires so many men to

do a certain amount of work, and it seems to me that it would require no more men under the Weather Bureau than it would in the Public Printing Office. I do not think a single member of the committee desires to increase the cost of this printing, but I do wish to say that we acted with the thought of enabling the department to render more efficient service.

Mr. GORE. Mr. President, I entirely agree with the Senator from Utah that the printing of the Government ought to be concentrated in the Government Printing Office; but, as suggested by the Senator himself, there are certain weather maps and other publications that must be printed at a certain hour of the day, a good deal like a daily newspaper, and unless run off at that hour they are worthless. They now have a plant and equipment and force for doing that work. It is intended to utilize the same force and the same machinery for printing certain cards and other publications that are essential to this service. The only point involved is as to whether the men and the machinery shall be used during the remainder of the day or whether they shall stay idle during the remainder of the day.

It seems to me it will contribute both to economy and to efficiency to have this work done. It is not intended to enlarge the scope of the work. The printing will be limited to the character of printing and publications heretofore done.

Mr. SMOOT. Mr. President, I wish to say to the Senator that I have heard that argument a good many times. When the different departments here ran their branch printing offices they made the same argument—that they could do the printing when the men were not needed in the mornings. I wish to say to the Senator, however, that wherever there is a branch office there are overseers, from the foreman down; and in some of them, in the past, there have been more overseers than there have been men who did the actual work. I feel as confident as that I live that if this amendment is adopted by the Senate it will mean building up again in the Weather Bureau a complete printing plant.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Colorado?

Mr. GORE. I yield.

Mr. THOMAS. The Senator from Utah says it will mean building up this printing plant again. Do I infer from that that there was such a printing plant, which has been discontinued?

Mr. SMOOT. Mr. President, we used to have a branch printing plant in the Department of Agriculture years ago. We used to have one in the Treasury Department. We used to have them in almost all of the other departments of the Government; but we had hearing after hearing on this question, and in most instances the branch offices have been discontinued and we have consolidated all the printing of the Government in the Government Printing Office, where it belongs.

Mr. THOMAS. May I inquire of the Senator when the printing plant in the Agricultural Department was suspended?

Mr. SMOOT. I forget just the time, Mr. President; but it was a number of years ago. I wish to say that the plant for printing weather maps and charts was allowed to remain in the Weather Bureau. There is no question but that that was the proper thing to do, for the simple reason, as I stated before, that it is particular work and has to be done by a certain time of the day and has to be overseen by the men who prepare the charts and the maps. There is no objection whatever to that. This amendment, however, goes further and seeks to leave it to the judgment of the Secretary of Agriculture as to what shall be printed there.

Mr. THOMAS. And that judgment is coextensive with the entire printing of the department if it is exercised within this limit?

Mr. SMOOT. If it is exercised within the limits of this amendment.

Mr. GORE. Mr. President, the language is "without impairing the service of said bureau"; and somebody will have to pass on the question whether it will impair the service or suspend the continued execution of any regular kind of printing. That discretion has to be vested in somebody.

A question was raised as to whether they could print certain cards that they use. That was the particular point over which this question arose. It was supposed that probably the bureau could have the cards printed somewhere else; but they are needed in the conduct of the business of the bureau, and the machinery will otherwise lie idle when it might be printing those cards. I think that particular item was what suggested the amendment, so that this machinery might be used in printing these cards without being allowed to lie idle the rest of the day.

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

The VICE PRESIDENT. The Senator from Missouri [Mr. REED] is entitled to the floor.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Oklahoma?

Mr. REED. I do.

Mr. GORE. If the Senator from Missouri does not care to address himself to the unfinished business at this time, and if it is proper under the rule, I desire to proceed with the consideration of the Agricultural appropriation bill.

Mr. SMOOT. That can only be done by a vote, which would displace the unfinished business, or by unanimous consent.

Mr. GORE. I would not care to displace the unfinished business. I ask unanimous consent to proceed with the consideration of the Agricultural appropriation bill without displacing the unfinished business.

Mr. STERLING. I object.

The VICE PRESIDENT. There is objection.

Mr. GORE. I ask that the appropriation bill be proceeded with. I wish to say that I shall not persist in the consideration of the appropriation bill after the Senator from North Dakota comes into the Chamber if, when he comes in, he thinks it desirable to proceed with the unfinished business.

The VICE PRESIDENT. Is there objection?

Mr. STERLING. I object.

Mr. GORE. I move that the Senate proceed to the consideration of the Agricultural appropriation bill.

Mr. SMOOT. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gore	Norris	Simmons
Borah	Hollis	O'Gorman	Smith, Ga.
Brady	Hughes	Oliver	Smith, Md.
Brandegee	Jones	Overman	Smoot
Bristow	Kenyon	Owen	Sterling
Bryan	La Follette	Page	Stone
Burton	Lane	Perkins	Sutherland
Catron	Lea, Tenn.	Pittman	Thomas
Chamberlain	Lee, Md.	Poindexter	Thompson
Chilton	Lippitt	Ransdell	Thornton
Clapp	Lodge	Reed	Vardaman
Clark, Wyo.	McCumber	Root	Walsh
Clarke, Ark.	Martin, Va.	Saulsbury	Warren
Cummins	Martine, N. J.	Shafroth	West
Dillingham	Nelson	Sheppard	Works
Fall	Newlands	Sherman	

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Sixty-three Senators have answered to their names. There is a quorum present. The question is on the motion of the Senator from Oklahoma that the Senate proceed to the consideration of the Agricultural appropriation bill.

Mr. McCUMBER. I understand the Senator expected to take up only the appropriation bill during my absence, as I was not present at 2 o'clock. I will ask him, under the statement that I now make, that we are ready to go on and will probably complete the grain-grading bill to-day, that he withdraw his motion and that we proceed with the unfinished business.

Mr. GORE. In view of the statement of the Senator from North Dakota, I withdraw the motion to proceed to the consideration of the Agricultural appropriation bill.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. REED. Mr. President, I took up yesterday the matter of the protection which is afforded by the bonds of State officers against false inspection in contrast with that under the provisions of the present bill. There is no provision in the pending bill providing that in case of false inspection by the Federal authority the person injured shall have any recourse whatever either against the inspector or against the Federal Government; and in the absence of an express provision we all understand there could be no claim made against the Federal Government.

I call attention to the further fact that the pending bill does not provide that any man appointed to inspect grain shall possess any other qualification than that he shall have passed a

civil-service examination. There is no provision whatever for a bond, and no penalties are affixed for neglect of duty.

In contrast I call attention to the laws of the State of Minnesota and those of my own State.

The Senator from Minnesota [Mr. NELSON] has had the kindness to send me a copy of the grain-inspection laws of his State. Section 2065 of the laws of Minnesota requires that the inspectors, after appointment—

Shall give bond to the State in the sum of $10,000, with sureties, to be approved by the commission, conditioned for the faithful and impartial discharge of the duties of his office according to law and the rules and regulations prescribed by the commission, and the payment of all damages sustained by any person caused by his failure to perform such duties.

Deputy inspectors are required to give bond in the sum of $5,000.

It is further provided in section 2076 of the laws of Minnesota that suit may be brought upon these bonds by any person injured by the misconduct of the principal.

Moreover, the system of State inspection in Minnesota which has been so ably described by the senior Senator from that State [Mr. NELSON] possesses certain other advantages which are not at all contemplated by the pending bill. The pending bill contemplates inspection at some 15 points in the United States, with a possible extension of that service; but the author of the bill does not pretend that it is within the contemplation of the bill that there shall be inspection at numerous points in the various States. Indeed, he is driven from that ground by the attempt to show that Federal grain inspection will be inexpensive. But, Mr. President, how is it in the State of Minnesota? Section 2066 provides——

Mr. HOLLIS. Will the Senator from Missouri yield to me for a moment?

Mr. REED. I yield.

AGRICULTURAL EXTENSION WORK.

Mr. HOLLIS. I move to reconsider the vote to recall from the House the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture. I wish to state that I voted under a misapprehension. I ask for the immediate consideration of the motion.

The PRESIDING OFFICER. The Senator from New Hampshire moves to reconsider the vote——

Mr. FALL. Mr. President, I make the point of no quorum.

The PRESIDING OFFICER. The Senator from New Mexico suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	La Follette	Perkins	Smith, Ga.
Bryan	Lane	Pittman	Smith, Md.
Burton	Lea, Tenn.	Pomerene	Smith, Mich.
Chamberlain	Lee, Md.	Ransdell	Smoot
Clapp	Lewis	Reed	Sutherland
Clark, Wyo.	Lippitt	Robinson	Swanson
Clarke, Ark.	McCumber	Root	Thomas
Cummins	Martin, Va.	Saulsbury	Thompson
Dillingham	Martine, N. J.	Shafroth	Townsend
Fall	Nelson	Sheppard	Vardaman
Gore	Norris	Sherman	Warren
Hollis	O'Gorman	Shively	West
Hughes	Overman	Simmons	
Johnson	Page	Smith, Ariz.	

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from New Hampshire [Mr. HOLLIS] to reconsider the vote to recall House bill 7951 from the House of Representatives.

Mr. McCUMBER. Mr. President, I raise the point of order that while the unfinished business is pending and while a Senator is speaking on the subject no motion of that kind is in order.

The PRESIDING OFFICER. It is the understanding of the Chair that the Senator from Missouri yielded the floor to the Senator from New Hampshire.

Mr. McCUMBER. I did not so understand. But, Mr. President, it was decided by a vote of the Senate that merely yielding the floor when a Senator asks if he may interrupt and consent is given by the Senator speaking upon a bill, does not give a right to the person interrupting to move to displace the business in that way.

Mr. SMITH of Georgia. Mr. President, replying to the point of order of the Senator from North Dakota, I wish to suggest that a motion to reconsider a vote where the original motion has to be acted upon instantly is a privileged question. The original motion was a motion to recall a bill from the House that the Senate acted upon. The Senator from New Hampshire moved to reconsider that action, stating that he voted under a misapprehension. It is a privileged question, because the original action of the Senate goes into immediate effect unless the reconsideration takes place.

I desire, furthermore, to submit to the Senate that the motion to reconsider is not debatable. The motion to recall was not debatable, and the motion to reconsider the action of the Senate on the motion to recall is not debatable. So if we vote upon this question it can not displace the business which the Senator from North Dakota has in charge except for a few moments.

Mr. McCUMBER. A point of order is always a matter that one may debate, at least sufficiently to present the point of order to the Senate.

Mr. CLARK of Wyoming. No; if the Chair desires the information, he can ask for it, and then it becomes debatable.

Mr. CUMMINS. Mr. President, upon what rule does the Senator from Georgia rely when he states that because the motion to recall is not debatable therefore the motion to reconsider is not debatable?

Mr. SMITH of Georgia. I think it follows as a general rule of parliamentary practice that motions to reconsider nondebatable propositions are not themselves subjects of debate. I think that is a general rule applicable to procedure in deliberative bodies.

Mr. CUMMINS. The Senator from Georgia does not rely upon any rule of the Senate?

Mr. SMITH of Georgia. There is no specific rule of the Senate upon that subject.

Mr. CUMMINS. I question the general parliamentary law as it is applied to this particular subject. There ought to be an opportunity for Senators, I think, to debate a matter as important as this. However, if the Senator has any rule of that kind in his mind to which he can refer I would be glad to have him put it before the Senate.

The PRESIDING OFFICER. The Chair is compelled to overrule the point of order made by the Senator from North Dakota, understanding that the Senator from Missouri [Mr. REED] yielded to the Senator from New Hampshire [Mr. HOLLIS] to make his motion to reconsider. He yielded the floor for that purpose, and the question is on agreeing to the motion to reconsider.

Mr. CUMMINS. Mr. President, a parliamentary inquiry. Is that motion debatable?

The PRESIDING OFFICER. The present occupant of the chair will make a ruling upon the question after inquiry at the desk.

Mr. SHIVELY. It seems to me that is a hypothetical question. Is there anyone offering to debate it or who wants to debate it?

The PRESIDING OFFICER. The Chair sustains the point of the Senator from Indiana. So far as the Chair can observe, no Member of the Senate is offering to debate it.

Mr. CUMMINS. Mr. President, I desire to make some observations to the Senate upon that motion. It will be remembered that when the bill was before the Senate there was proposed to it an amendment brought forward by the Senator from Washington [Mr. JONES] relating to the distribution of this fund in the States having two or more agricultural colleges. I was addressing the Senate upon that amendment. While I was on my feet, doing my best to make it clear that the provisions of the bill were not fair, but were discriminatory, the Senator from Colorado [Mr. SHAFROTH] arose and suggested that, in his opinion, the provisions of the bill were not fair, and further suggested an amendment. While I had been in favor of the amendment offered by the Senator from Washington, I instantly reached the conclusion—possibly without sufficient reflection, but I have seen no reason to modify it as yet—that the amendment suggested by the Senator from Colorado was better and would result in a fairer distribution of this fund than would the amendment proposed by the Senator from Washington. I said that, in so far as I was concerned, I would rather have the amendment of the Senator from Colorado than the other. Thereupon, and before the amendment proposed by the Senator from Washington was voted upon, the Senator from Colorado proposed the amendment which was accepted by the Senator in charge of the bill, and it was unanimously adopted, as I remember. Then we came to a vote upon the amendment proposed by the Senator from Washington, and I voted against the amendment proposed by the Senator from Washington simply because I believed that the solution that had been proposed from the other side of the Chamber by the Senator from Colorado was a fairer and a better solution

than the one brought forward by the Senator from Washington. It was concurred in, as I remember, by every Senator upon the other side of the Chamber and by some Senators upon this side of the Chamber.

The bill is thus modified and goes into conference. As I am informed, the conference committee rejected the amendment that had been thus accepted by the proposers of the bill, those who were standing for it in this Chamber. The conference report comes into the Senate and is agreed to. I am not suggesting any unfair practice, mark you, at all; but, as we all know how these things are done, it was agreed to without practically anyone in the Senate knowing what was before the Senate and what was being done.

Under those circumstances, Mr. President, it seems to me that there ought not to be the slightest hesitation on the part of the Senator who is in charge of the bill, or on the part of other Senators, in bringing the conference report again before the Senate, so that we may deal with it consciously and according to our view of what the law should be, and determine whether the Senate should recede from the amendment.

To me, while there is no question of personal bad faith in the situation—and I would be the last man to suggest it—I believe that it will be bad faith with the country; I believe that it will create a vast volume of indignation when the country knows that an amendment which had created so much interest in the Senate, and a phase of the subject that was solved in the way that I have pointed out, is abandoned by the Senate without a word having been said with regard to it, and without very many Senators, at least, knowing that the subject was before the Senate.

I hope, and I hope earnestly, that the motion to reconsider the motion to recall will not prevail, and that we will be given an opportunity again to consider this action of the conference committee in receding from an amendment attached under the circumstances I have pointed out.

Mr. SMITH of Georgia. Mr. President, it is my firm conviction that unless the Senate recedes from the amendment we shall have no legislation. In conference we discussed that subject at length. The amendment changed the determination by the legislature of the State of the agricultural college to which the fund was to go, or which was to administer the fund, for the college does not get the fund. Not one dollar of the fund under this legislation is to be spent inside the walls of the college. The amendment changed the provision of the House bill to the effect that the legislature of the State should pass upon the college to which the fund was to be administered over the State on which the college was located to a provision which permitted the governor of the State, with the Secretary of Agriculture, to determine the question. That was the change made in the section.

The bill provided, as it came from the House, that the legislature in a State where there were two or more land-grant colleges should determine which college should administer the fund. It was not a question as to what college it should go to, for the money did not go to a college, but as to which college was throughout the State to do the demonstration work, the work itself being work that did not help the college at all and did not add a dollar to the resources of the college, but which was to be used on the farms in the counties of the State.

We found each of the three members of the conference committee on the part of the House positively opposed to allowing the governor to have a voice in selecting the college, and absolutely insisting that the legislature, representing all the people of the State, should pass on this question. In my own State I would be just as willing the governor should act as the legislature, because I should feel sure that there would be no whimsical change as the result of changed administration; but this feeling did not exist on the part of others. We remained in conference on this subject for two or three weeks, having adjourned the conference, and adjourned several times, until finally we were just told by the other side, "We can not yield; we do not want the governor to have the privilege; we insist that the legislature should control the subject."

My own view is that, unless we accept the provision in this shape, we shall have no legislation. I had no objection to the provision as it was offered by the Senator from Colorado. I very much objected to the provision offered by the Senator from Washington, but not to the provision offered by the Senator from Colorado. I did not fear that a Secretary of Agriculture would interfere to divert the fund from the State college of agriculture——

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. I do.

Mr. CUMMINS. The Senator from Georgia, as I understand, was one of the conferees?

Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. May I ask whether the Senator suggested to his brother conferees that, if they were unwilling to allow cooperation between the governors of the States and the Secretary of Agriculture, they substitute cooperation between the legislatures of the States and the Secretary of Agriculture, so that the Secretary of Agriculture would have some voice in the distribution of these funds?

Mr. SMITH of Georgia. I will call the Senator's attention to their reply to that subject, in which they referred to paragraph 2, which reads:

> And this work shall be carried on in such manner as may be mutually agreed upon by the Secretary of Agriculture and the State agricultural college or colleges receiving the benefits of this act.

The conferees on the part of the House insisted that was a broad power on the part of the Secretary of Agriculture to participate in the direction of the operations of the fund.

Mr. CUMMINS. But the Senator from Georgia knows that that does not touch the question at all, as to what colleges shall have the benefits of the fund. I urged before, as the Senator from Georgia knows, that the Secretary of Agriculture should have the same control with respect to the selection of the colleges in the States, if there were more than one, that he has in other provisions of the bill respecting the manner of the expenditure of the money. That seemed to meet the views of the Senator from Georgia at that time.

Mr. SMITH of Georgia. I did not object to it, because I had no doubt the Secretary of Agriculture would take the same view that I did—that there was but one college in my State that could administer the funds. I am perfectly frank to say that if I had considered it a possibility that any but the one college would administer the fund I should have voted against the whole bill, because I know my State would not give a dollar to it.

Mr. CUMMINS. I know; but upon that point we decided the matter in the Senate after a great deal of discussion.

Mr. McCUMBER. I wish to make a parliamentary inquiry, Mr. President.

The PRESIDING OFFICER (Mr. LEA of Tennessee in the chair). The Senator will state it.

Mr. McCUMBER. I wish to know the present status of the bill which Senators are now discussing; I want to know where the bill is.

Mr. SMITH of Georgia. I can not give the information.

The PRESIDING OFFICER. The Chair will state that the bill is in the House of Representatives, and has been ordered recalled by a motion of this body.

Mr. SMITH of Georgia. And it has not been recalled. Though this body has passed a resolution recalling it, there is a motion to reconsider that motion.

Mr. CUMMINS. What was done in the interim between the motion to recall the bill and the motion to reconsider? An hour or more has elapsed, and I was wondering whether the bill had actually been recalled.

Mr. SMITH of Georgia. I went into the Secretary's office to ascertain, and found the papers to recall the bill had not been delivered to the House——

Mr. McCUMBER. What I want to know is whether the bill is in the actual possession of the Senate?

The PRESIDING OFFICER. The bill is not in the actual possession of the Senate.

Mr. McCUMBER. I make the point of order that the motion is not subject to debate.

Mr. SMITH of Georgia. That has been my view all the time.

Mr. HOLLIS. I understand this order did not reach the House of Representatives and is here in the Senate at the present time. The Chair may ascertain that fact by asking those who know.

Mr. McCUMBER. But the bill, the subject matter upon which we are to vote, is not in the Senate; and that being the case, when it is out of the Senate, under clause 2 of Rule XIII, it is not subject to debate.

The PRESIDING OFFICER. The Chair holds that a motion to recall is not debatable, and, therefore, that a motion to reconsider a motion to recall a bill from the House is not debatable. As the Chair understands, the Senator from North Dakota makes that point of order?

Mr. McCUMBER. I make that point of order.

The PRESIDING OFFICER. The Chair sustains the point of order made by the Senator from North Dakota.

Mr. CUMMINS. I asked that question of the Senator who occupied the chair immediately before the Senator who now sits in it took his place, as I did not know——

The PRESIDING OFFICER. If the Senator from Iowa will indulge the Chair, the present occupant of the chair was informed by the Senator occupying the chair just prior to him that he had made no ruling upon this point, but had indulged the Senator from Iowa.

Mr. CUMMINS. The Senator from Georgia had made the point of order.

Mr. SMITH of Georgia. But I did not press it. Though I made the point of order, I did not invoke a decision; I did not press it, because the Senator from Iowa wanted to speak, and I therefore did not want to make the point of order.

The PRESIDING OFFICER. The point of order has been made and has been sustained. The question, therefore, is not debatable.

Mr. CUMMINS. Very well. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Iowa suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Johnson	Page	Simmons
Burton	Jones	Pittman	Smith, Ariz.
Catron	Kenyon	Poindexter	Smith, Ga.
Chamberlain	La Follette	Pomerene	Sterling
Clark, Wyo.	Lea, Tenn.	Ransdell	Sutherland
Clarke, Ark.	Lee, Md.	Reed	Thompson
Cummins	Lewis	Robinson	Townsend
Dillingham	McCumber	Saulsbury	Vardaman
Fall	Martine, N. J.	Shafroth	West
Gore	Nelson	Sheppard	
Hollis	Norris	Sherman	
Hughes	Oliver	Shively	

Mr. McCUMBER. I desire to ask if a quorum has yet responded to the call.

The PRESIDING OFFICER. Forty-five Senators have answered to the roll call. A quorum is not present.

Mr. McCUMBER. I move——

The PRESIDING OFFICER. The names of the absentees will be called.

The Secretary called the names of the absent Senators, and Mr. LIPPITT, Mr. MCLEAN, Mr. ROOT, Mr. SMITH of Michigan, Mr. SMOOT, Mr. SWANSON, and Mr. WARREN answered to their names when called.

Mr. BRYAN, Mr. BANKHEAD, Mr. LANE, and Mr. TILLMAN entered the Chamber and answered to their names.

Mr. VARDAMAN. I desire to announce that the Senator from South Carolina [Mr. SMITH] is absent on important business.

The PRESIDING OFFICER. Fifty-six Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from New Hampshire [Mr. HOLLIS] to reconsider the vote by which the Senate agreed to direct the Secretary of the Senate to request the House of Representatives to return to the Senate House bill 7951 and the conference report thereon.

Mr. JONES. Mr. President, I move to refer that motion to the Committee on Agriculture and Forestry.

The PRESIDING OFFICER. The Senator from Washington moves to refer the motion to the Committee on Agriculture and Forestry.

Mr. JONES. I understand that that motion is debatable.

The PRESIDING OFFICER. That motion is debatable.

Mr. JONES. Mr. President, the provision in the House bill——

Mr. McCUMBER. I rise to a point of order. My point is that the motion to refer the motion to reconsider is not in order, and I call attention——

The PRESIDING OFFICER. The Chair will be glad to hear the Senator on the point of order.

Mr. McCUMBER. I call attention to Rule XIII, paragraph 2, which provides—

> 2. When a bill, resolution, report, amendment, order, or message, upon which a vote has been taken, shall have gone out of the possession of the Senate and been communicated to the House of Representatives, the motion to reconsider shall be accompanied by a motion to request the House to return the same; which last motion shall be acted upon immediately and without debate, and if determined in the negative shall be a final disposition of the motion to reconsider.

Under this rule this motion must be acted upon immediately—not some other motion, but this particular motion.

Mr. JONES. That motion was acted upon.

The PRESIDING OFFICER. Has the Senator from North Dakota finished?

Mr. McCUMBER. I have finished, Mr. President.

Mr. JONES. Mr. President——

Mr. SMITH of Georgia. Mr. President, the point is that——

The PRESIDING OFFICER. The Senator from Washington first addressed the Chair, and is recognized.

Mr. JONES. Mr. President, I simply wanted to suggest that the motion the Senator from North Dakota referred to was acted upon, that it was acted upon without debate, and was carried. Then a motion was made to reconsider it. This is an entirely different motion from any of those—to refer it to the Committee on Agriculture and Forestry. It does not come within the rule mentioned by the Senator from North Dakota.

The PRESIDING OFFICER. The Chair is in doubt, but the Chair is inclined to think the point of order is not well taken. It submits the point of order to the Senate, however, for its decision.

Mr. JONES. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hughes	Nelson	Smith, Ariz.
Bankhead	Johnson	Norris	Smith, Ga.
Bryan	Jones	Oliver	Smith, Md.
Burton	Kenyon	Page	Smoot
Catron	La Follette	Pittman	Sterling
Chamberlain	Lane	Poindexter	Sutherland
Clapp	Lea, Tenn.	Ransdell	Thomas
Clark, Wyo.	Lee, Md.	Robinson	Thompson
Clarke, Ark.	Lewis	Saulsbury	Vardaman
Cummins	Lippitt	Shafroth	West
Dillingham	McCumber	Sheppard	
Gore	McLean	Sherman	
Hollis	Martine, N. J.	Shively	

Mr. SHIVELY. My colleague [Mr. KERN] is necessarily absent from the city on important business. He is paired with the senior Senator from Kentucky [Mr. BRADLEY]. I desire to have this statement apply to all roll calls that have heretofore taken place to-day and to all that may take place for the balance of the day.

Mr. CLARK of Wyoming. My colleague [Mr. WARREN] is detained from the Chamber on business of the Senate.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present.

Mr. CLARK of Wyoming. I ask to have the list of Senators answering to their names recapitulated.

The PRESIDING OFFICER. The Secretary will recapitulate the list of names.

The Secretary recapitulated the list of Senators answering to the roll call.

Mr. CLARK of Wyoming. Mr. President, I do not desire to challenge this roll call at the present time; but the names of Senators appear there as making up a quorum who were not in the Senate when their names were called, and who are not in the Senate now.

Mr. SMITH of Michigan. Mr. President, I should like to have my name recorded.

The PRESIDING OFFICER. The Senator from Michigan asks that his name be recorded.

Mr. CLARK of Wyoming. I protest against recording any name unless answer shall be made. Attendance by proxy ought not to be tolerated in the Senate.

Mr. CLARKE of Arkansas. Mr. President, that is a very serious charge to make against the integrity of our proceedings, and I think the Senator owes it to himself and owes it to the Senate to make disclosure of the names to which he refers. If it is a fact, I do not think we can afford to ignore it.

Mr. CLARK of Wyoming. I have made the statement, and——

Mr. CLARKE of Arkansas. I think, in view of its seriousness, the Senator from Wyoming should give us an opportunity to refute that sort of a procedure if it is being done.

Mr. CLARK of Wyoming. I say I have made the statement; I have made it on my responsibility; and I do not think I am required at this time to go further.

Mr. CLARKE of Arkansas. Let me ask the Senator from Wyoming to give us the names of the Senators who are recorded without their having been present and having answered.

Mr. CLARK of Wyoming. I do not care to make that statement at the present time. The names may have been recorded at the request of the Senators themselves, and therefore I do not care to make the statement.

Mr. CLARKE of Arkansas. I do not know that I can pursue the subject further; but it is a reflection upon the integrity of the clerical force of the Senate——

Mr. CLARK of Wyoming. Mr. President, I do not consider it a reflection upon the integrity of the clerical force. I do consider it a reflection upon the methods of the Senate in transacting its business.

Mr. CLARKE of Arkansas. The Senate can not transact its business except through its authorized officers. The statement that a false report has been returned to the Senate with a view of establishing the presence of a quorum is a very serious charge. I think the Senator owes it to himself and owes it to the Senate to put it in some sort of form so that we can take notice of it.

The PRESIDING OFFICER. If the Chair may be indulged for a moment, the Chair desires to state that it is not in anywise a party to any such proceeding, if it exists; and it thinks the Senator from Wyoming also owes it to the Chair to state if there are any Members recorded who were not actually in the Chamber and did not authorize the entering of their names.

Mr. CLARK of Wyoming. I will not be sure as to all the names; but I think the Senator from Vermont, for one, did not answer to his name, and was not in the Chamber at the end of the roll call, but was still recorded as present.

Mr. CLARKE of Arkansas. What Senator from Vermont?

Mr. CLARK of Wyoming. The junior Senator from Vermont [Mr. PAGE].

The PRESIDING OFFICER. The Chair is advised by the Secretary that the junior Senator from Vermont [Mr. PAGE] was in the Chamber and came and asked that his name be recorded.

Mr. CLARK of Wyoming. That is just one of the things I complain about. The name should be recorded by answer to the roll call at the time the name is called.

Mr. SMITH of Georgia. Mr. President, I think this subject has been up once before in the Senate, and it was distinctly understood then that no one's name should be entered unless he was actually here and answered to the roll call.

Mr. CLARK of Wyoming. That is my understanding.

Mr. SMITH of Georgia. I am sure that matter was before the Senate.

The PRESIDING OFFICER. The Chair is informed that the Senator from Vermont was in the Chamber.

Mr. MARTINE of New Jersey. Mr. President, to my positive knowledge the junior Senator from Vermont [Mr. PAGE] was here, and entered his vote.

Mr. CLARK of Wyoming. To my positive knowledge the junior Senator from Vermont did not respond when his name was called, and he was not in the Chamber at the close of the roll call when his name appeared. I will say, further, that the same remark applies to the junior Senator from Minnesota [Mr. CLAPP].

Mr. MARTINE of New Jersey. I have perfect confidence in my eyes, and also in my eardrums; and he was right here in front of the desk of the junior Senator from Montana [Mr. WALSH].

Mr. CLARK of Wyoming. Who was?

Mr. MARTINE of New Jersey. The junior Senator from Vermont.

Mr. CLARK of Wyoming. Mr. President, I saw a Senator—not the junior Senator from Vermont, but another Senator—after his name was called, enter the door and request that his appearance be recorded by the Secretary, and immediately leave the room.

Mr. MARTINE of New Jersey. Mr. President, I am not speaking——

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from New Jersey?

Mr. CLARK of Wyoming. I want to make one thing plain and then I shall have finished.

The PRESIDING OFFICER. The Senator from Wyoming declines to yield at this time.

Mr. CLARK of Wyoming. I here and now protest, Mr. President, against any names being recorded unless response shall be made to those names in the due course of the roll call.

Mr. MARTINE of New Jersey. I think any Senator will agree with that proposition.

Mr. McCUMBER. I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCUMBER. What is the question now before the Senate?

The PRESIDING OFFICER. The question before the Senate is the point of order made by the Senator from North Dakota.

Mr. McCUMBER. I raise the point of order that that is the only matter which can be submitted to the Senate, and that it must be done without debate.

The PRESIDING OFFICER. The Chair has submitted the question to the Senate. The question is, Will the Senate sustain the point of order made by the Senator from North Dakota?

Mr. JONES. Mr. President, I understand that when a point of order is submitted to the Senate it is then debatable.

The PRESIDING OFFICER. It is debatable.

Mr. JONES. Mr. President, it does seem to me that on a proposition of this kind it would be well for those having charge of this proposition to submit to the Senate——

Mr. McCUMBER. I raise a point of order.

The PRESIDING OFFICER. The Senator from North Dakota will state it.

Mr. McCUMBER. I raise the point of order, under subdivision 2 of Rule XIII, that this matter is not debatable, and I want again to submit that section to the Chair. It provides that—

> When a bill, resolution, report, amendment, order, or message, upon which a vote has been taken, shall have gone out of the possession of the Senate and been communicated to the House of Representatives the motion to reconsider shall be accompanied by a motion to request the House to return the same, which last motion shall be acted upon immediately and without debate.

Whether the Chair decides it himself or whether the Chair submits it to the Senate to decide the point does not make it a debatable question.

The PRESIDING OFFICER. The present occupant of the chair does not think the point of order is well taken. The question before the Senate is the point of order which has been submitted to the Senate. Under Rule XX—

> A question of order may be raised at any stage of the proceedings, except when the Senate is dividing, and unless submitted to the Senate shall be decided by the presiding officer without debate, subject to an appeal to the Senate.

This question, having been submitted to the Senate, is subject to debate.

Mr. JONES. Mr. President, as I was proceeding to say, it seems to me it would be much better if Senators having charge of this matter would consent to the conference report being brought back to the Senate and given the consideration that it ought to receive and then allow it to be voted upon. I am satisfied there would be but very little delay, and I know there is no disposition on the part of anyone to whom I have talked in regard to the matter to delay it.

The only reason this motion was made to bring the report back to the Senate was because it was agreed to the other day, as has already been said, like most of our conference reports, with no discussion and without any consideration whatever.

Of course, everyone knows that when this measure was before the Senate a great deal of interest was manifested with reference to the distribution of the fund between the colleges, and especially as between the colleges in States where there is more than one college. On the amendment that was offered by me when the bill was under consideration there were three or four days' debate, I think. In fact, that was apparently the main proposition in connection with the bill. As was stated by the Senator from Iowa [Mr. CUMMINS], an amendment was proposed to the text of the bill by the junior Senator from Colorado [Mr. SHAFROTH], under which the division of the fund was left to the action of the governor of the State and the Secretary of Agriculture, acting jointly, thus keeping the National Government connected with the distribution of this fund.

The provision in the House bill reads as follows:

> That in any State in which two or more such colleges have been or hereafter may be established, the appropriations hereinafter made to such State shall be admitted by such college or colleges—

That word, I think, should be "administered" instead of "admitted"—

> as the legislature of such State may direct.

Leaving entirely to the legislature of the State the distribution of the fund and the determination of the colleges to which it shall go and by which it shall be administered. In other words, the National Government has absolutely no control over the distribution of the fund as to where it shall go, as to what colleges it shall go to, or by what colleges it shall be administered.

The paragraph of the bill read by the Senator from Georgia a moment ago, in answer to the suggestion of the Senator from Iowa, does not go to this point at all. Under the House bill the Secretary of Agriculture had absolutely nothing to say as to what college or colleges should have any part of this fund.

I am satisfied that the sentiment of the Senate was very strongly in favor of the proposition that, as the National Government appropriates this money, it ought to have some say as to what colleges shall have the money, and that the proposition of the House could not have been sustained by a vote of the Senate. In view of that sentiment, the Senator from Colorado [Mr. SHAFROTH] suggested the amendment that the governor of the State and the Secretary of Agriculture should determine the colleges to which this money should go. That amendment was adopted, according to my recollection and according to the recollection of the Senator from Iowa, without a dissenting vote. Then the vote came upon the amendment I had proposed. That was voted down, and the bill stood as amended by the amendment of the Senator from Colorado, which was far preferable to the amendment of the House and incorporated the substantial principle of my amendment, which was to give the Federal Government some control over the money

that it was appropriating for the encouragement of agriculture in the different States of the Union.

The committee of conference has brought in a report abandoning entirely the provision adopted by the Senate. It has accepted without change or modification the provision of the House bill. Under that provision in States where there are two colleges the legislature of the State can determine absolutely where this money shall go. The United States Government, which furnishes the money for the purpose of encouraging agriculture, has absolutely nothing to say about it.

There is not any question where this money will go. As a matter of fact, it was frankly admitted upon the floor of the Senate by the Senator from Georgia [Mr. SMITH] and by the other Senators favoring the provision of the House bill that no part of this fund would go to be administered by the colleges for the colored students in the various States. They were frank about that. There was no attempt at all to conceal it. Therefore that will be the result under the provision that is now passed and that it is attempted to reconsider.

Mr. SMITH of Georgia. Mr. President, I will state further to the Senator that the result would be the same if the Secretary of Agriculture had anything to do with it, because in my State—and I think the same is true of all the other States—we would not touch the fund if it were not administered in that way. We would abandon it entirely.

Mr. JONES. Then, if that is the case, there could be no reason for not sustaining the provision of the bill as it passed the Senate.

Mr. SMITH of Georgia. Except that it would exclude those States from any participation in the fund.

Mr. JONES. Oh, no; the law would not exclude them. They might exclude themselves.

Mr. SMITH of Georgia. They would exclude themselves, because it would be a vicious law.

Mr. JONES. If they should see fit to exclude themselves, that is no reason why the National Government should give up all of its control over the money that it appropriates.

The Senator from Georgia says this fund does not go to the college. That was all discussed when the bill was under consideration. Of course the money does not go directly to the college in the sense that so much money is turned over to the head of the institution to use as he sees fit; but the money is apportioned to a college or to colleges, and under this legislation it would be apportioned to a certain college, and out of that fund they would employ demonstrators and men to go out into the field to demonstrate the different methods of agriculture. In other words, it is used for the purpose of employing what may be termed "teachers"; not teachers to go into the schoolroom and teach from day to day and from month to month, but they are teachers just the same, and the money is used in just exactly the same way that money is used for the employment of teachers who perform their services within the four walls of the schoolroom. It would be used by the agricultural college which is designated to employ agents and representatives of the college to go out into the different sections of the State for the purpose of demonstrating the different methods of farm work and agricultural work.

I take it that that is an appropriation that results in benefit to the college, practically to the same extent as if it were actually given to the college. The purpose of this fund is to assist in the development of agriculture; to teach, if you please, in a practical, demonstrative way the best methods of agricultural work. It is done by using this money to send out people to different sections, different neighborhoods. I can not see why the National Government should not hold some control over the fund that it appropriates and have the right to say, if it deems it wise to do so, that a part of this money shall go to an agricultural college in the State that is devoted to the instruction of colored children.

It may be said that the demonstrators who go out from the college for white students will demonstrate for the white people and the colored people also. That is true; but I do not believe it will be done to the extent that it would be if you apportioned some of this money to an agricultural college for colored students. There are many sections in the different States where there are very few white people—where the colored population very, very largely predominates. It does seem to me that in those sections, where the demonstrators will be teaching, if you please, or demonstrating almost entirely before colored people, we ought to get colored people for the demonstration work, if we can get them; and I think it appeared very clearly in the debates on this measure that even now there are colored people who have shown their competency for this kind of demonstration work.

In the State of Virginia the reports of the Bureau of Education show that quite a number of colored people have gone out as farm demonstrators, and that their work has been very successful. In other States, too, colored people have been sent out for farm demonstration work.

It seems to me we ought to encourage that kind of work. We ought to encourage the colored people to develop along those lines. There is no better way of encouraging them to develop in that way than by holding out to them the hope that if they will fit themselves for that sort of work they can be sent out by their colleges to do it. I would rather have the influence for good and for growth and development that will come from that encouragement, and from sending out colored persons to communities where colored people very largely predominate to instruct those people, than to have a far more cultured and possibly more competent white person sent to those localities, because the development and the encouragement that come from letting these people know that if they do fit themselves for this kind of work they will have an opportunity to do it, will be of far greater value than the mere individual education and development that will come.

Under the report as it has been adopted by the Senate, which we are seeking to reconsider, all this money will go to the white colleges. There is not any question about that. That in itself will be a discouragement to the other institutions. It will be a discouragement to the children who attend those institutions. They will say: "Of what use is it for us to make any special effort to fit ourselves for this kind of work if the National Government is not going to give us any help or any encouragement—if the National Government is going to allow all the money that comes down into this section to be turned over to the white colleges for white demonstrators and white agents to be sent out, not only to the white localities and communities, but also to the colored localities and communities?"

We ought not to encourage any such feeling as that in any class of our people.

Mr. President, I do not feel like going into a discussion of the merits of this question upon the point of order. We ought to have an opportunity to discuss the matter as it ought to be discussed, with the question directly before the Senate for decision. It ought not to be discussed upon its merits upon a point of order as to the debatability of this motion to refer to the Committee on Agriculture and Forestry.

As I said, if the report is brought before the Senate for reconsideration, I shall take very little time in discussing it. I am satisfied that the time we have spent on these various motions, points of order, and so forth, is far more than would have been taken on a discussion of the question if brought before the Senate, and then a vote would have been reached upon the conference report. I hope it will be permitted to come up for consideration on its merits, so that the Senate will have an opportunity to say whether the report adopted by the conferees shall be the action of the Senate.

The Senator from Georgia [Mr. SMITH] says that if we do not accept this report there will be no legislation upon the subject. I do not think that that is a proposition which ought to appeal to the Senate upon a question upon which it believed, as shown by a very large majority on the vote, that the provision adopted by the Senate ought to be the law. In my short service here I have known many a conference report that has come here and has been rejected and sent back to the committee of conference. I have very frequently known cases where the House conferees have strongly insisted upon a provision that they have put in a bill, and the conference report has been brought in and rejected, and has gone back, and finally the House has receded, or else has suggested some provision by way of compromise.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Iowa?

Mr. JONES. Yes.

Mr. CUMMINS. I desire to make a parliamentary inquiry. We have adopted a motion for the recall of the conference report from the House. A motion to reconsider the vote by which it was so ordered has been entered. Does the motion to reconsider arrest the execution of the motion which we have adopted to recall the conference report?

The PRESIDING OFFICER. The present occupant of the chair is under the impression that the entering of the motion to reconsider does not arrest the motion to recall.

Mr. SMITH of Georgia. I certainly think the Secretary of the Senate would not send out an action of the Senate when a motion to reconsider that action was pending before the Senate. I think it would be highly improper for the Secretary to send

the action of the Senate to the other House under such circumstances.

Mr. CUMMINS. I made the inquiry because I think it would be highly improper for the Secretary to refrain from executing the order of the Senate and doing his plain duty.

The PRESIDING OFFICER. The Senator from Washington will proceed.

Mr. JONES. Mr. President, as I was saying, very frequently conference reports are brought in here showing an agreement between the two Houses and the conference reports are rejected, the matter is sent back to conference, and then recessions are made by the Senate or by the House or by both, respectively.

I do not see any force in the argument of the Senator from Georgia that if we reject this conference report there will be no legislation. Is it possible that the members of the conference on the part of the House consider this provision to be so important that they would allow it to overturn the entire legislative proposal? If they take that position, it seems to me that we ought to let the responsibility rest upon them. If they consider that the provision placing it entirely with the power of the legislature of a State to say where the money appropriated by the National Government shall go is of greater importance than the fundamental features of this legislation, then, it seems to me, we can very safely let the responsibility rest upon them.

I do not believe, however, that that would be the result. This legislation will not go into effect until the 1st of July, and there is plenty of time to work out the differences in conference. The suggestion of the Senator from Iowa, it seems to me, would be a very good compromise proposition, to allow the legislature and the Secretary of Agriculture to have some say with reference to this matter. If the House of Representatives is not willing to accept something of that sort, then it seems to me that the Senate should not simply give away everything that it believes in in order to secure an agreement. If the legislature of the State, in cooperation with the Secretary of Agriculture, can distribute this money, what objection could there be to it? It does seem to me that a question of that character is of such importance that at least the conferees should be willing to try again and see whether they can not reach an agreement. If the Senate by a very large majority should send the bill back to conference, my observation and experience have been that concessions would very likely be made on the other side on a matter that is not really vital from the standpoint of the various States.

I hope that the proposition can come before the Senate again upon its merits. As I said before, I was with the Senator from Georgia, and, as far as I am concerned, very little time will be taken by me in discussing it.

Mr. CUMMINS. Mr. President, before I address myself directly to the question before the Senate, may I say a word with regard to a point of order previously decided by the Chair? I know that the Chair desires to be right in the matter and would be very unwilling that any precedent should be established here contrary to the rules of the Senate.

I therefore call the attention of the Chair to the fact, which I did not know at the time I was on my feet before, that prior to 1886 the rule relating to motions to reconsider expressly declared that a motion of that character should be decided without debate. That is to say, there were in the first clause of Rule XIII, which covers the procedure with reference to motions to reconsider, the words "without debate." In June, 1886, Mr. Frye, Senator from Maine, reported from the Committee on Rules the following resolution, which was considered by unanimous consent and agreed to:

Resolved, That the last paragraph of clause 1, Rule XIII, is hereby amended by striking out the words "without debate."

This proceeding of the Senate will be found in the CONGRESSIONAL RECORD of that year, page 5944. The note accompanying that reference is as follows:

The above relates to the motion to reconsider, and before its adoption the motion was nondebatable under the rule adopted January 11, 1884, and which went into effect January 21 of the same year.

I believed it to be my duty to call this to the attention of the Chair and the Senate, because it is plainly evident that it was intended at that time to make the motion to reconsider debatable, whereas before that time it was not debatable, and it is not one of the motions which under our rules is declared to be nondebatable.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from North Dakota?

Mr. CUMMINS. I yield.

Mr. McCUMBER. Will the Senator allow me to call his attention to the fact that I made my parliamentary inquiry and point upon the second subdivision of Rule XIII, and I first substantiated it upon the statement of the Chair that the matter under discussion was not in the possession of the Senate? The rule that the Senator quotes as being amended is that which relates to an original motion only, while the matter before the Senate——

Mr. CUMMINS. No, Mr. President; the Senator from North Dakota is entirely in error. The second clause of Rule XIII governs the procedure upon a motion to recall and not upon a motion to reconsider. The motion to reconsider is, under our rules, debatable; but the motion to recall, which must be accompanied or preceded by a motion to reconsider, is not debatable. In order to make that perfectly clear, because we will often have occasion to rely upon the construction of the rule, I will read the first clause of Rule XIII:

1. When a question has been decided by the Senate, any Senator voting with the prevailing side may, on the same day or on either of the next two days of actual session thereafter, move a reconsideration; and if the Senate shall refuse to reconsider, or upon reconsideration shall affirm its first decision, no further motion to reconsider shall be in order unless by unanimous consent. Every motion to reconsider shall be decided—

Now, prior to 1886, at the point to which I have now come there were the words "without debate"—

Every motion to reconsider shall be decided by a majority vote, and may be laid on the table without affecting the question in reference to which the same is made, which shall be a final disposition of the motion.

That is the only rule we have relating to a motion to reconsider—I mean as to the procedure in disposing of it.

The second clause of the same rule is as follows:

2. When a bill, resolution, report, amendment, order, or message, upon which a vote has been taken, shall have gone out of the possession of the Senate and been communicated to the House of Representatives, the motion to reconsider shall be accompanied by a motion to request the House to return the same—

I hope the Senator will note the connection. The motion to reconsider must be "accompanied by a motion to request the House to return the same"—

which last motion—

That is, the motion to request the House to return the same—

which last motion shall be acted upon immediately, and without debate, and if determined in the negative shall be a final disposition of the motion to reconsider.

It does not cover our action upon a motion to reconsider. The motion to reconsider the vote by which the conference report was adopted is still pending. The only question upon which we were precluded from discussion was upon the motion to recall the report from the House.

I am therefore very clear since these things have been pointed out to me that any motion to reconsider is open to debate. Any other construction would make the attempt to change the rule in 1886 futile and meaningless.

I submit this view of the matter to the Chair, not that it is material to the point we are now discussing but because we want to keep the rules of the Senate, I think, true to their meaning.

The PRESIDING OFFICER. With the Senator's indulgence, the Chair will state that the ruling of the Chair was on section 2 of Rule XIII, and was that a motion to recall from the House a paper not in the possession of this body but in the possession of the other House, not being debatable, a motion to reconsider that nondebatable motion is not debatable.

Mr. CUMMINS. I shall not further challenge the opinion of the Chair, but I believe that it directly overrules the rules of the Senate which make any motion to reconsider debatable without regard to the character of the proceeding.

Mr. McCUMBER. Will the Senator from Iowa allow me?

Mr. CUMMINS. The Chair has already announced that it adheres to its opinion.

Mr. McCUMBER. I desire to call the Senator's attention to the fact, as I assume, that in this case a motion to reconsider has been accompanied by the motion to recall. If it has not been accompanied by the motion to recall, then the whole matter is out of order, because it must be so accompanied; and there is no provision here for putting the motions separately, but it becomes one motion, according to subdivision 2.

Mr. CUMMINS. I do not think so. The Senator from North Dakota, as it seems to me, puts a very strained and unnatural interpretation upon the language of the rule in order to reach that conclusion. It says "last motion." There are two motions, in order to reach a conclusion, a motion to reconsider and a motion to recall; and the last motion is submitted without debate. However, we have passed that point—I mean as to the question whether a motion to reconsider is debatable—and we are now considering whether the motion to reconsider shall be referred to the Committee on Agriculture and Forestry.

Mr. JONES. Mr. President, I should like to make a parliamentary inquiry. I should like to know what would be the effect upon the action of the Senate directing the recall of this bill from the House if before that request reached the House the House should adopt the conference report?

The PRESIDING OFFICER. The present occupant of the chair is of the opinion that that would be the end of it—that the House having acted upon it, it could not be recalled.

Mr. JONES. In other words, if the officers of the Senate should fail to carry the order of the Senate to the House before the conference report is acted on there, their action would defeat the action of the Senate?

The PRESIDING OFFICER. Of course, that is merely the opinion of the present occupant of the chair, and the Chair will only rule upon that question when it is presented.

Mr. SMITH of Georgia. I should like to say that the motion to reconsider was made by a Senator who said he voted under a misapprehension; and if the Senator will allow us to vote, and if the vote should be the same that it was before, it will show that the Senate is not in favor of recalling the bill.

Mr. CUMMINS. If it be true that a mere motion to reconsider does not in and of itself arrest or prevent the execution of an order which the Senate had made—if that be true as a matter of law and procedure in the Senate, then if any officer of the Senate has, at the suggestion of any Senator, withheld the communication from the House he has violated not only his duty but he has committed an indignity upon the Senate that would deserve the most severe censure. I do not say that any officer of the Senate has done so.

Mr. SMITH of Georgia. I will say that I would advise the Secretary that, in my opinion, he ought not to send it. I do not think he ought to send it. I think it would be a great violation of the rights of the Senate if he should send it pending this motion to reconsider, especially in view of the fact that one of the Senators who voted for it stated that he voted under a misapprehension, and the change of his vote would have defeated the action of the Senate.

Mr. CUMMINS. Mr. President, I will deal with that question hereafter. I asked the present occupant of the chair if the making of a motion of that sort was an injunction against the execution of the order of the Senate, and the Senator from Georgia will remember his answer. If any Senator has taken the liberty to prevent the enforcement of the order of the Senate, and if he is wrong with regard to that, then he is subject to censure also.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Georgia?

Mr. CUMMINS. I yield.

Mr. SMITH of Georgia. I am perfectly willing to take the responsibility for anything I have done and to meet any effort of censure for what I have done. My own view is that the Secretary ought not to send it, and I express that view freely. On reflection I am not sure that I told him; but I would be glad to tell him, and if I had a chance to do so I would tell him, and I tell him so from the floor now.

Mr. CUMMINS. Mr. President, the officers of the Senate are not subject to the orders of a particular Senator. They are appointed to carry out the order of the Senate as a whole, and we, of course, will deal with that question in the future. If what we have directed is prevented because any officer of the Senate has confidence enough in the Senator from Georgia—I mean confidence enough in his opinion as to the law—to withhold this communication from the House, and in the meanwhile the House puts it beyond our power to recall it, there will be presented a very serious and a very important question, and we will deal with it, of course, when it arises. I for one would not dare as an individual Senator to approach an officer of the Senate whose duty it was to execute the orders of the Senate and advise him to suspend the execution of his duty and await some further action of the Senate.

It may be that the Senator from Georgia is right as to the law of the case. I have not reflected upon it carefully, nor have I studied it at all. I was prompted to ask the occupant of the chair with regard to it, and was both gratified and confirmed in my first impression when he declared that the motion to reconsider did not prevent the immediate execution of the motion to recall. However, we will cross that bridge when we reach it. It will be a most interesting episode in the history of the Senate. I can predict that with a great deal of certainty. We will be called upon to define not only the power of an individual Senator over the officers of the Senate, but we will be called upon to prescribe the duties of the officers of the Senate as well.

I approach, however, the question which is now before the Senate. I am very sorry that there have been any of these preliminary matters brought forward. Here is a great bill, a bill which is intended to advance the interests of the people of this country, especially the agricultural interests, a bill which met my approval, so far as its chief objects were concerned, in a measure that hardly another bill that ever came before the Senate has met my approval and aroused my interest.

One feature of it is a subject of great debate and of wide differences of opinion. That feature was settled by common consent. The Senator from Georgia knew how deeply I was interested in that particular phase of it. He knew how deeply interested was the Senator from Washington [Mr. JONES] and many other Senators. The majority of the Senate, I mean the majority side represented upon that occasion by the Senator from Georgia, had proposed an amendment which turned aside the discussion I was then pursuing, which I was willing to accept and some of us upon this side, an amendment which was brought forward and sustained by every Democrat in the Senate. There was no dissenting voice; and yet when it goes to conference that amendment is defeated and the conference report comes in here and is adopted without anyone upon this side knowing that it had been before the Senate.

It may be that we were negligent about that; it may be that we ought to have more diligently inquired with regard to the contents or the scope of the conference report; but I ask the Senator from Georgia, I ask all his associates, if they do not think it was due to us that we should have some intimation of the action of the conference committee; that we should have some opportunity to sustain the view for which we had struggled for three or four days in the passage of the bill. I again say that it is impossible for me to conceive that there was the least bad faith in the matter; I do not think so; but when the Senator from Georgia and his associates see what has been done, I can not understand why they are not willing to allow the matter to again come before the Senate to be debated and to be determined, and let us ascertain whether the Senate desires to stand by the amendment which was unanimously adopted. If that were done, it is all that I ask.

Mr. SMITH of Georgia. Does not the Senator have the opportunity now to debate it?

Mr. CUMMINS. I beg pardon.

Mr. SMITH of Georgia. Is the Senator not debating it now? Does not this give him an opportunity to test the question?

Mr. CUMMINS. No; I am not debating the merits at all.

Mr. SMITH of Georgia. The whole matter will be passed upon.

Mr. CUMMINS. I am not debating the merits of the proposition. The Senator from Washington alluded in a brief way to the merits, but I have not touched the merits. I do not think the merits are before the Senate at this time. I am asking the Senator from Georgia and those who control this Chamber to give us an opportunity to consider it and to determine whether we are willing to recede from that amendment. It is the fairest thing that could possibly be suggested, and to deny it is simply to take judgment against us by default, and to take it under such circumstances that can not afford much pleasure to the Senators upon the other side in remembering the way in which that judgment was entered.

I believe, Mr. President, that upon a little consideration the Senator from Georgia, who is noted for his broadmindedness, who is noted for his courtesy, who is distinguished for his grasp of such matters as this, will reach the conclusion that it would be far better if we could have the conference report again before us; and if then the Senate decides that it will sustain the conferees and recede from the amendment there can be no protest from this side.

Mr. SMITH of Georgia. Mr. President, put upon the ground that the Senator from Iowa puts it, I do not feel really like insisting that the bill should not be recalled. I dislike very much to have it recalled. I am deeply interested in the proposed legislation, and I do not believe we can pass any other legislation except as we have it framed, but I would not be willing to prevent it from being recalled, in view of the expressions of the Senator from Iowa.

I would not want it done, unless the Senate was really in favor of it; and under the circumstances, if the Senator is willing, I will ask the Senator from New Hampshire [Mr. HOLLIS] to withdraw his motion to reconsider. I think by unanimous consent it could be withdrawn. We would have defeated the motion; the Senator from New Hampshire would have voted with us, as he stated to the Senate; but since the statements made upon the floor by the Senator from Iowa [Mr. CUMMINS] I would not myself feel entirely happy if he did not have the opportunity to let this bill be brought back here and

be discussed on a motion to reconsider. It seems to me that on that motion we can fully discuss the subject, test out the sentiment of the Senate, and, I hope, decline a reconsideration of the bill, and send it right back to the other House and pass it.

Mr. CUMMINS. I shall appreciate it very much if the course suggested by the Senator from Georgia is carried out; and, so far as I am concerned, I am quite willing to debate the bill upon the motion to reconsider. I simply want a fair chance for the Senate to vote on that question.

Mr. HOLLIS. Mr. President, the arguments of the Senator from Iowa [Mr. CUMMINS] appeal very strongly to me, and I am very glad to cooperate with the Senator from Georgia [Mr. SMITH]. I therefore ask unanimous consent that the motion to reconsider made by me be withdrawn.

The PRESIDING OFFICER. The Senator from New Hampshire asks unanimous consent to withdraw his motion to reconsider the vote by which the Senate agreed to direct the Secretary of the Senate to request the House of Representatives to return to the Senate House bill 7951 and the conference report thereon. Is there objection? The Chair hears none, and it will be so ordered. All points of order made thereon are withdrawn, with the consent of the Senate.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

The PRESIDING OFFICER. The Senator from Missouri [Mr. REED] is entitled to the floor.

Mr. REED. Mr. President——

Mr. HOLLIS. Will the Senator from Missouri yield to me for a moment?

Mr. REED. I yield to the Senator.

PUBLIC SCHOOL BUILDINGS AND GROUNDS IN THE DISTRICT.

Mr. HOLLIS. There is upon the calendar a bill (S. 4316) to regulate the use of public school buildings and grounds in the District of Columbia. It relates to what is called the civic center movement. The bill has been considered by the Committee on the District of Columbia, and a favorable report was made on it March 30. On behalf of the committee, I then asked unanimous consent that the bill be considered. Objection was made purely on the ground that it was a matter of some importance and not a private bill, and that it ought therefore to go over. I think there is no objection to the bill. It merely gives the Commissioners of the District of Columbia a right to permit schoolhouses to be used for places of meeting, and is in accordance with the well-known civic-center movement which is now in vogue in many of the States. With the permission of the Senator from Missouri, I ask unanimous consent that the bill be now considered. If it leads to any debate, I shall withdraw the request.

The PRESIDING OFFICER. The Senator from New Hampshire asks unanimous consent for the consideration at this time of the bill referred to by him, and that the unfinished business be temporarily laid aside for that purpose. Is there objection?

Mr. BRANDEGEE. Before consenting to the request, I wish to ask the Senator from New Hampshire if the bill has in its favor the unanimous report of the committee?

Mr. HOLLIS. It has.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the control of the public schools in the District of Columbia by the board of education shall extend to, include, and comprise the use of the public-school buildings and grounds by pupils of the public schools, other children, and adults for supplementary educational purposes, civic meetings for the free discussion of public questions, social centers, centers of recreation, playgrounds, and for free public library branches, as well during the school year as during vacation. The privilege of using said buildings and grounds for any of said purposes may be granted by the board upon such terms and conditions and under such rules and regulations as the board may prescribe.

SEC. 2. That the board of education is authorized to accept, upon written recommendation of the superintendent of schools, free and voluntary services of the teachers of the public schools, other educators, lecturers, and social workers and public officers of the United States and the District of Columbia, and voluntary gifts of money in aid of supplementary education, civic meetings, social centers, or centers of recreation and playgrounds: *Provided*, That teachers of the public schools shall not be required or compelled to perform any such services or solicited to make any contribution for such purposes: *Provided further*, That the public-school buildings and grounds of the District of Columbia shall be used for no purpose whatsoever other than those directly connected with the public-school system and as further provided for in this act.

SEC. 3. That all laws or parts of laws in conflict with this act be, and the same are hereby, repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. REED. The laws of the State of Minnesota afford no better protection than the laws of the State of Missouri. Missouri's laws are a complete answer to the charge made in the report that the inspection is under the control of interested parties. The Missouri laws have recently been changed so that the warehouse commissioner is now appointed by the governor, by and with the advice and consent of the senate.

Section 38 of this act provides:

That the commissioner shall appoint such suitable person as he may deem qualified for deputy chief inspector * * * and assistant inspectors. * * *

Now, let us see whether they are disinterested or interested.

The chief inspector shall * * * be required to take an oath that he will faithfully and strictly discharge the duties of his said office of inspector according to law and the rules and regulations prescribed by the commissioner. He shall execute a bond to the people of the State of Missouri in the penal sum of $20,000, with sureties to be approved by the commissioner, conditioned that he will pay all damages to any person or persons who may be injured by reason of his neglect, refusal, or failure to comply with the law and the rules and regulations adopted by the commissioner.

Section 40 provides:

The deputy chief inspector and each assistant inspector shall take the same oath as the chief inspector and execute a bond in the penal sum of $10,000, with like conditions, and to be approved in like manner as provided for the bond of the chief inspector. * * * Suit may be brought upon bonds of either the chief inspector, deputy chief inspector, or assistant inspectors for the use of any person injured by any act of said chief inspector, the deputy chief inspector, or assistant inspectors.

You can find nothing of that kind in the bill now before the Senate.

Now, let us see whether these men can be partisans and represent boards of trade or dealers. I read from section 7:

It shall be the duty of the commissioner to appoint a suitable person, who shall not be a member of the board of trade, who shall not be interested, either directly or indirectly, in any warehouse, elevator, or in grain merchandising in this State, who shall be a grain expert, and who shall be known as the chief inspector of grain for the State of Missouri, * * *.

Before entering upon the duties of his office the commissioner shall make, subscribe to, and file with the secretary of state the following oath: "I do solemnly swear * * * that I will faithfully discharge the duties of warehouse commissioner according to the best of my ability, * * *.

In addition to that, this provision follows:

The inspection or grading of grain in this State, * * * must be performed by such persons as may be duly appointed by the commissioner, sworn, and have given bond under this article; * * *

Thus, Mr. President, at least in these two great States containing great grain markets, where there is much more grain handled every year than is raised in North Dakota, we find that the statement contained in this report that there is no disinterested inspection; that those who inspect grain are interested parties, is not borne out by the facts. I believe the Senator from Illinois [Mr. SHERMAN] has demonstrated the same fact with reference to the great markets in his State. So that the report is entirely out of harmony with the real facts.

The Senator from North Dakota would have us believe that these State officials violate their oaths of office and lay themselves liable to suits on their bonds in order to engage in roguish practices. I denounce the statement as absolutely in the teeth of the facts.

Mr. President, I propose now to discuss the bill a little more in detail, and as I go through it I shall continue to show, as I have already shown, that there is scarcely a statement in this report bottomed upon the verities; and, Mr. President, I raise the question of a quorum.

The PRESIDING OFFICER. The Senator from Missouri suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Pittman	Smith, Mich.
Bryan	Hughes	Pomerene	Smoot
Burton	Lane	Ransdell	Sterling
Catron	Lea, Tenn.	Reed	Thomas
Chamberlain	Lodge	Sheppard	Townsend
Chilton	McCumber	Shields	Vardaman
Clarke, Ark.	Martine, N. J.	Shively	Warren
Crawford	Nelson	Smith, Ariz.	Works
Cummins	Oliver	Smith, Ga.	
Dillingham	Overman	Smith, Md.	

Mr. LANE. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent, engaged on committee work, and that the Senator from Minnesota [Mr. CLAPP] is also similarly engaged.

The PRESIDING OFFICER. Thirty-eight Senators have answered to their names. There is not a quorum present.

Mr. WARREN. I ask that the names of the absentees be called.

The PRESIDING OFFICER. The Secretary will call the names of the absent Senators.

The Secretary called the names of the absentees; and Mr. DU PONT, Mr. LEWIS, Mr. NORRIS, Mr. ROBINSON, Mr. SHERMAN, and Mr. WEST answered to their names when called.

Mr. BRISTOW, Mr. SUTHERLAND, Mr. SIMMONS, Mr. BRANDEGEE, and Mr. LIPPITT entered the Chamber and answered to their names.

Mr. SMITH of Maryland. I desire to announce that the junior Senator from Delaware [Mr. SAULSBURY] is absent on official business. He is paired with the junor Senator from Rhode Island [Mr. COLT].

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. There is a quorum present. The Senator from Missouri will proceed.

EXECUTIVE SESSION.

Mr. CLARKE of Arkansas. Mr. President, I will ask the Senator from Missouri if he thinks there is any likelihood of getting through with the pending bill this afternoon?

Mr. REED. I think there is none.

Mr. CLARKE of Arkansas. Then, if it is agreeable to the Senator, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 4 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Thursday, April 30, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate April 29, 1914.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Lieut. Col. William F. Blauvelt, Tenth Infantry, to be colonel from April 28, 1914.

Lieut. Col. Wilds P. Richardson, Infantry, unassigned, to be colonel from April 28, 1914, vice Col. Samuel W. Dunning, Thirteenth Infantry, retired from active service April 27, 1914.

Maj. Beaumont B. Buck, Thirteenth Infantry, to be lieutenant colonel from April 28, 1914, vice Lieut. Col. Almon L. Parmerter, unassigned, detached from his proper command.

Capt. Ferdinand W. Kobbé, Twenty-second Infantry, to be major from April 28, 1914, vice Maj. Beaumont B. Buck, Thirteenth Infantry, promoted.

CAVALRY ARM.

Lieut. Col. William C. Brown, Cavalry, unassigned, to be colonel from April 26, 1914.

Lieut. Col. George H. Morgan, Eleventh Cavalry, to be colonel from April 26, 1914, vice Col. Charles M. O'Connor, Sixth Cavalry, detailed as inspector general on that date.

Maj. George H. Cameron, Fourteenth Cavalry, to be lieutenant colonel from April 26, 1914, vice Lieut. Col. George H. Morgan, Eleventh Cavalry, promoted.

Capt. Edward D. Anderson, Sixth Cavalry, to be major from April 26, 1914, vice Maj. George H. Cameron, Fourteenth Cavalry, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 29, 1914.

UNITED STATES MARSHAL.

J. R. Thompson to be United States marshal, eastern district of Tennessee.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Ensign Boyce K. Muir to be a lieutenant (junior grade).

Samuel L. Howard to be a second lieutenant in the Marine Corps.

To be assistant surgeons.

Carroll R. Baker.
Cliff C. Wilson.
George W. Calver.
Daniel Hunt.
Claude W. Carr.
Howard Priest.
Arthur E. Beddoe.
Robert L. Crawford.
Thomas A. Ratliff.
Louis Lehrfeld.
John F. Riordan.
Ovid C. Foote.
Martin B. Hiden.
Arthur E. Younie.
Louis H. Roddis.
Frank H. Haigler.
Frederick Ceres.
Horace V. Cornett.
James D. Bobbitt.
William H. Massey.
Harvey R. McAllister.
Walter C. Espuch.
Howard A. Tribou.
Thomas A. Fortesque.
William B. Hetfield.
Jesse B. Helm.
Walter L. Haworth.

POSTMASTERS.

ARIZONA.

Patrick G. Madigan, Benson.

ARKANSAS.

Alonzo T. Barlow, Booneville.
Claude D. Brown, Huntington.
George C. Cooper, Devall Bluff.
Arthur R. Hill, Ashdown.
T. W. Sparks, Harrisburg.
Lowell B. White, Benton.

MICHIGAN.

Lewis Hart, Fowlerville.
Edson Porter, Blissfield.
Nathaniel Schmid, Manchester.

UTAH.

Parley P. Willey, Bountiful.

VIRGINIA.

John T. Cooke, Waynesboro.
James R. Rawlings, Fredericksburg.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *April 29, 1914.*

The House met at 12 o'clock noon.

Rev. William Couden, of Indianapolis, Ind., offered the following prayer:

O God, Thou hast made it known that every faintest prayer from the heart of any of Thy children is hailed with joy in heaven, and that Thou wilt respond to our needs and aspirations with wisdom and love. Apply to us as a Nation, O Lord, the same mercy and faithfulness Thou dost vouchsafe to us as individuals. Instruct our leaders, guide our policies, protect our interests, and defend us from all dangers, seen and unknown; and lift our national life ever nearer and nearer a likeness to the ideals we find in the principles of Jesus Christ. And, dear Lord, we pray that what we ask for ourselves may become a world-wide blessing, uniting under Thee all men, all nations, in universal brotherhood. For Jesus' sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

Mr. FERGUSSON, by unanimous consent, was granted leave of absence for one week on account of illness.

LAWS RELATING TO THE JUDICIARY.

Mr. WATKINS. Mr. Speaker, before moving that the House go into the Committee of the Whole House on the state of the Union, I would like to have some understanding with reference to the time to be consumed. Will the gentleman from Illinois——

Mr. PORLAND. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. BORLAND. Has the reading of the bill been concluded?

Mr. WATKINS. Yes, sir.

Mr. MANN. The first reading was dispensed with.

Mr. WATKINS. Can we have some agreement as to time for general debate?

Mr. MANN. I think it might be advisable to let it run along for a while.

Mr. WATKINS. Unless we agree now, we will have to rise and go back to the House in order to reach an agreement later on.

Mr. MURDOCK. Why do you not go ahead with the bill? There seems to be no general demand for general debate.

Mr. WATKINS. Will the gentleman from Illinois [Mr. MANN] and the gentleman from Kansas agree to two hours for general debate?

Mr. MANN. I think we had better start it. I think the chances are it will not take very long.

Mr. WATKINS. Then, Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15578, with Mr. RUSSELL in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15578.

Mr. WATKINS. Mr. Chairman, from the size of the volume in which this bill is contained there has prevailed for the last two Wednesdays an idea that it will take a considerable length of time, and on that account a good many Members have opposed the present consideration of the bill. I infer that has much to do with the fact that on last Wednesday the Committee of the Whole House on the state of the Union decided to postpone or to defer the further consideration of the bill at that time. I wish to say to those who have this idea that if we can proceed in regular order it will not take more than two or perhaps three Wednesdays to dispose of the bill. But if, on the other hand, obstacles are thrown in the way and the progress of the bill be retarded by what some are inclined to denominate as a filibuster, then it may be that a considerable part of the remainder of this session of Congress will be consumed in its consideration. This bill is nonpartisan in its character. There are no politics in it whatever. It is simply and purely a question of revising and codifying the laws and bringing them up to date in such simple manner as to enable all lawyers and all persons interested in the law—and we are all interested in it—to obtain what they may wish to know and to refer to any of the laws in an easy way.

I call attention to the fact that there are two reports accompanying this bill. Report No. 1 explains each section of it, and at the end of that report—and I call attention of the Members particularly to this, so that they may more readily examine the various sections of the bill—the sections of the Revised Statutes under which we start in this codification of the laws relating to the judiciary are numbered seriatum, and opposite the numbers of the sections of the Revised Statutes the sections of this bill are numbered, and in that way you can readily turn to any section in this bill and find in what part of the Revised Statutes it originates. I call particular attention to the larger report, Part 2, because very few Members of the House who have conferred with me in reference to the matter know anything about it or have had their attention called to it. Part 2 of this report gives on the one side of the page—on the left-hand side—the law in its present form as recommended to be passed by this House and as incorporated in the bill which is before the House. On the opposite page—the right-hand side—are the original laws to which this bill refers, and the verbiage in the text of the bill is printed, and by referring to the opposite side of the page any Member, whether he be a lawyer or not, can readily understand not only what is contained in the text of the bill but its origin and what statute gave rise to the law which is incorporated in the bill. It is so simple and clear that anyone, whether a lawyer or not, can readily understand it by making this examination. I make this explanation because of the fact that numbers of Members of the House have asked me to explain the features of the bill and the intent and purpose of it and the ultimate object of it; that is, the effect it may have upon the laws of the country.

In 1868 this committee that reports this bill for the revision of the laws was created. In 1897 the work had progressed to that point which made it necessary to have a commission appointed to codify and revise the laws. Three commissioners were appointed, and those gentlemen proceeded with the discharge of their duties until 1906. They were supposed to have concluded their labors in 1906. At that time, having, as they supposed, finished the work and placed it in such satisfactory form that it would be approved by the House of Representatives, they submitted their work, but although it had been performed by those three commissioners, lawyers of ability though they were, it did not meet with the entire approval of the House of Representatives, and their codification was never adopted by the House.

For continuing the work and getting it in the form in which the Congress of the United States thought it should be put, a joint committee of the House and Senate was appointed, and that joint committee continued its work until three years ago, when the Democrats came into control of the House, and they decided that under the wave of economy and reform they would dispense with the expense which was incurred by that joint committee of the House and Senate. Since that time the work has been continued solely and entirely by the Committee on the Revision of the Laws in the House. The clerk of the committee, not having heretofore been required to do this class of work, entered upon the discharge of his duties to the best of his ability and has presented this bill as the result of his work in cooperation with and under the direction of the Committee on the Revision of the Laws.

In the former codification under the judicial title the bill reported, which became a law on March 3, 1911, had for its object the remodeling of the courts and provided for their jurisdiction as well as their salaries, and fixed the districts; and at the same time in that codification it was thought proper by the Joint Committee on the Revision of the Laws to eliminate the circuit courts. The circuit courts having been eliminated, you will therefore find numerous references in this bill to work which was heretofore done by the circuit courts, which is now referred, respectively, to the district courts and to the circuit court of appeals.

This bill, being the remainder of the judiciary title under the codification, has for its object the specifying of the duties of United States marshals, the United States district attorneys, and the clerks, and the salaries of these various officers, together with the code of procedure, both civil and criminal; and it also incorporates the feature or chapter with reference to habeas corpus, and also a chapter on extradition.

From my standpoint, viewing it as a lawyer, I look upon this particular codification which is submitted as being more important than any other work which has been submitted heretofore, either by the joint committee or by the Committee on the Revision of the Laws of the House. The work heretofore submitted has been the Alaskan Code and the Criminal Code and the first part of the judicial title. This bill, referring as it does to procedure in the courts, is of immense value to every lawyer and should be carefully considered by the lawyers in the House as we proceed with the discharge of our duties in the consideration of this bill.

I mention this fact because there seems to be a disposition when bills of this kind are presented to offer various and sundry amendments, some embodying the pet theories which the Members may have had for a long time; and I desire to call particular attention to the fact that if indiscriminate amendments are tacked on to the bill or embedded in it or made a part of it, various other sections in the same bill will in all probability have to be rearranged, readjusted, and reenacted. In addition, we stand in danger of coming into conflict with the decisions of the Supreme Court interpreting these various sections, because there is hardly a section in this bill which has not been at one time or another passed upon by the Supreme Court; at least by the inferior courts, and many of them by the Supreme Court of the United States.

Do not understand that I wish to intimate or request that there shall be no amendments offered to the bill. Indeed, it is necessary that there shall be many amendments offered for this reason: It has been construed by the Speaker of the House that the province or object or jurisdiction of the Committee on the Revision of the Laws is to revise and codify simply, and not to submit or to suggest new laws; and in compliance with that idea and interpretation by the Speaker we have endeavored in submitting this revision, first, to incorporate those laws which were recommended by the commission which was appointed for that purpose; and, second, to incorporate in the bill all those enactments of Congress which have been passed and which amend any feature of the law either before this commission made its recommendation or afterwards, but particularly those enactments either amending laws, or making laws since this work of the commission was submitted in 1906.

Therefore you will find in the bill which is now presented something like 700 places in italics which we ordinarily understand as amendments to the original bill which was filed in the House. In this case, however, it does not mean that. These italics in this bill simply mean that those passages are new features recommended by the commission, and are not new features recommended by the committee; the committee not feel-

ing authorized to recommend the passage of new laws but simply to submit amendments and make suggestion by way of amendment, and not to incorporate new laws by means of this bill.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Louisiana yield to the gentleman from Wisconsin?

Mr. WATKINS. Yes.

Mr. STAFFORD. Do I understand that the Committee on the Revision of the Laws incorporated all the recommendations of the commission appointed in 1898 to revise the laws?

Mr. WATKINS. Practically and substantially; yes, sir.

Mr. STAFFORD. When we had the last judicial title under consideration, as I understood from the gentleman then having it in charge, Judge Moon of Pennsylvania, I gained the impression that in many instances they departed from the recommendations of the former commission and did not consider those recommendations as absolutely binding.

Mr. WATKINS. Well, the present Committee on the Revision of the Laws did not consider the report or the work of the commission as absolutely binding. We thought it better to leave it in the province of the House to make those amendments to the bill which we considered as advisable and in some instances necessary to be made. In a general way we followed the recommendations of the commission. However, there have been many amendments to the law and many interpretations by the Supreme Court since the work of the commission ended, and wherever that occurs we have embodied those differences in the bill, so as to bring it up to the present time and incorporate either those laws which have been interpreted in a different way from the commission by the Supreme Court, or which have been enacted by way of amendment or repeal by Congress. The general features, though—the general outline—has been substantially followed as recommended by the commission, of course bringing up to date every law under this title which has been incorporated in this bill.

Mr. STAFFORD. If the gentleman will permit me further, in this part of the bill where we find print in italics, that only contains recommendations made by the commission, or are recommendations of the committee also included in italics?

Mr. WATKINS. They are not recommendations of the committee, but they are changes in the law recommended by the commission.

Mr. STAFFORD. In this instance, where the committee supplemented the recommendations of the commission, how are we to determine what those amendments are?

Mr. WATKINS. There are no new features of law incorporated in this bill except enactments of Congress, and we have simply inserted them in the bill, what is commonly known as blending them in the bill.

Mr. STAFFORD. Have you indicated those amendments by italics or have you attempted to distinguish them in any way?

Mr. WATKINS. They are not amendments to the bill, because the original bill that was introduced incorporated all of them, and we could not put them in italics for the reason that if we did it would bring about a confusion. This is the way we have managed that: Instead of printing in roman or in italics, or instead of indicating in any other way, we have put the law itself on the opposite page.

Mr. STAFFORD. If I understand, the print contained on the left-hand pages of part 2 of the report is the bill as reported by the committee?

Mr. WATKINS. Yes. That on the left-hand side is reported by the committee. That on the right-hand side is the law upon which it is based.

Mr. FOSTER. I notice that through the bill there are certain sections that have italics. Are those amendments to the original law?

Mr. WATKINS. Those are recommendations by the commission appointed for the purpose of codifying the law.

Mr. FOSTER. For instance, here on page 95, section 169, there are certain paragraphs printed in italics. Now, why are they so printed there? Are the italics additions to the present law, and are the amendments shown in that way throughout the bill?

Mr. WATKINS. Yes.

Mr. FOSTER. And all the amendments are printed like that?

Mr. WATKINS. Yes; and if you will turn to part No. 1 of the report, you will find each section explained. The explanation of section 169 is this——

Mr. FOSTER. If the gentleman will excuse me, my question was whether the italics indicate changes from the original law?

Mr. WATKINS. Yes.

Mr. FOSTER. And all the changes?

Mr. WATKINS. No, sir. The commission appointed to codify the laws ended its work in 1906, and since then many new laws have been passed, which have been incorporated into this bill.

Mr. FOSTER. Are the parts printed in italics recommendations of the commission of 1906?

Mr. WATKINS. Yes.

Mr. FOSTER. That is what the italics mean?

Mr. WATKINS. Yes; and a very pertinent illustration is this section 169. If you will turn to part 1 of the report, you will find a full explanation of the history of that and what it means, and every section of the bill is explained in the same way.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. WATKINS. Certainly.

Mr. MANN. The large volume which I hold in my hand, which the gentleman will recognize——

Mr. WATKINS. Is that part 2 of the report?

Mr. MANN. Part 2 of the report, entitled "Report of the commission." Just what is this?

Mr. WATKINS. That includes everything that was incorporated in the bill which was originally introduced and which becomes now H. R. 15578.

Mr. MANN. I am trying to get at the meaning of the words "Report of the commission."

Mr. WATKINS. It includes the report of the commission and a great deal more besides. It includes the report of the commission, together with all the laws which have been passed since that time upon this subject matter, and eliminates from the report of the commission all those laws which since 1906 have been repealed or amended. When they have been amended the amendments are blended into the bill.

Mr. MANN. Then this heading "Report of the commission" is a trifle misleading, without an explanation, I take it.

Mr. WATKINS. It is substantially the report of the commission——

Mr. MANN. I am not criticizing anything. I just want to know. This is not the way the commission reported it.

Mr. WATKINS. Not entirely, no; because the new features which have been enacted since that time have been added to it.

Mr. MANN. Is the bill now pending exactly and identically the same as is printed on the left-hand page of this part 2?

Mr. WATKINS. Unless there is some typographical error, it is identical.

Mr. MANN. What commission was this?

Mr. WATKINS. That was the commission appointed in 1896, and which performed its duties until 1906, for 10 years, getting up a codification, for the purpose of making out of it the revised statutes, the same kind of a publication as the former revised statutes, which had been in existence up to that time.

Mr. MANN. Was there not a subsequent commission?

Mr. WATKINS. No; there was not. There was subsequent to that time a joint committee of the House and Senate on the revision of the laws, and that joint committee brought out the criminal code and the first part of this judicial code.

Mr. MANN. How much did they do on this report of the commission?

Mr. WATKINS. I am not prepared to say how much, for this reason: I regret to have to inform the gentleman that the Committee on Revision of the Laws have not had access to their work. If the gentleman will remember, Mr. Heyburn was one of the compilers. He was left here after the joint committee was dissolved, and he left the document representing the proceedings and work of this joint committee in charge of the Secretary of the Senate, and it was deposited in the library of the Senate, and I, as chairman of the Committee on Revision of the Laws, have made a demand on him for the purpose of getting whatever they had, and he has declined to give it, because he says it belongs to a joint commitee and not to the Committee on Revision of the Laws, and substantially all of that work is new work. However, there is a part of which I was successful in getting, through a third party, which did not embody anything like all the law suggested, but did embody a considerable part of it. That happened to be a document on the outside, which was not accessible even to the committee.

Mr. MANN. What I want to get at is, how much of this work has been gone over, first, by the Commission on the Revision of the Laws, and, second, by the Joint Committee on the Revision of the Laws? Now, the committee had access, of course, to the report of the commission on this title.

Mr. WATKINS. Yes.

Mr. MANN. But did not have access to the work of the joint committee.

Mr. WATKINS. That is right.

Mr. MANN. Does the gentleman know how far the Joint Committee on Revision of the Laws took up this title?

Mr. WATKINS. I have been informed that they had about covered the remainder of the judiciary title, although I have not had access to the work.

Mr. MANN. We had a very strong Committee on the Revision of the Laws on the part of the House. The gentleman from Kentucky [Mr. SHERLEY] was a member of that commission.

Mr. WATKINS. It was quite an able body, and they were doing satisfactory work, but the House considered that the work was too expensive and dispensed with it.

Mr. MANN. Whatever the reason was does not make any difference—I do not know whether that was the reason or not.

Mr. WATKINS. I introduced a bill asking that the joint committee be reappointed, but it has never been reported out of the committee.

Mr. MANN. I think that arose out of some controversy as to whether there should be a joint committee on the revision of the laws, with the House Members consisting of three or possibly five, or whether the work should be done in the House by the Committee on the Revision of the Laws by a much larger membership. I think that was the controversy that arose in the House. But that does not make any difference. All I want to know is whether the gentleman's committee has had the benefit of the careful work done by the Joint Committee on the Revision of the Laws in the preparation of this bill.

Mr. WATKINS. We did not, except in the way that I have indicated. There were some parts of the work which a gentleman on the outside had happened to get hold of which he submitted to the committee, and we availed ourselves of the opportunity to use it.

Mr. MANN. My understanding was that when the Joint Committee on Revision of the Laws was at work they had the assistance of somebody in the Attorney General's office.

Mr. WATKINS. They did, at $5,000 a year, and Mr. Hayburn had $5,000 a year, and the clerk had a good salary, and in all it amounted to $18,000 or $20,000.

Mr. MANN. The gentleman does not mean that Senator Heyburn got any salary?

Mr. WATKINS. Oh, no; but Mr. Hayburn, one of the compilers. Senator Heyburn was a very able member of that committee.

Mr. MANN. Does not the Attorney General have a copy of the work that they performed?

Mr. WATKINS. If the Attorney General's office has any copy of it, I have never heard of it. It did not come that way. This man was detailed from the Department of Justice to do this work, and we have been in conference with him constantly, and I never heard him say that they had a copy of the work.

Mr. MANN. The gentleman's committee has had the same man?

Mr. WATKINS. No; we have had nobody except the clerk of the committee and my private secretary, although it was not his duty to perform any part of this work, and I have remunerated the man from whom I got a part of that report myself.

Mr. MANN. If the gentleman will pardon me, the secretary of the committee, or whoever has done it, has done some very good work.

Mr. WATKINS. The clerk of the committee is entitled to the credit, except that it was under the direction of the members of the committee.

Mr. MANN. It would seem to me very valuable if we could obtain the benefit of the work done by the very strong joint committee. We passed the criminal code and the judiciary title bill largely on the strength of their work.

Mr. WATKINS. I should be very glad, indeed, to have the assistance of the gentleman from Illinois in putting me in possession of that work.

Mr. MANN. I have no doubt that if the House should ask for it, it would get it without any trouble.

Mr. STAFFORD. Will the gentleman yield?

Mr. WATKINS. Yes.

Mr. STAFFORD. As I remember, the young man assigned by the Department of Justice to assist the Joint Committee on Revision of the Laws was Mr. Hurd?

Mr. WATKINS. No; Mr. Lott.

Mr. STAFFORD. He favored me when the matter was under consideration with a draft copy of the revision of the titles, so far as he had passed upon them. They were a very valuable set of documents. I assume that other Members of Congress obtained the same. Can the gentleman inform the committee whether he has had, or his committee has had, the aid of these piecemeal revisions that the joint committee had prepared?

Mr. WATKINS. I am sorry to inform the gentleman that we have not. We have had every possible obstacle thrown in the way to embarrass the work, whether it was premeditated or accidental or on account of the operation of the law, I am not prepared to say. It is a fact that these thing are locked up in the library of the Senate in sacks, of no use to anyone, although they cost thousands and thousands of dollars, and we have not been able to avail ourselves of them.

Mr. STAFFORD. Is Mr. Lott still in the Attorney General's office?

Mr. WATKINS. Yes; but not in this capacity; he is in Ohio, I think; trying cases—trust-busting cases.

Mr. STAFFORD. If my memory serves me right, the former joint committee on revision of the laws in many instances, in fact, in most instances, refused to follow the recommendations of the original commission on revision of the laws, and yet the gentleman has presented here substantially the commission's recommendation for the adoption of the House.

Mr. WATKINS. The gentleman is mistaken. I was on the Committee on Revision of the Laws and was in close touch with the work, and while they did not adopt in all instances the recommendations of the commission, in most instances they did. In one instance, which was the abolition of the circuit court, that was a departure from the general law, and there is no such necessity in this case as there was there. The joint committee of the House and Senate thought it was advisable to abolish the circuit courts, and they recommended that feature, but we do not find a necessity to make any such departure from the recommendation of the commission in this instance.

Besides that, we have found that even when this committee has introduced bills in the House, and those bills, like the first part of the judicial title, had been passed by the House and signed by the President, and afterwards amendments are proposed to these laws, those bills making amendments are usually referred to the Committee on the Judiciary and do not come back to the Committee on Revision of the Laws, and we have construed that as indicating the judgment of the Speaker that it is not the province of this committee to originate laws, and for that reason we have been very discreet, at least extremely cautious, about making any recommendations for the passage of new laws.

Mr. STAFFORD. The gentleman will remember, having been a member at that time of the Committee on Revision of the Laws, that the joint committee in many instances departed from the recommendations of the original commission and incorporated new matter.

Mr. WATKINS. Yes.

Mr. STAFFORD. And in fact, as I remember from the discussion at that time, the joint committee did not consider the recommendations of the original commission as ex cathedra that should be followed, but brushed them aside, merely using them as suggestions as a basis for further investigation.

Mr. WATKINS. Mr. Chairman, those commissioners were very able lawyers—high-priced men, experts in the law.

Mr. STAFFORD. As I recall, there was one gentleman who was quite advanced in years, and whom I regarded as merely occupying a sinecure. In fact, the commission had not done anything of consequence for five years, and Congress terminated it because Congress regarded the whole thing as a sinecure.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. WATKINS. Certainly.

Mr. TOWNER. When reference is made to the report of the commission in the report of the committee, as I understand the gentleman, that means a joint committee of the House and Senate?

Mr. WATKINS. No; we make no reference to the work of the joint committee of the House and Senate. There were three commissioners who were appointed for the purpose of codifying and revising the laws, and they operated, and they were continued over a period of 10 years, from 1896 to 1906, and it is their codification of the laws to which reference is made.

Mr. TOWNER. In the statement made by the committee of which the gentleman is the chairman it is stated that in the performance of its duties the committee has adhered to and followed the recommendations of the Commission to Revise and Codify the Laws.

Mr. WATKINS. That is not the joint committee of the House and Senate, but that commission of lawyers which was appointed for the purpose of codifying these laws.

Mr. TOWNER. What I was going to ask the gentleman is, Does he mean by that that his committee has followed the report of the commission in form or in substance?

Mr. WATKINS. Generally in form. Sometimes we have changed the phraseology in slight degree so as to make it more intelligible, more homogeneous. Sometimes the expressions do

not exactly fit in together from one section to another, and in those instances we have made such changes as we thought were advisable for that purpose, but we have not undertaken to enact any new law on those sections.

Mr. TOWNER. Do I understand that the gentleman or his committee has not had available for their purpose any of the work of the joint committee?

Mr. WATKINS. Substantially none. I have already explained that I was fortunate enough to get hold of part of one of the volumes or pamphlets that they had worked on, and procured the services of the gentleman who had it in charge, and his services we had for about 10 days, possibly 2 weeks, on that work, so that we would have the benefit of it, but that was a very small part of the work.

Mr. TOWNER. So far as these reports are concerned, then, we have not before us at all the benefit of the work of the joint committee?

Mr. WATKINS. No. The committee has not been able to avail itself of that work.

Mr. SMITH of Idaho. Mr. Chairman, will the gentleman yield?

Mr. WATKINS. Yes.

Mr. SMITH of Idaho. At the beginning of the present session of Congress the gentleman will remember that I called upon him and advised him of the fact that all of the data compiled by the joint committee with reference to the chapters subsequent to 14, I think, of the judicial title was available in the library of the Senate.

Mr. WATKINS. Yes.

Mr. SMITH of Idaho. At the close of the last Congress the papers belonging to the joint committee were all turned over to the librarian of the Senate, in order that they might be preserved for reference and use when the work was again taken up, and I do not understand what the gentleman has reference to when he says these compilations are not available.

Mr. WATKINS. Mr. Chairman, I was very much obliged to the gentleman from Idaho for the information which he gave me with reference to the matter, and I endeavored to avail myself of it by sending over, as suggested by the gentleman, to the Secretary of the Senate, and asking for those documents to which my attention was called by the gentleman from Idaho. The Secretary of the Senate very promptly declined to let me have them, because of the fact that they were documents which had been in the possession of, and as he thought belonged to, the joint committee, and not to the separate committee on the revision of the laws. He declined to let me have possession of them. I have not, therefore, availed myself of the suggestions of the gentleman far enough to procure the documents and have not procured them.

Mr. SMITH of Idaho. Mr. Chairman, it is very remarkable that valuable data which has been compiled at great expense by one branch of Congress is not available to any committee that may properly consider matters of that kind. I was assured by the librarian of the Senate that those documents would be turned over to the chairman of the Committee on Revision of the Laws of the House, upon formal application, and that all that he would require would be the receipt of the chairman of the committee.

Mr. WATKINS. I am very much obliged to the gentleman for his interest and the information which he gave to me, and I availed myself of it to the extent of writing to the person designated, who was the man to give authority to the librarian to take the documents out, but he declined to do so.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. WATKINS. Certainly.

Mr. MANN. I do not see how a committee of the Senate, having possession of documents, could turn them over to the gentleman's committee, except for use; but did they decline to permit the gentleman's committee to use the documents, to receive the documents?

Mr. WATKINS. My request was to turn them over to the committee which was doing the work, and that was what the Secretary declined to do. He knew I wanted them for the use of the committee.

Mr. MANN. I suppose if a Senate committee should ask the House file clerk to turn over House files belonging to a House committee he would not do it, but if the committee wanted to examine and use them, that would present a different proposition.

Mr. WATKINS. I do not see how it could refer to anything else except we wanted to use it in connection with the work done by the committee.

Mr. TOWNER. If the gentleman will pardon me, it seems what was asked for and what was understood was a transfer of these papers from the Senate committee to the House committee instead of merely asking for them to be placed at the disposal or for the use of the House committee. Is not that correct?

Mr. WATKINS. I do not remember the verbiage of the order which I signed, but the purport was we wanted to use these documents in connection with the work we were doing on this compilation.

Mr. TOWNER. I do not see how the Senate librarian could possibly refuse the use of these documents to the committee of the gentleman.

Mr. WATKINS. The gentleman's surprise can not be greater than mine when I received the reply.

Mr. TOWNER. It is a very strange thing that a public document prepared at great labor and expense should not be available for the very purpose for which the work was done.

Mr. WATKINS. I will state to the gentleman, however, that this work has been done regardless, and the Committee on Revision of the Laws had had a determination to proceed with the work in spite of the obstacle which was thrown in the way, and they have covered the work which was expected to have been done in part by the joint committee, and which was never finished by that committee because the joint committee was dispensed with or abolished.

Mr. Chairman, I have already taken up much more time in a discussion of this matter than I deemed necessary, because of the fact it is largely work of a clerical character and there is no complication in it to explain.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. WATKINS. Certainly.

Mr. STEPHENS of Texas. I believe substantially the first revision of our laws was in 1878?

Mr. WATKINS. The Committee on Revision of the Laws was appointed in 1868. That was the committee of which B. F. Butler was chairman, and that committee has been in force since that time.

Mr. STEPHENS of Texas. The committee of the gentleman has been acting in this partial revision under the same instructions as the Butler committee?

Mr. WATKINS. Oh, no; it was very limited in its power. Although they were limited much more than the committee now is—because there have been several amendments to the law giving fuller authority, still they originated and had passed many bills which had been referred to the committee and back to the House and passed without their jurisdiction being questioned at all. Still, the law has been amended several times since then.

Mr. STEPHENS of Texas. As I understand the effect of this provision, it is that whenever this revision comes in conflict with prior existing laws of Congress that the revision was the law on which the Congress passed.

Mr. WATKINS. Whenever it shall have been passed by the Congress, but never until that time. But the committee has never had authority to originate an act—to enact it into law. It has always been required to report the bills to the House and let the House pass upon them.

Mr. STEPHENS of Texas. If this bill which the gentleman has reported now becomes the law, and should it be found in conflict with existing law, it would be the law that would govern the Congress?

Mr. WATKINS. The provisions of this bill, if this bill is passed in its present form, will supersede the other law on the same subject matter.

Mr. STEPHENS of Texas. It will act as a repeal of existing laws?

Mr. WATKINS. Yes, sir. Mr. Chairman, I now yield to gentlemen on the other side. First, I would ask how much time have I remaining?

The CHAIRMAN. The gentleman has consumed 45 minutes.

Mr. WATKINS. Then I will reserve the balance of my time.

Mr. BUCHANAN of Illinois. Mr. Chairman, I rise to apprise this House of the urgent necessity of immediate consideration and passage of a resolution introduced by my colleague from Illinois [Mr. O'HAIR]. The resolution I refer to provides for an investigation by the Military Affairs Committee or a subcommittee thereof of the conditions and affairs of the National Homes for Disabled Volunteer Soldiers and Sailors, and so forth, with a view of determining whether or not it is for the advantage and best interests of said homes and the management and conduct thereof that they should be by an act of Congress placed under the management and control of the Department of War.

I have been petitioned for some time past to take up this matter in behalf of the inmates of some of these institutions, and particularly the Battle Mountain Sanitarium, at Hot Springs, S. Dak., but have been too busy about other matters

to do anything about it before this. The matter was brought to a head, however, a few days ago, when three of the inmates of this institution were dropped from the rolls.

I would like to have the attention of Members present to this statement of conditions as reported to me. I am not absolutely sure my opinion is correct, but the information I have states a condition there which seems to me is something that ought to be worthy of the attention and consideration of the Members of this Congress.

I received a letter from one of the gentlemen, part of which is as follows:

> The expected happened this morning. Patients Lacy, Yount, and myself have been expelled from the sanitarium without a moment's notice and without cause. We are sick, without means, and are forced to either beg, steal, or starve away out here, where nobody knows us.

Mr. Speaker, the information I have leads me to believe that the reason these men were expelled from this institution was because they had the audacity to complain of the conditions existing there and were seeking redress. I have often been told that this is the usual custom of the officials of these homes in treating with those who make complaints. These men informed me that they employed every possible means of approaching the authorities with their grievances, but that their appeals fell upon deaf ears; and when it was discovered that they were seeking aid from Members of Congress they were misused, oppressed, and finally dropped from the rolls altogether. At the instance of one of the men just expelled I had the board of managers order an investigation of the conditions of this home last summer. The report made by the investigators was a sort of whitewashed affair, as was expected, but it did result in the discharge of a number of the superintendents complained against and also a momentary improvement in some other respects, showing that there was some ground for the complaints.

Mr. IGOE. Will the gentleman yield?

Mr. BUCHANAN of Illinois. Yes.

Mr. IGOE. What home is the gentleman talking about?

Mr. BUCHANAN of Illinois. The Battle Mountain Sanitarium, South Dakota.

Mr. IGOE. Were these men employees?

Mr. BUCHANAN of Illinois. No; they were inmates there under treatment for tuberculosis.

Mr. GORMAN. Will the gentleman explain how they got in there?

Mr. BUCHANAN of Illinois. These homes are created for the soldiers and sailors. These are soldiers and sailors that have been accepted at these homes, and who were dropped from the rolls.

Mr. GORMAN. These men of which the gentleman speaks at one time were in the naval or military service of the United States; is that the fact?

Mr. BUCHANAN of Illinois. They are Spanish War veterans, I believe. I speak of this matter as whitewash, because when this report was made after this investigation they practically exonerated them, but at the same time admitted that one of the attendants at this place had beat up one of the old soldiers or one of the inmates—one of the soldiers whether old or not, but who was afterwards discharged—saying there was no ground for complaint of these inmates, but admitting that this soldier had been beaten up by one of the attendants.

I have evidence on file in my office, Mr. Speaker, regarding conditions and treatment of patients in this institution that would bring the blush of shame to the face of any patriotic, public-spirited citizen. One of the instances cited to me was that a certain patient complained to the governor regarding some poor food a certain orderly had served him. Instead of investigating the matter properly himself, the governor notifies the orderly that a complaint had been made and at the same time tells him who made the complaint. The result was that the orderly, in connection with one or more of his companions, attacked the patient while he was in bed and severely beat him up. The patient endeavored to secure redress through the governor, but was denied. He filed suit against the orderly on the charge of assault and battery. But when the patient requested the governor to permit several other members of the home who had witnessed the assault to leave the home to testify in the trial the governor flatly refused. I was further informed that the governor brought his influence to bear upon the prosecuting attorney, with the result that the attorney, who previously was very willing to take up the matter, absolutely refused to go on with the case. However, the patient refused to give up the matter, and finally succeeded in getting the case before the judge. The testimony on both sides was presented, and a verdict of guilty was rendered and the defendant fined $15.55.

This clearly shows that the governor in control of this home out there had tried to shield some one who had violated the law and was fined for violating the law by beating up some inmate of this home.

Mr. GOULDEN. Will my friend from Illinois yield?

Mr. BUCHANAN of Illinois. Yes.

Mr. GOULDEN. Has the gentleman the name of that official, the governor in charge of that home?

Mr. BUCHANAN of Illinois. I have the whole thing. I did not bring all the information I have here.

Mr. GOULDEN. If my friend will pardon me, I think that name should go in the RECORD, because any man who does what that man is charged with doing, if true, is unfit to be at the head of any institution in which human beings are cared for, not even one for dogs and cats. I trust that Congress will order an investigation.

Mr. BUCHANAN of Illinois. I will say to my friend that while there is another side to this case, of course, this information that continually comes to me is evidence to me and convinces me that there are so many abuses in this home at Battle Mountain, S. Dak., to interest the Members of this House sufficiently to pass this resolution I speak of at once, and have a real investigation of the matter. I do not know that the investigation will bear out all that I have been informed about. Probably there are exaggerations. No doubt there are. If I would put all before this House that I have received, I expect you would think it was exaggeration.

I have information, Mr. Speaker, that the authorities disregard regulations, that the medical staff is incompetent, and numerous other conditions exist which ought not to be.

The home is for the care of tubercular and other diseased patients, and particular care should be exercised in the treatment of the inmates. However, I am informed that oftentimes foodstuff, such as eggs, apple butter, port wine, and other necessaries, are allowed to run out and some time elapses before they are again supplied. A short time ago I had some tobacco forwarded to me which is furnished to the inmates of this institution. I have a sample of this stuff with me, and it is about the rankest, rottenest stuff I ever saw—not even fit for a goat to chew; yet this is what is furnished tubercular patients at the Battle Mountain Sanitarium.

I want to say that this is the second sample of the tobacco that I have received. The other was worse than this, and if any of the Members wish, they can look at this and see whether it is fit stuff to furnish to anyone.

I have a letter here, too, that is signed by nine of the inmates of this institution, which tells about the tobacco. I would like to have the Clerk read this letter in my time.

The CHAIRMAN. Without objection, the Clerk will read the letter.

Mr. BUCHANAN of Illinois. I might state, before the Clerk reads the letter, that I also had some rotten apples sent to me from out there, as well as other things that are not fit for use by well persons, let alone sick ones. Of course the apples might not have kept well from there here, but I have sufficient information to feel called upon to make this statement to this Congress.

The CHAIRMAN. The Clerk will read the letter.

The Clerk read as follows:

BATTLE MOUNTAIN SANITARIUM,
NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
Hot Springs, S. Dak., January 3, 1914.

Hon. FRANK BUCHANAN, M. C.,
House of Representatives, Washington, D. C.

MY DEAR MR. BUCHANAN: Thanking you for your kind favor of the 10th ultimo, I have the honor to send you for your inspection, under separate cover by parcel post, some chewing tobacco, which was issued to nonpensioners at this sanitarium pursuant to section 262 of the laws and regulations governing the national homes for disabled volunteer soldiers, which provides as follows: "Tobacco will be issued free to such members of the home as receive no income from labor or pension, and who require it for their personal use. The allowance will be 5½ ounces of chewing tobacco or 5 ounces of smoking tobacco for each 10 days, issue to be made trimonthly. Free issue will be denied to any member detected in disposing of his allowance to others."

The tobacco, you will observe, is green with mildew and is a fair sample of the tobacco that has been issued at this sanitarium three times a month since about August, 1913. Now, Mr. BUCHANAN, proper complaint has been made to the governor of this institution, but he has only seen fit to waive the complaint aside by asking the utterly foolish question, namely "Does it taste bad?" Complaint has also been made by different members to the treasurer, who, by the way, is also the quartermaster, acting, as you see, in a dual capacity, having been appointed to the position of quartermaster by the board of managers, vice Capt. Jones, of unsavory reputation, who either resigned or was fired—I am not sure which—because I believe the members of the sanitarium kept up a steady cannonade in his direction ever since you were instrumental in having a board of managers' inspector come out here last summer. I respectfully ask you to exercise your imagination as to what might or can happen when one man, be he ever so honest, be allowed to hold two positions of trust as sanctioned in this case by the infamous board of managers. In the first place, this man, Maj. Stanley, as he is known, being the treasurer of the home, makes all contracts, pays all bills, and then as quartermaster receives all supplies and O. K.'s the bills and issues all the supplies for the use of the home. I tell you, Mr. BUCHANAN, that must be very fine business—that is, for Maj. Stanley. But how does the home and the members fare?

If you will kindly bear with me you shall see. Now, the only satisfaction we the undersigned members could get to our complaints was the statement of the quartermaster that he was powerless to buy new tobacco to replace the moldy, rotten stuff dealt out to us, because he would first have to go to the great trouble of making out papers and getting the sanction of the supreme board of managers away off in New York City, and, further, that when the present stock of moldy tobacco, known as the "Fawn" brand—which, by the way, is not a standard and is entirely unknown to users of tobacco—would run out no more of that brand would be purchased by him. Your honorable sir may draw your own conclusion as to what kind of tobacco it is by considering the following: When the powers that be first issued this particular brand of tobacco I in common with other members tried to exchange it, as we sometimes used to do, with other brands that had been issued to us from time to time and as we were at that time privileged to do, when we would get tired of chewing tobacco and wanted to smoke a cigar; but we were turned down by the storekeeper of the post store, who informed us that henceforth he would not take our chewing tobacco in exchange, he being ordered so to do by the treasurer of the home, because, he explained, it was not a standard brand of tobacco and consequently could not be sold in the post store. In other words, this now rotten and moldy "Fawn" brand was good enough to give to the nonpensioners, but not nearly good enough to be placed on sale at the post store. So, plainly speaking, Mr. BUCHANAN, the charge I wish to make in common with the other comrades, whose signatures are attached to this communication, is that it was and is criminal indifference on the part of the officers of this sanitarium, especially since they were duly notified, to issue such tobacco, the use of which would not only make a well man sick but would certainly kill a sick man, especially when suffering from tuberculosis.

To give you a better idea as to what extremes these incompetent officers will go to, they, even after being informed as to the condition of this tobacco—which even no self-respecting goat would have anything to do with—deliberately added insult to injury by attempting to palm off on us that kind of tobacco by first putting it through some renovating process, which resulted in changing its appearance, and removed the tags and labels therefrom.

I submit to you, Mr. BUCHANAN, should we be forced to continue to suffer the infliction of such rough stuff as that above mentioned, and a lot of other outrages, as for example, was inflicted on myself on December 31, 1913, by one of the incompetent nurses, who in treating one of my sore eyes carelessly dropped some poisonous solution on the outside lid of my left eye, which is still sore and inflamed, and which would, I have no doubt, blinded me for life if luck did not favor me by it having dropped on the outside of the eyelid instead of on the inside, along with the undefiled bunk which is continually being handed us in the guise of a cure for our troubles by the present management of this sanitarium, backed up by as noble a band of love-labor patriots as ever scuttled a ship, known as the board of managers, who are past masters in the art of whitewashing.

So we, the undersigned, beg of you in God's name and that of suffering humanity in these homes to get busy and earnestly seek the cooperation of the other honorable men in Congress to put an end to the insufferable conditions as obtain in these soldiers' homes, not by putting these matters up to the board of managers, who only vent their spleen on us poor devils by giving us the gate, but by abolishing the board altogether, and then promulgate some plan whereby the men who have made this Nation possible will be enabled to secure justice.

Thanking you again and again for past favors and awaiting your further efforts in our behalf, I, sir, beg to remain,

Most cordially, yours,

ANTHONY H. WALICH.

P. S.—We would especially respectfully request that you take up this matter of the tobacco with the Committee on Military Affairs in the House, and when you examine the tobacco just simply break it, instead of using a knife to cut it, which will enable you to see the true condition of the same.

A. H. W.	JOHN H. YOUNT.
JOHN COOPER.	GEORGE COSSEBOOM.
ADOLPH ABELS.	JAMES H. LACY.
C. B. KLINGMAN.	HENRY L. HENRYSEN.
JOHN F. LINAHAN.	

Mr. BUCHANAN of Illinois. Now, Mr. Chairman, since receiving that letter I have received a number of others, and have been informed that those who have been making the complaints have been dropped from the rolls, and those three who wrote me about being expelled from the home it seems have secured some vacant building there that is very poorly furnished, and they are being kept by the town authorities until such time as these matters can be investigated. It is only temporary, anyway. At least, they are subject to charity, have got nothing, are sick, and have been put out of this home. As I stated before, I do not know what the facts are in regard to the matter, except from the source of this information, which seems to me is sufficient for this Congress to be willing to have the Committee on Military Affairs make this investigation. I hope in the very near future that this resolution, introduced by my colleague, Mr. O'HAIR, will be taken up and acted upon.

I now yield 25 minutes to the gentleman from North Carolina [Mr. POU] and reserve the balance of my time.

The CHAIRMAN. The gentleman from North Carolina [Mr. POU] is recognized for 25 minutes.

Mr. POU. Mr. Chairman, at this moment this Republic is praying for peace. This is the twentieth century and the people of this Nation abhor war. The man who thinks the American people will tolerate war, save as a last resort, is woefully mistaken.

The other day at Vera Cruz we were suddenly reminded of the real meaning of war. Oh, how thankful all good men are that to-day the sky is a little brighter, that the hope for peace is a little stronger.

Perhaps it is better that those dead soldiers of the Republic yielded up their lives in line of duty away from home and friends. The tragedy of it all is not so heartrending. Had they died at home there would have been the hush of the death chamber broken only by the low wail of anguish of dear ones. The flowers would have been there; the funeral procession would have moved on keeping time to slow toll of the church bell. Friends would have gathered around a new-made grave. The sobs and cries of mother, brother, and sister would have died away while the choir sang "Nearer, My God, to Thee," or "Lead Kindly Light"; the minister of God would have been there leading in performing the last sad rites; and, Oh, there would have been that last sad, piercing wail from the boy's mother as the first clod fell upon the lowered coffin.

Mr. Chairman, I repeat it is not so distressing that these brave boys died away from home. Let us hope that this first skirmish at Vera Cruz will so arouse the people of this Nation and of Mexico to a true realization of what real war between the two nations means that both shall strive even harder not for war but for honorable peace. [Applause.]

Mr. Chairman, just here I can not help reminding you how unfair, how unjust, yes, how cruel have been some of the attacks made upon the President upon this floor. With infinite patience the President has been using every ounce of influence wielded by his great office not for war but for peace. And because he did not rush headlong into a bloody war they said his policy was weak, vacillating, and un-American. When the breaking point came and he could stand the insults and affronts to our national honor by a usurper no longer, it was actually charged on this floor that President Wilson was about to engage in war with Mexico because he does not like Gen. Huerta. Mr. Chairman, no more serious charge could have been brought against any President. If that charge were true, he should be impeached. If the gentleman who brought the charges believes it is true, he should take the initial step in instituting proceedings of impeachment. If the charge is not true, I appeal to the judgment of my colleagues here to decide what course should be pursued by those responsible for this attack on the President.

The entire course followed by the President from the very beginning shows how baseless the charge is.

Mr. McKinley was driven to war with Spain under somewhat similar circumstances. You will search the record in vain for such a charge against him. For my part I do not believe this Nation has ever had a President who would have been guilty of such a charge. But, Mr. Chairman, I do not believe the President will suffer any injury to the lofty reputation he has maintained and is maintaining by reason of any of these baseless charges. I believe this man is appreciated by the American people; at least one man has written an appreciation which is well worthy of repetition here. I clipped this, Mr. Chairman, yesterday from the News and Observer of Raleigh, N. C.:

OUR PRESIDENT.

[Editorial by William Allen White in Emporia (Kans.) Gazette.]

How well he seems to have managed it—this sordid business of going to war; how fair he has been; how patient, how dignified, how infinitely gentle and kind. No bluster, no threats, no snicker of anticipation; no licking of the Nation's chops—just a simple-souled, brave, soft-hearted, hard-headed man. It is sad enough to go into war of any kind at any time, but it is less sad to go knowing that every honorable means has been taken to keep away from war. And this consolation President Wilson has given us by his wise, forbearing, Christian attitude before the provocation of a foe, mad and desperate and foolish.

The good God, who knows all and watches over all, and sees all, and directs all, was in our hearts deeper than we knew when as a Nation we chose this great, serene soul to lead us.

There is, I think, even a better description of the President in the lines which, if I remember them correctly, run this way:

An hour like this demands strong minds,
Great hearts, true faith, and ready hands,
Men whom the lust of office does not kill;
Men whom the spoils of office can not buy;
Who possess opinions and a will,
Who have honor and who will not lie,
Men who can stand before the demagogue
And scorn his treacherous flattery
(And unfair abuse parenthesis mine) without winking,
Tall men, sun crowned, who live above the fog,
In public duty and in private thinking.

[Applause.]

Mr. Chairman, the President will continue his efforts for honorable peace. If we must have war, it will come when every honorable effort known to civilized diplomacy has failed.

The sunflower, with face upturned, greets the rising sun, follows the god of day across the vaulted skies, and, with head bowed low, bids him adieu as he sinks below the western sky line.

The President of this great Nation, with uplifted face, reverently follows the Son of Righteousness. He is leading in the prayer of a Christian people for peace. Let us all hope—oh,

we all do hope—that the prayer of this great civilized Christian Nation, this prayer for peace, led by the President himself, like sweet incense will ascend up to the great white throne of God. [Loud applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. GORMAN having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 2314. An act for the relief of Allen Edward O'Toole and others, who sustained damage by reason of accident at Rock Island Arsenal.

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture," and the message of the Senate agreeing to the conference report thereon.

REVISION OF THE LAWS RELATING TO THE JUDICIARY.

The committee resumed its session.

Mr. BUCHANAN of Illinois. Mr. Chairman, how much time have I left?

The CHAIRMAN. Twenty-five minutes.

Mr. BUCHANAN of Illinois. I yield 20 minutes to the gentleman from Washington [Mr. BRYAN].

The CHAIRMAN. The gentleman from Washington [Mr. BRYAN] is recognized for 20 minutes.

Mr. BRYAN. Mr. Chairman, I desire to make a few remarks, but I did not expect it to come on for a few minutes yet; but I suppose I had better take the time now.

The proposition that I have in mind is the coal-strike war in Colorado and some events that have developed in connection with that proposition.

Surely the situation in Colorado should startle the American people into consideration of the problems involved. We have had a tremendous agitation all over this country. Some of the structural steel sympathizers conducted a campaign by dynamite and blew up a reactionary newspaper man's plant. That was an awful crime. To-day both sides are engaged in civil war in Colorado. John D. Rockefeller, in his robes of piety, is causing defenseless women and children and hard-working men to be shot to death, and miners are dealing death and destruction to State guards called by the tarred hands of a corrupt political organization to make the men do the bidding of the Standard Oil magnate.

This master of Standard Oil raises his voice for the open shop, yet he stands a criminal violator of the Sherman antitrust law of the very first magnitude. He has done more against the principle of open competition among manufacturers, railroads, and big producers than any man in the world, with the tentacles of his octopus, the Standard Oil Co., extending throughout all the nations of the world. They cured the dynamite situation by convicting a lot of men and condemning them to terms of imprisonment. Who will say that the Rockefellers are not as great criminals in thus slaughtering innocents in order to avoid recognizing the union organized by these workingmen?

This is not a new problem; it is only an aggravated phase of the same problem the people have had before them, lo, these many years.

The country has for a long time been confronted with propositions involving the coal supply of the country, the alleged agreements between railroads and other great interests as to the controlling of the coal supply and the price of fuel by increasing railroad rates, and by monopolizing the coal supply of the country.

Very recently Senator TILLMAN introduced in the Senate a resolution calling for the investigation of certain conditions that were alleged to exist along the Atlantic seaboard, and especially in the Southern States, and in that resolution he sought to investigate allegations which charged the Southern Railway and the coal interests with making combinations that prevented the railroads from obtaining a reasonable revenue on the transportation end of their business, but increased greatly the revenues of the so-called Coal Trust, the owners of the coal, who no doubt are also the owners of the railroad. Here are some of the things the resolution demanded:

Why the Southern Railway has built no wharves or made no provision for handling tidewater coal at any of the South Atlantic ports, and whether the riparian rights and water frontage of South Atlantic harbors is not now being bought up by the parties in the interest of the Coal Trust, while the Southern Railway is taking no active steps to build for itself an independent outlet.

Whether trustees for the stockholders and members of the board of directors of the Southern Railway are financially interested in coal-mining industries on the Pennsylvania Railroad system, the Baltimore & Ohio, the Norfolk & Western, or the Chesapeake & Ohio, and to what extent; and whether they, or any of them, are financially interested in any coal-mining industries tributary to any of said railways. And if found to be interested, ascertain whether such mines have been allowed preference or advantages not allowed to all other shippers (shown by cases already decided by the Interstate Commerce Commission or State commissions). And in all coal-mining operations tributary to the Southern Railway in which any director of the Southern Railway or director of any railroad controlled by it, or allied with the Southern Railway, is financially interested, ascertain the division of through rates with other railroads, and in all cases where a coal operation tributary to the Southern Railway controls a local railroad, or when such local railroad is controlled in common with a coal operation, for assembling and distributing its own coal, ascertain just what proportion of rates it receives, if any, from the carriers, or what compensation other than a division of the rates it may receive.

Whether the rate making for the Southern Railway, or other southern carriers of coal, is dominated by the Pennsylvania Railroad or Norfolk & Western; or whether the freight rates of the Southern Railway and any of the other southern coal carriers are made and fixed and maintained by the traffic men of the Southern Railway and other southern carriers; or whether the Pennsylvania Railroad, the Norfolk & Western Railway, the Baltimore & Ohio, and Chesapeake & Ohio exercise any influence, either through a rate-making or traffic association or otherwise, in the matter of making the rates for the Southern Railway and other southern carriers.

Whether or not there is any discrimination now existing in favor of any one port on the Atlantic seaboard as against another port, and, if so, in what does such discrimination consist; and whether or not any coal trust or combination of railroads and coal companies control the coal tonnage to any port or ports, and, if so, how; and whether or not the coal supply of West Virginia, Virginia, Pennsylvania, Tennessee, and Kentucky flows naturally and without unnecessary obstruction to their respective natural ports upon the Atlantic seaboard; and whether or not there is any discrimination in rates against any coal operators.

The coal rates to 30 or more representative cities on the Southern Railway in Virginia, North Carolina, South Carolina, Georgia, and Florida, and compare these rates with the rates enjoyed by the cities of relative importance and location, with regard to mines, in Pennsylvania, Ohio, Indiana, and Michigan on the Pennsylvania Railroad system, including the cities whose rates are compared in the letter read into the CONGRESSIONAL RECORD by Senator TILLMAN on April 8.

What actual ownership each director of the Southern Railway Co. has in that company, and what ownership, if any, is held in it by the individuals composing the trustees for the stockholders.

That resolution being offered, Senator TILLMAN introduced a letter from Mr. B. L. Dulaney, whom he represented to the Senate as being an authoritative person on these matters. In that letter he published a list of rates, showing the grossest kind of discrimination in certain territories and certain areas, and he raised the question of wharfage and wharfage facilities for the marketing of coal in that particular section and demonstrated, so far as the authority of the letter went, the fact that these agreements intend to exact exorbitant toll from the people for coal, one of the necessities of life, monopolized by a few men in this section.

I here cite a portion of Mr. Dulaney's letter:

MARCH 25, 1914.

Senator B. R. TILLMAN,
Washington, D. C.

DEAR SIR: The most important question to the industrial world is transportation. By the control of the transportation of this country one can build up or break down any section regardless of its natural advantages. It is well known that the transportation of this country is controlled by a small group of financiers, mainly in New York. But while they control the transportation of the whole country, their ownership of industrial enterprises is limited to certain parts of the country, as, for example, the coal industry of Pennsylvania and some other sections; and hence the flagrant abuses in the practices of rate making to favor their own coal and to destroy the independent coal mines.

In the matter of coal freight rates, I think the most abused States in the Union are North Carolina, South Carolina, Georgia, Florida, and a portion of Virginia. The industrial progress of these States has been in spite of the high cost of fuel transportation, and it ought to be clear to everyone of intelligence that general manufacturing can not prosper until transportation conditions have been corrected. By an examination of the rate sheets, open to all, it will be seen that the average manufacturer located on the Pennsylvania system, for example, pays from 30 to 60 per cent less freight on fuel than is paid by the average manufacturer on the Southern Railway—that is, for haulage for equal distance. For example:

Compare rates to Columbus, Ohio, with rates to Columbia, S. C.:

	Miles.	Rate.
To Columbus from Pocahontas	334	$1.15
To Columbia from Appalachia	318	2.25

Compare rates to Toledo, Ohio, with rates to Savannah, Ga.:

	Miles.	Rate.
To Toledo from Pocahontas	456	$1.45
To Savannah from Appalachia	471	2.10

Compare rates to Cincinnati, Ohio, with rates to Lynchburg, Va.:

	Miles.	Rate.
To Cincinnati from Pocahontas	340	$1.10
To Lynchburg from Pocahontas	169	1.50

Compare rates to Cleveland, Ohio, with rates to Charleston, S. C.:

	Miles.	Rate.
To Cleveland from Pocahontas	472	$1.35
To Charleston, S. C., from Appalachia	447	2.05

Compare rates to Dayton, Ohio, with rates to Winston-Salem, N. C.:

	Miles.	Rate.
To Dayton from Pocahontas	364	$1.35
To Winston-Salem from Pocahontas	239	2.10

Compare rates to Indianapolis, Ind., with rates to Augusta, Ga.:

	Miles.	Rate.
To Indianapolis from Pocahontas	449	$1.65
To Augusta from Appalachia	401	2.20

Compare rates to Detroit, Mich., with rates to Charlotte, N. C.:

	Miles.	Rate.
To Detroit from Pocahontas	505	$1.60
To Charlotte from Appalachia	305	2.25

Where there are two or more routes the short mileage is used.

The evident purpose of these high rates, especially to the coast towns and cities, is not to raise revenue for the Southern Railway, but to prohibit the movement of coal by it from the mines on its own rails to tidewater, for if the independent coal shippers had access to tidewater with proper coal-loading facilities there would be competition with the Coal Trust from Florida to Maine as well as in the export business.

* * * * * * *

I believe that a thorough investigation will show that the abnormally high local rates throughout the Southern territory are due in a large measure to the need of revenues to meet such purchases and to the inflation of capital and bond issues caused thereby.

I believe that an investigation will show the existence of a secret rate-making association, and that all important freight rates in the territory in question are dominated by the Pennsylvania Railroad greatly to the detriment of all the other railroad involved and unfair to the country they traverse.

I believe that an investigation properly conducted will show that the men who control the Southern Railway have practically no investment either in the Southern Railway itself or in the territory served by it, except in a small portion of Virginia and Alabama.

* * * * * * *

Very truly, yours,

B. L. DULANEY.

Here we have one feature of the organized conspiracy to get the tribute from the people by this company of philanthropists who are prating about open shop. They do not stand for open shop in their line. Not a bit of it.

THE WEST VIRGINIA PAINT AND CABIN CREEK SITUATION.

We have recently had under consideration the West Virginia situation, where the Constitution was suspended, where the statutes of the State were suspended, and where, by edicts and judgments of martial law, men were committed to prison for terms of from one to seven years at hard labor for violations of the rules of the governing board, the court-martial board, without preliminary hearing, without jury trial, or judicial decree of any kind, and such proceedings were indorsed by the governor and sustained by the Supreme Court of West Virginia. There was power enough in the West Virginia coal interests to influence the supreme court of that State to render a decision that will plague these judges in the time to come. I do not think the judges were corrupted in the ordinary sense, but the slimy hands of the coal interests so impressed and hypnotized the weak men who composed that court that the majority decided that the law was suspended, the State and Federal Constitutions were temporarily abrogated, and that human liberty and the Bill of Rights did not have to be regarded or respected for the time. The writ of habeas corpus was "ordered" out of existence. The majority opinion said the right to undo and wipe out all constitutions and laws was "inherent" in the officers, an inherited—come from above—Divine right under cases of emergency and necessity, such as were presented by the coal barons of West Virginia in their effort to force these men back to work without recognizing the unions. If you doubt what I say, get a copy of Senate Document 43, Sixty-third Congress, and read the decision for yourself. The dissenting opinion of Justice Robinson arraigned the misguided and oath-forsaking majority of the court more strongly than I can here arraign them. He said:

The majority opinion boldly asserts that the sacred guarantees of our State constitution may be set aside and wholly disregarded on the plea of necessity. It had long been supposed that such a doctrine was forever condemned and foreclosed in this State. It was believed that the ringing denouncement against that doctrine in the opening sentences of our constitution was sufficient to bar it from recognition by any citizen, official, or judge.

* * * * * * *

A decision based on that which our people have so clearly condemned and inhibited from recognition in our State government, and which the highest tribunal in the land has so plainly declared to be pernicious and to have no place in our form of government, meets my emphatic dissent.

* * * * * * *

The principle of martial law can not be inherently connected with any constitutional government in which the constitution itself directly declares against the principle, as our Constitution does.

The Coal Trust was bigger than the Constitution. We thought we had our constitutional rights safeguarded by requiring the judge to take a solemn oath to obey and support the Constitution. But here was the exercise of the plainest kind of mental reservation, so far as the coal barons were concerned.

Not only were these private coal interests big enough and powerful enough to make these judges put their oaths and the Constitution behind them, but they were big enough to corrupt and suborn the entire machinery of government, and amid unrestrained lawlessness and murder to bully men and women into compromises and surrenders that were beneath self-respect.

So much for the Paint and Cabin Creek proceedings, so fresh in the minds of us all; but the present system of mining and marketing coal was said to demand such things. Is there not something rotten wrong about such a system? We must have coal, or we will shiver with cold and die from starvation; so if the present system can not be improved on and it becomes a case of preserve our Constitution or die, the decision will likely most generally be on the side of life.

But let us see some more about the present system.

Again to-day we were startled and saddened with the report in the newspapers of an awful disaster in the coal mines at Eccles, W. Va., whereby some 203 people lost their lives. The report says to-day:

Two hundred and three men perish in blazing mines. All hope abandoned for West Virginia miners.

The report sets forth that for some reason or other in the operation of that mine these 203 people are blown or burned into eternity.

Two carloads of coffins ordered last night from Cincinnati are expected during the day.

If each miner represents 5 dependents, you have over 1,000 widows and orphans. Will they be properly paid for the loss of him on whom they depended? No. The widows will mourn and the children will go about the streets or will go to work in the mine, and the Rockefellers will teach their Sunday-school classes and try to explain what Christ meant when He said:

It is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of heaven.

But the same old system will continue until the people of this country devise a new one; the Rockefellers will not help find a better way; oh, no; they will glibly talk away about their own consciences and will give a small percentage of their ill-gotten lootings to universities and to charities, and will continue to fraudulently carry elections, when necessary, to influence officers and control courts and browbeat and bully men until they have lost their self-respect.

If word were to come to-night of the massacre of a dozen Americans by mobs in Mexico City, public sentiment in this country would demand the life of the Mexican dictator; but for this appalling toll in West Virginia we only catch our breath and take it as a matter of course.

Why are our mines operated with such slight regard for human pain and suffering and for human life? Because Rockefeller and the coal interests value dollars more than the lives of men. Dollars will buy more men, so they save the dollars and leave the men to their fate. It has been pointed out repeatedly, until it has become a notorious fact, that American coal mining is about three times as dangerous as coal mining in European countries. I have not the figures and do not claim ability to make accurate statement as to this feature, but it is all wrong that such loss of life should exist.

In 1911 there were 728,348 persons employed in the mining of coal in the United States. Of this number 2,719 were killed in mining accidents in that one year, besides many who died from occupational diseases. Certain mines owned by the big interests were the most fatal of all. The figures quoted show an average death rate in the coal mines of the United States from accidents in 1911 of 3.73 per 1,000 employees. In Colorado, where child labor is reduced to the minimum and where the death rate under humane methods should be the lowest, the figures show there were 6.33 per thousand employees to lose their lives from accidents in 1911, nearly twice the general average.

THE COLORADO WAR SITUATION.

Look again at the situation in Colorado. We must have coal, I will admit, but we do not have to perpetuate the present system of mining and distributing it. If there had been as many killings of Americans under Huerta in Mexico as under Rockefeller in Colorado, American soldiers would raise the cry of "On to Mexico," and Huerta would pay the penalty with his own head if he could be connected with the slaughter even half as remotely as Rockefeller can be connected with the slaughter of the last few days in Colorado.

It is recognized that no matter what position we take as to the merits of the parties to the controversy, the fact remains that there is an intolerable condition in the State of Colorado. The fact remains that it is the duty of this Congress, the duty of the lawmaking power of this country, to do something to permanently change those conditions and make their repetition impossible. It does not take a seer or a prophet to proclaim the fact that things of that kind can not continue to prevail, that that kind of method in the mining of coal and in the

handling of the fuel of the country can not exist permanently, and that some remedy must be applied.

Mr. SMITH of Minnesota. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Minnesota?

Mr. BRYAN. Yes; I yield to the gentleman.

Mr. SMITH of Minnesota. What do you suggest, Mr. BRYAN, as the proper remedy?

Mr. BRYAN. I will come to that later.

The condition is such in Colorado that the governor admits that the State can not handle the situation; that, having heard from the county officers, the county officers can not enforce the law or preserve order. And so the conditions and the rules surrounding the mining of coal in Colorado, the modus operandi, is such that the county authorities and the State authorities can not prevent men and women from being shot down, and the Federal Government, with its Army and the President as Commander in Chief of the Army, is necessarily called into that zone to put an end to murder, to civil war, and the commission of all kinds of lawlessness.

Mr. COOPER. Mr. Chairman, will the gentleman permit an interruption?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Wisconsin?

Mr. BRYAN. Certainly; I yield to the gentleman.

Mr. COOPER. Has the gentleman commented on the fact that was narrated to the House here the other day by the gentleman from Illinois, Dr. FOSTER, that the strikers, many of them, went there originally as strike breakers, and they allege that the conditions are so intolerable that they, the original strike breakers, can not endure them longer?

Mr. BRYAN. I have not commented upon that, but I am glad to have that brought to the attention of the Members present. When you cut under the surface you will find all men have hearts and that brotherhood is more than fiction.

In connection with this it is worthy of note, although a diversion, that the State of Colorado has, through its governor, just recently made another appeal to the United States Congress and to the people of the country. Gov. Ammons has suggested that the rights of the State of Colorado are about to be violated by the Federal Government exercising its right in the management of water-power sites and in the management of the resources of all the people in the forest and water-power rights which the country still owns within the domain of the State of Colorado.

If the people of Colorado had pursued a different kind of policy when the resources in fuel and coal and forest which the United States Government, the people of the United States, owned within that territory were being taken away by certain interests and certain people, if they had then looked at the matter from a different viewpoint, and had attempted to save those resources for all the people instead of cinching them for a few, I believe that the conditions would be different; and I believe that the movement in the State of Colorado now to hamper and oppose the idea of conservation, and the idea of preserving those resources and preventing a few from taking possession of them, is really one of the causes, one of the very origins, of this very condition that exists at this time. Such a disposition to disregard the public rights for the favored few must necessarily engender a weak form of public trust and promote lawless ideas and methods in the representatives of big business and others who may have the ability to get in on the grabbing.

Mr. SELDOMRIDGE. Is the gentleman familiar with the fact that the corporation known as the Colorado Fuel & Iron Co., which is one of the factors in this controversy, largely controls its holdings in southern Colorado through the purchase of Mexican land grants, the titles to which were confirmed by the Government when it took over the territory under the treaty of Guadaloupe Hidalgo, and that the coal lands which it operates are largely located upon land that the Government of the United States never owned, and therefore never transferred; so that the remarks of the gentleman along the line of conservation have no relation whatever to the present difficulty, which is not the outgrowth of any surrender over this land on the part of the State, the land having been acquired by purchase and not from the General Government?

Mr. BRYAN. The reference I made was an incidental reference, and I said it was a diversion; but in the State of Colorado within the last few years they have sent to the United States Senate, for instance, Mr. Guggenheim to represent the people of that State. So I say that the liberal spirit of the people of Colorado toward these interests, and the liberal way in which the legislature and the judges and the courts have acted toward special interests, as has been detailed by Judge Lindsay and others, are the real and prolific sources of the present condition of lawlessness, and that liberal spirit has exerted itself and exhibited itself in opposition to conservation to a more marked extent than in any other particular line.

But the other day there appeared before the Committee on Mines and Mining, investigating this question, young Mr. Rockefeller, and in explaining the situation and his responsibility he made this statement:

> Mr. Chairman, in these days, where interests are so diversified and numerous, of course it would be impossible for any man to be personally responsible for all of the management of the various concerns in which he might be a larger or smaller stockholder. It would be simply impossible to do that, and all that any man can do is to find the ablest men that he can find and put the responsibility squarely on them.

So under that theory and that idea the Rockefeller interests and John D. Rockefeller personally have gained possession of these vast resources. I do not know what the chain of title is, nor do I care; but he has gotten possession of those tremendous properties and he farms them out. He sends some man out there to run the vast enterprise, gives him a salary, and tells him to make returns, show results in dollars; and under that kind of a system, under that kind of a method of operation, we come upon all of these difficulties. I believe that the time has come for the United States Government to exercise more authority over institutions and over corporations and over individuals that control the great resources of life. Men who have in their hands and under their control the coal supply of this country ought to be made to realize and know the law of the land and the spirit of justice that prevails in the land. They ought to be required to bow before some regulating authority, some power within the Government that can tell when they are wrong and when they are right. A controversy out there between the miners, the operatives in these mines and the employees, becomes a matter of national concern, a matter that affects all the people, involving as it does one of these great resources of life.

Mr. JOHNSON of Washington. I desire to ask my colleague if he remembers that Shakespeare in King Henry VI made Jack Cade say:

> There shall be in England seven halfpenny loaves sold for a penny, the three-hooped pot shall have ten hoops, and I will make it a felony to drink small beer; all the world shall be in common, and in Cheapside shall my palfrey go to grass.

That was some three hundred-odd years ago, and it sounds like an up-to-date speech of to-day. Seriously, however, I want to ask the gentleman also if he has read the written statement signed by Mr. Rockefeller, published this morning, explaining the exact number of shares of his company, his proportionate holdings in that Colorado property?

Mr. BRYAN. If this was a legal proceeding, I should demur to the gentleman's question on the ground of misjoinder. I hardly see how the gentleman's two questions have any relation to each other—the quotation from Shakespeare and the suggestion about Mr. Rockefeller. But I will say to my colleague that I have seen Mr. Rockefeller's statement.

I have introduced a bill that provides my remedy for this, and now I will answer the question of the gentleman from Minnesota [Mr. SMITH]. A few years ago, during the Roosevelt administration, there was a great coal strike in Pennsylvania, and Theodore Roosevelt laid down a plan of operation in that district. It happened that the whole controversy was settled before the well-laid plans of the President were put into effect, but those plans involved the taking possession of the mines by the Government, and the operation of the mines by putting to work everybody connected with their operation who was needed and continuing the business by the Government exactly as a receiver of a private corporation would continue it, until law and order and regular procedure were instituted.

Of President Roosevelt's activity in this great emergency, Woodrow Wilson, historian, in Epochs of American History, page 355, says:

> By the President's mediation in the great anthracite coal strike in October, 1902, the country was instructed to recognize that dangerous insolence of aggregated capital, that heedlessness of public rights, which is signified by the term "plutocracy."

How did he teach the country "to recognize that dangerous insolence of aggregated capital"? Let us see, and let us hope that President Wilson learned the lesson and that he will gather himself together and apply the lesson in the present emergency—an opportunity it seems he is about to let slip. The plan of President Roosevelt, with all its details, are so applicable to the present situation that I give them in full from his own pen in "Chapters of a possible autobiography":

> The great anthracite strike of 1902 left an indelible impress upon the people of the United States. It showed clearly to all wise and far-seeing men that the labor problem in this country had entered upon a new phase. Industry had grown. Great financial corporations, doing a

Nation-wide and even a world-wide business, had taken the place of the smaller concerns of an earlier time. The old, familiar intimate relations between employer and employee were passing. A few generations before the boss had known every man in his shop; he called his men "Bill," "Tom," "Dick," "John"; he inquired after their wives and babies; he swapped jokes and stories and, perhaps, a bit of tobacco with them. In the small establishment there had been a friendly human relationship between employer and employee.

There was no such relation between the great railway magnates, who controlled the anthracite industry, and the 150,000 men who worked their mines, or the 500,000 women and children who were dependent upon these miners for their daily bread. Very few of these mine workers had ever seen, for instance, the president of the Reading Railroad. Had they seen him many of them could not have spoken to him, for tens of thousands of the mine workers were recent immigrants who did not understand the language which he spoke and who spoke a language which he could not understand.

Again, a few generations ago, an American workman could have saved money, gone West, and taken up a homestead. Now the free lands were gone. In earlier days a man who began with pick and shovel might have come to own a mine. That outlet, too, was now closed, as regards the immense majority, and few, if any, of the 150,000 mine workers could ever aspire to enter the small circle of men who held in their grasp the great anthracite industry. The majority of the men who earned wages in the coal industry, if they wished to progress at all, were compelled to progress not by ceasing to be wage earners, but by improving the conditions under which all the wage earners in all the industries of the country lived and worked, as well, of course, as improving their own individual efficiency.

INEQUALITY IN BARGAINING FOR LABOR.

Another change which had come about as a result of the foregoing was a crass inequality in the bargaining relation between the employer and the individual employee standing alone. The great coal-mining and coal-carrying companies, which employed their tens of thousands, could easily dispense with the services of any particular miner. The miner, on the other hand, however expert, could not dispense with the companies. He needed a job; his wife and children would starve if he did not get one. What the miner had to sell—his labor—was a perishable commodity; the labor of to-day, if not sold to-day, was lost forever. Moreover, his labor was not like most commodities, a mere thing, it was part of a living, breathing human being. The workman saw, and all citizens who gave earnest thought to the matter saw, that the labor problem was not only an economic but also a moral, a human problem. Individually the miners were impotent when they sought to enter a wage contract with the great companies; they could make fair terms only by uniting into trade unions to bargain collectively. The men were forced to cooperate to secure not only their economic but their simple human rights. They, like other workmen, were compelled by the very conditions under which they lived to unite in unions of their industry or trade, and these unions were bound to grow in size, in strength, and in power for good and evil as the industries in which the men were employed grew larger and larger.

A democracy can be such in fact only if there is some rough approximation to similarity in stature among the men composing it. One of us can deal in our private lives with the grocer or the butcher or the carpenter or the chicken raiser, or, if we are the grocer or carpenter or butcher or farmer, we can deal with our customers, because we are all of about the same size. Therefore a simple and poor society can exist as a democracy on a basis of sheer individualism; but a rich and complex industrial society can not so exist, for some individuals, and especially those artificial individuals called corporations, become so very big that the ordinary individual is utterly dwarfed beside them and can not deal with them on terms of equality. It therefore becomes necessary for these ordinary individuals to combine in their turn, first in order to act in their collective capacity through that biggest of all combinations called the Government, and, second, to act, also in their own self-defense, through private combinations, such as farmers' associations and trade-unions.

PROPERTY RIGHTS AND HUMAN RIGHTS.

This the great coal operators did not see. They did not see that their property rights, which they so stoutly defended, were of the same texture as were the human rights which they so blindly and hotly denied. They did not see that the power which they exercised of representing their stockholders was of the same texture as the power which the union leaders demanded of representing the workmen who had democratically elected them. They did not see that the right to use one's property as one will can be maintained only so long as it is consistent with the maintenance of certain fundamental human rights, of the rights to life, liberty, and the pursuit of happiness, or, as we may restate them in these later days, of the rights of the worker to a living wage, to reasonable hours of labor, to decent working and living conditions, to freedom of thought and speech and industrial representation; in short, to a measure of industrial democracy and, in return for his arduous toil, to a worthy and decent life according to American standards. Still another thing these great business leaders did not see. They did not see that both their interests and the interests of the workers must be accommodated and, if need be, subordinated to the fundamental permanent interests of the whole community. No man and no group of men may so exercise their rights as to deprive the nation of the things which are necessary and vital to common life. A strike which ties up the coal supplies of a whole section is a strike invested with a public interest.

THE INTERVENTION THAT NEVER HAPPENED.

So great was that public interest in the coal strike of 1902, so deeply and strongly did I feel the wave of indignation which swept over the whole country, that had I not succeeded in my efforts to induce the operators to listen to reason, I should reluctantly but none the less decisively have taken a step which would have brought down upon my head the execrations of many of the "captains of industry," as well as of sundry "respectable" newspapers who dutifully take their cue from them. As a man should be judged by his intentions as well as by his actions, I will give here the story of the intervention that never happened.

While the coal operators were exulting over the fact that they had "turned down" the miners and the President, there arose in all parts of the country an outburst of wrath so universal that even so naturally conservative a man as Grover Cleveland wrote to me expressing his sympathy with the course I was following, his indignation at the conduct of the operators, and his hopes that I would devise some method of effective action. In my own mind I was already planning effective action; but it was of a very drastic character, and I did not wish to take it until the failure of all other expedients had rendered it necessary. Above all, I did not wish to talk about it until and unless I actually acted. I had definitely determined that somehow or other act I would, that somehow or other the coal famine should be broken. To accomplish this end it was necessary that the mines should be run, and, if I could get no voluntary agreement between the contending sides, that an arbitration commission should be appointed which would command such public confidence as to enable me, without too much difficulty, to enforce its terms under both parties. Ex-President Cleveland's letter not merely gratified me, but gave me the chance to secure him as head of the arbitration commission. I at once wrote him stating that I would very probably have to appoint an arbitration commission or investigating commission to look into the matter and decide on the rights of the case, whether or not the operators asked for or agreed to abide by the decisions of such a commission; and that I would ask him to accept the chief place on the commission. He answered that he would do so. I picked out several first-class men for other positions on the commission.

ORDER UNDER A MILITARY RECEIVERSHIP IF NECESSARY.

Meanwhile the governor of Pennsylvania had all the Pennsylvania Militia in the anthracite region, although without any effect upon the resumption of mining. The method of action upon which I had determined in the last resort was to get the governor of Pennsylvania to ask me to keep order. Then I would put in the Army under the command of some first-rate general. I would instruct this general to keep absolute order, taking any steps whatever that were necessary to prevent interference by the strikers or their sympathizers with men who wanted to work. I would also instruct him to dispossess the operators and run the mines as a receiver until such time as the commission might make its report, and until I, as President, might issue further orders in view of this report.

I had to find a man who possessed the necessary good sense, judgment, and nerve to act in such event. He was ready to hand in the person of Maj. Gen. Schofield. I sent for him, telling him that if I had to make use of him it would be because the crisis was only less serious than that of the Civil War, that the action taken would be practically a war measure, and that if I sent him he must act in purely military capacity under me as commander in chief, paying no heed to any authority, judicial or otherwise, except mine. He was a fine fellow—a most respectable looking old boy, with side whiskers and a black skull cap, without any of the outward aspect of the conventional military dictator; but in both nerve and judgment he was all right, and he answered quietly that if I gave the order he would take possession of the mines, and would guarantee to open them and to run them without permitting any interference, either by the owners or the strikers or anybody else, so long as I told him to stay.

I then saw Senator Quay, who, like every other responsible man in high position, was greatly wrought up over the condition of things. I told him that he need be under no alarm as to the problem not being solved, that I was going to make another effort to get the operators and miners to come together, but that I would solve the problem in any event and get coal; that, however, I did not wish to tell him anything of the details of my intention, but merely to have him arrange that whenever I gave the word the governor of Pennsylvania should request me to intervene; that when this was done I would be responsible for all that followed, and would guarantee that the coal famine would end forthwith. The Senator made no inquiry or comment, and merely told me that he in his turn would guarantee that the governor would request my intervention the minute I asked that the request be made.

AGREEMENT AT LAST.

These negotiations were conducted with the utmost secrecy, Gen. Schofield being the only man who knew exactly what my plan was, and Senator Quay, two members of my Cabinet, and ex-President Cleveland, and the other men whom I proposed to put on the commission, the only other men who knew that I had a plan. As I have above outlined, my efforts to bring about an agreement between the operators and miners were finally successful. I was glad not to have to take possession of the mines on my own initiative by means of Gen. Schofield and the Regulars. I was all ready to act, and would have done so without the slightest hesitation or a moment's delay if the negotiations had fallen through. And my action would have been entirely effective.

But it is never well to take drastic action if the result can be achieved with equal efficiency in less drastic fashion; and, although this was a minor consideration, I was personally saved a good deal of future trouble by being able to avoid this drastic action.

At the time I should have been almost unanimously supported. With the famine upon them, the people would not have tolerated any conduct that would have thwarted what I was doing. Probably no man in Congress and no man in the Pennsylvania State Legislature would have raised his voice against me. Although there would have been plenty of muttering, nothing would have been done to interfere with the solution of the problem which I had devised until the solution was accomplished and the problem ceased to be a problem. Once this was done, and when people were no longer afraid of a coal famine and began to forget that they ever had been afraid of it, and to be indifferent as regards the consequences to those who put an end to it, then my enemies would have plucked up heart and begun a campaign against me. I doubt if they could have accomplished much anyway, for the only effective remedy against me would have been impeachment, and that they would not have ventured to try.

WHAT WILL PRESIDENT WILSON DO?

The troops are now in Colorado. Will the President compel the men to go back to work? Will he feed them? Will he help the Rockefeller combine? What will he do? The lesson—has he learned it? President Roosevelt was going to deliver back the mines to the corporations that owned them after everything was moving smoothly.

The bill I have introduced provides that the President of the United States shall take possession of the mines and operate them in the manner suggested; but it provides further that after taking possession of them he shall continue in possession under the authority of the United States Government, and shall own and operate those mines and market the coal and make of that particular enterprise a model enterprise, under model labor conditions and the proper restrictions as to an eight-hour day, and other provisions that will give due consideration and regard to

the purposes involved. We hesitate to "haul down the flag" once it is planted on foreign soil. Why not apply the same rule to this domestic proposition?

Mr. McKENZIE. Under your plan, what would be the function of the State in case of a strike at the mine? Would the United States Government immediately step in and take charge of it?

Mr. BRYAN. The function of the State in case of a strike in the mine would be exactly the function of the State now in case of a strike in the Post Office Department. If the gentleman can conceive what would happen if there should be a strike in the Post Office Department, then he can conceive what would happen in a strike in a mine owned and operated by the Government.

Mr. McKENZIE. But the thing I should like to get clear in my mind is just at what point would you have the United States Government intervene, and when should the functions of the State cease?

Mr. BRYAN. Does the gentleman mean as between the State of Colorado and the United States Government?

Mr. McKENZIE. Yes; any State.

Mr. BRYAN. At this time the governor of the State of Colorado has admitted the inability of the State to handle this situation, and has appealed to the President to send the Army there and take charge, so that there is no question of State rights involved.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. BRYAN. Certainly.

Mr. MANN. In reference to taxation, supposing the Government took the mines and owned them, how would it be about taxes? For instance, we passed a law providing for national forests down here in the Appalachian Range and in the White Mountains. In the law we provided that 5 per cent of the proceeds should be paid to the States in lieu of taxes. Now, we are just going to increase it to 25 per cent. In the national forests we started in, I believe, with 5 or 10 per cent, raised it to 25 per cent, and then to 35 per cent of the gross receipts.

But they want now one-half of the gross receipts out in the gentleman's State out of the national-forest receipts turned over to the State in lieu of taxes. We are paying 35 per cent, and in the Appalachian purchase it will soon be 25 per cent, because the Senate has added an amendment to the agriculture bill to that effect, and if it is not agreed to this year it will be next—what will we do about taxes; can we afford to pay 25 or 35 per cent of the gross receipts to the State for taxes?

Mr. BRYAN. Without reference to the forestry proposition to which the gentleman alludes, in operating the mines we would charge enough for the coal to cover the necessary expenses that ought to be laid up against the general public for the operation of the mine. They would not be operated at a loss either. We would apply business methods from the start. The very nature of the enterprise would require it. This is very different to a forest reserve or a national park.

As far as the expense administration is concerned, the people pay the taxes in the price of the product, and we would have no trouble about that. There is every reason to recognize the truth of the fact as to who really pays the taxes. If Mr. Rockefeller pays the taxes in Colorado on the coal mine, he charges it up in the price of the coal. We would be able to equalize that situation.

Mr. MADDEN. Will the gentleman yield?

Mr. BRYAN. Yes.

Mr. MADDEN. Is not the trouble out in Colorado largely due to the fact that the State treasury is bankrupt, and to the fact that the administration of State affairs there is rotten?

Mr. BRYAN. I think there is a good deal more to the latter suggestion than the bankruptcy proposition. Now, the United States is operating a coal mine in North Dakota, getting out coal at $1.78 a ton. The men are all satisfied, and things go along in fine shape. The Government of the United States can do that better than any Rockefeller kid, who says in his testimony that he bears the weight of representing his father's interests in the properties, but he has not attended a board meeting or been on the premises for over 10 years.

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. BRYAN. Yes.

Mr. SELDOMRIDGE. Of course, Mr. Chairman, I could not remain in my seat and hear the charge that has just been made against my State.

Mr. BRYAN. Oh, well, I will withdraw that and will not put it in the RECORD. The gentleman from Illinois used the word "rotten." I did not.

Mr. SELDOMRIDGE. The Federal Government has come into our State and put its hand on a large part of the taxable area and taken the money which we ought to have had for State purposes.

Mr. BRYAN. Is it not true, as was stated the other day, that the money interests of Colorado have control there, and that they would not accept the warrants of the State, and by holding up the State's credit prevented the governor of the State from calling the State militia, and does not that indicate something contrary and inconsistent with twentieth century morality?

Mr. SELDOMRIDGE. I do not withdraw the statement I made the other day. That is a fact, and I will let it stand in the RECORD. At the same time, the gentleman is urging a policy of Federal supervision over everything within the State, and I think it is largely the operation of just that policy that has contributed in some measure to the conditions that now exist.

Mr. BRYAN. Mr. Chairman, I believe the trouble with Colorado is rather "too much Guggenheim" and "too much Rockefeller" and too much of the kind of political corruption which Judge Lindsey exposed in The Beast. It is not suffering from "too much Uncle Sam." I wish Uncle Sam owned all of Colorado that is now held for speculation by the Wall Street billionaires.

Pass the bill I have introduced and we will have decent conditions and fair consideration for all in the coal mining district of Colorado. We have just passed the Alaska railroad bill, providing for a Government railroad in Alaska, to prevent these same people from throttling forever the resources of Alaska. President Roosevelt saved the coal of Alaska by driving away the same gang of looters. Let us break the stranglehold that Rockefeller has on Colorado, and we will cause the people of Colorado, and especially these miners, to feel a new cause for patriotism and love of the flag. The bill I have introduced is as follows:

A bill (H. R. 16096) to authorize and direct the President of the United States, as Commander in Chief of the Army of the United States, to restore order in certain portions of Colorado and to acquire and operate certain properties, and for other purposes.

Be it enacted, etc., That a state of anarchy and insurrection against the Constitution and laws of the United States, in violation of the fundamental human rights of life, liberty, and the pursuit of happiness, and hostile to the general welfare of the people of the United States, exists in the State of Colorado in the mining regions owned or controlled by John D. Rockefeller and John D. Rockefeller, jr., and other persons, corporations, and interests associated and incorporated under the names of the Colorado Fuel & Iron Co., the Colorado Industrial Co., the Rocky Mountain Coal & Iron Co., the Grand River Coal & Coke Co., the Pueblo Realty Trust Co., and under such other names and designations as may be employed by the said persons and the said interests.

SEC. 2. That law and order must be reestablished, constitutional rights must be respected, and the general welfare of the people of the State of Colorado and of the United States must be observed. To that end the President of the United States is hereby authorized and directed to use the Army of the United States to restore order and respect for law in the said regions. The President is further authorized and directed, as Commander in Chief of the Army of the United States, to dispossess the said John D. Rockefeller and John D. Rockefeller, jr., and all persons claiming to own or control the mines or property used for mining purposes and under control of the said interests referred to in section 1 of this act, and, as Commander in Chief as aforesaid, to begin at once, after the nature and capacity of a receiver of the said property and the said interests, to operate the said mines and properties in all respects as could or should be done by the said interests under normal conditions, marketing the output of said mines and giving employment to all who are needed in the operation of said mines, plants, and enterprises of said individual corporations and interests referred to herein.

SEC. 3. That as Commander in Chief as aforesaid the President of the United States is hereby authorized to use, have, and enjoy all the rights incident to his said office and all the rights and authority of a board of directors or managers of the said properties and the said corporations, and all the present directors, officers, managers, agents, and servants of the said corporations and interests shall give to the President every aid and shall cooperate fully with him upon his request, and shall surrender to him all the books, papers, and details of operations of the said mines, plants, or enterprises as may be necessary or appropriate and may facilitate the profitable and orderly operation thereof, and the President is hereby authorized to use all the authority incident to his position as Commander in Chief of the Army of the United States to carry out the purposes and intent of this act.

SEC. 4. That the Attorney General of the United States is hereby authorized, empowered, and instructed to begin at once and conclude, as early as possible, in the name of the United States of America, the condemnation for the United States, by proceeding in eminent domain in the courts having jurisdiction, of all the stock of the said John D. Rockefeller and John D. Rockefeller, jr., in said corporations, mines, and enterprises, or such portion thereof, and so much more of said stock of said corporations held by other persons as may be necessary, if any more be necessary, to completely control the said corporations by virtue of the ownership of a majority of the voting stock thereof, and the said Attorney General is further authorized and directed to condemn and take over by legal process for the United States all or such portion of the bonds of the said corporations at the actual value of same as may be judicially determined, as it may appear to be advisable or profitable to thus acquire from the standpoint of future ownership and operation of the said corporations, mines, and enterprises by the Government of the United States.

SEC. 5. That the President of the United States and the Attorney General are hereby instructed to acquire and obtain full possession and ownership of said stock and the said property for the United States to the extent and in the manner heretofore set forth in this act at as early a date as possible, and immediately upon acquiring said stock the President of the United States is hereby authorized to vote the said stock and exercise all the rights, authority, and power of the Government, as the owner thereof, and he is hereby instructed and empowered

to institute at once an economical system of management and operation of the properties of the said corporations to the end not of profit to the Government, but merely to pay all costs and expenses of operation, including interest and dividend on the actual cash value of stock not owned by the United States at the rate of 3 per cent per annum and no more (but no such dividend shall be guaranteed in any case), and to institute humane and desirable conditions for the workmen employed in said mines and enterprises, and to put into effect all the provisions of this act after the manner hereinafter set forth; and such changes or amendments in the organic acts or constitutions, rules, or by-laws of each and every of said corporations as may be necessary to make them comply with this act shall be made by the President of the United States, acting through such officers and agents as the situation may require, and under authority of this act and by virtue of the right to vote the majority of the said stock as aforesaid.

SEC. 6. That the said corporations shall be in charge of a chief appointed by, removable by, and acting under the direction of the President, and such chief shall have no power or duty other than the operation of said corporations; and the duties of inspection, fixing of wages and prices, and making of general rules and regulations provided for herein shall be in charge of the President, or such agents as he may designate.

SEC. 7. That the President shall fix minimum wages and salaries and maximum prices, and readjust the same every three years, or oftener if, in his judgment, emergency requires, a deficit directly traceable to ill adjustment of wages or prices, or both, to be regarded as such an emergency. The principles governing the fixation and readjustment of wages and prices shall, unless emergency requires otherwise, be as follows:

The minimum hourly wage paid any class of labor shall be the average wage paid that class of labor by other employers under conditions equivalent to those prevailing in such service; the maximum price charged for coal and other products shall be such as will pay a reasonable net profit on operation and a reasonable interest on the physical valuation of the coal mining and distributing plant, the same to be determined by the President, transportation, distribution, and interest on investment to be included in cost of operation. The reasonable net profit and the reasonable interest herein provided for shall be determined by means of separate estimates of the current price of money for standard investments and of the particular hazards involved in the enterprises contemplated in this act. The President may confer the power of fixing minimum wages and maximum prices upon an agent or agents appointed by him as provided in section 6 of this act, but the agents so appointed shall not be operatives in the mining service, and the power so delegated shall not be redelegated, and nothing in this act shall be construed as allowing any other person or body to fix said minimum wages or maximum prices.

SEC. 8. That the total debit account for any fiscal year shall comprise all expenditures for operation and maintenance during said year, including payments for injuries to employees, charges for land, and other expenses, plus 5 per cent of the capital investment of said service, together with the depreciation charges for said year and payment for deficit accounts, if any, as specified in section 9; and the total credit account for any fiscal year shall comprise all money received or chargeable for service or products during said year.

The capital investment for any fiscal year shall comprise all money chargeable to original plant and extensions thereof up to the close of said year.

The capital investment for any fiscal year shall comprise all money chargeable to original plant and extensions thereof up to the close of said year.

If in any fiscal year the total credit account shall exceed the total debit account, the difference shall be charged to a dividend fund to be divided equally between the operatives in and the purchasers from the said corporations. The share of the dividend fund assigned to the operatives for any fiscal year shall be distributed among them in such manner that each operative shall receive an amount proportional to the wages or salary previously receivable by him during said year, and the share assigned to the purchasers aforesaid for any fiscal year shall be distributed among them in proportion to the sums paid by each of them for coal or other products during said year.

The operatives in either service for any fiscal year shall comprise all persons who have been employed in said service during any portion of said year, including the chief thereof.

SEC. 9. That if in any fiscal year the total debit account shall exceed the total credit account, the difference shall be charged to a deficit account, 10 per cent of which shall be included in the total annual debit account of the appropriate service each year for 10 years thereafter.

The books, equipment, and mode of operation of all properties and the said corporations shall be open to the inspection of any person authorized by the President to inspect the same.

All operations under this act shall be governed by further provisions as set forth in this section:

The hours of labor of all persons employed shall not exceed 48 per week, save in emergencies wherein life or property is in imminent danger.

No wage shall be paid upon a scale of hourly wages lower than the minimum wage scale fixed by the President, as provided in this act.

The wages or salaries of all persons employed under this act shall be paid at intervals not greater than 16 days.

No person under the age of 16 years shall be employed for any purpose.

SEC. 10. That the President shall make general rules and regulations—

To insure the safety of operatives employed in the enterprises provided for in this act.

To provide for detailed reports upon all accidents or occupational diseases.

To provide for just and reasonable compensation in the case of all operatives in any enterprise who may be injured or killed or who may contract any occupational disease in the course of their work, without regard to negligence of such operative, in any case where compensation shall inure to the benefits of dependents.

To provide for a system of insurance of operatives employed under this act in cases of sickness, injury, or death.

To provide for an adequate system of sanitation, housing, and general living conditions for the operatives engaged under this act.

To prevent any adulteration or unnecessary waste of coal or other product sold under this act.

To carry out and enforce the provisions and ultimate purpose of this act, said purpose being to provide coal and other products of said properties at the lowest price consistent with the maintenance of the welfare of all operatives at a high level, the stimulation of efficient service, and the maximum and at the same time most economical utilization of the resources of said properties.

SEC. 11. That the sum of $10,000,000 is hereby appropriated out of any moneys in the Treasury not otherwise appropriated, which shall be available until expended as the President may direct for the purposes of this act.

Three per centum of the capital investment of the mining service, forming part of the debit account, as provided in section 6, shall be set aside and made available as a fund to be known as the improvement fund to be expended for the purpose of improving, extending, and developing the properties of the said corporations: *Provided*, That 3 per cent of the said capital investment shall be covered into the Treasury of the United States to the credit of miscellaneous receipts.

SEC. 12. That the President is hereby authorized by private purchase to acquire stock not condemned and taken over, at the actual value of said stock, having regard to the proportion that such stock bears to actual physical value of the properties owned by the corporation which issued the same, and to the total aggregate of issued stock.

SEC. 13. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

Mr. BUCHANAN of Illinois. Mr. Chairman, the conditions in the State of Colorado are a symptom of a most vicious system that controls the Government in this country in different localities and the Nation. What has happened in Colorado is in conflict with the fundamental and constitutional rights of our citizens, and strikes at the fundamental principles of a democratic republican form of government. The right to life, liberty, and the pursuit of happiness has been destroyed.

The violence in Colorado is but a symptom of an old issue—the issue of human rights versus property rights, and the struggle will continue until the rising power of democracy shall settle it once for all and turn the tide in favor of humanity. But a clearer insight into the cause of the present conditions in Colorado was given the public a few days ago when John D. Rockefeller, jr., spoke as the representative of one side of this bloody struggle before the congressional investigating committee, discussing his relation to the long-continued strife and civil warfare. Little was known of Mr. Rockefeller, jr., until the other day when he revealed himself to the world by his utterances before the House committee.

Mr. Rockefeller is the principal director of the Colorado Fuel & Iron Co. On account of unbearable working conditions, the men employed by this company went on strike. As is customary with the big business interests when a strike is declared, armed guards and gunmen were rushed to protect the company's property. Machine guns and all the latest and most deadly armament and munitions were put into service, and, worse still, the governor of the State was prevailed upon to send the State militia to the scene, evidently not to maintain order, as they should have done, but to assist the company in its warfare against the strikers. The struggle has lasted some six months. Property has been destroyed, men ruthlessly shot down, and thousands of families made homeless and desperate. Mr. Rockefeller admitted all the dreadful facts, admitted his controlling connection therewith, but also admitted that he had never considered it necessary that he investigate these conditions personally, and use his influence to prevent the bloody outrage, but was satisfied with the reports of his agents, and approved of their every act.

Upon the horrible conditions of anarchy Mr. Rockefeller had the following to say:

> I have done what I regard as best in the interest of the employees and the large investment which I represent. We have put the best men obtainable in charge, and rely upon their judgment. My conscience entirely acquits me. We would rather that the unfortunate conditions should continue and that we should lose all the millions invested than that American workmen should be deprived of their right under the Constitution to work for whom they please. That is the great principle at stake. It is a national issue.

These words, coming from Mr. Rockefeller, jr., are extremely important. He will some day administer the largest single fortune in the world, and therefore what he says concerns the whole Nation. The name of the corporation that piled up the fortune which he will some day control goes hand in hand with greed, avarice, and relentless warfare upon competitors, and all low-down, dishonorable methods yet conceived by big business financiers. The Standard Oil Co. has sent many a man to an early grave; it has robbed decent, honest men of a business opportunity; and has robbed men of faith in business honesty and business morality. It has put a stain of dishonor on everything connected with it, and yet the Standard Oil represents the business policy to be applied to the situation in Colorado.

The remarks of Mr. Rockefeller would be humorous were it not for the gravity of the condition to which it refers. He probably thought that he was stating accurately the purpose of the corporation; but that the expression is false is equally true. No reasonable man could be made to believe that any corporation would rather lose its whole investment than that "workmen should be deprived of their right to work for whom they please"; no capitalist ever spent millions to "protect the

freedom of the workers." He attempts to shield himself by the argument that has disguised many an enemy of the workers—freedom of contract. Back of it all lies the real inspiration—the supreme sanctity of property and a determination to maintain that principle at all hazards. By the "right" of the worker "to work for whom he pleases," Mr. Rockefeller evidently means the "right" of capital to dictate the terms and conditions of work and of the employee to accept those terms or starve.

Consider the marvelous advantages for "freedom" afforded the workers of the Colorado Fuel & Iron Co., controlled by the Rockefeller Standard Oil Co. Only such men as have not been blacklisted are at "liberty" to linger on the private property of the company. He is at "liberty" to patronize the company stores in order to keep his job. Likewise he is at "liberty" to rent company houses, employ company physicians, and use company bathhouses, for which he is at "liberty" to pay a company fee. He is at "liberty" to accept what wages he is offered, to accept what weights the company sees fit to give him for his output, and to work just as many hours as the company sees fit to suggest. A virtual civil war has existed in Colorado for the last six months to force upon the miners this conception of "freedom" and "liberty."

The original conflict between the miners and the Rockefeller interests was wages, hours, and other details of employment, but in order to combine its forces in order to cope with the combination of capital the issue evolved into one of unionism. To Mr. Rockefeller this is evidently a new conflict, yet in principle it is similar to that which has raged in one form or another for many generations. Some 60 years ago Abraham Lincoln touched upon the situation in the following words:

> It is the eternal struggle between these two principles—right and wrong—throughout the world. The one is the common right of humanity and the other the divine right of kings. It is the same principle in whatever form it shapes itself. * * * We are for both the man and the dollar, but in case of conflict we are for the man before the dollar. * * * Capital is only the fruit of labor and could never have existed if labor had not first existed. Labor is the superior of capital and deserves much the higher consideration.

This was, of course, a restatement of the principles laid down by Thomas Jefferson. Plutocracy got a hold on the reins of the party he founded and had come to represent the supremacy of property rights. The enormous loss of property and life in the Civil War demonstrates the cost of the conflict as it appeared in the days of Lincoln.

The issue to-day is fundamentally the same as it ever has been. Every person who has any knowledge of the conditions in the industrial world to-day realizes that should the Standard Oil Co.'s conception of "freedom" prevail, real industrial freedom would vanish, and employers would be firmly established as masters of industrial despotism. Of what consequence are the grievances of an individual miner to the agents of the Colorado Fuel & Iron Co.? What sort of a chance has an individual "free" worker to get redress from the absent owners of this corporation? On the contrary, the only hope of relief lies in the association of the workers to secure justice. All the world knows that the unions of workers stand for fair wages, better working conditions, and the welfare of the workers. These are their natural, God-given rights, and when they are deprived of them they will fight for them, and that is why they are opposed by the employers, whose only concern is profits, and profits at the expense of everything else.

Whatever benefits have ever come to the workers have been the results of their united efforts to help themselves. The workers of the land demand that right, and to deny it to them would force upon them a most brutal injustice. The plea made by Mr. Rockefeller, namely, "a workman's right to freedom of contract," has been worn threadbare by the opposition to labor. According to the philosophy of big business, "freedom of contract" means freedom to work as many hours as the boss may demand, freedom to accept starvation wages, freedom to work under sweatshop conditions, freedom to contract disease, to be poisoned that profits may be increased, to be blown into atoms that the operators may save the expense of safety apparatus, freedom to lose one's sanity, manhood, faith, and everything in life worth living for. To them the ideal is big business, not big individuality. The statement by young Mr. Rockefeller that his corporation has a right to perpetuate anarchy and civil war represents the true views of his kind. They believe that big business produces civilization, that it is paramount to the interests of humanity, and that even the Government is exceeding its powers when it presumes to inquire into a conflict which has disrupted a whole State.

However, the Government has now taken a hand into this matter and troops have been sent to the fields to restore order. The question is now up to the Nation. Shall the ideals of industrial despotism prevail or shall the demands of the workers for justice be heeded? I trust the Nation will not be blind to the necessity of the workers nor heedless to their plea and demand for justice.

Mr. HUMPHREY of Washington. Mr. Chairman, the House will undoubtedly recall that some weeks ago the Secretary of Commerce made a report to the House as to the conditions of the shingle industry in my State. He said in his letter to the distinguished leader on the Democratic side, Mr. UNDERWOOD, that he hoped that it would be given wide publicity, so I am going to help the yearning gentleman and give some more publicity to that report.

I was not at all surprised that the report contained what it did. I anticipated that; in fact, I knew that any report that would be made would contain what the Secretary wanted it to contain before he made the investigation.

I was surprised to find—and I am not reflecting on the men that went out there, for I do not know them—I was somewhat surprised to ascertain that the Secretary of Commerce sent in a report to this House, asking that it be inserted in the RECORD and given wide publicity, when that report was based on anonymous evidence. I was surprised that these gentlemen who went out there to investigate, and who spent some weeks in my State, were not able to find a single solitary witness whose name they would give. All the evidence they quoted was "a distinguished manufacturer said this," or "a man high in the councils of the lumber and shingle industry says that." The name was never given. I was unable to identify any one of the men to whom he referred. It appears now that the reason is plain. They did not want to give any names, because they suspected that I might wire out there and find out what the witness really said. Not only did they refuse to give any names, but since I have had some time to hear from the people out there—and all of this information has come to me unsought and unasked—I find they did not attempt to ascertain the truth. They did not interview the lumber and shingle manufacturers. They talked with the politicians, and the dearth of evidence they produced is perhaps due to the fact that a Democratic politician is a very scarce article in my State, and when you do find one he knows very little about the timber or any other industry. The men in my State who are running the industries do not vote the Democratic ticket. They know too much about the effect of Democratic tariffs.

But it now appears that whenever they did by accident come across a lumber or shingle manufacturer they suppressed his evidence. I want to call attention to a most flagrant case of this kind, and I do it largely because of the fact that the distinguished Secretary himself a few days ago, as I called to the attention of the House on yesterday, was pleading for more honesty in talking about the condition of business and the industries throughout the country. I hold here a copy of that wonderful report, and here is what is said on page 84 about the conditions of the lumber industry:

> The effect of the removal of the duty on lumber is almost universally conceded to be negligible; at least it is so considered among the lumbermen on the Pacific coast.

Keep that statement in mind, and then let me call your attention to an article that appeared in the West Coast Lumberman a few days ago, March 1. I desire to read from it the following in regard to the action of the West Coast Lumber Manufacturers' Association, and the West Coast Lumber Manufacturers' Association is the big lumber manufacturers' association of the Pacific northwest. That association appointed a committee to confer with those distinguished experts sent out by the Secretary of Commerce. Those experts met with that committee. They propounded questions to the committee and that committee answered those questions. Those were representatives of the most representative lumber association in the Pacific northwest. That association appointed able men upon that committee. The committee made a report in writing to those experts, and those experts deliberately suppressed that report. Not a word of it appears in this report to the Secretary of Commerce. Yet this, by far the most important testimony that those experts received during that entire investigation, was deliberately kept out of the report.

I have here the report which that committee made back to their association. I will read the most important parts of that report:

> Notwithstanding the effort of the administration to disclaim any responsibility for the present condition of lumber and shingle markets in the Pacific Northwest, the special committee appointed by President Mackay at the last meeting of the association, held in Tacoma, to confer with the Government's investigating representatives, submitted a report. This committee consisted of W. A. Whitman, of the Tacoma Mill Co., and W. C. Miles, manager of the association. In part it was as follows:
>
> "In accordance with the action of the association at its meeting in Tacoma January 30, 1914, your committee met with T. M. Robertson,

special agent for the Government, with reference to furnishing such information as Mr. Robertson in the meeting expressed a desire for, namely: 'What factors do you think are the cause of the present depressed condition of the forest-product business?' 'Has the removal of the customs duty from lumber and shingles affected the prices, and to what extent?' 'For instance, in December, 1911, lumber prices were as low or lower than in December, 1912. What were the causes for the prices prevailing during the two periods mentioned?'

"The committee's answer to the questions, in the order above written, were as follows:

"The primary factor causing the present demoralized and unprofitable conditions in the lumber industry is the direct result of the effects of the recently enacted customs tariff bill. The present conditions are the culmination of a situation which started in a pronounced way during May, 1913. Owing to the discussion by Congress of the proposed new tariff bill and the general notice to the country that its operation would result in material reductions in the selling prices of all commodities affected by it, was notice to the public to restrict normal purchasing of all commodities so that full benefit would be received of such low prices which would prevail at as early a date as could be made possible by the enactment of tariff legislation. The natural result was that restricted buying on the part of the consumer made a lesser demand on the supply of the wholesale interest, but in turn reduced the demand on the manufacturer for his product, which caused, in turn, an unwilling reduction in output of the factories. This meant the making idle of a great many employees; first, in the localities where the industries were most largely affected by the proposed new tariff law; next, in the localities which supplied the first-named localities with a large portion of its requirements in various articles. Purchases on the part of persons out of employment were confined to actual necessities, and the same situation beyond a doubt prevailed with those that were still employed by reason of a fear that probably their employment would be limited. This condition gradually extended until every industry throughout the United States was affected, which clearly made plain the sensitive business relation existing between all industries and the people connected therewith.

"No matter how widely scattered throughout the country, until such time as the tariff law has affected fully every interest related thereto, the present conditions will not materially change, as the new basis upon which business will hereafter be conducted will require many readjustments with reference to all elements entering into the costs of the various products.

"As mentioned in the first part of this report, the committee is of the firm belief that the new tariff law is responsible for the present low prices. Any factor which tends to lessen the demand for lumber will most naturally cause a reduction in prices exactly as an increasing demand causes them to rise.

"It is impossible for the committee to conclude that the country at large can possibly be benefited by any law which has a tendency to increase its imports when it has the raw material and the necessary labor to produce such articles in satisfactory volume and quality. The entrance of such products has no other effect than to lessen the requirement of so much labor as may be represented by the articles imported.

"Another element apparently will enter into the problem made by the tariff bill, namely, that of the proposed elimination of free tolls for American vessels engaged in the coastwise business when using the Panama Canal. This means that the manufacturers of lumber located in British Columbia may use any vessel afloat, no matter what flag is carried, for the shipping of forest products to all Pacific and Atlantic American ports, whereas our manufacturers of lumber will be compelled to make use of only such vessels as fly the American flag. With the experience of vessel freight rates prevailing in 1906 and 1907, the committee believes that American manufacturers will be placed at a disadvantage as regards freight rates on lumber to especially Atlantic coast ports, and feels that the American shipping will suffer unless given a differential toll rate through the Panama Canal. The people of the United States bonded themselves for the construction of the said canal, and it is not unreasonable to contend that they should receive a benefit in excess of that received by any other nation. When the shipping interest of the United States is benefited there is no question but that the whole Nation is benefited.

"It is remarkable with what fortitude and patience the people conduct themselves when suffering the hardships which are taking place while the new tariff bill is being made effective. It is to be hoped that the end is near at hand, although indications at the present time are not favorable for an early active period of production. The conditions prevailing we feel are entirely unnecessary and would have been largely avoided had the new law been constructed on a nearer basis of mutuality of interests as related to the production of the various nations of the world which it was proposed to be influenced by a reconstruction of the tariff schedules."

That was the answer which that committee made, and yet these experts, sent out by the Government to ascertain the truth, in their report, having the report of this committee before them, deliberately suppressed it and say:

The effect of the removal of the duty on lumber is almost universally conceded to be negligible; at least it was so considered among the lumbermen on the Pacific coast.

Think of experts, in the face of a report of that kind, deliberately making the statement I have read. As one gentleman sitting near me says, such a statement "is a lie"; but I will not use that expression, because it would be unparliamentary. However, I want it understood that I condemn it just as strongly as parliamentary language will permit. I want to emphasize that portion which I have read, to show how earnestly the distinguished Secretary of Commerce was seeking the truth. I wonder how long it will be before he publicly reprimands these agents who went out there and deliberately suppressed and distorted and misconstrued the evidence that was given to them and came back and made this now notoriously false report.

Mr. Chairman, I want now to read a letter that I have received from Mr. J. J. Donovan, one of the leading shingle and lumber manufacturers of my State, under date of April 3, 1914. The letter is as follows:

BLOEDEL DONOVAN LUMBER MILLS,
Bellingham, Wash., April 3, 1914.

Hon. W. E. HUMPHREY,
House of Representatives, Washington, D. C.

MY DEAR MR. HUMPHREY: On behalf of the people of this section let me thank you for your strenuous effort to compel the Democratic Party to keep its platform pledge and not sacrifice the interests of our whole people, and particularly those of the Northwest, to England's unreasonable demand. The fact that you failed along with all the other leaders does not make the effort less commendable. The President's determination, not to say hypnotic influence, has held most of his party in line and, unfortunately, attracted some of the Republicans, but, unless I am greatly mistaken, there will be a day of reckoning next November which will show what the people think about this and a number of other policies that sound well in theory and make men go hungry in practice.

We still have some hope that the Senate may have more regard for the Nation's rights and real honor than the House, and our chamber of commerce and citizens are sending their latest expressions to that body.

Now, a word in regard to the lumber situation and the effect of the tariff thereon, which has been a subject of much debate in Congress, especially since Mr. Redfield's agents returned to Washington and reported everything lovely out here. We had hoped that the investigation would be an honest one and that these men would report the facts, and we really thought these were so clear that the Democratic Party would be honorable enough to admit its mistake and give us a moderate tariff on shingles and lumber through a special bill. Instead of that, these agents sought the politicians and not the manufacturers, excepting in a few instances, and then went back with the kind of report they were sent to get.

Permit me to inclose two pages which, curiously enough, are published opposite each other in the West Coast Lumberman, March 13. Page 38 is headed "Secretary of Commerce publishes special report on coast mills," which, among other things, says they canvassed 87 of the mills which were mentioned by Mr. HUMPHREY, but found none of the mill owners who attributed the close to the tariffs, etc. Also, "that the shingle manufacturers do not claim the removal of the duty injured them; that there is no such general complaint against such removal; that there are not more idle men in Washington State now, due to the closing of the shingle mills, than was the case under the old tariff; that there has been no reduction of wages in shingle mills and but few in the lumber mills," and the report runs on with a mixture of statements, some true and some false, that would take a Philadelphia lawyer to untangle. Perhaps the best answer that can be given is the opposite page of the paper, which I inclose, headed "West coast manufacturers' report blames new tariff for business lull," and there you will find that the special committee consisted of W. A. Whitman, of the Tacoma Mill Co., and W. C. Miles, appointed to confer with the governmental investigating representatives, so that "the primary factor causing the present demoralized and unprofitable conditions in the lumber industry is a direct result of the effect of the recently enacted customs of the tariff bill," and they go on in detail, as you will read.

This city, as you know, is one of the most important lumber and shingle manufacturing points in the State. There are a number of small mills, but there are five large ones whose owners or managers were certainly entitled to say something to any investigator. The man who came here made no effort to see any of the people connected with the Earles-Cleary, the E. K. Wood, the Whatcom Falls, the Morrison, or the Bloedel-Donovan lumber mill companies. He did, while dodging from one politician's office to another, run against Mr. George Cooper, president of the Hazel Mill Co., which is shut down, and Mr. Cooper insisted upon having an interview with him and giving him some information. The interview was so remarkable that I have requested Mr. Cooper to write you fully about it, and he has promised to do so this week. Now, as to a few things which I know personally, as we have been in business here for 16 years. One year ago we had three sawmills and three shingle mills running and were employing directly 1,000 men. In the shingle mills, counting the night shift, we were running 20 machines. To-day we have 1 mill shut down completely, and it has been since last summer; 10 shingle machines running, 500 men on our pay rolls, 2 logging sides running where we had 4, a reduction in wages which will average 10 per cent, and the necessity before us, unless matters very soon improve, of another wage reduction of 10 per cent or else a complete shutdown, as in several departments we are running at a loss, if we figure the value of our stumpage at two-thirds of what the Forest Service claim.

I do not know of a single manufacturer who does not blame the new tariff for these conditions—and I have talked with dozens of them, all the way from here to Los Angeles. During the first week in March I stood at the rear of a train between Portland and Bellingham and took snapshots of some of the idle mills along the line of the Great Northern. There were 22 of them between Seattle and Bellingham on the Great Northern line closed down. I had a list of 35 on the Northern Pacific, in the same district. I saw many idle mills south of Seattle, some of them very large ones. I inclose some of these snapshots. I could get you a large number of more imposing pictures of large plants which were running a year ago but are idle now, including some of our own; but I know of nothing more pathetic than of these little mills, each of which employ from 25 to 50 men, who are now idle. Also inclose a newspaper clipping showing how our British Columbia friends are prospering. I am reputably informed that there is not an idle shingle mill in British Columbia; and Americans are going over there, buying timber and opening mills as a result of the changed situation. I had a recent request to join with another American shingle-mill man in one of these ventures. I declined and told him that British Columbia would have but three years in which to take our markets and hold us out of theirs, and I didn't care to go in. Meanwhile our industry languishes as it hasn't since the memorable years between 1893 and 1898.

Twenty-five lumber and shingle mills have failed in this State during the past six months, and many more will fail before this year closes, yet Mr. Redfield has the nerve in Seattle speeches to see only rainbows, and denounces Washington representatives who told the truth in Congress about existing conditions. If an honest effort had been made to get at the facts and a truthful report made of the facts obtained, I would not write in this way, but a more foolish and indefensible tariff law was never written by any Government than the forest-product schedule in our present tariff bill.

The British Columbia Government, quick to see the point, have added to the royalty which their millmen have to pay to such an extent that

next year will increase their revenue all of $1,000,000, taken from the American consumer, but even then their millmen have the advantage over us in their raw material in the cedar business of from $1 to $2 per thousand. If it were not for their export duty on their logs—such duty as you know forbidden by our National Constitution—we might still do some business by buying their cheap logs and taking them here, but even that is denied us; and Mr. Redfield unctuously asked us in his speech at the Rainier Club if we are not as capable manufacturers as our neighbors in British Columbia. We think we are, but their Government looks out for their interests, lets them have logs at a low cost and very little taxes, allows them to fill their mills with competent Chinese and Japanese, who work for one-half of what our men do, prevents the export of the logs so that they must be manufactured at home, and then keeps on a high tariff on everything that goes through a planer, and finally smiles at the idiocy of the statesmen of this great Republic who throw our markets open, asking nothing in return, but saying, in effect, as Ambassador Page did about the canal, that "we are pleased to have British Columbia prosper more under the new tariff than our own State of Washington."

I have known you many years and at various times have written you on subjects of interest. I think I have never sent you a pessimistic letter before. It is not my nature, but the prospect ahead for anybody engaged in the lumber business in the State of Washington for the next few years is not pleasant, particularly if the tolls-exemption clause is repealed as the President wishes; then British Columbia can charter the ships of any nation and put her lumber in New York $3 per thousand cheaper than we with American vessels. There is no margin of $3 or even $1 in the business at the present time, which means that British Columbia will get the business to the capacity of her mills and we will watch her ships go by.

It seems incredible that such a fatuous policy should prevail, but apparently our people are determined to try all the theories offered them in spite of past experiences and that of other nations, and not until many a wheel stops turning will they wake up to actual results.

Thanking you for your efforts in behalf of your old district, I remain,

Very sincerely, yours,

J. J. DONOVAN.

Mr. HELVERING. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. HELVERING. I notice in the letter from which the gentleman has read that Mr. Donovan states that this mill has been closed down since last summer.

Mr. HUMPHREY of Washington. Yes.

Mr. HELVERING. I want to ask the gentleman from Washington if he knows the date or about the time that the mill was closed down?

Mr. HUMPHREY of Washington. My recollection is that Mr. Donovan closed one of his mills about the 1st of last June.

Mr. HELVERING. I would like further to ask the gentleman if this mill was closed down in anticipation of the tariff law which was passed in October?

Mr. HUMPHREY of Washington. I prefer to quote Mr. Donovan on that. He wrote me a letter, and I think I have inserted that letter in the RECORD, stating that that was the reason, that after the tariff bill had been considered in the House, and the Democratic Party had gone on record to the effect that it proposed to place lumber and shingles on the free list; in anticipation of that fact the people throughout the country stopped buying, and that was the cause of his closing down of his mill.

Mr. HELVERING. I am asking for information.

Mr. HUMPHREY of Washington. I am telling the gentleman what Mr. Donovan himself told me.

Mr. HELVERING. Let me ask this further question. What is the condition in the country just across the line that causes this difference between the two countries that Mr. Donovan speaks of in his letter? He says that not a shingle mill, as I understood the letter, was closed on the Canadian side.

Mr. HUMPHREY of Washington. Yes.

Mr. HELVERING. While there are 35, or some such number, closed on the American side. I want information. Why does this difference exist?

Mr. HUMPHREY of Washington. The difference is due to the fact, first, that they secure their timber at a little less price in British Columbia, but the principal reason is that they employ oriental labor in British Columbia.

About 70 per cent of all labor employed in the shingle mills of British Columbia are orientals. Chinamen are used almost exclusively for the packing of shingles. One of the mills, referred to in a letter which I have here before me, employs largely Hindus in certain work about the yard. The vital difference is labor. I do not have to stand here and argue about it, because the very fact is admitted in this report here which these so-called experts submitted, that about 80 per cent of the labor employed in the lumber or shingle mills industry of British Columbia is oriental labor—that the British Columbia mills would not employ this oriental labor if it were not to their advantage.

Mr. HELVERING. Will the gentleman yield for just one more question?

Mr. HUMPHREY of Washington. Certainly.

Mr. HELVERING. Does the gentleman think that the great manufacture of metal roofing and things like that makes any difference in this shingle business?

Mr. HUMPHREY of Washington. I have answered that question once before on the floor of the House.

Mr. HELVERING. Such as tiling, concrete, and so forth?

Mr. HUMPHREY of Washington. Not only in that, but there are other materials used for roofing which have been advertised extensively. This has made some difference, no doubt, in regard to the market for shingles. There is no question about that. As I mentioned before, to show the inconsistency of the Democratic Party upon this proposition, so far as the tariff is concerned, while you put shingles upon the free list you protected other roofing materials that come in competition with shingles and, notwithstanding the fact that they had this competition with this other material used in roofing, the Democratic Party then thought that they also ought to bring the shingle manufacturers of my State into competition with British Columbia shingles manufactured with this cheap oriental labor.

Mr. HELVERING. Will the gentleman permit a suggestion?

Mr. HUMPHREY of Washington. Yes.

Mr. HELVERING. Right in that connection, I would say in my district we have many mines producing gypsum, which is used in the manufacture of cement shingles. They are protesting against the reduction that was made on the tariff on gypsum that is used in these concrete shingles, so it does not refer alone to the wood shingles, but to the metal shingles and concrete shingles as well.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. HUMPHREY of Washington. One moment; before I yield for another question I want to follow up the statement. I want to call the gentleman's attention to this fact and call the attention of the House to the fact, that according to this expert testimony that I have here—that is, according to the Redfield report—immediately after the present tariff bill went into effect 80 per cent of the shingle mills of the State of Washington closed, and immediately before it went into effect the mills that had been closed in British Columbia opened and commenced running to full capacity and are running at full capacity yet.

Mr. HELVERING. I will say to the gentleman I do not care what the Redfield report gives, if it does not state the truth.

Mr. HUMPHREY of Washington. Whenever it does state the truth, I want to give it credit; it is very seldom, I admit.

Mr. ALLEN. Will the gentleman yield?

Mr. HUMPHREY of Washington. Does the gentleman think it does not state the truth; does the gentleman want to contradict this report?

Mr. HELVERING. I have not gone into the report.

Mr. ALLEN. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. ALLEN. I notice the statement in the letter that a large number of Americans were going across the line into Canada to engage in the shingle business.

Mr. HUMPHREY of Washington. Yes.

Mr. ALLEN. Does that mean they are going to take up farms or establish factories? What does the gentleman gather from that statement?

Mr. HUMPHREY of Washington. I would think, if the gentleman had heard it, it was very clear. It says that he had a "recent request to join another American shingle-mill man to go into one of these ventures."

Mr. ALLEN. I refer to the statement previous, that a large number of Americans were going across. What were they going across for—going across for employment?

Mr. HUMPHREY of Washington. He says that "the idle shingle men were going over to buy timber and open mills and take advantage of the situation." I think that is perfectly clear.

Mr. ALLEN. What is the average life of a sawmill or a shingle mill?

Mr. HUMPHREY of Washington. I do not know.

Mr. ALLEN. Is it not about 10 years?

Mr. HUMPHREY of Washington. I do not know the life of an average shingle mill.

Mr. FALCONER. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. FALCONER. Touching the question of the gentleman from Ohio [Mr. ALLEN], just previous to the last, I will say that the best cedar timber of British Columbia is owned by American lumbermen. Now, it makes no difference to the American lumberman whether he makes shingles in the United States or in British Columbia providing he can make the money. If he owned a thousand acres of timber in the State of Washington and a thousand in British Columbia and could make more money in British Columbia than he could in the State of Washington, he would prefer to operate in British Columbia. It makes very little difference to the operator above referred to,

but it does make an immense difference to the locality where the mill closes on the American side and to the men who are in business in that neighborhood, and to the workmen who have all their property on the American side. What was the gentleman's [Mr. GARRETT] last question?

Mr. ALLEN. That is in regard to the average life of a sawmill.

Mr. FALCONER. The life of a sawmill, I take it, is not 10 years. We do not figure on the life of a mill on the principle of the number of years. When you are building a shingle mill or a sawmill to-day it does not run 10 years and then become worn out. It is continually kept up in order to have a good mill. It has to be kept up scientifically as the years go on to a high standard of efficiency, and generally is by a scientific and able American lumberman.

You generally discount, however, 10 per cent per annum on a mill unless it is kept up.

Mr. ALLEN. That is what I understood. I was talking with a lumber man from the West the other night, and he told me that the average life of a mill was 10 years; that the chief trouble was the freight rates.

Mr. KREIDER. It was the object of the tariff bill to reduce the price of lumber and shingles to the consumer. Has the gentleman from Washington [Mr. HUMPHREY] any knowledge as to whether the consumer is buying shingles any cheaper to-day because of the enactment of the bill?

Mr. HUMPHREY of Washington. My information is that he is not. He is buying, however, in British Columbia now instead of buying those which are manufactured in the United States.

Mr. Donovan speaks of photographs he took of closed shingle mills. I have some here.

Now, if any of my distinguished Democratic friends wish to see how a closed shingle mill looks I have photographs of a dozen taken between Bellingham and Seattle by Mr. Donovan as he rode through on the train. These mills are closed now, the men who worked in them are out of employment, and if any Democrat wants to look upon the handiwork of the tariff, so far as the shingle business is concerned, I would like him to come over and meditate upon these pictures. I can furnish him a hundred more if he wants them.

Mr. ALLEN. Will the gentleman yield?

Mr. HUMPHREY of Washington. Certainly.

Mr. ALLEN. About five years ago, would not the gentleman have found quite a number of shingle mills not in operation in Michigan by reason of the fact that they were through there?

Mr. HUMPHREY of Washington. I do not know whether they were through in Michigan or not, but I know they are not through in Washington except while the Democratic Party is in power. They will commence running again just as soon as you get out.

Mr. DIES. Will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Texas?

Mr. HUMPHREY of Washington. Certainly.

Mr. DIES. Where was the market for the products of these mills?

Mr. HUMPHREY of Washington. To which do you refer?

Mr. DIES. The shingle mills that are closed, and of which the gentleman speaks.

Mr. HUMPHREY of Washington. The shingle mills sell their shingles throughout the whole of the United States, some of them coming as far east as New England, even.

Mr. DIES. How does the gentleman figure that the patrons of the industry of the United States go to Canada and buy shingles since they can not buy them any cheaper than they can in the United States?

Mr. HUMPHREY of Washington. I do not know how many times I will have to answer that in order to satisfy Democratic minds. I have been answering that for 25 years, but my Democratic friends get up and ask it all over again. I do not expect to answer it satisfactorily to any man who is wedded to the free-trade theory. But I think I can take the shingle business and illustrate it, it seems to me, clearly to any unprejudiced mind. As soon as they knew that this law was going on the statute books, our people knew that they could not compete with the shingle manufacturers who employed cheap oriental labor. So they closed their mills. The fact remains that the British Columbia manufacturers sold their shingles in this country. These are the facts: Perhaps my friend is not familiar with this fact, that over in British Columbia—and I am speaking of the shingle industry particularly—they have an association for the purpose of fixing prices. They limit the output. They fix the price—it is permitted under their laws—by combination. They control the price absolutely. They come into our markets, and if our shingle mills begin to sell lower, they immediately reduce their price. But we can not go back into their markets and retaliate, because the very moment we attempt to cross the line they have a law that provides for confiscation of any product that is sold in that market for less than it is sold here. They know that they can get control of our market and can hold it, and they are doing it to-day.

Mr. DIES. So far from being a free trader, I will say to the gentleman from Washington that I voted against free lumber.

Mr. HUMPHREY of Washington. I am glad you did so.

Mr. DIES. I say this in order to disabuse his mind on that score. Even though I am opposed to free lumber, I am still troubled with this other seemingly economic paradox, that free lumber has not reduced the price of lumber but has put the manufacturers out of business. I confess to a sufficient degree of nebulosity, but I can not get that thing through my cranium.

Mr. HUMPHREY of Washington. I will not argue with you that you are not in that condition.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. HUMPHREY of Washington. I will.

Mr. JOHNSON of Washington. Is it not a fact that agents of Canada recently have been all through western Washington to see if the manufacturers there were shipping such products as sash and doors into Canada cheaper than they were selling them in the United States; that they have been making that investigation for the purpose of retaliating, but have found that at least one big sash and door factory was running, regardless of price received for its products, in order to sustain life in the town in which it is established?

Mr. HUMPHREY of Washington. I had reported to me recently a specific instance of some sash and door manufacturer in your district where the agents of British Columbia were sent to investigate and find out whether or not he was selling lower in British Columbia than in Washington. And I remember a few years ago a friend of mine had a great deal of trouble to keep one of his logging engines from being confiscated, the Province of British Columbia claiming that he had sold it for less than the market price. Our friends over in British Columbia do not agree with the economic policy of the Democratic Party. They prohibit their country from being made the dumping ground for the cheap goods of other countries. They take the position that it is to their interest to manufacture their own products and give wages and work to their own labor and keep their own mills running, even if they do have to pay a little more for the finished product.

Now, I will give you a little evidence from British Columbia, if there is any doubt in the mind of any gentleman here in regard to the conditions, so far as the shingle industry is concerned, in British Columbia and in the State of Washington. I read first from a letter that I have received from the president of the Rockport Mill Co., at Rockport, Wash.; just one sentence. He says:

> Inclosed please find circular which is mailed to all British Columbia mills by the Shingle Agency of British Columbia.

Then he adds this:

> This Democratic administration has not and is not aiding the great Northwest. We might as well go out of business until there is a change in the administration.

Then here is the circular that is sent out, headed "The Shingle Agency of British Columbia":

> THE SHINGLE AGENCY OF BRITISH COLUMBIA.
> *441 Seymour Street,*
> *Vancouver, B. C., March 30, 1914.*
>
> TO MEMBERS: We had information from Seattle this morning that the following are about the prices now being paid the Washington mills for shingles:

Stars	$1.45
Extra clears	1.80
Eurekas	2.15
Perfections	2.40

> The above are the prices paid the mills by wholesalers, and are net, less the usual 2 per cent for cash.
>
> The market for "extra clears" has strengthened since our last report, the price having advanced about 5 cents. It was stated this morning that the Old Oregon Lumber Co. and two or three other wholesalers were out with circulars to the mills offering $1.85, but it was further stated that these same people already had a large quantity of shingles in transit, and that it was believed this was a scheme to boost the price until they could unload their transit line. The next few days will determine this. Our information is that "stars" are rather weak at $1.45 and that "perfections" are just about steady at $2.40.
>
> It is reported that some cedar logs are being bought for $11, the price ranging from that to $13. A number of mills are closed, but the eastern buying is so much below normal that the close down has not had any appreciable effect on the market. We are advised that two or three good-sized shingle mills south of Seattle have recently gone into receiver's hands and that two or three others are expected to crash any day.
>
> This for your information.
>
> Yours, very truly, J. M. ALLEN, *Secretary.*

A few days ago, as some of you who were present at the time will remember, I called attention to the fact that 95 per cent of the entire output of the shingle mills of British Columbia is to-day being sold in the United States. These are some of the facts. I think it is incumbent upon the gentlemen who voted for this tariff bill to explain why. Now I read a letter written to me by Mr. Cooper, who is president of the Hazel Mill Co., Bellingham, Wash. He says:

BELLINGHAM, WASH., *April 21, 1914.*

HON. WILLIAM E. HUMPHREY,
House of Representatives, Washington, D. C.

DEAR MR. HUMPHREY: Since reading the press report of your persistent effort to force the attention of the Democratic administration to the effect which tariff reduction has had in this State I have been several times on the eve of writing you a letter detailing some of the actual conditions which exist at the present time as a direct result of the removal of the tariff which protected the forest products of the State of Washington from competition across the line in British Columbia.

I read with very much interest and with not a little indignation the report of Secretary Redfield, which was undoubtedly garbled to some extent, but which purported to be a summary of the reports which his department had received from their agents sent into this State sometime since. I am fully persuaded that the agents sent here by Mr. Redfield either willfully misrepresented the facts or that their statements were only published in part and that the reports were twisted in such a manner as to be wholly unreliable. One of the representatives—I think his name was Cleveland—came to this city and spent about eight hours in looking up the entire lumber industry of Whatcom County. Of the time this representative spent in Whatcom County, four hours of the eight were spent in my office. I furnished him with evidence which would be conclusive to any person searching for facts that so far as the shingle industry was concerned the main portion of that industry was being transferred to British Columbia, and that under existing conditions it was only a matter of a very short time until shingle manufacturing in the State of Washington would be a thing of the past, so far as the small manufacturer was concerned. I showed this gentleman correspondence which I had from some of the larger distributors in the New England States, from Buffalo east, showing that they were negotiating for connections in Vancouver. A number of them made trips from Buffalo, Rochester, New York, and Boston to Vancouver, where they entered into contracts with Canadian manufacturers for their future requirements of shingles.

The laws in Canada permit the manufacturers to organize selling agencies or any other means which they desire for the purpose of maintaining a uniform price for their product. In Vancouver, which is the headquarters of the shingle industry, 95 per cent of the shingles produced in that territory belong to a manufacturers' organization, which establishes a price on that portion of their product which is to be sold in Canadian territory. This has been the condition for the last three or four years. The secretary of this organization is an acquaintance and a personal friend of the writer, and for that reason I am familiar with the working out of their plan. On their XXX shingles, which correspond to our grade known as 6/2 Extra "A"'s, their price to the retail trade is based on $2 per 1,000 shingles, f. o. b. cars at the mill. They allow a reduction of 10 cents per 1,000 on this price to the wholesale dealer. This grade of shingle represents probably 85 per cent of all the shingles used in the Canadian territory. Being permitted to establish this price and maintain it, they have the benefit of their own market at these prices, and therefore to whatever extent there is a demand for shingles in Canadian territory they are able to supply that demand at a profit. Their organization has been so close and so closely allied with the retail yards that it is practically impossible to sell an American-made shingle in their market. Having practically the exclusive control of their own market, they are able to ship their surplus into the American market at a lower price if they desire.

You are undoubtedly familiar with forestry conditions in British Columbia and also with the methods of manufacturing forest products, particularly cedar, in that territory. In the first place, the forests of British Columbia are apparently more favorably situated for cedar than are the forests of the State of Washington or Oregon. Along the coast and in fact over a large portion of British Columbia cedar timber predominates. I presume that fully 50 per cent of their stumpage is cedar. In the past loggers have, to a certain extent, been compelled to leave a very considerable portion of the cedar in the forest when logging fir, because there was no market for cedar logs which would justify the cost of taking them out of the woods, especially where the logging was somewhat difficult. Many of these old cuttings have been taken up by shingle manufacturers and are being reworked for the bolt timber, either private owners or the Canadian Government selling the cedar remaining on this land at a price of 25 cents per cord stumpage. The mill owner, after acquiring a tract of this cut-over land, lets a contract out to some Japanese contractor for the delivery of the timber in the form of shingle bolts either at the mill or at some convenient point on stream or tidewater. From the very nature of the business and the labor connected therewith, the Japanese can underbid white labor. Under existing conditions, therefore, the woodsman on the American side—the common laborer—is put in direct competition with the Japanese and other cheap labor of British Columbia. Coming to the mill itself, the Canadian manufacturers have available all the oriental labor they require for almost every position in the mill, and these laborers are efficient in every manner. As shingle sawyers and shingle packers the Chinaman, at from $1.50 to $2 per day, is the equal in efficiency with the American laborers at from $3 to $5 per day.

Mr. Redfield in one of his speeches very contemptuously asked his hearers if it were not possible for Americans to be as efficient as Canadians. There is no question but what Americans are as efficient as any other people, but an American can not compete with a Chinaman on a Chinese standard. Seventy-five per cent of the mill laborers in British Columbia are orientals, either Chinese, Japanese, or Hindus. Mr. Redfield's representatives knew this fact, because at least one of them was taken to British Columbia by one of the shingle manufacturers in Washington and made a thorough investigation. Whether or not he reported the result of his investigation I am unable to say. It is true nevertheless that in the shingle mills, for instance, the larger percentage of the laborers are orientals; in fact, practically all of them excepting the foreman, the saw filer, and the engineer. A few white men may be mixed in with the crew, but the oriental crew rules.

Again, it is necessary for the logger when supplying the fir mills with logs to take out of the woods the cedar which grows with the fir, or at least such portion of it as he can market. It is possible in British Columbia to prevent the exportation of any timber excepting timber which was crown grant prior, I think, to the year 1887. The result of this is that cedar logs suitable for the manufacture of cedar lumber and shingles have been selling in the open market in Vancouver during the past six or eight months, and even longer, for from $7 to $10 per thousand feet board measure, which represents a cost to the mill per thousand shingles for the raw material of from 75 cents to $1. On the American side of the line the price of the lowest grade of shingle logs for the past eight months, and, in fact, most of the time prior to that, has been $11 per thousand, and during the past six months the prevailing price for this grade of shingle logs has been as high as $12 and $13, with $14 and $15 per thousand for the camp run or better grade of cedar logs. This represents a cost per thousand shingles of from $1.10 to $1.40 on the American side of the line, as against 75 cents to $1 on the Canadian side of the line. You will readily understand how impossible it is for the manufacturer to compete successfully against that handicap. Another very material advantage which the Canadian manufacturer has is due to the fact that our laws permit them to come across to this side of the line whenever log prices are equal, or nearly so, and create a shortage on this side by buying up our logs and allowing their logs to accumulate. One year ago they did this very thing. The Fraser River Mills & Timber Co., which is largely the Canadian Northern Railroad, sent their representative to the Sound and purchased practically the entire surplus of fir logs and took them up the Fraser River. This created a shortage of fir logs on this side of the line and raised the price about $2 per thousand. The price of fir logs at that time was advanced on the American side to $14 per thousand for No. 1, while on the Canadian side they were sold at $6 per thousand for No. 2 and $10 per thousand for No. 1, our logs being $7, $10, and $14 per thousand for the three grades, making an average price of a little over $11 per thousand. You will note by these facts, first, that the British Columbia timber commissioners protect their mills by preventing the exportation of logs to the American side, that the American Government allows the Canadian manufacturers to come into American territory and create a shortage of logs, and therefore put up the price on his competitor, the American manufacturer; that Canadian laws allow the manufacturer of lumber to organize and maintain a uniform price, and, in fact, that they encourage them to do so, and are basing their price of stumpage on the price of the manufactured product of the forest. This you can readily ascertain by reading the act passed recently which increases the price of stumpage some time in the future and provides for increases every five-year period.

The present price of stumpage in British Columbia is 50 cents per thousand; the price of American stumpage in the United States in the remote regions where the Government still has forest reserves being a minimum of $2 per thousand. Again, the conditions in British Columbia allow the mills to employ oriental labor; the conditions in this country prevent the employment of oriental labor. The Fraser River Mills, for instance, have something like 450 Hindus in their plant in all branches of the industry, not only in the common labor but in the skilled labor. They have Japanese and Chinese in their cedar departments, and practically all of the mills, as I have stated above, employ this cheap labor. The price paid the Hindu is about $1.05 to $1.25 per day. The Japanese receive from $1.05 to $1.50, and I am unable to say what the Chinese labor receives. In piecework, however, in the manufacture of shingles—that is, in sawing—the Chinaman receives 12 cents per thousand, while his competitor on the American side receives from 16 cents to 18 cents per thousand. As a shingle packer he receives 6 cents per thousand and nails his own bands, while the American packer receives 9 cents per thousand and has his bands nailed for him.

It seems to the writer that a man in the position of Secretary Redfield who will ignore these facts and will come before the people of this State as he did in Seattle and insult the intelligence of our citizens by questioning the ability of the American to compete with the Canadian, knowing that it is not a competition between Americans and Canadians, has not the honesty of purpose which should actuate the motives of the people's representative. If in changing the conditions in this State from one of ordinary prosperity to a condition where both labor and capital are in distress; I say, if changing these conditions had resulted in bringing something to benefit the ultimate consumer then there might might have been a reasonable show of justice or a reasonable excuse for making such a change, but the fact that the ultimate consumer does not benefit, particularly in this instance, as the writer discussed at length with Mr. Redfield's representative, and that gentleman admitted that he had been one of the agents who conducted the investigation in relation to the alleged lumber trusts among the lumber dealers; that they found in the investigation that the ultimate consumer received no benefit whatever from the changes which took place in the producing territory at the various times; that owing to the fact that the retail dealers' association and their business was intrastate and not interstate business the Government had failed in its attempt to better the conditions or change the market price to the consumer.

The situation in the lumber business in this State is certainly deplorable. It is perhaps somewhat due to the general condition of the country, but so far as the cedar business is concerned the depression is largely due to the fact that shingles are being imported into this country in large quantities from British Columbia. The fact that Washington mills have at various times been compelled to close down in order to save their capital from ruinous competition among themselves certainly emphasizes the fact that there was no necessity for still further burdening this community by allowing an alien people to absorb our territory. The condition can only be represented by an illustration that if you have a 10-gallon measure already filled with water it would not help the condition by attempting to pour another 5 gallons of water into that measure. The State of Washington supplied the demand of the entire United States for shingles, and there has been no time during a great many years that I have been in the business but what the State of Washington was not capable of filling and has filled the entire demand for the cedar shingle. There never has been a time since Coxey's army invaded Pennsylvania Avenue that there has been so many idle men in the State of Washington as there are to-day, and there would be more idle men in the State were it not for the fact that a very large number of the manufacturers are keeping their plants in operation and footing their losses out of their capital. This condition can not be continued for any great length of time.

The small manufacturer and the small competitor will be eliminated, and the lumber and shingle business will be transferred to the hands of the few large timber owners, either here or in British Columbia. Instead of breaking up trusts, the inevitable result will be that the timber of the State of Washington and the manufacturing of that tim-

ber will be transferred from the large number of small manufacturers to the few large manufacturers. Under the present law this is as inevitable as that night should follow day. Competition will be eliminated in this manner, and after competition has been eliminated and all of the timber, or at least the larger portion of the timber, is held in the hands of syndicates like the Weyerhaeuser, Puget Mill Co., and various other large companies which you know of, then, undoubtedly, the Democratic Party will have accomplished the results they are seeking, because they certainly can not decline these facts.

I inclose herewith a small note taken out of the American Lumberman. You will note that in framing the tariff bill some of our eastern friends very kindly put in a joker which provided that flooring, manufactured in every way as we manufacture it on the Pacific coast, could be shipped from Canada into the American market free of duty, but when it is bored for nails, as some of our Minnesota, Wisconsin, Michigan, and eastern manufacturers are compelled to do in the manufacture of maple and oak, then this flooring carried a duty of 15 per cent. This is a very nice little joker and protects the manufacturers of hardwood against competition; but these same manufacturers, many of whom reside in Minneapolis and neighboring cities, are owners of large tracts of Canadian timber and are therefore interested in bringing that Canadian timber into the American market without paying to the American Government anything for its support. So far as the writer knows, the duty just mentioned above is the only one imposed on manufactured lumber coming into the States. On the other hand, the Canadian Government imposes an ad valorem duty of 25 per cent on any lumber shipped from the United States into Canada which has been manufactured above the mere process of sawing. In other words, the administration has given over everything which was worth while in the American market without receiving one item in exchange. Just as soon as this Democratic policy with regard to forest products is fully established the manufacture of cedar will be transferred from Washington to British Columbia. The movement in that direction has already started. Some of the more cautious people, however, are waiting to satisfy themselves whether or not the fall elections will change the situation by returning Republicans instead of Democratic Representatives in Congress.

It is not necessary for me to assure you that we all appreciate your efforts. You have no doubt received expressions from a great number of people here in the State. I can only assure you that if they have not written to you personally in regard to the matter they are very plain in their expressions here at home.

Wishing you every success, I beg to remain,

Yours, very truly,

GEO. A. COOPER,
President the Hazel Mill Co.

Mr. DIES. Mr. Chairman, will the gentleman yield there for a question?

Mr. HUMPHREY of Washington. No; I do not want to yield just now.

Think of an investigation of the lumber and shingle business of a great county like Whatcom County, where they have dozens of mills, including five or six of the largest mills in the United States, in eight hours. Four hours of this eight were spent with Mr. Cooper, but these experts in their report do not even mention that they talked with him.

Yet he was the only real representative of the lumber and shingle industry that they saw in the entire northwest part of the State that has hundreds of mills and millions of dollars invested in the lumber industries. They failed to mention Mr. Cooper or his statements. They kept this out of the record, just as they kept out of the record the report made to them by the West Coast Lumber Manufacturers' Association.

Now, I want to read just two paragraphs from a letter which was handed to me to-day by my colleague [Mr. JOHNSON]. It is a personal letter, and I will only say that it comes from the secretary-manager of one of the large logging institutions in our State. Here is what he has to say about it:

The new tariff law has already produced hard times. Lumber and saw logs are at the lowest prices in just 20 years. We are now getting for logs the same price that was paid in 1894, during Cleveland's administration. Many of the mills and logging camps have been compelled to close down, and we have thousands of idle men in the Northwest.

Belgium structural steel and Swedish high-grade and tool steel has practically captured our market. I am using Swedish steel in the blacksmith shop, feeding our men Australian beef, New Zealand butter, and Chinese eggs. They are all of the good quality, equally up to our domestic products, and considerably cheaper. You can not borrow money now unless you have gold bullion to put up for security. In other words, we have just about the same d—d Democratic times as 20 years ago. I have not seen a business man smile in three months, and we are all wearing out our old clothes.

Mr. CARTER. They are lucky to have them. [Laughter.]

Mr. HUMPHREY of Washington. Certainly we are. It is well, under a Democratic administration, that we saved some of our old clothes, left over from the days of prosperity under Republican rule [applause on the Republican side], otherwise we would have been in a most deplorable shape. In fact, we would not dare to appear in public at all. [Laughter.]

Now, Mr. Chairman, I want to call attention to another fact. Of course, after the Democratic Party had placed shingles upon the free list, they were not satisfied with doing that. We still thought there might be some hope of getting into the markets of the east coast of this country after the Panama Canal should be opened. But now the Democratic Party, in the face of their platform pledges, in the face of the promises they made to the people when they were asking for their suffrages, in the face of the promise that was made by their candidate for President when he was on the stump, in the face of these promises, upon which the people of the United States relied and upon which we of the West had expended millions of dollars and contracted to spend millions of dollars more, believing that after that party in Congress had gone upon record by roll call, after the proposition had passed the Senate without a single Democratic vote against it, that we could rely upon it, we still hoped that we might be able to do something after the Panama Canal was opened. But the Democratic Party now takes away that last hope.

I hold here in my hand a letter that was given to me by the distinguished leader of the minority [Mr. MANN]. I received one similar to it not long ago. This is a letter that was written from Vancouver, British Columbia. I want to read it. It says:

VANCOUVER, BRITISH COLUMBIA, *April 6, 1914.*

FRANK B. STONE,
701 Railway Exchange, Chicago, Ill.

DEAR SIR: Owing to the fact that the Parliament of British Columbia has just passed a law fixing until 1955 the royalties on timber, and limiting the license fees which are paid in lieu of taxes on timber limits during that entire period, together with the removal of the tariff on lumber products into the United States, I desire to call your attention to the timber possibilities of this Province. For many years the writer was a manufacturer of lumber and shingles at Manistee, Mich., and therefore realizes fully this opportunity of securing high-grade timber at a low price.

We act as timber brokers and would be glad to submit timber properties for your consideration, and as such would assure you the benefit of many years' residence in Vancouver, and submit only such properties as have stood our own inspection, and which will favorably stand any investigation of the representations we may make.

If the act providing for the exemption from Panama Canal tolls of American coastwise vessels is repealed, it will be possible to deliver British Columbia timber to the Atlantic seaboard several dollars per thousand cheaper than United States Pacific coast lumber products, due to the lower rate at which foreign ships can carry lumber as compared to American ships, which under present laws are required to carry freight from any American port to any other American port.

We recommend timber located tributary to tidewater on the east coast of Vancouver Island and the west coast of the mainland, and can submit properties for your consideration which have been cruised by our own men.

We shall be glad to give you any information you may desire relating to the timber resources and conditions here and would appreciate hearing from you.

Yours, very truly,

HOME SECURITIES CORPORATION (LTD.),
ROBT. S. BABCOCK, *Managing Director.*

I want to call the attention of the House to the fact that that statement comes from British Columbia, from Vancouver.

Now, I hold in my hand a clipping taken from the Vancouver (British Columbia) Province under date of April 17 or 18. It is recopied in the Seattle Post-Intelligencer under date of April 20. I read:

[From the Post-Intelligencer, Seattle, Monday, April 20, 1914.]

BRITISH COLUMBIA GLOATS OVER TOLLS.

British Columbia lumbermen, hoping to invade the New York market and that of Buenos Aires, are looking forward to the great pageant parade to be held here on June 12 as a means of bringing their lumber wares to the attention of the Atlantic coast and South American buyers. Mr. Harry G. Hayes, who has been appointed by the lumbermen to take charge of their parade at the time of the pageant, pointed out this morning that following the opening of the Panama Canal there was no reason why British Columbia should not capture a large share of the lumber trade of the east coast.

At the present time Washington mills competing against the southern yellow-pine interests manage to dispose of a large quantity of Douglas fir every year on the Atlantic coast, selling both in New York and Buenos Aires by cargo as well as shipping overland by car to points in the Eastern States. Although at the present time the British Columbia mills do practically no cargo shipping at all to the east coast and sell comparatively few carloads to the eastern American towns, Mr. Hayes believes that as soon as the canal is opened for commercial business the mill owners of this Province will be placed in a splendid strategical position from a trade point of view.

BRITISH SHIPS CHEAPER.

British bottoms are cheaper on charter than American boats, he points out, and Seattle and Tacoma can not, under American maritime regulations, use British bottoms for carrying shipments to New York. This will mean that Vancouver can ship cargoes to New York cheaper than Washington cities will be able to do through the canal.

This relative cost advantage applies even at the present time around the Horn. He claims, further, that although the cost of lumber production is somewhat higher in British Columbia than in Washington, the difference is not by any means so great as has been supposed, and, in fact, some of the British Columbia mills are producing just as cheaply as any of those across the line. The Panama Canal will have the effect, he believes, of cutting the cost of transportation to the Atlantic coast by about 60 per cent, thus helping out all the Douglas fir shippers in their fight for the market against the yellow-pine shippers of the Southern States.

The net result will be, he points out, that both British Columbia and Washington shippers will be aided by cheaper transportation, and through their ability to use British bottoms the lumbermen of this Province will have an extra advantage over their fellow shippers of Douglas fir in Washington State.

OPPORTUNITY IS HERE.

"The opportunity for British Columbia lumbermen to seize the Atlantic coast markets, both in North and South America, is here," declared Mr. Hayes with enthusiasm this morning. "Realizing the advantages which they can obtain in a publicity way, many millmen of the city propose to bring the lumber resources of the Province to the attention of the buying public just as prominently as possible. It is planned to make the lumber parade for the pageant the most preten-

tious affair that ever took place in the city. It will probably be from 3 to 4 miles long. Moving-picture companies are now preparing to take views of the parade, and by means of these, through newspaper reports of the affair and also through the reports which the ad men will send home from their convention here at the same time, our lumbermen look forward to a great deal of beneficial publicity in the East, which, as I have pointed out, will no doubt lead to the building up of a large future cargo business on the east coast.

CAME FROM PUBLICITY.

"I may say here that much of the success achieved by the Washington mills came by reason of the advertising they obtained through the monster parades held in Tacoma and Seattle a few years ago. The Seattle parade at the time of the Alaska-Yukon-Pacific Fair there was 7 miles long. Moving pictures of it were shown all over the United States."

Mr. Hayes announced this morning that efforts were being made to have every mill in or near the city well represented in the lumbermen's pageant parade. There will be many special floats typical of the various phases of the industry.

The Hoo Hoo Order, which is a lumbermen's organization, is to hold its concatenation here at the time of the pageant, and proposes to cooperate with the mill owners in making the lumber parade a success. The Hoo Hoos are to hold an organization meeting in the Press Club rooms in the Leigh Spencer Building to-morrow evening, when arrangements for the concatenation and for assisting in the parade will be perfected.

May I stop here long enough to express the hope that the distinguished Secretary of Commerce will send a representative out there to head that parade of British Columbia manufacturers celebrating the opening of the Panama Canal; to celebrate the capturing of the markets on the east coast of the United States, that belong to the manufacturers of Washington, Oregon, and California—markets that we could hold to some extent if they would leave the law on the statute books that we now have? I hope the distinguished Secretary will have a representative there, who may give the optimistic and plausible Secretary a description of that celebration, in order that he may use it as a text for one of his glowing and entirely accurate speeches upon the prosperity that the present tariff law has brought to the country.

You will notice that moving pictures are to be taken of the parade to be used for advertising purposes. I hope one of these pictures may be permanently installed in the office of the Secretary of Commerce, to show the glory of free trade and efficiency. I sincerely hope that these moving pictures will show a banner at the head of that parade containing the declaration of the Democratic platform in regard to Panama Canal tolls.

Mr. HELVERING. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. HELVERING. Has the gentleman, or anybody interested in that phase of the question, made any arrangement for such a display?

Mr. HUMPHREY of Washington. I should think the Democratic Party would be so proud of it that they would arrange it. The Democratic Party seems to be proud to turn the markets of this country over to the foreigner. It seems to be proud of surrendering American interests to foreign interests. It seems to be proud of the fact that it has violated its platform promises and secured the suffrage of the people under false pretenses.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. GARRETT of Tennessee. I understand that the article which the gentleman has just read is predicated upon the repeal of Panama Canal free tolls.

Mr. HUMPHREY of Washington. Yes.

Mr. GARRETT of Tennessee. What advantage will the British Columbia lumbermen have over the Washington and Oregon lumbermen, just by reason of the repeal of the free tolls? They will all have to pay the tolls.

Mr. HUMPHREY of Washington. I will read an editorial which I hold in my hand that will probably make that clear. This is from the Post-Intelligencer, of Seattle, Wash., Monday, April 20, 1914:

BRITISH COLUMBIA EXPECTANT.

In another column of this paper is reprinted a news story from the Vancouver, British Columbia, Province which should set aside all doubts as to the effect of the repeal of the canal tolls on the Washington lumber industry. The joyful expectations of the British Columbia lumbermen are made known by a Canadian newspaper in a manner sufficiently clear to carry conviction.

"The opportunity for British Columbia to seize the Atlantic coast markets is here," is one enthusiastic declaration.

"British bottoms are cheaper on charter than American boats and Seattle and Tacoma can not, under American maritime regulations, use British bottoms for cargo shipments to New York. This will mean that Vancouver can ship cargoes to New York cheaper than Washington cities will be able to do through the canal."

These are the declarations of a Canadian newspaper rejoicing over the advantage that is to come to British Columbia if President Wilson's canal policy goes through. And this advantage is a dead loss to the people of this State. It is not a loss to be suffered exclusively by those who have capital invested in the lumber business, but by every resident of the State however remotely connected with the timber industry.

British Columbia is clapping her hands in anticipatory glee, seeing the day when the canal and all the eastern trade marts will be ready for Canada, while we are being entertained with talks on subsidies, phantom shipping trusts, and dissertations on the meaning of party platforms. It is a strange state of affairs, indeed, that there are people in Seattle who will not see the obvious, who will not even believe it when their competitors across the line exultantly proclaim their victory.

There is no getting away from the facts, as far as this State is concerned. The British bottoms sailing from British Columbia can and will take the business away from us if the canal is opened to them on an equal basis. If that means anything to the people of this State it is time to get busy.

Now, my distinguished friend from Tennessee is very well informed, as I happen to know, in regard to the shipping laws of our country, and has studied that question; and when I call his attention to the fact that the British Columbia manufacturer can use foreign bottoms for conveying his products through the canal to the east coast of this country, and that the manufacturers and other producers in the State of Washington and the other Pacific coast States can not use foreign bottoms, he will see at once the disadvantage under which we labor, because the gentleman has investigated that question, and he knows that you can charter a foreign vessel for very much less than you can charter an American vessel.

Mr. McKENZIE. Will the gentleman yield for a question for information?

Mr. HUMPHREY of Washington. Certainly.

Mr. McKENZIE. So far as the South American trade is concerned, the Washington lumbermen could ship their products in foreign vessels, could they not?

Mr. HUMPHREY of Washington. Yes.

Mr. McKENZIE. And in that way they would have an equal opportunity so far as the South American countries are concerned?

Mr. HUMPHREY of Washington. Yes.

Mr. McKENZIE. But that would not be true of shipments to our own country.

Mr. HUMPHREY of Washington. That would not be true of the east coast. And, as I have before called attention, I think there is a wide misunderstanding of one fact with reference to South America.

The Panama Canal is not going to benefit the west coast to any great extent in its trade with South America, because, if you will take the map and look at it, you will find that the canal is not going to shorten the distance to but very few of the markets between the west coast of this country and South America. In fact, if you will take the globe and look at it, you will find that it is nearer from Seattle around Cape Horn to Buenos Aires than it would be to go through the canal. So that, as I have taken occasion to point out several times before, the great benefit of the canal to the west coast from a commercial standpoint would be to enable us to sell in the markets on the east coast of this country and enable us to buy in the markets on the east coast of this country.

As having a general bearing upon the questions I have been discussing, I will insert a recent editorial from the Philadelphia Enquirer and a clipping from the Press, of Blaine, Wash.

[From the Philadelphia Enquirer.]

QUIBBLERS IN HIGH PLACES.

One of the most irritating features of the present administration at Washington has been the difficulty in pinning down certain members of the Cabinet to plain statements of facts. There has been a disposition to be oracular, to talk mysteriously, and to promise things that are rarely performed. During the discussion on the Underwood bill manufacturers who had the temerity to protest against the provisions of that measure were treated as if they were malefactors who had no rights in their own business and no interest in the prosperity of the country. Veiled threats were mare against them, and Mr. Redfield, the Secretary of the Department of Commerce, caused word to go out that if any manufacturer reduced wages or shut down his plant and gave the operations of the new tariff bill as the reason for such an action, such a person would be subjected to the scrutiny of the Department of Commerce and, if found guilty, would be punished.

Just how the facts were to be ascertained and what rights Mr. Redfield had in the premises, and under what law the supposed culprits were to be punished, were not made clear at the time and never have been since. At all events, the threat, when not hotly denounced, was laughed at as a bit of political froth. The tariff bill was passed, and as a result of its operations mills have been closed and many others are working on half time. But there have been no investigations by the Department of Commerce or by anybody else, and it is safe to say that there will not be. The results would be too unpalatable for Democratic consumption. They would prove that the opponents of the Underwood bill knew what they were talking about and that the threat to punish them for not being prosperous under unwise laws was the height of absurdity.

Secretary Redfield, in a speech before the Chamber of Commerce of Columbus, now asserts that he never threatened to investigate manufacturers, and he speaks vaguely of "half truths" and of "mental gymnastics" on the part of his critics. If he did not say what he has been quoted as saying, what did he say? And if he did not mean what he said, what did he mean? The trouble is not with Secretary Redfield's critics, but with Secretary Redfield. He and his associates appeared to think it was treason for the manufacturers to oppose their radical legislation, and now that it has proved a failure they are trying to throw the blame on the critics of the new laws instead of the new laws themselves.

No, Mr. Secretary, it is not "silly yarns" and falsehoods that have created the present economic conditions, but the half-baked laws and

acts of inexperienced men who have been suddenly intrusted with the affairs of state and who are helplessly struggling in the bogs and fogs of their own words, which they are constantly explaining and which the average citizen is totally unable to understand.

[From the Blaine Press.]

RELIEF IS DEMANDED.

Under the terms of the present tariff law the President has power to restore the duty in whole or in part if it is found any industry is being injured by the new law. It is hoped that a more thorough investigation will be made than the farcical, so-called investigation directed by Secretary Redfield. Earnest and honest research will show that lumber and shingle industries of this country have been seriously injured by the new schedule and that beneficiaries are manufacturers of Canada. To replace the duties on these products will be but a simple act of justice.

There is another remedy, however, which may be applied—to secure from British Columbia a removal of the prohibition on exports of timber from the Province. It is asserted that with this prohibition removed our manufacturers could successfully compete with Canadian manufacturers without the aid of a protective tariff.

Either one or the other of these remedies is demanded to put an end to the injustice and injury to American manufacturers caused by the Democratic tariff tinkering.

—

The effect of the repeal of the free-tolls provision for American ships can be seen from the comments of the Canadian press. The Vancouver Province says:

"The opportunity for British Columbia to seize the Atlantic coast markets is here.

"British bottoms are cheaper on charter than American boats, and Seattle and Tacoma can not, under American maritime regulations, use British bottoms for cargo shipments to New York. This will mean that Vancouver can ship cargoes to New York cheaper than Washington cities will be able to do through the canal."

Now, Mr. Chairman, I will yield five minutes to my colleague [Mr. FALCONER].

Mr. FALCONER. Mr. Chairman, the gentleman from Tennessee [Mr. GARRETT] has just asked a question. The gentleman voted for the repeal of free tolls, and I should like to ask the gentleman a question for information. What is the position of the United States on the proposition that no Canadian Pacific Railway ships can go through the Panama Canal? Can ships owned by the Canadian Pacific Railway go through the Panama Canal or not, under the laws of our Government touching on canal service?

Mr. GARRETT of Tennessee. Does the gentleman ask me that question?

Mr. FALCONER. Yes. The gentleman's question led to that.

Mr. GARRETT of Tennessee. As I remember, the canal act that was passed in 1912 laid a prohibition upon railroad-owned ships going through the canal, but I think that referred to domestic ships.

Mr. FALCONER. Domestic ships?

Mr. GARRETT of Tennessee. Yes.

Mr. MANN. If the gentleman will permit, that has been a disputed proposition ever since before the bill was passed in 1912.

Mr. HUMPHREY of Washington. But under the President's proposition that we ought to give up everything, are we not called on to give in to the Canadian Pacific Railway?

Mr. MANN. There is no doubt that if the present House had it to do, they would give it away.

Mr. GARRETT of Tennessee. Mr. Chairman, I always try to answer questions candidly. I do not now recall the exact wording of the provision which was in the act of 1912.

Mr. FALCONER. The provision is that any ships which are owned by any railroad under the jurisdiction of the Interstate Commerce Commission shall not use the canal. I understand Sir Edwin Gray holds that there is a question as to whether or not that applies to Canadian Pacific Railroad ships and urges that it can not apply, while our people hold that it does, on account of a little stretch of Canadian Pacific Railroad running down to New York. The proposition is intended to cover and prevent railroads controlling water and land routes of transportation and rates to the exclusion of competition. But later when this question comes up it might be suggested that if you are going to give any railroad the right to employ ships give it to an American railroad rather than to a foreign railroad. The point is brought out by the gentleman from Washington [Mr. HUMPHREY], my colleague, that British ships can take cargoes of lumber from British Columbia through the canal and land them in any seaport city on the south or east coast of the United States, and that that is a big advantage, because of the fact that our maritime laws demand a higher standard for the American sailor. We pay higher wages and we can not compete, and there is a difference of at least $3 a thousand, which is enough to exclude our lumber from the market.

I want to say here, Mr. Chairman, that the great difficulty with this discussion of the duty on lumber and shingles is that it has become a partisan discussion. Now, I submit the proposition that if you had taken the lumber schedule separately and alone and treated the subject from a scientific standpoint you might have consented to have left the tariff on shingles, while you might have taken the tariff off of lumber.

Mr. GARRETT of Tennessee. May I ask the gentleman there, has the price of shingles been reduced out there?

Mr. FALCONER. I will say to the gentleman from Tennessee that there has been no set price on shingles for any great length of time in the history of the shingle industry of the country as far as I know. The price may range low part of a season and then go up. Now, I do not attribute every change to politics. The price of shingles are lower, a little, to the manufacturer than they have been for some time past. He is selling them for less money, and quite a good deal less.

Mr. GARRETT of Tennessee. Does the gentleman know how much less?

Mr. FALCONER. About 15 to 25 cents a thousand. Six to two 10-inch clear butts, $1.65 a thousand f. o. b. at the mill to the broker or yard; five to two, all clear, sell for $1.85 up to possibly $2.10 at times.

Mr. GARRETT of Tennessee. But he is getting the logs at a less price.

Mr. FALCONER. A little less price; yes. The logs are lower in our State than they have been for some time. They are probably not as low as they were in 1894 as suggested.

Now, one point I want to make is that shingles are a by-product of the lumber industry. The question was asked on the floor of the Senate some days ago why shingles should be protected and clapboards and other long board lumber not protected. The answer is that you can not make clapboards or long lumber out of broken down, burned, refuse timber, but you can make shingles out of this broken stuff, or anything that is 16 inches long.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. MANN. I yield the gentleman five minutes more.

Mr. FALCONER. Now, Mr. Chairman, this one thing obtains in the shingle business. The big lumbermen log off thousands of acres of land, and they sell the big tracts of land in small tracts to men who want to make little farms. They divide them up into 20-acre tracts. Mr. A, Mr. B, and Mr. C all buy a 20-acre tract, and, instead of going to work at some place in the city for day's pay, they cut off cedar stumps close to the ground, and old cedar windfalls, some of which have been lying on the ground for a century and still sound, into 4-foot lengths, for convenience, and cord them. They spend their time cutting this refuse cedar and incidentally clear up the land at the same time.

Now, the first mill to shut down on account of the low price is the independent shingle mill—not the combination lumber and shingle mill—employing 25 to 50 employees; and the shutdown of the little mills necessitates these farmers going into the city to work in order to get a competency for themselves and families on which to live. The first mill to feel the effects is the little mill. The combination mill does not have to shut down. You take the large lumber mills, and their shingle mill produces a by-product. The refuse stuff, the slabs and centers and butts, are taken off of the logs, making the raw material cost very little; they pass it over to the shingle mill, which cuts it up into blocks and shingles, and they can make a little profit, because the timber does not cost them anything; but the man who has to buy his shingle bolts is at a disadvantage, because they cost money.

Mr. WINGO. Will the gentleman yield?

Mr. FALCONER. Yes; I yield.

Mr. WINGO. How much per thousand do they get for the shingle bolts?

Mr. FALCONER. You do not sell shingle bolts by the thousand, but by the cord. A cord will cut about 5,000 shingles, and they get $3.75 to $4.50 a cord at the mill. You will understand that the stumpage, the raw material, is worth about $1 a cord and the rest is labor and expense of hauling it to mill. Now, from the standpoint of conservation, what is going to happen if you do not have a little shingle mill in the vicinity of logged-off land? The farmer is going to roll the material into piles and burn it. There are hundreds of thousands of cords in the State of Washington that have been burnt in that way when there was no mill to which to sell cedar refuse found on the land in the process of clearing. You can see the economic side of that question.

We should consider this question without any reference to politics; the people of the State of Washington are not very politic. Party talk does not amount to so much to the live, thinking people of the State of Washington. They have no fight to make on any party except as the party causes conditions that makes them discontented. I wish the Democratic Party could look into this question from a scientific standpoint, without prejudice. The party is to be commended for living up to the party platform and taking the duty off, but there would

be no inconsistency in putting it back on shingles if you thought it proper. That would show ability and fairness and justice on the part of the party in power that would commend itself to the people who are familiar with this matter.

Mr. Redfield has sent out his report. I think he is honest; I do not think there is any question about it. My observation is that he wants to get at the facts, but questions asked here by Members demonstrate that gentlemen do not understand this question. I do not believe that Secretary Redfield understands this feature of the lumber industry and the effect of free trade on shingles to the people of the State of Washington. It has a bearing—an economic bearing.

There should be a reasonable duty on shingles.

In 1912 the British Columbia shingle mills manufactured only 50 per cent of their capacity. This year they are reported running full time; their big mills putting our little mills out of the manufacturing business.

Mr. HUMPHREY of Washington. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has two minutes.

Mr. WINGO. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. WINGO. What is the labor cost per thousand of shingles for turning the bolt into shingles?

Mr. HUMPHREY of Washington. I do not know. I have put that matter in the RECORD several times, but I do not remember.

Mr. Chairman, I want to make this observation in regard to a statement made by my colleague [Mr. FALCONER] as to the attitude of the Secretary of Commerce. I am not going to criticize him; but I again call attention to the fact that the Secretary sent in his report based upon anonymous testimony, a method of securing evidence, so far as I know, that has never been followed by any reputable person in any reputable undertaking. If he really wants to know the truth about the shingle industry and was really sincere in sending in the report, why is it that for weeks he has kept still, made no explanation as to why he based his report on such evidence, and why has he not rebuked these agents that went out there, spent days in pretended investigations, and suppressed legitimate evidence, and did not attempt to give the country the truth? I am not going to criticize him, but I simply repeat the facts.

Mr. KEATING. Mr. Chairman, as a consequence of the distressing conditions now prevailing in Colorado, John D. Rockefeller, the world's richest man, finds himself arraigned at the bar of public opinion and required to give an account of his stewardship.

That Mr. Rockefeller understands this is evidenced by an article which appeared in the morning paper, and which contained a statement prepared by Mr. Rockefeller's son, John D. Rockefeller, jr.

I will insert this statement in the RECORD, but before doing so it might be well for me to briefly refer to the circumstances which provoked it.

As Members of the House know, my State has been since last September the scene of a bitterly contested coal strike. This strike directly affected every coal mine in the State and seriously interfered with almost every other line of business activity.

The contest has been marked by a great deal of violence. I will not attempt to go into that phase of the subject just now. Suffice it to say that the situation finally passed beyond the control of the governor of the State, and he called on the President of the United States to send Federal troops to the disturbed district with a view to restoring order. President Wilson was familiar with all the issues involved in the Colorado controversy. As early as last October his attention was called to the gravity of the situation, and since then he has followed the principal developments with sympathetic interest.

He knew that this House had sent a committee to Colorado, headed by the distinguished gentleman from Illinois, Dr. FOSTER, and he was familiar with the testimony submitted to that committee.

It will therefore be seen that the President was well equipped to give Gov. Ammon's request for Federal troops the consideration which its importance demanded.

The newspapers tell us that the President, undoubtedly influenced by his intimate knowledge of the situation in Colorado, decided to make a final effort to peacefully adjust the differences between the miners and the mine owners of Colorado.

We are told that the distinguished gentleman from Illinois, Dr. FOSTER, journeyed to New York, with the approval of the President, for the purpose of enlisting the support of John D. Rockefeller in this effort to bring peace to my distracted State.

Dr. FOSTER had an interview with Mr. Rockefeller and, according to newspaper report, urged that gentleman, in the name of the President of the United States, to consent to an arbitration of all the issues involved in the strike. Mr. Rockefeller declined to act on the President's suggestion as conveyed by Dr. FOSTER.

He practically reaffirmed the position which he took before the Committee on Mines and Mining of this House, when he declared that he and his associates "had nothing to arbitrate," and would, if necessary, sacrifice their holdings in Colorado rather than deal with their employees as an organized force brought together for the purpose of collective bargaining.

After his conference with Dr. FOSTER young Mr. Rockefeller issued a statement to the press. We are told that he and his personal attorney worked over it all afternoon, and therefore it may be considered as the deliberate, carefully prepared presentation of the Rockefeller position.

In this statement Mr. Rockefeller says:

> After a long and full discussion of the question in all its aspects, Dr. FOSTER was unable to make any suggestion which did not involve the unionizing of the mines or the submission of that question to arbitration.

A little further on Mr. Rockefeller says:

> On this question of the open shop, namely, the right of every American citizen to work on terms satisfactory to himself without securing the consent of the union, I reiterated to Dr. FOSTER what I said in my examination before the Committee on Mines and Mining a few weeks ago—that we regarded this as a matter of principle which could not be arbitrated.

Then Mr. Rockefeller undertakes to still further define his position, as follows:

> We do not question the right of any workmen to freely associate themselves in unions for the furtherance of their common and legitimate interests, but we do assert the equal right of an individual to work independently of the union if he so elects.

Mr. Chairman, the American people will not take issue with Mr. Rockefeller on many of the propositions laid down in his statement. We are not quarreling with the Rockefeller theories, but we are denouncing the Rockefeller practices.

In this statement Mr. Rockefeller seeks to convince the American people that he does not deny his men the right to organize, but that he is so jealous of the interests of the humblest of workingmen that he would sacrifice millions in order to maintain that workingman's right to labor without going into a union.

For 34 years I have lived in the State of Colorado. I am familiar with conditions in the mining camps controlled by Mr. Rockefeller, and I want to say to the Members of this House that it has been the uniform practice of Mr. Rockefeller and his representatives to deny to their employees the right to belong to a labor union. It is a matter of common knowledge in southern Colorado that the man who belonged to a union could not secure employment in a mine owned or controlled by Mr. Rockefeller and those associated with him. It is true that hundreds of union men did secure employment in those mines, but it is also true that the moment their union affiliations were discovered their employment ceased.

I do not know that Mr. Rockefeller is familiar with this fact. He testified before your committee that he had not visited his Colorado estate for 10 years, and that he based his statements upon information supplied him by his representatives.

If those representatives furnished Mr. Rockefeller with the information on which he bases the assertion, "We do not question the right of workingmen to freely associate themselves in unions," then they have grossly deceived their employer.

Mr. Rockefeller also attempts to convey the impression that the recognition of the union was made a condition precedent to the settlement of the strike. This assertion is also not in accord with the facts.

Secretary of Labor Wilson spent 10 days or 2 weeks in Colorado last fall laboring to bring about a settlement of the strike. He finally submitted a proposition which provided that the strikers should return to work on the terms suggested by the operators—that the question of an increase of wages should be referred to arbitration, and that a commission should be created for the purpose of devising a substitute for recognition of the union. What the Secretary had in mind was the formation of a tribunal in which the men had confidence and to which they could appeal for redress of grievances.

This proposition was submitted to Mr. Rockefeller's representatives and was rejected by them.

Apparently the Rockefeller idea was that gigantic corporations, employing thousands and tens of thousands of men, were justified in insisting that they must be permitted to deal with those men as individuals and not as combinations of individuals. Such a view is repugnant to the best thought of the country.

Mr. Rockefeller, in the statement which he made, makes another point. He repeats the old, old story that many of the demands now made by the men on strike in Colorado have been

granted by the company before the strike was declared. He says, referring to Dr. FOSTER:

I showed the Doctor that all of the points which are claimed to be at issue, with the exception of unionizing the camps, the Colorado Fuel & Iron Co. had voluntarily granted to its employees long before the strike was called or talked of.

Then the newspaper adds that the five points which Mr. Rockefeller says were settled before the strike began are the eight-hour day, semimonthly pay, check weighmen, regulation of company stores, and increased wages.

As I said a moment ago, I have lived in Colorado for 34 years; for 20 years of that time I have taken a rather active part in public affairs. I am familiar with the records of Mr. Rockefeller's company. I am familiar with the efforts made in the legislature to secure the enactment of these laws, and I want to say to this House that every one of the laws here referred to was placed upon the statute books in the face of the bitter and continued opposition of Mr. Rockefeller's company, and that after we succeeded in getting those laws on the statute books Mr. Rockefeller's company has refused to obey the laws, that they have gone into the counties where they have operated, secured control of the governmental machinery in those counties, and in that way succeeded in suspending the enforcement of the law, so far as the coal-mining companies were concerned. That assertion may sound rather harsh to some ears, but fortunately it is not dependent upon my word alone. I have here a summary of a report submitted by a Federal grand jury in Colorado. This grand jury was brought together last September. It was not a grand jury made up of the friends of the union. In fact, the leaders of the union were disposed to charge that the grand jury had been packed against them, and one of the acts of the grand jury was to return indictments against the leaders of the miners' union on the ground that they had violated the Sherman antitrust law, and yet that grand jury, which to my mind was as impartial as a grand jury very well can be, brought in a report of the conditions in the southern Colorado coal camps. Among other things this is what the grand jury found:

That State laws have not been enforced so as to give all persons concerned benefits which are derivable therefrom.

That coal companies have nominated, elected, and controlled county officers; that county officers elected by the coal companies have shown undue activity in controlling elections, having in one instance changed the precinct boundaries, presumably to eliminate unfavorable votes of the miners, and have thus aroused not only political but social dissatisfaction.

That many camp marshals, whose appointments and salaries are controlled by coal companies, have exercised a system of espionage and have resorted to arbitrary powers of police control, acting as judge and jury and passing sentence.

That camp marshals have brutally assaulted miners.

That miners can not complain of real grievances without being discharged.

That the scrip system is still in effect.

That miners feel under an unjust obligation to trade at the company stores, because of the attitude of mine superintendents.

That check weighmen have been denied the miners.

Mr. Chairman, that is a report submitted by a Federal grand jury, which deals specifically with those things mentioned in Mr. Rockefeller's statement this morning, those things which he says his company freely and gladly gave the men before the strike was thought of. As a matter of fact, his company never gave the men those things. The Legislature of Colorado, in response to a popular demand, enacted laws giving the men those things, and Mr. Rockefeller and his associates, because they were able to control the local officers in one section of Colorado, the section where their properties are located, succeeded in suspending these beneficent laws which had been enacted by the legislature of all the people.

Mr. BRYAN. Mr. Chairman, will the gentleman yield?

Mr. KEATING. Certainly.

Mr. BRYAN. In view of the following testimony of Mr. Rockefeller here at the recent hearings, does the gentleman not think his suggestion as to what he has given to the employees is entirely immaterial and ought not to be presented? Here is the testimony:

I do not know when the last one was held—

Referring to the last meeting of the board of directors—

I have never attended any except that one in Denver, which I should think was at least 10 years ago.

Mr. KEATING. Yes; Mr. Rockefeller testified, as I said a moment ago, that he represented his father on the board of directors of the Colorado Fuel & Iron Co.; that his father controlled 40 per cent of the stock, and that so far as active participation in the affairs of the company was concerned he made no pretense of doing that; that he depended entirely upon the representatives sent to Colorado to look after his father's interests; that those representatives reported to him frequently; that he had the utmost faith in them, and he felt that when he selected such God-fearing men to represent him he did not owe anything else to anyone.

Mr. GORMAN. Mr. Chairman, will the gentleman yield?

Mr. KEATING. Yes.

Mr. GORMAN. From the gentleman's reading, does he mean to convey to the House the statement that the laws passed by the Legislature of Colorado are enforced throughout Colorado except in the mining territory controlled by Mr. Rockefeller's mines?

Mr. KEATING. Mr. Chairman, in answer to the gentleman from Illinois I will say that I presume that in every State he will find some laws enacted by the legislature which have not been enforced. I remember very well that Florence Kelly, testifying before the House committee, said that in the gentleman's State she had been unable to secure the enforcement of a statute dealing with child labor so long as she conducted her prosecutions at the scene of the crime; that it was necessary for her to take the defendant to another part of the State in order to punish him.

What I mean to say is this: Colorado is a progressive State. Colorado is a law-abiding State. So far as law enforcement is concerned, in my judgment, the law is enforced as impartially and as consistently in every county in Colorado—with the exception of the two counties I have noted—as it is in any county in any State of the Union. In the counties of Huerfano and Las Animas, the two counties where Mr. Rockefeller and his associates dominate the situation, they have owned every public official for the last 10 years as absolutely as the Members of this House own their coats, and it has been impossible in those counties to secure an enforcement of the law. As a result of that fact I will say that while in those two counties we killed twenty-six times as many men in our coal mines in proportion to the number employed as were killed in Austria in 1910, not a single coroner's jury during 10 years brought in a verdict holding a coal-mine company responsible.

In 10 years in Huerfano County, despite the great number of deaths and great number of men injured, not a single damage suit has been filed against a coal-mining company, and in Las Animas County a judge has not permitted a single damage suit to go to a jury in 10 years. According to the evidence now on file with the secretary of state in Denver, last year we killed 106 men in our coal mines and we seriously injured 356. Under our law coal-mining companies are compelled to make a sworn statement of their operations, and, among other things, they have to show how much they pay in damages to the men injured in their mines. Now, we killed 106 and we seriously injured 356, and according to the sworn statement filed by the coal companies the killing and maiming of these men cost them in damages only $36,000.

Now, I submit to this House, if there were no other evidence, if we did not have this report of the grand jury, if we did not have the testimony of your own committee sent out for the purpose of investigation, if we had nothing to indicate to us the situation in this State, nothing with which to answer Mr. Rockefeller's statement of this morning except those naked figures, they would be sufficient to convince any reasonable man that conditions in southern Colorado were not what they should be.

Mr. Chairman, I am glad that the President responded to the appeal of the governor of our State. The situation had gotten beyond his control. How it got beyond his control, what elements were at work, it is not for me to discuss at this time. It is sufficient to know that in order that human life might be preserved and that property might not be destroyed it was necessary for the governor to call on the President of the United States for troops and that the President exercised his constitutional authority and granted the desired relief.

Mr. MADDEN. Will the gentleman yield?

Mr. KEATING. I yield to the gentleman.

Mr. MADDEN. Does not the gentleman think that it is a condition of weakness of State administration when the governor of a State is compelled to call upon the President of the United States to maintain order within the boundaries of the State over which he presides?

Mr. KEATING. Well, I think that question answers itself. If he had been able to deal with the situation, he would not have called on the President.

Mr. MADDEN. There must be something wrong with the administration.

Mr. KEATING. There is something dreadfully wrong with the administration——

Mr. MADDEN. What is it?

Mr. KEATING. I do not approve of the manner in which the governor of my State has handled the militia. He has made the mistake of permitting the militia of our State to be turned over to the coal-mining companies of our State. He has made the mistake of compelling those militiamen to practically take the place once occupied by the gunmen from West Virginia; and, according to the testimony presented to your committee, some of the mine guards were permitted to enlist in the militia, and one of the militiamen testified he received $3 a day from the coal company and drew his pay also from the State.

Mr. MADDEN. Does not the gentleman think the governor of Colorado ought to be impeached?

Mr. KEATING. I am prepared to leave that to the people of our State. I want to assure the gentleman our people may be depended on to do the wise thing under all the circumstances.

Mr. MADDEN. Did the people of the gentleman's State know him as well as they do now?

Mr. KEATING. They thought they understood the governor fairly well.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. KEATING. Yes.

Mr. BYRNES of South Carolina. The guard to whom the gentleman refers as receiving $3 a day and who enlisted was Messengale?

Mr. KEATING. I refer to the man mentioned to me the other day by Dr. FOSTER. I do not know his name.

Mr. BYRNES of South Carolina. There is one man, Messengale, and I want to know whether the gentleman knew he had been a gunman or a native of the gentleman's State, born and raised in the county in which he lived, and from which he afterwards enlisted?

Mr. KEATING. The statement made to me by Dr. FOSTER is this—and I think I am repeating it with a fair degree of accuracy: A man who had been employed as a guard at a mine had testified that while acting as militiaman of our State he was drawing $3 a day from the mine owners and his salary from the State of Colorado. The great mistake which our governor made, in my judgment, was in permitting one side of the controversy to lose faith in the representatives of the State government, but I am sure that when the Federal troops go into Colorado they will so conduct themselves that both sides to this unfortunate controversy will understand they must obey the law.

Mr. MADDEN. That is right; it should be that way.

Mr. KEATING. The Federal troops are not sent there to champion one side or the other. They are to impartially enforce the law.

Mr. GORMAN. Will the gentleman yield?

Mr. KEATING. Yes.

Mr. GORMAN. Does the gentleman know whether or not the report in the public press is true that the mine operators of West Virginia have volunteered the use of their machine guns to the mine operators in Colorado?

Mr. KEATING. I do not know as to that. I do know that I was in Colorado when we heard of the purchase of the first machine gun, and at that time I told the governor what I do not mind telling this House, that I felt that when a coal-mine operator brought a machine gun onto the soil of my State he was offering my State an affront which the governor should resent.

Mr. STAFFORD. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Colorado yield to the gentleman from Wisconsin?

Mr. KEATING. I yield.

Mr. STAFFORD. From the narration of facts by the gentleman and by other gentlemen about this unfortunate condition in Colorado the condition there must be very chaotic, but the gentleman relies upon the protecting arm of the Federal troops to restore order there. The President, according to this morning's newspaper dispatches, states that he is merely sending them there as a temporary force until the legislature can be called in extraordinary session to enable the State to cope with the difficulty. If that is the fact, how do you propose to meet that serious difficulty if your governor is incompetent and your militia seemingly inefficient?

Mr. KEATING. Of course, we all hope that when the legislature meets on the 4th of May it will devise plans which will assist very materially in restoring order in Colorado. I have a great deal of faith, I will say to the gentleman, in the members of our legislature, and I think our governor blundered when he did not call them in extra session before the situation became as acute as it is now. But the thing drifted out of his control. He waited too long. That was the trouble. Now he has called the legislature in extra session. I think the governor himself is aroused to the seriousness of the situation, and I think as soon as the legislature can have the time to seriously consider relief measures, you will find that the great masses of the people of Colorado, who, as I tell you, are as progressive, as intelligent, and as law-abiding as the people of any other State in this Union, will insist on the enactment of such measures as will restore order in Colorado and render it unnecessary for the governor of that State to appeal to the Federal power in the future.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. KEATING. Yes.

Mr. MADDEN. It has been stated on the floor of the House by gentlemen, I think from Colorado, that the difficulty the State administration had to encounter was the fact that there was no money in the State treasury, and they had to go around the State hawking the certificates issued by the governor, to be cashed in places where they could find the cash. Is that true?

Mr. KEATING. I presume the Colorado treasury is in the same condition as the treasury of almost every other State.

Mr. MADDEN. I beg the gentleman's pardon. Most every other State of the Union has plenty of money.

Mr. KEATING. My experience with legislatures—and it has been very limited—has been that the legislature appropriates practically all the revenue available. That is especially true in a new State, a State like Colorado, which is only a little over 30 years old, which has a tremendous area to govern and which has a comparatively scanty revenue. Such a State as Colorado, even with the most rigid economy, is always right up to the line, with no money to spare. So when this unusual expenditure was rendered necessary the governor was called upon to sell the warrants of the State, and it is true that the bankers got together and undertook to take up those warrants.

Mr. MADDEN. I presume that was due to the fact that the State had no credit because they had not been conducting the affairs of the State along decent, economical lines. Is not that true?

Mr. KEATING. No; it is not true. The fact is, as I stated—and he will find the same condition in every Western State practically—that the current revenues, with the most rigid economy, are barely sufficient to meet the needs of the State, and even then we can not do the things we should be doing.

Mr. MADDEN. I was inclined to believe, from what I heard in connection with the administration of the laws of Colorado, the officers of the State were not only extravagant but rotten in the control of the finances of the State.

Mr. KEATING. I will say to the gentleman that there was once a Republican legislature that was called the "Robber Seventh."

Mr. MADDEN. Oh, I was not talking politics. I was talking decency.

Mr. KEATING. I will say to the gentleman that I think there is absolutely no foundation for that charge.

Mr. MADDEN. It was some gentleman from Colorado on the floor of the House who made the statement.

Mr. KEATING. Possibly the gentleman from Illinois misunderstood him——

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. KEATING. I will.

Mr. SELDOMRIDGE. I did not hear the statement made by the gentleman from Illinois [Mr. MADDEN] who has just taken his seat.

Mr. KEATING. It was suggested by the gentleman from Illinois that Colorado's financial difficulties, the inability of the State to meet the extraordinary expenditures rendered necessary by the calling out of the militia, were due to the fact that the State administration had been extravagantly conducted. I told him that it was my judgment that our affairs had been conducted with at least reasonable economy.

Mr. SELDOMRIDGE. I think the statement made by my colleague is correct, and that there never has been any disclosure of fraud or abuse of public office there that has resulted in any disastrous condition to the treasury, but it is a condition that is the outgrowth of the development of the State.

Mr. MADDEN. I understood the gentleman who is now addressing the House to say a few days ago that the officials of the State found it impossible to raise money because there seemed to be, in effect, a conspiracy—I am not using his words—among many people of the State to prevent the administration of the State from getting the money needed to accomplish the work before it.

Mr. SELDOMRIDGE. The condition arises when a state of insurrection exists; when the governor, under the constitution, is obliged to call on the military arm of the State to preserve order, and is obliged to secure immediate funds to pay the militia and to provide for their sustenance.

Mr. MADDEN. Then the conclusion that I reached, based on the statement now reiterated by the gentleman from Colorado [Mr. SELDOMRIDGE], was and still is that if the affairs of the State of Colorado had been conducted as any ordinary business man would have conducted his affairs, with a view to a proper and economical administration of the finances, the authorities of the State of Colorado would not now find themselves in a condition where they are obliged to go to the banks in a time of war to get money on their tax warrants.

Mr. SELDOMRIDGE. I will state to the gentleman that the State of Colorado has always taken care of her normal debt, that her bonds always sell in the market at the right prices, that there is no depression in the securities of the State; but that these present conditions are of sudden happening, and an extraordinary condition has arisen, and the governor faces its existence from the facts which I narrated the other day, being obliged to go to the clearing house and the moneyed interests of the State to pay for the militia.

I thank my colleague for yielding to me.

Mr. KEATING. I promised to yield to the gentleman from Pennsylvania [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, I merely wanted to ask the gentleman whether the humiliation of the State of Colorado, in being obliged to call upon the Federal Government in this time of trouble, is greater than that of the State of Pennsylvania and that of the State of New York in 1877, when they made frantic calls on the Government of the United States for help?

Mr. KEATING. Not at all. If we succeed in solving some of the perplexing and distressing problems that confront our State at the present time, we shall forget all about any humiliation to which we may have been subjected.

Mr. STEENERSON. Mr. Chairman, I understood the gentleman to state that these coal mines in Colorado are owned by corporations. Will the gentleman state whether they are Colorado corporations, or foreign corporations organized in other States?

Mr. KEATING. I am not informed as to that, but it is my impression that they are Colorado corporations.

Mr. STEENERSON. It seems to me that the violations of law enumerated by the gentleman in his speech on the part of these corporations would be sufficient ground, if the corporations are local in Colorado, for the forfeiture of their charter, and if they are foreign corporations, organized outside of the State of Colorado, they would be sufficient grounds for ousting them from the State; and it seems to me strange, considering the fact that this trouble has existed for some considerable length of time, that the State authorities have not sought to forfeit the charters of these corporations or else ousted them from the State if they persisted in violating the law.

Mr. KEATING. I will say to the gentleman that these violations of the law have continued for some years. Sometimes the necessity for action has been urgent and the violations of the law have been flagrant, and on such occasions there would be an outburst of public sentiment. But sometimes when these outbursts occurred the weapons to deal with them would not be at hand or the officers of the State would not be disposed to do their full duty. Before we could secure effective action public sentiment would cool and the offending incident would be forgotten.

Mr. STEENERSON. Both of these proceedings would be under the attorney general of the State. The gentleman stated that the rest of the counties of Colorado were not dominated by these conditions, but only two counties. Now, it seems to me, if the governor wanted to put a stop to the conditions that exist that would be the way to do it—either bring about proceedings for the forfeiture of the charters of the corporations or else to oust the corporations from the State.

Mr. KEATING. I agree with the gentleman that if the officers and people of Colorado will take hold of this problem vigorously they can solve it; and in saying that I do not mean to say that they should devote their entire attention to crushing the corporations involved. I contend that if anyone else has violated the law, if anyone else is at fault, we should deal with equal vigor with that man or that organization.

Mr. TREADWAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Colorado yield to the gentleman from Massachusetts?

Mr. KEATING. Yes.

Mr. TREADWAY. Do I understand the gentleman to infer from that that if the officers of the State of Colorado, from the governor down, carried out their duty and performed their functions as he sees them to be, there would be no need whatever for the President to send any Federal troops out there to quell the present condition of things?

Mr. KEATING. If the laws of the State of Colorado for the last 10 years had been impartially enforced——

Mr. TREADWAY. And that condition is being continued to-day?

Mr. KEATING. That condition were being continued to-day, we would not be confronted with this situation. To my mind this condition could not exist if the laws had been enforced in Huerfano and Las Animas Counties. Of course the State administration could have taken part in enforcing those laws; but if the laws had been vigorously enforced in those two counties, this situation, in my judgment, would not have come about.

Mr. TREADWAY. Mr. Chairman, will the gentleman yield for another question?

The CHAIRMAN. Does the gentleman from Colorado yield to the gentleman from Massachusetts?

Mr. KEATING. Yes.

Mr. TREADWAY. Then we are to understand by the fact that the President has been called upon to send Federal troops there that the authorities of Colorado acknowledge their inability to cope with the situation in those two counties? Does the gentleman concur in that inference?

Mr. KEATING. Perhaps a simple way to state the proposition would be that they are unable to deal with existing conditions. The situation got away from them and they could not deal with it right now. Therefore I contend that the governor, having permitted the matter to slip out of his hands, acted wisely when he called upon the President of the United States for assistance; and I think further that the President of the United States acted with equal wisdom when, putting aside technical objections which might have been raised—quibbles, perhaps, but still objections—sent troops into Colorado for the purpose of restoring order and protecting human life. And I want to say that, without regard to party, without regard to faction, the people of Colorado approve the action of the governor in calling for Federal troops, and they approve the action of the President in sending Federal troops. I have yet to hear of a single protest from my State. Mine owners and miners, the governor and his friends, the governor's opponents, Democrats and Republicans, united in the appeal to the President, and I think it is the first time that such an appeal has come to the President as the result of a labor difficulty. It was in response to that practically unanimous appeal that the President sent the troops to Colorado.

Mr. TREADWAY. May I ask the gentleman one more question?

Mr. KEATING. Certainly.

Mr. TREADWAY. I understood the gentleman to say a few minutes ago that the county officials of the two counties where the troubles exist are entirely under the control of the so-called corporation interests there. Am I correct in that?

Mr. KEATING. In justice to the present district judge and district attorney, who while they are not county officers have jurisdiction within the county, I want to except them from my statement. With the exception of the district judge and district attorney every county official in those two counties for the last 10 years has been owned by the coal companies as absolutely as the gentleman from Massachusetts owns his coat. Necessarily that statement is made on my authority, and I must be responsible for it.

Mr. TREADWAY. Right there; I am unfamiliar with the methods of securing office in Colorado. Are these officials elected by the voters of the county, or are they appointed by the governor, or how do they secure their offices?

Mr. KEATING. They are elected by the voters.

Mr. TREADWAY. Of the respective counties?

Mr. KEATING. Yes.

Mr. TREADWAY. So that the local suffrage——

Mr. PLATT. And woman suffrage at that——

Mr. TREADWAY. Is the method by which they secure their positions?

Mr. KEATING. Yes.

Mr. TREADWAY. Consequently they are not amenable to the governor.

Mr. KEATING. They are not amenable to the governor; no.

Mr. FALCONER. From the information we have had from both gentlemen from Colorado, and from the press dispatches, it would appear, as has been stated, that the State militia is under the control, or influence at least, of the money interests of the State, and in those controversies they have been partisan as between the two opposing factors in the contest. Is that correct?

Mr. KEATING. I will say to the gentleman that whatever my personal opinion of that matter may be, one party to the controversy was convinced that such was the case, and therefore lost confidence in the militia, and came to regard the militia not as impartial officers enforcing the law, but as partisans, as representatives of the coal-mining companies.

Mr. FALCONER. That being the case, would it not appear to the gentleman, and does it not appear to the Members of the House, that State militia ought to be eliminated from industrial controversies in every State?

Mr. KEATING. I quite agree with the gentleman, and I think we will never get an efficient militia in this country until we protect those boys against the necessity for doing police duty in such controversies as exist in Colorado. [Applause.] It is not fair to them.

Mr. PLATT. Will the gentleman yield for a question?

Mr. KEATING. Yes.

Mr. PLATT. If as a result of ordering Federal troops into Colorado the strike should collapse, will not the President of the United States be accused of having sent those troops to Colorado to aid John D. Rockefeller—unjustly accused, of course?

Mr. KEATING. I can not imagine anyone in this country accusing Woodrow Wilson of aiding John D. Rockefeller. I do not believe anyone will; not even the gentleman——

Mr. PLATT. Not even the Western Federation of Miners?

Mr. KEATING. Not the Western Federation of Miners. They are entirely too intelligent to make any such charge as that.

Mr. TREADWAY. Can the gentleman tell us for how long these county officers are elected?

Mr. KEATING. Two years. They are elected every two years.

Mr. TREADWAY. Is the recall of officials in effect in Colorado?

Mr. KEATING. Yes; it has been since the last election.

Mr. TREADWAY. Has it been tried in connection with these particular men?

Mr. KEATING. Mr. Chairman, I have trespassed too long upon the patience of my friend the gentleman from Louisiana [Mr. WATKINS], chairman of the committee. I promised him that I would occupy only a few minutes. My purpose in rising was not to enter into this general discussion, but I wished to reply to the statement made by Mr. Rockefeller in this morning's papers, because I felt that that statement to a great extent was not founded upon the facts as they exist in Colorado, and I felt that I should call public attention to the facts as I know them. I thank the House for bearing with me. [Applause.]

Mr. Rockefeller's statement is as follows:

In view of the inaccurate accounts which have appeared in the press regarding my interview with Congressman FOSTER, chairman of the Committee on Mines and Mining, I think it proper to make the following statement:

"In that interview, at which Starr J. Murphy, one of the directors of the Colorado Fuel & Iron Co., was present, we pointed out to Dr. FOSTER that of the many coal companies in southern Colorado we were interested solely and as minority stockholders in the Colorado Fuel & Iron Co., which controls only about one-third of the output of that State.

"After a long and full discussion of the question in all its aspects, Dr. FOSTER was unable to make any suggestion which did not involve the unionizing of the mines or the submission of that question to arbitration. We stated to him that if the employees of the Colorado Fuel & Iron Co. had any grievance we felt sure that the officers of the company would be willing now, as they have always been in the past, to make every effort to adjust them satisfactorily. We showed the doctor that all of the points which are claimed to be at issue, with the exception of unionizing the camps, the Colorado Fuel & Iron Co. had voluntarily granted to its employees long before the strike was called or talked of. These points are:

VOLUNTARY CONCESSIONS.

"1. The eight-hour day. This was established by the fuel company for all of its coal miners some time ago.

"2. Semimonthly pay. When this question was raised by one or two miners in one of the camps of the company the officers at once studied the question and without delay decided to pay not only the miners in that particular camp twice a month, but all of the miners employed by the company.

"3. Checkweighmen. For several years the fuel company has raised no objection to the employment by the miners of their own checkweighmen, as is done in eastern mines where union labor is employed. In order that new men might understand their right in this matter, some time since the officers of the company gave instructions that circulars should be posted in all the mines, stating that the company had always encouraged its miners to employ their own checkweighmen.

"4. Company stores. It has been charged that the employees of the fuel company are obliged to buy at the company's stores. The storekeepers are under strict instructions to say to all that they are at liberty to trade where they please; that the company is glad of their patronage, but that their standing will not be affected one way or the other by their action in the matter. As a result of a study made in one of the mining camps of the company it was found that only 22 per cent of the wages of the men was spent in the company's stores.

"5. Wages. In spite of the fact that no dividends have been paid on the common stock of the company since our connection with it—a matter of at least 10 or 12 years—and only $780,000 has been paid on the preferred stock, of which the greater portion represented payment on account of an accrued dividend which had accumulated during many years, the company voluntarily increased the wages on its miners last year by a total amounting to $300,000 a year and of its steel employees by a total of $250,000 a year. The wage scale compares favorably with that of any similar mines, whether union or nonunion, in any part of the country.

UNIONIZING OF CAMPS.

"In addition to the above, the only matter which has been raised by the union is the unionizing of the company's camps. On this question of the open shop, namely, the right of every American citizen to work on terms satisfactory to himself without securing the consent of the union, I reiterated to Dr. FOSTER what I said in my examination before the Committee on Mines and Mining in Washington a few weeks ago, that we regarded this as a matter of principle, which could not be arbitrated.

"In reply to his request for some suggestion as to how the strike could be terminated, we said to Dr. FOSTER that if the President would make a public statement that the Federal troops were being sent to Colorado for the purpose of enforcing obedience to the law and securing to every citizen the right guaranteed to him by the Constitution to be protected in his life and liberty, whether he chooses to work as a member of a union or not, it would go far to terminate the deplorable conditions which now exist.

"The impression has been created that if we could agree to submit to the unionizing of the camps of the Colorado Fuel & Iron Co. this entire trouble would be ended. The public generally does not seem to consider whether or not this is a right or fair demand and in the interest of the employees of the company as a whole. What would become of the great majority of its workers were such surrender to be made? All of its loyal nonunion employees, numbering several thousands, more than 90 per cent of the total number employed in the mines, who have been faithful and true to its interests, would be thrown out of employment unless willing to submit as individuals to union dictation. Is it the spirit of American fair play which is asking such ruthless disregard of the interests of honest men, or is it the spirit of partisanship and self-seeking?

"Are the labor unions, representing a small minority of the workers of the country, to be sustained in their disregard of the inalienable right of every American citizen to work without interference whether he be a union or a nonunion man? Surely the vast majority of American citizens will, without fear or favor, stand for even-handed justice under the Constitution and equal right for every citizen.

"But there is a final aspect of this grave matter which deserves more than all else the attention of the American public in this crisis; whether the Colorado Fuel & Iron Co. and the other operators have been wholly free from blame or not in the present controversy, the issue now to be decided is whether the State, or failing the State, the Nation shall make good the constitutional guaranty of law and order.

"At the present moment in Colorado funds are being openly raised and citizens are being armed with the avowed purpose of resisting the authorities of the State. Since that issue of resistance to constituted authority is raised, it is unthinkable that the Colorado Fuel & Iron Co. or any of the companies operating in the State should be asked to yield its position on a preliminary and now extraneous matter of dispute, as the price of securing the withdrawal of forces armed to combat their own Government."

—

JOHN D., JR., EXPLAINS STAND AGAINST UNION.

NEW YORK, *April 28.*

John D. Rockefeller, jr., to-night issued a statement defining the position he, as a director of the Colorado Fuel & Iron Co., had taken in regard to the mine strike now in progress in that State, which has cost the lives of many men, women, and children and caused large property losses.

The statement, which was given out after Mr. Rockefeller and his personal attorney, Starr J. Murphy, had worked over it all afternoon, is in part as follows:

"In view of the inaccurate accounts which have appeared in the press regarding my interview with Representative FOSTER, chairman of the Committee on Mines and Mining, I think it proper to make the following statement:

WILLING TO MEET GRIEVANCES.

"After a long and full discussion of the question in all its aspects Dr. FOSTER was unable to make any suggestion which did not involve the unionizing of the mines or the submission of that question to arbitration. We stated to him that if the employees of the Colorado Fuel & Iron Co. had any grievances, we felt sure that the officers of the company would be willing now, as they have always been in the past, to make every effort to adjust them satisfactorily. We showed the doctor that all of the points which are claimed to be at issue, with the exception of unionizing the camps, the Colorado Fuel & Iron Co. had voluntarily granted to its employees long before the strike was called or talked of."

The five points which Mr. Rockefeller says were settled before the strike began are the eight-hour day, semimonthly pay, checkweighmen, regulation of company stores, and increased wages. The statement continues:

"OPEN SHOP" A PRINCIPLE.

"In addition to the above, the only matter which has been raised by the union is the unionizing of the company's mines. On this question of the open shop, namely, the right of every American citizen to work on terms satisfactory to himself without securing the consent of the union, I reiterated to Dr. FOSTER what I said in my examination before the Committee on Mines and Mining a few weeks ago, that we regarded this as a matter of principle, which could not be arbitrated.

"In reply to his request for some suggestion as to how the strike could be terminated, we said to Dr. FOSTER that if the President would make a public statement that the Federal troops were being sent to Colorado for the purpose of enforcing obedience to the law and securing to every citizen the right guaranteed to him by the Constitution to be protected in his life and liberty, whether he chooses to work as a member of a union or not, it would go far to terminate the deplorable conditions which now exist.

DENIES OPPOSING UNIONS.

"It was a source of profound regret to us that our conference with Dr. FOSTER did not result in any suggestion looking toward a solution of the difficulty.

"In order to correct an impression which seems to have gained currency, I desire to restate what was fully stated in the congressional ex-

aminations, namely, our position with reference to organized labor. We do not question the right of any workmen to freely associate themselves in unions for the furtherance of their common and legitimate interests; but we do assert the equal right of an individual to work independently of a union if he so elects."

—

[From the Denver Express.]

LAWLESSNESS OF COAL BARONS IS DENOUNCED; DEBAUCH OWN EMPLOYEES.

All the important charges of open and repeated law violations, election corruption, and general denial of justice to individuals opposing their looting southern Colorado's rich coal deposits made against the Rockefeller-controlled coal operators by the striking miners were found to be true and were denounced by the Federal grand jury at Pueblo in its report returned late Monday.

Special emphasis was laid on the coal operators' practice of conducting the saloons in which they have and still are debauching the men they employ in their mines, and indirectly subjecting the families of the miners to untold misery.

These startling corroborations of conditions that the coal barons have created and maintained for years in southern Colorado were in the form of a rebuke and were not the basis of indictments.

It is explained that no evidence of price agreements or division of territory for the marketing of coal was presented, and therefore the operators, although proven lawless in the extreme, could not be punished by the Federal Government.

The grand jury spent 27 days and examined 127 witnesses to reach the conclusions.

The jury reports that evidence proved—

That State laws have not been enforced as to give all persons concerned benefits which are derivable therefrom.

That coal companies have nominated, elected, and controlled many county officers.

That county officers elected by coal companies have shown undue activity in controlling elections, having in one instance changed precinct boundaries, presumably to eliminate unfavorable votes of the miners, and have thus aroused not only political but social dissatisfaction.

That many camp marshals, whose appointments and salaries are controlled by coal companies, have exercised a system of espionage and have resorted to arbitrary powers of police control, acting as judge and jury and passing sentence.

That camp marshals have brutally assaulted miners.

That miners can't complain of real grievances without being discharged.

That the scrip system is still in effect.

That miners feel under an unjust obligation to trade at company stores, because of the attitude of mine superintendents.

That checkweighman have been denied the miners.

That many coal companies maintain camp saloons and collect from the keepers of such saloons a per capita sum of 25 to 40 cents per month for each person whose name appears on the company pay roll as a charge against the saloon keeper for the privilege of enjoying the exclusive saloon business of the camp.

The report says:

"Saloons in the mining camps produce a deplorable situation among the miners, habituating them to the improper use of strong drink and thereby impairing their efficiency by lessening the production and increasing the hazard in operating the mine. One operator testified as follows:

"'The saloon is the curse of the camps, the sink hole for miners' earnings. Nine men in the month of July with $50 each for the two weeks' pay roll after deductions had been made had not a cent left on the morning after pay day. Their money went to the saloon for liquor and gambling. These men were unfitted to work for three days.'"

"The action of the Federal grand jury is no surprise to us, and it will have no effect on the present strike. They may indict us, but they can not indict the principles for which we stand; they will prevail until human slavery ceases to exist," said Frank J. Hayes, vice president of the United Mine Workers of America.

"We are accused of violating the Sherman antitrust law and of organizing a conspiracy in restraint of trade. If they mean by the term 'restraint of trade' that we have restrained John D. Rockefeller and a few other eastern millionaires from plundering the coal miners of Colorado, then we plead guilty to the indictment and are proud of the achievement.

"It is rather strange that no grand jury ever indicted the officials of the coal companies, who have been violating the laws of Colorado for a number of years. It is a well-known fact that five of the demands of the Colorado miners are based upon the laws of this State.

"The operators now offer, as a basis of settlement of the present strike, five laws, and insist that the miners take a referendum vote as to whether or not they will accept these laws, frankly admitting by this proposition that the miners have not heretofore enjoyed the benefits of the laws and that now, in a moment of generosity, they are going to concede that they will give the miners the benefit of the law; and yet these distinguished gentlemen have never been indicted by any grand jury.

"It is evident that these coal companies are greater than the State government, and that they can do as they please so far as the law is concerned.

"The Pueblo grand jury, after a laborious and lengthy investigation, has seen fit to indict us for an alleged violation of the Sherman antitrust law. In view of this fact, and having great respect for the impartiality of grand juries, it might not be asking too much if we would ask some grand jury to institute a probe to cover the admissions made by the coal operators in the proposition they offer the miners.

"Their generosity overwhelms us and, no doubt, it ought to appeal to some grand jury, because when any corporation will voluntarily agree to live up to the laws of the State, implying that they never did so before, and then asking the miners to return to work on that basis, it is evident that a grand jury would be able to make a very nice report, and one that would especially appeal to John D. Rockefeller and other eastern trust magnates at whom the Sherman antitrust law was aimed."

Mr. WATKINS. Mr. Chairman, I renew my request that general debate be closed. We are not discussing the bill before the House. I hope there will be no objection to closing the debate now.

Mr. KINDEL. Mr. Chairman, is it in order to move to strike out the last word?

Mr. MANN. The gentleman can not move to strike out the last word; and if he could, he could not speak on the Colorado situation under such a motion.

Mr. MADDEN. How much time does the gentleman want?

Mr. KINDEL. Perhaps five minutes.

Mr. MANN. I hope the gentleman will have the time he wants.

Mr. WATKINS. I yield to the gentleman five minutes.

Mr. KINDEL. Mr. Chairman, I did not expect to be called on to make any answer to some of the allegations made here by my colleague. I would not interrupt my colleague, Mr. KEATING, because the other day he very abruptly turned me down when I sought the privilege of asking him a question. But I, too, am a citizen of Colorado, not of 35, but of 38 years' residence. I went there as a mechanic, and when the boss did not treat me right I established my own concern, and have been manufacturing bedding ever since; so that I can speak on both sides of the question.

My colleague [Mr. KEATING] would have you believe that this trouble is all due to Mr. Rockefeller. I am not here to defend Mr. Rockefeller. In times past I have condemned him as much and as vigorously as any man has, believing that he was the originator of rebates and other things of that character. We have had these troubles in Colorado ever since the Western Federation of Miners established themselves there. We have had this trouble of murder and burning of property at Leadville; we have had it at Cripple Creek; we have had it in Clear Creek County, in San Juan County, in Boulder County, and in Denver County. The present trouble, only to a greater degree, is a repetition of our past experiences. I want to say here now that I commend Mr. Rockefeller, jr., for the statement he makes that he is for the open shop. I, too, have been assailed to make my shop a closed shop. The people of Denver could not even drive teams through the streets, lest some striker should come up and cut the harness from their horses. They did not cut mine, because I warned the agitators what would happen to them if I was attacked while I was forced to drive my own team, owing to my teamsters being intimidated.

Mr. FALCONER. Is Mr. Rockefeller for the open shop in his field of operation?

Mr. KINDEL. Of course he is. That is what he says.

Mr. FALCONER. He has made more combinations than any other man in the country, and has been the biggest wolf in that line of any man in America.

Mr. KINDEL. I am not defending him, as I say, but here is the statement he makes:

It was a source of profound regret to us that our conference with Dr. FOSTER did not result in any suggestion looking toward a solution of the difficulty.

In order to correct an impression which seems to have gained currency, I desire to restate what was fully stated in the congressional examinations, namely, our position with reference to organized labor. We do not question the right of any workmen to freely associate themselves in unions for the furtherance of their common and legitimate interests, but we do assert the equal right of an individual to work independently of a union, if he so elects.

Now, I am in sympathy with the workmen. I believe they should unionize, but I do not believe that any union has a right to say, "You can't work unless you pay my union $10 initiation fee and $1 a month dues." There is no question about wage in the Colorado coal fields. They are paying better wages than were ever paid before—better than any State in the Union excepting Wyoming.

Now, I want to say here that the strikers do not like me, because I am free to say what I think. The bosses do not like me, because I am free to tell them what I think of them. I did not come here with any politics, and I do not care what they think of me so long as my conscience is clear. I can and will tell the truth, and the people of Colorado will soon awaken and will express their judgment in this matter when the next election comes around.

Mr. FALCONER. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. FALCONER. In the Standard Oil Co. Mr. Rockefeller has used his idea of the open shop—driving the independents out of business. But he suggests that men can not come together for their own personal benefit.

Mr. KINDEL. I do not know what Mr. Rockefeller is doing in that direction. I was one of the men that testified in the steel investigation and came here from Denver for that purpose. I helped start the investigation of the steel corporation.

Mr. PLATT. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. PLATT. Was it not President Roosevelt who stood up for the open shop in the Government Printing Office?

Mr. FALCONER. Oh, President Roosevelt seems to be on the brain of all these reactionary standpatters who have stopped and can not start to save their lives. [Laughter.]

Mr. KINDEL. There was a resolution introduced in the House yesterday by the gentleman from Washington [Mr. BRYAN], that the Government should own and operate the coal mines. Why did not the gentleman include the metalliferous mines? Why does not the Western Federation of Miners say to the Government, "You must employ no postmaster or clerk without having him unionize and pay us $10 initiation fee and $1 a month in support of a lot of agitators"?

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. KINDEL. Mr. Chairman, I ask to be recognized in my own right.

The CHAIRMAN. The gentleman from Colorado.

Mr. KINDEL. Mr. Chairman, these matters complained of by my colleague [Mr. KEATING] have been remedied—the scrip system, the store system—the miners being obliged to buy at particular stores, the overtime, and so forth, are all gone by. I do not know whether or not Mr. Rockefeller was in control of the mines when the above-mentioned conditions existed. As I understand it, he only owns or controls about 16 per cent of the coal mines operated in Colorado.

Again I will say that I am not here to defend Mr. Rockefeller, but I do defend the proposition of the open shop. I opposed the congressional investigation of the coal-mine troubles, because I believed that, having the Department of Labor, an Industrial Commission, a newly created congressional Labor Committee, the investigation ought to be made by either of these commissions and not take up the time of Congress.

Mr. ALLEN. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. ALLEN. Has the gentleman found that what Mr. Rockefeller states squares with his action in Colorado?

Mr. KINDEL. I was out there in November, and they told me that it was true that Mr. Rockefeller and all the other operators had anticipated the new law on the statute book that went into effect about that time and had instituted all these reforms I mention before the law became effective. I asked the miners what grievance they had, or what they wanted, and the reply was that they wanted the mines unionized. That is all, and it is not a question of wage.

Now, one of the saddest spectacles to me is one that I saw the other day when so-called Mother Jones came here to testify. I do not know who invited her. The committee, headed by the gentleman from Illinois [Mr. FOSTER] and others, asked her, "Won't you please telegraph out to Colorado and stop the shooting?" She said that she did not know whether she would or not. She finally promised to do so after much pleading on the part of the committee. I had to rise and call attention to the both ludicrous and lamentable act of transferring the Government functions to this notorious and troublesome woman. She it was who suggested to hang me in Denver because I expressed my opinion of her and her kind on several occasions.

Mr. BARTON. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. BARTON. The gentleman heard the indictment by his colleague [Mr. KEATING] on the floor of the House which practically indicted the officers of two counties when he said that for 10 years the county officers of these two counties had been owned by Mr. Rockefeller as much as the gentleman owns his own coat.

Mr. KINDEL. I do not know about that. It is to be regretted that my colleague [Mr. KEATING] has so low an estimate of his constituents' intelligence and patriotism. I have heard it said that they voted sheep out in that country. [Laughter.] This is not the first time that wholesale murders have been committed by Western Federation of Miners in our State. It is time that this thing be stopped. If you eliminate the agitator of the Mother Jones type, we will soon get on, but until you do we will not get on. The foundation of this trouble is politics, and rotten politics.

No one deplores the loss of life more than I do, but what can you expect when we have such a weakling for governor. He is a Democrat. He came to Washington last week to testify in a land deal and dismissed the militia from the coal fields, and in the meantime these murders were being committed. We have a Democratic governor, and all the State officers are Democratic, and we have the initiative and referendum and the recall. I would like to have been governor on an occasion like the present one and let them tell me I could not enforce the law. I would either do or die. Other than this, I would have no ambition in that direction.

Mr. BALTZ. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. BALTZ. Who does the gentleman from Colorado hold responsible for these troubles?

Mr. KINDEL. The agitators and the people who stand for it. If I had not lived through some of these same experiences myself, I would not feel the interest that I do. We had in our own city of Denver one of the finest plants, the so-called Grant Smelter Co., which cost several million dollars. A strike occurred, the strikers would not let others work, they killed people, shot them down, and the result of it all was that the owners got discouraged and removed and dismantled the plant. The only thing we have left is the big $50,000 smokestack to indicate that there was once a smelter there.

It recalls to me the lines of Kingsley:

> So fleet the works of man, back to earth again;
> Ancient and holy things fade like a dream.

That is what is happening to the coal interests. Between discriminative freight rates and the murderous agitators we can not progress. That is why we are bankrupt. We are not allowed an equal chance with other States. All that the people of Colorado want, all that they ask for, is a square deal, regardless of who or what insures it to them. [Applause.]

Mr. WATKINS. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by having inserted a telegram, which I will ask the Clerk to read, as a part of my remarks.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The CHAIRMAN. Without objection, the Clerk will read the telegram.

There was no objection.

The Clerk read as follows:

PATTON, PA., *April 28, 1914.*

HON. WARREN WORTH BAILEY,
Washington, D. C.:

Resolved by Patton Local Union, United Mine Workers of America, That the President of the United States and both Houses of Congress take measures to stop the massacre of the innocents in the State of Colorado, and use such force as is necessary to protect their personal liberties.

RICHARD ROWLAND, *Secretary.*

Mr. WATKINS. Mr. Chairman, I ask unanimous consent that general debate be now closed.

The CHAIRMAN. If no one desires to be heard, that request is not necessary. The Clerk will read.

Mr. WATKINS. Mr. Chairman, I do not desire to consume the balance of the time that I reserved, and therefore ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The Clerk read as follows:

SEC. 3. Whenever, in the opinion of the district judge of any district, or of the district judge senior in commission in districts having more than one judge, the chief justice of the Supreme Court of the District of Columbia, or the chief justice of any Territory and the district attorney, evidenced by writing, the public interest requires it, one or more assistant district attorneys may be appointed by the Attorney General; but such opinion shall state to the Attorney General the facts as distinguished from conclusions, showing the necessity therefor.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. This is the first paragraph where we have changed the existing law. Comparing the existing law with that recommended by the committee, I find that as it exists now no recommendation for an assistant district attorney could be made without the cooperation of the district attorney for that district, but in the changed phraseology, as recommended by the committee, an assistant district attorney may be appointed upon the ipse dixit of the district judge or the senior district judge. Is it the intendment of the committee that these recommendations should be made by the district judges without the indorsement of the district attorney?

Mr. WATKINS. No. The gentleman has misread the language.

Mr. STAFFORD. Perhaps I place an erroneous construction upon it. I may lay too much emphasis upon the comma, but as I read it it does place that authority in the district judge or the senior district judge. It reads as follows:

SEC. 3. Whenever, in the opinion of the district judge of any district, or of the district judge senior in commission in districts having more

than one judge, the chief justice of the Supreme Court of the District of Columbia, or the chief justice of any Territory and the district attorney, evidenced by writing, the public interest requires it, one or more assistant district attorneys may be appointed by the Attorney General—

Now, that joinder—

or of the district judge senior in commission in districts having more than one judge—

and other following clauses is separated from prior clauses by a comma, and is so separated from the clause referring to the district attorney.

Mr. WATKINS. The law as it already stands provides that the district attorney makes the recommendation and refers it to the Attorney General for his approval.

Mr. STAFFORD. I understand the existing law; but I am directing the attention of the gentleman to the amendment proposed by the commission and ask whether, under the phraseology as it stands, these judges would not have the right to make the recommendation for assistant district attorneys without the initiative or indorsement of the district attorney?

Mr. WATKINS. I do no think it is intended to be that way.

Mr. STAFFORD. I do not think it is so intended either, but I ask whether this phraseology would not be so construed?

Mr. WATKINS. We do not construe it in that way, nor do I, after a careful reading of it. The intention is that instead of the district attorney himself alone making the recommendation, the recommendation shall be made also by the district judge or by the senior district judge of the district, if there is more than one judge.

Mr. STAFFORD. Does not the gentleman think it is not very clear? Here is the phrase:

The chief justice of the Supreme Court of the District of Columbia or the chief justice of any Territory and the district attorney.

That clause stands by itself, and the other preceding clauses are separated by commas with which the district attorney is not connected at all.

Mr. WATKINS. I can not see it in the way the gentleman does. I think the punctuation and all makes it perfectly clear that the intention is that the district judge or the presiding district judge, if there is more than one, shall concur in the recommendation of the district attorney in recommending to the Attorney General who the appointee shall be.

Mr. BARTLETT. Mr. Chairman, certainly the gentleman does not mean to say that the judge is to recommend who the appointee shall be?

Mr. WATKINS. I should have said if there shall be an assistant district attorney appointed.

Mr. BARTLETT. That is a different thing. I would not vote for it if the Attorney General were to be governed in his choice by what the district judge said.

Mr. STAFFORD. Mr. Chairman, I think we can judge from the phraseology what the intendment is, but I do not think the phraseology is very clear in that regard. I withdraw the pro forma amendment.

Mr. MANN. Mr. Chairman, I move to strike out the last two words. My attention was distracted at the time the Clerk read section 2 of the bill. I notice that it is proposed to change the law in reference to the district attorney taking the oath of office. The present law provides that every district attorney before entering upon his office shall take an oath. The committee provides that before entering upon the duties of his office the district attorney shall take an oath. I suppose that is to conform with some other provision of law, and yet I notice that when the committee gets over to the point where it is proposed to create a new office, that of stenographer, it provides that before entering upon said office the stenographer shall take and subscribe an oath, and not before entering upon the duties of said office. What is the special reason for amending the law so as to say that the oath shall be taken before a man enters upon the duties of his office instead of before he enters upon the office?

Mr. WATKINS. It is simply to make it a little more explicit.

Mr. MANN. But it does not make it any more explicit. It is more explicit to say that he shall take the oath before he enters upon the office than it is to say he shall take the oath before he enters upon the duties of his office, because in the one case if he takes the oath before he enters upon the office he can not draw any pay until he has taken the oath, and in the other case he may take the oath and go upon a vacation, and that is very often what they do.

Mr. WATKINS. In this particular instance which has already been passed over, although I will not raise that point—section 2—it requires him to enter upon the discharge of his duties, and if the gentleman desires later on, when it comes to stenographers, to insert that same language, I do not know that there will be any objection to it.

Mr. MANN. I am asking upon what theory the committee proposes to amend the law by inserting that language here and by not inserting it when they draw an entirely new section in an exactly similar case?

Mr. WATKINS. I do not believe those particular words happened to occur to the minds of the committee when going over that section; that is all.

Mr. MANN. I wondered why it occurred to them here.

Mr. WATKINS. Because there may have been some instance where a man sworn in went off on his vacation or on a fishing excursion, or something of that kind, before entering upon the discharge of the duties of the office. Attention may have been called to it for that particular reason.

The Clerk read as follows:

SEC. 6. In any action which may be brought again any person for or on account of anything done by him while an officer of either House of Congress in the discharge of his official duty, in executing any order of such House, the district attorney for the district within which the action is brought, on being thereto requested by the officer sued, shall enter an appearance in behalf of such officer; and the defense of such action shall thenceforth be conducted under the supervision and direction of the Attorney General.

Mr. WATKINS. The word "again," in line 11, should be "against." It is simply a typographical error.

The CHAIRMAN. Without objection, the correction will be made.

There was no objection.

The Clerk read as follows:

SEC. 8. The district attorneys of the United States, upon the application of the Attorney General, shall furnish any assistance or information in their power in relation to the titles of the public property lying within their respective districts; and all legal services connected with the procurement of titles to sites for public buildings, other than for life-saving stations and pierhead lights, shall be rendered by the United States attorneys.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word, and I do so for the purpose of obtaining information that may be of value to the committee, to determine just exactly what the committee has done in the compilation of this bill. Here we have an instance where a substantial part of the existing law, as found on the opposite page, has been omitted and there is only embodied a portion of the existing statute. For instance, the following has been omitted, so far as this section is concerned. Section 355 of the present statute provides:

No public money shall be expended upon any site or land purchased by the United States for the purposes of erecting thereon any armory, arsenal, fort, fortification, navy yard, customhouse, lighthouse, or other public building of any kind whatever, until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land or site may be to such purchase has been given.

That part of the present section has been omitted entirely, so far as it is possible to discover. Now, I would like to have the opinion of the chairman of the committee as to why he omitted that in his revision, because it is a matter of importance to have the title passed upon first by the district attorney, and for it not to be accepted until the opinion has been submitted and passed upon by the Attorney General.

Mr. WATKINS. The bill which we now have under consideration is a revision of the law under the judiciary title, and the particular feature we are considering is the duty of the district attorneys of the United States. The first part of this section which the gentleman has read does not refer to that particular subject, but there are two subjects contained in the same section. One part is made applicable to the district attorneys, but not the first part of the section, which says that—

no money shall be expended upon any site or land purchased by the United States.

That is another feature of the law kept separate, and it is no part of the title we are now considering.

Mr. STAFFORD. As I understand the gentleman's position, if the present bill should be adopted and this clause be carried, it would not repeal the provision of section 355 to which I have referred?

Mr. WATKINS. No; that will be incorporated in another revision.

Mr. STAFFORD. Another question. Why did the committee believe it would not be advisable to follow existing law and except from the examination of title by the district attorneys, or rather limit them to merely public buildings other than life-saving stations and pierhead lights? Why should not the district attorney pass upon the title of all buildings of every character?

Mr. WATKINS. Public buildings generally are under the jurisdiction of the Treasury Department. The Supervising Architect of the Treasury Department usually attends to that, and this is on account of the fact heretofore it has been the custom to have this title ordinarily under the public-buildings

bill, which carries with it appropriations for public buildings, Government buildings, and so forth.

Mr. STAFFORD. I may not have grasped the explanation of the gentleman, but as I understand it the life-saving stations and pier headlights are just as much under the jurisdiction of the Treasury Department as other public buildings.

Mr. WATKINS. It has been the custom, and we did not see any necessity of changing the law, and under the law this class of public buildings are to be inspected and attended to through the Judiciary Department—that is, through the Department of Justice—and not by the Treasury Department. That is the reason we have not changed it, because we did not see any necessity for changing it.

Mr. STAFFORD. Can the gentleman differentiate as to why there should be a different rule applied to the life-saving stations than to other public buildings?

Mr. WATKINS. I know of no particular reason why it should not be, but we did not see any reason for doing it, and we desired to make as few changes as possible.

Mr. STAFFORD. I should think in this instance, where the committee could not see any reason for differentiating between those two characters of buildings, that they should not put them on the same plane. I should have thought the committee would have recommended a uniform rule.

Mr. WATKINS. I will state to the gentleman that this was taken from the compilation of the recent commission, and the commissioners who had the work in charge are supposed to have made this investigation, and it was not necessary to originate an investigation on a proposition of that kind.

Mr. STAFFORD. As to that reply, I may have misunderstood the gentleman when I interrogated him this morning; but I understood that the commission's recommendations in this measure were contained in italics.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes longer. Is there objection? [After a pause.] The Chair hears none.

Mr. WATKINS. I regret the gentleman did not understand my answer. My answer to that was, wherever the commissioners recommended new law that those recommendations as to new law were written in italics, but where the commissioners' recommendations incorporated the law already existing, that was not put in italics but carried in the ordinary type.

Mr. STAFFORD. So where the commssion's recommendation contained existing law, leaving out some phraseology by condensation, you would not incorporate that in italics, but it would be embodied in the type as found here?

Mr. WATKINS. It is only where they have changed the verbiage of the law, where they changed the law or the verbiage of the law; either one.

Mr. STAFFORD. Here they have changed the verbiage of this law, because the clause is not the same as in existing law. So what can we go by? Are we to understand from the chairman that only that is in italics where there is a substantive change in existing law as recommended by the commission, and that minor changes are not carried in italics?

Mr. WATKINS. Except that wherever a statute has been amended, or wherever a law has been enacted, it is incorporated in there as law in existence and is not put in italics. You will find incorporated on the opposite page in that instance the amended law, the new law, or repealed law.

Mr. STAFFORD. Here we have an instance where the phraseology is changed, and not the scope of the law, the chairman says, by the original Commission on Revision of the Laws; and yet on this left-hand page, which is supposed to contain the recommendation of the commission so far as this section is concerned, there is no italicized print.

Mr. WATKINS. You are speaking about section 355, I suppose?

Mr. STAFFORD. Yes; and section 8, as recommended by your committee. I am trying to obtain, once and for all, just what is included in the italicized print, whether we are to understand that everything the original Commission on the Revision of the Laws recommended is included in italicized print on the left page of part 2 of your report?

Mr. WATKINS. All the changes in the existing law which they recommend are placed in italics.

Mr. STAFFORD. Here is an instance where changes have been made—minor changes, it is true—and changing existing law, where there is no italicized print at all.

Mr. WATKINS. I do not think the gentleman is correct about that.

Mr. STAFFORD. This is section 8. You do not find that exact phraseology in existing law as found in section 355 of the Revised Statutes.

Mr. WATKINS. The first part of section 355 is eliminated in this revision on account of the fact that it is not germane to the question.

Mr. STAFFORD. I understand that thoroughly. And that which the committee now recommends is repeated in section 8, which in this print contains no italicized matter at all and is different from existing law as found on the page opposite—the right-hand page. Some person has made a condensation and note. There are no italics to indicate that there has been a condensation. I am trying to ascertain some rule whereby the Committee of the Whole may know exactly what was done by your committee. I hope the gentleman will see that the phraseology as carried in section 8 is not the same phraseology of any part of section 355. I will grant it is a condensation of the latter part of that section, but it, the phraseology, is changed. Now, there is nothing in the existing print to show that any change has been made. I thought we were able to proceed upon the idea in the consideration of this bill that the only changes in it would be represented in italicized print, but I find we can not follow that rule.

Mr. WATKINS. It seems that sometimes in making a slight change in phraseology we alter a word, but we do not change the substance.

Mr. STAFFORD. There is not only a change of phraseology, but there is a change of text here.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. The Clerk will read.

The Clerk read as follows:

SEC. 13. In all States and Territories where there are reservations or allotted Indians the United States district attorney shall represent them in all suits at law and in equity.

Mr. MANN. Mr. Chairman, I move to strike out the last word. Does not the gentleman think this is an obsolete provision practically, now, requiring the United States district attorneys to represent the Indians on all reservations or where allotments have been made in all suits at law and in equity?

Mr. WATKINS. That question would infer that there were other rights of that kind which the district attorney would assert in behalf of the Indians, and there still may be some such rights. I have not gone into minute detailed investigation to ascertain whether there are any such rights still extant or not. But that law is copied from the Revised Statutes of the United States.

Mr. MANN. I understand. At that time the Indians were on the reservation and were properly represented by United States attorneys. A few Indians may have had lands allotted to them when that provision went into the law, but very few. Nearly all of these lands have now been allotted to Indians, and here is a provision which we know is a dead letter, which we would not keep in the law if it were operative, which says that the district attorney shall represent allotted Indians in all suits at law and in equity. It is a perfectly ridiculous provision. It might properly be dropped, because it is not done any more and ought not to be done.

Mr. STAFFORD. Will the gentleman yield?

Mr. MANN. I will.

Mr. STAFFORD. I assume the gentleman does not raise his objection to the district attorney's continuing to represent the Indians on reservations where they do not have their lands allotted?

Mr. MANN. Well, I did not raise any objection to that, although I do not think that is done any more.

Mr. STAFFORD. Of course, the district attorney represents the Indians in cases, and there is need that they should.

Mr. MANN. I do not know what cases he would represent them in. We have matters of that sort coming before Congress all the time, and I never heard of a district attorney in connection with one of them. They are always private attorneys.

Mr. STAFFORD. In those cases a private attorney is really more active to secure a fee and tries to supplant the district attorney.

Mr. MANN. What would happen if one of these allotted Indians would say to the district attorney, "I am sued, and I want you to represent me"?

Mr. WATKINS. Under that law he will be authorized and required to do it.

Mr. MANN. He would be required to do it under this law, but he does not do it and would not do it. If he would try to do it, we would not permit him.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. GREEN of Iowa. I think the gentleman from Illinois is quite correct, and that this provision is here by oversight on the part of the committee, in which, however, I may be mistaken. But I suggest, as a way out of the difficulty, that the chairman ask that this provision be passed for the present.

Mr. MANN. I really think that it ought to be looked into.

Mr. GREEN of Iowa. I think the gentleman from Illinois is entirely correct about it.

Mr. MANN. If we are going to codify these laws, those things that are absolutely obsolete we ought to leave out.

Mr. WATKINS. I have no objection to passing it over if the gentleman wants to pass it over, and ascertain whether it has any effect now, but I do not feel authorized indiscriminately to strike out sections of the Revised Statutes without critical inquiry.

Mr. GREEN of Iowa. I think if the gentleman from Louisiana inquires into it he will find that the gentleman from Illinois [Mr. MANN] is entirely correct, and that the provision is obsolete.

Mr. MANN. Will the gentleman have it passed over?

Mr. WATKINS. Yes. I ask unanimous consent, Mr. Chairman, that it be passed over temporarily.

The CHAIRMAN. The gentleman from Louisiana [Mr. WATKINS] asks unanimous consent that this provision be passed over temporarily. Is there objection?

There was no objection.

The Clerk read as follows:

SEC. 20. Whenever in the opinion of the Attorney General the public interest requires it he may, on the recommendation of the marshal, which recommendation shall state the facts as distinguished from conclusions, showing necessity for the same, allow the marshals to employ necessary office deputies and clerical assistance, upon salaries to be fixed by the Attorney General, from time to time, and paid as hereinafter provided. Such deputies shall be removable from office by the judge of the district court *whenever, in his judgment, the public interests so require.*

Mr. GORMAN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. GORMAN] moves to strike out the last word.

Mr. GORMAN. I would like to ask the chairman of the committee why it is provided here that the judge of the district court shall have the power to dismiss these men whenever in his judgment the public interests so require? Why is it not left to the Attorney General to determine the employment of these men whom he is authorized to employ? Why give somebody else the power to dismiss them?

Mr. WATKINS. The employment is determined, as the gentleman well knows, under the language on lines 4, 5, and 6, by the person who is authorized to dismiss them.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman from Louisiana [Mr. WATKINS] yield for a moment?

Mr. WATKINS. Yes.

Mr. GREEN of Iowa. There is no difference between the provision as it stands and the existing law with regard to the right of the judge to remove them from office. It only restricts the right a little further by requiring the stating of the grounds on which the removal is made.

Mr. GORMAN. I wanted to understand why the Attorney General was authorized to name them, and then why the judge is permitted to dismiss them.

Mr. WATKINS. I do not know why the law was originally enacted in that way, but it is in the Revised Statutes, and it has been the law almost since the foundation of the Government. We did not feel authorized to change those features when we came to them. That provision, no doubt, has been passed upon by the courts. We did not think it was incumbent on us to change the laws, as we found them embedded in the Revised Statutes. That feature is in the original law.

Mr. STAFFORD. Will the gentleman give me a citation of existing law where the judges have the authority to remove deputy marshals? It is not printed in the report here. Oh, yes; I find it here. It is section 780. I beg the gentleman's pardon. It gives that authority to the district judge to remove either the marshal himself or the deputy marshal.

Mr. WATKINS. Well, if the gentleman has found it, that is all right.

Mr. STAFFORD. It is given in section 780, which provides that—

Every marshal may appoint one or more deputies, who shall be removable from office by the judge of the district court or by the circuit court for the district, at the pleasure of either.

So that is the authority for that provision.

Mr. GREEN of Iowa. Mr. Chairman, it seems to me that the provision as it is in the present law is the proper one under the circumstances. The judge of the court would be better advised if there was any necessity for removing these deputies than would be the Attorney General, and I think the committee was right in retaining it for that reason.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 22. Every marshal and deputy marshal shall, before he enters upon the duties of his appointment, take, before any officer of the United States, or of any State authorized by law to administer oaths, an oath or affirmation in the following form: "I, A B, do solemnly swear (or affirm) that I will faithfully execute all lawful precepts directed to the marshal of the district of ———, under the authority of the United States, and true returns make, and in all things well and truly, and without malice or partiality, perform the duties of the office of marshal (or marshal's deputy, as the case may be) of the district of ——— during my continuance in said office, and take only my lawful fees. So help me God." The words "So help me God" shall be omitted in all cases where an affirmation is admitted instead of an oath.

Mr. WATKINS. Mr. Chairman, I have a committee amendment which I desire to offer.

Mr. MANN. Is it an amendment to that section?

The CHAIRMAN. The gentleman from Louisiana [Mr. WATKINS] offers the following amendment, which the Clerk will report.

Mr. WATKINS. Wait one moment, Mr. Chairman. It should be offered to the next section. I will withdraw my amendment for the time being.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last word.

Mr. MANN. I understand and appreciate, Mr. Chairman, the difficulties which confront anyone who endeavors to codify the laws. I also understand the need of codification, because I often weary myself trying to find what the law is, what the statute is. Yet I suppose, when one endeavors to codify the laws, he tries to cut out the unnecessary matter and make it as brief as possible and as uniform as practicable.

Now, here is a section providing for the oath of marshals. Of course the bill carries a provision for the oath of the clerk, and one for the oath of the district attorney, and one for the stenographer. When it comes to the oath of the district attorney, the bill says that the district attorney, before entering upon the duties of his office, "shall be sworn to a faithful execution thereof," and stops there. I should presume that that was adequate, although I do not undertake to say. But when it gets over to the marshal, the bill says he must take an oath or affirmation in the following form:

I, A B, do solemnly swear (or affirm) that I will faithfully execute all lawful precepts directed to the marshal of the district of ———, under the authority of the United States, and true returns make, and in all things well and truly, and without malice or partiality, perform the duties of the office of marshal (or marshal's deputy, as the case may be) of the district of ——— during my continuance in said office, and take only my lawful fees. So help me God.

The words "So help me God" shall be omitted in all cases where an affirmation is admitted instead of an oath.

When they get over to the clerk they make a similar provision concerning the oath; but when they get over to the stenographer they simply provide that before entering upon said office he shall take and subscribe an oath well and truly to perform the duties of the same, and shall file said oath with the clerk of the court.

Now, just what is the distinction between the marshal taking the oath and the clerk taking the oath, or the district attorney taking the oath and the stenographer taking the oath? I suppose it is possible for the district attorney to make affirmation as well as to take an oath. I suppose it does not undertake to require that no Quaker, for instance, shall be appointed a stenographer, by requiring an oath to be taken instead of an affirmation. I may be mistaken, but I think there is a general statute that where an oath is required, an affirmation may be sufficient. Yet the commission codifying the law puts in a long section in two places, stating the form of the oath, and explaining that you may have an affirmation instead of an oath, and that if you have an affirmation you leave out the language "So help me God." In the same title, under the same chapter, they provide for two other officials taking an oath. Either there ought to be something inserted as to the form of the oath to be taken by the district attorney and the stenographer, or else this rigmarole about the oath taken by the other two officials ought to be cut out as unnecessary and surplusage, having no place whatever in a codification of the statutes.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn. The Clerk will read.

The Clerk read as follows:

SEC. 23. Every marshal before entering on the duties of his office shall give bond before the district judge of the district, or the judge senior in commission in districts having more than one judge, jointly and severally with two good and sufficient sureties, inhabitants and freeholders of such district, to be approved by said judge, in the sum of $20,000, for the faithful performance of said duties by himself and his deputies. Said bond shall be filed and recorded in the office of the clerk of the district court sitting within the district, and copies thereof, certified by the clerk under the seal of the said court, shall be competent evidence in any court of justice. Whenever the business of the courts in any judicial district shall make it necessary, in the opinion of the Attorney General, for the marshal to furnish greater security than the official bond herein required, a bond in a sum not to exceed $40,000 shall be given when required by the Attorney General, who shall fix the amount thereof.

Mr. WATKINS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Louisiana offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 10, line 13, after the word "marshal" insert "including the marshals for Alaska, Hawaii, and Porto Rico."

Mr. WATKINS. Mr. Chairman, I move the adoption of that amendment.

Mr. MANN. Mr. Chairman, what is the object of that?

Mr. WATKINS. At the time the statute was passed, containing this verbiage which is contained in this bill, we had no marshals for those places. After that the organic laws of these various Territories provided for marshals, but it was thought by the Department of Justice that it would be better to insert an amendment, so that they would understand definitely that the law applies to these marshals, as well as the marshals in the United States proper.

Mr. MANN. It says "every marshal."

Mr. WATKINS. It does, and we thought it was sufficiently explicit, but they asked us to make it a little more explicit, and we saw no objection to it.

Mr. MANN. Does it make it more specific or less explicit? Where you include everyone, and then proceed to say that that includes certain specific cases, it might exclude some other cases. It comes within the description—

A marshal shall be appointed in each district, except in the western district of South Carolina.

Of course the marshals in those Territories are not marshals of United States courts under the Constitution; but you do not make any provision for the appointment of marshals in those territories in this codification, unless they are included in the language "a marshal shall be appointed in each district." If they are included in that language, you do not need to put in this language. It looks to me as though you were getting it very much confused.

Mr. WATKINS. If the gentleman intends his remarks to be in the form of a question, I will state that the appointment was not intended to be provided for in the former language, because they are already appointed under the organic acts of the Territories. The offices are created and the appointment of the marshals is provided for in that way. They are not appointed under this law, but under the organic acts of the Territories.

Mr. MANN. But what I am calling attention to is this: Here is a codification. Now, you propose to have one provision in this act affecting the marshals of the Territory, and they are not included in the other provision. That is not a codification of laws; that is a mixture which will not work. If the marshals for these Territories are provided for in this codification, they ought to be included under this provision, but if you do not provide for marshals under this codification, you ought not to provide for the bond, because this is not the place to look for Territorial marshals unless they are codified here.

Mr. WATKINS. I will state that they are not codified in this law for the reason given; they are provided for in the organic law creating the Territories. But after the bill was submitted to the Department of Justice, they asked that this insertion be made for their own guidance and protection, and the committee thought it proper to accede to the request.

Mr. COX. Does this section cut out a marshal for South Carolina?

Mr. WATKINS. No; there is only one judge and one attorney for the two districts.

Mr. COX. Has there ever been two marshals?

Mr. WATKINS. Neither two marshals nor two judges.

Mr. COX. The language would indicate that heretofore there had been two marshals.

Mr. WATKINS. No.

Mr. MANN. I can not criticize the committee for acceding to the request of the Department of Justice, but I think that their request casts serious reflection on their knowledge and understanding of the bill.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. It is no doubt important that at the proper time and in the proper way there should be a revision of the laws under the judiciary title; in other words, that the pending bill should pass. I am rather inclined to the opinion that at the present time there are many more important matters before Congress that ought to be disposed of and which ought not to be delayed by this bill.

There are certainly many important matters before the country, vastly more important than this particular codification. The newspapers of to-day bring us the awful story of the death of nearly 200 miners by explosions in the coal mines in the State of West Virginia. Dispatches of the last few days have given us the harrowing details of the frightful conditions existing in the coal regions of Colorado, with the awful loss of life of men, women, and children. These dispatches indicate first the dangerous character of the work in which coal miners are engaged, and, second, the frequent and violent labor troubles which arise in connection with that industry.

I wish there were some way, clearly understood, which could be readily carried out for the cure of these evils. I do not think that they can be cured offhand by the introduction of a bill, as suggested by the gentleman from Washington [Mr. BRYAN] this morning or even by the taking over of the mines by the Government as he further suggests.

I have had some experience in coal mines and with coal miners. I know the difficulties under which they labor; the dangers to which they are constantly subjected; how arduous their labors are; how honest and well-meaning and law-abiding, as a class, they are; how valuable their services are to the country and to civilization. We have been endeavoring, through the Bureau of Mines and in other ways, to eliminate the dangers of mining operations. I think to a certain extent we have been successful, and yet this awful experience in West Virginia shows how little we know of the causes of mine explosions, and how liable they are to occur, even when earnest efforts are being made to remove the causes.

The situation in Colorado emphasizes the necessity of there being a better mutual understanding between the men who work in the mines and those who operate them. It is unfortunate that operators should become so insistent upon having their own way in regard to every detail of their operations as to create a spirit of hostility that long continues and finally leads to such awful occurrences as have been witnessed in Colorado.

I hope and trust that the steps taken by the administration in the sending of troops may bring peace in Colorado. I hope that our efforts through the Bureau of Mines and the efforts of mine owners may reduce the frequency of these awful disasters. More than that, I hope that in Colorado and elsewhere mine operators, and miners as well, may learn that there must be a spirit of give and take at the beginning of these difficulties in order to avoid the awful outcome which we have seen in that State.

No right-minded person will deny that men engaged in so toilsome and dangerous an occupation as coal mining are entitled to have proper consideration given to all the questions relating to the conditions of their employment. They are entitled to a wage which will enable them to properly support themselves and their families and enable them to lay up something for a rainy day, and they are entitled to have conditions established and maintained which will minimize as far as possible the dangers of their employment. It has been said here to-day that the only important question in the controversy in the Colorado fields was that of unionizing the mines and of the recognition of the unions by the operators. If that statement be essentially true, then, indeed, there is little excuse for the awful loss of life and destruction of property which has occurred. Surely there is nothing in the history of union coal mine operations to justify anyone in stubbornly refusing to recognize unions and to invite bitter and long-continued industrial warfare, leading to actual bloodshed, for the purpose of preventing unionizing of mines.

I know that it is contended that men ought to be allowed to run their business in their own way and to control it as they see fit. To a certain extent and within reasonable limitations I agree with that proposition; but when a man engaged in an industrial enterprise seeks the aid and assistance of others to make his enterprise profitable by employing them, a condition is created under which the right of the employer to conduct his business as he sees fit is modified by the right of the men he employs and upon whom he is dependent for the success of his business to labor under conditions reasonably satisfactory to them. The time has long since passed when employers may assume that while depending upon their employees largely for the success of their enterprise they can ignore the safety of the

employee or his right, within reason, to have a voice in the terms and conditions of his employment and as to the organizations he may see fit to maintain to represent him in his dealings with his employer.

I hesitate to discuss the situation in Colorado, because the awful loss of life there so appeals to one's sympathies that one may, in haste and without information, lay the blame at the wrong door; but surely if the only real questions recently at issue are the questions of labor unions and their recognition, as the gentleman from Colorado [Mr. KINDEL] said a few moments ago, then it would seem that primarily the fault is with those who, in their stubborn refusal to deal with men through organizations, have created the conditions which have made these awful happenings possible. No doubt there are bad men in labor unions—there are such in all kinds of organizations—no doubt unions sometimes demand more than is reasonable, even as employers frequently refuse demands and requests that are reasonable. Men must, however, be very shortsighted, indeed, who do not realize that miners have a right to organize if they see fit, and to learn by experience that organizations have their proper and essential and useful functions to perform for the benefit not only of the miners but of the community generally.

One stands appalled at these awful happenings in mine explosions and in industrial wars. They bring us to a realization of how far we have failed to establish safe or satisfactory, much less uniformly favorable, conditions in this great and growing industry. It behooves all who are interested in their fellow men and in their country to assist in every effort that is made to seek a sane and rational solution for these problems, so important, so vital to our people.

Mr. IGOE. Mr. Chairman, will the gentleman from Louisiana yield?

Mr. WATKINS. Yes.

Mr. IGOE. Under section 23 is a marshal required to give bond, with personal sureties, or is there any provision for a surety company?

Mr. WATKINS. The surety company is not authorized to go on a bond of Government officials under that section.

Mr. IGOE. In the provisions for clerks it says "sufficient sureties approved by the court."

Mr. WATKINS. Surety companies are not recognized by the Government in this section under discussion.

Mr. COX. I think the gentleman from Louisiana is not quite correct there.

Mr. WATKINS. I mean with reference to the provisions of this section of the bill.

Mr. COX. Surety companies are taken on bonds of postmasters and employees of the Post Office Department.

Mr. IGOE. What is the purpose of requiring the marshal to get freeholders to go on his bond?

Mr. WATKINS. The gentleman does not mean that he finds that provision here?

Mr. IGOE. It requires in this section that the sureties shall be inhabitants and freeholders.

Mr. MANN. I suggest to the gentleman from Missouri that he move to strike it out.

Mr. WATKINS. We have not yet reached that point. There is an amendment pending which has not yet been disposed of.

Mr. MANN. I thought it had been disposed of.

Mr. WATKINS. Mr. Chairman, amendment No. 1, in line 13, section 23, has not been voted on.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana.

The amendment was agreed to.

Mr. IGOE. Mr. Chairman, I desire to offer an amendment.

Mr. WATKINS. Mr. Chairman, before that is done, there is another committee amendment to this same section, which I desire to offer at this point.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 11, line 8, after the word "exceed," strike out "forty" and insert "one hundred."

Mr. WATKINS. Mr. Chairman, the object of that is to increase the maximum amount of the bond, and this amendment is also offered at the request of the Department of Justice.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Louisiana.

The amendment was agreed to.

Mr. IGOE. Mr. Chairman, I offer the following amendment: Page 10, lines 16 to 18, strike out the words "jointly and severally with two good and sufficient sureties, inhabitants and freeholders of such district," and insert in lieu thereof the words "with sufficient sureties."

Mr. WATKINS. Mr. Chairman, what is the use of doing that when that language is already in there?

Mr. IGOE. But I propose to strike out the language in my amendment, beginning with the word "jointly," in line 16, down to and including the word "district," in line 18, and amendment proposes to insert in lieu thereof the words "with sufficient sureties," so that it will read, "with sufficient sureties to be approved by said judge, and the sum of $20,000," and so forth.

Mr. WATKINS. Mr. Chairman, unless the words "two sureties," or the words "jointly and severally" are retained, I would be constrained to object to the amendment, because we want the very best security we can get. Sometimes both securities are not good at the time the obligation matures, while one of them may remain good; and if bond has been made jointly and severally, the security to the Government still holds.

Mr. IGOE. Mr. Chairman, I will say I have taken the same language which occurs in section 36 relating to the clerk of the court. I suppose that the bond required in his case ought to be just as good as the bond required in the case of a marshal.

Mr. WATKINS. Perhaps it may be better to change it in that section, but I should certainly object to the amendment unless it relates to the character of the security.

Mr. IGOE. I will say to the gentleman that my purpose in offering this amendment is to get down to date, so that he may give a surety company bond, instead of running around his district and getting his friends to go on his bond.

Mr. MANN. Mr. Chairman, when this provision was first written into the law many years ago there was no other way of giving bond except by personal surety, and I think the committee in reporting the bill very naturally and properly, in codifying the law, reported it without any change in that respect; but no one now gives personal sureties on bonds if it can be avoided. The surety companies take the place of bondsmen, and thus is avoided the obligation that goes from the official to his bondholder. There is no obligation where the official pays for his bond to a surety company. Where the sheriff or the marshal must have a personal bond, then that sheriff or marshal is bossed by his bondsman, sometimes very much to the detriment of the public good. As to the clerk of the court, if the gentleman in charge of the bill will notice, in section 36, it is not required that there shall be individual personal bondsmen. While the law uses the plural form "sureties," yet under the statute the plural means the singular and the singular means the plural, so that signifies nothing particularly. It is provided that the clerk before entering upon the duties of his office shall give bond to the United States in a certain sum, to be determined by the Attorney General, with sufficient sureties, to be approved by the court for which he is appointed. I take it that the provision for the clerk was written probably 20 or 30 or 40 or 50 or 75 or a hundred years after the first provision was written in respect to the marshal, and when the provision in respect to the marshal was written, something over 120 years ago, or in that neighborhood, there was no other way of giving the bond except by personal sureties, and they put in the words "inhabitants and freeholders of such district."

You can not find that expression anywhere else. There is no reason for saying "freeholder." Everybody is a freeholder if he holds anything, and I think that the gentleman in charge of the bill ought to be willing to accept that amendment.

Mr. WATKINS. If the gentleman will notice, it says "sureties," which is in the plural, and it does not contemplate that there shall be only one surety.

Mr. MANN. But the statute provides expressly that where the word is "sureties" it means "surety" and where "surety" it means "sureties." In other words, the statute provides that the singular and the plural will be transferred one for the other, without regard to the use of either the singular or the plural, so that it means a sufficient bond. That is, a bond of sufficient surety, to be approved by the court; and if he wants to require personal bondsmen, he has the right to do so.

Mr. WATKINS. It is not the disposition of the committee to contend for the personal bond of which the gentleman speaks; that is, for individuals going on the bond, and so far as the word "freeholders" is concerned we do not contend for that, but we do think that the interest of the Government ought to be guarded in the best possible way and that the words "jointly and severally" ought to go in.

Mr. STAFFORD. Will the gentleman yield right there?

Mr. WATKINS. Yes, sir.

Mr. STAFFORD. The gentleman is acquainted with the character of bonds furnished by surety companies to municipal officials, State officials, and so forth. When the States have passed laws accepting an indemnity of a surety company in lieu of in-

dividual sureties they have not required more than one surety company to go on the bond. Now, if the gentleman's position is to be adhered to, you will require, if the marshal is to give a surety bond rather than personal security—more than one surety company—and what is the sense of that? These surety companies are held to be acceptable institutions for indemnifying the Government, and if one of them goes surety on a bond that should be sufficient, and if the marshal wishes to furnish individual bonds it still rests with the judge to pass judgment upon whether it is adequate or not. If there is one man worth hundreds of thousands of dollars and the judge thinks he is responsible he could accept him, but if he thought he was not worth sufficient he might require more than one under the language suggested by the gentleman from Missouri.

Mr. COX. That is true of the Treasury Department, and I think they have a regular prescribed list of surety companies that they have practically O. K.'d for their employees.

Mr. STAFFORD. Oh, the departments to-day recognize the surety companies as one of the modern means of indemnifying the Government. That is thoroughly recognized.

Mr. BORLAND. I will say, in answer to the gentleman, that there is a list of approximately 21 companies.

Mr. COX. I thought there were about 47.

Mr. BORLAND. My recollection is there are approximately 21—it may be larger than that—whose bonds are accepted and approved by the Treasury Department.

Mr. COX. I thought it was somewhere between 21 and 47.

Mr. STAFFORD. For instance, the Pennsylvania Railroad Co., in indemnifying for defalcations of their employees, have one bond—one blanket bond—covering all the employees of their company, lodged with one surety company.

Mr. COX. So has the Post Office Department.

Mr. STAFFORD. These surety companies are recognized to-day in the existing business affairs of our country, and they are accepted in lieu of the old private personal surety.

Mr. GREEN of Iowa. Mr. Chairman, it is my disposition as far as I may in my limited ability in an humble way to assist the committee in this matter, but I think this amendment ought to be agreed to. It is certainly conceded now everywhere that this method of taking surety companies' bonds is a better method, because the officeholder is not under any personal obligation. No one has any obligation upon him when merely a surety company bond is given, but beyond all that is the fact that the surety company bonds are better, safer, less chance of liability, and then, further, when we are revising and codifying the laws, we do not want in one part of this codification a provision in reference to a clerk that he may give a surety company bond and in another place with reference to a marshal that he must give a personal security bond. We want to bring it down to date, and we want to make it all harmonious and to correspond it seems to me. I think there is every reason why this amendment should carry.

The CHAIRMAN. The question is on the amendment.

Mr. GARRETT of Tennessee. Mr. Chairman, may we have the amendment reported again?

The CHAIRMAN. The Clerk will report the amendment.

The amendment was again reported.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

SEC. 26. No suit on a marshal's bond shall be maintained unless it is commenced within six years after the right of action accrues, saving, nevertheless, the rights of infants, married women, and insane persons, so that they sue within three years after their disabilities are removed: *Provided*, That if, upon the statement of the account of any United States marshal by the accounting officers of the Treasury, it shall thereby appear that he is indebted to the United States, and a suit therefor shall not be instituted within five years after such statement of said account, the sureties on his bond shall not be liable for such indebtedness.

Mr. COOPER. Mr. Chairman, why not say the suit shall be "begun" instead of "instituted"? "Begun" is a much simpler word. "Begin" has but one meaning. "Institute" has more than one. I speak of this because I have heard foreigners say that the English language often is confusing to them owing to the fact that it contains words each of which has more than one meaning. I should think it better to use simple language and say "begin a suit," instead of "institute a suit."

The CHAIRMAN. Does the gentleman offer that as an amendment?

Mr. COOPER. I do. Where the word "instituted" occurs insert the word "begun."

The CHAIRMAN. In what line is that?

Mr. MANN. On page 12, line 4.

Mr. COOPER. I just heard it read. I do not know.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, line 4, strike out the word "instituted" and insert in lieu thereof the word "begun."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. WATKINS. Mr. Chairman, in these immaterial matters it is a dangerous practice to indiscriminately make changes in the bill, especially in these matters where there has been an interpretation by the court. In this particular language I see no great objection, but that will have to be followed all through the bill, and amendments made all through the bill, and it will cause considerable time, trouble, and expense to make the changes as we go along. I can see no benefit at all. One word is just as proper as the other. One word is already in the statute; one word is already in this bill; and there is really no difference in the meaning of the words at all, not even the difference between tweedledum and tweedledee. There is no reason at all why the language in this bill should be butchered in order to carry out the idea that somebody may have that it will simplify the language.

Mr. GARRETT of Tennessee. This is the present law?

Mr. WATKINS. It is the present law, and it is very important it should remain intact.

Mr. GARRETT of Tennessee. And it has received construction—if not positively, tacitly?

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to strike out the last word. It says:

No suit on a marshal's bond shall be maintained unless it is commenced within six years after the right of action accrues, saving, nevertheless, the rights of infants, married women, and insane persons, so that they sue within three years after their disabilities are removed.

I suppose it is hardly necessary to say that that statute was enacted something more than 100 years ago. I would like to ask my distinguished friend from Louisiana [Mr. WATKINS] whether there is any State in the Union now, and if so, which one, where married women are under disability?

Mr. WATKINS. Why, in the State in which I live—Louisiana. They have to be especially authorized.

Mr. MANN. I just wanted to bring that out. I do not suppose the gentleman is proud of it. Is there any other State where married women are classed with infants and insane persons?

Mr. WATKINS. They are not intended to be classed with insane persons, except in this way——

Mr. MANN. I did not say they were classed "as" insane persons; I said classed "with" infants and insane persons—using careful language.

Mr. WATKINS. They are placed in the class "with," and not "as," insane persons in the State of Louisiana, and the reason is there, under marital relations, the judgment of the husband controls in business affairs, and for that reason they have not their judgment to act upon in business affairs, and it is only after disabilities are removed, and they have become widows, or no longer married women, that they can do so.

Mr. MANN. As soon as she gets rid of the husband, the disability is removed? There is something in that. Here is the only State, as the gentleman has said, where the laws of more than 100 years ago prevail, and where the laws in reference to married women still prevail, and where married women are classed with infants and insane persons, as to disability. The gentleman says they are classed "as" insane persons. I have great regard for both the men and women of Louisiana, but I would say, in view of the fact that they have not removed the disability on women, the men should be——

Mr. TOWNSEND. The gentleman does not say that Louisiana is the only State in the Union in which a husband may be a disability?

Mr. MANN. No; I do not contend that. I think New Jersey enjoys the same distinction. The gentleman is able to speak by the card. Personal experiences are received——

Mr. TOWNSEND. At all times.

Mr. MANN. At all times. I think it is a discredit to the United States Congress to codify a law and put this provision in it.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. MANN. Yes.

Mr. GARRETT of Tennessee. For information.

Mr. MANN. I will not agree to give the information, but I will yield.

Mr. GARRETT of Tennessee. I want to ask, are the rights of married women on contractual relations the same in Illinois as the rights of men?

Mr. MANN. Yes.

Mr. CANTOR. In New York, too. Absolutely the same.

Mr. MANN. Absolutely the same. A man may make a contract with his wife. In our State a man can deed his wife property or a wife can deed him property. But, then, we have gotten a little further along than that in Illinois. Our women vote for a good many offices; not for Congress yet. I do not know how soon they will.

Mr. GARRETT of Tennessee. That may explain the gentleman's remarks. [Laughter.]

Mr. MANN. But they do not vote for Members of Congress.

Mr. COOPER. Mr. Chairman, I notice that in line 21, page 11, the word "commenced" is used—

No suit on a marshal's bond shall be maintained unless it is commenced within—

And so forth, while on the next page the same section speaks about a suit being "instituted." Now, I ask the gentleman from Louisiana [Mr. WATKINS], who says that he does not want the bill to be "butchered up," and who a moment ago was so impressed with the importance of retaining "instituted," because, as his friend the gentleman from Tennessee [Mr. GARRETT] suggested, all this language has been construed by the courts—I ask the gentleman if he does not think it is dangerous to leave that word "commenced" in there? Does he not think that "commenced" ought to be stricken out and "instituted" inserted in order that there may be the same language twice in the same section? [Laughter.] You never ought to "commence" a suit; you ought to institute it. [Laughter.]

Mr. WATKINS. Mr. Chairman, in answer to the gentleman's question I will say this, that these various sections in the laws and the various laws that have been enacted come from different minds at different times. Sometimes one word is used to express an idea, and sometimes another word is used to express the same idea, or a similar idea, and it is unnecessary in preparing a codification and revising it to strike out every word that is not exactly the same as some other word in another place conveying the same idea. We do not care to go through that labor. It would be a laborious and troublesome work that I do not feel called upon to undertake.

Mr. COOPER. Mr. Chairman, if the gentleman will permit me. I desire to say that it was far from my purpose to attempt to force upon the gentleman from Louisiana against his will any "laborious and troublesome work," and especially anything so laborious as the substituting of one word for another in this section.

Mr. WATKINS. If that were the only instance, it would not make so much difference. But that is a thing that runs through the entire bill.

Mr. COOPER. I know there are a great many things of that kind which ought to be corrected, but rather than ask the committee to undertake anything so "laborious and troublesome" we should overlook all these now. [Laughter.]

Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Illinois?

Mr. COOPER. Yes.

Mr. MANN. Does not the gentleman know that he will get another chance at this at the next Congress? Everybody knows that this bill will not become a law at this session. Everybody knows that it is only designed for one purpose, and that is to prevent any other question from coming up. [Laughter.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 34. In case of a vacancy in the office of the district attorney or marshal, the district court of the United States for the district where said vacancy exists, *or the judge senior in commission in districts having more than one judge*, the supreme court of the Territory, and the Supreme Court of the District of Columbia may appoint persons to exercise the duties of such offices within their respective jurisdictions until such vacancy shall be filled. Any marshal so appointed shall give bond, as if appointed by the President, and the bond shall be approved by the judge *of the court making such appointment*. It shall then be filed in the clerk's office of said court, and a copy shall be entered on the journal of the court. A certified copy of such entry shall be prima facie proof of the execution of such bond and of the contents thereof.

Mr. GREEN of Iowa rose.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

Mr. GREEN of Iowa. I yield to the gentleman from Illinois.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last word.

Mr. GREEN of Iowa. I think probably the gentleman from Illinois wants to speak of the same matter that I had in mind.

Mr. MANN. Under this provision, Mr. Chairman, when a temporary marshal or attorney is appointed by the senior judge there is no provision for approving the bond. Now, that comes about because the language "or the judge senior in commission in districts having more than one judge" is new now, under the recent act, while the language below, which is inserted anew, "of the court making such appointment," was in the commission bill. Now you provide that the district court may make a temporary appointment or the judge senior in commission in a district where there is more than one judge may make the appointment.

Then you provide that the bond shall be approved by the judge of the court making the appointment. In my district, Chicago, there are several district judges. The temporary appointee there would be named by the senior judge, not by the district court; and, as everyone knows, when it comes to suing on a bond it is a very technical proposition. I really think the gentleman ought to pass that over and put in the proper language, letting it go over to fix it up, and then move that the committee rise. We have had a hard day, anyhow.

Mr. WATKINS. Mr. Chairman, I recognize that it is very uncomfortable here. We have not the ventilation that we ought to have. There is not a quorum here, anyhow.

Mr. MANN. I knew that.

Mr. WATKINS. I have no objection to letting it go over.

Mr. MANN. It can be fixed up between now and next week, if we rise now.

Mr. WATKINS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15578) to codify, revise, and amend the laws relating to the judiciary, and had come to no resolution thereon.

ADJOURNMENT.

Mr. WATKINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 24 minutes p. m.) the House adjourned until Thursday, April 30, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting communication from the Acting Secretary of Agriculture submitting estimate of appropriation in the sum of $500 payment to Mrs. Terezija Bucar, surviving dependent relative of Anton Bucar, was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed. (H. Doc. No. 932.)

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

By Mr. HAY, from the Committee on Military Affairs, to which was referred the bill (H. R. 12826) to reinstate Francis Graves Bonham as a cadet at the United States Military Academy, reported the same without amendment, accompanied by a report (No. 595), which said bill and report were referred to the Private Calendar.

By Mr. HAYDEN, from the Committee on the Public Lands, to which was referred the bill (S. 2548) to create an additional land district in the State of Arizona, reported the same without amendment, accompanied by a report (No. 594), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

The bill (H. R. 15938) granting a pension to Phoebe A. Ludwick; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 15928) granting a pension to Wilmot Stevens; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 15967) granting a pension to James Hanna; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 15944) granting an increase of pension to Otto Burkart; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

The bill (H. R. 14770) granting an increase of pension to Daniel E. Alexander; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MURDOCK: A bill (H. R. 16130) to establish in the Department of Labor a bureau to be known as the bureau of employment, and for other purposes; to the Committee on Labor.

By Mr. VAUGHAN: A bill (H. R. 16131) authorizing the Commissioners of the District of Columbia to set aside for street purposes certain land at and near the intersection of Jackson and Twentieth Streets NE., and for other purposes; to the Committee on District of Columbia.

By Mr. WICKERSHAM: A bill (H. R. 16132) to authorize the rebuilding of the military road bridges over Snake River and Dry Creek, at Nome, Alaska, out of the Alaska fund in the United States Treasury; to the Committee on Military Affairs.

By Mr. RAYBURN: A bill (H. R. 16133) to amend section 20 of an act to regulate commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. FLOOD of Virginia: A bill (H. R. 16134) fixing the times and places for holding regular terms of the United States circuit and district courts in the western district of Virginia, and for other purposes; to the Committee on the Judiciary.

By Mr. BRYAN: A bill (H. R. 16135) to amend section 4 of the act of April 21, 1910, entitled "An act to protect the seal fisheries of Alaska, and for other purposes"; to the Committee on Ways and Means.

By Mr. FERRIS: A bill (H. R. 16136) to authorize exploration for and disposition of coal, phosphate, oil, gas, potassium, or sodium; to the Committee on the Public Lands.

By Mr. DEITRICK: A bill (H. R. 16137) to provide for a pension for certain physically defective persons; to the Committee on Pensions.

By Mr. OLDFIELD: Joint resolution (H. J. Res. 257) authorizing the Commissioner of Patents to exchange printed copies of United States patents with the Dominion of Canada; to the Committee on Patents.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANSBERRY: A bill (H. R. 16138) granting an increase of pension to John S. Williams; to the Committee on Invalid Pensions.

By Mr. BRODBECK: A bill (H. R. 16139) granting an increase of pension to Lewis Low; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16140) granting a pension to John C. Potter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16141) granting an increase of pension to David H. Funk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16142) granting an increase of pension to John Stark; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16143) to correct the military record of T. Abram Hetrick; to the Committee on Invalid Pensions.

By Mr. BROWN of West Virginia: A bill (H. R. 16144) granting an increase of pension to John M. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16145) granting an increase of pension to George W. Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16146) granting an increase of pension to Charles L. Van Newkirk; to the Committee on Invalid Pensions.

By Mr. BULKLEY: A bill (H. R. 16147) for the relief of William B. Nesbitt; to the Committee on Military Affairs.

By Mr. BURGESS: A bill (H. R. 16148) for the relief of the legal representatives of Rebecca J. Smith; to the Committee on War Claims.

Also, a bill (H. R. 16149) to pay Lavaca County National Bank $95; to the Committee on Claims.

By Mr. CAMPBELL: A bill (H. R. 16150) granting a pension to Arabelle McCurry; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 16151) granting a pension to Joseph Gambell; to the Committee on Pensions.

By Mr. CONNELLY of Kansas: A bill (H. R. 16152) granting an increase of pension to Anna Phillips-Shepherd; to the Committee on Pensions.

By Mr. DIFENDERFER: A bill (H. R. 16153) for the relief of the J. Ellwood Lee Co.; to the Committee on Ways and Means.

By Mr. DONOHOE: A bill (H. R. 16154) granting a pension to Clarissa F. Dye; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 16155) granting a pension to Emma Potts; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16156) granting an increase of pension to Robert S. Copeland; to the Committee on Invalid Pensions.

By Mr. GREENE of Vermont: A bill (H. R. 16157) granting a pension to Jennie C. Potter; to the Committee on Invalid Pensions.

By Mr. GUDGER: A bill (H. R. 16158) granting a pension to Amanda Dimsdale; to the Committee on Pensions.

By Mr. KELLEY of Michigan: A bill (H. R. 16159) granting a pension to Emma Rose; to the Committee on Invalid Pensions.

By Mr. MORRISON: A bill (H. R. 16160) granting a pension to Sarah J. Glover; to the Committee on Invalid Pensions.

By Mr. MOSS of West Virginia: A bill (H. R. 16161) granting an increase of pension to William A. Cale; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 16162) granting a pension to Catherine J. Stephenson; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 16163) for the relief of Theodore Bagge; to the Committee on Claims.

By Mr. VOLLMER: A bill (H. R. 16164) granting a pension to George W. Bagley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16165) granting an increase of pension to C. F. Regnier; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16166) for the relief of James F. Gorman; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of School Committee of Stamford, Conn., favoring Hamill civil-service retirement bill; to the Committee on Reform in the Civil Service.

Also, petition of citizens of Dearborn, Mich., and Westfield, N. Y., against practice of polygamy in the United States; to the Committee on the Judiciary.

Also, petition of J. A. Rawlins Post, No. 1, Grand Army of the Republic, Washington, D. C., affirming their allegiance to the United States Constitution and protesting against any changes therein; to the Committee on the Judiciary.

By Mr. AINEY: Petition of 12 voters of Factoryville, Pa., favoring national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of 38 voters of Tunkhannock, Pa., favoring national constitutional prohibition amendment; to the Committee on the Judiciary.

By Mr. ALLEN: Memorial of Ohio Retail Jewelers' Association, of Columbus, Ohio, favoring passage of the Owen-Goeke bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of 216 citizens of Cincinnati, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BAILEY (by request): Petitions of J. F. Bird, B. Johnson, J. T. Mattern, W. J. Powell, C. H. Griffy, C. G. Griffey, J. A. Martz, Homer Rodkey, J. Shubert, A. E. Wait, A. H. Rose, C. B. Rumberger, J. D. Stacey, C. W. Campbell, H. J. Barnett, J. L. Cummins, P. M. Sellers, H. B. Sellers, W. O. Wallace, J. C. Barr, H. A. Treese, J. T. Collins, J. S. Mumdorf, Daniel Metzker, H. B. Mauk, G. L. Nokes, W. J. Sellers, Rev. Charles T. Dunning, John G. Sellers, W. N. Jamison, W. F. Sims, W. A. Frye, M. E. Lykens, J. R. Hermes, G. Rowan, J. E. Bassler, H. E. Blake, H. A. Karle, S. Robel, and Albert Fawks, all of Hollidaysburg, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also (by request), petition of Cambria County (Pa.) Retail Druggists' Association, favoring Stevens bill (H. R. 13305); to the Committee on Ways and Means.

Also (by request), petitions of Rev. E. L. Eslinger, Thomas Bookhamer, L. F. Garber, Isaac S. Mock, A. L. Garver, C. E. Van Deran, Blaine Thomas, C. D. Greene, R. E. Garber, L. L. Biddle, S. H. Cree, W. M. Thomas, J. S. Williams, C. E. Herr, C. M. Fluke, C. W. Zook, H. G. McAuliffe, A. Harnley, J. D. Kensinger, F. K. Lorenz, L. P. Swope, H. C. Lorenz, L. O. Burket, S. C. Kagarise, R. A. Greene, and Grant Hite, all of Roaring Springs, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. BARTHOLDT: Petition of J. W. Kearney, of St. Louis, Mo., in favor of House joint resolution 173, providing for the adjudication of the Chinese indemnity claims; to the Committee on Claims.

Also, petitions of American Frame Manufacturing Co.; Mermod, Jaccard & King Jewelry Co.; Missouri District Telegraph

Co.; West Disinfecting Co.; and Blackwell-Wielandy Book & Stationery Co., all of St. Louis, Mo., against national prohibition; to the Committee on the Judiciary.

Also, petitions of W. H. Markham & Co. Insurance Co., Louis Lange Publishing Co., Dinks Parrish's Laundry Co., Ait Box Manufacturing Co., F. R. Rice Mercantile Cigar Co., Mountain Valley Water Co., Lungstras Dyeing & Cleaning Co., St. Louis Screw Co., Edwin P. Ambler, George H. Salzgeber, and C. H. Verbarg, all of St. Louis, Mo., against national prohibition; to the Committee on the Judiciary.

By Mr. BATHRICK: Papers to accompany House bill 16101, for relief of Alma Wharfield; to the Committee on Invalid Pensions.

By Mr. BEAKES: Petitions of 17 citizens of Jackson, Mich., in opposition to House bill 9836, being the Columbus Day bill; to the Committee on the Judiciary.

Also, petitions of 1,210 voters of Washtenaw County, Mich., in opposition to national prohibition; to the Committee on the Judiciary.

By Mr. BRITTEN: Memorial of Chicago Federation of Labor, protesting against the United States becoming involved in a war with Mexico; to the Committee on Foreign Affairs.

By Mr. BROWN of West Virginia: Petitions of citizens of Job, Grafton, and Elkins, all in the State of West Virginia, favoring national prohibition; to the Committee on the Judiciary.

By Mr. BRYAN: Petition of citizens of the State of Washington, favoring decision by the States of the prohibition question; to the Committee on the Judiciary.

Also, petition of Association of Alaska Salmon Packers, favoring new survey vessels on the coast of Alaska; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Charleston (Wash.) Baptist Church, favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of Seattle Central Labor Council, relative to situation in Colorado mining district and favoring intervention by Government; to the Committee on the Judiciary.

Also, memorial of Seattle Central Labor Council, protesting against the war with Mexico; to the Committee on Foreign Affairs.

By Mr. CALDER: Petition of New York Board of Trade and Transportation, favoring passage of House bill 7617, relative to uniform system of signals; to the Committee on Interstate and Foreign Commerce.

By Mr. CANDLER of Mississippi: Petitions of 200 citizens of Amory, 300 citizens of Eupora, 125 citizens of West Point, 101 citizens of Booneville, 121 citizens of Riensi, and Woman's Christian Temperance Union of Iuka, all in the State of Mississippi, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of citizens of Amory, Miss., favoring Sabbath observance bill; to the Committee on the District of Columbia.

By Mr. CARY: Petitions of H. M. Krogmann and Jacob C. Felle, of Milwaukee, Wis., protesting against House bill 11321; to the Committee on Interstate and Foreign Commerce.

By Mr. COOPER: Petition of citizens of Union Grove, Wis., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of J. E. Patterson and others of Milton Junction, Wis., favoring the passage of House bill 12928, to amend the postal law; to the Committee on the Post Office and Post Roads.

Also, petition of C. H. Mikelsen and other citizens of Milton Junction, Wis., protesting against passage of the Sunday observance bill; to the Committee on the District of Columbia.

By Mr. COVINGTON: Petitions of 59 citizens of Ridgely, 50 citizens of Easton, 96 citizens of Snow Hill, 17 citizens of Fruitland, 26 citizens of Sharptown, 106 citizens of Salisbury, and 69 citizens of Hurlock, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

By Mr. COX: Petition of members and friends of Woman's Christian Temperance Union of Huntingburg, citizens of Hardinsburg, and 80 citizens of Corydon, all in the State of Indiana, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CRAMTON: Petition of Matthew Parker and 21 other citizens of Tuscola, Mich., protesting against the Sunday observance bill; to the Committee on District of Columbia.

By Mr. DANFORTH: Petitions of A. E. Tulley and 134 others, residents of Monroe, Livingston, Allegany, and Cattaraugus Counties, all in the State of New York, against national prohibition; to the Committee on the Judiciary.

Also, petitions of Charles Roberts and 35 others, of Caledonia; John F. White and 75 others, of Mount Morris, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of A. E. Smith and 45 others, of Clarkson; Rev. Robert S. Bell and 9 others, of Lockport; V. N. Witter and 14 others, of Barnard; H. J. Lewis, of Charlotte; Samuel S. Hickok and 13 others, of Rochester; William True, of Adams Basin; William De Ridder and 17 others, of Spencerport; Whitney P. Howe, of Carlton Station; H. R. Anderson and 12 others, of Albion; and John D. Rainey and 129 others, of Oneonta, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Walter Fell and 21 others, of Monroe County, N. Y., favoring the passage of House bill 10080, the Lindquist pure-fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of citizens of Albion and Niagara County, of Rochester Woman's Christian Temperance Union, and of citizens of Spencerport and Clarkson, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. DEITRICK: Memorial of city council of Cambridge, Mass., favoring Hamill civil-service retirement bill; to the Committee on Reform in the Civil Service.

Also, petition of Massachusetts Real Estate Exchange, against repeal of Panama Canal law; to the Committee on Interstate and Foreign Commerce.

By Mr. DONOVAN: Petition of Connecticut Peace Society, favoring mediation with Mexico; to the Committee on Foreign Affairs.

Also, petition of citizens of Connecticut, against national prohibition; to the Committee on the Judiciary.

By Mr. DOOLITTLE: Petitions of sundry citizens of the State of Kansas, favoring establishment of bureau of farm loans (H. R. 11755); to the Committee on Banking and Currency.

By Mr. DRUKKER: Petition of Madison Avenue Presbyterian Church, of Paterson, N. J., favoring national prohibition; to the Committee on the Judiciary.

By Mr. DYER: Petitions of George O. Carpenter, L. A. Ryan, A. H. Handlan, jr., and 10 other citizens; J. W. Jarboe, Paul J. Wielandy, C. F. Mathey, and E. J. Adams, all of St. Louis, Mo., against national prohibition; to the Committee on the Judiciary.

Also, petition of International Association of Machinists, of Washington, D. C., relative to construction of one battleship in a Government navy yard; to the Committee on Naval Affairs.

Also, petitions of J. D. Cleveland and Rev. C. C. Long, of St. Louis, Mo., against national prohibition; to the Committee on the Judiciary.

By Mr. FERGUSSON: Petitions of the Woman's Christian Temperance Union of Moriarty, N. Mex., signed by its president, Mrs. F. H. Flowers, and its secretary, Miss Ida Coleman, and other officials, and 72 citizens of Moriarty and Venus, N. Mex., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of Rev. O. A. Smith, J. M. McGill, and 21 other citizens of Amistad; H. L. Ewing, E. L. Brubaker, and 36 other citizens of Miami; George S. Hood and R. G. Smith and 17 other citizens of Farmington; the Christian Endeavor Society, representing 30 members, by its presiding officer, H. M. Coppock, and its secretary, Miss Carrie Lapp, of Miami; the First Methodist Episcopal Church, representing 252 members, by its presiding officer, E. C. Anderson, and its secretary, C. V. Hedgcock, of East Las Vegas, all in the State of New Mexico, favoring national prohibition; to the Committee on the Judiciary.

By Mr. GARDNER: Petition of the Young People's Religious Union of the First Unitarian Church of Ann Arbor, Mich., against section 47 of the Raker immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Massachusetts Real Estate Exchange, against repeal of Panama Canal act; to the Committee on Interstate and Foreign Commerce.

Also, petitions of citizens of Ipswich, Gloucester, and Haverhill, all in the State of Massachusetts, against national prohibition; to the Committee on the Judiciary.

By Mr. GRAHAM of Pennsylvania: Petition of the Woman's Missionary Society of Trinity Presbyterian Church, of Philadelphia, Pa., protesting against admission of any immigrants addicted to the use of alcoholic liquors; to the Committee on Immigration and Naturalization.

Also, petition of Pennsylvania Patriotic Association, of Philadelphia, Pa., favoring the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. GREENE of Vermont: Petition of Miss Eloise Case and other residents of the first congressional district of Vermont, favoring the passage of House bill 12928, relative to Sunday hours for postal employees; to the Committee on the Post Office and Post Roads.

Also, petition of Miss Eloise Case and other residents of the first congressional district of Vermont, opposing the passage of House bill 7826, being the Sabbath-observance bill; to the Committee on the District of Columbia.

By Mr. GRIEST: Protest from Mr. William P. Hess and other citizens of Lancaster, Pa., against the enactment of House bill 7826, to provide for the closing of barber shops in the District of Columbia on Sunday; to the Committee on the District of Columbia.

Also, memorials of Rev. J. H. Higby, pastor of the Olivet Baptist Church, of Lancaster, Pa., and Mr. Roy R. Lefever, of Strasburg, Pa., urging the adoption of a national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of citizens of Lancaster, Pa., favoring House bill 12928, to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. GUERNSEY: Petitions of citizens of Maine, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HAYES: Petition of Chamber of Commerce and Mutual Water & Power District Association of Victor Valley, Cal., favoring Victor Valley reclamation project; to the Committee on Rivers and Harbors.

Also, petition of Sailors' Union of the Pacific Coast, San Francisco, Cal., against House bill 11740, providing a poll tax on fishermen temporarily employed in Alaskan waters; to the Committee on the Territories.

Also, petition of Sacramento County Pomona Grange, Sacramento, Cal., supporting House bill 11897, establishing farm credits; to the Committee on Banking and Currency.

By Mr. HELVERING: Petitions of Rev. Silas Bond and 64 citizens of Miltonvale, of Mrs. Effie Cozine and 32 citizens of Washington County, and of Rev. W. C. Littell and 38 citizens of Miltonvale, all in the State of Kansas, favoring nation-wide prohibition; to the Committee on the Judiciary.

By Mr. IGOE: Petition of G. M. Hubbard, of St. Louis, Mo., favoring passage of House bill 14328, relative to false statements in the mail; to the Committee on the Post Office and Post Roads.

Also, petition of L. H. Hempelmann and Columbia Box Co., of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. JOHNSON of Washington: Petition of International Association of Machinists of Tacoma, Wash., favoring the machinists' wage bill (H. R. 12740); to the Committee on Labor.

By Mr. KELLEY of Michigan: Petition of 54 citizens of Huron County, Mich., favoring a national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of D. W. Chisholm and 46 other citizens of Huron County, Mich., favoring a national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of Mrs. Ella Webster and 15 other citizens of Huron County, Mich., favoring a national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of 800 citizens of Calumet, 30 citizens of Leonard, 32 citizens of Charlevoix, and 90 citizens of Gaylord, all in the State of Michigan, favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of 15 citizens of Woonsocket, R. I., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of Lime Rock (R. I.) Grange, favoring passage of Bathrick farm-credit bill; to the Committee on Banking and Currency.

By Mr. KINDEL: Petitions of 1,295 citizens of Denver, 450 citizens of Boulder, 700 citizens of Fort Collins, and 443 citizens of Loveland, all in the State of Colorado, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of citizens of Longmont, Colo., against Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petition of citizens of Longmont, Colo., favoring House bill 12928, to amend postal laws; to the Committee on the Post Office and Post Roads.

By Mr. KONOP: Petition of citizens of Appleton, Wis., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LANGHAM: Petition of citizens of Marian Center, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LIEB: Petition of the Evansville Typographical Union, No. 35, of Evansville, Ind., protesting against the proposed increase of postage on newspapers, magazines, trade papers, etc.; to the Committee on the Post Office and Post Roads.

Also, petition of the Evansville Typographical Union, No. 35, of Evansville, Ind., indorsing House bill 1873 and Senate bill 927, being the Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of Young People's Socialist League of Hartford, Conn., relative to labor troubles in Colorado; to the Committee on the Judiciary.

By Mr. McANDREWS: Petition of citizens of Illinois, favoring machinists' wage bill; to the Committee on Labor.

By Mr. McGILLICUDDY: Petitions of citizens of Temple, Me., and Temple Grange, No. 51, favoring national prohibition; to the Committee on the Judiciary.

By Mr. McKENZIE: Petition of 60 citizens of Winslow, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MANAHAN: Petition of the Men's Club of Wesley Methodist Episcopal Church, of Minneapolis, Minn., in favor of national prohibition; to the Committee on the Judiciary.

Also, petition of 38 voters of St. Paul, Minn., urging the enactment of House bill 12740, being the machinists' wage bill; to the Committee on Labor.

Also, petition of 127 members of Grace Methodist Episcopal Church, of Duluth, Minn., in favor of national prohibition; to the Committee on the Judiciary.

Also, petition of 87 members of the Epworth League of Wesley Methodist Episcopal Church, of Minneapolis, Minn., in favor of national prohibition; to the Committee on the Judiciary.

Also, petition of Young People's Society of Swedish Lutheran Church, of Holmes City, Minn., in favor of national prohibition; to the Committee on the Judiciary.

Also, memorial of the Hotel and Restaurant Keepers' Association of St. Paul, Minn., against national prohibition; to the Committee on the Judiciary.

Also, petition of members of Sunday school board of Wesley Methodist Episcopal Church, of Minneapolis, Minn., in favor of national prohibition; to the Committee on the Judiciary.

By Mr. MOORE: Petition of 3,456 citizens of Philadelphia, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. MOTT: Petitions of the Methodist Episcopal and Baptist Churches of Pulaski, and citizens of Cazenovia, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of voters of the thirty-second congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. O'HAIR: Petition of voters of the eighteenth congressional district of Illinois, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of citizens and churches of the eighteenth congressional district of Illinois, favoring national prohibiton; to the Committee on the Judiciary.

By Mr. O'SHAUNESSY: Petition of members of Lime Rock Grange, No. 22, Patrons of Husbandry, favoring passage of the farm-credit bill (H. R. 11897); to the Committee on Banking and Currency.

Also, petition of citizens of second congressional district of Rhode Island, against national prohibition; to the Committee on the Judiciary.

Also, petition of Epworth League Union and Herbert Thompson, of Providence, R. I., favoring national prohibition; to the Committee on the Judiciary.

By Mr. PATTEN of New York: Petition of United Societies for Local Self-Government, of Chicago, Ill., against national prohibition; to the Committee on the Judiciary.

By Mr. PATTON of Pennsylvania: Petitions of over 200 citizens of Bellefonte; citizens of Howard Borough, Westover, Emporium, and Philipsburg; and 21 citizens of Du Bois, all in the State of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of 110 citizens of Houtzdale and 115 citizens of Clearfield, all in the State of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 18 voters of the twenty-third congressional district of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. PLUMLEY: Petition of the Woman's Christian Temperance Union of Orleans, Vt., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 1,354 residents of the second district of Vermont, favoring national prohibition constitutional amendment; to the Committee on the Judiciary.

By Mr. REED: Petitions of A. W. Glines, Harmon Dow, H. A. Moody, Ernest F. Holiman, James Barry, J. H. Shaw, Thomas Tobin, and Alexander Ferson, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

Also, petitions of G. H. Loveren, W. Sheehan, Harry L. Knapp, E. E. Rockwell, Rudolph Hamel, and George D. Rainville, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

Also, petitions of A. W. Muzzey, W. H. Hurd, Joseph Moffie, A. F. Mitchell, Ivar Alderwell, and W. S. Levy, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

Also, petitions of Z. Hondrotoz, Louis A. Dupont, William E. Smith, Joseph Quirin, Cleophas Gagnon, and Edward J. Flanagan, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

Also, petitions of Fred Lebel, Albert B. Greay, G. F. Saulnier, Edward M. Cote, Ernest Jean, and John Burke, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

Also, petitions of Edward L. Lovering, Frank P. Langford, Stephen Spane, Walter A. Kane, John J. Hartnett, and George D. Burns, of Manchester, N. H., opposing national prohibition of liquor traffic; to the Committee on the Judiciary.

By Mr. REILLY of Connecticut: Petition of citizens of Hartford, Conn., commending President for his acceptance of offer of mediation with Mexico; to the Committee on Foreign Affairs.

Also, petition of citizens of Wallingford, Conn., relative to mine outrages in Colorado; to the Committee on Rules.

By Mr. ROGERS: Petitions of citizens of the fifth congressional district of Massachusetts, against national prohibition; to the Committee on the Judiciary.

By Mr. SABATH: Petition of Chicago Federation of Labor, relative to troubles with Mexico; to the Committee on Foreign Affairs.

Also, petition of the Church Peace Union, favoring universal peace; to the Committee on Foreign Affairs.

By Mr. SELDOMRIDGE: Petition of citizens of Eaton and Lucerne, Colo., favoring House bill 12928, to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. SLOAN: Petitions of Mr. M. L. Keefer, Mr. Ray W. Jones, Mr. H. L. Caldwell, Rev. Stanard, Mr. F. Welch, Mr. J. M. Landenberger, Mr. J. D. Mikkelson, Mr. J. P. Corwin, Mr. C. A. Watson, and Rev. J. G. Stanard, of Utica; and Mr. J. W. Morris, of Beaver Crossing, all in the State of Nebraska, favoring national prohibition; to the Committee on the Judiciary.

By Mr. SUTHERLAND: Papers to accompany House bill 2273, for relief of A. H. Dolly; to the Committee on Invalid Pensions.

By Mr. TALBOTT of Maryland: Petitions of citizens of Maryland, favoring national prohibition; to the Committee on the Judiciary.

By Mr. TALCOTT of New York: Petition of 394 citizens of the thirty-third New York congressional district, against national prohibition; to the Committee on the Judiciary.

By Mr. TAVENNER: Petition of H. H. Harris, Macomb, Ill., favoring increase in pension for minor children of Spanish War veterans; to the Committee on Pensions.

By Mr. TREADWAY: Petition of 11 citizens of Holyoke, Mass., favoring national prohibition; to the Committee on the Judiciary.

By Mr. UNDERHILL: Petitions of citizens of Ithaca, Painted Post, and Montour Falls; Woman's Christian Temperance Union and the Methodist Episcopal and Baptist Churches of Trumansburg; citizens of Steuben, Newfield, Erin, Van Etten, Hickle, and Freeville; Dryden Presbyterian and Methodist Episcopal Churches; Baptist, Methodist Episcopal, and Presbyterian Churches of Owego, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. VOLLMER: Petition of St. John's Episcopal Church, of Clinton, Iowa, protesting against polygamy in the United States; to the Committee on the Judiciary.

By Mr. WALLIN: Petition of citizens of the thirtieth New York congressional district and the Schenectady (N. Y.) Ministerial Association, favoring national prohibition; to the Committee on the Judiciary.

By Mr. WEAVER: Petition of citizens of Oklahoma, protesting against national prohibition; to the Committee on the Judiciary.

Also (by request), petition of citizens of Logan County, Okla., favoring Federal loan act; to the Committee on Banking and Currency.

SENATE.

THURSDAY, *April 30, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we pray for such a sense of the divine wisdom and power and glory as that we may always approach Thee with reverence and adoration and praise. We thank Thee that the facts of Thy kingdom are not in conflict with the facts of common life and that the forces of the Kingdom of Heaven are not in conflict with those forces that make for the best in human government. We pray that we may be enabled to interpret God's dealing with men and to fashion all our public life after the will and commandment of the great God of Nations, who ruleth over all. So do Thou help us to come into conformity with Thy will, that we may achieve our highest distinction and power and glory through obedience to the divine commandment. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

REVENUES OF RAIL CARRIERS.

The VICE PRESIDENT laid before the Senate a communication from the Interstate Commerce Commission, transmitting, in further response to a resolution of the 28th instant, all additional anonymous letters and communications and all written or printed letters and communications with signatures thereto, and all circulars, clippings, newspaper and magazine articles, marked or otherwise, which have been received by the commission or any member thereof, which was ordered to lie on the table.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, returned to the Senate, in compliance with its request, the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving benefits of an act of Congress approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture, and also the message of the Senate agreeing to the conference report thereon.

LABOR TROUBLES IN COLORADO.

Mr. KENYON. Mr. President, there has been some discussion as to the introduction of telegrams. I want to present a telegram from a mass meeting of citizens in my State. There are some things in it which might have been objectionable that I have blue-penciled. It is in the nature of a petition, and while I shall not ask to have read the part I have crossed out, I ask that it be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Telegram.]

HITEMAN, IOWA, *April 21, 1914.*

Senator KENYON, *Washington, D. C.:*

We the citizens of Hiteman in mass meeting assembled, realizing that two wars are now on—one a war to crush out the rebellious spirit of the wage earners of the Colorado mines owned and operated by the Rockefeller interests; and

Whereas the newspapers are giving columns upon columns about the "American conquest of Mexico," every known means of appealing to the gullibility of the American workers is being used. The flag incident and other excuses are being put forward to justify the sending of the American militia and naval forces to our neighboring country. At the same time distorted reports of the bloodiest slaughter of workingmen in modern times are appearing in the capitalist press. The recent "battle of Ludlow," Colo., is the most outrageous assault upon the rights and liberties and lives of the working class in American history, where uniformed "gunmen" drive innocent women and children into blazing tents with bullets to be burned to death, where 50 of our people are known to be murdered in a day, over two-thirds of whom were women and children: Therefore be it

Resolved, That we in mass meeting assembled do protest against such outrageous treatment of our fellow workers by the hired assassins of the moneyed interests; and be it further

Resolved, That we demand of the President of the United States and both Houses of Congress to send the Federal troops to Colorado to relieve these miners, their wives and children, who are being slaughtered wholesale by the murderous guards.

THOMAS OAKLEY, *Chairman.*
RICHARD SAMUEL, *Secretary.*

Mr. MARTINE of New Jersey. Mr. President, I feel intensely the condition that exists in Colorado. The employment of armed bodies of thugs—and no other word will satisfy—the employment of armed bodies of thugs under the name of mine guards, I insist, is the evil of our day.

While I had the honor to serve as a member of a committee or commission, or whatever it might be termed, in West Virginia wherein these armed thugs played an important part, I felt so incensed and so rightly justified that upon my return I drew a bill which was introduced in the Senate and referred to the Committee on Education and Labor, wherein it was provided that every individual, corporation, or body of men employ-

ing armed guards for private purposes should be liable to a fine of at least $5,000 and imprisonment for one year. In the ordinary parliamentary way the bill was referred to the Committee on Education and Labor, and there it seems to sleep the sleep of the righteous and the just.

I say, had this bill been reported and been made a law of this country the unfortunate condition which prevails in Colorado would not have existed. Those of you who have not been in close contact and seen and felt the very atmosphere that seems surcharged with the evil of the employment of these armed brutes can hardly appreciate the situation. It deprived for a time the people of the Commonwealth of West Virginia of the right of constitutional government, and to-day in Colorado it is the same.

I say for the well-being of all our country, for the hope of the posterity that will come after us, it is high time the Senate of the United States should take some steps to stay this brutal evil. In Colorado, even worse than it was in West Virginia, men and women have been shot down like dogs in a kennel, until conditions in Colorado are even worse than they are to-day in Mexico.

I trust that this telegram may find a deep and an abiding place in the hearts and minds and consciences of the Members of the Senate, and that speedy action may be taken toward allaying this horrid abuse. I plead with the Committee on Education and Labor, to whom the bill that I introduced some months ago was referred, that they give it serious consideration and report to the Senate that a voice may be had in the Senate against the monstrous proposition of hiring men, armed with Springfield rifles, and shooting men as though they were cats and dogs.

Mr. WARREN. Will the Senator allow me?

Mr. MARTINE of New Jersey. I ask it earnestly. I ask it seriously. It is not a simple theory, but it is a fact, which exists to the disgrace and humiliation of our glorious country. I yield to the Senator from Wyoming.

Mr. WARREN. If the Senator will yield a moment, referring to the telegram and the request for United States troops sent to the desk by the Senator from Iowa [Mr. KENYON], I understand that the administration has already responded to similar requests heretofore made, and that United States troops are there now in the afflicted district; that the governor of the State of Colorado having withdrawn his militia from the district formerly occupied by that force, the United States now has charge in the interest of peace which we so devoutly wish for.

Mr. MARTINE of New Jersey. I thank the Senator. I understand that that condition does prevail now, but it has been tardy, tardy to the extent of sluggishness. I hope that results will follow. I know through the enactment of the bill I introduced we would have spared much of the evil which has prevailed in the Commonwealth of Colorado or in any other Commonwealth subject to this horrid brutality.

Mr. CHILTON. Mr. President, I do not want by my silence to seem to assent to the statement made by the Senator from New Jersey that West Virginia is or has been in a state of lawlessness. We had a strike in West Virginia a short time ago, which was investigated by a committee of the Senate. A report has been made, and it is now subject to the inspection of every Senator and the public.

The main strike was confined to one district of one county in that State. It was not much different from any other strike in any other place in the country. We had the usual incidents. We had a clash between the operators and the miners, neither one willing to concede the necessary thing; but finally the strike was settled and everything became peaceful and everything is now quiet. If one should pass up that valley now he would never know that a strike had occurred. I think the Senator from New Jersey is a little extreme in his statement, from which it might be inferred that there has been a general acquiescence in the rule of thugs in West Virginia. We did not have anything in the State of West Virginia so serious as the difficulties the Senator's State has had in the city of Paterson. We did not have anything in that State like what has been in some of the other Eastern States.

Our coal development has been exceedingly rapid. This development is necessarily in the mountains. We find the coal in the high mountains of that State. The coal operators go up a valley, build a little branch line of railroad up the valley, and open up coal mines in the hills. Before the coal companies went there there were probably in a boundary of 6 or 8 miles originally only a few score of inhabitants—the unterrified, law-abiding mountain farmers. After the coal companies went there and opened up their works, of course practically everything in the immediate locality came under the control of the companies. They built houses, refrigerating plants, power plants, and necessary buildings to house, feed, clothe, and accommodate hundreds of miners and employees, without whom the coal could not be mined. If the company had not gone there and opened the coal works, there would have been no improvement there, no mining town, no industry. Of course, when these labor difficulties came the coal companies were found to be in charge of the land, in charge of the industries, and, naturally, there would grow up a distrust upon the part of the miners. When the strike began then every grievance and cause of complaint became acute. The coal companies would naturally want to have their own way and the miners would want to have theirs. It is not the desire of either the operators or the United Mine Workers of America to rehash the origin of these difficulties and serious troubles. We had some shooting, we had some terrible scenes there; but nothing so terrible as what has occurred in the State of New Jersey, not so appalling as what has occurred in Massachusetts; nothing approximating the recent scenes in Colorado.

Mr. MARTINE of New Jersey. I will inquire——

Mr. CHILTON. Just one moment. Let me make my statement. There is nothing different there from what has occurred in the great incorporated city of Paterson, nothing different from what might occur in any place where there has been a clash between labor and capital, over actual or supposed grievances of long standing. The cool heads did not appreciate that there was a storm coming in time to avert what we concede was a most unfortunate spectacle.

I deny now that the State of West Virginia has ever been in a State of lawlessness. I deny that our people favor anything in the shape of lawlessness. I am here to assert that 99 per cent of the people of West Virginia want law and order and peace, and 99.99 per cent deprecate the decision of the supreme court of that State, which, in my opinion, set aside the just and the constitutional rights of the people. It is a very small faction outside the four members of the court and the lawyers on that side of the case who would maintain that doctrine. There is little sympathy with it in the State of West Virginia, and in her own good time she will, as I believe, get rid of the effects of that decision. She will, I am pursuaded, set it aside in due course, and the State of West Virginia will at all times maintain law and order. Both the miners of that State and the operators of that State are, in the main, law-abiding people. They are now working together to solve the problems that confront them. It does no good at this time to bring up the memories of the recent unhappy conflict. West Virginia can solve her own problems, and she objects that anyone should make her either the target or the horrible example.

Mr. MARTINE of New Jersey. Mr. President, it is a very natural pride——

Mr. SUTHERLAND. Mr. President, I rise to a question of order.

The VICE PRESIDENT. The Senator from Utah will state the point of order.

Mr. SUTHERLAND. The Senator from New Jersey made a statement which called for a response upon the part of the Senator from West Virginia. I did not desire to interrupt the Senator from West Virginia, but I make the point of order that this entire discussion is out of order. There is nothing before the Senate to which it could apply. We are wasting the morning hour every day in discussions of this sort.

Mr. MARTINE of New Jersey. Of course I am subject to the ruling of the Chair.

The VICE PRESIDENT. If the regular order is called for, the Senator from New Jersey who has frequently presided in this place knows that it is not in order for him to proceed.

Mr. MARTINE of New Jersey. I of course submit, but I beg to say——

Mr. SUTHERLAND. I call for the regular order.

Mr. MARTINE of New Jersey. That at some future time I should like to know what the Senator from West Virginia would define as constitutional law that prevails anywhere more than in New Jersey.

PETITIONS AND MEMORIALS.

Mr. SMITH of Michigan presented a petition of sundry citizens of Fremont, Mich., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Suttons Bay, Mich., remonstrating against national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Coleman, Mich., and a petition of the congregation of the Le Grave Avenue Christian Reformed Church, of Grand Rapids, Mich., praying for the enactment of legislation to grant a compensatory time privilege to post-office employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Local Division No. 286, Brotherhood of Locomotive Engineers, of Grand Rapids, Mich., and a petition of Local Division No. 565, Order of Railway Conductors, of Port Huron, Mich., praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented a petition of Calhoun County Pomona Grange, Patrons of Husbandry, of Battle Creek, Mich., praying for the establishment of a system of rural credits, which was referred to the Committee on Banking and Currency.

He also presented a memorial of sundry citizens of Coleman, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. WORKS presented a memorial of Rosecrans Post, No. 182, Department of California, Grand Army of the Republic, and of the Women's Relief Corps of Whittier, Cal., remonstrating against any change being made in the American flag, which was referred to the Committee on the Judiciary.

He also presented a telegram in the nature of a petition from sundry citizens of Denair, Cal., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. COLT presented a petition of the congregation of the Calvary Baptist Church of Providence, and a petition of sundry citizens of Woonsocket and Providence, R. I., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. HITCHCOCK presented a petition of the Ministerial Union of Omaha, Nebr., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. SHEPPARD. I present resolutions adopted by a large number of prominent business and professional men of Hillsboro, Tex., heartily indorsing President Woodrow Wilson's attitude with reference to the Panama Canal tolls matter. I move that the resolution be referred to the Committee on Interoceanic Canals.

The motion was agreed to.

Mr. BRADLEY presented a memorial of sundry citizens of Lexington, Ky., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of Local Division No. 365, Brotherhood of Locomotive Engineers, of Louisville, Ky., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was ordered to lie on the table.

He also presented a petition of the United Daughters of the Confederacy, of Lawrenceburg, Ky., praying for the enactment of legislation to provide for the refunding of the cotton tax collected from the year 1862 to the year 1868, which was referred to the Committee on Finance.

He also presented petitions of sundry citizens and organizations in the State of Kentucky, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WEEKS. Mr. President, I present resolutions adopted by the Massachusetts Real Estate Exchange, a large commercial body in Boston, Mass., remonstrating against the repeal of the clause in the Panama Canal act exempting coastwise shipping from the payment of tolls. I move that the resolutions be received and referred to the Committee on Interoceanic Canals.

The motion was agreed to.

Mr. WEEKS. I present resolutions adopted at a citizens' mass meeting held at Faneuil Hall, Boston, Mass., April 27, 1914, relating to our relations with Mexico. In that connection, while I do not ask to have the resolutions read, I wish to call attention to the last one, because I think it is most pertinent. It is as follows:

That we earnestly urge an immediate and express declaration by Congress reaffirming the pledge given by President Wilson in his Mobile speech that the United States will not seek one foot of territory by conquest.

I hope the writers of that resolution will note the action of the Senate last Tuesday night, when an amendment to that effect was voted down by the unanimous vote of the majority.

The VICE PRESIDENT. The resolutions will be referred to the Committee on Foreign Relations.

Mr. WEEKS presented memorials of sundry citizens of Massachusetts, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Massachusetts, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. BRANDEGEE. I send to the desk a very brief telegram which I have received from constituents of mine in Hartford, Conn., and ask that it may be read.

The VICE PRESIDENT. Is there objection?

Mr. SMITH of Michigan. Do I understand the Senator from Connecticut desires to have the telegram read?

Mr. BRANDEGEE. I should like to have the telegram read. It contains only a few lines.

Mr. SMITH of Michigan. I shall be very glad to have it read.

Mr. BRANDEGEE. I will read it myself if there is any objection.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Telegram.]

HARTFORD, CONN., *April 29, 1914.*

Hon. FRANK B. BRANDEGEE,
Senator from Connecticut, Washington, D. C.:

We, mothers, wives, and sisters of American boys, commend the action of the President in accepting offers of mediation, and urge that you use every effort for suppression of hysterical war spirit and consummation of speedy peace. Offenses committed are more than atoned for by Mexican and American homes already bereaved. Public and international sentiment demand generous action by United States.
(Signed by N. C. Palmer and about 150 others.)

Mr. BRANDEGEE. I will simply state that the signers of the telegram are among the first ladies of the city of Hartford, Conn. I do not ask that all their names be published, but that it be referred to the Committee on Foreign Relations.

The VICE PRESIDENT. The telegram will be referred to the Committee on Foreign Relations.

Mr. BRANDEGEE presented memorials of sundry citizens of New Haven and Bridgeport and of the German-American Alliance, of New Haven, all in the State of Connecticut, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of Liberty Council, No. 8, Daughters of America, of Noank, Conn., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. SHIVELY presented petitions of the congregations of the Methodist Church of Oxford and the Bethel Evangelical Church, of Elkhart, and of sundry citizens of Kendallville and Monticello, all in the State of Indiana, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Fairland, Ind., praying for the enactment of legislation to grant a compensatory time privilege to post-office employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the Medical Society of Green County, Ind., remonstrating against the enactment of legislation to prohibit the distribution and dispensing of narcotic drugs by physicians, dentists, and veterinarians, which was ordered to lie on the table.

He also presented a petition of the Ministerial Association, of Fort Wayne, Ind., praying for the enactment of legislation to provide pensions for civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. OWEN presented petitions of sundry citizens of Oklahoma, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. LODGE presented a petition of the Board of Selectmen, of Winthrop, Mass., praying for the enactment of legislation to grant pensions to civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. POINDEXTER presented a memorial of the Mining Men's Club, of Spokane, Wash., remonstrating against the leasing of Government lands and resources which are contrary to the principles of our Government and urging that they be disposed of under the laws which have been in force until recently, which was referred to the Committee on Public Lands.

Mr. CLARK of Wyoming presented petitions of sundry citizens of Wyoming, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. LA FOLLETTE presented memorials of 5,236 electors residing in the first congressional district, of 4,906 electors residing in the second congressional district, of 3,168 electors residing

in the third congressional district, of 23,638 electors residing in the fourth congressional district, of 22,726 electors residing in the fifth congressional district, of 6,930 electors residing in the sixth congressional district, of 4,554 electors residing in the seventh congressional district, of 2,354 electors residing in the eighth congressional district, of 6,754 electors residing in the ninth congressional district, of 924 electors residing in the tenth congressional district, and of 3,388 electors residing in the eleventh congressional district, all in the State of Wisconsin, remonstrating against the passage of House joint resolution No. 168 and Senate resolutions Nos. 50 and 88, seeking to amend the Constitution for national prohibition, which were referred to the Committee on the Judiciary.

Mr. JOHNSON presented petitions of sundry citizens of Maine, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the State Board of Trade of Maine, remonstrating against the enactment of legislation to create an interstate trade commission, which was referred to the Committee on Interstate Commerce.

Mr. McLEAN presented a petition of sundry citizens of New Britain, Conn., praying for the repeal of the exemption clause in the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

He also presented memorials of sundry citizens and organizations in New Haven, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BURLEIGH presented petitions of sundry citizens of Mattawamkeag, Charleston, Waldo, and Jefferson, and of the congregation of the Methodist Church of Mattawamkeag, all in the State of Maine, praying for national prohibition, which were referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. OWEN, from the Committee on Indian Affairs, to which was referred the bill (S. 5392) to provide for carrying into effect of the agreement between the United States and the Muskogee (Creek) Nation of Indians, ratified by act of Congress approved March 1, 1901, and supplemental agreement of June 30, 1902, and other laws and treaties with said tribe of Indians, reported it with amendments and submitted a report (No. 467) thereon.

He also, from the Committee on Woman Suffrage, to which was referred the joint resolution (S. J. Res. 128) proposing an amendment to the Constitution of the United States, reported it without amendment and submitted a report (No. 468) thereon.

Mr. ROOT, from the Committee on the Library, to which was referred the bill (S. 3662) to promote the erection of a memorial in conjunction with the celebration of the centenary of the Battle of Plattsburg during the year 1914, in commemoration of the one hundredth anniversary of Macdonough's victory in the naval battle fought in the War of 1812, the last naval engagement between English-speaking peoples, reported it with an amendment and submitted a report (No. 471) thereon.

REPORT OF PUBLIC BUILDINGS COMMISSION.

Mr. SWANSON. Section 36 of the public-buildings act, approved March 4, 1913, provides for a Public Buildings Commission and requires the commission to submit a report to Congress. I present the report of the Public Buildings Commission, and ask that it be received and referred to the Committee on Public Buildings and Grounds.

Mr. SWANSON subsequently said: A short while ago I submitted a report from the joint committee of the Public Buildings Commission. I did not ask that the report be printed, as I thought it would be printed under the rule governing the printing of such documents. As it is not the report of a committee, but the report of a commission, I think I will be compelled to ask that 1,000 additional copies of the report be printed for the use of the Senate document room.

The VICE PRESIDENT. Is there objection? The Chair hears none.

LIEUT. COL. CONSTANTINE MARRAST PERKINS.

Mr. TILLMAN. From the Committee on Naval Affairs I report the bill (S. 5148) for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps without amendment, and submit a report (No. 466) thereon. I ask for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the President of the United States be, and is hereby, authorized to restore Constantine Marrast Perkins, now a lieutenant colonel on the retired list, to the active list of the Marine Corps, in the grade of colonel, to take rank in said grade next after Col. Franklin J. Moses, who was the officer immediately above the said Constantine Marrast Perkins in the list of lieutenant colonels at the date said Constantine Marrast Perkins was retired from active service with the rank of lieutenant colonel: *Provided*, That the said Constantine Marrast Perkins shall establish to the satisfaction of the Secretary of the Navy, by examination pursuant to law, his physical, mental, moral, and professional fitness to perform the duties of colonel: *Provided further*, That the said Constantine Marrast Perkins shall be carried, while on the active list, as additional to the number in the grade to which he may be advanced pursuant to this act until such time as a vacancy occurs in said grade: *And provided further*, That the said Constantine Marrast Perkins shall not, by the passage of this act, be entitled to any back pay or allowances.

Mr. HITCHCOCK. I should like to learn from the Senator from South Carolina the reason for the retirement of this officer.

Mr. TILLMAN. That is all stated in the report which accompanies the bill. If the Senator from Nebraska desires the report read, that may be done.

Mr. HITCHCOCK. I do not like to have a bill of that sort go through without any explanation.

Mr. TILLMAN. I call for the reading of the report, Mr. President.

Mr. LODGE. Of course I have no objection to the reading of the report, but I think that I can make a brief statement which I believe will satisfy the Senator from Nebraska.

Mr. HITCHCOCK. I have no desire to have the report read, but I should like to have some statement concerning the matter.

Mr. LODGE. This officer was refused promotion on the finding of two medical officers of the service, and their finding was afterwards shown to be absolutely wrong and unfounded.

Mr. CLARK of Wyoming. By whom were the subsequent findings made?

Mr. LODGE. It was decided by Col. Gorgas and all the best authorities we have that the first board had made a mistake in diagnosis.

Mr. CLARKE of Arkansas. Let me ask the Senator from Massachusetts a question. I ask whether this officer was put out of the service by the activities of what is known as the "plucking board"?

Mr. LODGE. He resigned from the service.

Mr. CLARKE of Arkansas. What is the occasion of his being restored at this time and marked especially for advancement?

Mr. LODGE. He resigned from the service because he was unwilling to be retired by law, with the statement that he was mentally unsound. It has been shown, beyond any reasonable doubt, that he was not mentally unsound, and that showing has been accepted by the department, which, I assure the Senator, is a very unusual thing for them to do.

Mr. CLARKE of Arkansas. He voluntarily resigned?

Mr. LODGE. The Secretary of the Navy recommends the bill.

Mr. CLARKE of Arkansas. He voluntarily resigned when confronted by the finding of a board to the effect that he was mentally unsound.

Mr. LODGE. It was the finding of a board on the report of two physicians.

Mr. CLARKE of Arkansas. But he resigned, and now it is proposed that he be put back without any showing, except the fact that he retired at that time.

Mr. LODGE. He must be examined and found qualified in order to get back.

Mr. TILLMAN. The Secretary of the Navy explains the whole thing, as Senators will see if they will allow the report to be read.

Mr. LODGE. The whole matter is explained in the report, but I thought I could save time by making a brief statement of the case.

Mr. SMITH of Georgia. It is also true that there was a thorough investigation by the House committee and a unanimous report to the effect that the finding of the two surgeons that the officer was mentally unsound was entirely unfounded; and his mental soundness is certified to not only by Col. Gorgas, but by several other of the most distinguished surgeons in the service.

Mr. LODGE. By three of the most distinguished surgeons in the service.

Mr. SMITH of Georgia. He was really forced out under that charge. He was in a nervous condition at the time. That is my understanding.

Mr. CLARKE of Arkansas. Mr. President, it would seem that that condition would call for investigation into the methods by which naval officers are treated by those who have authority to investigate their mental and physical status. When a naval officer, who is supposed not only to be courageous in defending the rights of others, but certainly to stand up in defense of his own rights, finds himself improperly charged with the very serious defect of being crazy, instead of confronting that situation and meeting it, as he ought to do, runs away from it, and then comes here and asks for a special act relieving him, he does not disclose that degree of courage and manhood that ought to characterize the officers of the military branch of this country.

Mr. LODGE. Does the Senator defend that injustice?

Mr. CLARKE of Arkansas. If the facts be true, he was charged with being crazy, and instead of meeting that charge, ran away from it.

Mr. LODGE. Well, he met it just as quickly as he could.

Mr. CLARKE of Arkansas. By resigning.

Mr. LODGE. He resigned because he had no escape, except to go out under the stigma of insanity.

Mr. CLARKE of Arkansas. He went out under the stigma of insanity when he should have defended himself against an unfounded accusation of that kind instead of coming here.

Mr. LODGE. His resignation was not submitted on that ground.

Mr. CLARKE of Arkansas. He made it on that ground, however.

Mr. LODGE. It was not based on that ground.

Mr. CLARKE of Arkansas. Upon what ground did he resign?

Mr. CLARK of Wyoming. Mr. President, I rise to a question of order.

The VICE PRESIDENT. The Senator from Wyoming will state it.

Mr. CLARK of Wyoming. The point of order is that Senators should address the Chair instead of indulging in a conversation of this kind.

Mr. CLARKE of Arkansas. What I am objecting to is that a naval officer should find himself in that situation and run away from it in that manner.

The VICE PRESIDENT. There is a request for the reading of the report. Is there any objection? The Chair hears none, and the Secretary will read the report.

The Secretary proceeded to read the report this day submitted by Mr. TILLMAN.

Mr. BRANDEGEE. I should like to ask if unanimous consent has been given for the consideration of this bill?

The VICE PRESIDENT. It has.

The Secretary resumed the reading of the report.

Mr. SMITH of Georgia. Mr. President, I suggest that the letter from the Secretary of the Navy be read rather than the entire report. Possibly that will be all that will be required.

Mr. VARDAMAN. If the Senator would permit the report to be read, time would be saved in the discussion of the question. The report sets out the facts quite fully, and it would be really an economy of time to permit it to be read.

The VICE PRESIDENT. The Secretary will proceed with the reading.

The Secretary resumed the reading of the report, which, entire, is as follows:

[Senate Report No. 466, Sixty-third Congress, second session.]

LIEUT. COL. CONSTANTINE MARRAST PERKINS.

Mr. TILLMAN, from the Committee on Naval Affairs, submitted the following report, to accompany S. 5148:

The Committee on Naval Affairs, to whom was referred Senate bills 196, 1674, and 5148, for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps, having duly considered the same, report back favorably, without amendment, the last named of the three bills, introduced by Mr. TILLMAN, conforming to the draft of a proposed measure approved by the Navy Department and submitted by the Secretary of the Navy in a letter, dated April 2, 1914, and addressed to the chairman, embodying the department's views upon the two preceding bills (S. 196 and S. 1674), looking to the relief of this officer, and for which the accompanying bill (S. 5148) has been substituted.

The first named of the above-mentioned bills, introduced on the first day of the extra (first) session of this Congress, was referred to the Navy Department for report April 8, 1913.

The bill now reported provides for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps as an additional number in the grade of colonel, to which grade and rank he would rightfully belong had he not been retired—

"*Provided*, That the said Constantine Marrast Perkins shall establish to the satisfaction of the Navy, by examination pursuant to law, his physical, mental, moral, and professional fitness to perform the duties of colonel: *Provided further*, That the said Constantine Marrast Perkins shall be carried, while on the active list, as additional to the numbers in the grade to which he may be advanced pursuant to this act, until such time as a vacancy occurs in said grade: *And provided further*, That the said Constantine Marrast Perkins shall not, by the passage of this act, be entitled to any back pay or allowances."

The House Committee on Naval Affairs, Sixty-second Congress, second session, to which was referred a bill introduced in that body similar to Senate bills 196 and 1674, after exhaustive hearings held upon the same, during which was heard not only the beneficiary of the bill but the Major General Commandant of the Marine Corps, the members of the retiring board, and other witnesses, and after a thorough examination of all official papers, records, etc., furnished by the Navy Department relating to the retirement of Lieut. Col. Constantine Marrast Perkins and his record as an officer, reported without amendment to the House under date of May 16, 1912, unanimously recommending the passage of the bill restoring that officer to the active list as colonel in the rank, grade, and with the number he would have held had he never been retired.

The first and concluding paragraphs of the House committee's report (No. 727) are as follows:

"The subcommittee to which this matter was referred accumulated a great mass of testimony and came to the conclusion that the claim of Col. Perkins is true. On a report of these facts to the full committee it took the same view, and the conclusions of both the subcommittee and the full committee was unanimous.

"The history of Col. Perkins as an officer is highly creditable both to himself and to the service. For many years nothing but commendation from his superiors crowned the discharge of his duties.

"A brief review of the facts concerning his retirement is now submitted to the House. * * * The retirement of Col. Perkins was therefore not voluntary, but was procured by duress and fraud. The development of the fact is a complete vindication, but as a matter of justice the bill authorizing his reinstatement should be passed.

"The record of the American Navy is the pride of the American people. It glows with unsullied honor. And every consideration of pride in the Navy as well as justice to Col. Perkins requires that this first dark stain should be blotted out in his reinstatement to the active list. The committee therefore unanimously recommends that the bill do pass."

In view of the very full and convincing report of the House Committee on Naval Affairs in this case and the earnest recommendation by the present Secretary of the Navy that the bill "that will give delayed justice to an honorable officer who was made to suffer without justification," be enacted into a law as speedily as possible, your committee has not deemed it necessary to have any further hearings on the facts of this case, which are fully set forth in the report of the committee of the House (No. 727) and which report your committee feels justified in hereby adopting, and in the Secretary's letter to the chairman, in which the evidence taken before the retiring board is quoted.

The Secretary's letter follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, April 2, 1914.

DEAR MR. CHAIRMAN: I have given long and careful consideration to the request of your committee for a recommendation by the department of Senate bills 196 and 1674, for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps, and I have the honor to make reply as follows:

It has been my rule, except in cases where great injustice is shown, not to look favorably upon bills to reverse previous actions of the department. Former officials have acted conscientiously and their findings are regarded as binding upon me unless the reason for reopening is clear and imperative. When your request for recommendation on the pending bill came before me, my first impulse was to adhere to the general course I had marked out as wise, and to recommend that the status remain as fixed after the action of the department. But when my attention was called to the fact that the House Committee on Naval Affairs at the second session of the Sixty-second Congress had made a thorough investigation of the case and had unanimously reached the conclusion that a bill similar to Senate bills 196 and 1674 ought to be enacted, it seemed incumbent upon me to enter upon a thorough study of the case and to give careful examination of the evidence before the retiring board, before the House committee, and to examine with care all other material available for throwing light upon it. The language in the report of the House committee seemed to demand of me the fullest investigation and consideration, for concluding a long review of the evidence before the committee, that report made this summing up:

"The retirement of Col. Perkins was therefore not voluntary, but was procured by duress and fraud. The development of the fact is a complete vindication, but as a matter of justice the bill authorizing his reinstatement should be passed.

"The record of the American Navy is the pride of the American people. It glows with unsullied honor, and every consideration of pride in the Navy as well as justice to Col. Perkins requires that this first dark stain should be blotted out in his reinstatement to the active list. The committee therefore unanimously recommends that the bill do pass."

I have devoted many hours to reading the evidence and the voluminous papers. I have spent much time talking with those who had the best opportunity of knowing whether the department's action, or the condemnation of such action by the House committee, was justified by the facts as they were produced on the trial and by subsequent developments. I not only talked with officers who were associated with Col. Perkins before he was ordered before the retiring board, but also conferred with members of that board, the Major General Commandant of the Marine Corps at the time of Col. Perkins's retirement, and others who had knowledge of the case. I had also a long interview with Col. Perkins himself, so as to satisfy myself as to the quality and capacity of the man. Some of those with whom I talked believed that the action of the department was fully justified, and, moreover, that the action taken was necessary for the good of the service. They believe that Col. Perkins was, as the board found, permanently unsuited to the duties devolving upon him, by reason of "mental instability."

In reaching an opposite conclusion and in deciding to recommend the passage of an amended measure to restore Col. Perkins, I have been largely influenced thereto by the evidence of four eminent surgeons who gave testimony before the board, to wit, Col. William C. Gorgas, now Surgeon General of the Army; Dr. George A. Lung, one of the ablest surgeons in the Medical Corps of the Navy; Maj. Charles E. Woodruff, now a retired surgeon of the United States Army; and Surg. H. C. Curl, also an able surgeon of the Navy, then superintendent of the Colon Hospital under the Panama Canal Commission. The testimony of these surgeons is convincing to my mind that Col. Perkins, while suffering from nervousness, was not mentally unbalanced. Each of them knew Col. Perkins long and intimately enough to form an estimate of his mental condition, and these four able surgeons were direct and positive in their statements that his mental condition was stable and he was fitted to discharge the duties inhering in his position.

Surg. Curl, while superintendent of the Colon Hospital, knew Col. Perkins intimately; Surg. Lung and the colonel were shipmates on the *Philadelphia* for two years; Col. Gorgas knew him well at Panama, his last detail before he was ordered before the retiring board; and Maj. Woodruff has known him since 1879 and knew of his illness in Manila. The substance of the testimony of these four eminent surgeons is found in the following extracts from their testimony at the time of the trial:

In Dr. Lung's testimony appears the following opinion:

"Q. Now, Doctor, will you state whether or not, in your professional opinion, Lieut. Col. Perkins is at the present time mentally and physically qualified to perform the duties of his rank?—A. It is my professional opinion that he is mentally and physically qualified to perform the duties of his rank. I make that statement, basing it on my knowledge of Lieut. Col. Perkins and careful examination of his medical record, and a cursory examination of the record of the court as it stands."

Dr. Woodruff testified as follows:

"Q. Will you state whether or not, in your professional opinion, Col. Perkins is at present qualified, mentally and physically, to perform the duties of his rank?—A. I think he is.

"Q. You, I suppose, as an Army surgeon, have knowledge of the duties of a commanding officer?—A. Yes, sir.

"Q. In your examination of him physically, did you find anything that would arrest your attention as to his lack of physical form or physical condition?—A. No; he is of rather slender build, not very muscular, but there is nothing in that to indicate that he would be prevented from active duty for a good many years, or a long life."

Col. Gorgas gave his opinion in the following testimony:

"Q. Doctor, what is your professional opinion, based on all the sources of knowledge which you have detailed, as to the present qualifications of Col. Perkins, from a mental and physical point of view, to exercise the duties of his rank as lieutenant colonel?—A. Of course, in expressing an opinion I do not profess any expert knowledge in such matters, for the opinion I would express would be just such as if I were on a retiring board in the Army of his general condition. I would consider, from what I have seen and known of Col. Perkins in command down there—the command that he held at Panama—and from the matter I have seen in reading over his record, I would consider him competent to perform those duties. I could go a little further than that in answering the question if you wish me to.

"Q. I would like to have your opinion.—A. He appeared to me, in all the intercourse I have had with him, as being a perfectly normal man mentally. I never saw anything to the contrary, and never thought anything to the contrary in my meeting him down there.

"Q. Nothing in your examination has developed a contrary opinion?—A. No, sir."

The following extracts were taken from the testimony of Surg. H. C. Curl, United States Navy:

"Q. Did you see Col. Perkins frequently enough (while at Colon) to form an estimate as to what his mental condition was?—A. I think so; yes, sir.

"Q. Would you say that Col. Perkins's mental condition during the time that you had knowledge of it was stable or unstable?—A. As far as I could observe, it was stable.

"Q. Did you notice anything in his conduct, either in the way of eccentricities or peculiarities in conduct or expression, which would lead you to think otherwise?—A. No, sir.

"Q. Did you hear anything while on the Isthmus from people who saw Col. Perkins, or associated with him, to the effect that he was suffering from any mental trouble?—A. I did not."

The military members on the retiring board naturally felt bound by the statements of the two doctors who made the official report of "mental instability" and based their finding upon the official diagnosis by the medical members of the board. I am persuaded from the clear evidence of Dr. Gorgas, Dr. Lung, Dr. Woodruff, and Dr. Curl that Col. Perkins was mentally sound. I am confirmed in this view by the evidence of his mental alertness since the trial and his clear mind at this time.

The official report of the doctors, upon whose statements the board relied, are not convincing or conclusive as read in the light of the later career of Col. Perkins and the testimony of Dr. Gorgas, Dr. Lung, Dr. Woodruff, and Dr. Curl. Indeed, a reading of their report, addressed to the president of the board, indicates that they gave undue weight to the comparatively unimportant ailments, including nervous disorders, for which Col. Perkins was treated in the hospitals from his first entry into the service until he was ordered before the retiring board. They did not make as thorough an examination as conditions required.

They did not summon experts upon diseases of the mind. They were convinced by his frequent commitments to naval hospitals and his nervous condition, that he was mentally incapacitated for his duties and felt that their experience called for no expert testimony to fortify their belief. In a matter of such transcendent importance, where able men held widely different views, they should have called in, as they were requested to do, eminent alienists. This duty should have been apparent to them after Dr. Gorgas, Dr. Lung, Dr. Woodruff, and Dr. Curl expressed such perfect confidence in Col. Perkins's mental stability. In feeling constrained to disagree with the conclusion of the two naval surgeons on the retiring board I do not see any call to impute their honesty or their ability. The fact that in July, 1906, less than a year before he was ordered before the retiring board, when examined for promotion, Col. Perkins was pronounced physically fit for advancement to a higher grade and was promoted, strengthens my belief that the doctors on the retiring board erred in their diagnosis. The examining board, on July 17, 1906, composed of three colonels, a medical inspector, and a surgeon, received a report from the medical members that Col. Perkins was physically qualified for promotion, and thereupon the board unanimously made the following finding:

"We hereby certify that Maj. Constantine M. Perkins, United States Marine Corps, has the physical, mental, and moral qualifications to perform efficiently all the duties of the grade to which he will next be eligible and recommend him to promotion thereto."

In view of this report, I can not believe that the retiring board was justified in permitting medical records prior to that examination to have controlling weight against Col. Perkins, as they evidently did. It is too awful and serious a thing to officially declare an officer to be incapacitated for service by "mental instability," which is interpreted by the world as a considerate way of saying one is crazy, for such finding to rest upon any testimony that is open to question. The preponderance of medical testimony was that he was mentally stable and capable of continued service as an officer of high rank in the Marine Corps.

In reaching the conclusion from my own investigation that Col. Perkins ought not to have been retired and after conferences with many who are familiar with the case, I find that I am in accord with the Judge Advocate General of the Navy Department. He reviewed the case, and after doing so made the following recommendation:

NAVY DEPARTMENT,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
December 21, 1907.

Respectfully submitted with the recommendation that the finding of the board in this case be not approved, as, in my opinion, the finding is not supported by the evidence submitted to the board.

E. H. CAMPBELL,
Judge Advocate General.

The recommendation of the Judge Advocate General was not made, as will be observed, until December, though the board's action upon the retirement of Col. Perkins was taken in June. The probable reason for the lapse of time is due to the fact that, inasmuch as the President had approved the application of Col. Perkins for retirement on June 24, and he retired from the service at that time, the Judge Advocate General did not feel called upon to review the action of the retiring board until toward the end of the six months' leave granted. About the close of his six months' leave, Col. Perkins made a request to be permitted to withdraw his application for retirement, upon the ground that he had made it practically under duress when no alternative was left him but to be declared mentally incompetent or to retire. He had chosen, as he stated, the latter course at the earnest entreaty of those dear to him to prevent the stigma of being retired from the service because of mental trouble.

When Col. Perkins requested permission to withdraw his resignation the Judge Advocate General reviewed the case and declared that "the finding is not supported by the evidence submitted." In this conclusion reached by the Judge Advocate General a careful reading of the record forces me to concur. Indeed, I can not understand how the finding of "mental instability" could have been reached from the evidence at the hearing. The Judge Advocate General rendered a righteous judgment when he said officially that "the finding is not supported by the evidence submitted to the board." This righteous judgment received the unanimous approval of the House Naval Affairs Committee, after the fullest investigation. I feel that for the Navy Department to live up to the principle of "for justice, all season's summer, and every place a temple," it is my duty to recommend the passage of a bill to restore Col. Perkins to the service and thereby right the wrong which was done him.

However, while approving a bill that will give delayed justice to an honorable officer who was made to suffer without justification, I can not approve the method proposed in Senate bills 196 and 1674. The provision in lines 9, 10, 11, and 12 of both bills is objectionable in that it seeks to make permanent increase in the whole number of officers in the Marine Corps in the grade to which Lieut. Col. Perkins may be appointed under either of these acts. The department does not deem it desirable that any such permanent increase be made except by means of general legislation—and none is now needed—and does not believe that any officer should be made an extra number except in cases where the officer's own specially meritorious services would warrant such action in bestowing a reward.

If the Congress determines upon legislation along the lines of the bills (S. 196 and S. 1674) now under consideration, the department recommends the enactment of a law like the measure of which a draft is herewith submitted. It will be seen that it is therein provided that this officer, when restored, shall be as additional to the number of the grade to which he is restored until such time as a regular vacancy occurs in that grade. If Lieut. Col. Perkins's retirement was an injustice to him, which gave to his juniors a benefit to which they were not entitled, then his restoration to the active list as an additional number in the grade to which he is restored pending a regular vacancy in that grade will not work a hardship on the officers junior to him in the Marine Corps.

Further, the department, in the draft submitted, has added a second proviso which, in effect, requires Lieut. Col. Perkins to undergo the examination prescribed by law for all officers who are commissioned a colonel in the Marine Corps. The necessity for this provision becomes apparent when it is considered that, if enacted into law, either of the present bills would confer upon Lieut. Col. Perkins the rank of colonel on the active list without his having ever taken the examination required of all officers commissioned in that grade, he having been retired as a lieutenant colonel.

Faithfully, yours,

JOSEPHUS DANIELS.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

It will be seen by the Secretary's letter that the Judge Advocate General of the Navy, Capt. E. H. Campbell, United States Navy, who reviewed the record of the retiring board, as he was required to do by law, disapproved the findings of the board and recommended that the same be set aside as not supported by the evidence.

It seems pertinent here to observe that neither the finding of the board nor the Judge Advocate General's recommendation was approved by the department, Col. Perkins having submitted to retirement under a mistake of facts growing out of the manner in which he was brought up for retirement and in ignorance of the Judge Advocate General's judgment in his favor. He remained in such ignorance until the fact was disclosed by the record itself when exhibited to the House Committee on Naval Affairs during the hearing.

In respect to this the House committee refers as follows:

"But however this may be, the finding of the retiring board was set aside by the Judge Advocate General of the Navy, who reviewed it, and in this conclusion he has been sustained by two other Judges Advocate. In this condition of the record your committee found it necessary to disapprove the finding of the retiring board or of the Judge Advocate General who had reversed that finding, and in view of the evidence it has no hesitation in saying that the verdict of the retiring board was properly reversed by the Judge Advocate General."

And the Secretary of the Navy, in commenting thereon, said:

"The Judge Advocate General rendered a righteous judgment when he said officially that 'the finding is not supported by the evidence submitted to the board.' This righteous judgment received the unanimous approval of the House Naval Affairs Committee after the fullest investigation. I feel that for the Navy Department to live up to the principle of 'for justice all season's summer and every place a temple' it is my duty to recommend the passage of a bill to restore Col. Perkins to the service and thereby right the wrong which was done him."

In heartily indorsing and seconding the desire thus expressed by the Secretary of the Navy, who personally gave this case his earnest atten-

tion and careful study for a full year, and who strongly favors the passage of this measure, the purpose of which is to make tardy amends to an honorable officer who has been grievously wronged, by giving back to him the place on the active list which is rightfully his, your committee feels called upon to voice its profound regret that it is not within its province at this time to do more than carry out the department's desire and recommend for passage the bill (S. 5148) which was drafted by the Secretary of the Navy himself, and which authorizes the President to restore Lieut. Col. Constantine Marrast Perkins, now retired, to the active list of the Marine Corps, in the grade of colonel, as an additional number, to take rank next after Col. Franklin J. Moses, who was the officer immediately above the said Constantine Marrast Perkins in the list of lieutenant colonels at the date that officer was retired from active service with the rank of lieutenant colonel.

And your committee so recommends to the Senate in the passage of the pending measure.

[House Report No. 727, Sixty-second Congress, second session.]

The Committee on Naval Affairs, to whom was referred a bill (H. R. 9290) for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the Marine Corps, having had the same under consideration, report the same favorably with the recommendation that the bill do pass.

This bill provides for the reinstatement of Lieut. Col. Constantine Marrast Perkins to the active list of the United States Marine Corps. Col. Perkins entered the service in 1875 as a cadet midshipman, graduated, was commissioned in the Navy, voluntarily transferred to Marine Corps in 1884, and was retired, after a service of 32 years, as a lieutenant colonel on June 18, 1907. He now claims that he ought to be reinstated to the active list, because his retirement, which pretended on its face to be voluntary, was really obtained by duress, coercion, and fraud. In other words, Col. Perkins claims that he was placed in a situation where he was compelled to elect between being dismissed from the service as a lunatic or a voluntary retirement, and that his consent to retire from the service was given solely to escape the disgrace of the charge of insanity.

The subcommittee to which this matter was referred accumulated a great mass of testimony and came to the conclusion that the claim of Col. Perkins is true. On a report of these facts to the full committee, it took the same view, and the conclusion of both the subcommittee and the full committee was unanimous. A brief review of the facts is now submitted to the House.

The history of Col. Perkins as an officer is highly creditable both to himself and to the service. For many years nothing but commendation from his superiors crowned the discharge of his duties. Finally, his protracted services in the Tropics undermined his health and, in 1904, he was stricken with a tropical fever in the Philippines, and for quite a while his nervous system was left in a shattered condition. In the month of October, 1905, he had recovered his health, and his physicians certified that he was again fit for duty. On this certificate Gen. George F. Elliott, commandant United States Marine Corps, assigned him to the duty of recruiting officer in California, and later transferred him to Pennsylvania, and in this work he continued until the month of June, 1906, when the trouble which culminated in his retirement began.

The Navy regulations required a report to be made on the fitness of officers every six months and a copy of the report to be given to the officer in case the same should be unfavorable. A report on the fitness of Col. Perkins was due to be made on the 30th of December, 1905, but receiving no notice of it he assumed that it, like all of his other reports covering his service of 32 years, was favorable. But in June, 1906, six months after he should have received a notice, he was informed by the commandant, Gen. Elliott, that the report was unfavorable. To this report Col. Perkins replied that his health had been restored and requested a more favorable consideration, in view of the fact that he was due to appear before the board for promotion from the rank of major to that of lieutenant colonel in July. Gen. Elliott replied that he could not modify the unfavorable report, inasmuch as it expressed his honest opinion. Inasmuch as Gen. Elliott had not seen Col. Perkins for 17 years, and as no examination had been made of his fitness except the one in October, 1905, on the strength of which Gen. Elliott had assigned him to duty in California, the committee is unable to appreciate the honesty of this opinion. In July, 1906, Col. Perkins appeared before the board for promotion in Boston, and was then confronted with another unfavorable report from Gen. Elliott, and when asked by the board why he had not replied to this report, he replied that he had received no notice of this report. He was then informed that this report would be disregarded by the board, and, without any report to act on, the board subjected him to a rigid examination, which lasted two days, with the result that Col. Perkins was completely vindicated and promoted with the hearty congratulations of the entire board.

When Gen. Elliott notified Col. Perkins, in June, 1906, that he had made the unfavorable report, he also warned him that in case of his promotion he would probably be sent to Panama, a mission which was regarded as dangerous, especially to one like Col. Perkins, who had already been the victim of tropical diseases, and at the same time came a proposition from Capt. Borden to pay Col. Perkins $1,000 for his number, proposing that sum of money if Col. Perkins would retire and make place for the promotion of Capt. Borden. The facts—that an unfavorable report was made on the 31st of December, 1905, by Gen. Elliott, who had neither personal knowledge nor a medical survey to base it on, and in conflict with the medical examination of October 25, 1905, on which he was assigned to duty; that notice of this unfavorable report was delayed, in violation of regulations, from January to June, 1906; that about the same time Col. Perkins was advised that his retirement was desired to make place for another in the extent of an offer of $1,000; that he was warned that his promotion would be followed by the penalty of further service in the Tropics; that a second unfavorable report on his condition was made without personal knowledge or a medical survey on which to base it; that the existence of this report was concealed from him, in violation of regulations, until he appeared before the board, and his complete vindication by the examining board, which promoted him, together with the fact that the second unfavorable report has been mysteriously abstracted from his record and a favorable report substituted for it under date of July, 1907, a year after it should have been filed—constrain the committee to conclude that Gen. Elliott had determined to run Col. Perkins out of the service, in violation of law and in defiance of justice.

Soon after the promotion of Col. Perkins he was assigned to duty at Panama, and assumed command of the Marine Corps at that point, where he remained until May, 1907. While here every order he made was disapproved, and he was usually reprimanded in severe terms. A number of these orders for which he was reprimanded were in the identical language employed by his predecessors and by his successors, and although these orders were approved when issued by others, yet they were disapproved with reprimand when issued by Col. Perkins.

One of these orders was a requirement that the men should take quinine to preserve their health, which was recommended by the camp surgeon and approved by Col. Gorgas, the chief health officer of the Canal Zone. Another was an order assigning the horses of the command to certain officers in the discharge of their duties. Another was a request asking the quartermaster to aid in the collection of books for the use of the men to read in this isolated camp. These are samples of the orders issued by Col. Perkins, which Gen. Elliott disapproved and on account of which he reprimanded Col. Perkins.

But the order which culminated in the retirement of Col. Perkins was issued under these circumstances: When he went to Panama he called upon the American minister, Hon. Herbert G. Squires, who informed him that Secretary Taft, now the President, would soon visit Panama and that a public reception was contemplated in his honor. The minister expressed a desire that the officers under Col. Perkins's command should attend, but declared that he could not invite them unless they paid their official call upon him. In order to insure the attendance of his officers at this public function, Col. Perkins requested his officers to make this call upon the American minister, and issued what is known as the "calling order." For this act of courtesy he was stingingly reprimanded by Gen. Elliott, and his order disapproved. Col. Perkins respectfully appealed to the Secretary of the Navy, and the American minister brought the discourteous treatment accorded him by the officers under Col. Perkins to the attention of the Secretary of State. The appeal was never presented to the Secretary of the Navy, but was pigeonholed by Gen. Elliott, thus preventing its consideration by his superior officer, and Gen. Elliott, immediately upon receipt of this appeal, issued an order detaching Col. Perkins from his command and ordering him to report at once to headquarters, Washington, D. C. Upon the arrival of Col. Perkins here he reported to Gen. Elliott, who then informed him for the first time that he was to appear before a retiring board at 10 o'clock, it then being 3 minutes after the time, upon the ground that Col. Perkins was insane.

After some trouble, Col. Perkins secured a delay of a few days in which to obtain counsel and prepare his defense. After two or three days Col. Perkins secured the services of Mr. Gibbs L. Baker, of the Washington City bar, as his attorney, and the trial began. His military and medical record were read to the board, and then the two medical members of the board, Messrs. Urie and McClurg, gave him a physical examination, which lasted only a few minutes and consisted of feeling his pulse and listening to the beat of his heart. Upon this examination they reported to the board that he was afflicted with "mental instability" and incapacitated for the discharge of his duties. After this report was made the board heard the testimony of Col. Gorgas, Maj. and Surg. Woodruff, United States Army, and Surg. George A. Lung, and other witnesses, all of whom had known Col. Perkins intimately for years, and who not only made a thorough examination of Col. Perkins's physical and mental condition, but who knew his professional acquirements as well. This testimony, which it is unnecessary to discuss in detail, showed conclusively that Col. Perkins was physically and mentally sound and well qualified and eminently capacitated to discharge the duties of his rank. However, the board ratified the verdict which the medical members had rendered before they had heard the evidence, and found that Col. Perkins was afflicted with "mental instability" and incapacitated to discharge his duties.

It may be here mentioned that evidence was offered before the subcommittee, and the committee was satisfied after due investigation of its truth, that the president of the retiring board had, during the trial and prior to the introduction of evidence for the defense, expressed hostility toward Col. Perkins, thereby showing that he was prejudiced and had prejudged the case before him.

Your committee took the testimony of the members of the retiring board, who were given full opportunity to explain the grounds on which they reached this conclusion. They assigned only two reasons worthy of notice. One of these reasons is that, while in Panama, the records kept by Col. Perkins were unusually voluminous. The details of every occurrence were put into the record, and this, being unusual, was regarded as an evidence of mental unsoundness. The explanation of this is that Col. Perkins went to Panama with the belief, engendered by the occurrences already related, that Gen. Elliott had determined to drive him out of the service, and that this belief was confirmed by the fact that every order issued by him was disapproved with a reprimand, and therefore in order to protect himself, he took the precaution to make a complete and unusually detailed record of all that occurred. What the retiring board regarded as evidence of insanity has therefore impressed your committee as a manifestation of good judgment and wise precaution.

The other reason assigned for the alleged mental instability was a delusion of persecution. When pressed to explain what was intended by this new mental disease, called "mental instability" in the findings of the board, the committee was told that paranoia was the kind of insanity intended; and when asked what symptoms of paranoia the board discovered, the reply was that Col. Perkins seemed to be suffering with a delusion that he was the subject of persecution. In other words, on the 31st day of December, 1905, and on the 30th day of June, 1906, the commandant, Gen. Elliott, made two unfavorable reports on the fitness of Col. Perkins without any personal knowledge or medical survey as a foundation for said reports. Notices of these reports were, in violation of the regulations, withheld from him.

One of these reports was abstracted from his record and a new one substituted therefor a year afterwards; an effort was made to purchase his retirement; he was warned that he would be sent back to the Tropics, where he had lost his health; all of the orders he issued in Panama were disapproved with reprimand; and he was ordered before a retiring board on a charge of insanity without previous notice of what charge he was to face, not only without evidence to support it, but in the face of the certificates of his doctors and of the findings of the examining board at Boston; and because he interpreted all this as persecution the retiring board concluded that he was insane; but since the committe drew from these facts the same conclusion as Col. Perkins did, it is impossible to adopt the view that such conclusion showed insanity. In short, if there had been no affirmative evidence of the mental soundness of Col. Perkins, the testimony relied on by the board was wholly insufficient to sustain its findings of "mental instability."

But however this may be, the finding of the retiring board was set aside by the Judge Advocate General of the Navy, who reviewed it, and in this conclusion he has been sustained by two other judges advocate. In this condition of the record, your committee found it necessary to disapprove the finding of the retiring board or of the Judge Advocate General who had reversed that finding, and in view of the evidence it

has no hesitation in saying that the verdict of the retiring board was properly reversed by the Judge Advocate General.

But within an hour after the retiring board had found this unjust verdict, a messenger from the commandant, Gen. Elliott, came to the office of Attorney Gibbs L. Baker to inform Col. Perkins that the board had found against him, and, pretending friendship for Col. Perkins, urged him to submit to voluntary retirement, which the commandant claimed was the only way to prevent the publication of the stigma of insanity, as he declared that the President would approve the finding of the retiring board at 2 o'clock on that day unless some arrangement should be made at once. He reminded Col. Perkins that his son at the Naval Academy would be injured by the disgrace, and appealed to his love for his boy to induce him to submit. Soon after this the commandant himself called Col. Perkins over the phone and told him he must either voluntarily retire or be disgraced as a lunatic. Col. Perkins refused to acquiesce, and through his Congressman appealed to the Secretary of the Navy, who agreed to consider the case. On the next day the Congressman, Col. L. F. Livingston, called to ascertain the conclusion of the Secretary and was confronted with telegrams from Col. Perkins's wife and from personal friends in California urging the Secretary for the sake of the family to let Col. Perkins retire and send him home. The Secretary asked Col. Livingston how he could explain these telegrams, and on his admission that there was no explanation, he said that Col. Perkins must be crazy. Thus baffled and overcome, Col. Livingston and Attorney Baker informed Col. Perkins that he must submit to voluntary retirement, and then it was that Col. Perkins signed a paper making the best terms he could get and retired from the service.

But it was clearly proven before your committee some marine officer, whose name could not be ascertained, had written a letter to a close friend of Col. Perkins's wife in California in which it was stated that if Col. Perkins did not retire from the service voluntarily he would be dismissed from the service and his family left penniless. This letter was shown to the wife of Col. Perkins under her sacred pledge never to disclose the name of the author, and by this letter Mrs. Perkins and the personal friends of Col. Perkins were induced to send the telegrams to the Secretary of the Navy. The retirement of Col. Perkins was therefore not voluntary, but was procured by duress and fraud. The development of the fact is a complete vindication, but as a matter of justice the bill authorizing his reinstatement should be passed.

The record of the American Navy is the pride of the American people. It glows with unsullied honor. And every consideration of pride in the Navy, as well as justice to Col. Perkins, requires that this first dark stain should be blotted out in his reinstatement to the active list. The committee therefore unanimously recommends that the bill do pass.

Mr. OLIVER. Mr. President, I ask unanimous consent that the further reading of the report be dispensed with.

Mr. VARDAMAN. I do not care to hear anything further. I insisted on the reading of the report in order that the Senate might be informed about the case.

Mr. LODGE. What follows relates only to the form of the bill.

Mr. VARDAMAN. Yes.

Mr. CLARK of Wyoming. Mr. President, this report and the bill seem to present a very singular state of affairs. I confess that I really do not understand it. I desire to ask the senior Senator from South Carolina, the chairman of the committee, whether any steps have been taken in relation to this whole affair other than the introduction of the present bill?

Mr. TILLMAN. A bill has been introduced in the House dealing with the matter.

Mr. CLARK of Wyoming. Yes; but the bill and report present one of two things, Mr. President. If the bill and the report represent the true state of affairs, then there is existing in the medical department a condition that calls for action or investigation, because both committees report—and the Secretary of the Navy indorses the report—that this man's retirement was caused by fraud.

Mr. TILLMAN. Fraud and duress.

Mr. CLARK of Wyoming. The report which brought about his retirement is said to have been the result of fraud. If that is true, it shows a disgraceful intrigue in some branch of the service to get rid of a worthy officer.

Mr. TILLMAN. I think that is so.

Mr. CLARK of Wyoming. It seems to me that in connection with this report, if we are to decide here that this man was a worthy officer, and that his retirement was brought about by fraud and by intrigue or jealousies in the service, it is the duty of the Naval Affairs Committee to make some investigation and some report on the matter. I do not remember, in my experience, ever having had laid before the Senate reports of committees of the two Houses, backed up by the head of the department in which the occurrences took place, that said in definite language that there had been fraud, collusion, and intrigue in the administration of any branch of that department.

Mr. President, I know nothing about the circumstances of this case. I am compelled to rely upon the report and the investigation of these committees and of the Secretary of the Navy; but I do not like the looks of this whole circumstance.

Mr. TILLMAN. I agree with the Senator.

Mr. CLARK of Wyoming. If the report is true, I do not believe the matter ought to stop here. I think something ought to be done, particularly at this time, to remove from the Navy men who would take part in such miserable intrigues.

Mr. TILLMAN. I agree entirely with the Senator; and I promise him that, so far as I can bring it about, the Naval Affairs Committee will look further into this matter and let the country know what the real facts are and what, if anything, the department has done or proposes to do.

Mr. CLARK of Wyoming. It occurs to me, by way of passing, that the Navy Department itself, having knowledge of this matter nearly a year ago, so far as we know, has taken no steps in regard to it. I do not know whether it has or not. I do not want to do the department an injustice.

Mr. WEEKS. Mr. President, the officer referred to in this bill was a classmate of mine at the United States Naval Academy. Therefore I have been familiar with him and his service for more than 35 years.

The impression has been given here that he retired from the service. He did go on the retired list in 1907, but did not resign from the naval service. There is no question about the fact that when Col. Perkins was ordered before the retiring board and was examined by a board of medical officers he had been in a highly nervous condition; but I do not think he was ever insane or that those who passed on his case at the time would so contend. Being in a nervous condition as he was, and wishing to avoid trouble which he doubtless exaggerated, he did apply for retirement and was placed on the retired list; but as soon as he had recovered his health he commenced to make a campaign to be restored to the active list of the Marine Corps, and that campaign has been maintained from that time until the present time by him and by his friends.

In my judgment there is no reason why Col. Perkins should not be restored to the active list. Since his retirement he has taken a law course at one of the law schools in Washington—the National Law School, I think—where he graduated at the head of his class and took the highest honors, which would seem to be a pretty clear indication that his mind is sound, and he must pass a physical examination in order to be restored to the service. I think it is a matter of justice to Col. Perkins and justice to the service that this bill should be passed, and passed at once.

Mr. SMITH of Michigan. I will ask the Senator how old he is?

Mr. WEEKS. About 52.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PANAMA CANAL TOLLS.

Mr. O'GORMAN. From the Committee on Interoceanic Canals I report back with an amendment the bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912, and I submit a report (No. 469) thereon. I give notice that at an early day I shall ask that a day be set for the consideration of the bill.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. BRANDEGEE. What is the report? The Senator does not state with what recommendation he reports it.

Mr. SMITH of Michigan. It is reported without recommendation.

Mr. BRANDEGEE. I should like to have it stated for the RECORD. There is a report accompanying the bill?

The VICE PRESIDENT. There is a report.

Mr. BRANDEGEE. I ask that it be read.

The VICE PRESIDENT. The Senator from Connecticut asks that the report be read. Is there objection? The Chair hears none.

The Secretary read the report as follows:

Mr. O'GORMAN, from the Committee on Interoceanic Canals, submitted the following report:

The Committee on Interoceanic Canals, to which was referred the bill (H. R. 14385) entitled "An act to amend section 5 of 'An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone,' approved August 24, 1912," having considered same, report it back to the Senate without recommendation, with the following amendment:

On page 2, line 6, after the word "three," insert as follows:

"*Provided*, That neither the passage of this act nor anything therein contained shall be construed or held as waiving, impairing, or affecting any treaty or other right possessed by the United States."

RESERVES IN STATE BANKS.

Mr. OWEN. I report back from the Committee on Banking and Currency favorably, without amendment, the bill (S. 4966) proposing an amendment as to section 19 of the Federal reserve act, relating to reserves, and for other purposes. The amendment proposes to authorize State banks or trust companies to keep their reserves with other State banks or trust companies for the three years provided, where the law permits it to be done under the State statute. The bill is recommended by the Secretary of the Treasury, and I think it ought to be passed. I ask for its present consideration.

The VICE PRESIDENT. Is there objection?

Mr. LODGE. I should like to hear the bill, reserving the right to object.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary proceeded to read the bill, and read as follows:

Be it enacted, etc., That section 19, subsections (b) and (c), of the act approved December 23, 1913, known as the Federal reserve act, be amended and reenacted so as to read as follows:

"(b) A bank in a reserve city as now or hereafter defined, shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as fo'lows:

"In its vaults for a period of 36 months after said date, six-fifteenths thereof, and permanently thereafter five-fifteenths.

"In the Federal reserve bank of its district for a period of 12 months after the date aforesaid, at least three-fifteenths, and for each succeeding 6 months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

"For a period of 36 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in national banks in central reserve cities, as now defined by law.

"After said 36 months' period all of said reserves, except those hereinbefore required to be held permanently in the vaults of the member bank and in the Federal reserve bank, shall be held in its vaults or in the Federal reserve bank, or in both, at the option of the member bank.

"(c) A bank in a central reserve city, as now or hereafter defined, shall hold and maintain a reserve equal to 18 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as follows:

"In its vaults, six-eighteenths thereof.

"In the Federal reserve bank, seven-eighteenths.

"The balance of said reserves shall be held in its own vaults or in the Federal reserve bank, at its option.

"Any Federal reserve bank may receive from the member banks as reserves not exceeding one-half of each installment eligible paper as described in section 13 properly indorsed and acceptable to the said reserve bank.

Mr. OWEN. I wish to call the attention of the Senate to the fact that the law as just read is merely a repetition of the Federal reserve act, and that the part which is now to be read, providing for State banks, is the amendment which is inserted in that provision.

The Secretary read as follows:

If a State bank or trust company is required or permitted by the law of its State to keep its reserves either in its own vaults or with another State bank or trust company or with a national bank, such reserve deposits so kept in such State bank, trust company, or national bank shall be construed within the meaning of this section as if they were reserve deposits in a national bank in a reserve or central reserve city for a period of three years after the Secretary of the Treasury shall have officially announced the establishment of a Federal reserve bank in the district in which such State bank or trust company is situate.

Mr. OWEN. That is the amended part of the section.

Mr. SMITH of Michigan. Mr. President——

Mr. OWEN. The reading of the bill has not been concluded.

Mr. SMITH of Michigan. The bill can only be considered by unanimous consent, and I object to its consideration to-day.

The VICE PRESIDENT. The bill will go to the calendar.

LANDS IN SALT CREEK DRAINAGE DISTRICT, OKLA.

Mr. OWEN. From the Committee on Indian Affairs I report back favorably, without amendment, the bill (H. R. 13133) for the approving and payment of the drainage assessments on Indian lands in Salt Creek drainage district numbered 2, in Pottawatomie County, Okla., and I submit a report (No. 470) thereon. The bill has passed the House of Representatives; it is a local matter, and I would be glad to have it given present consideration. It is only a short measure.

Mr. CLARK of Wyoming. Let it be read for information.

The Secretary read the bill.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. OWEN. I ask that it go to the calendar.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROOT:

A bill (S. 5436) authorizing the purchase of two pieces of sculpture by St. Gaudens; to the Committee on the Library.

By Mr. LIPPITT:

A bill (S. 5437) authorizing the Secretary of War to donate to the town of West Warwick, R. I., condemned cannon and balls; to the Committee on Military Affairs.

By Mr. JOHNSON:

A bill (S. 5438) granting a pension to Myra F. Brown;

A bill (S. 5439) granting an increase of pension to Allen C. Goodwin; and

A bill (S. 5440) granting a pension to Emily Morang; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5441) for the relief of Adam Culp; to the Committee on Military Affairs.

A bill (S. 5442) granting a pension to Matilda Weger; to the Committee on Pensions.

By Mr. COLT:

A bill (S. 5443) granting an increase of pension to Marguerite D. Pollard (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5444) granting an increase of pension to Susan J. Cantrell; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 5445) for the relief of Gordon W. Nelson (with accompanying papers); to the Committee on Naval Affairs.

FREDERICK A. COOK.

Mr. POINDEXTER introduced a joint resolution extending thanks to Frederick A. Cook for his discovery of the North Pole April 21, 1908, which was read the first time by its title.

Mr. POINDEXTER. I ask that the joint resolution be read and appropriately referred.

The joint resolution (S. J. Res. 144) extending thanks to Frederick A. Cook for his discovery of the North Pole on April 21, 1908, was read the second time at length, as follows:

Resolved, etc., That the thanks of Congress are hereby extended to Frederick A. Cook for his discovery of the North Pole on April 21, 1908. The Secretary of the Navy is hereby authorized and directed to procure and present to the said Frederick A. Cook a gold medal of suitable design, in recognition of his services to science in making said discovery. The sum of $300 is hereby appropriated out of any money in the Treasury not otherwise appropriated for said medal and the design therefor.

Mr. POINDEXTER. Mr. President, I desire to make a brief statement in explanation of the joint resolution.

The discovery of the North Pole and of the conditions surrounding the immediate polar region has added most valuable data to science. The explorer who had the courage and fortitude to travel into these hitherto unknown regions should be the recipient of recognition and honor from his country. I have observed very closely the so-called "polar controversy," and am firmly convinced that a grievous wrong has been done to Dr. Frederick A. Cook by the failure of his country to reward or officially recognize his great services in this connection. It is admitted by all that Dr. Cook sailed from Gloucester, Mass., for northwest Greenland on July 3, 1907, with a complete polar equipment; that he spent the winter of 1907–8 at Annoatok; that he left Annoatok with a well-equipped party of Esquimos February 19, 1908, for the north; that he went to Cape Svartevoeg and 60 miles beyond; that he spent the winter of 1908–9 at Cape Sparbo with two Esquimos; that he returned with them to Annoatok the middle of April, 1909; that he went from there south, by sledge, to Upernavik, arriving there on May 20, 1909. This admitted journey, including detours, covers a distance of approximately 3,000 miles, the longest and most difficult sledge journey on pack ice ever undertaken. If he was able to make this journey, it is reasonable to suppose he was able to travel the 520 miles from Svartevoeg to the pole when his outfit and party were in prime condition. Being so equipped and desirous of reaching the pole, it is unreasonable to suppose he would have spent the summer in idleness about Cape Svartevoeg. If, as has been claimed, he planned to make a false report of the discovery of the pole, it is reasonable to suppose he would have returned to Annoatok and to civilization in the summer of 1908, and unreasonable to suppose that he would have endured the horrors of a winter in a hut at Cape Sparbo.

The first description of conditions in the immediate region of the pole ever published was cabled by Dr. Cook from Lerwick, Shetland Islands, to the New York Herald September 1, 1909. This account was printed in full in the New York Herald September 2, 1909. In this account Dr. Cook reported the immediate polar surface as a sea of moving ice, composed of old ice, of large, level ice fields, apparently purple-blue in color, drifting southeast; ice moving freely; smooth surface, easy traveling; pressure lines less marked, easily crossed; leads and water sky east and south; temperature —15 to —46; horizon seemingly extended; a deep sea; no land. The only other account ever published of physical conditions at the pole was sent out by Robert E. Peary from Indian Harbor, Labrador, to the New York Times on September 11 and 12, 1909, nine days after Cook's account was published in the Herald. In this account Peary stated he was at the pole on April 6, 1909, and corroborated in every material detail the previously published description of Dr. Cook as to sea, ice, temperature, drift, colors, absence of land at the pole. If Cook did not reach the pole with his Esquimos in 1908, how did he know the physical conditions surrounding it? There was no human being who knew or ever claimed to know previous to that time, and his account of the

facts, corroborated by Peary, is at variance with previous theories.

Previous to the so-called polar controversy every one who had ever been associated with Cook in exploring expeditions spoke well of his character and ability. When the polar controversy arose and grew bitter an attempt was made to discredit Cook by attacking his account of the ascent of Mount McKinley. In this matter, as in the polar trip, Dr. Cook published an account of his explorations. In Harper's Monthly Magazine for May, 1907, he described the physical conditions and appearances of the ascent and the summit of McKinley. This was published in book form in 1908. Previous to these publications no one had ever described the summit of McKinley. No one claimed to know its conditions or appearances. He described minutely the "northeast ridge," its sharp summit, and the route by it to the extreme summit of the mountain; the great upstanding granite rocks at the point of approach to the Median Glacier, or Grand Basin, lying between the north and south peaks of the extreme summit; the two summit peaks themselves; and that the south peak is the higher of the two. No one had ever stated these facts before Dr. Cook's publication of them. No one ever claimed to know them before Cook's ascent of the mountain. They could only be ascertained by an ascent of the mountain.

In Scribner's Magazine for November, 1913, Archdeacon Hudson Stuck publishes an account of his own subsequent ascent of the mountain. In it he corroborates in every material feature Cook's previously published account of the sharp backbone of the northeast ridge; the difficulties of its ascent; the great granite rocks at the entrance to the Grand Basin; the Median Glacier; the north and south peaks; and that the south peak is the higher.

It is difficult to explain Dr. Cook's previously published accurate description of these things, the first ever given, except by admitting his actual ascent of the mountain's summit.

Congress has investigated the proofs of Robert E. Peary. It is but right it should also investigate those of Frederick A. Cook—and if injustice has been done and merited honor has been withheld, we should now bestow it.

The VICE PRESIDENT. The joint resolution will be referred to the Committee on the Library.

THE REPUBLIC COAL CO.

Mr. CLARK of Wyoming. I ask that the joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation, be reprinted, showing the committee amendment in italics and the amendments made as in Committee of the Whole in small capitals. The joint resolution was rejected by a yea-and-nay vote of the Senate, a motion was made to reconsider the vote, and it is now on the calendar for further action.

The VICE PRESIDENT. Without objection, it is so ordered.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. STERLING submitted an amendment authorizing the Secretary of the Interior to make a $40 per capita payment to each member of the Sioux Tribe of Indians belonging on the Cheyenne River Reservation, S. Dak. ,etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. NORRIS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. BRADLEY submitted three amendments intended to be proposed by him to the omnibus claims bill, which were ordered to lie on the table and be printed.

WITHDRAWAL OF PAPERS—WILLIAM H. DENNISON.

On motion of Mr. JOHNSON, it was

Ordered, That the papers accompanying the bills S. 2090 and S. 2785, Sixty-second Congress, granting a pension to William H. Dennison, be withdrawn from the files of the Senate, no adverse report having been made thereon.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I move that the Senate proceed to the consideration of the Agricultural appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

Mr. SMOOT. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

Mr. GORE. Mr. President, I hope the Senator from Utah will not make that motion. It will simply take time to call the roll. I will ask that the amendments which he intends to challenge be passed over for the present.

Mr. SMOOT. That will be perfectly satisfactory to me. I wish to say to the Senator from Oklahoma the only reason I suggested the absence of a quorum was that a certain Senator wished to speak upon the amendment which will next come before the Senate. He is not present, and I made the suggestion in order to secure time to enable me to send word to him that the bill has been taken up.

Mr. GORE. It is my purpose to ask that all objected amendments be passed over for the present.

Mr. SMOOT. I withdraw the motion I made.

The VICE PRESIDENT. The pending amendment reported by the Committee on Agriculture and Forestry will be stated.

The SECRETARY. The pending amendment is, on page 7, line 5, after the word "that," to insert "in the judgment of the Secretary of Agriculture," so as to make the clause read:

For the maintenance of a printing office in the city of Washington for the printing of weather maps, bulletins, circulars, forms, and other publications, including the pay of additional employees, when necessary, $26,000: *Provided*, That no printing shall be done by the Weather Bureau that, in the judgment of the Secretary of Agriculture, can be done at the Government Printing Office without impairing the service of said bureau.

The VICE PRESIDENT. At the request of the Senator from Oklahoma [Mr. GORE], the amendment will be passed over for the present.

The next amendment reported by the Committee on Agriculture and Forestry was, on page 7, after line 14, to insert:

The Secretary of Agriculture is hereby directed to report to Congress at its next session the present condition and value of the tract of land, consisting of 84.81 acres of land, more or less, known as Mount Weather, and located in the counties of Loudoun and Clarke, in the State of Virginia, the original cost of said land, together with the cost of the improvements thereon and the present value of such improvements, the amount which in his opinion can be realized from the sale of said real property, including buildings and other improvements, at private sale, and whether in his opinion it would be most advantageous to sell the same at public or at private sale, and to advise Congress as to whether it would be better for the Government to sell said property or to lease it. And the Secretary of Agriculture is authorized, in his discretion, to discontinue the use of Mount Weather as a weather station and, if necessary, place a keeper in charge thereof for its protection and care, the expenses thereof to be paid out of this appropriation.

The amendment was agreed to.

The next amendment was, on page 8, line 8, after the words "Weather Bureau," to strike out "$1,668,270" and insert "$1,667,270," so as to make the clause read:

Total for the Weather Bureau, $1,667,270.

The amendment was agreed to.

Mr. SMOOT. Mr. President, in agreeing to the totals, if any changes are subsequently made in the amendments which are passed over, of course it is understood that the amounts fixed in the totals shall be reconsidered, or will it be understood that the totals shall be corrected whenever the bill passes?

The VICE PRESIDENT. The Chair is informed that the Secretary always corrects the totals in an appropriation bill after the bill has passed.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, under the head of "Bureau of Animal Industry," on page 13, line 15, after the words "ostrich industry," to insert "*And provided further*, That of the sum thus appropriated $10,000 may be used for the importation of Corriedale and other promising breeds of sheep for breeding purposes," so as to make the clause read:

For all necessary expenses for investigations and experiments in animal husbandry; for experiments in animal feeding and breeding, including cooperation with the State agricultural experiment stations, including repairs and additions to and erection of buildings absolutely necessary to carry on the experiments, including the employment of labor in the city of Washington and elsewhere, rent outside of the District of Columbia, and all other necessary expenses, $182,840: *Provided*, That of the sum thus appropriated $30,000 may be used for experiments in the breeding and maintenance of horses for military purposes: *Provided further*, That of the sum thus appropriated $24,500 may be used for experiments in poultry feeding and breeding, including the feeding and breeding of ostriches and investigations and experiments in the study of the ostrich industry: *And provided further*, That of the sum thus appropriated $10,000 may be used for the importation of Corriedale and other promising breeds of sheep for breeding purposes.

The amendment was agreed to.

The next amendment was, on page 14, line 18, after the word "reindeer," to strike out "*Provided*, That of the sums appropriated for the Bureau of Animal Industry, not more than $5,000 shall be expended for the importation of animals for breeding purposes," so as to make the clause read:

Meat inspection, Bureau of Animal Industry: For additional expenses in carrying out the provisions of the meat-inspection act of June

30, 1906 (34 Stat. L., 674), there is hereby appropriated for the fiscal year ending June 30, 1915, the sum of $300,000: *Provided*, That the provisions of the meat-inspection law may be extended to the inspection of reindeer.

Mr. SMOOT. Mr. President, I should like to ask the Senator having the bill in charge why this amendment has been placed in the bill. The House limited the amount of the appropriation which might be expended for the importation of animals for breeding purposes.

Mr. GORE. Mr. President, a provision has been inserted in another place carrying an appropriation of $10,000, and this is merely a correction, making the bill conform to the insertion of the provision at another place.

Mr. SMOOT. Do I understand that it comes under another head?

Mr. SHEPPARD. On page 13, lines 16, 17, and 18, the $5,000 referred to in this clause is included in the $10,000.

Mr. SMOOT. Mr. President, that only applies to sheep.

Mr. GORE. Mr. President, I will state to the Senator that the appropriation of $5,000 was intended to be used in the purchase of this particular kind of sheep. The amendment making express provisions for the purchase of sheep failed in the House on a point of order. After the failure of this provision, it was inserted in this form with the understanding that it could be used for that purpose. The Senate committee thought it better to put in express terms the object of the appropriation, and after having done so struck out the other provision. That was the intention of this particular amendment.

Mr. SMOOT. Then the desire of the bureau is an appropriation of $10,000 "for the importation of Corriedale and other promising breeds of sheep for breeding purposes"?

Mr. GORE. Yes, sir.

Mr. SMOOT. That does not apply to any other animals?

Mr. GORE. That is all.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. OVERMAN. I want to ask a question for information. I notice on the same page this provision:

In all, for general expenses, $1,597,996.

Then a succeeding paragraph says:

Total for Bureau of Animal Industry, $2,245,026.

Is that $1,597,996 included in the $2,245,026?

Mr. GORE. It is included. As I understand, the difference relates to the employees in the statutory classes.

Mr. OVERMAN. So that the lesser amount is included in the greater?

Mr. GORE. Yes, sir.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, under the head of "Bureau of Plant Industry," on page 14, line 25, after the words "chief clerk," to strike out "$2,750" and insert "$3,000"; and, on page 15, line 8, before the word "clerks," to strike out "twenty" and insert "twenty-one," so as to read:

Salaries, Bureau of Plant Industry: One physiologist and pathologist, who shall be chief of bureau, $5,000; 1 chief clerk, $3,000; 1 executive assistant in seed distribution, $2,500; 1 officer in charge of publications, $2,250; 1 landscape gardener, $1,800; 1 officer in charge of records, $2,250; 1 superintendent of seed weighing and mailing, $2,000; 1 executive clerk, $2,250; 3 executive clerks, at $1,980 each; 1 assistant superintendent of seed warehouse, $1,400; 1 seed inspector, $1,000; 9 clerks, class 4; 14 clerks, class 3; 2 clerks, at $1,500 each; 21 clerks, class 2.

The amendment was agreed to.

Mr. SHEPPARD. On behalf of the committee I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 15, line 1, after the word "distribution," it is proposed to strike out "$2,500," and to insert in lieu thereof "$2,750," so as to read:

One executive assistant in seed distribution, $2,750.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, in the item of appropriation for "Salaries, Bureau of Plant Industry," on page 15, line 21, before the word "each," where it occurs the second time, to strike out "$840" and insert "$900"; in line 22, before the word "each," to strike out "$720" and insert "$840"; in line 23, before the word "each," to strike out "$600" and insert "$720"; in the same line, after the word "apprentice," to strike out "$720" and insert "$840," so as to read:

Five laboratory aids, at $900 each; 8 laboratory aids, at $840 each; 6 laboratory aids, at $720 each; 1 laboratory apprentice, $840; 2 map tracers, at $720 each; 2 map tracers, at $600 each; 2 gardeners, at $1,440 each; 4 gardeners, at $1,200 each.

The amendment was agreed to.

The next amendment was, on page 16, line 13, after the words "in all," to strike out "$476,520" and insert "$480,270," so as to read:

Two laborers or charwomen, at $360 each; 2 laborers, at $420 each; 15 charwomen, at $240 each; 11 messenger boys, at $360 each; 6 messenger boys, at $300 each; in all, $480,270.

The amendment was agreed to.

Mr. SMOOT. I ask that all the amendments in the paragraph beginning in line 9, on page 18, and going down to line 3, on page 19, be passed over for the present.

Mr. GORE. Mr. President, I am willing that the amendments referred to be passed over.

Mr. SMOOT. All the amendments in that paragraph relate to one another.

The VICE PRESIDENT. The amendments referred to will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 19, line 25, after the word "handling," to strike out "$25,000" and insert "$28,000," so as to make the clause read:

For the investigation and improvement of tobacco and the methods of tobacco production and handling, $28,000.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read to line 17, on page 20.

Mr. KENYON. Mr. President, I have offered an amendment bearing on the lines the Secretary is now about to read. I should like to have lines 17 to 22, inclusive, go over.

The VICE PRESIDENT. This is the House text. After the committee amendments are agreed to, the Senator from Iowa has a perfect right to offer his amendment.

Mr. KENYON. Very well.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 20, line 25, after the words "cotton boll weevil," to strike out "$378,240" and insert "$628,240: *Provided*, That the entire expense of such service shall be defrayed from this appropriation and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation," so as to make the clause read:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton boll weevil, $628,240: *Provided*, That the entire expense of such service shall be defrayed from this appropriation and no contribution or endowment for said purpose shall be received or accepted from any individual, firm, company, or corporation.

Mr. JONES. I ask that that amendment may be passed over, including the proviso.

The VICE PRESIDENT. It will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 21, line 5, after the word "under," to insert "subhumid"; and on line 6, after the word "conditions," to strike out "$145,000" and insert "$160,000," so as to make the clause read:

For the investigation and improvement of methods of crop production under subhumid, semiarid, or dry-land conditions, $160,000: *Provided*, That the limitation in this act as to the cost of farm buildings shall not apply to this paragraph.

Mr. SMOOT. Mr. President, I should like to ask the Senator what effect adding the word "subhumid" will have upon the appropriation itself. Will it not decrease the amount of money that could be used for semiarid or dry-land conditions?

Mr. GORE. Mr. President, the amendment would not have that effect. Fifteen thousand dollars is added to the appropriation to cover the subhumid investigation. This is to cover a strip of territory lying just east of the one hundredth meridian, where some seasons it is too dry and some seasons too wet. Investigations are being made in the arid and semiarid parts of the country, but no special investigations have been made with respect to this peculiar country, exhibiting the characteristics of being too wet certain seasons and too dry other seasons; and the subhumid provision was inserted to authorize that particular kind of investigation.

Mr. SMOOT. It is distinctly understood, then, that the $15,000 increase, and that only, is to be used on subhumid investigations?

Mr. GORE. That only; yes. My understanding is that a station costing $15,000 will be instituted for that purpose.

Mr. LANE. Mr. President, I should like to ask the Senator where it would be located.

Mr. GORE. I should say it would be located between about the ninety-eighth and the one hundredth meridian.

Mr. LANE. In what stretch of country, what States, or what portion of what particular States?

Mr. GORE. It would be in the region extending from Canada to the Gulf—Texas, Oklahoma, and Kansas.

Mr. LANE. Is it the intention to put in stations all down the line, or in some particular portion of the region?

Mr. GORE. It is left discretionary with the Secretary. The precise locality is not designated.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 21, line 13, after the word "States," to strike out "companies, or," so as to make the clause read:

For studying methods of clearing off "logged off" lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing, in cooperation with the States, individuals, or otherwise, $5,000.

The amendment was agreed to.

Mr. VARDAMAN. Mr. President, what disposition was made of the amendment in line 25, page 20?

The VICE PRESIDENT. It was passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 23, line 3, after the words "general expenses," to strike out "$2,320,455" and insert "$2,688,455," so as to make the clause read:

In all, for general expenses, $2,688,455.

The amendment was agreed to.

The next amendment was, on page 23, after line 8, to strike out:

Purchase and distribution of valuable seeds: For purchase, propagation, testing, and congressional distribution of valuable seeds, bulbs, trees, shrubs, vines, cuttings, and plants; all necessary office fixtures and supplies, fuel, transportation, paper, twine, gum, postal cards, gas, electric current, rent outside of the District of Columbia, official traveling expenses, and all necessary material and repairs for putting up and distributing the same; for repairs and the employment of local and special agents, clerks, assistants, and other labor required, in the city of Washington and elsewhere, $257,000. And the Secretary of Agriculture is hereby directed to expend the said sum, as nearly as practicable, in the purchase, testing, and distribution of such valuable seeds, bulbs, shrubs, vines, cuttings, and plants, the best he can obtain at public or private sale, and such as shall be suitable for the respective localities to which the same are to be apportioned, and in which same are to be distributed as hereinafter stated, and such seeds so purchased shall include a variety of vegetable and flower seeds suitable for planting and culture in the various sections of the United States: *Provided*, That the Secretary of Agriculture, after due advertisement and on competitive bids, is authorized to award the contract for the supplying of printed packets and envelopes and the packeting, assembling, and mailing of the seeds, bulbs, shrubs, vines, cuttings, and plants, or any part thereof, for a period of not more than five years nor less than one year, if by such action he can best protect the interests of the United States. An equal proportion of five-sixths of all seeds, bulbs, shrubs, vines, cuttings, and plants shall, upon their request, after due notification by the Secretary of Agriculture that the allotment to their respective districts is ready for distribution, be supplied to Senators, Representatives, and Delegates in Congress for distribution among their constituents, or mailed by the department upon the receipt of their addressed franks, in packages of such weight as the Secretary of Agriculture and the Postmaster General may jointly determine: *Provided, however*, That upon each envelope or wrapper containing packages of seeds the contents thereof shall be plainly indicated, and the Secretary shall not distribute to any Senator, Representative, or Delegate seeds entirely unfit for the climate and locality he represents, but shall distribute the same so that each Member may have seeds of equal value, as near as may be, and the best adapted to the locality he represents: *Provided, also*, That the seeds allotted to Senators and Representatives for distribution in the districts embraced within the twenty-fifth and thirty-fourth parallels of latitude shall be ready for delivery not later than the 10th day of January: *Provided, also*, That any portion of the allotments to Senators, Representatives, and Delegates in Congress remaining uncalled for on the 1st day of April shall be distributed by the Secretary of Agriculture, giving preference to those persons whose names and addresses have been furnished by Senators and Representatives in Congress, and who have not before during the same season been supplied by the department: *And provided also*, That the Secretary shall report, as provided in this act, the place, quantity, and price of seeds purchased, and the date of purchase; but nothing in this paragraph shall be construed to prevent the Secretary of Agriculture from sending seeds to those who apply for the same. And the amount herein appropriated shall not be diverted or used for any other purpose but for the purchase, testing, propagation, and distribution of valuable seeds, bulbs, mulberry and other rare and valuable trees, shrubs, vines, cuttings, and plants.

Mr. SMOOT. Mr. President, let that amendment go over.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 25, line 16, after the words "Bureau of Plant Industry," to strike out "$3,053,975" and insert "$3,168,725," so as to make the clause read:

Total for Bureau of Plant Industry, $3,168,725.

The amendment was agreed to.

The next amendment was, under the head of "Forest Service," on page 33, line 21, after "$8,000," to insert "and to extend the work of reforestation to the Niobrara division of the Nebraska National Forest, including the establishment of a nursery in said division, $15,000," so as to make the clause read:

Nebraska National Forest, Nebraska, $8,000; and to extend the work of reforestation to the Niobrara division of the Nebraska National Forest, including the establishment of a nursery in said division, $15,000: *Provided*, That from the nurseries on said forest the Secretary of Agriculture, under such rules and regulations as he may prescribe, may furnish young trees free, so far as they may be spared, to residents of the territory covered by "An act increasing the area of homesteads in a portion of Nebraska," approved April 28, 1904.

The amendment was agreed to.

The next amendment was, on page 40, line 6, after the words "general expenses," to strike out "$3,238,096" and insert "$3,253,096," so as to make the clause read:

In all, for general expenses, $3,253,096.

The amendment was agreed to.

The next amendment was, on page 40, after line 12, to insert:

That hereafter all moneys received as contributions toward cooperative work in forest investigations, or the protection and improvement of the national forests, shall be covered into the Treasury and shall constitute a special fund, which is hereby appropriated and made available until expended, as the Secretary of Agriculture may direct, for the payment of the expenses of said investigations, protection, or improvements by the Forest Service, and for refunds to the contributors of amounts heretofore or hereafter paid in by them in excess of their share of the cost of said investigations, protection, or improvements.

Mr. THOMAS. Mr. President, I should like to have from the chairman of the committee some explanation as to just what object is intended to be served by the proposed amendment.

Mr. GORE. The amendment is proposed principally for the sake of bookkeeping. Certain moneys now contributed are covered into the Treasury.

Mr. THOMAS. But contributed from what source?

Mr. GORE. I do not know.

Mr. THOMAS. From private sources?

Mr. GORE. Yes; persons interested in the study of the improvement and protection of parks.

Mr. THOMAS. That is what I wanted to know. I was not aware that any such contributions were being made.

Mr. GORE. Yes, sir; they have been made heretofore.

Mr. SMOOT. I will say to the Senator that they have been made for years past. I have always understood, however, that in the past the money has been handled by the head of the bureau, and not turned into the Treasury.

Mr. GORE. Certain of these moneys have been lost under the present management. One bank failed, I think, involving the loss of a considerable amount of this money. This provision is inserted in order to protect the Government against the recurrence of such things.

Mr. THOMAS. I have no doubt the amendment is intended for a proper purpose, but I did not fully understand it.

While I am on my feet I wish to inquire whether amendments outside of those offered by the committee may be presented during the discussion of the bill, or after the committee amendments have been disposed of?

The VICE PRESIDENT. The rule is to consider the committee amendments first and subsequently other amendments, unless some Senator desires to amend an amendment proposed by the committee.

Mr. JONES. Mr. President, is the amendment just being discussed the one on page 40?

The VICE PRESIDENT. It is on page 40; yes.

Mr. JONES. I should like to know from what sources the contributions have been made heretofore.

Mr. GORE. I will say that the Assistant Secretary of Agriculture stated before the committee that they are from persons interested in the improvement and protection of the forests of the country. I have no enumeration of the names. If the Senator cares for such an enumeration I will make an effort to secure it; but I suggest that the amendment be passed over for the present, as it seems likely that it will delay the consideration of the bill.

Mr. THOMAS. I am not objecting to the adoption of the amendment.

Mr. JONES. I should like to have it passed over.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 40, line 24, after the words "Forest Service," to strike out "$5,543,256" and insert "$5,558,256," so as to make the clause read:

Total for Forest Service, $5,558,256.

The amendment was agreed to.

The next amendment was, under the head of "Bureau of Chemistry," on page 41, line 5, before the word "clerks," where

it occurs the first time, to strike out "ten" and insert "eleven," so as to read:

Eleven clerks, class 3.

The amendment was agreed to.

The next amendment was, on page 41, line 9, before the word "food," to strike out "chief," so as to read:

One food and drug inspector.

Mr. SMOOT. Mr. President, I should like to ask the Senator why the word "chief" has been stricken out. In all past appropriation bills the present wording has been used.

Mr. GORE. I will ask that the amendment be passed over for the present. I have not in hand the data that will enable me to answer it.

Mr. SMOOT. Then I suggest that that amendment be passed over, and also the item for "one food and drug inspector," on lines 9 and 10, so that when we reach it we can take up the question as a whole.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, in the item of appropriation for salaries in the Bureau of Chemistry, on page 42, line 5, after the words "in all," to strike out "$281,500" and insert "$282,600," so as to read:

Eight messenger boys or laborers, at $480 each; 3 messenger boys or laborers, at $420 each; 1 messenger boy or laborer, $360; 8 charwomen, at $240 each; in all, $282,600.

The amendment was agreed to.

The next amendment was, on page 42, line 19, after the word "agriculture," to strike out "$52,400" and insert "$67,400: *Provided*, That of this sum $15,000 may be used by the Secretary of Agriculture in making field experimental demonstrations for the purpose of utilizing by-products of the several species of trees grown in the Western States and of the stumps and roots on 'logged off' lands, and ascertaining and investigating methods of processing and treating the several species of woods and such stumps and roots and determining the merchantable value thereof," so as to make the clause read:

For conducting the investigations contemplated by the act of May 15, 1862, relating to the application of chemistry to agriculture, $67,400: *Provided*, That of this sum $15,000 may be used by the Secretary of Agriculture in making field experimental demonstrations for the purpose of utilizing by-products of the several species of trees grown in the Western States and of the stumps and roots on "logged off" lands, and ascertaining and investigating methods of processing and treating the several species of woods and such stumps and roots and determining the merchantable value thereof.

The amendment was agreed to.

The next amendment was, on page 43, line 19, after the words "United States," to strike out "$50,000" and insert "$60,000," so as to make the clause read:

For investigating the preparation for market, the handling, grading, packing, freezing, drying, storing, and transportation of poultry and eggs, and for experimental shipments of poultry and eggs within the United States, $60,000.

The amendment was agreed to.

The next amendment was, on page 44, line 6, after the words "general expenses," to strike out "$150,680" and insert "$175,680," so as to make the clause read:

In all, for general expenses, $175,680.

The amendment was agreed to.

The next amendment was, on page 44, line 20, after the words "District of Columbia," to strike out "$634,304" and insert "$634,301," so as to make the clause read:

Enforcement of the food and drugs act: For enabling the Secretary of Agriculture to carry into effect the provisions of the act of June 30, 1906, entitled "An act for preventing the manufacture, sale, or transportation of adulterated, or misbranded, or poisonous, or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," in the city of Washington and elsewhere, including chemical apparatus, chemicals and supplies, repairs to apparatus, gas, electric current, official traveling expenses, telegraph and telephone service, express and freight charges, and all other expenses, employing such assistants, clerks, and other persons as may be considered necessary for the purposes named, and rent outside of the District of Columbia, $634,301.

The amendment was agreed to.

The next amendment was, on page 44, line 21, after the words "Bureau of Chemistry," to strike out "$1,076,481" and insert "$1,092,581," so as to make the clause read:

Total for Bureau of Chemistry, $1,092,581.

The amendment was agreed to.

The next amendment was, under the head of "Bureau of Soils," on page 45, line 1, before the word "clerks," to strike out "four" and insert "five," and in line 9, after the words "in all," to strike out "$59,420" and insert "$60,820," so as to make the clause read:

Salaries, Bureau of Soils: One soil physicist, who shall be chief of bureau, $4,000; 1 chief clerk, $2,000; 1 executive assistant, $2,000; 4 clerks, class 4; 2 clerks, class 3; 5 clerks, class 2; 1 clerk, $1,260; 8 clerks, class 1; 5 clerks, at $1,000 each; 3 clerks, at $900 each; 1 soil cartographer, $1,800; 1 soil bibliographer or draftsman, $1,400; 1 photographer, $1,200; 5 draftsmen, at $1,200 each; 1 clerk-draftsman, $1,200; 1 draftsman, $1,000; 1 messenger, $840; 3 messengers, messenger boys, or laborers, at $480 each; 2 laborers, at $600 each; 1 laborer, $300; 1 charwoman or laborer, $480; in all, $60,820.

The amendment was agreed to.

The next amendment was, on page 46, line 13, after "$36,500," to insert "*Provided*, That of the amount hereby appropriated, the sum of not exceeding $5,000 may be used for the erection of a small laboratory building on the experimental farm of the Department of Agriculture at Arlington, Va., for the purpose of studying fixation of atmospheric nitrogen by electrical methods, plans and specifications for the building to be approved by the Secretary of Agriculture and all work done under his supervision," so as to make the clause read:

For exploration and investigation within the United States to determine possible sources of supply of potash, nitrates, and other natural fertilizers, $36,500: *Provided*, That of the amount hereby appropriated, the sum of not exceeding $5,000 may be used for the erection of a small laboratory building on the experimental farm of the Department of Agriculture at Arlington, Va., for the purpose of studying fixation of atmospheric nitrogen by electrical methods, plans and specifications for the building to be approved by the Secretary of Agriculture and all work done under his supervision.

Mr. JONES. Mr. President, I desire to ask the chairman of the committee whether or not there is any estimate showing that this $5,000 will be sufficient for the purpose specified, or whether it will simply start the building, and then the department will come back here and ask for more money?

Mr. GORE. This is the estimate of the department.

Mr. JONES. Does the Senator know whether the department has gone into the matter carefully to see whether or not this will furnish a sufficient building?

Mr. GORE. I think so, Mr. President. It will not require an elaborate establishment. It is to carry on experiments with reference to obtaining nitrogen from the air, a very important undertaking; and they estimate that this will be sufficient to construct the building and to proceed with the work.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. SMOOT. Let the amendment go over.

The VICE PRESIDENT. The amendment will go over. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. GORE. I should like to say to the Senate, and particularly to the Senator from North Dakota [Mr. McCUMBER], that I think we can finish the consideration of the unobjected amendments in a few minutes, probably in 20 minutes, and that would not jeopardize the unfinished business. I would appreciate it if the Senator would permit us to proceed with the appropriation bill.

Mr. McCUMBER. Mr. President, I certainly dislike very much to do so. I wish the Senator would not make the request. But if the Senator will fix the number of minutes and state the time for which the unfinished business may be temporarily laid aside I will be willing, if the Senate agrees to it.

Mr. GORE. I appreciate the disposition on the part of the Senator to accommodate me, and I will ask that the unfinished business may go over for 30 minutes, or as much of that time as may be required.

Mr. McCUMBER. Very well. Then I will ask unanimous consent that the unfinished business may be temporarily laid aside for the further consideration of the Agricultural appropriation bill, such consideration not to extend beyond half past 2 o'clock.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. Of course I have not any objection, only I think it is a dangerous precedent to provide that we shall consider a bill for a specified time and take up another measure at a particular time. But I shall not object, simply stating that I do not believe it is a good policy to follow.

The VICE PRESIDENT. New things are occurring every day. If there is no objection, the reading of the appropriation bill will proceed.

The Secretary resumed the reading of the bill.

The next amendment of the Committee on Agriculture and Forestry was, under the head of "Bureau of Entomology," on page 47, line 12, after the words "chief of bureau," to strike out "$4,500" and insert "$5,000"; in line 15, before the word

"clerks," where it occurs the second time, to strike out "eight" and insert "nine," and in line 24, after the words "in all," to strike out "$67,650" and insert "$69,550," so as to make the clause read:

Salaries, Bureau of Entomology: One entomologist, who shall be chief of bureau, $5,000; 1 chief clerk and executive assistant, $2,250; 1 financial clerk, $1,800; 3 clerks, class 4; 3 clerks, class 3; 9 clerks, class 2; 7 clerks, class 1; seven clerks, at $1,000 each; 2 clerks, at $900 each; 2 entomological draftsmen, at $1,400 each; 1 entomological draftsman, $1,080; 4 foremen, at $1,080 each; 2 entomological preparators, at $840 each; 1 entomological preparator, $720; 6 entomological preparators, at $600 each; 1 messenger, $840; 2 messengers or laborers, at $720 each; 4 messenger boys, at $360 each; 1 mechanic, $840; 1 laborer, $540; 2 charwomen, at $480 each; 1 charwoman, $240; in all, $69,550.

The amendment was agreed to.

The next amendment was, on page 48, line 20, after the words "and the," to insert "cigarette beetle and"; in the same line, after the word "ant," to strike out "$59,000" and insert "$84,000, of which sum $25,000 shall be immediately available," so as to make the clause read:

For investigations of insects affecting southern field crops, including insects affecting cotton, tobacco, rice, sugar cane, etc., and the cigarette beetle and Argentine ant, $84,000, of which sum $25,000 shall be immediately available.

Mr. JONES. I wish to ask what this cigarette beetle is.

Mr. GORE. It seems to be a new sort of a pest to tobacco producers and manufacturers. It has caused a good deal of trouble in Florida.

Mr. JONES. Does it destroy cigarettes?

Mr. GORE. I do not know whether it attacks tobacco in the cigarette form or not.

Mr. JONES. If it destroys cigarettes, we do not want to destroy it.

Mr. GORE. If we would reach that, it would probably be necessary to limit the production.

Mr. JONES. How long has this beetle been known?

Mr. GORE. I am not advised as to the history of the beetle. This amendment was presented by the Senator from Florida [Mr. FLETCHER], and it is the first time it has ever been brought to the attention of the Committee on Agriculture and Forestry. I think it is a rather new invasion.

Mr. JONES. What is the showing as to the necessity of the additional appropriation of $25,000, which, I take it, is on account of this beetle?

Mr. GORE. I will state to the Senator that it is not an additional appropriation. It simply directs that a portion of the appropriation may be applied to this use.

Mr. JONES. No; the House provided for $59,000, and the committee has increased that appropriation to $84,000, and then says that the $25,000 increase shall be immediately available. The Senate committee has increased the House appropriation by $25,000.

Mr. GORE. The Senator will observe that there are a number of other uses to which this appropriation is to be devoted.

Mr. JONES. I wondered if this increase was to be devoted to the cigarette beetle.

Mr. GORE. No, sir; it is not. It is my recollection that the appropriation was not increased at all on account of the cigarette beetle, but that this specific purpose was enumerated, as it was a new purpose.

Mr. JONES. Does the department estimate $84,000 as being necessary for the purposes enumerated in this paragraph?

Mr. GORE. I think they submitted an additional estimate requesting this amount; but I will ask that the amendment be passed over.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, the amendment will be passed over for the present. Does the Senator from Oklahoma desire to have the entire paragraph go over?

Mr. GORE. Only the part of it which covered the question raised by the Senator from Washington.

Mr. TOWNSEND. That necessarily carries the whole paragraph.

Mr. GORE. If it runs through the entire paragraph, let it go over.

The PRESIDING OFFICER. It will go over.

Mr. BRADY. From line 18 to line 22 on page 48.

The PRESIDING OFFICER. The paragraph from line 18 to line 22 on page 48 will go over.

The Secretary resumed the reading of the bill.

The next amendment was, on page 50, line 5, after the words "Bureau of Entomology," to strike out "$815,560" and insert "$842,460," so as to make the clause read:

Total for Bureau of Entomology, $842,460.

The amendment was agreed to.

The next amendment was, under the head of "Bureau of Biological Survey," on page 50, line 11, before the word "clerks," where it occurs the second time, to strike out "four" and insert "five"; and in line 16, after the words "in all," to strike out "$31,590" and insert "$32,790," so as to make the clause read:

Salaries, Bureau of Biological Survey: One biologist, who shall be chief of bureau, $3,500; one chief clerk and executive assistant, $1,800; one assistant in game preservation, $2,250; one financial clerk, $1,600; 2 clerks, class 3; 3 clerks, class 2; 5 clerks, class 1; 3 clerks, at $1,000 each; 2 clerks, at $900 each; 1 messenger, $720; 1 photographer, $1,300; 1 game warden, $1,200; 1 draftsman, $900; 1 messenger, messenger boy, or laborer, $480; 1 laborer, $600; 1 charwoman, $240; in all, $32,790.

The amendment was agreed to.

The next amendment was, on page 51, line 23, after the word "destroying," to strike out "noxious animals" and insert "wolves, prairie dogs, ground squirrels, and other animals injurious to agriculture," so as to read:

For investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments and demonstrations in destroying wolves, prairie dogs, ground squirrels, and other animals injurious to agriculture, etc.

Mr. JONES. I wish to ask the chairman of the committee what special reason there was for changing the language of this paragraph. I understand the words "noxious animals" have been heretofore carried in the appropriation bill. Why did the committee strike out those words and change it to a specific enumeration?

Mr. GORE. Considerable interest was manifested on the part of certain Senators that wolves and prairie dogs should be specially mentioned for eradication, and in consideration of their wish the change was made. I do not apprehend that it would make any appreciable change in the administration.

Mr. JONES. What necessity is there for special experiments with reference to the way to kill wolves?

Mr. GORE. I will ask that the amendment be passed over.

Mr. BRADY. It was on the request of western Senators that it was changed so as to make it more definite that the money should be used for experiments in destroying wolves, prairie dogs, ground squirrels, and other animals injurious to agriculture. I think the provision is very essential, and I do not believe it is necessary that the amendment should go over. I do not think the Senator from Washington desires it to go over. It simply makes the language more specific.

Mr. GORE. I much prefer to have the amendment passed over for the present.

The PRESIDING OFFICER. The amendment will go over.

The next amendment was, on page 52, line 1, after the word "marten," to strike out "$75,000" and insert "$125,000," and in line 2, after the word "*Provided*," to strike out "That of this sum $15,000 shall be used for the destruction of ground squirrels on the national forests: *And provided further*," so as to make the clause read:

And for investigations and experiments in connection with rearing of fur-bearing animals, including mink and marten, $125,000: *Provided*, That of this sum not more than $5,000 may be used in investigating the disease of wild ducks in the Salt Lake Valley region of Utah.

Mr. SMOOT. That is provided for in another part of the bill.

Mr. GORE. It is provided for in the item just passed over. Probably this ought to be passed over until final action on the other, as it is a part of it.

Mr. SMOOT. Yes; let the whole paragraph go over.

The PRESIDING OFFICER. The entire paragraph will go over.

The next amendment was, on page 52, line 10, after the word "zones," to strike out "$21,500" and insert "$26,500," so as to make the clause read:

For biological investigations, including the relations, habits, geographic distribution, and migrations of animals and plants, and the preparation of maps of the life and crop zones, $26,500.

The amendment was agreed to.

The next amendment was, on page 52, after line 10, to insert:

For the improvement of the Mesa Verde National Park, $10,000.

Mr. SMOOT. I ask that this and the following park items may go over.

The PRESIDING OFFICER. The amendments will go over.

Mr. JONES. I simply wanted to ask the chairman of the committee why the committee provided for the improvement of national parks in this bill. My recollection is that those are generally covered in the sundry civil appropriation bill.

Mr. SMOOT. I was going to say to the Senator that they have always been provided for in the sundry civil bill, with the exception of some that have even gone into the legislative bill. Nearly every agricultural appropriation bill we pass carries some.

Mr. GORE. I suggest that we pass over the amendment.

The PRESIDING OFFICER. The amendment will be passed over, and the amendments relative to Sullys Hill National Park and Platt National Park will also be passed over on the request of the Senator from Utah [Mr. SMOOT].

The next amendment was, on page 53, line 22, after the words "insectivorous birds," to strike out "$50,000" and insert "$10,000," so as to make the clause read:

For all necessary expenses for enforcing the provisions of the act approved March 4, 1913 (37 Stat. L., pp. 847, 848), relating to the protection of migratory game and insectivorous birds, $10,000.

Mr. McLEAN. I ask that that amendment may go over.

The PRESIDING OFFICER. The amendment will go over.

Mr. VARDAMAN. What is the paragraph that went over?

The PRESIDING OFFICER. Page 53, lines 17 to 22.

The next amendment was, on page 53, line 23, after the words "general expenses," to strike out "$198,500" and insert "$238,500," so as to make the clause read:

In all, for general expenses, $238,500.

The amendment was agreed to.

The next amendment was, on page 53, line 24, after the words "Biological Survey," to strike out "$230,000" and insert "$271,290," so as to make the clause read:

Total for Bureau of Biological Survey, $271,290.

The amendment was agreed to.

The next amendment was, under the head of "Division of Accounts and Disbursements," on page 54, line 3, after the words "disbursing clerk," to strike out "who shall be administrative officer of the fiscal affairs of the department."

Mr. SMOOT. I should like to ask the Senator why those words were stricken out. It seems to me in striking out those words the final result will be that we shall have to have another person to fill that office.

Mr. GORE. There is a process of reorganization going on in the department and they are arranging to dispense with the Division of Accounts at least in large part. The clerks and other employees in that division are being distributed. It is thought that it will contribute to efficiency. It is in pursuance of that policy that this language is stricken out. It is recommended by the department.

Mr. SMOOT. Does the Senator understand that in the reorganization there will not be required an administrative officer of the fiscal affairs of the department?

Mr. GORE. I think in the capacity heretofore occupied by that officer it will not be necessary. I will ask, however, that the amendment be passed over if the Senator wishes further time to consider it.

Mr. VARDAMAN. Mr. President, this is done in obedience to a suggestion made by the department.

Mr. GORE. Yes, sir; it is recommended by the department, in pursuance of the plan of reorganization. The Senator will observe that the number of clerks and employees in the Division of Accounts has been largely reduced—I think some twenty-odd—and the appropriation has been correspondingly reduced.

The PRESIDING OFFICER. Is there objection to the amendment? Without objection, it is agreed to.

The next amendment was, on page 54, in line 5, to strike out "one auditor, $2,000"; in line 8, before the word "clerks," where it occurs the second time, to strike out "seven" and insert "four"; in line 9, before the word "clerks," where it occurs the first time, to strike out "eleven" and insert "six"; and in the same line, before the word "clerks," where it occurs the second time, to strike out "six" and insert "five," so as to make the clause read:

Salaries, Division of Accounts and Disbursements: One chief of division and disbursing clerk, $4,000; 1 supervising auditor, $2,250; 1 cashier and chief clerk, $2,250; 1 deputy disbursing clerk, $2,000; 1 accountant and bookkeeper, $2,000; 2 clerks, class 4; 4 clerks, class 3; 6 clerks, class 2; 5 clerks, class 1; 4 clerks, at $1,000 each; 3 clerks, at $900 each; 1 custodian of records and files, $1,400; 1 messenger, $720; 1 messenger or messenger boy, $600.

The amendment was agreed to.

The next amendment was, on page 54, line 13, after the words "Accounts and Disbursements," to strike out "$61,320" and insert "$46,320," so as to make the clause read:

Total for Division of Accounts and Disbursements, $46,320.

The amendment was agreed to.

The next amendment was, under the head of "Division of Publications," in the item of appropriation of salaries for the Division of Publications, on page 55, line 9, before the word "laborers," where it occurs the first time, to strike out "nine" and insert "eight"; in line 11, before the word "skilled," to strike out "one" and insert "two"; in the same line, after the word "skilled," to strike out "laborer" and insert "laborers, at $1,100 each"; and in line 19, after the words "In all," to strike out "$170,490" and insert "$170,750," so as to read:

Two skilled laborers, at $900 each; 8 skilled laborers, at $840 each; 4 skilled laborers, at $780 each; 16 skilled laborers, at $720 each; 1 chief folder, $1,000; 2 folders, at $900 each; 2 skilled laborers, at $1,100 each; 1 skilled laborer, $1,000; 2 messengers, at $840 each; 2 messengers, at $720 each; 3 messengers or messenger boys, at $600 each; 2 messengers or messenger boys, at $480 each; 2 messengers or messenger boys, at $420 each; 2 messengers or messenger boys, at $360 each; 1 laborer, $840; 2 laborers, at $600 each; 4 charwomen, at $480 each; 3 charwomen, at $240 each; in all, $170,750.

The amendment was agreed to.

The next amendment was, on page 56, after line 13, after the words "Division of Publications," to strike out "$189,240" and insert "$189,500," so as to make the clause read:

Total for Division of Publications, $189,500.

The amendment was agreed to.

The next amendment was, under the head of "Bureau of Crop Estimates," on page 56, line 18, before the word "clerks," to strike out "thirteen" and insert "fourteen," and in line 25, after the words "in all," to strike out "$114,180" and insert "$115,580," so as to make the clause read:

Salaries, Bureau of Crop Estimates: One statistician, who shall be chief of bureau, $4,000; 1 chief clerk, $1,800; 6 clerks, class 4; 9 clerks, class 3; 14 clerks, class 2; 1 clerk, $1,300; 18 clerks, class 1; 17 clerks, at $1,000 each; 21 clerks, at $900 each; 2 messengers, at $840 each; 2 messengers or laborers, at $720 each; 2 messengers, messenger boys, or laborers, at $600 each; 1 messenger, messenger boy, or laborer, $480; 1 charwoman, messenger, or laborer, $540; 2 charwomen, messenger boys, or laborers, at $360 each; in all, $115,580.

The amendment was agreed to.

The next amendment was, on page 57, after line 13, to insert:

That hereafter the powers conferred and the duties imposed by law on the Bureau of Statistics of the Department of Agriculture shall be exercised and performed by the Bureau of Crop Estimates.

Mr. JONES. I ask the chairman of the committee where the employees of the Bureau of Statistics as heretofore existing will go under the provisions of the bill?

Mr. GORE. This is simply a change in the title of the office.

Mr. JONES. No; it provides that the powers conferred and the duties imposed by law on the Bureau of Statistics shall be exercised and performed by the Bureau of Crop Estimates.

Mr. GORE. It simply changes the name of the bureau.

Mr. JONES. The same employees will go to the Bureau of Crop Estimates?

Mr. GORE. The personnel is not changed at all. It is to avoid the confusion which the Senator no doubt has experienced in having bureaus of statistics in several departments.

Mr. SMOOT. For salaries, travel, and other necessary expenses of employees out of Washington of the Bureau of Crop Estimates a lump appropriation of $135,300 is made. I wish to ask the Senator why a lump-sum appropriation is applied to the Bureau of Crop Estimates instead of naming, as is done in the case of almost every other bureau, the officers and the amount paid them?

Mr. GORE. I presume it was because they require larger portions of the appropriation at certain seasons of the year than at others. As the Senator knows, this bill has always carried considerable lump-sum appropriations not only for this but for other bureaus. I question the wisdom of such a policy, and the committee is gradually working out a system of converting lump-sum appropriations into statutory provisions.

Mr. SMOOT. I wish to say to the Senator that I think it ought to be worked out in every appropriation bill. Evils and a waste of public money come from lump-sum appropriations, with no restrictions whatever placed upon them.

Mr. GORE. There is a good deal of force in that observation, but it has been observed by the Secretary of Agriculture with reference to their scientific officers and employees that they require some latitude in connection with their duties. I think there is some force in that suggestion as well.

Mr. BRADY. I desire to say to the Senator from Utah that it is the purpose of the committee to make appropriations along the line he suggests and to get away from lump-sum appropriations as fast as possible.

Mr. JONES. I should like to ask the Senator——

Mr. GORE. I will ask that the amendment be passed over.

The PRESIDING OFFICER. The amendment will be passed over.

Mr. JONES. I simply wanted to ask a question about this provision in the text of the bill as it came from the House, and possibly it has been in the Agricultural appropriation bill as heretofore passed. It provides for salaries, travel, and other expenses, and so forth, $135,300. Who determines the salaries to be paid? Is it the Secretary of Agriculture? Does he fix the salaries?

Mr. BRADY. On what page is that?

Mr. JONES. On page 57.

Mr. WEST. Line 11.

Mr. JONES. It is in lines 11, 12, and 13, and the same is also true of lines 7, 8, and 9. Does the Secretary of Agriculture fix the salaries of the people employed under those paragraphs?

Mr. BRADY. I understand that where the salaries are not fixed he has authority to fix them.

Mr. JONES. That is what I asked. He fixes the salary?

Mr. BRADY. That is my understanding.

Mr. JONES. There is no provision in the bill anywhere which limits the amount that can be paid per diem or per month to employees working under these lump-sum appropriations, but the Secretary of Agriculture has entire control over that matter and can fix a salary at whatever sum he sees fit.

Mr. BRADY. In a degree that is true.

Mr. JONES. Is it not absolutely true?

Mr. BRADY. It is the desire of the committee to get away from that system as fast as we can, and, furthermore, that is the desire of the Secretary of Agriculture.

Mr. JONES. What steps have been taken in this bill to get away from it? Have any steps been taken?

Mr. BRADY. That is the intention; but we could not get away from it in every case, because we did not have time to go through all the matters. However, it is the desire of the committee and of the Secretary of Agriculture to get away from the lump-sum appropriations and have the salaries specified and paid out of regular appropriations.

Mr. JONES. I think that is a very laudable purpose.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, under the head of "Library, Department of Agriculture," on page 57, line 22, after the word "one," where it occurs the second time, to strike out "assistant librarian, $1,600" and insert "clerk, class 3," so as to make the clause read:

Salaries, library, Department of Agriculture: One librarian, $2,000; 1 clerk, class 3; 1 clerk, class 2; 4 clerks, class 1; 3 clerks, at $1,080 each; 6 clerks, at $1,000 each; 5 clerks, at $900 each; 1 clerk, $840; 1 junior library assistant, or messenger, $720; 3 junior library assistants, or messenger boys, at $600 each; 1 messenger, messenger boy, or laborer, $480; 1 charwoman, $480; in all, $27,860.

The amendment was agreed to.

The next amendment was, on page 58, line 9, after the word "material," to strike out "$17,500" and insert "$22,500," so as to make the clause read:

General expenses, library: For books of reference, technical and scientific books, papers and periodicals, and for expenses incurred in completing imperfect series; for the employment of additional assistants in the city of Washington and elsewhere; for official traveling expenses, and for library fixtures, library cards, supplies, and other material, $22,500.

The amendment was agreed to.

The next amendment was, on page 58, line 11, after the word "library," to strike out "$45,360" and insert "$50,360," so as to make the clause read:

Total for library, $50,360.

The amendment was agreed to.

The next amendment was, under the head of "Miscellaneous expenses," on page 59, line 3, after the word "department," to strike out "$106,000" and insert "$121,000, of which amount $10,000 shall be immediately available," so as to make the clause read:

Miscellaneous expenses, Department of Agriculture: For stationery, blank books, twine, paper, gum, dry goods, soap, brushes, brooms, mats, oils, paints, glass, lumber, hardware, ice, fuel, water and gas pipes, heating apparatus, furniture, carpets, and matting; for lights, freight, express charges, advertising, telegraphing, telephoning, postage, washing towels, and necessary repairs and improvements to buildings, grounds, and heating apparatus; for the purchase, subsistence, and care of horses and the purchase and repair of harness and vehicles, for official purposes only; for the payment of duties on imported articles, and the Department of Agriculture's proportionate share of the expense of the dispatch agent in New York; for official traveling expenses; and for other miscellaneous supplies and expenses not otherwise provided for, and necessary for the practical and efficient work of the department, $121,000, of which amount $10,000 shall be immediately available.

The amendment was agreed to.

Mr. JONES. I wish to recur to page 57 and ask a question for information. In lines 22 and 23, on that page, it reads as amended, "One clerk of class 3." What is the salary of that clerk?

Mr. GORE. It is the salary of all clerks of the third class, $1,600.

Mr. JONES. Where is the provision which fixes that salary?

Mr. GORE. It is a permanent statute.

Mr. SMOOT. I will say to the Senator it is a permanent statute. Clerks of class 4 receive $1,800, clerks of class 3 receive $1,600, clerks of class 2 receive $1,400, and clerks of class 1 receive $1,200.

The next amendment was, under the head of "Office of Experiment Stations," on page 61, line 5, after the word "acts," to insert "and the act approved ———, 1914, entitled 'An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture'"; and in line 17, after the words "District of Columbia," to strike out "$40,500" and insert "$50,500"; so as to make the clause read:

To enable the Secretary of Agriculture to enforce the provisions of the above acts and the act approved ———, 1914, entitled "An act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1868, and of acts supplementary thereto, and the United States Department of Agriculture," relative to their administration, including the employment of clerks, assistants, and other persons in the city of Washington and elsewhere, freight and express charges, official traveling expenses, office fixtures, supplies, apparatus, telegraph and telephone service, gas, electric current, and rent outside of the District of Columbia, $50,500; and the Secretary of Agriculture shall prescribe the form of the annual financial statement required under the above acts, ascertain whether the expenditures are in accordance with their provisions, and make report thereon to Congress.

The amendment was agreed to.

The next amendment was, on page 62, line 3, after the word "expenses," to strike out "$110,000" and insert "$130,000"; in the same line, after the word "Alaska," to strike out "$35,000" and insert "$45,000"; in line 4, after the word "Hawaii," to strike out "$30,000" and insert "$40,000"; and in line 9, after the word "used," to insert "*Provided*, That of the sum herein appropriated for the experiment station in Hawaii $10,000 may be used in agricultural extension work in Hawaii"; so as to make the clause read:

To enable the Secretary of Agriculture to establish and maintain agricultural experiment stations in Alaska, Hawaii, Porto Rico, and the island of Guam, including the erection of buildings, the preparation, illustration, and distribution of reports and bulletins, and all other necessary expenses, $130,000, as follows: Alaska, $45,000; Hawaii, $40,000; Porto Rico, $30,000; and Guam, $15,000; and the Secretary of Agriculture is authorized to sell such products as are obtained on the land belonging to the agricultural experiment stations in Alaska, Hawaii, Porto Rico, and the island of Guam, and this fund shall be available until used: *Provided*, That of the sum herein appropriated for the experiment station in Hawaii $10,000 may be used in agricultural extension work in Hawaii.

The next amendment was, on page 63, line 2, after the words "investigate the," to strike out "nutritive value of agricultural products used for human food, with special suggestions of plans and methods for the more effective utilization of such products for this purpose," and insert "relative utility and economy of agricultural products for food, clothing, and other uses in the home, with special suggestions of plans and methods for the more effective utilization of such products for these purposes"; and in line 12, after the words "necessary expenses," to strike out "$16,000" and insert "$25,760"; so as to make the clause read:

Nutrition investigations: To enable the Secretary of Agriculture to investigate the relative utility and economy of agricultural products for food, clothing, and other uses in the home, with special suggestions of plans and methods for the more effective utilization of such products for these purposes, with the cooperation of other bureaus of the department, and to disseminate useful information on this subject, including the employment of labor in the city of Washington and elsewhere, supplies, and all other necessary expenses, $25,760.

The amendment was agreed to.

The next amendment was, at the top of page 64, to insert:

To enable the Secretary of Agriculture to investigate the existence of artesian water suitable for irrigation in the semiarid regions by boring wells, $100,000.

Mr. JONES. I wish to ask the chairman of the committee if he thinks the language there is sufficiently broad to allow the sinking of wells to determine the existence of artesian water?

Mr. GORE. The junior Senator from Nebraska [Mr. NORRIS] is particularly familiar with this provision. I believe I will ask that it go over. It might require some little time for explanation.

Mr. JONES. I did not care to ask that it go over. I wanted to be sure that it was broad enough.

Mr. GORE. I ask that it may go over.

The PRESIDING OFFICER. The amendment will be passed over.

The next amendment was, under the head of "Office of Public Roads," on page 64, line 18, after the words "technical work," to strike out "$4,000" and insert "$5,000," and on page 65, line 6, after the words "in all," to strike out "$52,000" and insert "$53,000," so as to make the clause read:

Salaries, Office of Public Roads: One director, who shall be a scientist and have charge of all scientific and technical work, $5,000; one chief clerk, $1,900; one clerk, class 4; three clerks, class 3; one clerk, $1,500; one clerk, $1,440; one clerk or instrument maker, $1,440; one clerk or tabulator, $1,440; one clerk, $1,380; two clerks, at $1,320 each; four clerks, at $1,260 each; three clerks, class 1; one clerk or photographer, $1,200; one clerk or photographer, $1,000; two clerks,

at $1,140 each; two clerks, at $1,080 each; one clerk, $1,020; four clerks, at $1,000 each; one clerk, $900; one clerk or instrument maker, $1,200; one messenger or laboratory helper, $840; two messengers, laborers, or laboratory helpers, at $720 each; one messenger or laborer, $660; four messengers, laborers, or messenger boys, at $600 each; one laborer or messenger boy, $480; two messenger boys, at $480 each; two charwomen, at $240 each; in all, $53,000.

The amendment was agreed to.

The next amendment was, on page 66, line 14, after the words "Office of Public Roads," to strike out "$352,060" and insert "$353,060," so as to make the clause read:

Total for Office of Public Roads, $353,060.

The amendment was agreed to.

The next amendment was, on page 66, line 25, after the words "ordinary work," to strike out "$18,358,232" and insert "$18,734,302," so as to make the clause read:

Total, Department of Agriculture, for routine and ordinary work, $18,734,302.

The amendment was agreed to.

The next amendment was, under the head of "Miscellaneous," on page 68, line 19, after the word "demonstrations," to strike out "and"; in the same line, after the word "advice," to insert "and in other ways"; in line 20, after the word "projects," to insert "and elsewhere"; and in line 22, after the word "elsewhere," to strike out "$25,000" and insert "$50,000, of which sum $10,000 shall be immediately available," so as to make the clause read:

Demonstrations on reclamation projects: To enable the Secretary of Agriculture to encourage and aid in the agricultural development of the Government reclamation projects; to assist, through demonstrations, advice, and in other ways, settlers on the projects and elsewhere; and for the employment of persons and means necessary, in the city of Washington and elsewhere, $50,000, of which sum $10,000 shall be immediately available.

Mr. SMOOT. Let that paragraph go over.

The PRESIDING OFFICER. The paragraph will go over.

The next amendment was, on page 69, line 1, before the word "Congress," to strike out "Land" and insert "Farming," and in line 6, after the word "elsewhere" to strike out "$10,000" and insert "$20,000," so as to make the clause read:

To enable the Secretary of Agriculture to cooperate with and make an exhibit at the next annual meeting of the International Dry Farming Congress, to be held at Wichita, Kans., during the fiscal year ending June 30, 1915, illustrative of the investigations, products, and processes relating to farming in the subhumid region of the United States, including labor and all expenses in the city of Washington and elsewhere, $20,000, to be immediately available.

Mr. SMOOT. Let that paragraph go over.

The PRESIDING OFFICER. The paragraph will go over.

The next amendment was, on page 69, after line 18, to insert:

That section 13 of the act entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," approved March 1, 1911 (36 Stat. L., 963), is hereby amended by striking out the word "five," in the first line of said section, and inserting in lieu thereof the word "twenty-five," the purpose of this amendment being to increase the percentage payable to each State from moneys received, as provided in said section, from 5 to 25 per cent.

The amendment was agreed to.

The next amendment was, on page 70, line 14, after the words "United States," to strike out "$50,000: *Provided*, That no part of this appropriation shall be used in the purchase of animals for breeding purposes" and insert "including the erection of such temporary farm buildings as may be found necessary, and for the employment of persons and means necessary in the city of Washington and elsewhere, $100,000; and the Secretary of Agriculture is authorized to sell in the open market or to exchange for other live stock or farm products to the best advantage, without the usual condemnation proceedings and public auction, such live stock or farm products as cease to be needed: *Provided*, That all moneys received from the sale of such live stock or farm products, or as a bonus in the exchange of the same, shall be deposited in the Treasury as miscellaneous receipts: *Provided further*, That in any State in which this work is undertaken sufficient suitable land for the necessary experiments is made available to the Secretary of Agriculture for the required period of time without cost to the Department of Agriculture, and that the State live-stock sanitary laws are enforced by the State in such manner as to justify the Secretary of Agriculture in the expenditure of money for the purpose of encouraging live-stock production," so as to make the clause read:

Experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States: To enable the Secretary of Agriculture, in cooperation with the authorities of the States concerned, or with individuals, to make such investigations and demonstrations as may be necessary in connection with the development of live-stock production in the cane-sugar and cotton districts of the United States, including the erection of such temporary farm buildings as may be found necessary, and for the employment of persons and means necessary in the city of Washington and elsewhere, $100,000; and the Secretary of Agriculture is authorized, etc.

Mr. SMOOT. I ask that that amendment go over.

The PRESIDING OFFICER. The entire paragraph will go over.

The next amendment was, on page 71, after line 14, to insert:

The Secretary of Agriculture is hereby authorized and directed to prepare a plan for reorganizing, redirecting, and systematizing the work of the Department of Agriculture as the interests of economical and efficient administration may require; such plan shall be submitted to Congress in the Book of Estimates for the fiscal year 1916; and the estimates of expenses of the Department of Agriculture for the fiscal year 1916 shall be prepared and submitted in accordance therewith.

Mr. KENYON. Let that go over.

The PRESIDING OFFICER. The paragraph will go over.

Mr. KENYON. And all the remaining amendments of the bill.

The PRESIDING OFFICER. The remainder of the bill will go over. The reading of the bill for action on unobjected amendments has been concluded. The first committee amendment passed over is on page 7, line 5.

Mr. McCUMBER. I understood that the unanimous-consent agreement was to lay the unfinished business temporarily aside simply to allow the Senate to go through with the bill for action on unobjected amendments, and that its consideration was not to continue longer than half past 2. It is now half past 2, and I ask that the unfinished business may be proceeded with.

Mr. SMOOT. Just one minute before that is done. Did I understand that the last amendment passed over was agreed to?

The PRESIDING OFFICER. No, sir.

Mr. SMOOT. If the Chair so understood, I wanted to correct him.

The PRESIDING OFFICER. Not at all. The Chair lays before the Senate the unfinished business, which is Senate bill 120.

INSPECTION AND GRADING OF GRAIN.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. REED. Mr. President, I intend to bring my remarks to a rather speedy close. I have been trying to get the attention of the Senate to this bill; the Senator from North Dakota [Mr. McCUMBER] tried to get the attention of the Senate to it; the Senator from Minnesota [Mr. NELSON] tried to get the attention of the Senate to it; and the Senator from Illinois [Mr. SHERMAN] tried to get the attention of the Senate to it. They all having ingloriously failed, I have not the slightest hope that I shall be able to interest this distinguished body. I suspect that we shall vote upon the bill without the majority of the Members having read it or having heard much about it. It is only a trifling bill, after all. It simply affects the shipment of all of the cereals of the United States. If it concerned a patch of ground like Hetch Hetchy, we would be confronted here by a perfect fervor of enthusiasm and an unlimited and undivided attention.

Mr. President, I have repeatedly made the assertion that nearly every statement contained in the committee's report is based upon a misapprehension of the facts. I had proceeded in that discussion as far as paragraph 9 of the report, and I now desire to call attention to that paragraph, which reads:

(9) This is clearly established by testimony from foreign importers, where, it is said, on account of the frauds perpetrated in certifying grain for export at a higher grade than it is entitled to receive, American grain of a certain grade sells for several cents per bushel less than Canadian or Argentine grain of the same grade.

I now call attention to the statement of Mr. Crowell, whom I have heretofore introduced to the Senate in my remarks. Commenting upon this paragraph Mr. Crowell says:

It is true that from time to time foreign importers of American grain have complained bitterly in regard to the quality tendered under certificates of No. 2 wheat, but these complaints, except possibly at a few isolated ports where the control is inadequate, have practically ceased.

Now, mark you, this report is six years old; it is a copy of a 6-year old report. Mr. Crowell continues:

We venture the assertion that amongst the large and principal exporters of wheat in this country that they have not received a single complaint in regard to the quality of wheat tendered under the American certificates during the past two or three years. Quite the contrary, the wheat that has been exported from this country recently has given universal satisfaction, except possibly in one or two instances, where inferior grain has been allowed to go through small ports where the inspection department has been lax, and in case the inspection remains lax at these small ports the ports are eventually barred by the European exchanges and buyers.

Mr. Crowell states further:

The statement that American grain of a certain grade sells for several cents a bushel less than Canadian or Argentine grain of the same grade is a misstatement of facts, as far as this market is concerned.

The market to which he refers is the market of Kansas City, which is one of the largest exporting markets of the United States. Continuing, Mr. Crowell states:

One can not compare the values of hard winter wheat and spring wheat from one season to another, as sometimes the one is in better demand and commands a premium, owing to certain qualities than the other. On January 15 and January 29, 1914, it will be shown that in Antwerp—a large importing European port—No. 2 hard winter wheat, New Orleans, was worth 19.50 to 19⅝ francs, as against a value of No. 1 Northern Manitoba of 19.75 to 20 francs. The Antwerp market also shows where No. 2 hard winter wheat, Chicago, on January 29, sold at 20 francs as against sales at the same time of Argentine wheat at 19.75 francs and No. 1 northern Duluth at 19.75 francs. These figures speak for themselves, and numberless instances could be produced to bear out our statement that the values abroad for several years past show that the standard of No. 2 hard winter wheat shipped from this country has been satisfactory, and that the prices compared well and favorably with other grades from other markets. We have no doubt that we could get from all our correspondents in Europe statements to the effect that the shipments of hard winter wheat for the past several years, with the exception of one or two isolated shipments from our ports, have given universal satisfaction, and indeed that our shipments have been of such good quality that they have been used for blending purposes in Europe with shipments of inferior quality from Russia and the Argentine.

Mr. President, that is not the statement of a discredited man driven from a board of trade for misconduct; it is not the statement of ambitious gentlemen organizing a rival exchange and suffering by competition; it is a statement of a man of unblemished character of many years experience and of unchallenged character.

In connection with that statement I call attention to the fact that this witness does not stand alone. Mr. J. C. Vincent, of Baltimore, Md., who is an exporter and forwarder of grain, makes the following statement:

In past hearings stress has been laid by Senator MCCUMBER on complaints received through Government sources from Europe, viz, United States consuls and special agents who had been sent abroad to investigate.

Some data have been used by those interested to substantiate the claim that the present system of inspection of grain was faulty. Many of these reports were unreasonable and unjust, as some damage was evidently brought about by causes over which we had no control.

This is corroborated during the past week by receipt of information from England of a lawsuit by the receivers of the cargo per S. S. *Westoaby* against owners of said steamer, and was decided in the British courts in favor of the importer, the judge holding "that the vessel was not properly sheathed for the carriage of maize—that is, corn—that she should have been sheathed on the engine-room bulkhead and all along the tunnel."

Had Baltimore been allowed full hearings before the previous committee of the Senate, we could have shown—as we did before the House committee in the presence of Mr. GRONNA—the necessity for terminal elevators being equipped with modern cleaning machinery, for some had saved western shippers from heavy losses on wheat shipped from the Dakotas, and this was done for their benefit by men who are charged with fraud and injustice in the report that is put before you.

Further, Mr. Vincent states:

British millers do not seek to impose any conditions as to the type or character of wheat offered them; all sorts and conditions of well-harvested wheat have a value and are sold. The miller turns out flour for bread making, also qualities suitable for pastry, puddings, and biscuits, and chooses his wheat for his requirements, so does not necessarily want grades or certificated wheat.

How sensible that is! It has been already explained by the Senator from Minnesota that when you undertake to embrace the many different varieties of wheat under only two or three grades, the result will be that varieties of wheat possessing vastly different qualities must receive the same grade. It follows that wheat can not be bought and sold upon grades alone. Further on this Mr. Vincent states:

Lately at a meeting in London between the members of the London Corn Trade Association, to meet Dr. Robert McGill, chief commissioner of the board of grain commissioners of Fort William, Canada, it was shown that even Government inspection in Canada, which has been used as a reason for criticism, one of the speakers is reported as saying, "We all know we have received wheat, oats, and other goods which were not in accordance with the certificates."

That is said with reference to Government inspection of grain in Canada. It appears that there are mistakes, errors, and complaints when the holy stamp of a Federal Government is placed upon the product, and of course everyone with a modicum of common sense knows that that will be true under any system of inspection. The fact that you can find an isolated instance of complaint is not a sufficient cause to condemn and strike down a system, for you will find that complaints will arise under Federal inspection, just as complaints have arisen under the inspection of the Canadian Government.

Mr. President, in addition to these statements from men of experience, I call attention to the supplemental hearings, which unfortunately are not referred to in this report at all. They could not be referred to in the report because it is an exact reproduction of a report that was filed five years before the supplemental hearings were had.

The supplemental hearings were, as I have already remarked, crowded to the smallest possible compass. Full and free hearings were denied, although men were here begging for a hearing. Yet one of these gentlemen, Mr. Reynolds, of Indiana, forcing himself upon the attention of the committee, made this statement:

Let me say one thing, that the records will show for 10 years that the grain we have exported has brought a higher average price, quality considered, than any other grain in the world. Let me say further, because I want to justify the statement, that that is due largely to the fact that they buy from us when they have to do so, and we have sold them as much as we ought to; they had to pay the price we ask. Is not that a fortunate position for our people to be in? We do not sell them until they are ready to pay our price.

In view of the challenge that this man—a responsible man in the grain business—made, and in view of the fact that he came here backed by a delegation representing the grain business of the country—I say, in view of all that, is it not a little singular that the committee did not inquire a little further and try to ascertain whether the charge made in the 6-year-old report was true? Is it not a peculiar thing that the committee pulled out of the pigeonhole a 6-year-old report, utterly disregarding this important evidence, and filed that old report here without the slightest reference to the testimony produced? Mr. President, without saying anything harsh, it looks to me as though the committee had started out to reach a certain conclusion. For six years they have been trying to have that particular conclusion sustained, and accordingly every scrap of evidence which tends to sustain it is carefully gathered together and is referred to here, but all of the great mass of evidence against it is utterly cast aside and not referred to.

The next paragraph of this report, paragraph 10, reads as follows:

Many of the mills of the country must purchase at the terminal elevators. They have long since ascertained that no reliance can be placed upon those grades. But in many instances they must not only pay for the mixtures concocted in those elevators, but must pay for the grade at which it is improperly certified. It is said that no purchasers for use will to-day buy their grain on the Chicago certificates.

What an astounding statement that is to make with reference to the grain business of this day at least. Whatever the committee's conclusion might have been as to the conditions seven years ago, when this report was written, can any committee look the Senate of the United States in the face and make the statement to-day without qualification that "no purchasers for use will to-day buy their grain on Chicago certificates"? Why, sir, there are hundreds and hundreds of thousands of bushels of grain sold every day upon Chicago certificates. What does such a monstrous statement as that in a report mean? Does it mean that the committee was in a judicial frame of mind when it brought in this report, in the face of the well-known fact that Chicago is the greatest grain market there is on this round world, and that upon the certificates either of the State board or upon the certificates of the board of trade all of that vast volume of business is done? Mr. Crowell states as to that:

It is customary now, and has been for sometime past, for the mills in this country to purchase wheat at terminal elevators, they well knowing that they will receive grain of the quality and of the standard that they have purchased.

Mr. President, if the statement I have just read from the report were true, the Chicago grain market not only would be closed at the present time, but it would have been closed years ago, because the statement practically denies its ability to do any business whatever.

I come now to paragraphs 11 and 12. Those two paragraphs I have heretofore discussed to some extent. In a word, they make the bold charge that grain is graded in the elevators much lower than it should be and is then taken out at a higher grade, and that this device is for the purpose of defrauding the farmer, who sells the grain, upon the one hand, and the consumer, who buys from the wicked elevator man, upon the other. I have already adverted to the fact that the farmer does not ship his grain to the great central markets; that when the grain arrives there it is the grain of some middleman, or of some elevator man; and that to all intents and purposes it may be said that the farmer ships none of it, the percentage is so small. I have already adverted to the fact that these great elevator men—I mean great in the sense of their power and ability to protect themselves—would not submit to being robbed by inspectors. I have already shown that the men upon the board of trade represent both sides of the deal, one of them being the factor for a shipper in and the other the agent or factor for a shipper out, and therefore they are there like watchdogs looking after the interest of their clients. I have also referred to the fact that the table presented here showing that in a certain elevator a certain number of bushels of wheat graded as No. 4 went into the elevator and that no No. 4 wheat was taken out is explained by the very simple, fundamental fact that when grain is taken into elevators it is cleaned, the dirt and weed seed and mustard seed and the blighted and broken grains are removed from it, and thus the grade is improved. Mr. President, the Senator

from North Dakota smiles, but that is the absolute fact as it exists in every elevator in the United States, and there can not be brought here to the Senate a respectable witness who can deny the truth of that statement.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. Yes; certainly.

Mr. McCUMBER. Yes, Mr. President; anyone would smile at a statement of that kind who knew anything about the method of grading in the State of Minnesota, where the grain referred to was graded. As a matter of fact, in the grading there they have the dockage system, and the dockage is always made to include all of the shriveled wheat, the poor wheat, that which contains chaff, wild oats, or whatever foreign material may be in it, and the actual number of bushels that are received into the elevator are the bushels which it is estimated there will be after the grain has been cleaned and all of the foreign material taken out of it. Therefore the number of bushels of No. 1, No. 2, No. 3, and No. 4 wheat taken into the elevator represents the number of bushels after the dockage has been taken out; and if there were a dockage of 2 pounds to a bushel under the Minnesota system, there would be 58 pounds of actual wheat which would be graded into that elevator, and not 60 pounds. So, in the grading out, the amount of wheat that is taken in and shipped out should always be exactly the same. The dockage is sold entirely independently of the receipts in and the shipments out.

In the State of Illinois, where they have a different system, the amount of chaff, weed seed, and other foul stuff would affect the grade, and therefore there would necessarily be, if it were followed accurately, a less amount of a certain grade shipped out than there was taken in; but not so with the elevator that is discussed in the report. The Senator from Minnesota [Mr. NELSON] has never taken any different view, but agrees with me entirely upon that, because we are both well acquainted with that particular market, and no question has ever been raised as to its accuracy, but the claim now is that that custom has been to a great extent changed in Minneapolis.

Mr. REED. Mr. President, the familiar expression upon the lips of the Senator from North Dakota is that "anybody at all acquainted with the grain trade knows this and that." The Senator does not mean at all to arrogate to himself all knowledge with reference to the grain business, but he constantly does it unconsciously.

The fact of the matter is that this report is a wholesale condemnation of the business of the whole country. It is not limited to Minnesota and North Dakota, but it embraces all of the business of the terminal markets. I am going to answer it in two ways, although one answer ought to be sufficient; I will give the least important first.

There is no dockage system in Kansas City. It has been utterly abolished. I understand the Senator now to say there is none in Chicago. He speaks alone of the dockage system in Minnesota. So, if the Senator were correct in all he says, and if the docking system existed in only one market, he never ought to have filed a report here charging against all other markets an iniquitous condition which he now admits could be made applicable only to one market. If we have only one bad market in the United States, and that bad market is in Minnesota, I undertake to say that instead of trying to legislate nationally to remedy an evil that is limited to one State the Senator would better go to the Minnesota Legislature and obtain his remedy.

But, sir, the answer of the Senator—and I come now to the second reason—is no answer at all. Let us assume that there is a docking system. Let us assume that 10 cars of grain are brought in, and that each car is docked 2 bushels to account for chaff or dirt or other foreign material. There would then be 200 bushels of dockage upon 100 cars of grain, and it is true that there would be that much weight allowed for in the grain. What effect, however, does that have upon the grades of the grain, and how does that affect the question before us? What is the question?

It is charged in this report that because some grain has gone into an elevator as No. 4, and some more grain as No. 3, and some as No. 2, and some as No. 1, and when the grain is taken out there is no No. 4 grain taken out, that indicates that there has been a fraudulent change of grade. That is the question we are determining.

The fact that a dockage has been allowed has nothing whatever to do with the grade of the grain. If grain upon which a dockage was allowed was nevertheless mixed with mustard seed, weed seed, light wheat, and chaff, it would, under the rules of all boards of trade, have to be graded as about No. 3 or No. 4; and therefore when it went into the elevator, although there was a dockage allowed, it would go into the elevator as No. 3 or No. 4 wheat. After it reached the elevator——

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. When I finish my sentence. After it reached the elevator and the proprietor of the elevator took his machinery and gathered out of that wheat the weed seed, the mustard seed, and the shriveled wheat, and left only the sound, true berry, when he went to take out that sound, true berry it would go out properly as No. 1 or No. 2 wheat, because the thing that reduced it from No. 1 or No. 2 wheat to No. 3 or No. 4 had been removed from the wheat.

The PRESIDING OFFICER. Does the Senator from Missouri now yield to the Senator from North Dakota?

Mr. REED. In a moment. I go back to the illustration I used the other day, which is simpler.

If, for instance, No. 1 apples had to be free from apples that were specked or rotten, and if a man were to bring to the market a thousand apples in which were 100 rotten or specked apples, the apples would grade—and I am using a purely arbitrary illustration—not No. 1, but No 2, because there were 100 specked or rotten apples in the thousand. Although the apples come in as No. 2, yet if the purchaser takes out all the specked apples and has left 900 apples without a speck, a flaw, or a blemish, when he sells the 900 apples as No. 1 he works no fraud. He has simply thrown out the element which reduced the grade.

So, when an elevator takes in wheat that is mixed with dirt, whether it is docked or is not docked; when it takes in wheat that is mixed with weed seed or mustard seed, or light grains of wheat, whether it docks or does not dock, the wheat must go in according to the grades generally established in the markets of the world as a low grade of wheat; but when the elevator separates from the whole the bad wheat, the light wheat, the mustard seed, the weed seed, and the chaff, and has left a sound, rich berry, that grain goes out, as it properly should go out, of a higher grade, and docking has nothing whatever to do with it.

The PRESIDING OFFICER. Does the Senator from Missouri now yield to the Senator from North Dakota?

Mr. REED. I do.

Mr. McCUMBER. Mr. President, I do not suppose there is any use in calling the Senator's attention to his errors in that respect, when he says that dockage has nothing to do with it, if he will still insist that it has. As a matter of fact, however, if I should sell a carload of grain in a market where the dockage system was in vogue, and it was a good No. 1 berry, but one-quarter of it was weeds and weed seed, I would still get No. 1 with one-quarter of the weight off. Therefore I would sell my grain, not for anything less because of the foul stuff that was in it, if the berry was No. 1, but for the actual grade that the berry would indicate that it should have, and I would deduct from the weight the estimate given by the inspector and weigher of the amount of foul stuff and seed; and while I paid freight upon that foul stuff and seed, it would be simply given away, or the elevator would use it for the expense of taking it out.

Mr. REED. Mr. President, now let me interrupt the Senator.

Mr. McCUMBER. I simply wish to correct the Senator's assertion that it is the same as the barrel of apples he has mentioned, which is not the case.

Mr. REED. And I still insist upon it.

I want to ask the Senator a question. Does the Senator undertake to tell us that if a man were to bring to an elevator 100 bushels of material, 50 per cent of it being good wheat and 50 per cent of it being inferior and bad wheat or weed seed or other foreign material, the mere fact that the purchaser docked that wheat one-half of its weight would then compel the elevator man, in putting that inferior stuff into his mill, to mark it with a grade such as the wheat separated from the false material ought to have? That is the point at issue.

The Senator undertakes to demonstrate that there is a fraud by showing by the books of one elevator company that a certain amount of No. 4 wheat went in and no No. 4 wheat came out. Of course, although it was docked, it would still go in as No. 4, because that is what it is, and when it was cleaned it would come out as No. 3, if it was No. 3 after it had been cleaned.

Mr. McCUMBER. I tried to tell the Senator that it would not go in as No. 4. If it had No. 2 wheat in it, and it was good No. 2 wheat, it would not go in as No. 4, even though one-third

of it was broken weeds and seeds that could be taken out. It would have its No. 2 grade, less so much in weight taken out, a sufficient amount to cover the foul stuff.

I want to correct the Senator in another respect. When the grain goes into the terminal elevator, it goes in with the certificate that is given to it, with the amount that is taken out for foul stuff. As the Senator from Minnesota [Mr. NELSON] stated the other day, in a great many instances they sow oats and wheat together, half and half, and some farmers would think they would thereby get a better grade. If they had No. 1 wheat, and half of the grain was oats, they would give the full price for the No. 1 wheat and make the deduction for the oats; that would be all. In that respect I think the Minnesota system is the best system in the United States; and I have never condemned the dockage method in any way, shape, or manner.

Mr. REED. Mr. President, a moment's consideration will convince the Senator that he is wrong, always provided that my good friend can be convinced when he has once made up his mind.

Let us assume this ordinary condition of affairs to exist: That a farmer having a wheat field has bad spots and good spots in the field. Upon part of that soil the berry will grow to perfection and will be a No. 1 berry. Upon a poorer portion of the land the berry will be imperfect, and probably will be a No. 2 or a No. 3 berry. Upon still another portion, either because of soil conditions or water or lack of water, the berry may be blighted.

Now, you have three varieties of wheat mixed together. No dockage system can equalize that. You do not throw away these inferior grains. What you do in the elevator is to lift out all of the light grains by a suction process, and they go into a class by themselves. By another process you take out the dirt, and by still a third process you may separate the sounder and larger and better berries from the less developed berries.

How can you allow for that in dockage? What they do in dockage is to make a guess at the amount of false material and sort of lump the thing off; but when the wheat goes in it can not go in as No. 1, for it is not all No. 1. It can not go in except it be graded down according to the false material in it. When you come to take the wheat from the elevator it has been cleaned and separated. Part of it is No. 1, part of it is No. 2, part of it is No. 3, and part of it is No. 4, possibly, or no grade at all. So the "demonstration" that is set forth in this report is simply a false deduction drawn from a condition of facts that is entirely innocent.

On this point, while I do not confess to the wisdom regarding this bill possessed by the Senator from North Dakota, speaking out of the depths of my humiliation, and groping as I am in the clouds of ignorance, I venture to offer the statement of a man who does know—Mr. Crowell. Referring to paragraphs 11 and 12, he says:

> The statement that there are shipped out of the great terminal elevators from two to four times as many of the high grades as were received into the elevator at such places, while nearly all of the lower grades disappear entirely, may or may not be true. It is possible that some isolated records such as this may be discovered, but the practice is not general. It is a fact, however, that many of the elevators buy such offgrades as they think they can improve by handling, drying, cleaning, etc. It is by no means fair to assume that all of the grain that goes into an elevator and misgrades is not fit, after proper and intelligent treatment, to be loaded out as No. 2 wheat; but in raising the grade of the grain the author of the report loses entirely sight of the fact that the owners are subjected to a variety of charges incident thereto. The handling, the shrinkage, and a number of other factors enter into the cost of the improvement, and a glance at the relative values of No. 2, No. 3, and No. 4 wheat in this market should prove conclusively to any unbiased investigator that the difference in values is not sufficiently great after deducting all the expenses of handling to allow an inordinate profit to the buyers.

Mr. LEWIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Asburst	Hitchcock	Nelson	Simmons
Brandegee	Hughes	Norris	Smith, Ariz.
Bristow	James	Oliver	Smith, Md.
Catron	Johnson	Perkins	Smith, Mich.
Chamberlain	Jones	Ransdell	Sutherland
Chilton	Kenyon	Reed	Swanson
Clark, Wyo.	Lane	Robinson	Thomas
Clarke, Ark.	Lea, Tenn.	Saulsbury	Thompson
Crawford	Lewis	Shafroth	Vardaman
Cummins	Lodge	Sheppard	West
du Pont	McCumber	Sherman	Works
Fall	McLean	Shields	
Gore	Martine, N. J.	Shively	

Mr. RANSDELL. I wish to announce that the senior Senator from Louisiana [Mr. THORNTON] is absent on departmental business.

Mr. THOMPSON. I wish to announce that the senior Senator from Wisconsin [Mr. LA FOLLETTE] and the junior Senator from Minnesota [Mr. CLAPP] are absent from the Senate on business of the Senate.

Mr. SHIVELY. My colleague [Mr. KERN] is temporarily absent from the Chamber on important business. He is paired with the senior Senator from Kentucky [Mr. BRADLEY].

Mr. JOHNSON. I wish to announce that the junior Senator from Florida [Mr. BRYAN] is necessarily absent from the Senate on important business.

Mr. SMITH of Michigan. I desire to announce the unavoidable absence of my colleague [Mr. TOWNSEND] on official business.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. REED. Mr. President, the next illustration I wish to afford the Senate of the highly disinterested character of this report is found in paragraph 13. It reads as follows:

> One single example of the inefficiency in inspecting and grading will be sufficient. The testimony shows that a short time ago one inspector in the city of Chicago inspected in about half a day 250 cars of grain. This required the inspector to walk about 5 miles in going down one side and returning on the other side of the cars. The inspection certainly could not have been very thorough unless he inspected both sides, and with proper implements could determine not only what was at the top but in the bottom and in the middle of each car.

Mr. President, I ask Senators what they think of a committee report that picks out one single instance, one scrap of testimony with reference to one man's work on one day, utterly disregarding the real question, which is "what is the usual and ordinary method of inspecting grain," and "how many cars are inspected on the general average"? Here is one instance picked out, one man selected.

Mr. President, I have been so often overshadowed by the superior wisdom exhibited by the author of this bill that I hesitate to make any statement regarding anything that is grown upon this earth or the method of inspecting it. Of course, I have no advice that rises to senatorial importance and knowledge; I only have the statements of men who have spent 10 or 12 years of their lives in inspecting grain. Venturing, however, to speak by that lowly authority, I remark that where grain is inspected the inspector does not "walk past one side of the car and then walk back on the other side." The statement in the report is a bagatelle, but it serves to point out the fact that there may be a difference of opinion between practical experts and "senatorial experts."

The way grain is inspected, as I am informed and believe and aver the fact to be upon information and belief, and admitting always that I may be mistaken, is this: The inspector goes out in the yards with two or three or four helpers. One of them generally goes ahead and opens the doors of the cars, breaking the seals. A ladder is placed at the door, and two of the helpers go each with his instrument. These instruments are so devised as to reach down to the very bottom of the car and bring up a sample of the grain. The samples are taken by the helpers from different parts of the car and put into a receptacle. By the samples thus obtained the inspector establishes the grade of the grain in the car. He does not trot up one side and down the other of the car.

I only speak of this because it is some slight indication that while infallibility must be ascribed in most respects to this committee, in this one instance they are at least at variance with the testimony of men who know something about the business. But the real point—the point that ought to engage the serious thought of the Senate—is that the committee pick out one single instance, one man's act, probably the most extreme they can find, and proceed solemnly to embalm it in the report. Manifestly the intent was to leave the inference that ordinarily inspection is done so hurriedly as to be farcical.

Coming to paragraph 14 of the report:

> Under the present conditions an enormous system of mixing or adulteration of grain has been built up, and this adulterated grain is forced on all the home markets and also into the foreign market, destroying all confidence in our grades and working to the detriment of the grain trade. That the manipulators and mixers reap enormous benefit through this system is beyond question, but always at the still greater detriment of the producers.

In fact, Mr. President, everything in this report is "beyond question" or "indubitably true" or "can not be disputed." It is the most positive and certain report I ever had the privilege of investigating. It fixes every fact for all time, for all countries, for all climes, and all ages. It proceeds by invariable rules by the "right line" of verity. It is always correct. There is not the "least variation or shadow of turning."

Mr. President, I speak again with that becoming modesty which always ought to accompany mediocrity; hence I do not

claim to know, but I have been informed by men engaged in the milling business and by men engaged in the grain business that the mixing of grains is frequently highly beneficial, and that for the purpose of improving the quality of a flour or for the purpose of making a flour for a special or a particular use it is frequently found not only highly desirable but absolutely necessary to mix grains. But the statement in the report proceeds upon the theory that every time any man has ever mixed two different kinds of grain, even though they were of the same general class of grain, he is a scoundrel engaged in the perpetration of an iniquitous fraud upon his customer. Of course that view leaves out of question these facts, that the customer having been swindled would speedily find another man to buy from; that the great millers of this country are not absolutely helpless; that somehow or other we still are able to produce in this country from wheat thus villainously handled a flour that is devoured by the voracious American citizen.

Mr. Crowell states, as to this paragraph 14:

This is a general statement which can not be borne out and which it is impossible to prove. That the manipulators and mixers of grain reap an enormous profit is entirely imaginary, and the present system, instead of working to the detriment of the producers, is largely in their favor. If the same system were adopted in this country that is adopted in Canada, preventing the handling and improving of lower grades of grain, the result would be that the discount of all grain misgrading would probably be two or three times what it is under existing conditions.

Let us see. If because grain is mixed or has dirt or weed seed in it it is to be denied a market, the farmer will have it left upon his hands to feed to his cattle or his hogs; but if the farmer can take that grain to an elevator and have the good taken from the bad, he thereby obtains a market for his good grain. Only the inferior stuff is left to be fed to cattle and hogs. Of course, the elevator man makes something out of the transaction, but the man who is the greatest gainer is the producer.

There is not in this country, Mr. President, to-day 15 per cent of virgin wheat fit for the mill. It is because our wheat may be carried to a "wheat hospital" and there treated that we realize its full value.

Mr. President, the next statement in this report to which I call attention is paragraph 15, which reads:

Due to the improper certification and the almost impossibility of securing a high grade of American grain abroad, our grain is being discredited in all foreign countries to such an extent as to rapidly decrease our export trade in many sections, while that of Argentine Republic, Canada, and Australia is increasing in the same proportion that our trade is decreasing.

I have already discussed that proposition, because the same statement appears earlier in the bill. I pass it now by simply reading the observation of Mr. Crowell. He states:

It is not a fact that our grain is discredited in all foreign countries, nor is it true that for this reason our exports have decreased rapidly whilst that of Argentina, Canada, and Australia have increased in the same proportion. The fact of the matter is that instead of being an export country we have turned around and become in some instances an importing country. If we have a surplus of either wheat or corn in this country in excess of the requirements, this surplus goes abroad, regardless of the quality. Improper certification has had nothing whatever to do with the volume of business to Europe. There are markets on the other side for our higher grades of wheat, and there are markets also for the lower grades of wheat, and especially is this latter statement true of such countries where the bulk of the population are accustomed to eat rye bread. It may be news to our friend, but nevertheless it is a fact that for several years we have found that such countries as Belgium, Holland, and Germany would buy freely of our lower grades of wheat, whereas they would not begin to pay a price that would justify shipment of a higher grade. The demand for high or low grades of wheat depends entirely on world-wide conditions. If the crops in the Argentine and Russia are of good quality and high grade, a demand sets in for an inferior and cheap grade of wheat from this country in order to cheapen the mixture. On the other hand, where Russia and the Argentine happen to raise a lower grade of wheat, which is often the case, they come to us for our higher grades for the purpose of blending and improving the quality from the other countries.

Mr. President, how sensible that statement is. The judgment of every man must accord with the view that as we meet in the markets of the world the competition of the grains of other countries the demand which comes to us is for the class of grain which happens at that time to be short in the market.

How sensible the statement is; how it must appeal to our candid judgment that "the real reason we are not shipping grain abroad to the same extent as formerly is because there are more mouths to consume it at home." And yet because our foreign trade has fallen off somewhat that circumstance is seized upon by the authors of this bill as conclusive evidence that we have a bad system of inspection. These gentlemen ignore the insignificant fact that within a few years our population has mounted from 45,000,000 to 90,000,000 and that our exports of grain have decreased simply because we have 45,000,000 more mouths at home to eat what we produce.

The next paragraph of the report is 16. It reads:

Under the present system purchasers are compelled to accept the certification at the great terminals and have no recourse when the product received fails to measure up to the standard of certification.

Of course, everyone must know that if grain were habitually certified from the Kansas City market purchasers of grain all over the world would shun the Kansas City market just as the ordinary man would shun a place infected with smallpox. They would go to some honest market where there was honest inspection, and Kansas City would be left with her grain upon her hands. What is true of Kansas City would be equally true of the great market of Chicago, of the great markets of Minnesota. The men who buy wheat and place it in elevators and ship it to these terminal markets and the great millers, who use hundreds of thousands of bushels in a month's time, are neither fools nor dupes. If the grain that they obtained from any market was habitually falsely certified, we all know they would cease buying in that market. Yet here is a broad indictment charging that inspections, whether conducted by sworn officers of a State or by commissioners created by boards of trade, in any and all cases are nothing but a device to promote a general conspiracy to plunder and rob.

Yet, as I pointed out earlier in this debate, the State grain inspectors are required in my State to give as high as a $20,000 bond and every deputy a $10,000 bond, and in the State of Minnesota similar bonds are given, although I think not quite so high, and upon those bonds every man injured has his right of action. In addition to that, a false certification is punished by fine or imprisonment. Not a single one of the safeguards now graven upon the statute books of the States that have official grain inspection is even hinted at in this bill. Our solace must be found in the assumption that a Government appointment immediately changes the nature of man, remodels his whole mental and spiritual apparatus, transforming him into a saint incapable of mistake and absolutely without capacity for wrongdoing.

Mr. President, if the indictment the Senator brings against all the State boards of this country is a true one, then human nature has sunk to a point so low that neither appointment by the Federal Government nor supervision by the Secretary of Agriculture will bring a remedy. Nothing but the dawn of a new day, the oncoming of the millennium, and the saving grace of religion, completely regenerating our fallen race, will ever enable us to get an honest man to act as a Government inspector, even if we pass this bill.

Paragraphs 17 and 18 of the indictment charges that—

(18) The price of our grain is finally fixed by the foreign or general demand.

The Senator from North Dakota will have to back away from that statement. I might make it, a Democrat might make it, but the last man of all this round earth who ever ought to make it is the distinguished author of this most interesting legislative proposition. I have heard him upon the floor of the Senate, in words so hot they burned like flame and in accents so pathetic as to melt the very mountains' granite ribs, declare that the price of the grain in this country is not fixed by the price of the surplus in Europe, but is in some mysterious way fixed by the tariff laws passed here in Washington.

I think I will read what Mr. Crowell has to say on this paragraph:

18. The price of our grain is not by any means in all cases finally fixed by the foreign demand. For several years recently the values in this country have been above an export basis, and our values have had no relation whatever to values in other countries. Our producers, therefore, have been able to obtain a far higher price for their grain in such years than the general foreign conditions justify.

I transfer that bit of solace over to my good friend the Senator from Michigan [Mr. SMITH], who is paying me the compliment of his attention, because he at least has remained logical, while our friend from North Dakota has abandoned the traditions of his party, and notwithstanding the declarations of all its high priests and ministers, has suddenly come to the declaration that the price of the surplus product fixes the price of the home product.

Paragraph 19 is as follows:

So universal and so intense have these complaints grown that an association has been organized in Europe with the object of securing some relief against false certification, and thereby facilitating foreign trade in American grain. Appeals have been made to the Secretary of Agriculture and the President of the United States for legislation on the part of this Government which will secure reliable certification.

As to that, Mr. Crowell, who knows about international trade, has this to say:

19. We do not know of any association that has been organized in Europe with the object of obtaining relief against false certificates. There may be such an organization, but we have not heard of it, and we believe that it will be found that any complaint that they have to register will be confined to one or two small ports, where, possibly, proper supervision does not exist.

Mr. President, I call particular attention at this moment to the statement in this report that appeals have been made to the Secretary of Agriculture and the President of the United States

for legislation on the part of the Government which will secure reliable certification. By this the committee appeals in the name of the Agricultural Department; yet the singular fact is that the Department of Agriculture has indorsed a bill providing for supervision of the grain business and the fixing of grades and has filed what amounts to a protest against this bill. Is it not strange that the committee, instead of pushing the bill of the department, seeks to head it off by this bill? Why does the Senator from North Dakota fail to make mention of the fact that the Department of Agriculture stands sponsor for a very different bill than this? The Department of Agriculture is a good thing to conjure with when you need it, but its opinions are absolutely without validity or value when they happen to interfere with the development of the little ewe lamb that the Senator has so long warmed in his bosom.

Paragraph 20 of the report is as follows:

This rigid and easy inspection system opens up another avenue of fraud—

All this committee could see was "fraud." They were looking through the jaundiced spectacles of prejudice, and everybody they saw seemed to them to be engaged in fraud. I have not any doubt that if the committee had assembled on the banks of the Mississippi River, it would have unanimously declared that the mighty torrent sweeping onward to the sea was covered with a green scum an inch thick. Everybody was engaged in fraud.

Paragraph 20 reads:

This rigid and easy inspection system opens up another avenue of fraud. The rules can be changed by the boards at any time, and grain which when it started on its journey toward a terminal would measure up to a certain grade will fall short on its arrival, and grain already in the elevator will be raised a grade by this elastic process.

Mr. President, if those practices have been going on, then our grain merchants are knaves who all ought to be in the penitentiary, our elevator men are fools who ought to be in the lunatic asylum, and our millers are imbeciles who ought to find a home within the walls of institutions devoted to the cure of idiots.

It is not stated that fraud is occasionally perpetrated; that an abuse sometimes creeps in. The indictment is sweeping. It covers everybody, apparently, who ever had a handful of wheat in his possession or a speck of flour upon his garments, save and except the farmer.

Here is what Mr. Crowell says, and what Mr. Crowell says is in consonance with the plain common sense of the matter:

20. The inspection rules can not be changed by the boards at any time, and we would very much like the author of the report to show us when and where any board of trade has autocratically raised or lowered the standards of grain at their discretion. In the first place, the States would not permit it, and the boards of trade, as large commercial organizations, would be foolish to attempt it.

But I pass on without further comment.

Thus saith the committee:

(21) The evidence taken before the committee established beyond question the fact of a systematic determination on the part of exporters not to export our highest quality of grain without mixture, because we would thereby establish such a high standard of quality that we might not be able to meet the demand, and because of this our high-grade grain must suffer a depreciated value to the extent to which it is adulterated.

Mr. Crowell has this to say of that statement—I read his comment, and make it mine, assuming the full responsibility for the language:

This is too childish to attempt to contravene, and we would like very much for the author of the report to get into the export business himself for a short time and learn a few facts. There is no systematic determination on the part of the exporters not to export our highest qualities of grain without admixture. The fact of the matter is that the European buyer will not pay for the highest qualities. We are referring now to such grades as we are conversant with, namely, hard winter wheat. It is well known that there are very many varieties of No. 2 hard winter wheat, some commanding a premium of 5 or 6 cents a bushel over others. These expensive classes the foreigner will not take hold of, and an investigation would disclose the impossibility of inducing foreigners to buy what we consider the high grades of milling wheat that are used by our own millers in this country.

I suppose if you had Federal inspection, you would change the whole course of trade in Europe, and you would suddenly cause the European miller, who does not now want these high, fine grades and can not use them, to develop an appetite among his people for that particular kind of wheat. The trouble with this report and with this bill is that they absolutely ignore all present conditions. I read now from the report of the committee:

(22) The testimony taken by the Interstate Commerce Commission in its investigations of the relation between railway lines and elevator interest shows a very extensive system of plugging cars from the loaded elevators for domestic use. It is customary to deduct arbitrarily a certain number of bushels from every car of grain and also a certain number of bushels in addition, called dockage. As the grain is elevated in the elevator it passes through a suction draft which removes from it the lighter kernels, all weed or grass seed, and foreign matter. That which is removed is again cleaned; the worst portions are then sold for about $8 per ton, and the balance, called screenings, is surreptitiously loaded from the elevator into the middle of the cars of high-grade grain.

The statement is not that plugging occasionally occurs. Ah, no; we are told plugging is the general custom and practice. The grain-elevator men seem to be a sort of agricultural blackhand society, earnestly engaged in taking the chaff out of all the grain in the car in order that when they reload they may put all of the chaff back in the middle of the car. And we are told the custom is general, and that the poor fellow who buys is simply helpless. He can not say anything; there he is, in the grasp of the octopus, without courts of justice to appeal to, without other markets to go to. He sits supine and scarce with pallid lips dare pray the Lord to save him from the monster who at one moment is engaged in taking chaff out of the grain as it is taken from the car into the elevator, and the next moment is putting the chaff back in the grain as it is reloaded from the elevator. Well, Mr. Crowell says of that:

The statement that the testimony taken by the Interstate Commerce Commission in its investigation discloses a very extensive system of plugging cars from the loaded elevators for domestic use is absolutely not true. A willful plugging of cars by any member of a reputable exchange would immediately cause his expulsion. We are speaking of the conditions existing at terminal markets to-day, and the statements made in part in section 22 appear to the writer to be absolutely malicious and unworthy of consideration.

Of course, there is an occasional plugging. Of course, there is an occasional rascal. One of those gentlemen was caught in Kansas City, was tried, and was expelled from the board of trade. His evidence is singled out and quoted by the committee. If this distinguished witness had not been caught and had not been tried, he would not have been here crying "reform." It seems to me, Mr. President, that an entire business ought not to be indicted, tried, and condemned upon the testimony of any animal that appears upon the stand with his mouth full of wool.

Paragraph 23 of the report states:

It is estimated that less than 4,000 men, comprising the various boards of trade, control the trade of the country in grain and arbitrarily fix the grades and price to be paid the producer. These boards of trade are banded together for the purpose of controlling the business, while the farmers or producers and small shippers are unorganized and unable to secure adequate justice.

Ah, what a sweet song that would be to sing out on the prairies of North Dakota! How it would be welcomed by all gentlemen who know nothing about the grain trade! But I imagine the old, horny-handed farmer of North Dakota is not in that class; he knows that when he sells his wheat he does not sell it to the board of trade of Minneapolis; that he does not sell it to a board of trade man in Kansas City; but that he sells it to some elevator man, and that elevator man would no more submit to robbery by the boards of trade than would the farmer submit to robbery by the merchant of his town; on the contrary, if the boards of trade of this country were banded together and the elevator man had a million bushels of wheat stored, or a hundred thousand bushels of wheat stored, and he found that a board of trade trust actually existed and the price offered was inadequate, he would send his grain at once to Europe; and, unless the trust was world-wide and embraced every place of consumption within the confines of this old earth, he would find a place where he could market his grain.

Of course if the farmer had to haul the grain around in his wagon, he could not do that; but the farmer sells to the elevator man, and the elevator men are in competition in most parts of the country. If they are not in competition but are in combination, then that is a question to be reached by our trust statutes.

I again read from the report of the committee:

(24) In those sections where the great terminal elevators have their line of smaller elevators throughout the country they are enabled not only to fix the price, but in many instances give instructions as to what grade shall be given at any elevator, irrespective of what the grain would properly grade.

That is a most astounding statement. If it is true, the doors of the penitentiary ought to be opened; the machinery of the Federal Government ought to be employed as to all such combinations, the prosecuting attorneys of the various States ought to get busy under the State statutes, and we ought to have a procession of board-of-trade men marching to the penitentiary. If it is not true, then it ought not to appear in this report. Does anybody here seriously think now that it is really the fact? Do they not rather conclude that, while this committee did not intend to do anything wrong, in some way or other their minds were so inflamed that imagination became more active than was their intellect. As to that paragraph Mr. Crowell says:

It is not true that where the great terminal elevators have a line of smaller elevators throughout the country that they are enabled to fix the price or control the grain. Competition alone and solely governs

the price, and the buyers at the elevators are obliged to use their own discretion as to the grade of grain, and in many cases pay for a higher grade than is warranted by the eventual judgment of the markets to which the grain is shipped.

Mr. President, I might follow up the other four or five paragraphs of this report, but I have pursued this subject ad nauseam. Let me pause here long enough to make one point clear, if I am able to do so.

State grain inspection or board-of-trade inspection or Federal inspection at the great terminal markets does not, will not, and can not directly protect the farmer, because the farmer has sold his grain before it arrives at that point. If you propose to protect the farmer as to grades of grain, there is just one way you can do it, and that is to place an official inspector at every sidetrack where the farmer unloads his grain when he is selling it to the country grain buyer. If you inspected it at that point, you might then be able to protect the farmer against the artifices of the grain buyer, who tries to convince him No. 1 grain is No. 2. If you would protect the farmer, you must do so at or before the time he sells his grain. Neither State inspection nor board-of-trade inspection nor the inspection contemplated by the bill under discussion proposes to stand by the farmer's wagon, inspect his grain, and tell him what the proper grade is. While it is true that under this bill there are 15 inspection places named in the United States, and that authority is given to the Department of Agriculture to establish other inspection places, the Senator in charge of the bill will not pretend to say that it is proposed to have grain inspectors at the sidetracks along the railroads in the country villages where the farmer delivers his grain. The moment the Senator would make that statement his bill would go out of the Senate, because that would require an army of Government agents, who, like the lice of Egypt, would spread themselves over the land and devour our substance.

My attention is called to the fact that the denatured-alcohol proposition went to pieces because the Government could not furnish that kind of inspection.

So let us get the farmer out of our mind. The farmer is not in this bill. Who is in the bill? The big elevator companies, the board-of-trade men, and the big mills. Those are substantially the only men who will be protected.

But, sir, the bill as drawn, as I have already argued, will compel the inspection, notwithstanding what I have just said, of vast quantities of grain that now never reach the terminal markets, but which is consumed substantially in the country where it is raised. It will involve a change in our system of doing business that will be injurious to the producer, injurious to the consumer, and throw our interstate business in grain into chaos. I insist that I have demonstrated from the language of the bill—if, indeed, it needed demonstration, for the language itself is scarcely susceptible of two constructions—that under this bill a farmer can not buy a load of grain upon one side of a State line and haul it across to the other side to feed to his own cattle and hogs without laying himself liable to a fine of $5,000. The only grain that can cross a State line under the terms of this bill is grain that has been inspected, and the only places nominated for inspection are the 15 cities of the United States named in the bill, 5 of them down here on the eastern coast, 3 of them out in the great interior—Chicago, St. Louis, and Kansas City—2 at the extreme north, and the rest of them west of the Sierra Nevada Mountains; so that—and I repeat what I have already said, hoping that some Senator may have come into the Chamber since I made the remark—if a feeder in the State of Ohio wanted to buy a carload of corn from a producer or from an elevator man in the State of Indiana, that corn would have to be shipped to Chicago, there graded, and then hauled clear back to Ohio; so that a farmer in Pennsylvania who wanted to buy a load of corn that was raised in Ohio would be forced to have the corn sent to Philadelphia to be graded, instead of being shipped directly to his home.

Although this bill has been prayed over, thought over, sweated over, and toiled over for six years, yet it is admitted that it will, unless amended, produce the results I have just indicated. It is true an amendment has been offered for the purpose of obviating the objection that I am discussing. I deny that the amendment will avoid the difficulty.

Mr. President, why this bill? The chairman of the committee which considered the bill was out of the city, and while he was out of the city this bill was reported. In the meantime, during the six years that this proposition has been pending in Congress, the Federal Government has not been idle. Six years ago a clause was inserted in an appropriation bill providing an appropriation to enable the Department of Agriculture to examine into the question of grades and to fix grades and standards so that there would be one grade and one standard set up by the Government, which it was expected would be adopted by all boards of trade and by all State warehouse commissions or State grain-inspection departments. Proceeding under that authorization, the Government undertook the examination of the question of grades of corn. There has been a total of $389,880 appropriated and six years of time used up in order to ascertain what are the proper grades of corn, and corn alone, and the pending Agriculture bill contains a further appropriation of approximately $75,000.

At the end of this investigation, exhaustive and careful as it was, the Government has just recently promulgated its decision as to corn; and, sir, all of its wisdom and all of its effort is set forth in this one sheet of paper which I hold in my hand and which is entitled "Grades for commercial corn," signed by B. T. Galloway, Acting Secretary of Agriculture. That is the result of six years of labor. I ask to have it incorporated as an addendum to my remarks.

The VICE PRESIDENT. Without objection, that may be done.

Mr. REED. And even now, after all that labor, experts claim that a serious mistake has been made in the specifications relating to the moisture test; but I do not care to discuss that. The department will prosecute the work further under the pending appropriation bill, which the Senator from Oklahoma [Mr. GORE] is here urging, and which carries an additional appropriation of, I think, about $78,000 for "continuing the work of investigation, classification, and fixing of grades as to the other cereals."

If Federal inspection is so much better than State inspection, if Federal authority is so much higher than the authority of any State board, why not pay some heed to the recommendations made by the Federal authorities in opposition to the very bill we are considering? If Federal employees will do the work of inspection better than any State board or any board of trade, if when we get official inspectors everything is to be absolutely perfect, it must be because of the superior wisdom possessed by Federal officials. If that is to be true in the future, it must be true at the present time.

Why, then, do we not accept the advice of the Agricultural Department? Coming then to the point, after the expenditure of $389,880 and after the employment of six years of time, what is the recommendation of the Department of Agriculture? Is it, sirs, that we shall adopt the bill advocated by the Senator from North Dakota? It is nothing of the kind. It is a distinctly different recommendation.

Bear in mind that Federal authority is always sufficiently ready to extend the scope of its power. It is not because the board is wicked or selfish, but because power creates the appetite for power. Yet, with that rule working, the Department of Agriculture does not recommend the bill introduced by the Senator; the department recommends an entirely different proposition.

Singularly enough, while the Senator from North Dakota quoted from the department, he did not dwell at length upon what the department says with reference to his bill. Mark you, there is a difference between Government inspection and Government supervision. Government inspection is provided for by the McCumber bill. That bill proposes that the employees shall be appointed by the Government to inspect the grain, to fix the grades, and to do all of the work; but Government supervision requires only that the Government shall fix standards and that there shall be here and there a man stationed to see that these standards are enforced.

What says the department in regard to this? The man who has up to this time had charge of investigations heretofore prosecuted by the Agricultural Department is J. W. T. Duvel, crop technologist. I put in the RECORD his letter of April 28, together with the statement thereto attached:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PLANT INDUSTRY,
Washington, D. C., April 28, 1914.

Hon. JAMES A. REED,
United States Senate.

DEAR SIR: In keeping with your verbal request of yesterday, I am sending you herewith brief statement of our grain standardization investigations showing the need of the standardization of grain grades, of legislation to compel the uniform application of these standards in all markets, the amount so far expended on these investigations, and some of the reasons why the department favors *Federal supervision* as provided for in House bill 14493 and Senate bill 4894 rather than *Federal inspection* as provided for in Senate bill 120.

Very truly, yours,

J. W. T. DUVEL,
Crop Technologist in Charge.

I shall not take the time of the Senate to read all of the statement inclosed to me, although I desire to have it published in

the RECORD as addenda to my remarks. I call attention to this language:

As a result of the detailed investigations of the department during the more recent period of its grain-standardization investigations, *it is fully convinced that a system of rigid Federal supervision*, such as is provided for in House bill 14493 and Senate bill 4894, will be equally as *effective in establishing and maintaining a uniform system of grading as would be possible under Federal inspection.* Moreover, under Federal supervision there does not seem to be any possibility of a clash between Federal and State authorities in those States which now have laws governing the inspection and grading of grain in the States of Kansas, Illinois, Minnesota, Missouri, Montana, Oklahoma, Washington, and Wisconsin (partial). *Further, even under a system of Federal inspection, it would be necessary for the department to maintain a system of Federal supervision very similar to that now provided for in House bill 14493 and Senate bill 4894, for without such supervision even under Federal inspection it would be impossible to keep the grading on a uniform basis owing to the difference in quality of the grain received at the different markets. Such a supervision would have to be maintained to keep the inspectors lined up.*

So, Mr. President, the Department of Agriculture, this great and infallible Department of Agriculture, to which the Senator from North Dakota shall take all of the inspection of grain away from the States because, as he alleges, it can do it better than the States, condemns the Senator's own bill and recommends that an entirely different measure be passed.

I do not mean to claim that the opinion of the Department of Agriculture ought to control the judgment of the Senate, but I do say that it ought to be a very potential argument to address to those who assert the doctrine of Federal infallibility.

Mr. President, how much will it cost to carry on Federal inspection? Nobody can tell. I invite the attention of the Senate again to the fact that in reading the bill I pointed out clearly that the Secretary of Agriculture is given the right to employ an unlimited number of men, at unlimited salaries, at an unlimited number of places, and to make all the rules and regulations which seem to him wise and proper. There is no limitation upon his authority. You make him the autocrat of the grain trade of the United States, the absolute dictator.

When I was asked the other day how much this would cost I was unable to reply, because only the infinite God, who can look down the coming years and tell us who will be the Secretary of Agriculture, and what the condition and frame of his mind may be, can answer how many places of inspection will be created, how many persons will be employed, or what salaries will be paid. But, sir, we have a little in the way of an estimate as to the cost if the system is inaugurated under the present Secretary of Agriculture, and if the places of inspection are limited to the 15 points named in the bill. Instead of the cost being $875,000, as the Senator stated, undoubtedly in the best of faith, it will, in the opinion of this crop technologist, amount to $1,500,000. Moreover, instead of the cost being 50 cents a car, as the Senator estimates, it will, according to the estimate of Dr. Duvel, be $1. If we add intrastate inspection, as contemplated by the bill, then who shall say where the bounds and limits of the number of employees or of the expense are to be fixed?

Dr. Duvel declares:

On the basis of our investigations, it is believed that the cost of inspecting grain outright by the Federal Government would be approximately $1 per car to do the work thoroughly, and that it would take a total appropriation of not less than one and one-half million dollars.

The committee's report has been filed only 90 days. Within that short period the estimate of the committee has grown from $350,000 to $600,000, as stated in the report, to $850,000, as stated in the bill, and now comes the Agricultural Department with an estimate of $1,500,000. An estimate which within 90 days of time increases from $350,000 to $1,500,000 is certainly in a healthy, growing condition. All this has, of course, transpired before the bill has become a law. The experience of the past indicates that after a law has been enacted the appropriations grow faster than Jonah's gourd. If the estimate has within 90 days increased fourfold, what will be the limit of its burden upon our people?

Oh, but—

Says the Senator from North Dakota—

this is not to come out of the coffers of the Government. Every dollar of it will be paid back.

Mr. President, I know of no way of expending $1,500,000 unless somebody, at some time and some place, has to pay it. In the end it represents that much of sweat and labor; that much of the agony of toil. If we are to collect back this money which we are to pay out, we must get it from somebody. Now, who will have to pay it?

Why, sir, I affirm that the farmers of the United States will pay every dollar of it. Every dollar of expense that is incurred, from the time the wheat leaves the farm until it reaches the ultimate consumer, must be deducted from the value of the wheat.

If the farmer of North Dakota could transport his wheat without cost to a market in Europe, he would get a greater price than he gets now. He obtains to-day a price which is lessened by the elevator charges, by the railroad charges, by the steamship charges, and by the inspection charges. This burden of $1,500,000 will fall upon the farmers of the country just as an increased charge of transportation ultimately comes out of the man who produces at a distance from the market and who must pay the charge to get his product to the market.

Sir, the fact that the burden of paying the $1,500,000 to be expended under this bill is to be ultimately collected from the farmers does not commend it to me. It is no great improvement over taking the money from the coffers of the United States.

Mr. President, I have violated a rule I have not broken in many years—of not talking more than an hour and a half on any proposition. I have taken this time because I thought it was necessary to read the report item by item, paragraph by paragraph, and reply to these paragraphs seriatim. I have also consumed much time in reading into the RECORD original documents. I apologize to the Senate for having so long wearied it. I hope when the bill comes to be voted upon the Members of this body will understand that it is revolutionary to the last degree, and that it is probably the most thoroughly undigested bit of legislation that has been proposed in the Senate for many years.

APPENDIX.

UNITED STATES DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C.

GRADES FOR COMMERCIAL CORN.

By virtue of the authority vested in the Secretary of Agriculture by the acts of Congress of June 30, 1906 (34 Stat., 669), and of March 4, 1913 (37 Stat., 828), to fix definite grades of grain, the following grades for corn are hereby fixed and promulgated, to take effect on July 1, 1914:

Grade classification (white yellow, and mixed corn).	Maximum percentages of—			
	Moisture.	Damaged corn.	Foreign material, including dirt, cob, other grains, finely broken corn, etc.	"Cracked" corn, not including finely broken corn. (See General Rule No. 9.)
No. 1	14.0	2 Exclusive of heat-damaged or mahogany kernels.	1	2
No. 2	15.5	4	1	3
No. 3	17.5	6	2	4
No. 4	19.5	8 May include heat-damaged or mahogany kernels not to exceed— ½ per cent.	2	4
No. 5	21.5	10 1 per cent.	3	5
No. 6	23.0	15 3 per cent.	5	7
"Sample"	See General Rule No. 6 for sample grade.			

GENERAL RULES.

(1) The corn in grades No. 1 to No. 5, inclusive, must be sweet.
(2) White corn, all grades, shall be at least 98 per cent white.
(3) Yellow corn, all grades, shall be at least 95 per cent yellow.
(4) Mixed corn, all grades, shall include corn of various colors not coming within the limits for color as provided for under white or yellow corn.
(5) In addition to the various limits indicated, No. 6 corn may be musty, sour, and may also include corn of inferior quality, such as immature and badly blistered.
(6) All corn that does not meet the requirements of either of the six numerical grades by reason of an excessive percentage of moisture, damaged kernels, foreign matter, or "cracked" corn, or corn that is hot, heat damaged, fire burnt, infested with live weevils, or otherwise of distinctly low quality shall be classed as sample grade.
(7) In No. 6 and sample grade, reasons for so grading shall be stated on the inspector's certificate.
(8) Finely broken corn shall include all broken particles of corn that will pass through a perforated metal sieve with round holes nine sixty-fourths of an inch in diameter.
(9) "Cracked" corn shall include all coarsely broken pieces of kernels that will pass through a perforated metal sieve with round holes one-quarter of an inch in diameter, except that the finely broken corn, as provided for under rule No. 8, shall not be considered as "cracked" corn.
(10) It is understood that the damaged corn, the foreign material, including pieces of cob, dirt, finely broken corn, other grains, etc., and the coarsely broken or "cracked" corn, as provided for under the various grades, shall be such as occur naturally in corn when handled under good commercial conditions.
(11) Moisture percentages, as provided for in these grade specifications, shall conform to results obtained by the standard method and tester, as described in Circular No. 72, Bureau of Plant Industry, United States Department of Agriculture.

In testimony whereof I have hereunto set my hand and the official seal of the Department of Agriculture this 3d day of January, 1914.

[SEAL.] B. T. GALLOWAY,
Acting Secretary of Agriculture.

STATEMENT OF GRAIN STANDARDIZATION.

Our grain-standardization investigations have been carried on with a view of securing definite and reliable data to serve as a basis for the

fixing of definite standards for the grading of commercial grain entering into interstate and foreign commerce, such standards when fixed to be uniform throughout the United States.

NEED OF STANDARDIZATION OF GRAIN GRADES.

This work was first definitely organized in 1906 as a result of the numerous complaints being received by the department as to the lack of uniformity in the grading of grain in the various markets. The investigations of the department have shown that the complaints were well founded, and, in addition to showing that there is no uniformity in the grading of grain in the different markets, it has been found that there is also a wide variation in the grading in the same markets during different years, or even during different seasons of the same year, even though the wording of the grade specifications and rules may remain the same.

LEGISLATION TO COMPEL UNIFORM APPLICATION IN ALL MARKETS.

The members of the grain trade have earnestly attempted to improve these conditions, and through the efforts of the Grain Dealers' National Association the uniform rules for grades as promulgated by that association were adopted in whole or in part by many of the markets. The national association, however, in the absence of any authority to enforce the rules, was not able to maintain uniformity, which condition is now fully conceded by the association. Moreover, the grain trade is now practically unanimous in the belief that there should be a standardization of grain grades by the Federal Government, such grade specifications to be based on sound scientific principles. Such standards have already been fixed for corn after thorough investigations and hearing given by the Secretary of Agriculture to the grain interests at large. With but few exceptions, the grain interests of the country are likewise strongly in favor of some Federal control of the grading of grain entering into interstate and foreign commerce, in that it has been fully demonstrated that such control is necessary in order to maintain a uniform application of the rules and standards which may be fixed from time to time. While there is most urgent need for some specific legislation to bring about uniformity and reliability in grading, there is, however, some differences of opinion as to the form in which this authority should be applied. Some of the grain trade believe that the Federal Government should assume the entire burden and responsibility of inspecting and grading grain; a greater number, however, favor Federal supervision rather than Federal inspection.

REASONS WHY DEPARTMENT FAVORS FEDERAL SUPERVISION.

As a result of the detailed investigations of the department during the more recent period of its grain-standardization investigations, it is fully convinced that a system of rigid Federal supervision, such as is provided for in House bill 14493 and Senate bill 4894, will be equally as effective in establishing and maintaining a uniform system of grading as would be possible under Federal inspection. Moreover, under Federal supervision there does not seem to be any possibility of a clash between Federal and State authorities in those States which now have laws governing the inspection and grading of grain in the States of Kansas, Illinois, Minnesota, Missouri, Montana, Oklahoma, Washington, and Wisconsin (partial). Further, even under a system of Federal inspection, it would be necessary for the department to maintain a system of Federal supervision very similar to that now provided for in House bill 14493 and Senate bill 4894, for without such supervision even under Federal inspection it would be impossible to keep the grading on a uniform basis owing to the difference in quality of the grain received at the different markets. Such a supervision would have to be maintained to keep the inspectors lined up.

On the basis of our investigations, it is believed that the cost of inspecting grain outright by the Federal Government would be approximately $1 per car to do the work thoroughly, and that it would take a total appropriation of not less than one and one-half million dollars. This, I presume, however, is not at item of importance, as the service would be made practically self-sustaining.

AMOUNT EXPENDED ON GRAIN-STANDARDIZATION INVESTIGATIONS.

The total expenditures on the grain-standardization investigations to date have been approximately $375,000, as shown on the accompanying sheet, the total lump-fund appropriations available for the eight years being $389,880.

Mr. McCUMBER. Mr. President, I do not know, of course, with what purpose the Senator set out in trying to arrive at a conclusion as to what this bill really is. I can simply say that if his purpose had been to misrepresent and to misinterpret it, he could not have been more successful in his effort than he has been.

I do not desire to take up the matter for discussion at this late hour. I desire more than anything else to have an opportunity to get a vote upon the bill, and to get a vote upon it to-morrow, if possible. While we should take a day or more to reply to the long addresses that have been made against it by the Senator from Illinois [Mr. SHERMAN], the Senator from Minnesota [Mr. NELSON], and the Senator from Missouri [Mr. REED], I am especially desirous of closing in the shortest possible time and yet have an opportunity to reply briefly to their arguments.

I shall ask, then, unanimous consent for a time to vote; and, preliminary to that, as there must be a call of the roll, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fall	Nelson	Smith, Ga.
Brady	Gore	Norris	Smith, Mich.
Brandegee	Hitchcock	Overman	Smoot
Bryan	Hughes	Perkins	Sterling
Burton	James	Ransdell	Thomas
Catron	Johnson	Reed	Thompson
Chamberlain	Jones	Robinson	Vardaman
Chilton	Lane	Shafroth	Walsh
Clark, Wyo.	Lea, Tenn.	Sheppard	Warren
Clarke, Ark.	McCumber	Sherman	West
Cummins	McLean	Simmons	
Dillingham	Martine, N. J.	Smith, Ariz.	

Mr. LANE. I wish to announce that the junior Senator from Minnesota [Mr. CLAPP], the senior Senator from Wisconsin [Mr. LA FOLLETTE], and one other Senator, whose name I have forgotten, are in attendance on the Indian Affairs Committee.

Mr. SMITH of Michigan. I desire to announce the unavoidable absence of my colleague [Mr. TOWNSEND] on business of the Senate.

The VICE PRESIDENT. Forty-six Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of the absentees.

The Secretary called the names of the absentees, and Mr. BRISTOW and Mr. KENYON answered to their names when called.

Mr. VARDAMAN. I desire to announce the unavoidable absence of the junior Senator from South Carolina [Mr. SMITH]. He is absent on important business.

Mr. SHIVELY entered the Chamber and answered to his name.

Mr. WALSH. I desire to announce the absence of my colleague [Mr. MYERS]. He is still detained from the Senate by illness.

The VICE PRESIDENT. Forty-nine Senators have answered to the roll call. There is a quorum present.

Mr. McCUMBER. Mr. President, while the discussion against this bill has continued during several weeks, and while I really ought to have more time than I shall certainly attempt to allow myself to reply, I am desirous of bringing this matter to a speedy conclusion. As there will be, I think, but three or four more speeches at most, the Senator from Oklahoma [Mr. GORE] desiring to explain his amendment, and the Senator from South Dakota [Mr. STERLING] desiring to speak briefly, and I desiring very briefly to answer, I ask unanimous consent that to-morrow at 1 o'clock the unfinished business may be laid before the Senate, and that not later than 4 o'clock to-morrow afternoon the Senate shall proceed to vote upon the bill and all amendments thereto, and that not more than five minutes' time shall be consumed by any Senator in explaining any amendment offered to the bill, and that no Senator shall speak more than once upon the same amendment after 4 o'clock.

Mr. REED. Mr. President, I wish to ask the Senator a question for information. The time limit upon speeches the Senator fixes as beginning at 4 o'clock?

Mr. McCUMBER. Yes; and the time limit upon amendments.

Mr. REED. Yes. I suggest to the Senator that he add to his proposition that prior to 4 o'clock no one shall be permitted to speak longer than 30 minutes.

Mr. McCUMBER. Mr. President, I hardly think that would be fair.

Mr. REED. With the exception of the Senator himself, who shall be accorded an hour's time. That would leave a little time for other Senators. Would not that be satisfactory?

Mr. McCUMBER. It would be satisfactory to me, but not to others, and I may take less time than that.

Mr. REED. I want some limit, if we are going to fix an hour to-morrow when we shall begin voting upon amendments and the speeches then shall be limited to five minutes. I am in accord with that idea; but I think the time intervening between 1 o'clock and 4 o'clock ought also to be embraced within the time-limit regulation—not the five-minute regulation, but some reasonable limit—so that one Senator can not take the floor and hold it to the exclusion of everybody else. I do not mean that the Senator from North Dakota would do that. I should be just as likely to do it as he.

Mr. McCUMBER. I want to speak, but I do not think I will take over an hour. I expect to get through in less than an hour; but I should not want to take it upon myself to limit some other Senator to exactly 30 minutes.

Mr. NORRIS. Mr. President, I should like to suggest to the Senator that while I am as anxious, I think, as he to reach a conclusion on this bill, I have given notice that I shall address the Senate to-morrow after the conclusion of the routine morning business; and if his request is not objected to, it will necessarily cut me out. I do not care to speak on the grain-inspection bill; but even assuming that the routine morning business will not consume much time to-morrow morning, I shall not be able to finish by 1 o'clock. I shall require, I think, between an hour and an hour and a half.

Mr. McCUMBER. Would not the Senator, to accommodate us, make his speech on Saturday, so that we may get through with this bill to-morrow? It has been on the calendar so long and it has been discussed so long that we are all getting very anxious to vote on it.

Mr. NORRIS. I understand that, but it seems to me the bill ought not to be used to cut out everything else. It has been given very generous consideration. As the Senator knows, I

am in favor of the bill, and I would not want to do anything to jeopardize it; but it occurred to me that the Senator might commence at the regular hour, at 2 o'clock to-morrow, or if there was an understanding that immediately after the morning business I might make my remarks, if I am not interrupted and the morning business does not consume much time to-morrow morning, I will be through before 2 o'clock. Of course I would want to finish, however, if I commenced. If the Senator's request could be modified so that we would commence with the bill at the conclusion of my remarks, I do not believe it would delay the Senator. If the morning business should be short, as it often is, it would not delay the Senator beyond half past 1.

Mr. McCUMBER. I will say to the Senator that I would be willing to modify it so that we will have the matter before the Senate at half past 1 and vote at half past 4. I think the Senator could get others to agree as to the morning business and allow him to go on immediately after the routine business. I do not think he would find any objection if he would ask to proceed immediately after the introduction of bills.

Mr. NELSON. Would it not be better to take up the bill at the regular hour, 2 o'clock, and then surely the Senator from Nebraska would have time to finish?

Mr. McCUMBER. I certainly think we ought to have three hours, with three or four Senators who wish to speak.

Mr. NORRIS. I will make this suggestion to the Senator: I, of course, do not want to interfere with the arrangement he has proposed. I suggest that he submit a request that the bill be taken up immediately after the conclusion of my remarks, and if anything does happen to-morrow in the course of the morning business so as to have the routine business extend for more than half an hour, I will not undertake to make my remarks to-morrow.

Mr. McCUMBER. Will the Senator agree to say at the conclusion of his remarks and not later than 2 o'clock?

Mr. NORRIS. I think that would be perfectly satisfactory.

Mr. McCUMBER. I would have a right anyway to bring up the bill at 2 o'clock.

Mr. NORRIS. The Senator would have a right to do that, and, of course, I would have a right also, if I could get recognition, to proceed after 2 o'clock, which, of course, I do not want to do. I would dislike to begin my remarks and be nearly through and then have to quit. Unless I can finish them to-morrow I do not want to commence to-morrow.

Mr. McCUMBER. How long a time does the Senator wish to take?

Mr. NORRIS. I do not know exactly how long, but, in my judgment, I will take less than an hour and a half. Of course, if I were interrupted, it would extend the time.

Mr. McCUMBER. Would it be satisfactory to the Senator if I would modify my request for unanimous consent, so that at 2 o'clock we shall begin the discussion and that we shall vote at 5 o'clock, giving three hours? I will state that the only amendments I purpose to offer are short amendments to make clear what I intend and what I say the bill means now. Those are the only amendments that I shall offer. That being the case, if there is no objection to that, Mr. President, I would modify my request as I have stated.

Mr. NELSON. I suggest that we agree to take the vote at half past 4.

Mr. McCUMBER. Other Senators want to make the hour 5. I will change my request for unanimous consent and ask that the unfinished business be laid before the Senate at 2 o'clock, that a vote upon the bill and all amendments shall be taken not later than 5 o'clock, and that we complete the consideration and have a vote upon the bill and all amendments during the legislative day.

Mr. NELSON. The calendar day.

Mr. McCUMBER. During the calendar day. I am perfectly willing to have it that way. I have already asked that the limit be five minutes upon any remarks, and that no Senator shall speak more than once upon the bill or an amendment.

Mr. REED. And that no Senator shall speak prior to 4 o'clock more than one hour.

Mr. McCUMBER. Very well; I will consent to that.

Mr. SMITH of Georgia. Let the request be stated.

The VICE PRESIDENT. The Secretary will state it.

The SECRETARY. The Senator from North Dakota asks unanimous consent that on May 1, 1914, at 2 o'clock p. m., the Senate will proceed to the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes, and that not later than 5 o'clock p. m. on that day the Senate will proceed to vote upon any amendment that may be pending and any amendments that may be offered, and upon the bill, through the regular parliamentary stages to its final disposition, provided that after the hour of 5 o'clock p. m. no Senator shall speak more than once or for a longer period than five minutes upon the bill or any amendments that may be pending or offered, and that prior to the hour of 5 o'clock no Senator shall speak for a longer period of time than one hour.

Mr. CLARKE of Arkansas. I did not hear the statement read that the measure should be disposed of on the calendar day to-morrow.

Mr. McCUMBER. That is understood.

Mr. CLARKE of Arkansas. I did not hear it read. It is not contained in the agreement.

Mr. HITCHCOCK. I suggest that the limit on a speech should be half an hour instead of one hour.

Mr. McCUMBER. I wish to say to the Senator, and I think he will justify me in this, that, having the bill in charge, while I may not take a full hour I have to answer the arguments that have been continuous for three weeks on the bill. I think I can cover them within half an hour, but I do wish to take an hour if it is necessary.

Mr. HITCHCOCK. I suggest that the Senator has spoken several times already, and that if he occupies an hour between 2 and 5 o'clock——

Mr. McCUMBER. That gives two more hours.

Mr. HITCHCOCK. It gives only two hours for speeches by other Senators.

Mr. McCUMBER. I have heard of only two other Senators who wish to speak. The Senator from Oklahoma [Mr. GORE] said he would probably wish to speak about 30 minutes and the Senator from South Dakota [Mr. STERLING] wishes to speak. So I think there will be no difficulty in arranging it.

Mr. HITCHCOCK. I think there ought to be a longer limit of time or a greater restriction upon any one Senator; I do not care which. If the time of a Senator is limited to half an hour, that will give an opportunity for everyone wishing to speak.

Mr. McCUMBER. I will say to the Senator that I really think I should be given at least an hour to reply to all the arguments which have been made. I hope the Senator will not object. If I can make my speech in less than that time, I certainly will do so.

Mr. WEST. I suggest that the time be limited to half an hour, except for the Senator from North Dakota, who has the bill in charge.

Mr. HITCHCOCK. Unless the time be extended or the period for any Senator be limited to half an hour, I shall object.

Mr. STERLING. Mr. President, I think, in view of the fact that the Senator from North Dakota has had the bill in charge from the beginning and has rather borne the burden of the support of the bill, it is nothing more than fair and just that he should be accorded one hour in which to sum up and answer the arguments adduced on the other side. I trust the Senate will give that time to the Senator from North Dakota.

Mr. McCUMBER. Will not the Senator from Nebraska consent to that?

Mr. HITCHCOCK. I can not vary my consent unless the time is extended. I think it is unfair for few Senators to occupy so much time and then cut everyone else out.

Mr. McCUMBER. My attention was called by another Senator. So I did not hear the last remark of the Senator from Nebraska.

Mr. NORRIS. I should like to suggest to the Senator from North Dakota that he might meet my colleague's suggestion by making it a part of the request that the vote shall be taken on the legislative day to-morrow, and let the debate run over until the next day. If the limitation is fixed, there can not certainly be very much debate on Saturday, and we would reach a vote on the bill very early in the day.

Mr. McCUMBER. That would be satisfactory to me, but it is not satisfactory to the Senator from Minnesota [Mr. NELSON].

Mr. NELSON. I shall object to fixing it on the legislative day. I want to dispose of it on the calendar day.

Mr. NORRIS. Would the Senator from Minnesota object to the bill going over until the calendar day of Saturday, providing that the limitation proposed is made, if we did not get through with it at some reasonable hour to-morrow evening when the Senate is ready to adjourn?

Mr. NELSON. I feel that the matter might well be disposed of to-morrow. I will suggest to the Senator from North Dakota that outside of his own speech the other speeches be limited to 15 minutes. Then there will be an opportunity for a number of speeches.

Mr. STERLING. I would object to limiting the speeches of other Senators to 15 minutes. I thought at first that 30 minutes was all too short a time, and yet I concluded that what

I had to say could be said in 30 minutes. I am satisfied with an arrangement of that kind.

Mr. SMITH of Michigan. Mr. President, I object to the request of the Senator from North Dakota.

Mr. McCUMBER. If I can not secure unanimous consent, I of course will have to go on to-morrow.

Mr. NORRIS. Rather than see the matter fail, I will say to the Senator from North Dakota that I will waive any preference that might be given on account of the notice, and give notice that I will address the Senate on Saturday instead of Friday, so he can submit the request to commence earlier in the day if we can not reach an agreement in any other way.

Mr. McCUMBER. Would that be satisfactory to the Senator from Michigan? Of course I appreciate very much the Senator's kind suggestion and thank him for making it, but I do not know that that would meet the objection of the Senator from Michigan.

Mr. SMITH of Michigan. No; it does not meet the objection. I object to the request.

Mr. BRYAN. May I ask the Senator from North Dakota to yield to me that I may present a conference report?

Mr. McCUMBER. If we can not reach a unanimous-consent agreement, and I understand we can not, I certainly yield the floor for the day, and we will go on with the bill to-morrow.

FORTIFICATIONS APPROPRIATIONS—CONFERENCE REPORT.

Mr. BRYAN. I ask the Chair to lay before the Senate the conference report on the fortifications appropriation bill.

The Secretary read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12235) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 3, and 5.

That the House recede from its disagreement to the amendments of the Senate numbered 6, 7, 8, 9, 10, 11, 12, and 13; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,200,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,000"; and the Senate agree to the same.

N. P. BRYAN,
GEORGE C. PERKINS,
Managers on the part of the Senate.

SWAGAR SHERLEY,
GEORGE WHITE,
WILLIAM M. CALDER,
Managers on the part of the House.

Mr. BRYAN. I ask that the conference report be agreed to.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

AGRICULTURAL EXTENSION WORK.

The VICE PRESIDENT. The Chair lays before the Senate a message from the House of Representatives.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES,
April 30, 1914.

Resolved, That the Clerk of the House be directed to return to the Senate, in compliance with its request, the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, and the message of the Senate agreeing to the conference report thereon.

The VICE PRESIDENT. The Chair understands that the Senator from Utah [Mr. SMOOT] has moved to reconsider the vote by which the conference report was agreed to.

Mr. SMITH of Georgia. Mr. President, I desire to call attention to the RECORD. The Senator from Utah has not moved to reconsider the vote. There is no such motion shown by the RECORD.

Mr. SMOOT. I will read the RECORD as the motion was made:

Mr. President, I now make the motion that the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, be recalled from the other House for further consideration.

Rule 13, paragraph 2, is as follows:

When a bill, resolution, report, amendment, order, or message, upon which a vote has been taken, shall have gone out of the possession of the Senate and been communicated to the House of Representatives, the motion to reconsider shall be accompanied by a motion to request the House to return the same; which last motion shall be acted upon immediately, and without debate, and if determined in the negative shall be a final disposition of the motion to reconsider.

In the motion that I made I asked, of course, that the report be recalled for further consideration.

Mr. SMITH of Georgia. Mr. President, the Vice President thereupon said:

The question is on the motion of the Senator from Utah [Mr. SMOOT] to recall the bill named by him from the other House.

In the earlier part of the discussion the Senator from Washington [Mr. JONES] stated that he desired to move to reconsider, but that he did not have the right to make that motion, as he was not in a parliamentary position to make it. The Senator from Utah did not make a motion to reconsider. That is not a motion to reconsider. It does not suggest what was to be done by it. The recall would leave it in the control of the Senate, and a motion to reconsider could have been entered.

The VICE PRESIDENT. That, unfortunately for the contention of the Senator from Georgia, is what the Journal shows was done, and it was approved this morning:

Mr. SMOOT entered a motion to reconsider the vote of the Senate agreeing to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereof, and the United States Department of Agriculture; and

On motion by Mr. SMOOT, that the Secretary be directed to request the House of Representatives to return the said conference report and the bill to the Senate, it was determined in the affirmative—yeas 32, nays 30.

That is the entry in the Journal, not the CONGRESSIONAL RECORD. The Journal of the Senate was read this morning and approved. The action must be in accordance with the Journal; and the question is now, Shall the vote whereby the conference report was agreed to be reconsidered?

Mr. SMITH of Georgia. I suppose that the approval of the Journal this morning would control, unless there was a motion to correct it. The statement of the Secretary in the Journal is not sustained by the RECORD. The RECORD shows nothing of the kind having been done. I have read the entire RECORD in vain to find it.

The VICE PRESIDENT. The Senator from Georgia will realize that the Chair can not keep in mind the entire proceedings of the Senate, and that the very purpose of reading the Journal each morning is that the Senate may know whether or not the proceedings are correctly recorded by the Journal clerk. The Journal was read and approved this morning. The question before the Senate, therefore, is, Will the Senate reconsider a vote whereby the conference report was agreed to? That motion, the Chair thinks, is not debatable.

Mr. JONES. Mr. President——

The VICE PRESIDENT. All in favor of reconsidering the vote whereby the conference report was agreed to will say "aye."

Mr. SMITH of Georgia. Mr. President——

The VICE PRESIDENT. Those opposed will say "no." The noes seem to have it.

Mr. CUMMINS. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JONES. The yeas and nays have been ordered, I understand?

The VICE PRESIDENT. They have been ordered.

Mr. JONES. I suggest the absence of a quorum before the roll call.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Martine, N. J.	Simmons
Brady	Hitchcock	Nelson	Smith, Ariz.
Bristow	Hollis	Norris	Smith, Ga.
Bryan	Hughes	Overman	Smith, Mich.
Burton	James	Perkins	Smoot
Catron	Johnson	Pomerene	Sterling
Chamberlain	Jones	Ransdell	Stone
Chilton	Kenyon	Reed	Thomas
Clark, Wyo.	Lea, Tenn.	Robinson	Thompson
Clarke, Ark.	Lee, Md.	Saulsbury	Townsend
Cummins	Lewis	Shafroth	Walsh
Dillingham	McCumber	Sheppard	West
Fall	McLean	Sherman	

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present.

Mr. SMITH of Georgia. I move to lay the motion to reconsider on the table.

The VICE PRESIDENT. The motion of the Senator from Georgia is to lay the motion to reconsider on the table.

Mr. JONES. I want to make a parliamentary inquiry, Mr. President. If that motion is carried, then would it have the effect of adopting the conference report under which certain State legislatures would put all this money in the control of certain colleges?

Mr. SMITH of Georgia. The Senator from Washington has not the right to debate this subject.

Mr. JONES. I am not debating it. I am merely making a parliamentary inquiry.

Mr. SMITH of Georgia. The Senator is debating it. He is enumerating the facts, and he has not any right to do so.

Mr. SMITH of Arizona. Regular order!

Mr. CLARK of Wyoming. I rise to a parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator from Wyoming will state his parliamentary inquiry.

Mr. CLARK of Wyoming. The yeas and nays having been ordered on the preceding motion, my inquiry is whether or not there is any necessity of taking any parliamentary action to dispense with that order?

The VICE PRESIDENT. The Chair is of the opinion that a motion to lay on the table is a privileged motion, and that it is in order. Of course, the adoption of the motion to lay on the table would end the motion to reconsider.

Mr. CUMMINS. Upon that motion I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

Mr. CLARKE of Arkansas (when his name was called). I have a pair with the junior Senator from Utah [Mr. SUTHERLAND]. I observe that he is not present, but I transfer my pair with him to the junior Senator from South Carolina [Mr. SMITH] and vote. I vote "yea."

Mr. DILLINGHAM (when his name was called). I am paired on this question with the senior Senator from Maryland [Mr. SMITH], but I transfer that pair to my colleague [Mr. PAGE] and vote "nay."

Mr. JAMES (when his name was called). I transfer the pair which I have with the Senator from Massachusetts [Mr. WEEKS] to the junior Senator from Nevada [Mr. PITTMAN] and vote. I vote "yea."

Mr. JOHNSON (when his name was called). I have a pair with the junior Senator from North Dakota [Mr. GRONNA]. I transfer that pair to the junior Senator from Virginia [Mr. SWANSON] and vote "yea."

Mr. WALSH (when the name of Mr. MYERS was called). My colleague [Mr. MYERS] is absent on account of sickness. He is paired with the Senator from Connecticut [Mr. MCLEAN].

Mr. O'GORMAN (when his name was called). I am paired with the senior Senator from New Hampshire [Mr. GALLINGER]. In his absence I withhold my vote.

Mr. SAULSBURY (when his name was called). I am paired with the junior Senator from Rhode Island [Mr. COLT]. I transfer that pair to the senior Senator from Louisiana [Mr. THORNTON] and vote "yea."

Mr. VARDAMAN (when the name of Mr. SMITH of South Carolina was called). I wish to announce the unavoidable absence of the Senator from South Carolina [Mr. SMITH] on important business.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT] and therefore withhold my vote.

Mr. RANSDELL (when Mr. THORNTON'S name was called). I wish to announce the unavoidable absence of my colleague, the senior Senator from Louisiana [Mr. THORNTON], on account of official business.

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Wisconsin [Mr. STEPHENSON], and in his absence I withhold my vote unless my vote be necessary to make a quorum.

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. LIPPITT]. In his absence I refrain from voting.

The roll call was concluded.

Mr. SWANSON (after having voted in the affirmative). I am paired with the Senator from North Dakota [Mr. GRONNA] and therefore withdraw my vote.

Mr. SHIVELY. I wish to announce the temporary absence of my colleague [Mr. KERN] from the Senate Chamber on important business. He is paired with the senior Senator from Kentucky [Mr. BRADLEY].

Mr. BANKHEAD. I have a pair with the junior Senator from West Virginia [Mr. GOFF]. In his absence I withhold my vote.

Mr. SWANSON. I desire to announce that my colleague [Mr. MARTIN] is paired with the Senator from Idaho [Mr. BRADY]. If my colleague were present, he would vote "yea."

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. CULBERSON] and his pair with the Senator from Delaware [Mr. DU PONT].

Mr. CLARK of Wyoming. My colleague, the junior Senator from Wyoming [Mr. WARREN], is detained from the Chamber. He is paired with the Senator from Florida [Mr. FLETCHER].

Mr. SMOOT. I desire to announce the unavoidable absence of the senior Senator from Kentucky [Mr. BRADLEY], who has a general pair with the junior Senator from Indiana [Mr. KERN].

I also desire to announce the absence of the junior Senator from Wisconsin [Mr. STEPHENSON], who has a general pair with the Senator from South Carolina [Mr. TILLMAN].

The result was announced—yeas 32, nays 25, as follows:

YEAS—32.

Ashurst	James	Owen	Shively
Bryan	Johnson	Pomerene	Simmons
Chilton	Lea, Tenn.	Ransdell	Smith, Ariz.
Clarke, Ark.	Lee, Md.	Reed	Smith, Ga.
Fall	Lewis	Robinson	Stone
Gore	Martine, N. J.	Saulsbury	Thompson
Hollis	Newlands	Sheppard	Vardaman
Hughes	Overman	Shields	West

NAYS—25.

Borah	Crawford	Lane	Sherman
Brandegee	Cummins	McCumber	Smoot
Bristow	Dillingham	Nelson	Sterling
Burton	Hitchcock	Norris	Townsend
Catron	Jones	Perkins	
Clapp	Kenyon	Poindexter	
Clark, Wyo.	La Follette	Shafroth	

NOT VOTING—38.

Bankhead	Goff	Page	Thomas
Bradley	Gronna	Penrose	Thornton
Brady	Kern	Pittman	Tillman
Burleigh	Lippitt	Root	Walsh
Chamberlain	Lodge	Smith, Md.	Warren
Colt	McLean	Smith, Mich.	Weeks
Culberson	Martin, Va.	Smith, S. C.	Williams
du Pont	Myers	Stephenson	Works
Fletcher	O'Gorman	Sutherland	
Gallinger	Oliver	Swanson	

So the motion of Mr. SMITH of Georgia to lay on the table the motion of Mr. SMOOT to reconsider was agreed to.

Mr. CLARKE of Arkansas. I am advised that there is nothing on the Executive Calendar that calls for action this afternoon, and I therefore move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Friday, May 1, 1914, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *April 30, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Almighty God our heavenly Father, that in spite of the untoward circumstances of life, in spite of the barriers in the way, the trend of life is ever and on toward the ideals exemplified in the life and teachings of the Lord Christ; that out of the darkness is coming a fuller light, out of error a greater truth, out of chaos a diviner order. Help us, therefore, we beseech Thee, with faith in Thee, faith in humanity, to press forward with patience, perseverance, and persistent energy toward the mark for the prize of the high calling of God in Christ Jesus our Lord, and everlasting praise be Thine. Amen.

The Journal of the proceedings of yesterday was read and approved.

SELAH G. BLAKEMAN ET AL.

Mr. SCOTT. Mr. Speaker, the bill S. 1689 having been returned from the Senate in response to House resolution 472, with the Vice President's signature canceled, I ask unanimous consent that the Speaker's signature be canceled.

Mr. MANN. Mr. Speaker, let me ask if this is a private bill that we passed for an item that had been carried in the deficiency bill of last summer?

Mr. SCOTT. It is.

The SPEAKER. The gentleman from Iowa asks unanimous consent that inasmuch as the Senate has recalled the bill S.

1689 and canceled the signature of the Vice President, that the Speaker's signature be canceled also? Is there objection?

There was no objection.

Mr. MANN. I would suggest to the gentleman that he ask to reconsider the vote by which the bill was passed and that the bill lie on the table.

Mr. SCOTT. Mr. Speaker, I ask unanimous consent that the vote whereby the bill was passed be reconsidered and that the bill lie on the table.

The SPEAKER. The gentleman from Iowa asks unanimous consent to reconsider the vote by which the Senate bill 1689 passed the House and that the bill lie on the table. Is there objection?

There was no objection.

PUBLIC BUILDING COMMISSION (H. DOC. NO. 936).

Mr. CLARK of Florida. Mr. Speaker, on behalf of the Public Building Commission, created by the act of March 4, 1913, I desire to submit the final report of that commission. I ask unanimous consent that 6,000 copies of the report may be printed as a House document. I will state for the information of the House that the cost of printing will be $212.05.

Mr. MANN. Does the gentleman desire to have the report printed as a House document and then have 6,000 additional copies printed?

Mr. CLARK of Florida. I want 6,000 copies printed as a House document for the use of the House and the Senate.

Mr. MANN. If it is ordered printed as a House document, the usual number of thirteen hundred and over will be printed.

Mr. CLARK of Florida. I am asking for an additional number of 6,000 copies to be printed for the use of the House.

The SPEAKER. The gentleman from Florida asks unanimous consent that this report be printed as a House document, and in addition to the usual number printed there shall be 6,000 copies printed for the use of the House. Is there objection? [After a pause.] The Chair hears none.

AGRICULTURAL EXTENSION WORK.

The SPEAKER laid before the House the following resolution of the Senate.

The Clerk read as follows:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, and the message of the Senate agreeing to the conference report thereon.

The resolution was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 1304. An act authorizing the Department of State to deliver to Capt. P. H. Uberroth, United States Revenue-Cutter Service, and Gunner Carl Johannson, United States Revenue-Cutter Service, watches tendered to them by the Canadian Government; and

S. 4316. An act to regulate the use of public-school buildings and grounds in the District of Columbia.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 4316. An act to regulate the use of public-school buildings and grounds in the District of Columbia; to the Committee on the District of Columbia.

S. 1304. An act authorizing the Department of State to deliver to Capt. P. H. Uberroth, United States Revenue-Cutter Service, and Gunner Carl Johannson, United States Revenue-Cutter Service, watches tendered to them by the Canadian Government; to the Committee on Foreign Affairs.

HEIRS OF THE LATE SAMUEL H. DONALDSON.

Mr. POU. Mr. Speaker, I move to take from the Speaker's table the bill (H. R. 3468) for the relief of the heirs of the late Samuel H. Donaldson and concur in the Senate amendment.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

H. R. 3468, for the relief of heirs of the late Samuel H. Donaldson, with a Senate amendment, to strike out, in line 8, the figures "1,500" and insert "840."

The SPEAKER. The gentleman from North Carolina asks to take the bill from the Speaker's table and concur in the Senate amendment. Is there objection?

There was no objection.

The Senate amendment was agreed to.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Naval appropriation bill.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole House on the state of the Union, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 14034) making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes.

The CHAIRMAN. The Clerk will read the amendment which is pending.

The Clerk read as follows:

Amend, page 17, line 20, after the figures "$5,800,000," by adding the following: "*Provided*, That no part of this sum shall be used for the purchase of projectiles unless not less than $250,000 of this appropriation shall be used for the manufacture of high-explosive torpedo shells for 12 and 14 inch guns."

The CHAIRMAN. Two points are to be decided on this question: First, the point raised by the gentleman from Illinois [Mr. MANN] that under existing law the Secretary of the Navy has no authority to manufacture projectiles, and that therefore this amendment would be not a limitation but new legislation directing the Secretary to do something not authorized by law; second, the point raised by the gentleman from Wisconsin [Mr. STAFFORD] that this amendment is in no sense a negative limitation on the use of the money, but an affirmative direction. The Chair has given both matters careful consideration and is prepared to rule. The Chair was at first inclined to lean very strongly to the view of the gentleman from Illinois [Mr. MANN], that the word "produce" does not give authority to manufacture. But on reflection the Chair believes that the use of the word "produce," taken in connection with the fact that the word "procure" is also used, does contemplate such authority. Each of these words is commonly used with different shades of meaning. But the Chair is convinced that when the law uses both words in such a way it must contemplate that under his authority to "procure" the Secretary has authority to obtain by purchase, while under his power to "produce" he has authority to manufacture ordnance material. Now, the Chair is informed by the gentleman from Alabama [Mr. HOBSON] and other gentlemen familiar with the technical terms of the Navy that the term "ordnance material" means not only the raw material but the finished product as well. Therefore the Chair is constrained to believe that the Secretary of the Navy has authority to manufacture.

Now, as to the point raised by the gentleman from Wisconsin, the Chair believes that this provision is clearly a negative limitation and not affirmative legislation. Of course the general rule is well settled, as the gentleman stated, that to be in order the proposition must be a negative prohibition on the use of the money, not an affirmative direction to an executive officer. The only difference is as to whether this is a negative prohibition or an affirmative direction. The Chair has carefully considered the precedents cited by the gentleman from Wisconsin and does not believe that any of them sustain his contention in this particular case. They were all cases where an executive officer was directed to do something that he did not otherwise have authority to do. The precedent cited in section 3975 of Hinds is an excellent illustration of this distinction. In that case, as in this, the naval appropriation bill was before the House. Mr. WEBB, of North Carolina, offered an amendment to the paragraph providing that before the construction of these new ships should be begun certain tests should be made, said tests not being otherwise authorized by law. The Chairman, Mr. Olmsted, of Pennsylvania, ruled that this was not a limitation, but new legislation, and sustained the point of order. Later Mr. WEBB offered an amendment providing that before the money should be extended certain investigations should be made and the results reported to Congress. The Chairman again sustained the point of order as legislation creating new law.

Then Mr. WEBB offered an amendment providing that no part of the money should be used for purchase of armor plate which had not been subjected to the test provided in his previous amendments, and the Chair held that it was a proper limitation for the House to say that the money should not be used except in a certain way, provided that that way was authorized by law.

The Chair is of the opinion that the present amendment contains a negative prohibition, and therefore overrules the point of order.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to return to page 17 for the consideration of the paragraph and such amendment as may be offered.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to return to page 17 for consideration of the paragraph and such amendments as may be offered. Is there objection?

There was no objection.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent that the amendment may be modified so as to eliminate the word "manufacturing" and insert in lieu thereof the word "procuring." The word "procuring" is a broader term than the word "manufacture," and it will give a greater latitude in the manner of supplying our Navy with high-explosive torpedo shells.

Mr. MANN. Let us see how it would be. What was the word in the bill?

The CHAIRMAN. The Clerk will report the amendment just as it was first presented.

The Clerk read as follows:

Amend, page 17, line 20, after the figures "$5,800,000," by adding the following:

"*Provided*, That no part of this sum shall be used for the purchase of projectiles, unless not less than $250,000 of this appropriation shall be used for the manufacture of high-explosive torpedo shells for 12 and 14 inch guns."

Mr. MANN. My colleague will see that he could not use the word "procure" in place of the word "manufacture."

Mr. FOWLER. I suggested the word "procuring." I see no reason why that can not be used.

Mr. MANN. I have no objection to the change that the gentleman desires to make.

The CHAIRMAN. If there is no objection, the Clerk will make the change in accordance with the suggestion of the gentleman from Illinois.

There was no objection.

The CHAIRMAN. The question now is on the adoption of the amendment.

Mr. FOWLER. Mr. Chairman, I understand there are several gentlemen who would like to be heard upon this amendment, and I would like to see if we can agree upon the time for debate.

Mr. PADGETT. Mr. Chairman, I think the debate might run along under the five-minute rule. We can have a reasonable time to discuss it.

Mr. MADDEN. Mr. Chairman, will my colleague yield?

Mr. FOWLER. Yes.

Mr. MADDEN. Mr. Chairman, I would like to ask my colleague what is hoped to be accomplished by the amendment beyond what the Secretary of the Navy already has the power to do?

Mr. FOWLER. Mr. Chairman, the object of the amendment is that we may supply our Navy with some high-explosive torpedo shells. Congress has the power to do that, and that is the object of my amendment. I understand that the other powers—and by that I mean the great world powers—are now supplying their naval vessels with high-explosive torpedo shells, and that they have been used at long range more effectively than any other shell. We have never supplied our vessels with high-explosive torpedo shells, as I am informed. I think the question of supplying ourselves with such shells, so that our Navy can use them in time of danger, is supported by the test of past experience and past naval investigation.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. Yes; but I have a line of argument that I desire to submit in a systematic way.

Mr. GREEN of Iowa. The gentleman uses the term "torpedo shells."

Mr. FOWLER. High-explosive torpedo shells.

Mr. GREEN of Iowa. The gentleman is not referring to shells used in torpedoes?

Mr. FOWLER. No; but what is known as the high-explosive torpedo shell. There are several which have been patented in America, among which is the Gathmann shell and the Isham shell. A high-explosive torpedo shell was used in the *Puritan* test in 1911, when a shell made in a wooden box placed along by the side of the *Puritan* put her out of business within two minutes. At the same time there was a test going on with the *Texas*, with the armor-piercing shell, such shells as are now used by the American Navy, and they pounded on the *Texas* for two days without sinking her with the armor-piercing shell, as reported by the press at the time the experiment was going on.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield for a question?

Mr. FOWLER. Yes.

Mr. BRITTEN. Mr. Chairman, does the gentleman not think that the Secretary of the Navy has now the power to buy these torpedo shells?

Mr. FOWLER. I do not know that I care to discuss that question at this time. I would rather put before the House the question of our duty than any other question that can be raised at this time.

Mr. BRITTEN. Along that line, if the gentleman will permit, the Navy Department contracted for 100 of these high-explosive shells a year ago, and 35 of them have been delivered at Indianhead. We are about to make experiments with the entire 100 of those shells, at an expense of about $350 each.

Mr. FOWLER. Yes; but I desire to state to the gentleman that the experiments with the high-explosive shell, such as the Gathmann and the Isham and other shells, have been going on in America for the last 10 or 15 years, and in every instance where the high-explosive torpedo shell has been used it has produced such deadly results that no other shell can compare with it.

Mr. BRITTEN. Right in that point, in one instance I recall the Isham shell exploded the gun itself.

Mr. FOWLER. I do not know. I am not wedded to the Isham shell or the Gathmann shell or any other shell.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield for a question?

Mr. FOWLER. Yes; but I desire to state that I would like to present my thoughts without interruption.

Mr. ROBERTS of Massachusetts. I want to understand the gentleman's argument as he goes along.

Mr. FOWLER. I yield to the gentleman.

Mr. ROBERTS of Massachusetts. Do I understand the gentleman to say that the Navy in its experiments fired at the *San Marcos* for two days with armor-piercing shells and failed to sink the ship?

Mr. FOWLER. I did not say that.

Mr. ROBERTS of Massachusetts. To what ship did the gentleman refer?

Mr. FOWLER. I did refer to the test with the *Texas*.

Mr. ROBERTS of Massachusetts. But does not the gentleman know that the *Texas* was renamed the *San Marcos* and is one and the same ship?

Mr. FOWLER. I want the gentleman to know that I used the word "*Texas*." That was her name at the time the test was made.

Mr. ROBERTS of Massachusetts. But the ship has been renamed the *San Marcos*.

Mr. FOWLER. I do not want to waste time quibbling over terms.

Mr. ROBERTS of Massachusetts. I am not quibbling over terms; but do I understand the gentleman to mean that the firing lasted two days before the *Texas* sank?

Mr. FOWLER. Yes.

Mr. ROBERTS of Massachusetts. Did the gentleman make that statement?

Mr. FOWLER. I did.

Mr. ROBERTS of Massachusetts. And do I understand the gentleman to say that when the 200-pound Gathmann was fired against the side of the *Puritan* she sank in two minutes?

Mr. FOWLER. My statement goes in the RECORD as I make it. I yielded to the gentleman for a question; but if the gentleman has no question, I do not desire to yield further.

Now, Mr. Chairman, I desire to state that, in my opinion, the torpedo shell is the most effective shell that has ever been tried in the world. I am now going to read from Ordnance and Gunnery, written by Lissak, page 583, a book which is used as a textbook by the United States Military Academy at West Point, and in speaking of the high-explosive shells made of such material as trinitrotoluol he describes the effective force as follows:

In recent experiments with a submerged target, built in exact representation of the bottom of a battleship, the explosion of a 12-inch mortar shell containing 63 pounds of high explosive, at a distance of 20 feet from the target and at a depth of 15 feet, produced serious injury to the target; 64 pounds at a distance of 15 feet nearly disrupted the target and caused bad leakage, producing dangerous injury; while 130 pounds at a distance of 15 feet disrupted the double bottom and caused the target to sink. The results showed the utility of this method of attack on vessels and the desirability of using as large an explosive as possible in the projectiles for the seacoast mortars.

Now, if the high-explosive torpedo projectile is desirable for seacoast defense because of its deadly effects, it is just as desirable in the Navy, in my judgment, and I can see no reason why it is not just as desirable to arm the American Navy—and I use the word "arm" in the same sense as supply—with the most deadly weapon and projectile that can be invented and manufactured by the ingenuity and skill of man. Mr. Chairman, I read from the Naval Manual, edited by Viscount Hythe, who is regarded as authority upon naval questions and upon the armor and the effectiveness of projectiles. I can not read very much of it on account of time, but I read from page 124, which is as follows:

From the results of that war—

Referring to the Russo-Japanese War—

it has been estimated that 100 hits from the 12-inch and other guns then in use are required to put a ship of the line out of action.

That is to say, with armor-piercing shells of that character it requires 100 hits to put out of action a vessel which was used in the Russo-Japanese War. The same authority, on page 126, in discussing the question of effectiveness of armor-piercing shells, gives a table, and in that table it is said that the 12-inch gun, loaded with armor-piercing shells, will be effective at a distance of 1,100 yards on the 2-inch, 7-inch, 8-inch, and 9-inch armor, but that on the 10-inch armor the distance is reduced to 9,400 yards and on the 11-inch armor it is reduced to 8,000 yards, which shows conclusively, Mr. Chairman, that as the distance between the fighting vessels increases the effectiveness of the armor-piercing shell decreases, and then it is well known to all men who have experience in target practice that these armor-piercing shells must strike point blank to get the greatest effective force. That can not be had in a naval engagement, because the bows of the vessels will be fronting each other, and no broadside is ever likely to be presented, so that there is not likely to be a point-blank hit from a shot with an armor-piercing shell. I have some specimens here to which I desire to call the attention of the committee——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent for an extension of my time for 10 minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOWLER. Mr. Chairman, I have some specimen photographs of armor which were tested by armor-piercing shell, and I have one plate that received six shots on a very small area, and the armor-piercing shell had no effect on it in the way of piercing or destroying it. That was a good piece of armor. I have another with three shots of attack, and it was not affected by the armor-piercing shell; but I happen to have one with some poor armor, and that was destroyed almost completely, because it was rotten.

Mr. Chairman, I was dwelling upon the question of the distances of an engagement between naval vessels in time of war, and I believe that no one will dispute the question that as the distance increases between the two antagonistic vessels, after reaching the maximum distance of effective force, the effective power of the armor-piercing shell decreases. There is a good reason for that. Mr. Chairman, the armor-piercing shell, in order to get velocity sufficient to carry it a great distance, say, 7,000, 8,000, or 9,000 yards, must be elevated. It will then take a curved course in the air, and before it reaches its destination it will not be in a position to strike point-blank against the armor of the other vessel, while, on the contrary, the high-explosive torpedo shell does not depend upon point-blank shots for its greatest force. All that is necessary is to get it to the enemy's ship with impact sufficient to explode, whatever the distance. One shot is often sufficient to sink a ship, while it requires 100 shots with armor-piercing shells to put her out, according to the authority I have just read. Now, I understand that in the Battle of Tshu Shima, between the Russian and Japanese fleets, the Japanese fleet of four vessels carried high-explosive torpedo shells, and that the Russian fleet of eight vessels, twice as large as the Japanese, carried arinor-piercing shells. It has been demonstrated, or rather reported, by Capt. Seminoff in his report on that battle in a book which he has written that the high-explosive shells carried by the Japanese Navy were not perfect shells, that the guns were worn and were practically without rifling, and when the high-explosive torpedo shell was discharged it tumbled over and over in the air like boys turning handsprings; but notwithstanding the imperfection of cannon and shell, they put the Russian fleet out of action before its officers really knew of imminent danger. At a long distance of many miles, I understand, the Japanese fleet began to bombard the Russian fleet and threw high-explosive shells before Rogestvensky realized the great danger that confronted him. This fleet was put out of commission before it was close enough for effective action by armor-piercing shells. This was no target practice at a fixed range, but it was a deadly conflict of the survival of the fittest. Like David, the little inferior fleet of Japan hurled well-directed missiles at her enemy, the Russian fleet, and won the battle before her Goliath enemy was close enough to unsheath his mighty sword.

Now, Mr. Chairman, if this be true, it illustrates this fact: America had furnished Russia most all of the armor for her fleet; in fact, we had built one of her vessels. We had supplied her with cannon and armor-piercing shells. We believed that her navy was far superior to that of Japan not only in number of ships but in armor, shot, and shell; but how badly we were fooled! Now, if our warships are a duplicate of the Russian fleet in armor and armament, then our Navy would be in the same condition as that of Russia when it met the Japanese fleet and would be likely to meet the same fate. Congress can prevent such national humiliation and destruction of life and property. The responsibility rests upon us, and if we fail to discharge our duty now it may result disastrously to our brave seamen and to our flag. Let us not wait until the horse is stolen before closing the barn door. In my opinion, from my limited investigation, one good battleship armed with high-explosive torpedo shells, with a speed sufficient to keep away from the enemy, can choose her distance of attack and sink a whole fleet armed with armor-piercing shells. This was demonstrated, Mr. Chairman, in the late naval contest between Russia and Japan. I have a clipping from a foreign publication which shows what other great world powers think of our Navy, and I insert it for what it is worth.

"UNCLE SAM MUST FIGHT JAPAN," SAYS FIENNES—BRITISH NAVAL EXPERT SEES "HUNDRED INDICATIONS" THAT CLASH IS APPROACHING—"AMERICANS LIVE IN A FOOL'S PARADISE IN THE MATTER," HE DECLARES.

LONDON, *June 20.*

Gerard Fiennes, the English naval expert, is trying his best to make Americans understand that it will probably not be long before they will have war with Japan.

There are a hundred indications, he says in an article just published in the London Graphic, which show that a collision between Japan and the United States is approaching. The Americans live in a fool's paradise in this matter.

The Japanese are full of contempt for American brag and bounce, for the lack of national spirit, or even of true nationality. They have a profound disbelief in the war worthiness of the American Navy and an acute realization of the fact that the strategical situation is overwhelmingly in their favor.

It is objected that the Japanese are too poor to fight. When will people realize the fact which all history teaches—that it is poor nations which fight? Japan is rich enough to afford war, because, directly or indirectly, she will make war pay for itself. Japan will fight very much for the same reason that prompted Bismarck to fight France.

The war will be for the consolidation of the yellow people. The Chinese despise force, but readily yield to the fear of it. Japan has beaten the most aggressive of the white powers already; victorious over another she will appear to her huge neighbor invincible. The United States offers at once the most practicable and the surest prey.

Europe is not going to lift a finger, I imagine, when war breaks out between Japan and the United States, to save the latter the islands of which they deprived Spain. Europe has a "Monroe doctrine" of its own, and it includes the determination to let the United States stew in her own juice.

Mr. McKENZIE. Will the gentleman yield?

The CHAIRMAN. Will the gentleman from Illinois yield to his colleague?

Mr. FOWLER. Yes; I yield to the gentleman; but I have another authority that I wish to read.

Mr. McKENZIE. Is there anything in the law now that prevents our Navy commanders from using these high-explosive shells?

Mr. FOWLER. Well, another gentleman asked that question a while ago, and I do not desire to discuss it, because I have not been in close touch with the Navy Department, not being a member of the Committee on Naval Affairs, and only being a student in a limited way of these great defensive and offensive weapons.

Mr. McKENZIE. The purpose of my colleague is to compel the Navy to use these shells; is that it?

Mr. FOWLER. No. That is not the object of this amendment. The object of the amendment is to supply our Navy with some high-explosive shells. The amount which is set forth in this amendment will purchase less than 1,000 shells, and that is a negligible number as compared with what we really need. Now, Mr. Chairman, I desire to call the attention of the House to what I understand is true. Admiral Strauss was asked a short time ago by a Member of this House as to whether foreign vessels were using high-explosive torpedo shells. While I have not seen the reply, yet I understand that it was—and if I am mistaken I hope the Members will correct me—that they are using such shells, but only for short range. Now, I do not know myself, because I have not talked with Admiral Strauss, but there is a late report of the result of a target practice which deals with the question of the distance at which these

missiles are used. The United States Naval Institute proceedings——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman——

Mr. FOWLER. Mr. Chairman, I desire to ask unanimous consent for five minutes more, and I think that will be the end.

Mr. PADGETT. Mr. Chairman, the gentleman has already spoken for 25 minutes, and there are some others who wish to speak.

Mr. FOWLER. I think that will be all. I want to make this point, and then I will have finished.

Mr. PADGETT. I will not object now, but I must object hereafter.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois [Mr. FOWLER]? [After a pause.] The Chair hears none, and the gentleman is recognized to proceed for five minutes.

Mr. FOWLER. Mr. Chairman, I read from the United States Naval Institute Proceedings of January–February, 1914, No. 149, page 255. This reports a target practice with high-explosive torpedo shells by Great Britain. It reads as follows:

The target-practice experiments against the old battleship *Empress of India* took place on November 4, 1913, some 30 miles from Portland, in the vicinity of West Bay, out of sight of land. The First Lord of the Admiralty and his colleagues witnessed the firing. * * * The small ships with their light-caliber guns were to open the firing, followed by the battleships and battle cruisers firing at ranges between 8 and 9 sea miles.

And, now, what was the result?

How much was attained as the result of the carrying out of the experiment can not be learned. The first onslaughts were made by individual ships, which severely peppered the target with their smaller weapons. The 12-inch guns were used, and finally the 13.5-inch guns were fired at a range of over 8 miles. When the squadron firing by the second battle squadron took place the *Empress of India* showed signs of doom. Flames burst out, and a pause was made in the bombardment while tugs pumped water onto the burning ship.

And here is what the results were:
